The Department of Public Health's undergraduate curriculum prepares students for diverse careers in the public health field that focus on creating, implementing, and evaluating interventions and programs designed to improve health status and quality of life for all individuals. The department has a national reputation, and all levels of study are accredited by CEPH (Council on Education in Public Health), including the Bachelor of Science (BS), Master of Public Health (MPH), Master of Science in Epidemiology (MS-Epi), and Ph.D. programs. As one of the few accredited undergraduate public health programs in the country, the department offers a Bachelor of Science degree in public health that serves as a national model in which students study the broad range of public health concerns, including individual disease prevention and injury/harm reduction behaviors, distribution and development of disease through epidemiological assessment and community program development, implementation, and evaluation. Students learn to use educational interventions to provide health information, gain experience in assessing the needs of target populations, clarify program goals and objectives, and develop strategies to motivate and involve their clients/patients in educational interventions. All Public Health majors take a set of common theoretical courses designed to promote an understanding of health, wellness, and disease prevention. After completing University-required General Education courses, Public Health students complete courses in the core disciplines of public health within the Department of Public Health as well as courses in other important areas outside the Department of Public Health. Students also participate in over 600 hours of fieldwork experience in public health agencies, organizations, or other entities to gain invaluable real-world experience in the field.

The Public Health major trains entry-level public health workers to provide frontline preventive health information, services, and health behavior interventions at the community level, particularly in communities with high-risk populations. Graduates typically work in voluntary health agencies, public health departments, hospitals, rehabilitation centers, corporate work sites, community health organizations, family planning clinics, and managed-care facilities. They can also apply for graduate public health programs (Master of Public Health or Master of Science in Epidemiology) or programs in other health professions.

Mission of the Department

The Department of Public Health is well-known as a regional and national leader, fostering collaboration among researchers, educators, community practitioners, and private sector leaders. We are dedicated to addressing health needs in the global community to eliminate health disparities and to increase the quality and years of healthy life. The mission of the department emphasizes the principles and practices of all core areas of public health (social-behavioral, biostatistics, epidemiology, environmental health, health policy) by creating and evaluating applied interventions, programs, curricula, and policies designed to improve the health status and quality of life of individuals and communities. The department strives to contribute to the rapidly changing knowledge base in the public health field. The department’s strong service mission ensures that faculty and students are available to the communities served by Temple University; thus the department emphasizes scholarly service to regional, state, and national institutions and organizations, including schools, hospitals, and voluntary and government health agencies. Because of the pressing needs for health services in the region, coupled with our urban location, the program emphasizes public health and health education for diverse populations.

The Department of Public Health follows the requirements set forth by Temple University regarding General Education. The department has also established additional Core and Cognate requirements for all Public Health majors.

Programs

- Bachelor of Science in Public Health for New Freshmen (http://bulletin.temple.edu/undergraduate/health-professions-social-work/public-health/public-health-new-freshmen)
Courses

PBHL 1101. Introduction to Public Health. 3 Credit Hours.
This course introduces students to the concepts and models of public health using a historical perspective on the contribution and roles of public health in society. The course introduces the contributions of the five core public health disciplines: epidemiology, biostatistics, environmental health, behavioral sciences/health education and health services administration. Students learn to identify prevention strategies such as vaccination, screening, counseling and education interventions and a range of health promotion and disease prevention modalities including environmental-occupational, legal and policy approaches. Particular attention is directed to addressing health disparities and the role of cultural competency in delivering effective public health services. Public Health Majors, Minors or students studying in the Public Health Concentration must complete this course with a C or better.

Level Registration Restrictions: May not be enrolled in one of the following: Graduate
Repeatability: This course may not be repeated for additional credits.

PBHL 1103. International Health. 3 Credit Hours.
Examines avenues of international cooperation in health; explores the most significant health problems and resources in developing and developed countries by focusing on international differences in health status, social/economic/political factors in health care, varied approaches to providing health services, the role of health workers, and the involvement of foundations and multilateral and bilateral agencies. Public Health Majors, Minors or students studying in the Public Health Concentration must complete this course with a C or better. NOTE: This course can be used to satisfy the university Core International Studies (IS) requirement. Although it may be usable towards graduation as a major requirement or university elective, it cannot be used to satisfy any of the university GenEd requirements. See your advisor for further information.

Level Registration Restrictions: May not be enrolled in one of the following: Graduate
Course Attributes: IS
Repeatability: This course may not be repeated for additional credits.

PBHL 1104. Nutrition and Health. 3 Credit Hours.
Examines food habits and nutritional needs of young adults. Considers nutritional advertisements, food faddism, fad diets, deficiency diseases, and evaluation of diets. Public Health Majors, Minors or students studying in the Public Health Concentration must complete this course with a C or better.

Level Registration Restrictions: May not be enrolled in one of the following: Graduate
Repeatability: This course may not be repeated for additional credits.

PBHL 1105. Society, Drug, and Alcohol Perspectives. 3 Credit Hours.
Examines the current use of alcohol and drugs in society and the effects of one's experience with psychoactive chemicals. This course includes historical, physiological, psychological, sociological, and philosophical perspectives. Public Health Majors, Minors or students studying in the Public Health Concentration must complete this course with a C or better.

Level Registration Restrictions: May not be enrolled in one of the following: Graduate
Repeatability: This course may not be repeated for additional credits.

PBHL 1106. Human Sexuality. 3 Credit Hours.
Explores sexuality and personal lifestyle, including human sexuality as a dimension of health personality, sex roles and sexual identity, the physiological bases of the sex drive, sexual function, and sexual response, and psychological factors related to sexual development and expression. Public Health Majors, Minors or students studying in the Public Health Concentration must complete this course with a C or better.

Level Registration Restrictions: May not be enrolled in one of the following: Graduate
Repeatability: This course may not be repeated for additional credits.

PBHL 1201. Contemporary Health Issues. 3 Credit Hours.
This course explores the basic concepts of health and how they relate to our lifestyles. The student will acquire extensive knowledge of injuries and prevention, cardiovascular disease, cancer, human reproduction, human sexuality and communicable diseases including sexually transmitted diseases and HIV/AIDS. Public Health Majors, Minors or students studying in the Public Health Concentration must complete this course with a C or better.

Level Registration Restrictions: May not be enrolled in one of the following: Graduate
Repeatability: This course may not be repeated for additional credits.

PBHL 1903. Honors Global Health. 3 Credit Hours.
Examines avenues of international cooperation in health; explores the most significant health problems and resources in developing and developed countries by focusing on international differences in health status, social/economic/political factors in health care, varied approaches to providing health services, the role of health workers, and the involvement of foundations and multilateral and bilateral agencies. Public Health Majors, Minors or students studying in the Public Health Concentration must complete this course with a C or better. NOTE: This course is restricted to Honors students only.

Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Public Health
Level Registration Restrictions: May not be enrolled in one of the following: Graduate
Cohort Restrictions: Must be enrolled in one of the following Cohorts: SCHONORS, UHONORS, UHONORSTR
Course Attributes: HO
Repeatability: This course may not be repeated for additional credits.

PBHL 2101. Disease Prevention and Control. 3 Credit Hours.
Explores selected transactions between individual, environment, and disease agents, and their influence on human diseases, human nature, and human environment. Public Health Majors, Minors or students studying in the Public Health Concentration must complete this course with a C or better.

Level Registration Restrictions: May not be enrolled in one of the following: Graduate
Repeatability: This course may not be repeated for additional credits.
PBHL 2102. Environmental Health. 3 Credit Hours.
An introductory course incorporating not only the common concepts associated with environmental health (population dynamics, air pollution, water pollution, land pollution) but also emerging and controversial issues associated with environmental threats to human health, such as emerging diseases, global warming, and biological and chemical weapons. Emphasis is on biological, chemical, and physical sources of exposures, the effects on human health, and the methods of limiting exposures and effects. Public Health Majors, Minors or students studying in the Public Health Concentration must complete this course with a C or better. NOTE: This course is for Public Health majors and minors only.
Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Public Health
Level Registration Restrictions: May not be enrolled in one of the following: Graduate
Repeatability: This course may not be repeated for additional credits
Pre-requisites:
PBHL 1101|Minimum Grade of C|May be taken concurrently
OR PBH1 Y|May not be taken concurrently.

PBHL 2103. Introduction to Construction Health and Safety. 3 Credit Hours.
This introductory course on the health and safety hazards in the construction industry will survey selected topics through lectures, assigned readings from textbooks, and field visits. The focus will be on recognizing, preventing, and controlling health hazards in construction to prevent acute and chronic health effects. This course also provides an examination of different management approaches to the prediction and prevention of construction related injuries. Methods of injury investigation and the mechanics of an injury event will be reviewed. This course is required for students enrolled in the undergraduate level Construction Safety Management Certificate Program. Undergraduate students in Public Health, Civil and Environmental Engineering, and Construction Management Technology will also find this course to be of interest.
Repeatability: This course may not be repeated for additional credits.

PBHL 2201. Health Communication. 3 Credit Hours.
Communication processes and effects are examined from the perspective of interpersonal, intrapersonal, organizational and mass communication. The impact of these types of communication in the health care arena is also discussed. Public Health Majors, Minors or students studying in the Public Health Concentration must complete this course with a C or better.
Level Registration Restrictions: May not be enrolled in one of the following: Graduate
Repeatability: This course may not be repeated for additional credits.

PBHL 2202. Man-Made Disasters: Radiological, Chemical & Biological Terrorism. 3 Credit Hours.
This course is designed to introduce students to the concepts and models of public health preparedness, mitigation, and evaluation in the context of man-made disasters, including radiological, chemical and biological incidents. The course will address identified core competencies of emergency preparedness for public health professionals that include: disaster management, risk assessment, risk communication, governmental resources, functional roles, surveillance, and preparedness evaluation. Man-made disasters will be looked at in a historical, environmental and psychological context in order to elucidate the role of public health in man-made disaster preparedness and evaluation. In addition the role of cultural competency and the needs of special populations will be addressed. Public perception of risk and media views of man-made disasters will be explored. Public Health Majors, Minors or students studying in the Public Health Concentration must complete this course with a C or better. NOTE: This course is only offered online.
Level Registration Restrictions: May not be enrolled in one of the following: Graduate
Repeatability: This course may not be repeated for additional credits.

PBHL 2203. AIDS and Society. 3 Credit Hours.
This course offers the student the opportunity for an in-depth study of one of the most critical public health issues facing society today. Topics include: current HIV/AIDS information as well as exploration of related issues including sexuality, homophobia, and discrimination, research, international/political implications and worldwide economic effects. Public Health Majors, Minors or students studying in the Public Health Concentration must complete this course with a C or better.
Level Registration Restrictions: May not be enrolled in one of the following: Graduate
Repeatability: This course may not be repeated for additional credits.

PBHL 2204. Diet and Weight Management. 3 Credit Hours.
Examination of modern techniques for weight management and weight loss. Emphasis on participation in and understanding of programs for weight management, nutrition management, and exercise management. Public Health Majors, Minors or students studying in the Public Health Concentration must complete this course with a C or better.
Level Registration Restrictions: May not be enrolled in one of the following: Graduate
Repeatability: This course may not be repeated for additional credits
Pre-requisites:
PBHL 1104|Minimum Grade of C|May not be taken concurrently
OR PBH2 Y|May not be taken concurrently.

PBHL 2205. Coping with Life Stress Workshop. 3 Credit Hours.
The impact of poorly managed stress on physical and emotional health. Coping skills and strategies for effective stress management. Individual stress profiles will be developed, emphasizing a holistic view of the individual in a rapidly changing society. Public Health Majors, Minors or students studying in the Public Health Concentration must complete this course with a C or better. NOTE: Lab fee required.
Level Registration Restrictions: May not be enrolled in one of the following: Graduate
Repeatability: This course may not be repeated for additional credits.
PBHL 2206. Holistic Health & Aging. 3 Credit Hours.
Complementary and alternative medicine covers a broad range of healing philosophies, approaches, and therapies. Some are based upon religious or cultural traditions; others are driven by anti-professionalism, and still others, such as chiropractic, are alternative professions, reimbursed and regulated like allopathic medicine, but based upon alternative theories of illness and health. The purpose of this class is to describe the basic principle and practice of a number of alternative therapies. Public Health Majors, Minors or students studying in the Public Health Concentration must complete this course with a C or better.

Level Registration Restrictions: May not be enrolled in one of the following: Graduate
Repeatability: This course may not be repeated for additional credits.

PBHL 2207. Principles of Emergency Management: A Public Health Perspective. 3 Credit Hours.
This course is designed to introduce students to the concepts and models of public health preparedness and response for all hazards emergency management. It will enable health care and allied health professionals, public health professionals, and emergency responders to work together to plan and respond effectively to both natural and man-made disasters. The course will introduce students to the identified core competencies of emergency health preparedness for public health professionals that include: functional roles, communication, resource identification, problem solving, and evaluation. The issues of mental health and special populations will be introduced in an emergency management context. Students will utilize problem-based learning by analyzing actual disaster events and applying the theories, principles, and practice of mitigation, preparedness, response, and recovery. In addition, students will learn about the importance of personal emergency preparedness, which will include the development of their own emergency plan. Public Health Majors, Minors or students studying in the Public Health Concentration must complete this course with a C or better.

Level Registration Restrictions: May not be enrolled in one of the following: Graduate
Repeatability: This course may not be repeated for additional credits.

PBHL 2208. Natural Disasters: Response & Recovery. 3 Credit Hours.
This course is designed to introduce students to the concepts and models of public health response and recovery in the context of natural disasters. It will assist health care and allied health professionals, public health professionals, and emergency responders to work together to respond effectively and to facilitate recovery in a natural disaster. The course will enable students to meet identified core competencies of emergency health preparedness for public health professionals that include functional roles, resource identification, problem solving, and appropriate response. Students will utilize problem-based learning by analyzing actual disaster events and applying the theories, principles, and practice of response and recovery. In addition, students will learn about the issues faced by special populations and how to address these special needs in natural disaster response and recovery. Public Health Majors, Minors or students studying in the Public Health Concentration must complete this course with a C or better.

Level Registration Restrictions: May not be enrolled in one of the following: Graduate
Repeatability: This course may not be repeated for additional credits.

PBHL 2209. Violence and Injury Prevention. 3 Credit Hours.
This course presents the public health perspective on violence and both intentional and unintentional injury. Course topics include information regarding the incidence of injury-related morbidity and mortality in the United States, as well as strategies for the prevention of injury. Public Health Majors, Minors or students studying in the Public Health Concentration must complete this course with a C or better.

Level Registration Restrictions: May not be enrolled in one of the following: Graduate
Repeatability: This course may not be repeated for additional credits.

PBHL 2211. Communication in Health Care Settings. 3 Credit Hours.
Communication processes, issues and problems in health care settings, particularly in the context of changes in health care organizations. Topics include communication between health care consumers and providers, in interdisciplinary health care teams, in self-help and support groups, and across ethnic groups. Public Health Majors, Minors or students studying in the Public Health Concentration must complete this course with a C or better.

Level Registration Restrictions: May not be enrolled in one of the following: Graduate
Repeatability: This course may not be repeated for additional credits.

PBHL 2212. Advanced Human Sexuality. 3 Credit Hours.
An advanced examination of human sexuality as it relates to both sexuality and personal lifestyle. Psychological, socio-cultural, political and biological issues surrounding sex and sexuality are examined in-depth. Public Health Majors, Minors or students studying in the Public Health Concentration must complete this course with a C or better.

Level Registration Restrictions: May not be enrolled in one of the following: Graduate
Repeatability: This course may not be repeated for additional credits

PBHL 2213. Trauma and Coping. 3 Credit Hours.
General overview of issues surrounding cognitive and affective strategies to help students become aware of trauma-related coping behaviors. Common reactions to trauma would cover emergency situations, on-going trauma and death, dying and bereavement. Public Health Majors, Minors or students studying in the Public Health Concentration must complete this course with a C or better.

Level Registration Restrictions: May not be enrolled in one of the following: Graduate
Repeatability: This course may not be repeated for additional credits.
PBHL 2214. Power, Politics & Payments in U.S. Healthcare. 3 Credit Hours.
The course provides an overview of the finances and infrastructure on which the U.S. health care system is based as well as a basic overview of the health policy process. Students will learn about private and public health insurance, including Medicare, Medicaid, and SCHIP, as well as discuss the growing problem of uninsured populations. In addition, students will explore the policy process behind our current health system, focusing on the role of the legislative, executive, and judicial systems, as well as special interest groups and the role of public opinion in health policy. Public Health Majors, Minors or students studying in the Public Health Concentration must complete this course with a C or better.
Level Registration Restrictions: May not be enrolled in one of the following: Graduate
Repeatability: This course may not be repeated for additional credits.

PBHL 2215. Special Populations: Strategic Community Outreach. 3 Credit Hours.
This course is designed to introduce students to the concepts and models of strategic community outreach as it pertains to the special population communities, within the context of emergency management planning, response, and recovery. It will assist health care and allied health professionals, public health professionals, and emergency responders to understand how accessible information and technology is part of the community outreach strategy. The course will enable students to meet identified core competencies of emergency preparedness for public health and emergency professionals, which include: functional roles, resource identification, problem solving, and appropriate response. Students will utilize problem-based learning by analyzing actual and scenario based disaster events and applying the theories, principles, and practice of strategic community outreach pertaining to emergency response and recovery. In addition, students will learn about the issues faced by special population communities and how to address these special needs in all hazard response and recovery. Public Health Majors, Minors or students studying in the Public Health Concentration must complete this course with a C or better.
Level Registration Restrictions: May not be enrolled in one of the following: Graduate
Repeatability: This course may not be repeated for additional credits
Pre-requisites: PBHL 2207|Minimum Grade of C|May not be taken concurrently.

PBHL 2216. Ethnicity, Culture and Health. 3 Credit Hours.
Students will become familiar with the key concepts in public health literature on race and ethnicity and how various aspects of culture influence health. We will also examine how prejudice and discrimination, and neighborhood and community context may contribute to health disparities. Public Health Majors, Minors or students studying in the Public Health Concentration must complete this course with a C or better. NOTE: This course is restricted to public health majors and minors only.
Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Public Health
Level Registration Restrictions: May not be enrolled in one of the following: Graduate
Repeatability: This course may not be repeated for additional credits.

PBHL 2219. Biostatistics and Public Health. 3 Credit Hours.
This course is designed to provide students with a solid background in applied biostatistics in the field of public health. Specifically, the course includes an introduction to the application of biostatistics and a discussion of key statistical tests. Appropriate techniques to measure the extent of disease, the development of disease and comparisons between groups in terms of the extent and development of disease are discussed. Techniques for summarizing data collected in samples are presented along with limited discussion of probability theory. Procedures for estimation and hypothesis testing are presented for means, for proportions and for comparisons of means and proportions in two or more groups. Multivariable statistical methods are introduced but not covered extensively in this undergraduate course. Public Health Majors, Minors or students studying in the Public Health Concentration must complete this course with a C or better.
Level Registration Restrictions: May not be enrolled in one of the following: Graduate
Repeatability: This course may not be repeated for additional credits.

PBHL 2304. HEART Peer Educator Training. 3 Credit Hours.
Peer educators are Temple University students who focus on promoting campus social and educational environments consisting of lower-risk choices, which reflect the attitudes, behaviors, and values of healthy lifestyles. The peer educators are trained to facilitate on-campus as well as off-campus workshops and programs that deal with sexual health, nutrition, and fitness, stress management, tobacco, and other general wellness issues. This class is meant only for those students training to be HEART peer educators. Public Health Majors, Minors or students studying in the Public Health Concentration must complete this course with a C or better. NOTE: This course is for HEART Peer Educators only. Prior to fall 2010, the course title was “Health Teaching Techniques for Peer Educators.”
Level Registration Restrictions: May not be enrolled in one of the following: Graduate
Repeatability: This course may not be repeated for additional credits.
**PBHL 3101. Epidemiology. 3 Credit Hours.**  
This course explores the application of epidemiology practices in public health including: using and interpreting data, calculating measures of health status, and identifying various research study designs used in epidemiologic studies. Additionally, the course will apply the steps in epidemiological disease investigation in order to become familiar with the methodology used in studying an epidemic outbreak. Public Health Majors, Minors or students studying in the Public Health Concentration must complete this course with a C or better.  
**Field of Study Restrictions:** Must be enrolled in one of the following Fields of study: Public Health  
**Level Registration Restrictions:** May not be enrolled in one of the following: Graduate  
**Repeatability:** This course may not be repeated for additional credits  
**Pre-requisites:**  
(KINS 1223|Minimum Grade of C-|May not be taken concurrently)  
AND (KINS 1224|Minimum Grade of C-|May not be taken concurrently)  
AND (PBHL 1101|Minimum Grade of C|May not be taken concurrently)  
OR PBH1 Y|May not be taken concurrently)  
AND (PBHL 1104|Minimum Grade of C|May not be taken concurrently)  
OR PBH2 Y|May not be taken concurrently)  
AND (PBHL 1105|Minimum Grade of C|May not be taken concurrently)  
OR PBH3 Y|May not be taken concurrently)  
AND (PBHL 1106|Minimum Grade of C|May not be taken concurrently)  
OR PBH4 Y|May not be taken concurrently)  
AND (PBHL 2219|Minimum Grade of C|May not be taken concurrently).  

**PBHL 3102. Research Methods. 3 Credit Hours.**  
This course will cover the basic concepts of public health research including: study designs, human subjects protection, quantitative and qualitative research techniques and data collection. These concepts will be applied to public health settings and topics. Public Health Majors, Minors or students studying in the Public Health Concentration must complete this course with a C or better.  
**Field of Study Restrictions:** Must be enrolled in one of the following Fields of study: Public Health  
**Level Registration Restrictions:** May not be enrolled in one of the following: Graduate  
**Repeatability:** This course may not be repeated for additional credits  
**Pre-requisites:**  
(KINS 1223|Minimum Grade of C-|May not be taken concurrently)  
AND (KINS 1224|Minimum Grade of C-|May not be taken concurrently)  
AND (PBHL 1101|Minimum Grade of C|May not be taken concurrently)  
OR PBH1 Y|May not be taken concurrently)  
AND (PBHL 1104|Minimum Grade of C|May not be taken concurrently)  
OR PBH2 Y|May not be taken concurrently)  
AND (PBHL 1105|Minimum Grade of C|May not be taken concurrently)  
OR PBH3 Y|May not be taken concurrently)  
AND (PBHL 1106|Minimum Grade of C|May not be taken concurrently)  
OR PBH4 Y|May not be taken concurrently)  
AND (PBHL 2219|Minimum Grade of C|May not be taken concurrently).  

**PBHL 3103. Counseling Techniques for Health Professionals. 3 Credit Hours.**  
An introduction to counseling techniques used by health professionals working with individuals and groups. Public Health Majors, Minors or students studying in the Public Health Concentration must complete this course with a C or better.  
**Level Registration Restrictions:** May not be enrolled in one of the following: Graduate  
**Repeatability:** This course may not be repeated for additional credits.
PBHL 3104. Professional Seminar in Public Health I. 3 Credit Hours.
Introduction to various professional issues including, but not limited to: multi-culturalism, professional organizations, and ethics as well as professional behavior in public health settings. Public Health Majors, Minors or students studying in the Public Health Concentration must complete this course with a C or better. NOTE: This course should only be taken the semester before going out on the first internship, Public Health 3185 (0280).
Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Public Health
Level Registration Restrictions: May not be enrolled in one of the following: Graduate
Co-requisites: PBHL 3105
Repeatability: This course may not be repeated for additional credits
Pre-requisites:
(HRPR 2103|Minimum Grade of C-|May be taken concurrently)
AND (KINS 1223|Minimum Grade of C-|May not be taken concurrently)
AND (KINS 1224|Minimum Grade of C-|May not be taken concurrently)
AND (PBHL 1101|Minimum Grade of C|May not be taken concurrently)
OR PBH1 Y|May not be taken concurrently)
AND (PBHL 1104|Minimum Grade of C|May not be taken concurrently)
OR PBH2 Y|May not be taken concurrently)
AND (PBHL 1105|Minimum Grade of C|May not be taken concurrently)
OR PBH3 Y|May not be taken concurrently)
AND (PBHL 1106|Minimum Grade of C|May not be taken concurrently)
OR PBH4 Y|May not be taken concurrently)
AND (PBHL 2101|Minimum Grade of C|May be taken concurrently)
OR PBH5 Y|May not be taken concurrently)
AND (PBHL 2102|Minimum Grade of C|May be taken concurrently)
OR PBH6 Y|May not be taken concurrently)
AND (PBHL 2219|Minimum Grade of C|May not be taken concurrently)
AND (PBHL 3101|Minimum Grade of C|May be taken concurrently).

PBHL 3105. The Teaching-Learning Process. 3 Credit Hours.
The health teaching process explores the science and art of teaching. Included in this course are the beginning skills that begin the development of being an effective facilitator/teacher/presenter in a variety of settings: planning, teaching and evaluating lessons, and writing measurable objectives. This course focuses on learning and applying various teaching methods and strategies to the content of the discipline and practicing these skills in a controlled environment with high school students from an alternative high school from the School District of Philadelphia. Public Health Majors, Minors or students studying in the Public Health Concentration must complete this course with a C or better. NOTE: This course includes a weekly one-hour practicum.
Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Public Health
Level Registration Restrictions: May not be enrolled in one of the following: Graduate
Co-requisites: PBHL 3104
Repeatability: This course may not be repeated for additional credits
Pre-requisites:
(HRPR 2103|Minimum Grade of C-|May be taken concurrently)
AND (KINS 1223|Minimum Grade of C-|May not be taken concurrently)
AND (KINS 1224|Minimum Grade of C-|May not be taken concurrently)
AND (PBHL 1101|Minimum Grade of C|May not be taken concurrently)
OR PBH1 Y|May not be taken concurrently)
AND (PBHL 1104|Minimum Grade of C|May not be taken concurrently)
OR PBH2 Y|May not be taken concurrently)
AND (PBHL 1105|Minimum Grade of C|May not be taken concurrently)
OR PBH3 Y|May not be taken concurrently)
AND (PBHL 1106|Minimum Grade of C|May not be taken concurrently)
OR PBH4 Y|May not be taken concurrently)
AND (PBHL 2101|Minimum Grade of C|May be taken concurrently)
OR PBH5 Y|May not be taken concurrently)
AND (PBHL 2102|Minimum Grade of C|May be taken concurrently)
OR PBH6 Y|May not be taken concurrently)
AND (PBHL 2219|Minimum Grade of C|May not be taken concurrently)
AND (PBHL 3101|Minimum Grade of C|May be taken concurrently).
PBHL 3185. Internship I. 4 Credit Hours.
A field placement experience at an agency in which students are involved with ongoing public health projects and programs. Public Health Majors, Minors or students studying in the Public Health Concentration must earn a grade of C or better in this course.
Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Public Health
Level Registration Restrictions: May not be enrolled in one of the following: Graduate
Repeatability: This course may be repeated for additional credit.
Pre-requisites:
(CIS 1055|Minimum Grade of C-|May not be taken concurrently)
AND (KINS 1223|Minimum Grade of C-|May not be taken concurrently)
AND (KINS 1224|Minimum Grade of C-|May not be taken concurrently)
AND (PBHL 1101|Minimum Grade of C|May not be taken concurrently)
OR PBH1 Y|May not be taken concurrently)
AND (PBHL 1104|Minimum Grade of C|May not be taken concurrently)
OR PBH2 Y|May not be taken concurrently)
AND (PBHL 1105|Minimum Grade of C|May not be taken concurrently)
OR PBH3 Y|May not be taken concurrently)
AND (PBHL 1106|Minimum Grade of C|May not be taken concurrently)
OR PBH4 Y|May not be taken concurrently)
AND (PBHL 2219|Minimum Grade of C|May not be taken concurrently)
AND (PBHL 3101|Minimum Grade of C|May not be taken concurrently)
AND (PBHL 3496|Minimum Grade of C|May not be taken concurrently).

PBHL 3208. International Health Study Abroad. 6 Credit Hours.
Study abroad in Costa Rica. Public Health Majors, Minors or students studying in the Public Health Concentration must complete this course with a C or better.
Level Registration Restrictions: May not be enrolled in one of the following: Graduate
Co-requisites: PBHL 4391
Repeatability: This course may not be repeated for additional credits.

PBHL 3382. Independent Study in Public Health. 1 to 6 Credit Hour.
Supervised independent projects on issues related to public health. Public Health Majors, Minors or students studying in the Public Health Concentration must complete this course with a C or better. NOTE: Must be approved by faculty before registration.
Field of Study Restrictions: Must be enrolled in one of the following Fields of study: Public Health
Level Registration Restrictions: May not be enrolled in one of the following: Graduate
Repeatability: This course may be repeated for additional credit.

PBHL 3496. Introduction to Public Health Programs. 3 Credit Hours.
An overview of public health programs, functions, services and interactions within and between public and private sector agencies on local, state and national levels. Emphasis on completing needs assessments of community issues and designing innovative community programs to meet consumer needs. Involves writing a fictional grant proposal. Public Health Majors, Minors or students studying in the Public Health Concentration must complete this course with a C or better. NOTE: This course is the first part of two semester, writing intensive capstone. Precedes PBHL 3596.
