Health Related Professions (HRPR)

Courses

HRPR 1101. Contemporary Aspects of Disability. 3 Credit Hours.
An examination of psychological and social issues related to individual and social-cultural perspectives of disability, including social stigma and discrimination, portrayal by media, self-advocacy, family and other social relationship issues that impact the culture of disability and an individual’s quality of life. NOTE: This course can be used to satisfy the university Core Individual and Society (IN) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Course Attributes: IN
Repeatability: This course may not be repeated for additional credits.

HRPR 1201. Introduction to Health Professions. 3 Credit Hours.
This course is designed to introduce students to the concepts and models of health, health promotion, disease prevention, rehabilitation, health care service delivery systems and organizations, health care financing, as well as outcome measures of services in different settings. Explores the variety and interplay of health professions and helps students develop the ability to delineate the role, function, and value of all health professions within the health care system.

Repeatability: This course may not be repeated for additional credits.

HRPR 2103. Health Psychology and Human Behavior. 3 Credit Hours.
Introduction to health psychology, health behavior and health. The relationship between human behavior and health will be explored. Course topics include major theoretical models of health behavior, applications to chronic illness and disability, and wellness and life management approaches.

Repeatability: This course may not be repeated for additional credits.
