Biology, Minor

Minor Requirements

Students interested in acquiring basic knowledge in biology but not wishing to major in the subject may pursue a minor by successful completion of BIOL 1111 and BIOL 2112 (Introduction to Biology I and II) or their Honors alternates, BIOL 1911 and BIOL 2912, plus three additional upper-level 2200 or above Biology electives (see course descriptions for exceptions). At least one of these additional Biology electives must have a laboratory component.

Note that CHEM 1031 and CHEM 1032 (with labs) or their Honors alternates are the co-requisites or prerequisites for BIOL 1111 and BIOL 2112, and that a grade of C or higher in BIOL 1111 and BIOL 2112 is required to take Biology electives. BIOL 2227, BIOL 2296, and BIOL 3096 can be taken as electives for the minor. Please consult the Biology Department’s advisor when choosing the three additional courses to ensure that prerequisites have been satisfied.

A minimum of 18 credits in Biology is required for the minor.
