Guntram Werther, Professor (Teaching/Instructional), Department of Strategic Management, Fox School of Business and Management; Ph.D., Washington University.

Jean K. Wilcox, Assistant Professor (Practice), Department of Marketing and Supply Chain Management, Fox School of Business and Management; Ph.D., University of Chicago.

Storm Wilkins, Assistant Professor (Practice), Department of Risk, Insurance and Healthcare Management, Fox School of Business and Management; J.D., University of Pennsylvania.
Jacqueline Volkman Wise, Assistant Professor, Department of Risk, Insurance and Healthcare Management, Fox School of Business and Management; Ph.D., University of Pennsylvania.

Christian E. Wurst, Associate Professor (Teaching/Instructional), Department of Accounting, Fox School of Business and Management; Ph.D., Temple University.

Youngjin Yoo, Professor, Department of Management Information Systems, Fox School of Business and Management; Ph.D., University of Maryland.

Yuchi Zhang, Assistant Professor, Department of Marketing and Supply Chain Management, Fox School of Business and Management; Ph.D., University of Maryland College Park.

Zhigen Zhao, Assistant Professor, Department of Statistics, Fox School of Business and Management; Ph.D., Cornell University.

Jacqueline S. Zinn, Associate Professor, Department of Risk, Insurance and Healthcare Management, Fox School of Business and Management; Ph.D., University of Pennsylvania.

Rebecca Anne Zinn, Assistant Professor (Practice), Department of Marketing and Supply Chain Management, Fox School of Business and Management; M.B.A., Temple University.

M. Michael Zuckerman, Assistant Professor (Teaching/Instructional), Department of Risk, Insurance and Healthcare Management, Fox School of Business and Management; J.D., John Marshall Law School.

All Business Minors & Certificates

101 Speakman Hall
1810 N. 13th Street
Philadelphia, PA 19122
215-204-7672
http://www.fox.temple.edu/cms_academics/dept/advising/minors/

Many Temple University undergraduates are currently taking selected business courses to prepare themselves better for their careers after graduation. The Fox School of Business and Management offers a number of minor and certificate programs to facilitate this preparation. Some programs are open to all students in the university; others are restricted to a limited student population. Requirements for a minor or certificate must be completed prior to graduation and minors will be recorded on the student’s official university transcript upon graduation. Courses cannot be used to meet minor or certificate requirements if already used to meet the requirements for a major or a different minor or certificate. Please visit our minor and certificate web site (http://www.fox.temple.edu/cms_academics/dept/advising/minors) for further information.

Minors

• Accounting Minor (p. 570)
• Business Analytics Minor (p. 571)
• Business Minor (p. 572)
• Corporate Social Responsibility Minor (p. 574)
• Digital Marketing Minor (p. 574)
• Economics Minor (p. 576)
• Entertainment Law and Business Minor (p. 577)
• Entrepreneurship & Innovation Management Minor (p. 577)
• Finance Minor (p. 579)
• General Business Studies Minor (p. 579)
• Healthcare Management Minor (p. 581)
• Human Resource Minor for Legal Studies (p. 582)
• Information Technology Innovation & Entrepreneurship Minor (p. 582)
• Legal Studies Minor (p. 583)
• Legal Studies Minor for Human Resource Managers (p. 584)
• Management Information Systems Minor (p. 585)
• Marketing Minor (p. 586)
• Statistics Minor (p. 586)
• Supply Chain Management Minor (p. 587)

Certificates
• Business Basics Certificate (p. 571)
• Business Plus Certificate (p. 572)
• Certificate in Entrepreneurship & Innovation Management (p. 572)
• Certificate in Leadership (p. 573)
• Management Information Systems Certificate (p. 584)

Accounting Minor
• Open to business or non-business students.
• Understand basic business foundations, financial statements, and the accountant’s role in the management of a company.

Eight courses are prerequisites for the minor:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON 1101</td>
<td>Macroeconomic Principles</td>
<td>3</td>
</tr>
<tr>
<td>ECON 1102</td>
<td>Microeconomic Principles</td>
<td>3</td>
</tr>
<tr>
<td>HRM 1101</td>
<td>Leadership and Organizational Management</td>

<tr>
<td>ACCT 3533</td>
<td>Advanced Accounting</td>
<td></td>
</tr>
<tr>
<td>ACCT 3596</td>
<td>Auditing (recommended)</td>
<td></td>
</tr>
</tbody>
</table>

Total Credit Hours 12
If ACCT 2521 is taken instead of ACCT 2102 for the foundation, it cannot also be used as one of the required accounting electives.

- Minimum grades of C are required in accounting courses unless otherwise specified.
- A grade point average of 2.0 in courses in the minor is required.
- Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor or certificate.
- Courses for the minor must be completed prior to graduation; if completed, the minor will be recorded on the final transcript upon graduation.
- To declare or rescind this minor, visit the Fox School of Business and Management (http://www.fox.temple.edu/cms_academics/dept/advising/minors).

Interested students should discuss with their home college advisors how the courses in the minor will fit into their overall degree plan and are strongly encouraged to declare the minor early in their academic career.

### Business Analytics Minor

- Open to high-performing business students with a minimum GPA of 3.0.
- Understand how to unlock the value buried in corporate data and create new business opportunities using cutting-edge tools and techniques in predictive modeling, forecasting, association mining, cluster analysis, decision trees, unstructured “big” data, sentiment analysis, and experimental design.
- Completion of MKTG 2101, MIS 2101, and STAT 2103 with minimum grades of C are prerequisites to this minor.

**Five courses are required** (three must be taken at Temple University.) Recommended sequence is listed below:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Name</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MIS 2502</td>
<td>Data Analytics</td>
<td>3</td>
</tr>
<tr>
<td>STAT 2521</td>
<td>Data Analysis and Statistical Computing</td>
<td>3</td>
</tr>
<tr>
<td>MKTG 3509</td>
<td>Customer Data Analytics</td>
<td>3</td>
</tr>
<tr>
<td>STAT 2523</td>
<td>Design of Experiments and Quality Control</td>
<td>3</td>
</tr>
<tr>
<td>MKTG 3508</td>
<td>Digital Marketing</td>
<td>3</td>
</tr>
</tbody>
</table>

**Total Credit Hours** 15

1  MIS majors will substitute a course chosen from: MIS 3501, MIS 3505, MIS 3536, MIS 3538, MIS 3581, MKTG 3502, MKTG 3504, MKTG 3511, STAT 2512, or STAT 2522.

- A grade point average of 2.0 in the minor is required as well as a minimum grade of C- in each course. A minimum grade of C is required in MIS 2502.
- Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor or certificate.
- Courses for the minor must be completed prior to graduation; if completed, the minor will be recorded on the final transcript upon graduation.
- For more information, visit the Statistics department (http://www.fox.temple.edu/cms_academics/dept/statistics/program/undergraduate/business-analytics-minor).
- To declare or rescind this minor, visit the Fox School of Business and Management (http://www.fox.temple.edu/cms_academics/dept/advising/minors).

Interested students should discuss with their home college advisors how the courses in the minor will fit into their overall degree plan and are strongly encouraged to declare the minor early in their academic career.

### Business Basics Certificate

- Open only to non-matriculated students.
- Explore foundation courses that will apply toward B.B.A. if matriculated into this degree program.

**Five courses are required** (three of these courses must be taken at Temple University):

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Name</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENG 0802</td>
<td>Analytical Reading and Writing ¹</td>
<td>4</td>
</tr>
<tr>
<td>HRM 1101</td>
<td>Leadership and Organizational Management</td>
<td>3</td>
</tr>
<tr>
<td>LGLS 1101</td>
<td>Legal Environment of Business</td>
<td>3</td>
</tr>
<tr>
<td>STAT 1001</td>
<td>Quantitative Methods for Business ¹</td>
<td>3</td>
</tr>
<tr>
<td>ACCT 2101</td>
<td>Financial Accounting</td>
<td>3</td>
</tr>
</tbody>
</table>

**Total Credit Hours** 16

¹  Prior to enrolling in English and Statistics, students must take a placement test and complete additional English or Math review courses as needed if indicated by placement test results.
• A minimum grade of C in each course is required.
• The certificate will be awarded upon satisfactory completion of all required courses.

Business Minor

• Open to non-business students only.
• Quantitatively oriented - provides a good foundation for non-business students to facilitate the transition into an M.B.A. program.
• Completion of MATH 1022, STAT 1001, or calculus with a minimum grade of C- is a prerequisite for some courses in this minor.
• Eight courses required (five of these must be taken at Temple University):

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON 1101</td>
<td>Macroeconomic Principles</td>
<td>3</td>
</tr>
<tr>
<td>ECON 1102</td>
<td>Microeconomic Principles</td>
<td>3</td>
</tr>
<tr>
<td>HRM 1101</td>
<td>Leadership and Organizational Management</td>
<td>3</td>
</tr>
<tr>
<td>ACCT 2101</td>
<td>Financial Accounting</td>
<td>3</td>
</tr>
<tr>
<td>ACCT 2102</td>
<td>Managerial Accounting</td>
<td>3</td>
</tr>
<tr>
<td>MKTG 2101</td>
<td>Marketing Management</td>
<td>3</td>
</tr>
<tr>
<td>RMI 2101</td>
<td>Introduction to Risk Management</td>
<td>3</td>
</tr>
<tr>
<td>STAT 2103</td>
<td>Statistical Business Analytics (or STAT 2101 or MATH 1013)</td>
<td>4</td>
</tr>
</tbody>
</table>

One of the following courses can be substituted for STAT 2103 if required for the student's program:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>CEE 3048</td>
<td>Probability, Statistics &amp; Stochastic Methods</td>
</tr>
<tr>
<td>PSY 1167</td>
<td>Foundations in Statistical Methods</td>
</tr>
<tr>
<td>PSY 2168</td>
<td>Inferential Methods in Psychology</td>
</tr>
<tr>
<td>SOC 1167</td>
<td>Social Statistics</td>
</tr>
<tr>
<td>SOC 3201</td>
<td>Statistical Methods in Sociology</td>
</tr>
</tbody>
</table>

Total Credit Hours 25

• A grade point average of 2.0 in the minor is required as well as a minimum grade of C- in each course.
• Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor or certificate.
• Courses for the minor must be completed prior to graduation; if completed, the minor will be recorded on the final transcript upon graduation.
• To declare or rescind this minor, visit the Fox School of Business and Management (http://www.fox.temple.edu/cms_academics/dept/advising/minors).

Interested students should discuss with their home college advisors how the courses in the minor will fit into their overall degree plan and are strongly encouraged to declare the minor early in their academic career.

Business Plus Certificate

• Open only to non-matriculated students.
• Explore foundation courses that will apply toward B.B.A. if matriculated into this degree program.
• Five courses required (three of these must be taken at Temple University):

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON 1101</td>
<td>Macroeconomic Principles</td>
<td>3</td>
</tr>
<tr>
<td>ECON 1102</td>
<td>Microeconomic Principles</td>
<td>3</td>
</tr>
<tr>
<td>ACCT 2102</td>
<td>Managerial Accounting</td>
<td>3</td>
</tr>
<tr>
<td>MKTG 2101</td>
<td>Marketing Management</td>
<td>3</td>
</tr>
<tr>
<td>RMI 2101</td>
<td>Introduction to Risk Management</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credit Hours 15

• A minimum grade of C in each course is required.
• The certificate will be awarded upon satisfactory completion of all required courses.

Certificate in Entrepreneurship & Innovation Management

Have you ever wondered about owning your own company? Thought about freelancing in your respective field? Wondered if some technology you have been working with might be worth millions (or might help you win $100k+ in the BYOBB)? Or maybe you would just like to work in the creative, dynamic environment that is found in entrepreneurial companies. Interest in entrepreneurship across the university, from students in all departments, is at an all-time high. The downturn in the economy has left many people wondering if owning their own business may be a more viable and stable career path in these turbulent times. In addition, since start-ups are the major engine for growth and new jobs in this economy, having experience with
entrepreneurship is valuable for any individuals that will work in one of these high-growth firms. More than one team of students from non-business schools enrolled in courses in the certificate programs have won the BYOBB in the past. Owning your own business may be closer than ever before.

This certificate will be jointly issued by the Fox School of Business and Management and its partner schools and will appear on the student’s transcript. Having an Entrepreneurship & Innovation Management certificate on your transcript is an indicator that you are a proactive, self-starter who can creatively solve problems and turn your ideas into reality. Even if you plan to work in a well-established company, having this business school certificate shows that you are able to go beyond your functional expertise and innovate when it counts. Companies are looking for what they call “T-shaped” employees for entry level and managerial positions. These are individuals that have specialization in a relevant field as well as broad understanding of the business environment that allows them to approach issues from a strategic, outside-the-box, boundary spanning perspective. This is part of what you will learn in our certificate program.

- Open to non-business students. Business students should consider the Entrepreneurship & Innovation Management minor or a dual major instead.
- Students must complete the following three-course sequence:
  
<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>SGM 3501</td>
<td>Entrepreneur and Innovative Thinking</td>
<td>3</td>
</tr>
<tr>
<td>ENGR 3033</td>
<td>Entrepreneurial Engineering (Engineering students only)</td>
<td>3</td>
</tr>
<tr>
<td>MSP 4614</td>
<td>Creating a Media Business</td>
<td>3</td>
</tr>
<tr>
<td>SGM 3001</td>
<td>Becoming a Manager: Building, Leading, and Managing New and Small Businesses</td>
<td>3</td>
</tr>
<tr>
<td>SGM 3511</td>
<td>Doing Well by Doing Good: Where Innovation and Entrepreneurship Meet Social Impact</td>
<td>3</td>
</tr>
<tr>
<td>SGM 3580</td>
<td>Special Topics - Strategic Management 1</td>
<td>1</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGR 4040</td>
<td>Special Topics (Engineering students only)</td>
<td>3</td>
</tr>
<tr>
<td>SGM 3002</td>
<td>Be Your Own Boss: Planning to Start Your Own Business</td>
<td>3</td>
</tr>
<tr>
<td>SGM 3521</td>
<td>Finance Your Ideas: Crowdfunding, Grants, Banks, Venture Funds, Corporate and Private Investment 2</td>
<td>2</td>
</tr>
<tr>
<td>SGM 3580</td>
<td>Special Topics - Strategic Management 1</td>
<td>1</td>
</tr>
<tr>
<td>SGM 3682</td>
<td>Independent Study 3</td>
<td>3</td>
</tr>
</tbody>
</table>

**Total Credit Hours** 9

1 Approval of the Innovation & Entrepreneurship Institute (IEI) Academic or Managing Director or department chair required. The same special topics course can never apply to both Entrepreneurial Management and Entrepreneurial Action electives.

2 Students interested in taking SGM 3521 should have already assessed the viability of their idea for a new venture. SGM 3501 or SGM 0827 and SGM 3003 are strongly recommended prior to taking SGM 3521. Students who do not meet these criteria may be required to complete additional supplementary work and should contact the professor to find out if they are sufficiently prepared to take this course. Students are encouraged to take SGM 3521 concurrently with or after SGM 4596.

3 Independent Study projects will be identified or created by the IEI. Approval of the IEI Academic or Managing Director or department chair required.

Courses cannot be used to meet certificate requirements if already used to meet the requirements for a major or a different minor or certificate.

For more information and to declare or rescind this certificate, contact the entrepreneurship advisor in the Center for Undergraduate Advising, Fox School of Business, Speakman 101.

Interested students should discuss with their home college advisors or with personnel in the Innovation & Entrepreneurship Institute (503 Alter Hall) how the courses in the certificate will fit into their overall degree plan. Students are strongly encouraged to declare the certificate early in their academic career.

**Certificate in Leadership**

- Open only to business students.
- Develop enhanced skills needed for effective leadership: organizational communication, conflict management, and team building.
- Expertise and perspective developed through these courses enable graduates to think and act in ways that reflect sophisticated competencies (from interpersonal to technical) that will benefit the interests of multiple organizational stakeholders.

**Four courses are required** and can be taken in any order:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>HRM 3501</td>
<td>Power, Influence and Negotiation</td>
<td>3</td>
</tr>
<tr>
<td>HRM 3502</td>
<td>Leading People at Work</td>
<td>3</td>
</tr>
<tr>
<td>HRM 3503</td>
<td>Communicating in Organizations</td>
<td>3</td>
</tr>
<tr>
<td>HRM 3504</td>
<td>Leadership in the 21st Century 1</td>
<td>3</td>
</tr>
</tbody>
</table>
or HRM 3505

<table>
<thead>
<tr>
<th>Total Credit Hours</th>
<th>12</th>
</tr>
</thead>
</table>

1. HRM 3504 is typically taught as a compressed (one week), winter break course.

- Three of these courses must be taken at Temple University.
- A grade point average of 2.0 in the certificate is required as well as a minimum grade of C- in each course unless otherwise specified.
- Courses cannot be used to meet certificate requirements if already used to meet the requirements for a major or a different minor or certificate.
- Courses for the certificate must be completed prior to graduation; if completed, the certificate will be recorded on the final transcript upon graduation.
- To declare or rescind this certificate, visit the Fox School of Business and Management (http://www.fox.temple.edu/cms_academics/dept/advising/minors).

Interested students should discuss with their advisors how the courses in the certificate will fit into their overall degree plan and are strongly encouraged to declare the certificate early in their academic career.

### Corporate Social Responsibility Minor

- Open to business or non-business students.
- Understand how to incorporate economics, the environment, and social responsibility into corporate decision-making. A placement with a community organization practicing sustainability is required as part of BA 3531.
- Six courses required (five of the courses must be taken at Temple University):

<table>
<thead>
<tr>
<th>Required Foundation Courses</th>
</tr>
</thead>
<tbody>
<tr>
<td>HRM 2511 Corporate Sustainability: People, Profits &amp; Planet</td>
</tr>

</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Total Credit Hours</th>
<th>18</th>
</tr>
</thead>
</table>

1. HRM 2511 & LGLS 3511 must be completed prior to BA 3531.

2. Students must contact Debbie Campbell (dcampbell@temple.edu) in spring for permission. This course includes both field study and an academic component.

- Some courses are only offered once a year depending on demand for the course.
- A cumulative grade point average of 2.0 in the minor is required as well as a minimum grade of C- in each course.
- Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor or certificate.
- Courses for the minor must be completed prior to graduation; if completed, the minor will be recorded on the final transcript upon graduation.
- To declare or rescind this minor, visit the Fox School of Business and Management (http://www.fox.temple.edu/cms_academics/dept/advising/minors).

Interested students should discuss with their home college advisors how the courses in the minor will fit into their overall degree plan and are strongly encouraged to declare the minor early in their academic career.

### Digital Marketing Minor

- Open to business students.
• Integrates marketing with digital technology and analytics and prepares students for new and emerging jobs related to analytics, blogging, search engine optimization, e-detailing, site design, Internet research, digital demographics, personalization, customer relationship management, information architecture, social media, e-commerce, and media design.

• Appropriate for all business students, but particularly relevant for students majoring in Marketing, Human Resource Management, Business Management, and MIS.

• Quantitative, critical thinking, and problem-solving skills required for success in this minor; a cumulative GPA of 3.0 is recommended.

• Completion of MIS 2101 or MIS 2901 and MKTG 2101 with minimum grades of "C" and MKTG 3596 with a minimum grade of "C-" are prerequisites to this minor.

• Five courses required (four must be taken at Temple University):
  
<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MIS 2501</td>
<td>Enterprise IT Architecture</td>
<td>3</td>
</tr>
<tr>
<td>MIS 2502</td>
<td>Data Analytics</td>

<td>Social Media Innovation</td>
<td>3</td>
</tr>
<tr>
<td>MKTG 3507</td>
<td>Direct Marketing</td>
<td>3</td>
</tr>
<tr>
<td>MKTG 3508</td>
<td>Digital Marketing</td>
<td>3</td>
</tr>
</tbody>
</table>

  **Total Credit Hours** 15

• A supervised corporate internship is optional. Students approved for this option will register for MIS 3581 as a sixth course.

• Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor or certificate.

• **Marketing majors** who declare Digital Marketing Minor will complete MKTG 3507 and MKTG 3508 as well as two other Marketing electives for the Marketing major.

• **MIS majors** who declare Digital Marketing Minor will complete:

  **Required Courses**
  
<table>
<thead>
<tr>

• Some courses are only offered once a year depending on demand for the course.
• A cumulative grade point average of 2.0 in the minor is required as well as a minimum grade of C- in each course unless otherwise specified.
• Courses for the minor must be completed prior to graduation; if completed, the minor will be recorded on the final transcript upon graduation.
• All interested students must meet with Dr. Michael Smith (msmith@temple.edu) to declare or rescind this minor.

Interested students should discuss with their home college advisors how the courses in the minor will fit into their overall degree plan and are strongly encouraged to declare the minor early in their academic career.

Economics Minor

• Open to business students. Non-business students interested in an Economics minor should contact the College of Liberal Arts (p. 749).
• Understand basic business foundations and learn how the impact of economics affects public and personal issues.
• Four departmental courses are required (three must be completed at Temple University):

  **Required Courses**

**Total Credit Hours** 12

1 If both ECON 3501 and ECON 3502 are taken, one counts as one of these electives.

• ECON 3408, ECON 3581, ECON 3696, ECON 3999, and ECON 4999 cannot be used to fulfill an Elective for the Economics minor.
• A grade point average of 2.0 in courses in the minor is required as well as a minimum grade of C- in each course unless otherwise specified.
• Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor or certificate.
• Courses for the minor must be completed prior to graduation; if completed, the minor will be recorded on the final transcript upon graduation.
• To declare or rescind this minor, visit the Fox School of Business and Management (http://www.fox.temple.edu/cms_academics/dept/advising/minors).

Interested students should discuss with their home college advisors how the courses in the minor will fit into their overall degree plan and are strongly encouraged to declare the minor early in their academic career.

Entertainment Law and Business Minor

• Open only to business students and students in the School of Tourism and Hospitality Management.
• Learn about the special legal issues that confront this industry that provides about 2 million jobs a year.
• Provide students with the appropriate knowledge and skills to progress into management careers within the entertainment sector.
• All students in the Fox School are required to take a Legal Studies course as part of their lower division Fox School foundation. In addition to the required introductory law course, LGLS 1101 (LGLS 1901), four courses are required:

  Required Courses
  LGLS 1112 Law for Business 3
  LGLS 3504 Sports and the Law 3
  LGLS 3509 Entertainment Law 3
  LGLS 3522 Technology, Privacy and Intellectual Property Law 3

  Total Credit Hours 12

• LGLS 1102 completed prior to Spring 2016 may be used to fulfill LGLS 1112.
• Three of the four courses required for the minor must be taken at Temple University. Residency excludes the required Legal Studies course that fills the lower division foundation requirement.
• Some courses are only offered once a year depending on demand for the course.
• A grade point average of 2.0 in the minor is required, as well as a minimum grade of C- in each course unless otherwise specified.
• Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor or certificate.
• Courses for the minor must be completed prior to graduation; if completed, the minor will be recorded on the final transcript upon graduation.
• To declare or rescind this minor, visit the Fox School of Business and Management (http://www.fox.temple.edu/cms_academics/dept/advising/minors).

Interested students should discuss with their home college advisors how the courses in the minor will fit into their overall degree plan and are strongly encouraged to declare the minor early in their academic career.

Entrepreneurship & Innovation Management Minor

• Open to business or non-business students.
• Integrates entrepreneurship theory and practice in an interdisciplinary approach to develop an understanding of the creation and management of an entrepreneurial business.
• Prepares students to start a business, run a consulting or freelancing practice, be a productive member of an entrepreneurial or small business, assume responsibilities in a family business, or become an effective manager in a growing business. Theory, cases, guest speakers, and hands-on or experiential learning are used to study creativity, innovation, idea generation, business models, feasibility analysis, market research, strategic planning, and venture financing.
• At their core, entrepreneurs are creative problem-solvers that are driven to identify and grab hold of opportunities. Anyone can be entrepreneurial — whether you want to start the next Facebook, take control of your work-life balance with a lifestyle business, have a positive impact on the world with a social venture, or drive change and innovation in an existing company.

• Eight courses are prerequisites 1 for the minor:
  ECON 1101 Macroeconomic Principles 3
  ECON 1102 Microeconomic Principles 3
  HRM 1101 Leadership and Organizational Management 3
  ACCT 2101 Financial Accounting 3
  ACCT 2102 Managerial Accounting 3
  or ACCT 2521 Cost Accounting

1 Prerequisites for the Entrepreneurship & Innovation Management Minor include:

ECON 1101 Macroeconomic Principles 3
ECON 1102 Microeconomic Principles 3
HRM 1101 Leadership and Organizational Management 3
ACCT 2101 Financial Accounting 3
ACCT 2102 Managerial Accounting 3
or ACCT 2521 Cost Accounting
MKTG 2101  Marketing Management 3
RMI 2101  Introduction to Risk Management 3
STAT 2103  Statistical Business Analytics (or STAT 2101 or MATH 1013) 4

One of the following can be substitute for STAT 2103 if required for the student’s program:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>CEE 3048</td>
<td>Probability, Statistics &amp; Stochastic Methods</td>
<td>3</td>
</tr>
<tr>
<td>PSY 1167</td>
<td>Foundations in Statistical Methods</td>
<td>4</td>
</tr>
<tr>
<td>PSY 2168</td>
<td>Inferential Methods in Psychology</td>
<td>4</td>
</tr>
<tr>
<td>SOC 1167</td>
<td>Social Statistics</td>
<td>4</td>
</tr>
<tr>
<td>SOC 3201</td>
<td>Statistical Methods in Sociology</td>
<td>4</td>
</tr>
</tbody>
</table>

Total Credit Hours 25

1 Minimum grades of C- are required in prerequisite courses and are not calculated in the minor GPA.

• Eight course alternate prerequisites¹ for the minor:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCT 2101</td>
<td>Financial Accounting</td>
<td>3</td>

<td>Macroeconomic Principles</td>
<td>3</td>
</tr>
<tr>
<td>HRM 1101</td>
<td>Leadership and Organizational Management</td>
<td>3</td>
</tr>
<tr>
<td>MKTG 2101</td>
<td>Marketing Management</td>
<td>3</td>
</tr>
<tr>
<td>RMI 2501</td>
<td>Fundamentals of Personal Financial Planning</td>
<td>3</td>
</tr>
</tbody>
</table>

Three electives chosen from the menu of the General Business Studies Minor, excluding SGM courses listed below.²

Total Credit Hours 24

1 Minimum grades of C- are required in prerequisite courses and are not calculated in the minor GPA.

² Please see the General Business Studies minor (p. 579) for list of electives.

• Three departmental courses are required (two must be taken at Temple University):

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>SGM 3501</td>
<td>Entrepreneurial and Innovative Thinking</td>
<td>3</td>
</tr>
</tbody>
</table>

Select one Entrepreneurial Management Course:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>SGM 3503</td>
<td>Innovation that Works: Building and Assessing Innovative Business Models</td>
<td>3</td>
</tr>
<tr>
<td>SGM 3511</td>
<td>Doing Well by Doing Good: Where Innovation and Entrepreneurship Meet Social Impact</td>
<td>3</td>
</tr>
</tbody>
</table>

Select one Entrepreneurial Action Course:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>SGM 3002</td>
<td>Be Your Own Boss: Planning to Start Your Own Business</td>
<td>3</td>
</tr>
<tr>
<td>SGM 3521</td>
<td>Finance Your Ideas: Crowdfunding, Grants, Banks, Venture Funds, Corporate and Private Investment</td>
<td>3</td>
</tr>
<tr>
<td>SGM 3580</td>
<td>Special Topics - Strategic Management²</td>
<td>3</td>
</tr>
<tr>
<td>SGM 3682</td>
<td>Independent Study³</td>
<td>3</td>
</tr>
<tr>
<td>SGM 4596</td>
<td>Strategic Planning: The Business Plan as a Strategic Tool for Existing Businesses and Entrepreneurs</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credit Hours 9

¹ Students interested in taking SGM 3521 should have already assessed the viability of their idea for a new venture. SGM 3501 or SGM 0827 and SGM 3503 are strongly recommended prior to taking SGM 3521. Students who do not meet these criteria may be required to complete additional supplementary work and should contact the professor to find out if they are sufficiently prepared to take this course.

² Approval of the Innovation and Entrepreneurship Institute (IEI) Academic or Managing Director or department chair required.

³ Independent Study projects will be identified or created by the IEI. Approval of the IEI Academic or Managing Director or department chair required.

• A grade point average of 2.0 as well as a minimum grade of C- in each course is required unless otherwise specified.

• Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor or certificate.

• Courses for the minor must be completed prior to graduation; if completed, the minor will be recorded on the final transcript upon graduation.

• To declare or rescind this minor, visit the Fox School of Business and Management (http://www.fox.temple.edu/cms_academics/dept/advising/minors).

Interested students should discuss with their home college advisors how the courses in the minor will fit into their overall degree plan and are strongly encouraged to declare the minor early in their academic career.
Finance Minor

- Open to business or non-business students.
- Provides in-depth understanding of financial principles and their application to financial issues faced by decision-makers in corporate, financial, and government sectors of the global economy.
- Students majoring in Accounting, Economics, Marketing, Risk Management, and Real Estate will enhance their marketable skills with this minor.

**Prerequisite courses required for non-business students:**

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCT 2101</td>
<td>Financial Accounting</td>
<td>3</td>
</tr>
<tr>
<td>ACCT 2102</td>
<td>Managerial Accounting</td>
<td>3</td>
</tr>
<tr>
<td>or ACCT 2521</td>
<td>Cost Accounting</td>
<td></td>
</tr>
<tr>
<td>ECON 1101</td>
<td>Macroeconomic Principles</td>
<td>3</td>
</tr>
<tr>
<td>ECON 1102</td>
<td>Microeconomic Principles</td>
<td>3</td>
</tr>
<tr>
<td>FIN 3101</td>
<td>Financial Management</td>
<td>3</td>
</tr>
</tbody>
</table>

Pre-Calculus/Calculus sequence:

<table>
<thead>
<tr>
<th>Course Group</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>STAT 1001 &amp; STAT 1102</td>
<td>Financial Accounting</td>
<td>3</td>
</tr>
<tr>
<td>MATH 1021 &amp; MATH 1031</td>
<td>Managerial Accounting</td>
<td>3</td>
</tr>
<tr>
<td>MATH 1022 &amp; MATH 1041</td>
<td>Cost Accounting</td>
<td>3</td>
</tr>
<tr>
<td>STAT 2103</td>
<td>Statistical Business Analytics</td>
<td>4</td>
</tr>
</tbody>
</table>

- Minimum grades of C- are required in prerequisite courses except for FIN 3101 which requires a minimum grade of C. These grades are not calculated in the minor GPA.
- Four departmental courses required (three of these courses must be taken at Temple University):
  - **Required Courses**
    | Course       | Title                                | Credits |
    |--------------|--------------------------------------|---------|
    | FIN 3504     | Intermediate Corporate Finance (must be completed at Temple) | 3       |
    | FIN 3507     | Investments                          | 3       |
  - **Electives**
    Select two of the following: 6
    | Course       | Title                                | Credits |
    |--------------|--------------------------------------|---------|
    | FIN 3505     | Management of Financial Institutions  |         |
    | FIN 3509     | Real Estate Investment and Finance   |         |
    | FIN 3512     | Financial Modeling                   |         |
    | FIN 3513     | Financial Statement Analysis         |         |
    | FIN 3515     | Financial Markets and Institutions for Business |         |
    | FIN 3551     | International Finance                |         |

**Total Credit Hours** 12

- Minimum grades of C are required for the departmental courses.
- A grade point average of 2.0 in the minor is required.
- Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor or certificate.
- Courses for the minor must be completed prior to graduation; if completed, the minor will be recorded on the final transcript upon graduation.
- To declare or rescind this minor, visit the Fox School of Business and Management (http://www.fox.temple.edu/cms_academics/dept/advising/minors).

Interested students should discuss with their home college advisors how the courses in the minor will fit into their overall degree plan and are strongly encouraged to declare the minor early in their academic career.

General Business Studies Minor

- Open to non-business students only
- Less quantitative than the Business Minor
- Provides a good foundation of business skills with the flexibility to explore selected areas of interest in business
- Eight courses required (five of these courses must be taken at Temple University):
  - **Foundation**
    | Course       | Title                                | Credits |
    |--------------|--------------------------------------|---------|
    | ECON 1101    | Macroeconomic Principles             | 3       |
    | HRM 1101     | Leadership and Organizational Management | 3       |

Total Credit Hours: 24

- A grade point average of 2.0 in the minor is required.
- Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor or certificate.
- Courses for the minor must be completed prior to graduation; if completed, the minor will be recorded on the final transcript upon graduation.
- To declare or rescind this minor, visit the Fox School of Business and Management (http://www.fox.temple.edu/cms_academics/dept/advising/minors).

Interested students should discuss with their home college advisors how the courses in the minor will fit into their overall degree plan and are strongly encouraged to declare the minor early in their academic career.

**Healthcare Management Minor**

- Open to business or non-business students.
• Develop value-added skills for students who aim to understand the structure, policy, finance, and strategy/operations issues of healthcare organizations.

• Three courses required (all three courses must be taken at Temple University):

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

Total Credit Hours: 9

• Courses must be taken in sequence, not concurrently, so a minimum of three semesters is required to complete this minor.

• A grade point average of 2.0 in the minor is required as well as a minimum grade of C in each course unless otherwise specified.

• Health Economics (ECON 3507) is recommended but not required as an additional course.

• Risk Management majors who complete the Healthcare track are not eligible for the minor.

• Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor or certificate.

• Courses for the minor must be completed prior to graduation; if completed, the minor will be recorded on the final transcript upon graduation.

• A grade point average of 2.0 in courses in the minor is required, as well as a minimum grade of C- in each course unless otherwise specified.

• Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor or certificate.

• Courses for the minor must be completed prior to graduation; if completed, the minor will be recorded on the final transcript upon graduation.

• To declare or rescind this minor, visit the Fox School of Business and Management ([http://www.fox.temple.edu/cms_academics/dept/advising/minors](http://www.fox.temple.edu/cms_academics/dept/advising/minors)). Contact hcm.minor@temple.edu for further information or assistance.

Interested students should discuss with their home college advisors how the courses in the minor will fit into their overall degree plan and are strongly encouraged to declare the minor early in their academic career.

### Human Resource Minor for Legal Studies

• Open only to Legal Studies majors

• Provides Legal Studies majors who understand the legal aspects of business decisions with the additional understanding of human resource practices (e.g., recruitment and reward systems, public policy compliance and labor relations) and negotiation strategies.

• Four courses required (three of these must be taken at Temple University):

A grade point average of 2.0 in courses in the minor is required, as well as a minimum grade of C- in each course unless otherwise specified.

• Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor or certificate.

• Courses for the minor must be completed prior to graduation; if completed, the minor will be recorded on the final transcript upon graduation.

• To declare or rescind this minor, visit the Fox School of Business and Management ([http://www.fox.temple.edu/cms_academics/dept/advising/minors](http://www.fox.temple.edu/cms_academics/dept/advising/minors)).

Interested students should discuss with their home college advisors how the courses in the minor will fit into their overall degree plan and are strongly encouraged to declare the minor early in their academic career.

### Information Technology Innovation & Entrepreneurship Minor

• Open only to business students who have completed MIS 2101.

• Integrate two of the most important elements of the Fox School: the enabling role of IT and the drive of entrepreneurial thinking.

• Four courses required (all four must be taken at Temple University):

<table>
<thead>
<tr>
<th>Required Courses</th>
<th>Credits</th>

</tr>
</tbody>
</table>
• Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor or certificate.
• Entrepreneurship majors who declare ITIE Minor may need to substitute different courses. Students are encouraged to find a relevant course appropriate to their interest. Substitutions will need to be approved in advance by the department and Senior Assistant Dean for Undergraduate Programs.
• MIS majors who declare ITIE Minor are encouraged to take the non-MIS courses for the electives.
• A grade point average of 2.0 in the minor is required as well as a minimum grade of C in each course unless otherwise specified.
• Courses for the minor must be completed prior to graduation; if completed, the minor will be recorded on the final transcript upon graduation.
• For more information and to declare or rescind this minor, visit the MIS department (http://community.mis.temple.edu/programs/minor-in-ite).

Interested students should discuss with their home college advisors how the courses in the minor will fit into their overall degree plan and are strongly encouraged to declare the minor early in their academic career.

Legal Studies Minor

• Open only to business and Tourism and Hospitality Management students.
• Designed to expose students to a curriculum in legal studies, particularly students majoring in other disciplines such as accounting, risk management or finance who are considering law school. Students will learn how to read cases and statutes, do legal research and make a legal argument as well as identify the legal issues that will impact their business and personal decisions.
• All students in the Fox School are required to take LGLS 1101 as part of their lower division Fox School foundation. Four additional courses are required:

  Total Credit Hours 12

  1  LGLS 1102 completed prior to Spring 2016 may be used to fulfill LGLS 1112.

• Three of the four courses required for the minor must be taken at Temple University. Residency excludes the required Legal Studies course that fills the lower division foundation requirement.
• A grade point average of 2.0 in the minor is required as well as a minimum grade of C- in each course unless otherwise specified.
• Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor or certificate.
• Courses for the minor must be completed prior to graduation; if completed, the minor will be recorded on the final transcript upon graduation.
• To declare or rescind this minor, visit the Fox School of Business and Management (http://www.fox.temple.edu/cms_academics/dept/advising/minors).

Interested students should discuss with their home college advisors how the courses in the minor will fit into their overall degree plan and are strongly encouraged to declare the minor early in their academic career.
Legal Studies Minor for Human Resource Managers

- Open only to Human Resource Management majors
- Prepare students for the legal issues that human resource professionals regularly address in the workplace.
- All students in the Fox School are required to take LGLS 1101 as part of their lower division Fox School foundation. Four additional courses are required:

<table>
<thead>
<tr>

</tbody>
</table>

**Total Credit Hours**: 12

1 LGLS 1102 completed prior to Spring 2016 may be used to fulfill LGLS 1112.

- Three of the four courses required for the minor must be taken at Temple University. Residency excludes LGLS 1101 or LGLS 1901.
- A grade point average of 2.0 in the minor is required as well as a minimum grade of C- in each course unless otherwise specified.
- Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor or certificate.
- Courses for the minor must be completed prior to graduation; if completed, the minor will be recorded on the final transcript upon graduation.
- To declare or rescind this minor, visit the Fox School of Business and Management (http://www.fox.temple.edu/cms_academics/dept/advising/minors).

Interested students should discuss with their home college advisors how the courses in the minor will fit into their overall degree plan and are strongly encouraged to declare the minor early in their academic career.

Management Information Systems Certificate

- Open to non-business students.
- Learn to identify, select and evaluate technology solutions for business problems.
- Become a knowledgeable user of IT and the person in the organization who can successfully interact with technology professionals.
- **Three courses required** (all courses must be taken at Temple University):

<table>
<thead>
<tr>
<th>Required Courses</th>
</tr>
</thead>
<tbody>
<tr>
<td>MIS 2101 Information Systems in Organizations</td>
</tr>
<tr>
<td>MIS 2502 Data Analytics</td>

- A grade point average of 2.0 in the minor is required as well as a minimum grade of C- in each course unless otherwise specified.
- Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor or certificate.
- Courses for the minor must be completed prior to graduation; if completed, the minor will be recorded on the final transcript upon graduation.
- For more information and to declare or rescind this minor visit the Fox MIS Minor web site (http://community.mis.temple.edu/programs/misminor).

Interested students should discuss with their home college advisors how the courses in the minor will fit into their overall degree plan and are strongly encouraged to declare the minor early in their academic career.

Marketing Minor

- Open only to business students.
- Minor allows students to explore a firm’s value creation, customer acquisition, and development and retention processes, expanding career options especially for students with majors in Business Management, Entrepreneurship, Finance, Human Resources, International Business, Management Information Systems, and Real Estate.
- All students in Fox School are required to take MKTG 2101 as part of the lower division Fox School Foundation
- Four additional Marketing courses required (all four must be taken at Temple University):

  Total Credit Hours 12

- Courses have a prerequisite of MKTG 3511 and are most appropriate for students who like to be challenged with quantitative methods and applications.

- A grade point average of 2.0 in the minor is required as well as a minimum grade of C in each course, including MKTG 2101.
- Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor or certificate.
- Courses for the minor must be completed prior to graduation; if completed, the minor will be recorded on the final transcript upon graduation.
- For more information on this minor, visit the Marketing department (http://www.fox.temple.edu/cms_academics/dept/marketing_and_supply_chain_management/programs/undergraduate-academics/concentrations-in-marketing).
- To declare or rescind this minor, visit the Fox School of Business and Management (http://www.fox.temple.edu/cms_academics/dept/advising/minors).

Interested students should discuss with their home college advisors how the courses in the minor will fit into their overall degree plan and are strongly encouraged to declare the minor early in their academic career.

Statistics Minor

- Open to business or non-business students.
• Become proficient in the ability to select, utilize, and apply quantitative and data analysis skills to your major field of study. Skilled users of data enhance their career opportunities.

• Actuarial Science, HRM, Finance, MIS, and Marketing majors will benefit as well as students in all undergraduate business majors.

• Completion of STAT 2103 is a prerequisite for the courses in the minor. (Please note that STAT 2103 has additional prerequisites.)

• One of the following courses can be substituted for STAT 2103 if required for the student's program:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CEE 3048</td>
<td>Probability, Statistics &amp; Stochastic Methods</td>

</tbody>
</table>

• A grade point average of 2.0 in the minor is required as well as a minimum grade of C- in each course.

• Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor or certificate.

• Courses for the minor must be completed prior to graduation; if completed, the minor will be recorded on the final transcript upon graduation.

• To declare or rescind this minor, visit the Fox School of Business and Management (http://www.fox.temple.edu/cms_academics/dept/advising/minors).

Interested students should discuss with their home college advisors how the courses in the minor will fit into their overall degree plan and are strongly encouraged to declare the minor early in their academic career.

Supply Chain Management Minor

Michael F. Smith, MSCM Department Chair
Office: Alter Hall 512
215-204-1682
msmith@temple.edu
www.fox.temple.edu/cms_academics/dept/marketing_and_supply_chain_management/

The Supply Chain Management Minor is ideal for students innovative enough to think creatively, yet meticulous enough to forecast the bigger picture. Students completing the SCM Minor pursue careers which direct the efficient flow of goods and services within and among organizations—from suppliers and manufacturers to retailers and consumers.

The SCM Minor course sequence is a strong complement with majors such as Marketing, International Business, Accounting, Information System, Finance and Healthcare Management.

The SCM Minor provides students with basic knowledge of supply chain management, such as distribution strategies, planning, and procurement, while also working on their communication, negotiation, and leadership abilities. Courses balance theory and practice in supply chain management to bridge the gap between academic and business practices and devise innovative research and teaching methods. The minor prepares students to operate and lead major aspects of the supply system in established and start-up firms.

All interested students must meet with Dr. Neha Mittal to declare or rescind this minor: nmittal@temple.edu

Student Professional Organization (SPO) in Supply Chain Management

A Supply Chain Management SPO was established on-campus, TU-SCA (Temple University Supply Chain Association). For more information, please contact: Dr. Misty Blessley (misty.blessley@temple.edu).
Requirements

- Open to business students. Appropriate for all business students, but particularly relevant for students majoring in IB, Entrepreneurship, Finance, Marketing, Business Management, and MIS.
- Integrates SCM topics and themes to prepare students for new and emerging jobs related to SCM, Fulfillment, Planning, Storage and Distribution, and Customer Service.
- Quantitative, critical thinking, and problem-solving skills required for success in this minor; a cumulative GPA of 2.75 is recommended.
- Four courses required (three must be taken at Temple University):
  - SCM 3515 Principles of Supply Chain Management 3
  - SCM 3516 Transportation and Logistics Management 3
  - Select one of the following: 3
    - SCM 3517 Inventory and Warehouse Management
    - SCM 3518 Sourcing and Procurement
  - Select one of the following: 3
    - MIS 3537 Internet Enabled Supply Chains
    - MKTG 3506 Value Delivery Networks in Marketing
    - MKTG 3581 Marketing Internship/Co-Operative Experience
    - MAT 3509 Customer Data Analytics
    - SCM 3517 Inventory and Warehouse Management
    - SCM 3518 Sourcing and Procurement

Total Credit Hours 12

1 MKTG 3581, a supervised corporate internship, requires department approval.

- Courses taken for this minor cannot be double-counted toward the major or another minor.
- A cumulative grade point average of 2.0 in courses in the minor is required as well as a minimum grade of C- in each course unless otherwise specified.
- Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor or certificate.
- Courses for the minor must be completed prior to graduation; if completed, the minor will be recorded on the final transcript upon graduation.

All interested students must meet with Dr. Neha Mittal to declare or rescind this minor: nmittal@temple.edu

Interested students should discuss with their advisor how the courses in the minor will fit into their overall degree plan and are strongly encouraged to declare the minor early in their academic career.

Accounting

Eric G. Press, Chairman
Office: Alter Hall 448
215-204-8127
eric.press@temple.edu
www.fox.temple.edu/cms_academics/dept/accounting/

The program provides students with a broad general education and intensive study within the major as preparation for professional careers in public accounting, industry, consulting, government, and not-for-profit institutions.

The curriculum in accounting is designed to acquaint students with the conceptual framework and theory of accounting, transactional analysis, asset management, liabilities, owners’ equity, and financial reporting. Cost analysis and control, accounting information systems, taxation, consolidated financial statements, and foreign operations also are covered, along with auditing techniques and an understanding of the ethical and performance standards of the profession.

Accounting majors are encouraged to join a professional student organization, such as:

- Beta Alpha Psi (http://www.fox.temple.edu/cms_career/student-professional-organizations/beta-alpha-psi) (BAP--National Honorary Fraternity);
- Institute of Management Accountants - Temple Chapter (IMA-T) (http://www.fox.temple.edu/cms_career/student-professional-organizations/institute-of-management-accountants);
- National Association of Black Accountants (http://www.fox.temple.edu/cms_career/student-professional-organizations/national-association-of-black-accountants) (NABA);
Students seeking the CPA designation after graduation:

Effective January 1, 2012 the education and experience required to become a licensed CPA in Pennsylvania changed. All candidates seeking the CPA designation after January 1, 2012 must complete 150 hours of college education (undergraduate or graduate courses, or a combination of both), including 36 hours in accounting and auditing, business law, finance or tax subjects acceptable to the Pennsylvania State Board of Accountancy. With this change, Pennsylvania conforms to the national education standard of 150 credit hours and one year of public accounting experience—in addition to the successful completion of the CPA Exam—before the granting of a CPA license.

For additional information regarding the PA CPA exam, please visit the following web sites:

- www.fox.temple.edu/cms_academics/dept/accounting/cpa-exam/overview/
- www.picpa.org/Content/40441.aspx

Master of Accountancy Program (MAcc) — new cycles begin each fall semester

Students can meet the new Pennsylvania requirements by completing a Bachelor’s degree (e.g. the current accounting major in the Fox School’s BBA) and the Fox School of Business Master of Accountancy degree (MAcc). Students enrolled in the Fox School’s undergraduate accounting program will be eligible to apply for the MAcc after completing 90 semester-hour credits (that is, they can apply for admission to the MAcc at the completion of their junior year). Students can also meet the new requirements by completing 150 undergraduate credit hours. For more information, visit MAcc (http://www.fox.temple.edu/cms_academics/specialized-masters-program/concentrations/master-of-accountancy).

Online BBA Program

The Accounting major is available as an online BBA degree completion program designed for new students ready to start their junior year in a business curriculum. Please visit the Online BBA website for program and admission information (http://www.fox.temple.edu/cms_academics/undergraduate-2/online-bba).

Accelerated 3 Year BBA

Motivated students can accelerate their BBA program to finish in 3 years. Please see the suggested sequence (http://www.fox.temple.edu/web_dev/accel_docs/3yearBB AinAccountingfinal.pdf).

Minor

Students in any college who wish to understand basic business foundations, financial statements, and the accountant’s role in the management of a company can pursue a minor in accounting. Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor. Requirements (p. 570) for the minor must be completed prior to graduation.

Summary of Requirements

University Requirements

All new students are required to complete the university’s General Education (GenEd (p. 143)) curriculum.

Note that students not continuously enrolled who have not been approved for a Leave of Absence or study elsewhere must follow University requirements current at the time of re-enrollment.

College Requirements

Students must meet College Graduation Requirements (p. 559) including the requirements of the major listed below. Accounting students must attain a 2.0 GPA in the major and a 2.0 cumulative GPA in order to graduate. To calculate the GPA in the major, use the major GPA calculator (http://www.fox.temple.edu/cms_academics/dept/advising/students/gpa-calculator).

Major Requirements

Students must follow the Major Requirements and College Requirements current at the time of declaration. Students not continuously enrolled who have not been approved for a Leave of Absence or study elsewhere must follow University, College, and Major requirements current at the time of re-enrollment.

Actuarial Science

Krupa S. Viswanathan, Associate Professor, Program Director
Alter Hall 629
215-204-6183
krupa@temple.edu
www.fox.temple.edu/mcm_people/krupa-s-viswanathan/

Located in the Department of Risk, Insurance, and Healthcare Management, Temple’s Actuarial Science program provides students the opportunity to develop a strong foundation in mathematics and statistics while being exposed to a wide range of business disciplines. Temple’s program in Actuarial Science is one of only a few programs designated as a Center of Actuarial Excellence by the Society of Actuaries.

Actuaries specialize in the evaluation of insurance and financial risks. They hold positions of responsibility with insurance companies, consulting firms, investment banks, government regulatory organizations, and government insurance programs. Actuaries must also pass a series of professional exams, administered by the Society of Actuaries and Casualty Actuarial Society, to receive the credential of Associate or Fellow. These professional exams are both quantitative and qualitative, demanding that the actuary demonstrate expertise in a variety of mathematical and business analytic applications. Coursework in Temple’s Actuarial Science program help prepare students for several actuarial exams. Courses in our curriculum are also approved by the Society of Actuaries and Casualty Actuarial Society as satisfying VEE (Validation by Educational Experience) requirements.

Students should meet with the Program Director as soon as they enter the Actuarial Science program. In addition to their coursework and professional examinations, students are strongly encouraged to become active in the Sigma chapter of Gamma Iota Sigma, Temple’s national award-winning professional student organization in Risk Management, Insurance, and Actuarial Science. The organization hosts numerous guest speakers from the
industry, sponsors a variety of career development seminars, and maintains a widely-distributed résumé book. For more information, please contact the GIS President at 215-204-9368 or visit www.sigmachapter.org (http://www.sigmachapter.org).

Summary of Requirements

University Requirements

All new students are required to complete the university’s General Education (GenEd (p. 143)) curriculum.

Note that students not continuously enrolled who have not been approved for a Leave of Absence or study elsewhere must follow University requirements current at the time of re-enrollment.

College Requirements

Students are strongly encouraged to take the professional actuarial exams immediately after completing the relevant coursework. Students must meet the College Graduation Requirements (p. 559) including the requirements of the major listed below. Students must attain a 2.0 cumulative GPA and 2.0 in the major to graduate with the Actuarial Science major. To calculate the GPA in the major, use the major GPA calculator (http://www.fox.temple.edu/cms_academics/dept/advising/students/gpa-calculator).

Major Requirements

Students must follow the Major Requirements and College Requirements current at the time of declaration. Students not continuously enrolled who have not been approved for a Leave of Absence or study elsewhere must follow University, College, and Major requirements current at the time of re-enrollment.

Requirements of Actuarial Science Major

### Business Management

101 Speakman Hall  
1810 N. 13th Street  
Philadelphia, PA 19122  
215-204-7672  
www.fox.temple.edu/cms_academics/dept/business-management/

The business management curriculum is designed for students who wish to follow a broad and general curriculum. Students are encouraged to join a student professional organization (http://www.fox.temple.edu/cms_career/student-professional-organizations) that meets their interests and also to pursue a minor or certificate program in addition to their major. Courses taken for the major will not also count for a minor or certificate.

### Online BBA Program

The Business Management major is available as an online BBA degree completion program designed for new students ready to start their junior year in a business curriculum. Please see our web site program and admission information (http://www.fox.temple.edu/cms_academics/undergraduate-2/online-bba).

### Accelerated 3 Year BBA

Motivated students can accelerate their BBA program to finish in 3 years. Please see the suggested sequence. (http://www.fox.temple.edu/cms_academics/dept/business-management)

### 4+1 Master of Education Degree (M.Ed.)

The 4+1 Master of Education (M.Ed.) program is designed for students who are interested in pursuing a Master of Education while completing the Bachelor of Business Administration (B.B.A.) in Business Management program requirements. After completion of the programs, students earn a B.B.A. degree and an M.Ed. in Business, Computers & Information Technology Education (BCITE) or Marketing Education (ME), and a Commonwealth of Pennsylvania Instructional I Teaching Certificate in BCITE or ME. There is an application process. The deadline to apply is June 15th for fall admittance. For more information please contact:

Dr. D. James Gilmour, Program Advisor  
Ritter Hall 348  
215-204-6197  
jgilmour@temple.edu

### Summary of Requirements

#### University Requirements

All new students are required to complete the university's General Education (GenEd (p. 143)) curriculum. Note that students not continuously enrolled who have not been approved for a Leave of Absence or study elsewhere must follow University requirements current at the time of re-enrollment.

#### College Requirements

Students must meet College Graduation Requirements (p. 559), including the requirements of the major listed below. Business Management students must attain a 2.0 GPA in the major and a 2.0 cumulative GPA in order to graduate. To calculate the GPA in the major, use the major GPA calculator (http://www.fox.temple.edu/cms_academics/dept/advising/students/gpa-calculator).

#### Major Requirements

Students must follow the Major Requirements and College Requirements current at the time of declaration. Students not continuously enrolled who have not been approved for a Leave of Absence or study elsewhere must follow University, College, and Major requirements current at the time of re-enrollment.

**Economics**

Dr. Michael Bognanno, Chair
Dr. William Holmes, Advisor
Office: Ritter Annex 804
215-204-8175
wholmes@temple.edu
www.cla.temple.edu/economics/

Economics is the study of how we allocate resources among alternative uses to satisfy our wants. Virtually all of the public and personal issues which confront us today have an important economic component. For this reason, the economic way of thinking plays a valuable role in helping us make sense of the complex world in which we live. In addition, the study of economics is excellent preparation for a wide range of careers. Economics majors with bachelor's degrees are well prepared to be managers in both the public and private sectors. Training in economics also provides a solid basis for professional study in law, business, public administration, and the health sciences.

The Temple Economics Society is the student professional organization for economics majors and is open to all students interested in economics. Economics majors may also become members of Omicron Delta Epsilon (ODE), the National Honor Society, if they meet the admissions requirements of the organization. For more information, please contact Dr. William Holmes at wholmes@temple.edu or phone 215-204-8175.

**Accelerated 3 Year BBA**

Motivated students can accelerate their BBA program to finish in 3 years. Please see the suggested sequence. (http://www.cla.temple.edu/economics/undergraduate/three-year-bba-grid)

**Minor**

Students in any college who wish to understand basic business foundations and how the impact of economics affects public and personal issues may want to minor in Economics. Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor. The requirements (p. 576) must be completed prior to graduation.

**Summary of Requirements**

**University Requirements**

All new students are required to complete the university's General Education (GenEd (p. 143)) curriculum.

Note that students not continuously enrolled who have not been approved for a Leave of Absence or study elsewhere must follow University requirements current at the time of re-enrollment.
College Requirements

In addition to completing the economics courses required of all students in the Fox School of Business and Management, Economics majors must fulfill the additional requirements listed below as well as meet College Graduation Requirements (p. 559). Students must attain at least a 2.0 GPA in their major and 2.0 GPA overall in order to graduate. To calculate the GPA in the major, use the major GPA calculator (http://www.fox.temple.edu/cms_academics/dept/advising/students/gpa-calculator).

Major Requirements

Students must follow the Major Requirements and College Requirements current at the time of declaration. Students not continuously enrolled who have not been approved for a Leave of Absence or study elsewhere must follow University, College, and Major requirements current at the time of re-enrollment.

---

1. ECON 3563 or ECON 3564 replaces IB 3101 in the upper division foundation. This course is not calculated in the major GPA.
2. This major capstone is usually taken in the final semester, and all prerequisites must be met.
3. In order to satisfy a Major Elective, Fox Students must take “Behavioral Economics” as ECON 3548. Students cannot receive credit for both ECON 3548 and ECON 3696.
4. This course was previously offered as ECON 3505. Students who have earned credit in ECON 3505 will not earn additional credit in ECON 4071.

ECON 3408, ECON 3581, ECON 3696, ECON 3999, and ECON 4999 cannot be used to fulfill an Elective for the Economics major. These courses as well as other courses in Economics not included above can be taken as free electives for the degree.

**Entrepreneurship & Innovation Management**

Arvind Parkhe, Chair  
215-204-6618  
aparkhe@temple.edu  
http://www.fox.temple.edu/cms_academics/dept/strategic-management/

Robert McNamee, Academic Director  
robert.mcnamee@temple.edu  
www.fox.temple.edu/mcm_people/robert-mcnamee/

Entrepreneurs are creative problem-solvers that are driven to have a big impact on the world. Many of Temple University's Entrepreneurship students start new businesses during or after college, but many more go on to work in exciting jobs with companies that realize the importance of innovation and the value of students that can think outside the box, recognize opportunities, and get the job done.

For students interested in Entrepreneurship and Innovation Management, we offer several options ranging from our major, minor, and certificate (see below) to a Living Learning Community & Freshman Seminar (Innovate and Create), a General Education Human Behavior course (SGM 0827 Creativity and Organizational Innovation), and numerous free workshops and competitions that are open to students from across Temple University.
Please check Innovation & Entrepreneurship Institute (http://www.fox.temple.edu/cms_research/institutes-and-centers/innovation-entrepreneurship-institute) for details on all of our programs. Note that Entrepreneurship courses are listed under the subject Strategic Management.

Temple’s Entrepreneurship and Innovation Management programs are consistently ranked among the top in the nation (2014 Princeton Review: #11 undergraduate). Through these programs you will learn how to be more creative, to recognize opportunities and generate innovations in all their forms, to understand the ecosystems and value chains of industries in order to envision new venture or product ideas, and you will be given the knowledge and tools necessary to launch and manage your own business or successfully propose new business ideas and change initiatives in any organizations you work for or with.

The Entrepreneurship and Innovation Management major is a good choice for students who:

• Would like to start a new business
• Want to have a positive social impact with a social venture
• Anticipate doing consulting or freelance work
• Plan to assume responsibilities in a family business
• Want to be a creative and productive member of an innovative, high-growth business

The program is designed with a balance of theory (why) and practice (how), and our courses are taught by world-leading researchers, successful serial entrepreneurs, experienced venture capital executives, and senior innovation managers. Course work is closely tied to the co-curricular programs of the Innovation & Entrepreneurship Institute (IEI) like the Be Your Own Boss Bowl (BYOBB) (e.g., our capstone course focuses on coaching students on finalizing an idea for a new business and writing a business plan that can be submitted to the BYOBB for a chance to win over $100k in prizes) and other competitions (e.g., multiple students in our GenEd course (SGM 0827) and Entrepreneurial Thinking course (SGM 3501) typically win prizes in our Innovative Idea Competition).

We want our Entrepreneurship and Innovation Management majors to have experience when they graduate. Thus, our program includes a required internship course, and we expect all Entrepreneurship and Innovation Management majors to be active members in the Entrepreneurial Student Association (ESA) where they can work on a variety of interesting projects with local companies and the community.

Finally, students are able to focus on actually launching a new venture while completing their degree and taking our courses. Experiential courses like Launch a Venture in 100 Days, Selling Professional Services, and Financing Your Ideas get students out of the classroom so they can become successful entrepreneurs, or even serial entrepreneurs, before they graduate.

**Accelerated 3 Year BBA**

Motivated students can accelerate their BBA program to finish in 3 years. Please see the suggested sequence (http://www.fox.temple.edu/cms_academics/dept/entrepreneurship).

**Minors**

**Entrepreneurship & Innovation Management Minor**

Students in any college who wish to understand how to innovate, pursue opportunities, and turn their ideas into reality by creating and managing a successful entrepreneurial or innovative business or social venture can pursue a minor in Entrepreneurship and Innovation Management.

The minor is appropriate for all Fox School majors but particularly relevant for students in marketing, finance, human resources, and MIS who are interested in being high-potential, creative, and innovative employees as well as those who would like to launch a venture or work as part of the growing entrepreneurial ecosystem.

Requirements (p. 577) for the minor must be completed prior to graduation. Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor.

**Information Technology Innovation and Entrepreneurship Minor**

The Fox School Information Technology Innovation and Entrepreneurship (ITIE) minor integrates two of the most important elements of the Fox School: the enabling role of information technology and the creativity and drive of entrepreneurial thinking. It is offered as a joint venture between the departments of Strategic Management and Management Information Systems.

The minor is appropriate for all Fox School majors but particularly relevant for students in marketing, finance, human resources, and MIS who are interested in applying IT in an entrepreneurial manner. Students who minor in ITIE will be well suited to work for corporations who want to drive new IT enabled innovative projects and for technology enabled start-ups.

Requirements (p. 582) for the minor must be completed prior to graduation. Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor.
Certificate

Certificate in Entrepreneurship & Innovation Management (Non-Business Majors)

The nine-credit, three course undergraduate Certificate in Entrepreneurship & Innovation Management is designed to provide coursework to support alternative, entrepreneurial career paths for students across the university; to promote the entrepreneurial spirit by fostering opportunity recognition and resource acquisition that leads to innovation and invention; and to increase awareness of, and participation in, entrepreneurial opportunities available to all Temple students. This certificate will be jointly issued by the Fox School of Business and Management and its partner schools, and will appear on the student's transcript.

The requirements (p. 572) for this certificate must be completed prior to graduation. Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor or certificate.

Summary of Requirements

University Requirements

All new students are required to complete the university's General Education (GenEd (p. 143)) curriculum.

Note that students not continuously enrolled who have not been approved for a Leave of Absence or study elsewhere must follow University requirements current at the time of re-enrollment.

College Requirements

Students must meet College Graduation Requirements (p. 559), including the requirements of the major listed below. Students must attain an overall GPA of 2.0 or higher in the major and must maintain a 2.0 GPA overall in order to graduate as an entrepreneurship major. Entrepreneurship & Innovation Management students are expected to participate in the Entrepreneurial Student Association. To calculate the GPA in the major, use the major GPA calculator (http://www.fox.temple.edu/cms_academics/dept/advising/students/gpa-calculator).

Major Requirements

Students must follow the Major Requirements and College Requirements current at the time of declaration. Students not continuously enrolled who have not been approved for a Leave of Absence or study elsewhere must follow University, College, and Major requirements current at the time of re-enrollment.

Total Credit Hours 21
ACCT 2521 replaces ACCT 2102 in the lower-division foundation requirements for Entrepreneurship & Innovation Management majors. This course is not calculated in the major GPA. Students who have already completed ACCT 2102 are still required to take ACCT 2521.

Although SGM 3685 is not a prerequisite for SGM 4596, students are strongly encouraged to take SGM 3685 prior to their final semester at Temple.

This is the major capstone, and all prerequisites must be met.

Students interested in taking SGM 3521 should have already assessed the viability of their idea for a new venture. SGM 3501 or SGM 0827 and SGM 3503 are strongly recommended prior to taking SGM 3521. Students who do not meet these criteria may be required to complete additional supplementary work and should contact the professor to find out if they are sufficiently prepared to take this course. Students are encouraged to take SGM 3521 concurrently with or after SGM 4596.

SGM 3580 course topics vary each year and depending on the topic may be used to fill Entrepreneurial Thinking, Entrepreneurial Management, Entrepreneurial Marketing, or Breadth-Depth category requirements. Approval of the IEI Academic or Managing Director or department chair required.

Independent Study projects will be identified or created by the IEI. Approval of the IEI Academic or Managing Director or department chair required.

Students interested in enrolling in IB 2509 should be aware that it is a competitive program and, if accepted, their research project must be Entrepreneurship related. Please contact: study.abroad@temple.edu

NOTES

Students pursuing a double major in business can double-count a maximum of one course toward both majors.

Students pursuing a minor may not double count courses for the major and minor.

Suggested Academic Plan

Bachelor of Business Administration in Entrepreneurship & Innovation Management

Requirements for New Students starting in the 2015-2016 Academic Year

Financial analyst, equity or bond trader, wealth management, credit analyst, treasury analyst, risk analysis, and compliance. Some of the most rewarding and challenging careers in domestic and international corporate community demand a background in finance. A Finance major from the Fox School of Business and Management prepares students for exciting and challenging careers in all areas of finance, a robust curriculum, a broad and deep range of electives, and an impressive array of networking opportunities.

Finance majors follow many career paths including:

1. Financial analyst in a corporation dealing with activities such as merger and acquisitions, initial public offerings, capital budgeting proposals, treasury operations;
2. Bank analyst, reviewing and overseeing loans to business and individuals, and relationship manager who deals directly with customers;
3. Wealth and investment managers helping large organizations and individuals effectively allocate their capital into appropriate investment vehicles; and
4. Program analyst with federal, state and local governments or non-profit organizations to efficiently raise and deploy capital across a broad spectrum of projects, provide pension fund support, work with financial advisors on security issuance, and support of day-to-day cash management.

We strongly encourage Finance majors to become involved in the Financial Management Association and the Temple University Investment Association. These student organizations offer our majors the opportunity to meet business leaders in the financial industry, attend career development seminars, learn and gain real-life experience in the investment work, and gain an invaluable network to Temple alumni.

Accelerated 3 Year BBA

Motivated students can accelerate their BBA program to finish in 3 years. Please see the suggested sequence (http://www.fox.temple.edu/cms_academics/dept/finance/undergraduate/finance-major).

Minor

The four-course minor is designed for students interested in obtaining a deeper understanding of the principles of finance and their application to various financial issues facing decision-makers in corporate, financial, and government sectors of the economy. Students majoring in accounting, marketing, real estate, and risk management can benefit from minoring in finance.

Requirements (p. 579) for the minor must be completed prior to graduation. Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor.

Summary of Requirements

University Requirements

All new students are required to complete the university's General Education (GenEd (p. 143)) curriculum.

Note that students not continuously enrolled who have not been approved for a Leave of Absence or study elsewhere must follow University requirements current at the time of re-enrollment.

College Requirements

Students must meet College Graduation Requirements (p. 559), including the requirements of the major listed below. Students must attain an overall GPA of 2.0 and a 2.0 GPA in the major to graduate as a Finance major. To calculate the GPA in the major, use the major GPA calculator (http://www.fox.temple.edu/cms_academics/dept/advising/students/gpa-calculator).
Major Requirements

Students must follow the Major Requirements and College Requirements current at the time of declaration. Students not continuously enrolled who have not been approved for a Leave of Absence or study elsewhere must follow University, College, and Major requirements current at the time of re-enrollment.

Requirements of Finance Major

**FIN 3504**  Intermediate Corporate Finance  3
**FIN 3507**  Investments  3
**FIN 3551**  International Finance  1
**FIN 4596**  Seminar in Financial Management  3

Select three of the following:  9

cindy.axelrod@temple.edu

As the first wave of the baby-boom generation hits retirement age, an intense need and demand has arisen for skilled financial professionals to assist boomers – and other generations – in protecting, growing, and managing their assets. This major provides the skills and knowledge to meet the increased demand for financial-planning professionals.

Financial planning is about determining how an individual can meet their life goals through the proper management of financial resources. Financial planning encompasses establishing client goals, analyzing clients’ current financial status, developing and presenting recommendations and alternatives to meet the client’s goals and, implementing and monitoring the recommendations and alternatives.

Because a financial planner needs to manage their clients overall financial situation, several skills are required. These include:

- Retirement planning  
- Investment allocation
• Income tax and estate planning
• Insurance and employee benefits planning
• Financial statement preparation and analysis

Financial planners are in great demand in the Philadelphia area as well as in the national market. Potential employers include national and regional banks (i.e., Wells Fargo, Bank of America, Citigroup, JPMorgan Chase, etc.), asset managers (i.e., Vanguard, Fidelity, T. Rowe Price, etc.), accounting firms, and independent financial planning businesses and institutions.

Summary of Requirements

University Requirements

All new students are required to complete the university's General Education (GenEd (p. 143)) curriculum.

Note that students not continuously enrolled who have not been approved for a Leave of Absence or study elsewhere must follow University requirements current at the time of re-enrollment.

College Requirements

Students must meet College Graduation Requirements (p. 559), including the requirements of the major listed below. Students must attain an overall GPA of 2.0 and a 2.0 GPA in the major to graduate as a Finance major. To calculate the GPA in the major, use the major GPA calculator (http://www.fox.temple.edu/cms_academics/dept/advising/students/gpa-calculator).

Major Requirements

Students must follow the Major Requirements and College Requirements current at the time of declaration. **Human Resource Management**

Dr. Deanna Geddes, Chair  
Alter Hall 353  
215-204-8195  
geddes@temple.edu

Debbie Donato, Assistant Director  
Alter Hall 333 (HRM Department Office)  
215-204-8099  
deborahdonato@temple.edu

The Human Resource Management (HRM) major prepares students for careers in human resource (HR) management and general management. Increasingly, organizations are hiring well-trained professionals to recruit, develop, manage, and retain their most valuable business asset - human capital. The Human Resource Management department prepares students with the knowledge and skills needed for the strategic and interpersonal management of company employees.

Typical first jobs for Human Resource Management majors include corporate recruiter, employee relations specialist, compensation analyst, corporate trainer, HR generalist, and management trainee. Typical jobs held five-ten years out include HR director, staffing manager, compensation manager, training manager, and employee relations director.

Human Resource Management majors are expected to become involved in the Society for Human Resource Management (SHRM). Guest speakers, networking events, internships and co-ops, and other career development activities and are just a few benefits of joining. There are two student SHRM chapters, one at Main Campus and the other at Ambler. The Main Campus chapter office is located in Alter Hall 333C. For more information, contact Andrea Brooks-Lopez at 215-204-4226, ablopez@temple.edu or the SHRM office at 215-204-1626. For Ambler, contact Ken Riemer at riemertr@aol.com or the SHRM Main office.

In addition to SHRM, the HRM Department also invites all majors to join our student chapter of Net Impact or Student Professional Sales Organizations (PSO). For information on Net Impact go to their web site (http://www.foxnetimpact.org/) or contact faculty advisor Lynne Andersson at 215-204-5088, landerss@temple.edu. For more information on PSO, go to their web site (www.temple-pso.org (http://www.temple-pso.org)) or contact faculty advisor Tony Petrucci at 215-204-8138, petrucci@temple.edu.

**Accelerated 3 Year BBA**

Motivated students can accelerate their BBA program to finish in 3 years. Please see the suggested sequence (http://www.fox.temple.edu/cms_academics/dept/human-resource-management-welcome/undergraduate).
Minors & Certificates

Legal Studies Minor for Human Resource Managers

Human Resource Management majors only

The legal aspects of managing people at all levels of business and nonprofit organizations come into play in a wide variety of human resources policies and decisions as well as the ramifications of decisions about the business itself. Compliance with local, state and federal laws and regulations also creates the need for HR practitioners to consider the legal ramifications of hiring, training, coaching, disciplining and terminating individual employees. Larger organizational issues such as layoffs, restructuring, outsourcing, benefits and retirement programs and decisions must also be made in compliance with the law.

Requirements (p. 584) for this minor must be completed prior to graduation. Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor.

Human Resource Minor for Legal Studies

Legal Studies majors only.

Law permeates most aspects of our business lives and few decisions lack legal repercussions. In a business setting, the law regulates such things as who businesses can hire and fire, the liability for people injured on a business premises and labor/management relations. On the other hand, organizations are hiring non-lawyer professionals to manage the most important asset of business, its human talent. Those employees are usually trained in human resource management. In practice, lawyers and human resource managers work hand in hand to deal with employee problems and statutory regulations dealing with compliance issues. A major in law with a minor in human resource management is a natural fit. Students will learn the legal repercussions of a business decision while also being exposed to the management and human side of that decision with practical exposure to those issues.

Requirements (p. 582) for this minor must be completed prior to graduation. Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor.

Certificate in Leadership

The Fox Certificate in Leadership responds to workplace demands for effective leadership development. Corporate executives and numerous studies for years indicate the need for business school graduates to move beyond their technical competence as they step into leadership roles. In today's environment, a leadership mind-set with enhanced skills in organizational communication, conflict management, and team building gives individuals and organizations a competitive advantage. Expertise and perspective developed through the Leadership Certificate courses enable graduates to think and act in ways that reflect sophisticated competencies (from interpersonal to technical) and that benefit the interests of multiple organizational stakeholders.

Requirements (p. 573) for this certificate must be completed prior to graduation. Courses cannot be used to meet certificate requirements if already used to meet the requirements for a major or a different minor or certificate.

RMI & HRM Focus

The Risk Management and Insurance (RMI) Department and Human Resource Management (HRM) Department offer several complimentary courses for students interested in a career in employee benefits and/or human resource management. These courses allow students to broaden their career options by taking advantage of the cross-training offered by these departments.

- HRM major with a RMI focus: Students take RMI 3501 and RMI 3503
- RMI major with a HRM focus: Students take HRM 2501 and HRM 3511
- Dual HRM/RMI major. Students fulfill all requirements for both majors.

Summary of Requirements

University Requirements

All new students are required to complete the university's General Education (GenEd (p. 143)) curriculum.

Note that students not continuously enrolled who have not been approved for a Leave of Absence or study elsewhere must follow University requirements current at the time of re-enrollment.

College Requirements

Students must meet College Graduation Requirements (p. 559), including the requirements of the major listed below. Human Resource Management students must attain a 2.0 GPA in the major and a 2.0 cumulative GPA in order to graduate. To calculate the GPA in the major, use the major GPA calculator (http://www.fox.temple.edu/cms_academics/dept/advising/students/gpa-calculator).
Major Requirements

Students must follow the Major Requirements and College Requirements current at the time of declaration. Students not continuously enrolled who have not been approved for a Leave of Absence or study elsewhere must follow University, College, and Major requirements current at the time of re-enrollment.

Requirements of the Human Resource Management Major

**HRM 2501**  Introduction to Human Resource Management  3
**HRM 3511**  Compensation Management  3
**HRM 3512**  Human Resource Management and Public Policy  3
**HRM 4596**  Organizational Staffing and Career Management  3

Total Credit Hours  18

1. This major capstone is typically taken in the final semester, and all prerequisites (HRM 2501, HRM 3511, & HRM 3512) must be met.
2. These courses make up the Fox Leadership Certificate which will appear on your official transcript similar to a Minor. However, they cannot be double counted for HRM major requirements if applied toward the Leadership Certificate.
3. This course may be offered multiple semesters with different topics. It can be applied once toward the major. It can be used as a free elective if completed with a different topic.

Suggested Academic Plan

Bachelor of Business Administration in Human Resource Management

Requirements for New Students starting in the 2015-2016 Academic Year

Please note that this plan is suggested only, ensuring prerequisites are met.

### International Business Administration

**Arvind Parkhe, Chair**  
215-204-6618  
aparkhe@temple.edu

**Bertrand Guillotin, Academic Director, IB Program**  
bguillotin@temple.edu  
ciber@temple.edu  
www.fox.temple.edu/cms_academics/dept/strategic-management-department/programs/international-business/

A major in International Business Administration is a great choice for students who:

- Want to have productive and enriching interactions with foreigners
- Want to develop and leverage a foreign language proficiency
- Want to be able to assess and hedge risks of doing business abroad for their employer
- Will pursue international business opportunities (e.g. international procurement, foreign clients) for their employer
- Want to become familiar with the practical techniques required by international trade
- Would like to pursue a professional career that requires frequent travel abroad

The **U.S. News & World Report** has regularly ranked the Fox School of Business and Management's undergraduate International Business (IB) major in the Top 10 in the nation.

A major in International Business Administration combines coursework in international business (IB), geographical area studies, and foreign language. This educational experience is designed to equip students with the knowledge and global perspectives required to thrive in the global workforce of the twenty-first century. The IB major prepares students to understand the various challenges businesses face when they operate in an international environment. As the world is globalizing several emerging markets such as China, India, and Brazil have become important players in the international arena in the past two decades. The IB program emphasizes learning to do business in these emerging markets through elective courses such as *Fundamentals of Asian Business, Fundamentals of Latin American Business,* and *Special Topics in IB*.

Since an understanding of language and cultural differences plays an important role in international interactions, there is additional emphasis given to learning a second language. Students are required to demonstrate proficiency in a second language at the fourth semester level through coursework or examination. In addition, a cultural, historical, and geographic area of understanding is also essential. Students are encouraged to acquire this background through completion of a Certificate of Specialization in Spanish and Latin American Studies for Business, or Asian Business and Society facilitated by IGMS/CIBER, or elective courses offered by the College of Liberal Arts. See Spanish and Latin American Studies for Business (p. 928) and Asian Business and Society Certificate (p. 800) for information.

To further round out a student's education, experience abroad is required. Students are provided opportunities to intern or study for two weeks, a summer, a semester, or a year abroad in various countries where the university has established business programs or at partner institutions. See Temple CIBER, Study Abroad (http://www.fox.temple.edu/cms_research/institutes-and-centers/center-for-international-business-education-and-research/study-abroad-programs/overview) for information.
International Business Administration majors are strongly encouraged to either double major or earn an Area Studies and Language Certificate, and become actively involved in the International Business Association. This student organization hosts the Global Lecture Series with guest speakers from international business disciplines, networking events, and career development activities. This organization is open to all FSBM majors. For more information, visit International Business Association (http://www.fox.temple.edu/cms_career/student-professional-organizations/international-business-association) or contact the IBA officers at 215-204-8185.

**Accelerated 3 Year BBA**

Motivated students can accelerate their BBA program to finish in 3 years. Please see the suggested sequence (http://www.fox.temple.edu/cms_academics/dept/strategic-management-department/programs/international-business/undergraduate).

**Certificates**

Several interdisciplinary certificates are offered that will enhance international understanding: Asian Business & Society (p. 800) and Spanish & Latin American Studies for Business (p. 928). (p. 918)

**Programs**

- International Economics Concentration (p. 616)
- International Entrepreneurship Concentration (p. 618)
- International Finance Concentration (p. 621)
- International Marketing Concentration (p. 623)
- International Sales & Business Development Concentration (p. 626)
- International Supply Chain Management, Transportation & Logistics Concentration (p. 628)

**International Economics Concentration**

**Summary of Requirements**

**University Requirements**

All new students are required to complete the university's General Education (GenEd (p. 143)) curriculum.

Note that students not continuously enrolled who have not been approved for a Leave of Absence or study elsewhere must follow University requirements current at the time of re-enrollment.

**College Requirements**

Students must meet College Graduation Requirements (p. 559), including the requirements of the major listed below. Students must maintain a 2.0 GPA overall and a 2.0 GPA in the major to graduate as an International Business major. To calculate the GPA in the major, use the major GPA calculator (http://www.fox.temple.edu/cms_academics/dept/advising/students/gpa-calculator).

**Major Requirements**

Students must follow the Major Requirements and College Requirements current at the time of declaration. Students not continuously enrolled who have not been approved for a Leave of Absence or study elsewhere must follow University, College, and Major requirements current at the time of re-enrollment.

**Requirements of International Economics Concentration**

Undergraduate students may earn a Bachelor of Business Administration (B.B.A.) degree in International Business Administration (IB) with a concentration in International Economics. Students are strongly encouraged to pursue a complementary major or minor to enhance their professional marketability by specializing in a functional area of business and/or pursuing area studies expertise.

**Foreign Language Requirement**

(All students must be proficient in two languages)

### International Entrepreneurship Concentration

#### Summary of Requirements

#### University Requirements

All new students are required to complete the university's General Education (GenEd (p. 143)) curriculum.

Note that students not continuously enrolled who have not been approved for a Leave of Absence or study elsewhere must follow University requirements current at the time of re-enrollment.
College Requirements

Students must meet College Graduation Requirements (p. 559), including the requirements of the major listed below. Students must maintain a 2.0 GPA overall and a 2.0 GPA in the major to graduate as an International Business major. To calculate the GPA in the major, use the major GPA calculator (http://www.fox.temple.edu/cms_academics/dept/advising/students/gpa-calculator).

Major Requirements

Students must follow the Major Requirements and College Requirements current at the time of declaration. Students not continuously enrolled who have not been approved for a Leave of Absence or study elsewhere must follow University, College, and Major requirements current at the time of re-enrollment.

Requirements of International Entrepreneurship Concentration

Undergraduate students may earn a Bachelor of Business Administration (B.B.A.) degree in International Business Administration (IB) with a concentration in International Entrepreneurship. Students are strongly encouraged to pursue a complementary major or minor to enhance their professional marketability by specializing in a functional area of business and/or pursuing area studies expertise.

International Finance Concentration

Summary of Requirements

University Requirements

All new students are required to complete the university's General Education (GenEd (p. 143)) curriculum.

Note that students not continuously enrolled who have not been approved for a Leave of Absence or study elsewhere must follow University requirements current at the time of re-enrollment.

College Requirements

Students must meet College Graduation Requirements (p. 559), including the requirements of the major listed below. Students must maintain a 2.0 GPA overall and a 2.0 GPA in the major to graduate as an International Business major. To calculate the GPA in the major, use the major GPA calculator (http://www.fox.temple.edu/cms_academics/dept/advising/students/gpa-calculator).

Major Requirements

Students must follow the Major Requirements and College Requirements current at the time of declaration. Students not continuously enrolled who have not been approved for a Leave of Absence or study elsewhere must follow University, College, and Major requirements current at the time of re-enrollment.

Requirements of International Finance Concentration

Undergraduate students may earn a Bachelor of Business Administration (B.B.A.) degree in International Business Administration (IB) with a concentration in International Finance. Students are strongly encouraged to pursue a complementary major or minor to enhance their professional marketability by specializing in a functional area of business and/or pursuing area studies expertise.

Foreign Language Requirement

(All students must be proficient in two languages)

**International Supply Chain Management, Transportation & Logistics Concentration**

**Summary of Requirements**

**University Requirements**

All new students are required to complete the university's General Education (GenEd (p. 143)) curriculum.

Note that students not continuously enrolled who have not been approved for a Leave of Absence or study elsewhere must follow University requirements current at the time of re-enrollment.

**College Requirements**

Students must meet College Graduation Requirements (p. 559), including the requirements of the major listed below. Students must maintain a 2.0 GPA overall and a 2.0 GPA in the major to graduate as an International Business major. To calculate the GPA in the major, use the major GPA calculator (http://www.fox.temple.edu/cms_academics/dept/advising/students/gpa-calculator).

**Major Requirements**

Students must follow the Major Requirements and College Requirements current at the time of declaration. Students not continuously enrolled who have not been approved for a Leave of Absence or study elsewhere must follow University, College, and Major requirements current at the time of re-enrollment.
Requirements of International Supply Chain Management, Transportation & Logistics Concentration

Undergraduate students may earn a Bachelor of Business Administration (B.B.A.) degree in International Business Administration (IB) with a concentration in International Supply Chain Management, Transportation & Logistics. Students are strongly encouraged to pursue a complementary major or minor to enhance their professional marketability by specializing in a functional area of business and/or pursuing area studies expertise.

Foreign Language Requirement
(All students must be proficient in two languages)

</tbody>
</table>
The Legal Studies curriculum is designed to acquaint students with the broad spectrum of the economic, political, and sociological framework within which the law functions. It also may be pursued as a pre-law major in preparation for law school. Majors will be exposed to a curriculum that will challenge their thinking process and reasoning abilities through the use of actual court cases, trial simulations, negotiations and other advocacy skills that stress written and oral communication. All faculty are law trained, and the courses offer an interesting blend of theory and practice.

Legal Studies majors are encouraged to become involved in Phi Alpha Delta (PAD) Law Fraternity, International. This organization hosts guest speakers, sponsors law-related field trips, and assists students in gaining internships within the legal field.

**Accelerated 3 Year BBA**

Motivated students can accelerate their BBA program to finish in 3 years. Please see the suggested sequence (http://www.fox.temple.edu/cms_academics/dept/legal-studies-in-business/undergraduate/major).

**Online BBA Program**

The Legal Studies major is available as an online BBA degree completion program designed for new students ready to start their junior year in a business curriculum. Please visit our web site for program and admission information (http://www.fox.temple.edu/cms_academics/undergraduate-2/online-bba).

**The Temple Law Scholars Program**

Temple University School of Law and the Temple University Fox School of Business and Management have created a program for exceptional students who plan on attending law school. The Temple Law Scholars Program provides an opportunity for outstanding students to gain provisional admission to Temple University School of Law at the same time they are accepted into the Fox School of Business and Management. As Temple Law Scholars, students will spend their undergraduate years in Temple’s Honors Program with a major in Legal Studies, after which they will enroll in Temple University School of Law, leading to the degree of Juris Doctor. While undergraduates, students may choose to add a second major or minor.

The Temple Law Scholars Program offers two options:

1. The 3/3 option offers an accelerated experience in which the student begins law school after three years of undergraduate work in the Honors program. The bachelor's degree in Business Administration with a major in Legal Studies is awarded after completion of the first year of law school, and the law degree is received after three years of law school.
2. The 4/3 program offers an enriched undergraduate experience in which the student receives the bachelor's degree in Business Administration with a major in Legal Studies after four years in the Honors Program, and the law degree after three years of law school.

Students who wish to seek additional work experience prior to matriculating in law school can also be granted a one-year deferral between college and law school.

Visit our web site for more information about the Department of Legal Studies (http://www.fox.temple.edu/cms_academics/dept/legal-studies-in-business) and its course offerings.

**Minors**

Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor.
Human Resource Minor for Legal Studies

Legal Studies majors only.

Law permeates most aspects of our business lives and few decisions lack legal repercussions. In a business setting, the law regulates such things as
who businesses can hire and fire, the liability for people injured on business premises and labor/management relations. On the other hand, organizations
are hiring non-lawyer professionals to manage the most important asset of business, its human talent. Those employees are usually trained in
human resource management. In practice, lawyers and human resource managers work hand in hand to deal with employee problems and statutory
regulations dealing with compliance issues. A major in law with a minor in human resource management is a natural fit. Students will learn the legal
repercussions of a business decision while also being exposed to management and human side of that decision with practical exposure to those issues.

Requirements (p. 582) for this minor must be completed prior to graduation. Courses cannot be used to meet minor requirements if already used to
meet the requirements for a major or a different minor or certificate.

Entertainment Law and Business Minor

Business and Tourism & Hospitality Management students only.

As long as people have had free time, they have pursued leisure activities. Music, theaters, and sports have been a part of culture since ancient times.
As leisure time and personal incomes have grown, so has the arts, entertainment, and recreation industry. There are about 125,500 establishments,
ranging from art museums to minor league sports teams in the entertainment field. Practically any activity that occupies a person's leisure time, excluding
the viewing of motion pictures and video rentals, is part of this industry. What is often overlooked by those who wish to make a career in the field is that
this endeavor is still a business and requires an understanding of the business enterprise. Not only will students who pursue this minor obtain a business
degree but they will also learn about the special legal issues that confront this industry that provides about 2 million jobs a year.

Requirements (p. 577) for this minor must be completed prior to graduation. Courses cannot be used to meet minor requirements if already used to
meet the requirements for a major or a different minor or certificate.

Legal Studies Minor

Business and Tourism & Hospitality Management students only.

This four course, 12-credit minor is designed to expose students to a curriculum in legal studies, particularly students majoring in other disciplines such
as accounting, risk management or finance who are considering law school. Students will learn how to read cases and statutes, do legal research and
make a legal argument as well as identify the legal issues that will impact their business and personal decisions.

Requirements (p. 583) for this minor must be completed prior to graduation. Courses cannot be used to meet minor requirements if already used to
meet the requirements for a major or a different minor or certificate.

Legal Studies Minor for Human Resource Managers

Human Resource Management majors only.

The legal aspects of managing people at all levels of business and non profit organizations come into play in a wide variety of human resource policies
and decisions as well as the ramifications of decisions about the business itself. Compliance with local, state and federal laws and regulations also
creates the need for HR practitioners to consider the legal ramifications of hiring, training, coaching, disciplining and terminating individual employees.
Larger organizational issues such as layoffs, restructuring, outsourcing, benefits and retirement programs and decisions must also be made in
compliance with the law.

Requirements (p. 584) for this minor must be completed prior to graduation. Courses cannot be used to meet minor requirements if already used to
meet the requirements for a major or a different minor or certificate.

Summary of Requirements

University Requirements

All new students are required to complete the university's General Education (GenEd (p. 143)) curriculum.

Note that students not continuously enrolled who have not been approved for a Leave of Absence or study elsewhere must follow University
requirements current at the time of re-enrollment.

College Requirements

Students must meet College Graduation Requirements (p. 559), including the requirements of the major listed below. Legal Studies students must
attain a 2.0 GPA in the major and a 2.0 cumulative GPA in order to graduate. Please note that GPA requirements for Law School admission will be
significantly higher. To calculate the GPA in the major, use the major GPA calculator (http://www.fox.temple.edu/cms_academics/dept/advising/students/gpa-calculator).
Major Requirements

Students must follow the Major Requirements and College Requirements current at the time of declaration. Students not continuously enrolled who have not been approved for a Leave of Absence or study elsewhere must follow University, College, and Major requirements current at the time of re-enrollment.

Management Information Systems

Munir Mandviwalla, Department Chair
Office: Speakman Hall 210
215-204-5617
munir.mandviwalla@temple.edu
http://community.mis.temple.edu

Mart Doyle, Assistant Professor & Program Director
Office: Speakman Hall 209H
215-204-4684
mdoyle@temple.edu

Joseph Allegra, Associate Director
Office: Speakman Hall 210C
215-204-3060
jallegra@temple.edu

The nationally ranked Fox BBA Major in Management Information Systems (MIS) produces leaders who initiate, design, and apply technology to transform business functions and produce innovative products and services.

TechRepublic. In this region it is the only ranked MIS program at a public university. Fox MIS graduates are sought by the top firms in the nation and enjoy 100% placement. The BBA in MIS is a STEM program that provides access to exclusive scholarships (http://community.mis.temple.edu/stem-scholarships-and-awards).

The BBA in MIS prepares students for a digital centric economy in which large and growing IT centric firms provide infrastructure like services that smaller entrepreneurial firms re-imagine to create innovative and value added services for consumers and business. Fox MIS students will successfully compete in a world in which traditional large corporations continue to streamline their IT operations but grow by adding new technologically enhanced innovative capabilities.

Fox MIS students will learn to:

• Initiate and lead technology enabled change (e.g., act as a change agent in a large firm)
• Analyze and design innovative digital products and services (e.g., create and implement the social media strategy for a new start-up)
• Apply IT to automate and improve business processes (e.g., apply analytics to discover new insights)
• Transform a business function with IT (e.g., mobile apps to reach new customers)
• Analyze clients, specify needs, integrate applications, and manage projects (e.g., acquire a new customer relationship management system)

Professional Achievement Program

Fox MIS majors benefit from an innovative one-of-a-kind three part professional achievement program (http://community.mis.temple.edu/current-students/professionalachievement):

1. Earn required points for professional development activities and for applying learning to practice (http://community.mis.temple.edu/current-students/professionalachievement/professional-achievement-points) (e.g., internships, student leadership)
3. Showcase your educational and professional achievements at the MIS specific Fox IT Career Fair (http://ibit.temple.edu/careerfair).

Careers and Placement

Fox MIS BBA majors get placed in the top firms in the region and nationally achieved 100% placement in May 2012 (http://community.mis.temple.edu/blog/2012/11/09/100-placement-congratulations-to-the-class-of-may-2012), 2013 (http://community.mis.temple.edu/blog/2013/11/15/100-placement-again-congratulations-to-the-class-of-may-2013), and 2014 - (Three consecutive years). Learn about careers in IS (http://community.mis.temple.edu/miscareers) and participate in the Fox IT Career Fair (http://ibit.temple.edu/careerfair) which provides exclusive one-stop placement and internship opportunities for MIS students. The Fox led ISJobIndex.com (http://ibit.temple.edu/isjobindex) project provides national level data on jobs in the IS field:

• Bachelor MIS students average salary is $57,212 nationally.
• 76% of IS graduates are satisfied with their jobs, and 76% are confident they will perform well in those jobs. 73% found jobs related to their chosen degree.
• Information Technology, Financial Services, and Business Services / Consulting are the top industries for IS jobs.
• The most common job classification is Systems Analyst at 35% for Bachelor students.

The top IS jobs are listed below:

• Business analyst | Systems analyst
• Data analytics | Business Intelligence
• Database administrator / manager
• Information systems / project manager
• Consultant
• Application developer / web designer
• Information architect
• Social media consultant
• Digital entrepreneur and innovator

The Fox MIS Edge

1. What is MIS and why should you consider MIS? (http://community.mis.temple.edu/what-is-mis)
2. What is unique about the Fox MIS program? (http://community.mis.temple.edu/why-fox-mis)
3. Exclusive scholarships (http://ibit.temple.edu/programs/scholarships) and awards (http://community.mis.temple.edu/current-students/annual-mis-awards). BBA in MIS students can access STEM designated scholarships (http://community.mis.temple.edu/stem-scholarships-and-awards).

5. Temple’s Association for Information Systems (http://www.temple-ais.org) (AIS) student organization is the best AIS student chapter (http://community.mis.temple.edu/blog/2014/01/08/temple-ais-wins-2013-student-chapter-of-the-year) and provides professional, social, and community activities.

6. The Fox BBA in MIS is designed in partnership with the Fox IT Industry Advisory Board (http://ibit.temple.edu/programs/fox-it-advisory-board). Members of the board mentor (http://ibit.temple.edu/programs/ibit-mentoring-program) students on projects.

7. Access networking opportunities through Fox’s Institute of Business and Information Technology (http://www.ibit.temple.edu). Learn about innovation and design at the Center for Design+Innovation. (http://design.temple.edu/events/fox-designweek-challenge-2014)

8. Learn the latest technologies (http://community.mis.temple.edu/technology).

9. Fox is one of the largest and most highly-ranked (http://www.fox.temple.edu/cms_about-fox/rankings) business schools.

10. Accelerated 3 Year BBA – Motivated students can finish in 3 years (http://community.mis.temple.edu/files/2015/03/Fox-3-year-BBA-in-MIS-3.27.2015.pdf).

Next Steps

1. Take a look at our internationally renowned faculty (http://community.mis.temple.edu/about/faculty)

3. Contact Temple AIS on Facebook (https://www.facebook.com/tuAIS)

If you are a high-performing, motivated student, we want to recruit you. Please contact Joseph Allegra at jallegra@temple.edu.

Accelerated 3 Year BBA

Motivated students can accelerate their BBA program to finish in 3 years. Please see the suggested sequence (http://community.mis.temple.edu/programs/bba-in-mis).

Minors

Management Information Systems Minor

A minor in MIS provides undergraduate students the ability to specify, select, utilize, and apply information technology (IT) to their major field of study. The minor provides the skills and terminology needed to become an expert user of IT in the business world.

Who Should Minor in Management Information Systems?

Business students will benefit from a minor in MIS. The minor in MIS will position you for jobs in business application areas, consulting positions, technical liaisons, and selling and acquisition of business software.

What is in it for me?

- Understand the key information technologies used by organizations.
- Learn how to specify technology solutions and engage with IT professionals.
- Understand the importance of business processes
- Identify how specific IT solutions are designed and implemented to increase efficiency and effectiveness.
- Apply data analytics to collect, store, analyze, and disseminate organizational information.

Requirements (p. 585) for the minor must be completed prior to graduation. Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor. For more information or to declare Management Information Systems as your minor, visit: http://community.mis.temple.edu/programs/misminor/

Information Technology Innovation and Entrepreneurship Minor (ITIE)

The Information Technology Innovation and Entrepreneurship (ITIE) minor integrates the enabling role of IT and the drive of entrepreneurial thinking. The minor includes courses in Entrepreneurship, Management Information Systems (MIS), and other related areas.

Who Should Minor in ITIE?

The minor is appropriate for all majors and particularly relevant for students in Marketing, Finance, Human Resources, and Management Information Systems. ITIE minors can drive new IT-enabled innovative projects in existing firms and create technology enabled start-ups.

The minor is a joint venture between the MIS department and the Strategic Management department.
Requirements (p. 582) for the minor must be completed prior to graduation. Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor. For more information or to declare ITIE as your minor, visit: http://community.mis.temple.edu/programs/minor-in-itie/.

**Digital Marketing Minor**

The Digital Marketing Minor prepares students for careers related to customer relationship management, social media, information architecture, e-commerce, search engine optimization, e-detailing, site design, Internet research, demographic and sales analytics, blogging, and media design. The Digital Marketing minor is appropriate for all BBA students in the Fox School of Business and is particularly relevant for Marketing, Human Resource Management, Business Management, and Management Information Systems students.

Requirements (p. 574) for the minor must be completed prior to graduation. Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor.

For more information about the Digital Marketing minor, visit: http://community.mis.temple.edu/programs/digital-marketing-minor/

**Certificate**

Students who wish to earn a Certificate in Management Information Systems can do so by completing the required courses. Courses cannot be used to meet certificate requirements if already used to meet the requirements for a major or a different minor or certificate. The certificate does not require the completion of the Business Minor or the Business Studies Minor. Certificates are not listed on the academic transcript.

Requirements (p. 584) for the certificate must be completed prior to graduation. Go to http://community.mis.temple.edu/form/?formname=mis_cert_dec_form to declare the Management Information Systems certificate.

**Summary of Requirements**

**University Requirements**

All new students are required to complete the university's General Education (GenEd (p. 143)) curriculum.

Note that students not continuously enrolled who have not been approved for a Leave of Absence or study elsewhere must follow University requirements current at the time of re-enrollment.

**College Requirements**

Students must meet College Graduation Requirements (p. 559), including the requirements of the major listed below. Management Information Systems students must attain a 2.0 GPA in the major, including a minimum grade of C in every course, and a 2.0 cumulative GPA in order to graduate. To calculate the GPA in the major, use the major GPA calculator (http://www.fox.temple.edu/cms_academics/dept/advising/students/gpa-calculator).

**Major Requirements**

Students must follow the Major Requirements and College Requirements current at the time of declaration. Students not continuously enrolled who have not been approved for a Leave of Absence or study elsewhere must follow University, College, and Major requirements current at the time of re-enrollment.

**Requirements of the Management Information Systems Major**

Note that minimum grades of C are required in the courses below.

### Total Credit Hours: 124

---

**Marketing**

Michael F. Smith, MSCM Department Chair
Office: Alter Hall 512
215-204-1682
msmith@temple.edu
www.fox.temple.edu/cms_academics/dept/marketing_and_supply_chain_management/
Marketing serves critical economic functions; companies of all sizes must develop effective marketing strategies to reach customers; this requires an understanding of how to innovate and develop new products, create effective promotional programs, price products and services, and distribute these in a global marketplace. The marketing curriculum at Fox provides students with occupationally-viable skills and professional development opportunities.

Contemporary marketing focuses on performance metrics and the Fox marketing curriculum seeks to immerse students in the quantitative methods and the behavioral sciences necessary to address marketing problems. Experiential and active learning are common in the upper division curriculum and projects are often offered in cooperation with business and government organizations.

Students are encouraged to choose specific course sequences within the curriculum which offer more in-depth coverage of topics and provide job-ready skills; these sequences include: Supply Chain Management, Digital Marketing, Consumer Insights, Sales Force Effectiveness and Retailing. Information on these industry-focused sequences can be found on our department’s web site (http://www.fox.temple.edu/cms_academics/dept/marketing_and_supply_chain_management/programs/undergraduate-academics/career-focused-sequences).

Marketing majors have varied career choices, including:

- Advertising – including media planning, social media, or account management
- Direct Marketing
- Digital Marketing
- Global Marketing
- Logistics and supply chain management
- Marketing Management
- Marketing Research and consumer insights
- Non-profit organizations such as hospitals and universities
- Sales and sales management
- Wholesaling and Retail Management, including buying and allocations

Marketing majors are encouraged to become involved in the American Marketing Association (AMA), a student professional organization that offers students the opportunity to meet business leaders in marketing. The AMA hosts regular meetings and career development programs. The AMA is open to all majors. For more information, please see the AMA web site (http://www.fox.temple.edu/cms_career/student-professional-organizations/american-marketing-association) or contact Professor Craig Atwater at atwater@temple.edu (215-204-5220).

**BBA Online Program Option**

The Marketing major is available as an online BBA degree completion program designed for new students ready to start their junior year in a business curriculum. Please see our program and admission information (http://www.fox.temple.edu/cms_academics/undergraduate-2/online-bba).

**Accelerated 3 Year BBA**

Motivated students can accelerate their BBA program to finish in 3 years. Please see the suggested sequence (http://www.fox.temple.edu/cms_academics/dept/marketing_and_supply_chain_management/programs/undergraduate-academics/3-1-program).

**Minors**

**The Marketing Minor**

Students in the Fox School who are interested in expanding their career options through a general knowledge of marketing principles and specializing in an area of marketing should consider completing a minor in Marketing. The requirements (p. 586) must be completed prior to graduation. Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor.

**The Digital Marketing Minor**

The Digital Marketing Minor prepares students for careers related to customer relationship management, social media, information architecture, e-commerce, search engine optimization, e-detailing, site design, internet research, demographic and sales analytics, blogging, and media design. The Digital Marketing minor is appropriate for all BBA students in the Fox School of Business and is particularly relevant for Marketing, Human Resource Management, Business Management, and MIS students. All students must complete declaration form and meet with Dr. Michael Smith (msmith@temple.edu) to declare or rescind this minor. The requirements (p. 574) must be completed prior to graduation. Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor.

**4+1 Master of Education Degree (M.Ed.)**

The 4+1 Master of Education (M.Ed.) program is designed for students interested in pursuing a Master of Education while completing the Bachelor of Business Administration (B.B.A.) in Marketing requirements. After completion of the programs, students earn a B.B.A. degree and an M.Ed. in Business,
Computers & Information Technology Education (BCITE) or Marketing Education (ME), and a Commonwealth of Pennsylvania Instructional I Teaching Certificate in BCITE or ME. There is an application process. The deadline to apply is June 15th for fall admittance. For more information please contact:

Dr. D. James Gilmour, Program Advisor
Ritter Hall 348
215-204-6197
jgilmour@temple.edu

**Summary of Requirements**

**University Requirements**

All new students are required to complete the university's General Education (GenEd (p. 143)) curriculum.

Note that students not continuously enrolled who have not been approved for a Leave of Absence or study elsewhere must follow University requirements current at the time of re-enrollment.

**College Requirements**

Students must meet College Graduation Requirements (p. 559), including the requirements of the major listed below. Students must attain an overall GPA of 2.0 and a 2.0 GPA in the major to graduate as a Marketing major. To calculate the GPA in the major, use the major GPA calculator (http://www.fox.temple.edu/cms_academics/dept/advising/students/gpa-calculator).

**Major Requirements**

Students must follow the Major Requirements and College Requirements current at the time of declaration. Students not continuously enrolled who have not been approved for a Leave of Absence or study elsewhere must follow University, College, and Major requirements current at the time of re-enrollment.

Recommended Electives for Industry Focused Course Sequences

**Consumer Insights**
- MKTG 3502: Information Management for Marketing Strategies
  - Select one:
    - MKTG 3507: Direct Marketing
    - MKTG 3508: Digital Marketing

**Sales Force Effectiveness**
- MKTG 3504: Sales and Sales Management
- MKTG 3508: Digital Marketing

**Retailing Management**
- MKTG 3506: Value Delivery Networks in Marketing
- MKTG 3508: Digital Marketing

**Digital Marketing Minor**
Marketing majors who declare Digital Marketing Minor (p. 574) will complete MKTG 3507 and MKTG 3508 as well as two other Marketing electives for the Marketing major.

**Suggested Academic Plan**

**Bachelor of Business Administration in Marketing**

**Requirements for New Students starting in the 2015-2016 Academic Year**
Please note that this plan is suggested only, ensuring prerequisites are met.

</table>
The real estate major is designed to provide an educational foundation for students interested in learning about real estate and real estate markets and/or pursuing careers in real estate. Traditional career paths include real estate investment and financial analysis, real estate financing and mortgage lending, real estate appraisal and valuation, property management, residential and commercial brokerage and marketing, and corporate real estate analysis.

Core competencies to be developed include the ability to analyze real estate investment opportunities from investor and lender perspectives, conduct asset and risk assessments and implement risk management strategies, understand the dynamics of real estate markets, and develop an understanding of the legal framework surrounding real estate ownership, title transfer, and the regulatory and legal requirements, including agency obligations, common in real estate transactions.

All real estate-interested students are encouraged to participate in Temple Real Estate Organization (TREO), the Fox School student professional organization (SPO) for real estate interested students. TREO (http://www.fox.temple.edu/cms_career/student-professional-organizations/temple-real-estate-organization) meets regularly throughout the semester and has an active real estate speaker series. A Temple University real estate student listserv serves as a conduit for various internships and job/career opportunities from real estate companies in the local area. Temple University also hosts a chapter of Alpha Sigma Gamma, the International Real Estate Honorary Society. Alpha Sigma Gamma is the premier honorary organization for real estate students, faculty and professionals with over 30 university chapters and program affiliates. Membership in ASG is based on academic achievement. Real estate majors are eligible for a number of professional and university scholarships and financial awards, including the Fox School's E. Fred Kemner Scholarship Award, devoted exclusively to Temple real estate students. Students interested in any of the opportunities above should contact Professor Huffman for more information.

**Accelerated 3 Year BBA**

Motivated students can accelerate their BBA program to finish in 3 years. Please see the suggested sequence (http://www.fox.temple.edu/cms_academics/dept/finance/undergraduate/real-estate-major).

**Summary of Requirements**

**University Requirements**

All students are required to complete the university's General Education (GenEd (p. 143)) curriculum.

Note that students not continuously enrolled who have not been approved for a Leave of Absence or study elsewhere must follow University requirements current at the time of re-enrollment.
College Requirements
Students must meet College Graduation Requirements (p. 559), including the requirements of the major listed below. Students must maintain a 2.0 GPA overall and a 2.0 GPA in the major to graduate. To calculate the GPA in the major, use the major GPA calculator (http://www.fox.temple.edu/cms_academics/dept/advising/students/gpa-calculator).

Major Requirements
Students must follow the Major Requirements and College Requirements current at the time of declaration. Students not continuously enrolled who have not been approved for a Leave of Absence or study elsewhere must follow University, College, and Major requirements current at the time of re-enrollment.

**Risk Management & Insurance**

R. B. Drennan, Program Director  
Alter Hall 628  
215-204-8894  
rob.drennan@temple.edu  
Temple University’s program in Risk Management and Insurance (RMI) is nationally recognized. Located in the Department of Risk, Insurance, and Healthcare Management, the program prepares students to identify and evaluate various sources of risk, then select and implement solutions to control these risks through insurance and other mechanisms of risk transfer and distribution.

Graduates of this program often enter the risk management or employee benefit departments of large businesses and other organizations. They may also take challenging positions within insurance or benefit consulting firms, brokerage firms, agency operations, or insurance companies.

Risk management and insurance majors are strongly encouraged to become active in the Sigma chapter of Gamma Iota Sigma, Temple's national award-winning professional student organization in Risk Management, Insurance, and Actuarial Science. The organization hosts numerous guest speakers from the industry, sponsors a variety of career development seminars, and maintains a widely-distributed résumé book. For more information, please contact the GIS President, at 215-204-9368 or visit the website at www.sigmachapter.org.

RMI & HRM Focus

The Risk Management Insurance (RMI) Department and Human Resource Management (HRM) Department offer several complimentary courses for students interested in a career in employee benefits and/or human resource management. These courses allow students to broaden their career options by taking advantage of the cross-training offered by these departments.

- HRM major with a RMI focus: Students take RMI 3501 and RMI 3503.
- RMI major with a HRM focus: Students take HRM 2501 and HRM 3511.
- Dual HRM/RMI major: Students fulfill all requirements for both majors.

For more information on joint HRM/RMI courses, contact Rob Drennan at 215-204-8894.

Minor

Students in any college who are interested in the health professions and want to enhance their skills by understanding the business principles underlying healthcare systems should consider a minor in Healthcare Management (p. 581). Risk Management majors who complete the Healthcare track are not eligible for the minor. Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor.

Major Tracks within Risk Management & Insurance

Students in the Risk Management & Insurance major may select from one of three tracks depending on their interests. These include:

- Employee Benefits Track (p. 648)
- Healthcare Risk Management Track (p. 650)
- Property-Liability/Corporate Risk Management Track (p. 652)

Employee Benefits Track

Summary of Requirements

University Requirements

All students are required to complete the university’s General Education (GenEd (p. 143)) curriculum.

Note that students not continuously enrolled who have not been approved for a Leave of Absence or study elsewhere must follow University requirements current at the time of re-enrollment.

College Requirements

Students must meet College Graduation requirements (p. 559), including the requirements of the major listed below. Students pursuing any of the Risk Management and Insurance major/tracks must attain a 2.0 cumulative GPA and 2.0 in the major/track to graduate with the Risk Management major. To calculate the GPA in the major, use the major GPA calculator (http://www.fox.temple.edu/cms_academics/dept/advising/students/gpa-calculator).

Major Requirements

Students must follow the Major Requirements and College Requirements current at the time of declaration. Students not continuously enrolled who have not been approved for a Leave of Absence or study elsewhere must follow University, College, and Major requirements current at the time of re-enrollment.

^1 Completion of prerequisites of Introduction to Health Services Systems (HCM 3501) and Healthcare Financing and Information Technology (HCM 3502) required. Students who want to take this option as an elective should plan to take HCM 3501 in Year 3 Fall (switching BA 3102 to Year 3 Spring), HCM 3502 in Year 3 Spring, and HCM 4596 in Year 4 Fall. HCM 3501 and HCM 3502 can be used to replace free electives.

### Healthcare Risk Management Track

#### Summary of Requirements

##### University Requirements

All students are required to complete the university’s General Education (GenEd (p. 143)) curriculum.

Note that students not continuously enrolled who have not been approved for a Leave of Absence or study elsewhere must follow University requirements current at the time of re-enrollment.

##### College Requirements

Students must meet College Graduation requirements (p. 559), including the requirements of the major listed below. Students pursuing any of the Risk Management and Insurance major/tracks must attain a 2.0 cumulative GPA and 2.0 in the major/track to graduate with the Risk Management major. To calculate the GPA in the major, use the major GPA calculator (http://www.fox.temple.edu/cms_academics/dept/advising/students/gpa-calculator).
Major Requirements

Students must follow the Major Requirements and College Requirements current at the time of declaration. Students not continuously enrolled who have not been approved for a Leave of Absence or study elsewhere must follow University, College, and Major requirements current at the time of re-enrollment.

**Supply Chain Management**

Michael F. Smith, MSCM Department Chair  
Office: Alter Hall 512  
215-204-1682  
msmith@temple.edu  
www.fox.temple.edu/cms_academics/dept/marketing_and_supply_chain_management/

Supply Chain Management (SCM) is both an art and a science. It is a discipline focused on planning and forecasting, purchasing, product assembly, moving, storage, distribution, sales, and customer service – in short, all of the activities that take place to get the right product into the right hands in the right quantity at the right time.

Supply chain management professionals are involved in every facet of the business process and strive to achieve a sustainable competitive advantage by building and delivering products better, faster and at a better value. To achieve success, SCM professionals must work across disciplines, interacting with nearly every department in an organization.
The SCM program provides students with basic knowledge of supply chain management, such as distribution strategies, planning, and procurement, while also working on their communication, negotiation, and leadership abilities.

The academic program is complemented by seminars and career fairs to share best industry practices from the leaders in the market, introduce and acquaint students with the variety of jobs and responsibilities in supply-chain, and help them identify their area of interest.

The SCM program provides opportunities for students to learn about supply chain management in an integrated business framework from distinguished faculty and regional industry experts in the area of supply chain management. The program prepares students to operate and lead major aspects of the supply system in established and start-up firms.

The curriculum focuses on providing knowledge on topics of practical skills and competencies: Supply Chain Principles, Transportation and Logistics Management, Procurement, Warehousing, and Inventory Management. Courses balance theory and practice in supply chain management to bridge the gap between academic and business practices and devise innovative research and teaching methods.

A key feature of this major is that it provides students with individualized career and academic advising. The SCM Faculty work with CSPD (Center for Student’s Professional Development) to help students stay connected with the regional industry associations, leaders, alumni, and corporate partners to prepare them for their future challenges upon entering the work force.

The SCM major requires a high level of quantitative, critical thinking and problem-solving skills; students with an overall GPA of 2.75 or more are recommended to enroll in the major. Prospective students are invited to discuss options with the Director of the Program, Dr. Neha Mittal (nmittal@temple.edu).

Student Professional Organization (SPO) in Supply Chain Management

A Supply Chain Management SPO was established on-campus, TU-SCA (Temple University Supply Chain Association). For more information, please contact Dr. Misty Blessley (misty.blessley@temple.edu).

MINOR

The Supply Chain Management Minor is ideal for students innovative enough to think creatively, yet meticulous enough to forecast the bigger picture. Students completing the SCM Minor pursue careers which direct the efficient flow of goods and services within and among organizations—from suppliers and manufacturers to retailers and consumers.

The SCM Minor course sequence is a strong complement with majors such as Marketing, International Business, Accounting, Information System, Finance and Healthcare Management.

The SCM Minor provides students with basic knowledge of supply chain management, such as distribution strategies, planning, and procurement, while also working on their communication, negotiation, and leadership abilities. Courses balance theory and practice in supply chain management to bridge the gap between academic and business practices and devise innovative research and teaching methods. The minor prepares students to operate and lead major aspects of the supply system in established and start-up firms.

The requirements (p. 587) must be completed prior to graduation. Courses cannot be used to meet minor requirements if already used to meet the requirements for a major or a different minor.

University Requirements

All new students are required to complete the university's General Education (GenEd) curriculum.

Note that students not continuously enrolled who have not been approved for a Leave of Absence or study elsewhere must follow University requirements current at the time of re-enrollment.

College Requirements

Students must meet College Graduation Requirements (p. 559), including the requirements of the major listed below. Students must attain an overall GPA of 2.0 and a 2.0 GPA in the major to graduate as a Finance major. To calculate the GPA in the major, use the major GPA calculator (http://www.fox.temple.edu/cms_academics/dept/advising/students/gpa-calculator).

Major Requirements

Students must follow the Major Requirements and College Requirements current at the time of declaration. Students not continuously enrolled who have not been approved for a Leave of Absence or study elsewhere must follow University, College, and Major requirements current at the time of re-enrollment.

¹ See Requirements section for list of suggested free electives to compliment the major.
School of Environmental Design

Effective January 1, 2016, the departments and programs within the School of Environmental Design moved to the Tyler School of Art.

Founded 2000.

School location:
580 Meetinghouse Road
Ambler, PA 19002
267-468-8000
ambler@temple.edu
www.cla.temple.edu/ced

See the Ambler Campus (p. 105) section of this Bulletin for more information on services, facilities, and student life.

Introduction

Temple University Ambler has been connected to sustainable concepts and environmental stewardship for over a century. In June 2000, the Temple University Board of Trustees formally recognized Ambler College, located at the Ambler Campus, as the 17th academic unit of Temple University. This designation provided Ambler College with the ability to plan and develop unique programs consistent with its mission. In July 2009, Ambler College was renamed the School of Environmental Design in the College of Liberal Arts. The School of Environmental Design (SED) was home to the Department of Community and Regional Planning, the Department of Landscape Architecture and Horticulture, and the Center for Sustainable Communities (see Special Programs and Facilities below). On January 1, 2016, the departments and programs within the School of Environmental Design were moved to the Tyler School of Art. They reside with the Department of Architecture and the Center for Sustainable Communities in the newly formed Division of Architecture and Environmental Design.

The mission of the School of Environmental Design is the enhancement of the relationship between individuals, social patterns, and political systems and the natural, built, and cultural environments of contemporary life. The School of Environmental Design upholds the environmental traditions established by the Pennsylvania School of Horticulture for Women and carried forward by our founding Department of Landscape Architecture and Horticulture. As Temple University's 17th college, the School of Environmental Design has a commitment to the health of communities, the preservation and appreciation of the natural and historical landscape, and the recognition of the connections between the natural and constructed worlds. (Adopted by the Faculty, Ambler College [now the School of Environmental Design], December, 2000.) The School of Environmental Design core values are: student-centered learning, community engagement, and environmental responsibility.

The Department of Landscape Architecture and Horticulture traces its origins to the Pennsylvania School of Horticulture for Women, founded in 1911 at Ambler Campus. Originally, the department offered only two-year Associate degree programs, but in 1988 added two four-year degree programs in Landscape Architecture and Horticulture. In Fall 2010 it added a Master of Landscape Architecture (M.L.Arch.) degree. The department’s evolution has combined theory with practice, continuing the tradition of blending art and science with practical experience. Committed to excellence in ecologically-based education, the department provides students with the knowledge and understanding of sustainable environments. Through an ecological approach to planning, design, development, and care of the land, the programs in Landscape Architecture and Horticulture promote the development of skills to improve the quality of urban, suburban, and rural communities. Courses and programs are offered that utilize the 187-acre Ambler Campus as both an arboretum and a living laboratory for faculty and students. Students also have the opportunity to conduct research in a state-of-the-art greenhouse.

Established in 2001, the Department of Community and Regional Planning supports the preparation of skilled practitioners for the dynamic and growing fields of community development and community and regional planning. Through the Bachelor of Science in Community Development, students learn to understand and think critically about the social, political, economic, and cultural dynamics shaping various types of communities. Particular emphasis is given to empowering disadvantaged communities to address inequalities and improve their long-term social, economic, and environmental sustainability. The Master of Science in Community and Regional Planning cultivates an understanding of the physical and economic context of planning, sensitivity to the social and environmental impact of public policies, and knowledge of governmental structures as they apply to planning. Both degree programs enable students to lead efforts to create and maintain healthy, sustainable communities by providing a broad-based understanding and awareness of multi-dimensional aspects of urban, suburban, and rural community challenges and the means of effecting change from both grass-roots and public policy perspectives.

The Ambler Campus continues to be the home of the School of Environmental Design and is also a teaching site for many courses and full degree programs sponsored by other schools and colleges of Temple University. Go to the Ambler Campus (p. 105) section of this Bulletin for a listing of the full degree programs and for additional information on campus facilities, services, and programs.

Accreditations

The Bachelor of Science in Landscape Architecture and the first professional Master of Landscape Architecture programs are both accredited by the Landscape Architectural Accreditation Board of the American Society of Landscape Architects.

The Master of Science program in Community and Regional Planning is accredited by the Planning Accreditation Board.
Admissions Information

Ambler Admissions Office
267-468-8100
ambler@temple.edu
ambler.temple.edu/admissions

A strong interest in the environment, planning, and/or design is highly desirable for students who enroll in all programs offered by the School of Environmental Design. Students interested in Community Development also should have a desire to develop computer, social science, and communications skills. Applicants to the Landscape Architecture and Horticulture programs, depending on the intended area of study, should have a background that includes courses in art, geometry, biology, and geography.

Due to the sequential nature of the required studio classes, students pursuing the Landscape Architecture degree will need to attend for at least seven semesters regardless of the amount of transfer credits accumulated, unless they are transfer students from another Landscape Architecture program.

Lehigh Carbon Community College (LCCC) Agreement

In 2009 Lehigh Carbon Community College and the School of Environmental Design signed a program-to–program articulation agreement to facilitate the transfer of LCCC students with an Associate's in Science in Natural Science-Horticulture and Plant Science to the School of Environmental Design Bachelor of Science in Horticulture (p. 674) program. Call the Office of Academic Advising at 267-468-8200 or visit www.temple.edu/vpus/transfer/agreements/lehighcarbon.html for detailed information.

Longwood Gardens Agreement

Students who graduate from the Longwood Gardens Professional Gardener Program and are admissible to Temple University may receive credits toward the Bachelor of Science degree in Horticulture (p. 674). This agreement is based on an assessment of prior learning for the completion of the Longwood program and is not a course by course articulation. Call the Ambler Office of Academic Advising at 267-468-8200 or visit www.temple.edu/vpus/transfer/agreements/longwood.html for detailed information. Note: Since programs and requirements are subject to change, students are advised to consult with an advisor at Longwood Gardens.

For a listing of all Temple University articulation agreements, go to www.temple.edu/vpus/transfer/agreements.htm.

Financial Aid and Scholarships

In addition to assistance from the Department of Student Financial Services, there are several scholarships and grants-in-aid that are available only to School of Environmental Design students: Horticulture, Landscape Architecture, Community Development, and Community and Regional Planning. Also see the Financial Aid (p. 137) section of this Bulletin.

W. B. Saul High School of Agricultural Sciences Scholarships

Two scholarships, the Robert Hunt Scholarship and the William Mifflin Scholarship, are available to students graduating from Philadelphia’s W. B. Saul High School who are admissible to Temple University and wish to study Horticulture, Landscape Architecture, or Community Development. Interested Saul students should contact the principal of the high school for information.

Scholarships for All School of Environmental Design Students

Peter G. Schlotterer and Elizabeth M. Zipf Scholarships are awarded to students with financial need, with preference for giving four or more $13,000 scholarships each year, based on need, to:

- one undergraduate student enrolled in either the Landscape Architecture or Horticulture program;
- one graduate student enrolled in the Master of Landscape Architecture program;
- one graduate student enrolled in the Master of Science in Community and Regional Planning program; and
- one undergraduate or graduate student who is either taking more than 51% of his or her courses at Ambler or one graduate or undergraduate student enrolled in the School of Environmental Design.

Grants and Scholarships for Community and Regional Planning Students

Recipients are selected by faculty members in the Department of Community and Regional Planning; there are no applications.

- **Arthur F. Loeben Scholarship in Community and Regional Planning**: awarded to undergraduate or graduate students who plan to enter or continue in the Community and Regional Planning programs.
- **Toward Sustainability Scholarship**: provides support for a sophomore or junior majoring in Community Development or Community and Regional Planning who has demonstrated a commitment to community service. Recipients must have a minimum grade point average of 2.75 or higher.
Grants and Scholarships for Landscape Architecture and Horticulture Students

Applications for the following are available in the Department of Landscape Architecture and Horticulture office as well as online (http://ambler.temple.edu/admissions/costs-aid-and-scholarships/scholarships-ambler-campus/landscape-architecture-and).

- **Honorable Judge David Addy Scholarship**: provides tuition assistance for a current student enrolled in the School of Environmental Design, majoring in Horticulture, with financial need and a grade point average of 2.5 or above.
- **Wilmer Atkinson Memorial Scholarship**: provides tuition assistance of varying amounts based on academic performance and financial need.
- **Louise and James Bush-Brown Alumni Scholarship**: presented annually by the Alumni Association of the School of Environmental Design to a current sophomore or junior based on character, worthiness, interest in chosen vocation, and academic excellence during the past year.
- **John Collins Academic Scholarship**: awarded to Landscape Architecture and Horticulture majors in their junior year, with financial need, who demonstrate strong leadership ability and a commitment to interdisciplinary collaboration.
- **Doylestown Nature Club Scholarship**: awarded annually based on academic performance and financial need. Preference is given to students from Bucks County.
- **John Paul Endicott Summer Internship**: annual internship for a Temple Ambler student to manage the food crops garden and the volunteers, to harvest the produce and distribute to local area food cupboards, and to assist with events.
- **Lou Henry Hoover Girl Scout Scholarship**: awarded annually to a student who has been active in the Girl Scouts for at least five years and who completes an endorsement sheet obtained through the Girl Scouts Council, and has good academic standing, aptitude for horticulture, and financial need.
- **Horticulture/Landscape Architecture Alumni Scholarship**: funded by the Alumni Association of the School of Environmental Design and awarded to a full-time student who has completed half of the credit requirement for the major, based on financial need, academic achievement, and volunteer service contributing to the well-being of the Ambler gardens and greenhouse. (Note: Recipients are not eligible for the Louise and James Bush-Brown Alumni Scholarship.)
- **Larkin Family Scholarship**: awarded annually to Temple University Ambler Horticulture and/or Landscape Architecture majors from Maryland based on financial need. Renewable scholarships which provide tuition assistance.
- **Jane R. Martin Memorial Scholarship**: awarded to students entering their sophomore year based on academic achievement and demonstrated potential for future success in Horticulture or Landscape Architecture.
- **Native Plant Summer Internship**: provides funding support for a full-time student in the Horticulture program to enhance learning through practical work experience in the four Native Plant Gardens located in the Ambler Arboretum.
- **Peter G. Schlotterer Ecological Restoration Scholarship**: awarded annually to junior or senior students who reside in southeastern Pennsylvania and demonstrate commitment to environmental preservation and restoration. The scholarships are based on academic performance and financial need.
- **Solomon Scholarship for Academic Excellence in Landscape Architecture**: recognizes a minority and/or female student in Landscape Architecture who demonstrates high academic achievement and financial need.
- **Dr. Eugene Udell Scholarship Endowment Fund**: established in 2009 by the Udell Family and Friends to remember the first dean of the Ambler Campus, it provides scholarships to students in Landscape Architecture and/or Horticulture who demonstrate academic achievement and financial need.
- **Val Udell Scholarship**: awarded to a student enrolled in Landscape Architecture or Horticulture who demonstrates financial need and academic achievement.
- **Lenora Friesleben Vaughan Scholarship**: awarded annually to a student entering the sophomore year, based on academic performance and financial need.
- **Woman’s National Farm and Garden Association, National Level, Scholarship**: awarded annually to female student(s) based on academic performance and financial need.
- **Woman’s National Farm and Garden Association, Pennsylvania Division Scholarship**: awarded annually to a female student, preferably from western Pennsylvania, based on academic performance and financial need.

Special Programs and Facilities

Ambler Arboretum of Temple University

Anne Brennan, Horticulture and Ambler Arboretum Supervisor
Baldev S. Lamba, M.L.A., Academic Director
267-468-8400
ambler.temple.edu/arboretum

The Temple University Ambler Campus has a long history and rich tradition of horticulture and landscape design. Established as the Pennsylvania School of Horticulture for Women in 1911, the 187-acre campus represents a unique mix of natural and designed landscapes.

The gardens and campus serve as an excellent outdoor teaching laboratory for numerous classes and as a source of inspiration for students, faculty, and visitors. The campus was officially designated an arboretum in March 2000. Now known as the Ambler Arboretum of Temple University, this
The historic, public garden continues to develop as a living laboratory. The formal gardens have been revitalized to express the character of their original design, and many new garden additions are included throughout the grounds.

As the home of Temple University's Department of Landscape Architecture and Horticulture, the Ambler Campus has a myriad of learning gardens, including a ground cover garden, native plant garden, formal gardens, green roof garden, rock wall, woodland garden, sustainable wetland garden, trial garden, the Viola Anders Herb Garden, the Philip A. and Barbara F. Albright Winter Garden, the Ernesta Ballard Healing Garden with labyrinth, the Colibraro Conifer Garden, and large perennial borders. The arboretum's three areas of focus are sustainability, the health benefits of gardens, and the history of women in horticulture, agriculture, and design.

**Center for Sustainable Communities (CSC) at Temple University Ambler**

Jeffrey Featherstone, Ph.D., Director  
Susan E. Spinella Sacks, M.S., Assistant Director  
Md. Mahbubur Meenar, PhD., Assistant Director, Geographic Information Systems Operations and Research  
www.temple.edu/ambler/csc/

The Center for Sustainable Communities develops and promotes new approaches to protecting and preserving quality of life through sustainable development, balancing the relationship between environmental integrity, economic prosperity, and social equity. It was designed to build on Temple University Ambler's strengths in horticulture and landscape architecture and to draw upon the expertise of all Temple University faculty. A working resource for government agencies, community organizations, and developers, the center provides objective information and services to improve decision-making relative to land use and water resources planning, in addition to conducting interdisciplinary research and offering educational and community outreach programs. Students in degree programs in Community Development, Community and Regional Planning, Horticulture, Landscape Architecture, and other University programs have the opportunity to take full advantage of the CSC to obtain practical experience.

**Greenhouse**  
Anne Brennan, Horticulture and Ambler Arboretum Supervisor  
Merrill Miller, Staff Horticulturalist  
Kathryn Reber, Staff Horticulturalist  
267-468-8191  
ambler.temple.edu/arboretum/gardens

The Greenhouse provides students with a first-class facility to study plant and soil science. The energy-efficient greenhouse includes computerized climate controls and thermal blankets to protect the plants in the winter and shade them in the summer. Modern fertilizer injection systems water and fertilize plants simultaneously. In addition to being used for coursework, the greenhouse provides faculty and students with a facility to conduct horticulture research that is at the forefront of the industry.

**Semester Abroad**

After careful consultation with their advisors, juniors and seniors in Landscape Architecture and Horticulture and students in other School of Environmental Design programs may elect to enroll in a semester abroad. Many options are available, including the Rome campus. For more information about Study Abroad options, see Education Abroad (p. 49).

**Awards for Achievement and Honor Societies**

**Academic and Leadership Awards**

All Ambler Campus students are eligible to qualify for the academic and leadership awards presented annually that are described in the Ambler Campus (p. 105) section of this Bulletin.

The following annual award is available to all School of Environmental Design students. The recipients are selected; there is no application.

- **School of Environmental Design Alumni Association Award**: recognizes a graduating student in Community Development and a graduating student in Horticulture or Landscape Architecture for dedication, unselfishness, and contribution to the School of Environmental Design.

The following annual awards are available to Department of Community and Regional Planning students only. Recipients are selected by faculty members in the Department of Community and Regional Planning; there are no applications.

- **Community and Regional Planning Award for Academic Excellence**: recognizes students for outstanding achievement in the classroom.
- **Community and Regional Planning Award for Outstanding Planning Studio Leadership**: recognizes leadership among Planning Studio peers, a high level of professionalism, and a strong commitment to effective planning practice.
- **Community and Regional Planning Award for Outstanding Service**: recognizes a Community and Regional Planning student for exceptional leadership and service that furthers planning education and professional practice.
The following annual awards are available to Department of Landscape Architecture and Horticulture students only. To complete an application, visit the online application form (http://ambler.temple.edu/admissions/costs-aid-and-scholarships/scholarships-ambler-campus/landscape-architecture-and) although an application is not available for all honor awards.

- **American Society of Landscape Architects (ASLA) Student Awards of Honor and Merit:** recognize students, with cumulative averages of at least 3.0, who, in the opinions of their faculty and professionals from the local ASLA chapter, have achieved a sustained level of outstanding performance in their studies and show promise of making significant contributions to the profession.

- **Viola Anders Merit Award:** funded by the Alumni Association of the School of Environmental Design and presented to one graduating student and one undergraduate in Horticulture or Landscape Architecture for meritorious service in the greenhouse or the Ambler Arboretum of Temple University.

- **Bierhuizen Family Undergraduate Research Award:** presented annually to a Horticulture student to help defray the costs associated with the Senior Research Project.

- **The Emma Blakiston-Frances Lukens Book Award:** for the purchase of books, given to the member of the graduating class in Horticulture and Landscape Architecture who ranks highest in academic achievement.

- **John Collins Drawing Award:** presented to a graduating student in Landscape Architecture, the recipient is chosen by a selection panel of three landscape architects, nominated by the Pennsylvania/Delaware Chapter of the American Society of Landscape Architects, including at least one Temple University School of Environmental Design representative.

- **Landscape Architecture and Horticulture Faculty Award:** presented to graduating students in Horticulture (A.S.), Horticulture (B.S.), and Landscape Architecture (B.S.) for academic excellence and personal growth during their years at Ambler.

- **Philadelphia Flower Show Commendation:** recognizes students for distinguished leadership and service in the planning and implementation of the department's annual exhibit.

- **The Pi Alpha Xi National Honor Society Award:** recognizes outstanding service and dedication to the department, school, and university by a member of Pi Alpha Xi.

### Landscape Architecture and Horticulture Honor Societies

**Pi Alpha Xi** is the national honor society for students majoring in horticulture. To be admitted to the society, a student must be a junior or senior, have a cumulative grade point average of at least 2.75, and have a grade point average of at least 3.0 in all horticulture courses. This chapter sponsors several fundraising events during the academic year, the largest being the annual Plant Sale that takes place in early May.

**Sigma Lambda Alpha** is the honor society for landscape architecture majors. To be admitted to the society, a student must be a junior or be in the fifth semester of their program and have a cumulative grade point average of at least 3.2. A student who does not qualify in the junior year may be elected in the senior year.

### Student Associations

**Landscape Architecture and Horticulture Student Association**

This organization, which incorporates a Pennsylvania/Delaware Student Chapter of the American Society of Landscape Architects (ASLA), holds annual fundraising events, such as plant sales, and sponsors a student-mentoring program.

**Society for Ecological Restoration (SER)**

For Master of Landscape Architecture students, this society promotes Restoration Ecology worldwide through books, online networks, and conferences.

**Temple Student Planning Organization (T.S.P.O.)**

The Temple Student Planning Organization is affiliated with the American Planning Association. Its mission is to promote awareness of the benefits of regional and sustainable planning by participating in educational programs, engaging in outreach through community service, and encouraging an open dialogue with the community at large. Bi-weekly meetings provide a platform for students and professors to discuss current issues related to the field of planning.

In addition, all the School of Environmental Design students may participate in the student organizations listed in the Ambler Campus (p. 105) section of this Bulletin.

### Important Student Contact Information

Contact information for academic departments can be found under the listing for each individual program.

Gracie A. Laychock, Coordinator, Department of Landscape Architecture and Horticulture, A.A., Community College of Philadelphia

Merrill Miller, Staff Horticulturist, A.S., Temple University

Kathryn Reber, Staff Horticulturist, B.A., Bryn Mawr College

Karen Sapp, Coordinator, School of Environmental Design, B.A., LaSalle University

For other contact information, such as Financial Services, Registration, Career Services, and Disability Services, see the Ambler Campus (p. 105) section of this Bulletin.

An up-to-date Directory of all Temple University Ambler and School of Environmental Design personnel (name, title, office location, telephone number, and e-mail address) is available at ambler.temple.edu/about/directory. (http://ambler.temple.edu/about/directory)

Academic Policies & Regulations

Please see Academic Policies (p. 81). Students are responsible for complying with all university-wide academic policies that apply to their individual academic status. Additional and unique policies, or exceptions, for the School of Environmental Design appear below.

Dean's List

Each fall and spring semester, those undergraduates who have met the credit hour and academic criteria for their school or college are placed on the Dean's List. See the Dean's List (p. 92) policy for specific GPA and credit-hour requirements.

Leave of Absence/Re-enrollment

School of Environmental Design students who wish to voluntarily withdraw from the university for one or two semesters (fall and/or spring) are strongly encouraged to apply for a Leave of Absence (LOA). If approved, these students remain eligible for the same requirements as when they declared their major and will have access to Temple e-mail, university library systems, and priority and self registration for the approved semester of return. By
contrast, students who leave the university without any notice and without an approved LOA must apply to be re-enrolled and, if allowed to return, must follow the most recent university curricular requirements in place for the semester of their return. If no LOA was filed, before students return, they must indicate any course(s) taken since leaving Temple and provide a copy of an official transcript from each institution attended. Both the academic advisor and the student have the right to request an interview as part of the re-enrollment process. Students who received a medical withdrawal may be asked to provide medical documentation clearing them to return to school and to schedule an interview with an advisor before a re-enrollment decision can be made. Leave of Absence and Re-enrollment forms may be obtained in the Office of Academic Services, West Hall 102, through their academic advisor, or online (http://www.temple.edu/vpus/forms/#alpha). Further details can be viewed at: http://policies.temple.edu/getdoc.asp?policy_no=02.10.16

Students who were dismissed for academic reasons should see the university policy on Academic Standing (http://policies.temple.edu/getdoc.asp?policy_no=02.10.11).

Second Degrees
Students who have earned a bachelor's degree may earn a second bachelor's degree in Landscape Architecture or Horticulture, but they should also consider the Master of Landscape Architecture degree. Students who are interested in Community Development should consider enrolling in the Community and Regional Planning Master of Science degree program. See Second Degrees (p. 101) in the Academic Policies (p. 81) section. For information on graduate programs, refer to the Graduate Bulletin (http://bulletin.temple.edu/graduate).

Student Grievance Procedures
All students have the right to adjudicate grievances concerning academic matters in a fair and expeditious manner. Consult your academic advisor for information on procedures. Non-academic grievances should be directed to the Ambler Campus Office of Student Life. Also see Grievances (p. 41).

General College Graduation Requirements
Please see Academic Policies (p. 81). The following policies apply to all School of Environmental Design students:

Academic Residency Requirements
All undergraduates must take at least 45 of their last 60 semester hours at Temple University. Community Development majors must complete at least half of the courses required in the major at Temple. While candidates for a degree at Temple, students wishing to take academic work at another institution, either classroom or online courses offered during the regular year or in summer sessions, must have an advisor’s prior approval before enrolling at the other institution. Refer to the policy on Permission to Complete a Course at another Institution after Matriculation.

Courses Inapplicable to Graduation
Credits earned in the following courses are not applicable toward degrees awarded by the School of Environmental Design: ELECT, Russell Conwell Center (SRAP), Mathematics 0015, and lower-level courses in Military Science. A maximum of 4 courses or up to 12 semester hours for upper-level Military Science (Army ROTC), Naval Science (Navy ROTC), or Aerospace Studies (Air Force ROTC) courses will be applicable toward graduation credits. For the Department of Landscape Architecture and Horticulture (LAH), Horticulture 1001, unless it is the student’s first LAH course or part of a successful credit certificate, is not applicable toward degree credit.

Grades and Grade Point Average
To be awarded a School of Environmental Design degree, students must have a cumulative grade point average of at least 2.0 and pass all General Education required courses with C- or higher. In addition, Community Development majors must pass every course required for the Community Development major with a C- or higher and have a cumulative average of at least 2.0 for all courses in the major. For degrees in Landscape Architecture and Horticulture, no more than one grade below a C- is allowed in any course in either Landscape Architecture or Horticulture and students must have a cumulative average of at least 2.0 for all courses in the major.

Program Requirements
Planning a Program of Study
The information in the following requirements sections is designed to provide students with guidance in planning their program of study. The requirements, electives, and, in some cases, sequences are detailed. Courses are scheduled for students to follow the planned sequence. If students do not follow their program as designed, they may face conflicts or not have required prerequisites that will necessitate enrolling for additional semesters to complete their requirements.

If students enter a program after the freshman year, they must understand that their degree requirements may not be met within the traditional eight semesters (or four semesters for the Associate’s degree). When students first meet with their academic advisor, they should plan how long it will take to complete their degree requirements.

Requirement Modifications
The requirements for the degrees are under continuing review and are, therefore, subject to modification. See the latest departmental degree requirements for any changes and meet with an advisor to ensure these changes are met.
Additional Notes

The total number of credit hours at graduation may be greater for some students based on initial placement exams, transfer evaluations, individual curricular choices, and academic progress.

Certain courses may fulfill multiple requirements. In consultation with their academic advisor, students will be able to plan their curriculum more effectively.

Students must fulfill the necessary prerequisites for any given course or course sequence. See the Prerequisite and Co-requisite Policy (p. 99) in the university-wide Academic Policies section of this Bulletin.

Academic Advising Information

Janine C. Warnas
Director - Academic Advising
Academic Advising and Career Development
West Hall 109
267-468-8200
tuaadvis@temple.edu
ambler.temple.edu/academics/advising-and-support

The Office of Academic Advising and Career Development provides access for School of Environmental Design students to both professional and faculty advisors who assist students with their choice of programs and curricula, help students understand the university and its policies and procedures, and aid students in attaining their vocational and post-graduation goals.

Students must assume primary responsibility for knowing the requirements for their degree and for acquiring current information about their academic status. Academic advisors attempt to avoid errors when advising students about their program requirements, but schools and colleges cannot assume liability for errors in advising.

Newly-admitted freshmen and transfer students are advised for their first semester by professional advisors. After their first semester, students maintaining at least a 2.0 grade point average may independently register for classes online, but they are encouraged to also meet with an advisor. A graduation review is required in the second semester of the Junior year.

The services provided by this office include:

For New Students (Freshmen and Transfer)

• Freshmen: required online orientation and on-campus Academic Preview during the New Student Orientation Program.
• Transfers: required online orientation and small group on-campus orientation information sessions
• Academic counseling.
• Registration.

For Continuing Students

• Individual academic counseling.
• Academic progress reviews.
• Career development coaching and workshops.
• Curriculum advising.
• Final graduation clearance.
• Pre-professional advising.
• Transfers between colleges and campuses within the university (Change of Program/Campus), withdrawal, re-enrollment, and Leave of Absence interviews.
• Registration assistance.
• Veterans advising.

For Continuing Studies (Non-Degree) Students, including Visiting and High School Students

• Academic counseling.
• Registration.

For Students with Disabilities

• Accommodation arrangements.
For Prospective Students

- Academic counseling.
- Information sessions.

For All Students

- Referrals to other university programs and services.
- Information on academic grievance procedures.
  (Non-academic grievances should be directed to the Ambler Campus Office of Student Life.)

Faculty and Administration

Kate E. Benisek, Assistant Professor (Teaching/Instructional), Department of Landscape Architecture and Horticulture, School of Environmental Design; M.L.A., Cornell University.

William J. Cohen, Associate Professor (Practice), Department of Community and Regional Planning, School of Environmental Design; Ph.D., University of Pennsylvania.

Jeffrey Doshna, Instructor (Teaching/Instructional), Department of Community and Regional Planning, School of Environmental Design; Ph.D., Rutgers University.

Sasha Eisenman, Assistant Professor, Department of Landscape Architecture and Horticulture, School of Environmental Design; Ph.D., Rutgers University.

Jeffrey P. Featherstone, Professor (Research), Department of Community and Regional Planning, School of Environmental Design; Ph.D., Temple University.

Deborah Anne Howe, Professor, Department of Community and Regional Planning, School of Environmental Design; Ph.D., University of Michigan.

Pauline Hurley-Kurtz, Associate Professor, Department of Landscape Architecture and Horticulture, School of Environmental Design; M.L.A., University of Pennsylvania.

Robert T. Kuper, Associate Professor, Department of Landscape Architecture and Horticulture, School of Environmental Design; M.L.A., Auburn University.

Baldev S. Lamba, Associate Professor, Department of Landscape Architecture and Horticulture, School of Environmental Design; M.L.A., University of Pennsylvania.

Lynn A. Mandarano, Associate Professor, Department of Community and Regional Planning, School of Environmental Design; Ph.D., University of Pennsylvania.

Eva Monheim, Instructor (Teaching/Instructional), Department of Landscape Architecture and Horticulture, School of Environmental Design; M.A.E., Arcadia University.

Mary E. Myers, Associate Professor, Department of Landscape Architecture and Horticulture, School of Environmental Design; Ph.D., Heriot-Watt University, Edinburgh College of Art.

Michael Olszewski, Associate Professor, Department of Landscape Architecture and Horticulture, School of Environmental Design; Ph.D., University of Delaware.

Lolly Tai, Professor, Department of Landscape Architecture and Horticulture, School of Environmental Design; Ph.D., Heriot-Watt University, Edinburgh College of Art.

Community & Regional Planning

Effective January 1, 2016, the departments and programs within the School of Environmental Design moved to the Tyler School of Art.

Lynn A. Mandarano, Ph.D., P.E.
Acting Chair
West Hall 203
267-468-8300
crp@temple.edu
There is a need in this region and throughout the nation for professionals with the skills and knowledge to positively influence the growth and revitalization of communities. The Bachelor of Science in Community Development provides students with the skills to empower culturally, economically, or geographically disadvantaged communities to address inequalities and improve their long-term social, economic, and environmental sustainability. Students learn how to engage stakeholders; assess a community’s assets, needs and opportunities; plan what the community wants to achieve; and develop strategies, programs, and policies to improve the quality of life in urban, rural, and suburban communities. Learning extends beyond the classroom with hands-on experience through service learning, field research, informal gatherings, and workshops.

The Community Development program prepares students for a variety of employment opportunities including community outreach efforts; economic development; community development corporations; nonprofit organizations; private foundations; and consultants. This major also prepares students for graduate studies in planning and related fields. Community Development majors with a minimum grade point average of 3.50 will be eligible to participate in a “four plus one” program (http://www.temple.edu/ambler/crp/academicprograms/bs.htm#four) in which they may take up to four graduate courses that count toward both the bachelor’s degree in Community Development and the Master of Science in Community and Regional Planning.

The Department of Community and Regional Planning offers a four-year baccalaureate program (B.S.) in Community Development, undergraduate minors in Community Development and in Community and Regional Planning, a master’s program (M.S.) in Community and Regional Planning, and two graduate certificates. The Master of Science in Community and Regional Planning is accredited by the Planning Accreditation Board.

### Programs

- Bachelor of Science in Community Development (p. 667)
- Minor in Community Development (p. 672)
- Minor in Community and Regional Planning (p. 672)

## Bachelor of Science in Community Development

The degree of Bachelor of Science in Community Development may be conferred upon a student by recommendation of the faculty and upon the satisfactory completion of a minimum of 124 semester hours of credit with a minimum cumulative GPA of 2.0 overall and in the major. A grade of C- or higher is required in the required major courses as well as all General Education courses. At least half of the courses required for the major must be completed at Temple University.

### Summary of Requirements for the Degree

1. **University requirements**
   - MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
   - All Temple students must take a minimum of two writing-intensive courses as part of the major. CDEV 2596 and CDEV 3197 are the specific writing-intensive courses that are required for Community Development majors.
   - Students must complete requirements of the university General Education (GenEd (p. 143)) program (35-36 s.h.)

2. **Community Development (CDEV) major requirements (13 courses with minimum of 39 s.h.)**

$^1$ Writing-intensive course for the major.
Minor in Community Development

Students in the School of Environmental Design (except for Community Development majors) as well as students in other colleges, schools, and departments may choose to minor in Community Development. Community Development as a field embraces both citizen activists and professionals in planned efforts to identify, enhance and create social and physical assets that increase the capacity of residents to improve their quality of life. Through this minor students undertake formal studies about community development, thereby preparing themselves for contributions as informed citizens and civically engaged professionals. The minor provides students with stronger credentials to apply for graduate level work in planning and other related fields.

In this 18 credit minor, students will learn to understand and think critically about the social, political, economic, historic, and cultural dynamics shaping various types of communities. Courses provide important knowledge, values, and skills necessary for community development work. The three electives allow students to explore interests in different facets of community development.

A student may not double count any course for the Minor in Community Development toward any other major, minor, or certificate. At least half of the courses for the minor must be taken at Temple University. Students must complete successfully each of the following courses with a grade of C- or better and a cumulative average of 2.0 or higher for all courses in the minor:

Note: The symbol after the course title indicates that the class is offered ONLY in the semester indicated:

(F) = offered fall only
(S) = offered spring only
(SE) = offered spring of even numbered years
(SO) = offered spring of odd numbered years

Electives

Select three (3) courses numbered 2000-3999 from the list of approved electives for the major in Community Development.

Total Credit Hours 18

1 This course has a prerequisite(s).

Minor in Community and Regional Planning

Students in the School of Environmental Design (except for Community & Regional Planning majors) as well as students in other colleges, schools, and departments may choose to minor in Community and Regional Planning. Through this minor students undertake formal studies about public planning, thereby preparing themselves for contributions as informed citizens, civically engaged professionals, or ultimately as professional planners. The minor provides students with the background and with stronger credentials to apply for graduate level work in planning.

In this 18 credit minor, the required courses provide common background in the basics of planning, including history, theory, comprehensive planning and its components, ethics and principles of planning practice with particular emphasis on citizen participation, and exposure to a range of analytical methods for understanding community planning issues. The four electives allow students to explore interests in different facets of community planning: land use; housing; economic development; transportation; sustainability and environmental planning.

A student may not double count any course for the Minor in Community & Regional Planning toward any other major, minor, or certificate. At least half of the courses for the minor must be taken at Temple University. Students must complete successfully each of the following courses with a grade of C- or better and a cumulative average of 2.0 or higher for all courses in the minor:

Note: The symbol after the course title indicates that the class is offered ONLY in the semester indicated:

(F) = offered fall only
(S) = offered spring only

   - Note: One of the four electives may be a course from another subject approved by a School of Environmental Design advisor.

## Landscape Architecture & Horticulture

*Effective January 1, 2016, the departments and programs within the School of Environmental Design moved to the Tyler School of Art.*

Founded 1958.

Baldev S. Lamba, M.L.A.
Chair
Dixon Hall 201
267-468-8181
la.hort@temple.edu
www.temple.edu/ambler/la-hort/default.html

The Department of Landscape Architecture and Horticulture offers four-year baccalaureate degree programs in Landscape Architecture and Horticulture; a two-year Associate in Science degree in Horticulture, with a general or business emphasis; minors in Environmental Horticulture and Landscape Studies; and credit certificates in horticulture. In Fall 2010, a Master of Landscape Architecture degree was added. The undergraduate degree in Landscape Architecture and the first professional master’s degree in Landscape Architecture are accredited by the Landscape Architectural Accreditation Board.

With origins that trace back to the Pennsylvania School of Horticulture for Women, founded at Ambler in 1911, the department, throughout its history, has combined theory with practice. Committed to excellence in ecologically-based education, the department provides students with the knowledge and understanding of sustainable environments. Through an ecological approach to planning, design, development, and care of the land, the programs in Landscape Architecture and Horticulture promote the development of skills to improve the quality of urban, suburban, and rural communities. The unique curricula integrate horticulture and landscape architecture. A state-of-the-art greenhouse is available to students. Students and faculty also utilize the 187-acre Temple University Ambler campus as both an arboretum and living laboratory.

Careers in horticulture and landscape architecture are available in both the public and private sector.

For landscape architecture graduates, there are a variety of employment options including:

- Careers in the public sector in landscape architecture design and management positions. These might be affiliated with regional, county, or city planning commissions.
- Careers in private practice including the design of open space in relation to recreational, residential, commercial, institutional, and industrial projects, as well as the overall planning of new communities.
- Work on parks, recreation, trails, and open space planning and design.
- Work in environmental protection, historic preservation, landscape restoration, land reclamation, and green infrastructure.

Graduates with a degree in horticulture could be involved in the production, use, installation, and management of plants. They may:

- Work in public horticulture in arboreta, botanic gardens, parks, or golf courses.
- Teach in a high school, community college, or at the university level.
- Pursue an advanced degree and conduct research in plant propagation or stormwater management.
- Produce plants in greenhouses and nurseries for sale and landscape use.
- Design, install, and/or maintain residential, commercial, or public landscapes.
- Research new technologies and plants in private and public institutions.
- Work toward registration as a horticultural therapist.
- Write about plants and horticulture for articles, books, and copy on web sites.
- Work as an extension agent or specialist helping residential and commercial clients.
- Work in interior landscaping or floral design.
- Work as a sales representative for horticultural or allied industries.
• Own and operate their own business.

Financial Aid
In addition to assistance from the Department of Student Financial Services, there are several scholarships and grants-in-aid that are available only to Landscape Architecture and Horticulture students. Applications for department scholarships are available from the Department of Landscape Architecture and Horticulture office and online (http://ambler.temple.edu/admissions/costs-aid-and-scholarships/scholarships-ambler-campus). Also see Financial Aid (p. 137).

Continuing Studies
The Department offers a variety of credit courses and certificate programs in the late afternoon, in the evening, and on weekends. These courses and certificates are available to degree-seeking students as well as others interested in horticulture who are not seeking a degree. For many, these courses are a means of advancing their careers; for others, they are a source of personal enrichment. It is also possible, over a period of years, to complete all of the requirements for some credit certificate programs and for the associate’s and the bachelor's degrees in Horticulture by attending late afternoon, evening, and weekend classes. For more information, contact the Department of Landscape Architecture and Horticulture.

Policies and Regulations
The following departmental policy on Class Scheduling is in addition to the university policies and regulations that apply to all undergraduate students and to the policies that apply to all School of Environmental Design students.

Class Scheduling
The associate’s degree and the bachelor's degree in Horticulture and some of the credit certificate programs can be completed either through only daytime classes or through only late afternoon, evening, and Saturday classes. Students in the Bachelor of Science in Landscape Architecture program will be required to take classes during regular daytime hours, with some courses available in the evening and on weekends.

Programs
• Bachelor of Science in Horticulture (p. 674)
• Associate in Science in Horticulture (p. 677)
• Bachelor of Science in Landscape Architecture (p. 679)
• Minor in Environmental Horticulture (p. 681)
• Minor in Landscape Studies (p. 682)
• Certificate in Horticultural Therapy (p. 683)
• Certificate in Landscape Plants (p. 683)
• Certificate in Native Perennial Garden Design (p. 684)

Bachelor of Science in Horticulture
The degree of Bachelor of Science in Horticulture may be conferred upon a student by recommendation of the faculty and upon the satisfactory completion of a minimum of 124 semester hours of credit with a minimum cumulative GPA of 2.0 overall and in the major. No more than one grade below a C- is allowed in any course in either Landscape Architecture or Horticulture. Also, a grade of C- or higher is required in all required General Education courses.

Summary of Requirements for the Degree
1. University requirements
   • MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
   • All Temple students must take a minimum of two writing-intensive courses as part of the major. LARC 2496 and HORT 4896 are the specific writing-intensive courses required for Horticulture majors.
   • Students must complete the requirements of the university General Education (GenEd (p. 143)) program (29-30 s.h.)

2. Department of Landscape Architecture and Horticulture bachelor's degree requirements (28 s.h.)

Satisfactory completion of CHEM 1021, CHEM 1022, CHEM 1023, and CHEM 1024 will waive the two-course GenEd Science (GS) requirement.

Writing-intensive course for the major.

Writing-intensive capstone for the major.

**Associate in Science in Horticulture**

**General Horticulture Option**

This option in the Associate’s Degree is for students interested in developing a well-rounded background in all areas of horticulture or specializing in a particular area of interest such as floral design, integrated pest management, or arboriculture.

**Horticulture Business Option**

This option in the Associate’s Degree is for students interested in developing a background in landscape horticulture and in business.

The degree of Associate in Science in Horticulture may be conferred upon a student by recommendation of the faculty and upon the satisfactory completion of a minimum of 60 semester hours with a minimum cumulative GPA of 2.0 overall and in the major. No more than one grade below a C- is allowed in any course in either Landscape Architecture or Horticulture.

**General Horticulture Option**

**Total Credit Hours:** 124

---

1. Satisfactory completion of BOT 1111 and HORT 2114 will waive the two-course GenEd Science (GS) requirement.
2. Writing-intensive course for the major.
3. Students who satisfy an approved study abroad option may substitute an elective for the GenEd Global/World Society course.
4. Writing-intensive capstone for the major.
5. Students who attend a semester in Rome must take a Landscape Architecture, Horticulture or Botany elective at 1000-level or higher.

## Minor in Environmental Horticulture

Students in the School of Environmental Design as well as students in other colleges, schools, and departments may choose a Minor in Environmental Horticulture. Students complete courses related to horticultural concepts and practices which allow them to develop an understanding of the science and practice of protecting, restoring, and managing existing and natural landscape resources. This minor provides students with the opportunity to explore the option of graduate level studies in Landscape Architecture or Horticulture.

The curriculum involves 18 credits, with two required courses and at least four elective courses. The required courses give students a solid basis for understanding the fundamentals of horticulture, botany, and plant identification. The electives allow students to explore their own interests in different facets of horticulture including soils, plantscaping, and food crops.

A student may not double count any course for the Minor in Environmental Horticulture toward any other major, minor, or certificate. At least half of the courses for the minor must be taken at Temple University. Students must complete successfully each of the courses for the minor with a grade of C- or better and all of the minor courses with a cumulative average of 2.0 or higher.

**Note:** The symbol after the course title indicates that the class is offered ONLY in the semester indicated:

- (F) = offered fall only
- (FE) = offered fall of even numbered years
- (FO) = offered fall of odd numbered years
- (S) = offered spring only
- (SE) = offered spring of even numbered years
- (SO) = offered spring of odd numbered years
- (O) = offered occasionally

Minor in Landscape Studies

Students in the School of Environmental Design as well as students in other colleges, schools, and departments may choose a Minor in Landscape Studies. Through this minor, students complete courses that deepen their understanding of the relationship between the natural landscape and the human made environment, but without the professional focus of the bachelor’s degree in Landscape Architecture. The minor prepares students for lifelong contributions as informed, civically-engaged, and environmentally-conscious citizens. Also it allows students the opportunity to consider pursuing a graduate level degree in Landscape Architecture.

The curriculum for the Minor in Landscape Studies involves 18 credits, with two required courses and four elective courses. The required courses ensure that all students have a solid understanding of the fundamentals of Landscape Studies, including history, theory, and the relationship between the natural and built environments. The four electives allow students to explore their own interests in different facets of Landscape Studies.

A student may not double count any course for the Minor in Landscape Studies toward any other major, minor, or certificate. At least half of the courses for the minor must be taken at Temple University. Students must complete successfully each of the courses for the minor with a grade of C- or better and all of the minor courses with a cumulative average of 2.0 or higher.

Note: The symbol after the course title indicates that the class is offered ONLY in the semester indicated:

(F) = offered fall only
(S) = offered spring only
(O) = offered occasionally

### Certificate in Horticultural Therapy

This credit certificate is available to all undergraduate degree students to complete as part of their studies, regardless of their majors. This certificate is available also to non-degree-seeking students. Consult an academic advisor about how the required classes fit into academic and career plans.

Credit certificates may be conferred upon a student by recommendation of the faculty and upon satisfactory completion of the required credits for the specific topic area with a minimum cumulative GPA of 2.0 overall. At least one half of the courses required for the certificate must be completed at Temple University.

This credit certificate course sequence meets the horticultural therapy course content required by the American Horticultural Therapy Association (AHTA) for registration as a Horticultural Therapist. View the AHTA web site (www.ahta.org) for ADDITIONAL requirements for the Voluntary Professional Registration program as a Horticultural Therapist, such as supervised experience.

Note: The symbol after the course title indicates that the class is offered ONLY in the semester indicated:
- (F) = offered only in fall semester
- (S) = offered only in spring semester
- (FA) = offered only in fall of alternate years
- (SA) = offered only in spring of alternate years

**Total Credit Hours:** 14-15

Note: This course has a prerequisite(s).

### Certificate in Landscape Plants

This credit certificate provides a brief introduction to the areas of horticulture and an intensive learning experience in both woody and herbaceous landscape plants. Learning the names and usage of plants provides a deeper understanding for anyone interested in gardening and landscaping. For the professional, it provides the essential knowledge of plants needed to design high-quality landscapes for clients. For the hobbyist, it provides information that enriches the gardening experience.

This credit certificate is available to all undergraduate degree students to complete as part of their studies, regardless of their majors. This certificate is available also to non-degree-seeking students. Consult an academic advisor about how the required classes fit into academic and career plans.

Credit certificates may be conferred upon a student by recommendation of the faculty and upon satisfactory completion of the required credits for the specific topic area with a minimum cumulative GPA of 2.0 overall. At least one half of the courses required for the certificate must be completed at Temple University.

Note: The symbol after the course title indicates that the class is offered ONLY in the semester indicated:
- (F) = offered only in fall semester
- (S) = offered only in spring semester

Note: This course has a prerequisite(s).
Certificate in Native Perennial Garden Design

This credit certificate provides information that enriches the residential planting design experience. Certificate courses provide learning experiences with fundamentals of horticulture, herbaceous plants, and planting design. The skills necessary for a well designed and maintained residential perennial garden will be gained from learning plant identification, cultural conditions, and appropriate use of plants and planting design.

This credit certificate is available to all undergraduate degree students to complete as part of their studies, regardless of their majors. This certificate is available also to non-degree-seeking students. Consult an academic advisor about how the required classes fit into academic and career plans.

Credit certificates may be conferred upon a student by recommendation of the faculty and upon satisfactory completion of the required credits for the specific topic area with a minimum cumulative GPA of 2.0 overall. At least one half of the courses required for the certificate must be completed at Temple University.

Certificate in Environmental Sustainability

School of Environmental Design
Academic Advising and Career Development
West Hall 109
267-468-8200
tuaadvis@temple.edu

Students who are interested in the environment and in learning how to impact the world around them positively may want to consider completing the School of Environmental Design credit Certificate in Environmental Sustainability. This certificate provides students with the basic knowledge needed to evaluate environmental problems and to draw ecologically- and economically-sound connections between environmental needs, policy issues, and current research.

The certificate is available to all undergraduate degree students to complete as part of their studies, and is also available to non-degree students. Consult a School of Environmental Design academic advisor about how the required classes fit into academic and career plans. Most courses in this certificate program are offered during the daytime at the Ambler Campus; a few courses are available in the evening at the Ambler campus. In addition, some courses are also available at the Main Campus.

This credit certificate may be conferred upon a student by recommendation of the faculty and upon satisfactory completion of the required credits with a minimum cumulative GPA of 2.0. At least one half of the courses required for the certificate must be completed at Temple University.

Note: The symbol after the course number indicates that the class is offered ONLY in the semester indicated:

(F) = offered fall only
(FE) = offered fall of even numbered years
**(FO)** = offered fall of odd numbered years  
**(S)** = offered spring only  
**(SE)** = offered spring of even numbered years  
**(SO)** = offered spring of odd numbered years  
**(O)** = offered occasionally

1. This course has a prerequisite(s) or registration restriction(s).
2. Contact a School of Environmental Design advisor for information on course scheduling rotations.
3. Acceptable if the topic is appropriate and approved by a School of Environmental Design academic advisor.
4. Prerequisites are HORT 1211 and HORT 1212.

### Certificate in Sustainable Food Systems

School of Environmental Design  
Academic Advising and Career Development  
West Hall 109  
267-468-8200  
tuaadvis@temple.edu

The Certificate in Sustainable Food Systems is available to all undergraduate degree students to complete as part of their studies, and is also available to non-degree students. Through this certificate students investigate the complexities of food systems through an interdisciplinary approach that includes horticulture, planning, and public health. Students explore the relationship of farmland preservation, food production practices, and supply alternatives that improve local economies, reduce energy consumption, lower environmental impact, and ensure widespread access to affordable and healthy food.
This prepares students to contribute to the overall sustainability of the communities in which they live and work and strengthens students' preparation to work as professionals in environmentally-oriented fields or as citizen activists. Also the certificate provides students with an opportunity to explore the option of further studies in planning, horticulture, or related fields.

The curriculum for the Certificate in Sustainable Food Systems consists of 12 credits, with two required foundation courses and at least two elective courses. The required courses ensure that students have a strong foundation for the study of food systems including food crops, planning for food systems, and nutrition. The electives allow students to delve deeper into different facets of food systems planning. Most courses in this certificate program are offered during the daytime at the Ambler Campus; a few courses are available in the evening at the Ambler Campus. In addition, some courses are also available at the Main Campus.

This credit certificate may be conferred upon a student by recommendation of the faculty and upon satisfactory completion of the required credits with a minimum cumulative GPA of 2.0. At least one half of the courses required for the certificate must be completed at Temple University.

**Minor in Ecological Planning & Design**

Students in the School of Environmental Design as well as students in other colleges, schools, and departments may choose a Minor in Ecological Planning and Design. Through this minor students pursue courses which deepen their understanding of the concept of ecological planning and design. That is, they learn a process of decision making that ensures that development is compatible with natural resources and processes and that takes into consideration social, political, economic, and governance factors to achieve sustainable outcomes. This prepares students for lifelong contributions to the environmental sustainability of the communities in which they live and work. Also the minor provides undergraduates with an opportunity to explore the option of graduate studies in planning, landscape architecture, or horticulture.

The curriculum for the Minor in Ecological Planning and Design involves 18 credits, with two required foundation courses and at least four elective courses. The two foundation courses ensure that all students understand the fundamentals of natural and built systems and ecological planning. The electives allow students to explore their own interests in different facets of horticulture, landscape architecture, and planning while also gaining an appreciation of the science of ecology and the concept of ecologically-sensitive development.

A student may not double count any course for the Minor in Ecological Planning and Design toward any other major, minor, or certificate. At least half of the courses for the minor must be taken at Temple University. Students must complete successfully each course for the minor with a grade of C- or better and all of the minor courses with a cumulative average of 2.0 or higher.
Note: The symbol after the course title indicates that the class is offered ONLY in the semester indicated:

1 This course has a prerequisite(s).
College of Public Health

The College of Public Health was formerly the College of Health Professions and Social Work.

Laura A. Siminoff, Ph.D., Dean
1938 Liacouras Walk, Room 202
215-204-5200
http://cph.temple.edu

Since its inception in 1966, the College has prepared well-rounded practitioners who are sensitive to patient/client needs and whose professional competence is built on a solid foundation of theory, laboratory practice, and clinical fieldwork/internships. The college offers undergraduate programs that include Athletic Training, Health Information Management, Kinesiology, Linguistics, Nursing, Public Health, Speech, Language & Hearing Science, Therapeutic Recreation, and Social Work. Students graduating with a B.S. degree in Health Information Management, Kinesiology, Nursing, Public Health, or Therapeutic Recreation meet the entry-level requirements of their professions and are qualified to take state and/or national examinations leading to certification or licensure in their fields.

Vision Statement

The College of Public Health aspires to be a global leader in the discovery, dissemination, and integration of health and social welfare related research, practice, and teaching. Our diverse population of students and highly recognized faculty seek to enhance the quality of life for all.

Mission Statement

The College of Public Health prepares future generations of professionals through discovery, ethical practice, and lifelong learning.

Admissions

Those seeking undergraduate admission to the programs in the College of Public Health must apply through Temple's Undergraduate Admissions office at admissions.temple.edu. Prospective students who wish to obtain additional information about our programs are encouraged to visit the College's web site at http://cph.temple.edu or send an e-mail to the Office of Enrollment and Student Services at OESS1@temple.edu.

Please note that many undergraduate programs in the College of Public Health require students to complete clinical/field education experiences at facilities both on and off the University campus. Many of these placements will require criminal background checks, Act 33/34 clearances and perhaps a drug screen. The results of these requirements may limit and potentially eliminate placement options which can, in turn, result in an inability to meet graduation requirements. Additionally, conviction of a misdemeanor, felony, or felonious or illegal act may prevent you from becoming credentialed and/or licensed to practice in certain professions. Please review the requirements for the particular program in which you are interested.

Entering undergraduates, whether freshmen or transfers from other institutions, are admitted to these programs by submitting an application to Temple's Undergraduate Admissions office. Decisions are based on a review of the applicant's academic credentials. Current Temple students may also enter these programs by applying for a change of program within the university. Interested students should direct admission questions to the Office of Enrollment and Student Services by e-mail to OESS1@temple.edu or to the specific department of interest to them. Current Temple University students interested in transferring to one of these majors should review the relevant section below, which describes the required change of program sessions.

Admission to the Nursing Program

Temple's BSN program is a four-year program enabling students to begin fieldwork experience during their first year. The BSN program provides three entry options depending on students' background and education. There is a freshman option for highly qualified high school graduates. Space permitting, the BSN program accepts a limited number of transfer students from current Temple students or from external applicants enrolled in another college or university. Internal transfer admission decisions are highly competitive and made on a space-available basis. This transfer option requires students to begin the nursing program as first-year nursing students. Students admitted via this option will spend eight semesters in Temple's BSN program, entering the program in the fall semester. This option is recommended for Temple students with fewer than 30 college credits. More information about admission to Temple's BSN program is available at BSN Admissions (http://cph.temple.edu/nursing/academic-programs/bsnursing-program/admissions).

Admission to the Health Information Management Program

Prospective first-year students can declare the Pre-Health Information Management major within the College of Public Health. Students following this path should pay careful attention to the requirements and meet with their academic advisor.

During the fall of the sophomore year, students interested in admission to Health Information Management (HIM) must apply to the program. Students may apply prior to completing all of the prerequisites and General Education (GenEd (p. 143)) courses. However, prior to starting the Health Information Management major, a student must successfully complete all pre-professional college work, which includes the University GenEd curriculum and all
program prerequisites, at Temple University or another university or college. In order to be considered, applicants must achieve transferable grades in all prerequisites as well as a competitive grade point average (GPA). For more information, prospective students should visit HIM's Degrees Offered (http://cph.temple.edu/him/degrees-offered).

**Current Students Transferring to Athletic Training, Kinesiology, Linguistics, Public Health, Speech, Language & Hearing Science, Social Work, or Therapeutic Recreation**

Current Temple students interested in transferring into Athletic Training, Kinesiology, Linguistics, Public Health, Social Work, Speech, Language & Hearing Science, or Therapeutic Recreation must attend a change of program session. These are listed on the College of Public Health web site under Student Advising (http://cph.temple.edu/cph/about-current-students/academic-advising). Applications will not be processed until the student attends the required change of program session. A minimum GPA of 2.00 is required for admission to any of these programs. Students should review the curriculum and be aware of the quantitative and scientific skills required to successfully complete the courses. In some cases, students will be asked to meet with the advising director to discuss their change of program request.

**Current Temple University Students Applying to Health Information Management**

Temple students who want to learn more about the program can contact the Health Information Management advisor at 215-204-2037. Those ready to apply to the program should contact Karen McBride at 215-204-5803 or kmcbride@temple.edu.

Students must download an application from the HIM web site (http://cph.temple.edu/healthadminpolicy/programs-offered/undergraduate) and submit it to the address listed on the application. Applicants are notified of a final decision by letter from the College of Public Health. An acceptance letter will include the required departmental courses. Admitted students are required to submit a $100.00 tuition deposit to confirm their acceptance of admission.

**Student Contact Information**

Undergraduate students with general questions are asked to contact the College's Office of Enrollment and Student Services (OESS) at 215-204-5440 or OESS1@temple.edu.

For questions about academic requirements, students should contact the departmental academic advisor. A list of advisors is available at Student Advising (http://cph.temple.edu/cph/about-current-students/academic-advising).

Contact information for specific departments is available at the College of Public Health (http://cph.temple.edu) web site. Please select the academics tab at the top of the College page and follow the links for additional department and program information.

**Academic Policies & Regulations**

Students are responsible for complying with all university-wide academic policies that apply to their individual academic status (Please see the Undergraduate Academic Policies (p. 81)). Additional and unique policies, or exceptions for the College of Public Health, appear below.

**Attendance**

The College of Public Health desires to promote professional responsibility among its students. It is therefore the policy of the college to place the responsibility for class attendance upon the students. Students are accountable for all work missed due to absence. Instructors are generally not required to make special arrangements or examinations for students who are absent. There are certain courses that require a minimum number of hours of student participation in laboratory or clinical experiences, as established by the professional accrediting agency and/or the academic department concerned. At the beginning of each such course, the department shall make the attendance requirement clearly known to the enrolled students. Excessive absences may, at the option of the department, jeopardize the student's grade and/or continuance in the course.

**Dean's List**

Each fall and spring semester, those undergraduates who have met the credit hour and academic criteria for their school or college are named to the Dean's List. See the Dean's List (p. 92) policy for specific GPA and credit-hour requirements.

**Standards of Scholarship**

The grading system is in accordance with the system adopted by Temple University. For students enrolled in this College, a grade of C is the lowest acceptable final grade in major courses, as these are defined in the description of each major. Students not achieving a grade of C or better are required to repeat those courses in which they have failed to demonstrate acceptable performance. Please note that for students enrolled in the School of Social Work a grade of C- is the lowest acceptable final grade.

**Student Code of Ethics and Professional Conduct**

Since students of the College of Public Health are enrolled in professional programs, they are expected to abide by standards of professional conduct and behavior at all times.

The College of Public Health prepares practitioners to fulfill their ideals of service in health or social service settings. In attaining these goals, practitioners must demonstrate exemplary professional behavior, as this is the keystone of the professional associations of the disciplines within this
The Code of Conduct of Temple University's College of Public Health is intended to contribute to an environment in which excellence in learning and conduct may be fostered.

All terms of the Temple University Student Rights, the Student Conduct Code, and disciplinary procedures described in that code apply to students within the College of Public Health. In addition to the major violations noted by the University code, another action has been identified by the faculty of the College as constituting a major infraction of the code: "Unethical conduct or intentional neglect of duty on clinical practice."

Additionally, most College of Public Health programs prepare students for careers that involve close examination of a person's background before being employed or even engaged in clinical training and field education. Thus, students are strongly encouraged to begin gathering required documentation and clearances immediately after admission into their program so that they have sufficient time to assemble their portfolio well before it is required for field-based learning, including internships. Gathering required background information early also provides sufficient time to address any issues that might postpone or prevent fieldwork. Each program publishes more detailed information on health screenings and background clearances that are used for clinical training and field education.

**College Graduation Requirements**

Specific graduation requirements for undergraduate programs in the College of Public Health (CPH) are available on the individual program pages within this Bulletin as well as at CPH Academics (http://cph.temple.edu/academics).

**College Core Course**

A key requirement for entering undergraduates as of fall 2015 is the College Core Course, HRPR 1001 Public Health: The Way We Live, Work and Play. For all other students, the new course is strongly recommended, but it will not be required for everyone currently enrolled in the college. The new course will be integrated into existing programs and will not extend time to graduation or increase tuition costs. Students should consult individual program descriptions in this Bulletin to see how the course fits into their programs—replacing either an elective or an existing course requirement—and consult with their program advisors about whether they should or must take the course.

The course is designed to help students think about contemporary health issues from an interdisciplinary perspective. The course includes an introduction to the five core areas of public health—biostatistics, epidemiology, environmental health, health services administration, and social and behavioral sciences—and how these areas relate to various health, health care, and human service professions. Public health helps inform decisions that shape the behavior of individuals and communities. Students will analyze health issues such as health promotion, disease prevention, and health care policy from a variety of perspectives. As part of the course, students will work in small interdisciplinary teams to access and evaluate information about a particular individual or population-level health issue, and learn to argue persuasively, both orally and in writing, for interdisciplinary approaches to that health issue. An aim of the course is to engage students' curiosity about how the discipline of public health and interdisciplinary approaches apply to issues students may confront in their future professional work.

**Military Science Courses**

Undergraduate students in CPH whose degree programs allow for free electives may apply up to 12 credits of military science courses at the 3000 and 4000 levels in Aerospace Studies (Air Force ROTC), Military Science (Army ROTC), and Naval Science (Navy ROTC).

**Academic Advising**

The College of Public Health has an extensive system of academic advising provided by professional and faculty advisors. Professional advisors, coordinated by the Associate Director for Advisement, are available for each department, where they provide assistance with such topics as registration, course scheduling, and transfer credits, as well as referral to other resources. For a complete listing of our professional advising staff and more information on academic advising in the College of Public Health, visit Student Advising (http://cph.temple.edu/cph/about-current-students/academic-advising).
In most departments, when students reach junior or senior standing, they are assigned to faculty advisors who assist with mentoring as students progress in their professional training.

Academic advisors strive to avoid errors when advising students about program requirements; however, the College cannot assume liability for errors in advising. Students must, therefore, assume primary responsibility for knowing the requirements for their degree and for acquiring current information about their academic status.

**Faculty**

William Aaronson, Associate Professor, Department of Health Services Administration and Policy, College of Public Health; Ph.D., Temple University.

Ann B. Addis, Instructor (Clinical), Department of Communication Sciences and Disorders, College of Public Health; M.A., Northwestern University.

Robin Aronow, Instructor (Teaching/Instructional), Department of Communication Sciences and Disorders, College of Public Health; M.A., University of Delaware.

Sarah Bauerle Bass, Associate Professor, Department of Social and Behavioral Sciences, College of Public Health; Ph.D., Temple University.

Katherine W. Bauer, Assistant Professor, Department of Epidemiology and Biostatistics, College of Public Health; Ph.D., University of Minnesota.

Keesha Benson, Instructor (Teaching/Instructional), Department of Social Work, College of Public Health; Ph.D., University of North Carolina at Chapel Hill.

Kristin Berg, Assistant Professor, Department of Rehabilitation Sciences, College of Public Health; Ph.D., University of Chicago.

Algie Lakesa Bond, Assistant Professor (Teaching/Instructional), Department of Health Services Administration and Policy, College of Public Health; M.H.A., St. Joseph's University.

Casey M. Breslin Murphy, Assistant Professor (Teaching/Instructional), Department of Kinesiology, College of Public Health; Ph.D., Auburn University.

Kathryn Brzozowski, Assistant Professor (Teaching/Instructional), Department of Social Work, College of Public Health; D.S.W., University of Pennsylvania.

Heather J. Burket, Instructor (Teaching/Instructional), Department of Rehabilitation Sciences, College of Public Health; M.Ed., Temple University.

Scott Burns, Associate Professor (Clinical), Department of Physical Therapy, College of Public Health; D.P.T., University of Colorado Denver.

Lois A. Butcher, Assistant Professor (Teaching/Instructional), Department of Kinesiology, College of Public Health; Ph.D., Temple University.

William Cabin, Assistant Professor (Teaching/Instructional), Department of Social Work, College of Public Health; Ph.D., City University of New York-Hunter College.

Stephen J. Carp, Associate Professor (Teaching/Instructional), Department of Physical Therapy, College of Public Health; Ph.D., Temple University.

Cheri E. Carter, Assistant Professor (Teaching/Instructional), Department of Social Work, College of Public Health; Ph.D., University of Delaware.

Bradley N. Collins, Associate Professor, Department of Social and Behavioral Sciences, College of Public Health; Ph.D., State University of New York at Binghamton.

James Corbin, Instructor (Teaching/Instructional), Department of Social Work, College of Public Health; M.S.W., Temple University.

Ronald W. Costen, Professor (Teaching/Instructional), Department of Social Work, College of Public Health; Ph.D., University of Pittsburgh.

Catherine Coyle, Professor, Department of Rehabilitation Sciences, College of Public Health; Ph.D., Temple University.

Adam Davey, Professor, Department of Epidemiology and Biostatistics, College of Public Health; Ph.D., Pennsylvania State University.

Claudia J. Dewane, Associate Professor (Teaching/Instructional), Department of Social Work, College of Public Health; Ed.D., Pennsylvania State University.

Susan B. Dickey, Associate Professor, Department of Nursing, College of Public Health; Ph.D., University of Pennsylvania.

Elizabeth A. Dieckman, Assistant Professor (Teaching/Instructional), Department of Nursing, College of Public Health; D.N.P.

Patricia DiGiacomo, Assistant Professor (Teaching/Instructional), Department of Nursing, College of Public Health; M.S.N., Temple University.

Ann E. Dolloff, Instructor (Teaching/Instructional), Department of Rehabilitation Sciences, College of Public Health; M.Ed., Temple University.

Jeffrey N. Draine, Professor, Department of Social Work, College of Public Health; Ph.D., University of Pennsylvania.
Levent Dumenci, Professor, Department of Epidemiology and Biostatistics, College of Public Health; Ph.D., Iowa State University.

William E. Egan, Assistant Professor (Teaching/Instructional), Department of Physical Therapy, College of Public Health; D.P.T., Regis University.

Karin Eyrich-Garg, Associate Professor, Department of Social Work, College of Public Health; Ph.D., Washington University-St. Louis.

Jane Fagan, Assistant Professor (Teaching/Instructional), Department of Physical Therapy, College of Public Health; D.P.T., Simmons College.

Jay S. Fagan, Professor, Department of Social Work, College of Public Health; Ph.D., Columbia University.

Ruth Farber, Associate Professor Emerita, Department of Rehabilitation Sciences, College of Public Health; Ph.D., Temple University.

Jennifer Orlet Fisher, Professor, Department of Social and Behavioral Sciences, College of Public Health; Ph.D., Pennsylvania State University.

Cathy A. Flite, Assistant Professor (Teaching/Instructional), Department of Health Services Administration and Policy, College of Public Health; M.Ed., Widener University.

Margaret M. Foley, Associate Professor (Teaching/Instructional), Department of Health Services Administration and Policy, College of Public Health; Ph.D., Temple University.

Nikki V. Franke, Associate Professor, Department of Social and Behavioral Sciences, College of Public Health; Ed.D., Temple University.

Anne Frankel, Assistant Professor (Teaching/Instructional), Department of Social and Behavioral Sciences, College of Public Health; Ph.D., Florida International University.

Laurie A. Friedman, Instructor (Teaching/Instructional), Department of Social Work, College of Public Health; M.S.W., University of Pennsylvania.

Anne K. Galgon, Associate Professor (Teaching/Instructional), Department of Physical Therapy, College of Public Health; Ph.D., Drexel University.

Kimberly Gargin, Assistant Professor (Teaching/Instructional), Department of Rehabilitation Sciences, College of Public Health; O.T.D., Chatham University.

Jeffrey Gehris, Associate Professor (Teaching/Instructional), Department of Kinesiology, College of Public Health; Ph.D., Temple University.

Letitia G. Gembala, Assistant Professor (Teaching/Instructional), Department of Nursing, College of Public Health; M.S.N., Villanova University.

Thomas F. Gordon, Professor Emeritus, Department of Public Health, College of Public Health; Ph.D., Michigan State University.

Susan Gresko, Assistant Professor (Teaching/Instructional), Department of Nursing, College of Public Health; M.S.N., University of Pennsylvania.

Clara S. Haignere, Associate Professor, Department of Social and Behavioral Sciences, College of Public Health; Ph.D., University of Denver.

Christopher Harris, Instructor (Teaching/Instructional), Department of Social Work, College of Public Health; M.S.W., Widener University.

Kyle Harris, Instructor (Teaching/Instructional), Department of Kinesiology, College of Public Health; M.S., Temple University.

Chantelle Hart, Associate Professor, Department of Social and Behavioral Sciences, College of Public Health; Ph.D., Case Western Reserve University.

Elaine Hatala, Assistant Professor (Teaching/Instructional), Department of Rehabilitation Sciences, College of Public Health; Ph.D., Temple University.

Alice J. Hausman, Professor, Department of Health Services Administration and Policy, College of Public Health; Ph.D., State University of New York at Binghamton.

James Hoffmann, Assistant Professor (Teaching/Instructional), Department of Kinesiology, College of Public Health; Ph.D., East Tennessee State University.

Pei-Chun Hsieh, Assistant Professor (Teaching/Instructional), Department of Rehabilitation Sciences, College of Public Health; Ph.D., Indiana University, Bloomington.

Matthew Bryant Hudson, Assistant Professor, Department of Kinesiology, College of Public Health; Ph.D., University of Florida-Gainesville.

Cheryl A. Hyde, Associate Professor, Department of Social Work, College of Public Health; Ph.D., University of Michigan.

Jennifer K. Ibrahim, Associate Professor, Department of Health Services Administration and Policy, College of Public Health; Ph.D., University of California Berkeley.

Larry D. Icard, Professor, Department of Social Work, College of Public Health; Ph.D., Columbia University.

Roger I. Ideishi, Associate Professor (Teaching/Instructional), Department of Rehabilitation Sciences, College of Public Health; J.D., Temple University.
John Jeka, Professor, Department of Kinesiology, College of Public Health; Ph.D., Florida Atlantic University.

Monika Jelic, Assistant Professor (Teaching/Instructional), Department of Nursing, College of Public Health; M.P.H., Boston University.

Zebulon V. Kendrick, Professor, Department of Kinesiology, College of Public Health; Ph.D., Temple University.

Emily Keshner, Professor, Department of Physical Therapy, College of Public Health; Ed.D., Columbia University.

Moya Kinnealey, Associate Professor Emerita, Department of Rehabilitation Sciences, College of Public Health; Ph.D., Temple University.

Francine P. Kohon, Instructor (Teaching/Instructional), Department of Communication Sciences and Disorders, College of Public Health; M.S., Pennsylvania State University.

Rena A. Krakow, Associate Professor, Department of Communication Sciences and Disorders, College of Public Health; Ph.D., Yale University.

Ann Kriebel-Gasparro, Assistant Professor (Teaching/Instructional), Department of Nursing, College of Public Health; M.S.N., Hahnemann University.

Joseph A. Kumi, Instructor (Teaching/Instructional), Department of Social Work, College of Public Health; M.S.W., Florida State University.

Richard Lauer, Associate Professor, Department of Physical Therapy, College of Public Health; Ph.D., Case Western Reserve University.

Stephen J. Lepore, Professor, Department of Social and Behavioral Sciences, College of Public Health; Ph.D., University of California Irvine.

Beth A. Levine, Instructor (Teaching/Instructional), Department of Communication Sciences and Disorders, College of Public Health; M.S., Boston University.

Grace Xueqin Ma, Professor, Department of Social and Behavioral Sciences, College of Public Health; P.D., University of Oklahoma.

Edwin Maas, Assistant Professor, Department of Communication Sciences and Disorders, College of Public Health; Ph.D., San Diego State University.

Bridget B. Mancano, Instructor (Teaching/Instructional), Department of Communication Sciences and Disorders, College of Public Health; M.A., Temple University.

Jamie Mansell, Assistant Professor (Teaching/Instructional), Department of Kinesiology, College of Public Health; Ph.D., Temple University.

Cindy Joy Marsels, Assistant Professor (Teaching/Instructional), Department of Health Services Administration and Policy, College of Public Health; M.B.A., Temple University.

Nadine Martin, Professor, Department of Communication Sciences and Disorders, College of Public Health; Ph.D., Temple University.

Carlene A. McAleer, Assistant Professor (Teaching/Instructional), Department of Nursing, College of Public Health; M.S.N., Hahnemann University.

Karen McBride, Assistant Professor (Teaching/Instructional), Department of Health Services Administration and Policy, College of Public Health; M.S., Philadelphia University.

Brian D. McHugh, Associate Professor, Department of Communication Sciences and Disorders, College of Public Health; Ph.D., University of California Los Angeles.

Michael McIntosh, Assistant Professor (Teaching/Instructional), Department of Nursing, College of Public Health; Ph.D., Temple University.

Rochelle Mendonca, Assistant Professor (Teaching/Instructional), Department of Rehabilitation Sciences, College of Public Health; Ph.D., University of Wisconsin-Milwaukee.

Lois Millner, Associate Professor, Department of Social Work, College of Public Health; Ph.D., Bryn Mawr College.

Deborah L. Mills, Instructor (Teaching/Instructional), Department of Social Work, College of Public Health; M.S.W., Temple University.

C. Daniel Moser, Assistant Professor (Teaching/Instructional), Department of Kinesiology, College of Public Health; Ph.D., Temple University.

Sheila L. Moyle, Instructor (Teaching/Instructional), Department of Rehabilitation Sciences, College of Public Health; M.S., University of the Sciences.

Heather Murphy, Assistant Professor, Department of Epidemiology and Biostatistics, College of Public Health; Ph.D., University of Guelph.

Maria F. Murt, Instructor (Teaching/Instructional), Department of Nursing, College of Public Health; M.S.N., Widener University.

Miguel Muñoz-Laboy, Associate Professor, Department of Social Work, College of Public Health; Dr.P.H., Columbia University.

Deborah B. Nelson, Associate Professor, Department of Epidemiology and Biostatistics, College of Public Health; Ph.D., University of Pittsburgh.
Rhonda Nelson, Associate Professor (Teaching/Instructional), Department of Rehabilitation Sciences, College of Public Health; Ph.D., Temple University.

Bernie Sue Newman, Associate Professor, Department of Social Work, College of Public Health; Ph.D., University of Pittsburgh.

Duy Nguyen, Associate Professor, Department of Social Work, College of Public Health; Ph.D., Columbia University.

Emeka Nwadiora, Associate Professor, Department of Social Work, College of Public Health; J.D., Hofstra University School of Law.

Cheryl B. Oakman, Assistant Professor (Teaching/Instructional), Department of Social Work, College of Public Health; Ph.D., Bryn Mawr College.

Heidi Ojha, Assistant Professor (Clinical), Department of Physical Therapy, College of Public Health; D.P.T., University of Southern California.

Joon Young Park, Associate Professor, Department of Kinesiology, College of Public Health; Ph.D., University of Maryland College Park.

Alan Pfeffer, Associate Professor (Teaching/Instructional), Department of Social Work, College of Public Health; M.S.W., Temple University.

Elizabeth A. Pfeiffer, Associate Professor (Teaching/Instructional), Department of Rehabilitation Sciences, College of Public Health; Ph.D., Nova Southeastern University.

Lok R. Pokhrel, Assistant Professor (Teaching/Instructional), Department of Epidemiology and Biostatistics, College of Public Health; Ph.D., East Tennessee State University.

Heather Porter, Associate Professor (Teaching/Instructional), Department of Rehabilitation Sciences, College of Public Health; Ph.D., Temple University.

John T. Raflin, Assistant Professor (Teaching/Instructional), Department of Kinesiology, College of Public Health; Ph.D., Temple University.

Meghan Rainone, Instructor (Teaching/Instructional), Department of Communication Sciences and Disorders, College of Public Health; J.D., Temple University.

Jodi Reich, Assistant Professor (Teaching/Instructional), Department of Communication Sciences and Disorders, College of Public Health; Ph.D., Yale University.

James J. Reilly, Associate Professor, Department of Communication Sciences and Disorders, College of Public Health; Ph.D., University of Pennsylvania.

Christen J. Rexing, Assistant Professor (Teaching/Instructional), Department of Health Services Administration and Policy, College of Public Health; Ph.D., Temple University.

Anne Richard, Instructor (Teaching/Instructional), Department of Rehabilitation Sciences, College of Public Health; M.S., Pennsylvania State University.

Jin-Sook Roh, Assistant Professor (Teaching/Instructional), Department of Kinesiology, College of Public Health; Ph.D., Massachusetts Institute of Technology.

Thomas P. Rooney, Assistant Professor (Teaching/Instructional), Department of Kinesiology, College of Public Health; Ph.D., Temple University.

Jo-Ellen Ross, Assistant Professor (Teaching/Instructional), Department of Rehabilitation Sciences, College of Public Health; Ph.D., University of Illinois at Urbana-Champaign.

Nancy L. Rothman, Professor, Department of Nursing, College of Public Health; Ed.D., Temple University.

Anne C. Russ, Assistant Professor (Teaching/Instructional), Department of Kinesiology, College of Public Health; Ph.D., Temple University.

Scott E. Rutledge, Associate Professor, Department of Social Work, College of Public Health; Ph.D., University of Washington.

Kim Sabourin, Instructor (Clinical), Department of Communication Sciences and Disorders, College of Public Health; M.A., University of Maryland.

Michael L. Sachs, Professor, Department of Kinesiology, College of Public Health; Ph.D., Florida State University.

Mark Salzer, Professor, Department of Rehabilitation Sciences, College of Public Health; Ph.D., University of Illinois at Urbana-Champaign.

Susan E. Santalucia, Assistant Professor (Teaching/Instructional), Department of Rehabilitation Sciences, College of Public Health; M.S., Temple University.

Mayra C. Santiago, Associate Professor, Department of Kinesiology, College of Public Health; Ph.D., University of Minnesota.

David B. Sarwer, Professor, Department of Social and Behavioral Sciences, College of Public Health; Ph.D., Loyola University Chicago.
Michelle C. Scarpulla, Instructor (Teaching/Instructional), Department of Social and Behavioral Sciences, College of Public Health; M.P.H., Temple University.

Mark F. Schmitz, Associate Professor (Teaching/Instructional), Department of Social Work, College of Public Health; Ph.D., Iowa State University.

Rosalie Schofield, Associate Professor (Teaching/Instructional), Department of Social Work, College of Public Health; Ph.D., Brandeis University.

Jay S. Segal, Professor, Department of Social and Behavioral Sciences, College of Public Health; Ph.D., Ohio State University.

Anjali B. Shah, Assistant Professor (Teaching/Instructional), Department of Health Services Administration and Policy, College of Public Health; Ph.D., Rutgers University.

Laura Siminoff, Professor, Department of Social and Behavioral Sciences, College of Public Health; Ph.D., Johns Hopkins University.

Jonathan Singer, Assistant Professor, Department of Social Work, College of Public Health; Ph.D., University of Pittsburgh.

Mary C. Sinnott, Associate Professor (Teaching/Instructional), Department of Physical Therapy, College of Public Health; D.P.T., MGH Institute of Health Professions.

Michael R. Sitter, Professor, Department of Kinesiology, College of Public Health; Ed.D., New York University.

Gretchen A. Snethen, Assistant Professor, Department of Rehabilitation Sciences, College of Public Health; Ph.D., Indiana University.

Doris Fallon Snyder, Assistant Professor (Teaching/Instructional), Department of Communication Sciences and Disorders, College of Public Health; M.A., Temple University.

Mary Stec, Assistant Professor (Teaching/Instructional), Department of Nursing, College of Public Health; Ph.D., Widener University.

Gerry A. Stefanatos, Associate Professor, Department of Communication Sciences and Disorders, College of Public Health; D.Phil., Oxford University.

Barbara A. Stephens, Assistant Professor (Clinical), Department of Nursing, College of Public Health; M.S.N., Temple University.

Ricky L. Swalm, Associate Professor, Department of Kinesiology, College of Public Health; Ph.D., Temple University.

Elizabeth Diane Thompson, Assistant Professor (Teaching/Instructional), Department of Physical Therapy, College of Public Health; D.P.T., Temple University.

Ryan T. Tierney, Associate Professor (Teaching/Instructional), Department of Kinesiology, College of Public Health; Ph.D., Temple University.

Heather M. Traino, Associate Professor, Department of Social and Behavioral Sciences, College of Public Health; Ph.D., State University of New York-Buffalo.

Carole Tucker, Associate Professor, Department of Physical Therapy, College of Public Health; Ph.D., State University of New York at Buffalo.

Sylvia Twersky-Bumgardner, Instructor (Teaching/Instructional), Department of Health Services Administration and Policy, College of Public Health; M.P.H., Tulane University.

Gena B. Vargas, Assistant Professor (Teaching/Instructional), Department of Rehabilitation Sciences, College of Public Health; Ph.D., Clemson University.

Sheldon O. Watts, Assistant Professor (Teaching/Instructional), Department of Social and Behavioral Sciences, College of Public Health; Ph.D., New York University.

Mark H. Weir, Assistant Professor, Department of Epidemiology and Biostatistics, College of Public Health; Ph.D., Drexel University.

Donna Weiss, Associate Professor Emerita, Department of Rehabilitation Sciences, College of Public Health; Ph.D., Temple University.

Robert C. Whitaker, Professor, Department of Epidemiology and Biostatistics, College of Public Health; M.D., Johns Hopkins University School of Medicine.

Andre Williams, Assistant Professor (Teaching/Instructional), Department of Epidemiology and Biostatistics, College of Public Health; Ph.D., Virginia Commonwealth University.

Caitlin N. Wolak, Instructor (Teaching/Instructional), Department of Social and Behavioral Sciences, College of Public Health; M.P.H., Temple University.

W. Geoffrey Wright, Associate Professor, Department of Physical Therapy, College of Public Health; Ph.D., Brandeis University.

Andrew Yannaccone, Assistant Professor (Teaching/Instructional), Department of Physical Therapy, College of Public Health; Ph.D., Virginia Commonwealth University School of Medicine.
Cindy Yascavage, Instructor (Teaching/Instructional), Department of Nursing, College of Public Health; Ph.D., Capella University.

Marsha Zibalese Crawford, Associate Professor, Department of Social Work, College of Public Health; D.S.W., Howard University.

Lisa S. Zoll, Instructor (Teaching/Instructional), Department of Social Work, College of Public Health; M.S.W., Temple University.

Dolores M. Zygmont, Associate Professor (Clinical), Department of Nursing, College of Public Health; Ph.D., Temple University.

Communication Sciences & Disorders

The Department of Communication Sciences and Disorders offers two majors: one in Speech, Language & Hearing Science and one in Linguistics. In addition to the majors in Speech, Language & Hearing Science and Linguistics, the department also offers a minor. Enrollment of students pursuing minors in departmental courses is subject to availability.

1. The total number of credit hours required for graduation may be greater for some students, depending on initial placement exams, transfer evaluations, individual curricular choices, and academic progress.
2. Certain courses fulfill multiple requirements. In consultation with an academic advisor, students will be able to plan their curriculum more effectively.
3. Students must fulfill the necessary prerequisites for any given course or course sequence. See the Prerequisite and Co-requisite Policy (p. 99) in the Academic Policies section of this Bulletin.

Bachelor of Arts degrees in the Department of Communication Sciences and Disorders (CSCD) may be conferred upon a student by recommendation of the faculty upon the satisfactory completion of 122 semester hours of credit. A grade of C is the lowest acceptable final grade for courses required by the majors. A grade of C- (C Minus) is the lowest acceptable grade in GenEd courses. The Department of Communication Sciences and Disorders requires that students show a basic level of proficiency in a language other than English. This requirement may be met by taking college-level courses up to or beyond the equivalent of the 1002-level or by showing similar knowledge through a placement examination. Students may take American Sign Language to satisfy this requirement.

Students in the department must elect one of the two majors:

• Speech, Language & Hearing Science
• Linguistics

Distinction in the Major

Students who complete either major may graduate with distinction in the department if they meet the requirements outlined below:

1. GPA of 3.50 or better in the major and overall
2. No grade below B in the major
3. Completion of an honors paper at the end of a 3-credit independent study (CSCD 4979) during which the student will engage in an empirical study or library research in the field of Communication Sciences and Disorders under the supervision of a faculty advisor.
4. Completion of 20 hours of volunteer work, internship, or fieldwork in consultation with the advisor.

Programs

• American Sign Language Certificate (p. 697)
• Bachelor of Arts in Linguistics (p. 698)
• Bachelor of Arts in Speech, Language & Hearing Science (p. 700)
• Communication Sciences & Disorders Minor (p. 703)

American Sign Language Certificate

The Certificate in American Sign Language (ASL) will be awarded to students who successfully complete the ASL Levels 1 through 4, demonstrating competence in expressive and receptive language skills as well as knowledge of Deaf Culture. ASL, the language of the Deaf in the US and Canada,
is as rich and complex as any spoken language, but differs in modality of production and perception. Knowledge of ASL gained in the four courses will also teach students about the human capacity for language, even when access to the more common channel of language reception (hearing) is compromised. In addition to the value of learning ASL as described, competence in ASL will benefit those who may encounter deaf individuals in the future, including those in health professions, education, and legal fields. The certificate will also function as a foundation for those who wish to go on to programs in ASL-English interpreting, education of the Deaf and hearing-impaired, and other related fields.

The Director of our American Sign Language Certificate is Professor Meghan Rainone, tuf28275@temple.edu.

The Certificate in American Sign Language (ASL) will be awarded to students who complete the following 4-course sequence:

Total Credit Hours: 12

Bachelor of Arts in Linguistics

The Bachelor of Arts in Linguistics may be conferred upon a student by recommendation of the faculty upon the satisfactory completion of 122 semester hours of credit.

Gain a solid foundation for graduate study in a variety of important areas

Build on your passion for language with a BA in Linguistics, the scientific study of language structure. This major prepares students for graduate study in linguistics, psycholinguistics, neurolinguistics, teaching of English as a second language, special education, general education, reading, law, and other disciplines.

Coursework topics include:

- Phonological and phonetic structure of language
- Syntactic and morphologic structure of language
- Language development and language variation

The undergraduate program includes a one-semester fieldwork course during which students design individual projects concerning the structure or use of language.

Students majoring in Linguistics are encouraged to pursue a complementary second major or a minor. A foreign language is a common choice for a complementary program.

The Department of Communication Sciences and Disorders anticipates approval of a certificate in American Sign Language (ASL) in the near future. Students interested in ASL would be able to earn the certificate by taking CSCD 1001, CSCD 1002, CSCD 1003, and CSCD 1004.

Summary of Requirements

University Requirements

All Temple students must take a minimum of two writing-intensive courses as part of the major. The specific writing-intensive courses that are required for the Linguistics major are CSCD 3297 and CSCD 4397.

Students must complete the requirements of the General Education (GenEd (p. 143)) program.

College Requirement

Students must complete the College Core Course, HRPR 1001 Public Health: The Way We Live, Work and Play.

Major Requirements

All of the following major requirements must be passed with a grade of C or better in order to successfully complete the major.

Communication & Science Disorders

<table>

**Foreign Language**

2 semesters of a foreign language (including American Sign Language) beyond those numbered “1002.” Foreign language courses fulfill free elective credits.

**Total Credit Hours**  39

1. Indicates writing capstone for major
2. Other courses may be taken as electives with approval of advisor.

**Recommended Electives**

A variety of excellent electives is available through the Departments of Philosophy and Psychology (College of Liberal Arts), and the TESOL (Teaching English to Speakers of Other Languages) program (College of Education). Students should consult their advisors for specific course recommendations.

**Suggested Academic Plan**

**Bachelor of Arts in Linguistics**

**Requirements for New Students starting in the 2015-2016 Academic Year**

**Year 1**

¹ CSCD 4730 is a recommended elective.

### Bachelor of Arts in Speech, Language & Hearing Science

The Bachelor of Arts in Speech, Language & Hearing Science may be conferred upon a student by recommendation of the faculty upon the satisfactory completion of 122 semester hours of credit.

**A Foundation to Build From**
The Bachelor of Arts in Speech, Language & Hearing Science (SLH) prepares students for graduate programs in speech-language pathology or in education, social work, or various other health professions. An SLH graduate degree can lead to certification and licensure as a speech-language pathologist or audiologist.

**Coursework topics include:**

- Anatomy and physiology of the speech and hearing mechanism
- Neuro-anatomy and -physiology
- Psychology of language and language development
- Psychological factors
- The basis of speech
- Acoustics and perception of speech
- Introduction to clinical populations and practice

Graduates with a major in Speech, Language & Hearing Science will satisfy Standard III-B (Basic Communication Processes) of the Knowledge and Skills Assessment required by the American Speech-Language-Hearing Association.

The Department of Communication Sciences and Disorders anticipates approval of a certificate in American Sign Language (ASL) in the near future. Students interested in ASL would be able to earn the certificate by taking CSCD 1001, CSCD 1002, CSCD 1003, and CSCD 1004.

**Summary of Requirements**

**University Requirements**

All Temple students must take a minimum of two writing-intensive (WI) courses as part of the major. The specific writing-intensive courses that are required for the Speech-Language-Hearing major are CSCD 2197 and CSCD 4396.

Students must complete the requirements of the General Education (GenEd (p. 143)) program.

**College Requirements**

Students must complete the College Core Course, HRPR 1001 Public Health: The Way We Live, Work and Play.

**Major Requirements**

All of the following major requirements must be passed with a grade of C or better in order to successfully complete the major.

**Communication Sciences & Disorders**

<table>

**Health Information Management**

Cathy A. Flite, M.Ed., RHIA, Interim Chair
Ritter Annex 531
215-204-5801
hlthinfo@temple.edu
http://cph.temple.edu/him
Health Information Management (HIM) is focused on the development, implementation, management, and maintenance of patient health information systems in accordance with legal, regulatory, and accrediting agencies’ requirements for health care data collection and dissemination. HIM professionals have a special role in making sure that patient information remains confidential and maintained in a manner that ensures the patient’s privacy and that health care information is secure. A career in HIM combines interests in medicine, management, information technology, electronic health record systems, and finance. HIM professionals design and manage health information systems, with special attention to quality and privacy of health information, in a wide range of settings such as hospitals, managed and ambulatory care, insurance and pharmaceutical companies, consulting firms, and public health organizations.

The Bachelor of Science in Health Information Management (BSHIM) includes classes covering six main areas:

- Core HIM: Health Record Documentation, Legal Aspects of HIM, Internships, Healthcare Delivery Systems, and Professional Development
- Data Analytics: HIM IT Fundamentals, Electronic Health Record Systems, Informatics, and Database Development and Design
- Classification and Reimbursement: ICD-10, CPT4, Intermediate Coding, and Reimbursement
- Clinical Medicine: Pathophysiology, Medical Terminology, Clinical Procedures, and Pharmacology
- Internships: Professional Practice Internship (one full day per week for five weeks at a facility in the Delaware Valley) and Management Internship (four weeks at a facility outside of the area where you will be participating in solving a management project at that organization). Examples of internship sites include the University of Pennsylvania Health System, Thomas Jefferson University Hospital, NYU Medical Center, and Johns Hopkins Hospital.

Certification

Students enrolled in the HIM program and in the last term of study are eligible to apply for and sit for the examination of the American Health Information Management Association for the nationally recognized certification as a Registered Health Information Administrator (RHIA).

Following satisfactory completion of all course requirements, the graduate is awarded the degree of Bachelor of Science in Health Information Management.

Accreditation

The baccalaureate program in Health Information Management at Temple University is accredited by the Commission on Accreditation for Health Informatics and Information Management Education (CAHIIM).

Summary of Requirements

This is an upper-level program. Students are admitted in the fall of the junior year and must have 55 credits completed by the fall semester of admission to the program. Transfer students must have their transfer credits evaluated by the Admissions Office and must meet general and prerequisite requirements of the program.

University Requirements

All students are required to complete the university’s General Education (GenEd (p. 143)) curriculum (Analytical Reading & Writing, Mosaic I and II, Arts, Human Behavior, Global/World Society, U.S. Society, Race & Diversity, Science & Technology, Quantitative Literacy).

All Temple students must take a minimum of two writing-intensive courses at Temple as part of the major. The writing-intensive courses for this major are HIM 3297 and HIM 4298.

College Requirement

All CPH students must complete the College Core Course, HRPR 1001 Public Health: The Way We Live, Work and Play.

Clearance Requirements

Please note the Health Information Management program requires students to complete internships at facilities both on and off the University campus. These placements may require criminal background checks, Act 33/34 clearances and perhaps a drug screen. The results of these requirements may limit and potentially eliminate placement options which can, in turn, result in an inability to meet graduation requirements.

Program Requirements

Students in the HIM program are required to satisfy the following prerequisite (before program admission) and professional courses (after program admission). A grade of C or better is required for all prerequisite and professional courses (a grade of C- is not acceptable).

Health Information Management Prerequisites:

MATH 1013 Elements of Statistics
or SOC 1167 Social Statistics

**Total Credit Hours: 61**

1. You should consult with your advisor for information on the distinctions between Anatomy and Physiology selection sequence and its implication for your degree and career goals. Satisfactory completion of the KINS 1221 and KINS 1222 sequence or the KINS 1223 and KINS 1224 sequence will meet the two-course GenEd Science and Technology requirement. Courses are similar, but not interchangeable and must be taken in the correct sequence. Students choosing the KINS 1221 and KINS 1222 sequence may need to take an additional 2-credit elective to meet credit hours degree graduation requirement. Please see a departmental academic advisor for clarification.

2. The professional courses follow a strict semester-by-semester sequence that requires careful attention to registration dates. See a departmental academic advisor for help planning your professional course registration.

### Electives

6 credits. Strongly recommended electives include business writing electives.

### Suggested Academic Plan

**Bachelor of Science in Health Information Management**

**Requirements for New Students starting in the 2015-2016 Academic Year**

#### Year 1

**Fall**

A grade of C or better is required to satisfy ALL prerequisite and professional course requirements. Grades below a C will not be accepted.

**Note:** All professional courses are offered only once a year.

1. MATH 0823 or MATH 0824 is strongly recommended.
2. You should consult your advisor for information on the distinctions between the anatomy and physiology selection sequence and its implication for your degree and career goals. Satisfactory completion of the KINS 1221 and KINS 1222 sequence or the KINS 1223 and KINS 1224 sequence will meet the two-course GenEd Science & Technology requirement. These courses are similar but not interchangeable. Courses must be taken in the correct sequence. Students choosing KINS 1221 and KINS 1222 may need to take an additional 2 credit elective to meet credit hour degree requirements as well as annual progress requirements. Please see your advisor for clarification.
3. Indicates writing capstone for major.

jjeka@temple.edu
http://cph.temple.edu/kinesiology

The undergraduate programs in Kinesiology leading to the Bachelor of Science degree or the Bachelor of Science in Athletic Training degree require students to complete coursework in three broad areas: the General Education (GenEd (p. 143)) Curriculum, the Kinesiology Core, and a professional application of the discipline of Kinesiology. Moreover, all students in the Kinesiology program must complete the College Core Course, HRPR 1001 Public Health: The Way We Live, Work and Play.

The university General Education Curriculum is divided into nine categories:

1. Analytical Reading & Writing
2. Mosaic I & II
3. Arts
4. Human Behavior
5. Global/World Society
6. U.S. Society
7. Race & Diversity
8. Science & Technology $^1$
9. Quantitative Literacy

$^1$ The Kinesiology Department requires KINS 1223 Human Anatomy and Physiology I and KINS 1224 Human Anatomy and Physiology II to fulfill the Science & Technology requirement.

All University GenEd courses must be completed with a minimum C- grade in order to count toward graduation.
Kinesiology is the study of physical activity. The Kinesiology Core includes a group of foundation courses that deal with the intellectual, physical, social, psychological, and philosophical factors which influence and are influenced by human beings as they move.

**Foundation Courses**

In addition to taking the foundation courses, students are required to satisfy the forms of movement requirement, which consists of developing knowledge and skills in a broad spectrum of movement activities (i.e., aquatics, fitness, survival, and lifestyle). All Kinesiology Core courses must be completed with a minimum grade of C in order to count toward graduation.

The Kinesiology Department offers four professional application options to allow students to concentrate their studies:

- Athletic Training
- Kinesiology's Exercise and Sport Science concentration
- Kinesiology's Physical and Health Education Teacher Education (PHETE) concentration
- Kinesiology's Pre-Health Professions concentration

Students select the professional application option that satisfies their short term educational and professional objectives. All required professional application courses must be completed with a minimum grade of C in order to count toward graduation (PHETE requires a minimum grade of B-).

The **Athletic Training Education Major** prepares students to work with physically active populations (e.g., athletic teams, dance, circus, NASCAR, Disney, rodeo, and PT clinics). The certified athletic trainer functions as an integral member of the athletic healthcare team in secondary schools, colleges, universities, professional teams, and sports medicine clinics, providing leadership in the prevention, evaluation, immediate care, and rehabilitation of sport-related injuries. The Athletic Training major requires fulfillment of both academic coursework and clinical fieldwork experiences. This program of study is approved by the Commission on the Accreditation of Athletic Training Education (CAATE) and is designed to prepare students for certification as athletic trainers by the Board of Certification (BOC) and for Class "A" certification in the Commonwealth of Pennsylvania.

The **Athletic Training Education Major at the undergraduate level is being phased out**, and those seeking certification in Athletic Training should consult a departmental advisor and review Temple's graduate programs in Athletic Training. No further students will be admitted to this program after fall 2015, although those already in the program will be allowed to graduate in the program as long as they continue study without interruption.

The **Exercise and Sport Science Concentration** provides students with knowledge and competencies required for professional service in a variety of sport, fitness, wellness, and rehabilitation settings. The exercise and sport science concentration also prepares students for graduate study in exercise physiology or in a variety of related health professions. Program competencies include health screening, fitness assessment, exercise program development, health-fitness counseling, and therapeutic exercise supervision of patients with special needs. Concentration courses include but are not limited to advanced exercise physiology, exercise in health and disease, exercise testing and programming, electrocardiography, exercise and aging, and applied technologies. The exercise and sport scientist understands the complexity of the human body and the interaction among physical activity, exercise, and good health. The improved function, health, and well-being of the total person - **Body, Mind, and Spirit** - are the ultimate goals of professionals in this field.

Exercise scientists apply their knowledge, skills, and beliefs to all people regardless of gender, age, social status, and current health-related fitness level or disease state. Wherever there is a need to improve functionality, health-fitness, medical prognosis, optimal aging, or wellness, one will find an exercise scientist providing leadership in programs that help individuals optimize their lives and health. In summary, exercise science is a stimulating area of study and a rewarding professional application with a very bright future.

Teacher education is the focus of the **Physical and Health Education Teacher Education (PHETE) Concentration**. This concentration prepares students to teach physical and health education in public and private schools (grades K through 12). The PHETE concentration integrates academic preparation with fieldwork experiences each semester, culminating in a dual-level (secondary and elementary) full semester, student-teaching experience. Coursework in discipline specific content, methods of teaching, assessment and evaluation, educational psychology, educational foundations, cultural diversity and adapted activities, and administration all help teacher education students assume their roles as competent teachers in today’s society. Admission into the PHETE program takes place after the sophomore year upon completing the pre-admission coursework; two in-school teaching experiences; the PECT PAPA tests in reading, mathematics, and writing; the Praxis II test in fundamental content knowledge, as well as an interview with the PHETE faculty. All PHETE, Health-Related Professions, and required Education courses must be completed with a minimum grade of B- in order to count toward admission and graduation. All PHETE and Health-Related Professions courses required in the concentration are valid toward
certification for a maximum of five (5) years. If one does not get certified within this time period, those courses that have expired must be retaken. A cumulative GPA of 3.00 or greater is required for admission into the junior year and certification. After admission, one additional Praxis II test is required for certification: Health and Physical Education Content Knowledge. Upon completion of the PHETE concentration, passing the appropriate standardized tests, and applying to the Pennsylvania Department of Education for an Instructional I Certificate in Health and Physical Education, graduates will be licensed to teach K-12 Health and Physical Education by the Commonwealth of Pennsylvania.

The Pre-Health Professions Concentration prepares students for admission into graduate programs in a multitude of the health professions such as physical therapy, occupational therapy, medicine, dentistry, physician assistant practice, and optometry. The Department of Kinesiology’s Core is a perfect complement to the standard prerequisite courses and expanded elective courses available through this concentration. This combination of coursework and practical experience will position students well for continued study at the graduate level. While the Pre-Health Professions concentration includes the standard prerequisite courses and the option for elective courses for admission into graduate programs for a multitude of health professions, students are advised to check the prerequisites for their intended graduate programs and work these into their undergraduate programs where elective coursework is afforded. Students are also advised to maintain a minimum grade point average of 3.00 (B) since entry into graduate programs in the health professions is highly competitive. A grade of B or better in the specific prerequisites is required for most graduate programs. In addition to the Pre-Health Professions concentration, the Department of Kinesiology has a memorandum of understanding with Temple University’s Doctor of Physical Therapy (DPT) program providing academically gifted students the opportunity to enter into a 3+3 program. Students who are accepted into Temple’s DPT program at the conclusion of their junior year are allowed to count the first year of their DPT program as the fourth year of their undergraduate studies, thus eliminating one year of academic work. Students can only start the 3+3 program the first semester of their freshman year.

Programs

- Bachelor of Science in Athletic Training (p. 709)
- Bachelor of Science in Kinesiology: Exercise & Sport Science Concentration (p. 712)
- Bachelor of Science in Kinesiology: Physical & Health Education Teacher Education Concentration (p. 714)
- Bachelor of Science in Kinesiology: Pre-Health Professions Concentration (p. 717)
- Bachelor of Science in Kinesiology: Pre-Health Professions Concentration 3+3 Program (p. 720)

Bachelor of Science in Athletic Training

The Athletic Training Education Major prepares students to work with physically-active populations (e.g., athletic teams, dance, circus, NASCAR, Disney, rodeo, PT clinics). The certified athletic trainer functions as an integral member of the athletic health care team in secondary schools, colleges, universities, professional teams, and sports medicine clinics, providing leadership in the prevention, evaluation, immediate care, and rehabilitation of sport-related injuries. The Athletic Training major requires fulfillment of both academic coursework and clinical fieldwork experiences. This program of study is approved by the Commission on the Accreditation of Athletic Training Education (CAATE) and is designed to prepare students for certification as athletic trainers by the Board of Certification (BOC) and for Class “A” certification in the Commonwealth of Pennsylvania.

The Athletic Training Education Major at the undergraduate level is being phased out, and those seeking certification in Athletic Training should consult a departmental advisor and review Temple’s graduate programs in Athletic Training. No further students will be admitted to this program after fall 2015, although those already in the program will be allowed to graduate in the program as long as they continue study without interruption.

Summary of Requirements

University Requirements

All new students are required to complete the university’s General Education (GenEd (p. 143)) curriculum.

All Temple students must take a minimum of two writing-intensive courses as part of the major. The specific writing-intensive courses required for this major are KINS 3296 and KINS 4296.

College Requirement

All College of Public Health undergraduates must successfully complete the College Core Course, HRPR 1001 Public Health: The Way We Live, Work and Play.

Clearance Requirements

Please note the Athletic Training program requires students to complete clinical/field education experiences at facilities both on and off the University campus. These placements will require criminal background checks, Act 33/34 clearances and perhaps a drug screen. The results of these requirements may limit and potentially eliminate placement options which can, in turn, result in an inability to meet graduation requirements. Additionally, conviction of a misdemeanor, felony, or felonious or illegal act may prevent you from becoming credentialed and/or licensed to practice in athletic training.

**Bachelor of Science in Kinesiology: Exercise & Sport Science Concentration**

The Exercise and Sport Science Concentration provides students with knowledge and competencies required for professional service in a variety of sport, fitness, wellness, and rehabilitation settings. The exercise and sport science concentration also prepares students for graduate study in exercise physiology or in a variety of related health professions. Program competencies include health screening, fitness assessment, exercise program development, health-fitness counseling, and therapeutic exercise supervision of patients with special needs. Concentration courses include, but are not limited to, advanced exercise physiology, exercise in health and disease, exercise testing and programming, electrocardiography, exercise and aging, and applied technologies. The exercise and sport scientist understands the complexity of the human body and the interaction among physical activity, exercise, and good health. The improved function, health, and well-being of the total person--*Body, Mind, and Spirit*--are the ultimate goals of professionals in this field.

Exercise scientists apply their knowledge, skills, and beliefs to all people regardless of gender, age, social status, and current health-related fitness level or disease state. Wherever there is a need to improve functionality, health-fitness, medical prognosis, optimal aging, or wellness, one will find an exercise scientist providing leadership in programs that help individuals optimize their lives and health. In summary, exercise science is a stimulating area of study and a rewarding professional application with a very bright future.

**Summary of Requirements**

**University Requirements**

All new students are required to complete the university's General Education (GenEd [p. 143]) curriculum.

All Temple students must take a minimum of two writing-intensive courses as part of the major. The specific writing-intensive courses required for this major are KINS 3296 and KINS 4296.

**College Requirement**

All College of Public Health undergraduates must successfully complete the College Core Course, HRPR 1001 Public Health: The Way We Live, Work and Play.

**Clearance Requirements**

Please note the Exercise and Sport Science program requires students to complete clinical/field education experiences at facilities both on and off the University campus. These placements may require criminal background checks, Act 33/34 clearances and perhaps a drug screen. The results of these requirements may limit and potentially eliminate placement options for the student which can, in turn, result in an inability to meet graduation requirements. Additionally, conviction of a misdemeanor, felony, or felonious or illegal act may prevent you from becoming credentialed and/or licensed to practice.

### Bachelor of Science in Kinesiology: Physical & Health Education Teacher Education Concentration

Teacher education is the focus of the **Physical and Health Education Teacher Education (PHETE) Concentration**. This concentration prepares students to teach physical and health education in public and private schools (grades K through 12). The PHETE concentration integrates academic preparation with fieldwork experiences each semester, culminating in a dual-level (secondary and elementary) full semester, student-teaching experience. Coursework in discipline-specific content, methods of teaching, assessment and evaluation, educational psychology, educational foundations, cultural diversity and adapted activities, and administration all help teacher education students assume their roles as competent teachers in today’s society. Admission into the PHETE program takes place after the sophomore year upon completing the pre-admission coursework; two in-school teaching experiences; the PECT PAPA tests in reading, mathematics, and writing; the Praxis II test in fundamental content knowledge; as well as an interview with the PHETE faculty. All PHETE, Health-Related Professions, and Education courses required in the concentration are valid toward certification for a maximum of five (5) years. If one does not get certified within this time period, those courses that have expired must be retaken. A

cumulative GPA of 3.00 or greater is required for admission into the junior year and certification. After admission, one additional Praxis II test is required for certification: Health and Physical Education Content Knowledge. Upon completion of the PHETE concentration, passing the appropriate standardized tests, and applying to the Pennsylvania Department of Education for an Instructional I Certificate in Health and Physical Education, graduates will be licensed to teach K-12 Health and Physical Education by the Commonwealth of Pennsylvania.

Summary of Requirements

University Requirements

All new students are required to complete the university's General Education (GenEd (p. 143)) curriculum.

All Temple students must take a minimum of two writing-intensive courses as part of the major. The specific writing-intensive courses required for this major are KINS 3296 and KINS 4296.

College Requirement

All College of Public Health undergraduates must successfully complete the College Core Course, HRPR 1001 Public Health: The Way We Live, Work and Play.

Clearance Requirements

Please note the PHETE program requires students to complete student teaching experiences at off campus facilities. These placements will require criminal background checks, Act 33/34/73 clearances and perhaps a drug screen. The results of these requirements may limit and potentially eliminate placement options which can, in turn, result in an inability to meet graduation requirements. Additionally, conviction of a misdemeanor, felony, or felonious or illegal act may prevent you from becoming credentialed and/or licensed to teach.

1. PHTE 3787 can only satisfy Practicum I or Practicum II requirements. This course cannot be used to satisfy both requirements.

Note: All courses in the Department of Kinesiology and required courses in the selected professional application options must be completed with a minimum grade of C. The PHETE program has a more stringent requirement of a minimum grade of B- in all PHETE courses and required Health-Related Professions and Education courses. The Kinesiology Core and program requirements must be satisfactorily completed prior to enrolling in any internship/externship or student teaching experience.

The degree of Bachelor of Science in Kinesiology with a concentration in Physical & Health Education Teacher Education may be conferred upon a student by recommendation of the faculty upon the satisfactory completion of 128 semester hours of credit.

Bachelor of Science in Kinesiology: Pre-Health Professions Concentration

The Pre-Health Professions Concentration prepares students for admission into Graduate Programs in a multitude of the Health Professions such as physical therapy, occupational therapy, medicine, dentistry, physician assistant practice, and optometry. The Department of Kinesiology's Core is a perfect complement to the standard prerequisite courses and expanded elective courses available through this concentration. This combination of coursework and practical experience will position students well for continued study at the graduate level. While the Pre-Health Professions concentration includes the standard prerequisite courses and the option for elective courses for admission into graduate programs for a multitude of health professions, students are advised to check the prerequisites for their intended graduate programs and work these into their programs where elective coursework is afforded. Students are also advised to maintain a minimum grade point average of 3.0 (B) since entry into graduate programs in
the health professions is highly competitive. A grade of B or better in the specific prerequisites is required for most graduate programs. In addition to the Pre-Health Professions concentration, the Department of Kinesiology has a memorandum of understanding with Temple University's Doctor of Physical Therapy (DPT) program providing academically gifted students the opportunity to enter into a 3+3 program. Students who are accepted into Temple's DPT program at the conclusion of their junior year are allowed to count the first year of their DPT program as the fourth year of their undergraduate studies, thus eliminating one year of academic work. Students can only start the 3+3 program the first semester of their freshman year.

**Summary of Requirements**

**University Requirements**

All new students are required to complete the university's General Education (GenEd (p. 143)) curriculum.

All Temple students must take a minimum of two writing-intensive courses as part of the major. The specific writing-intensive courses required for this major are KINS 3296 and KINS 4296.

Bachelor of Science in Kinesiology: Pre-Health Professions Concentration 3+3 Program

The Pre-Health Professions Concentration prepares students for admission into graduate programs in a multitude of the health professions such as physical therapy, occupational therapy, medicine, dentistry, physician's assistant practice, and optometry. The Department of Kinesiology's Core is a perfect complement to the standard prerequisite courses and expanded elective courses available through this concentration. This combination of coursework and practical experience will position students well for continued study at the graduate level. While the Pre-Health Professions concentration includes the standard prerequisite courses and the option for elective courses for admission into graduate programs for a multitude of health professions, students are advised to check the prerequisites for their intended graduate programs and work these into their programs where elective coursework is afforded. Students are also advised to maintain a minimum grade point average of 3.00 (B) since entry into graduate programs in the health professions is highly competitive. A grade of B or better in the specific prerequisites is required for most graduate programs. In addition to the Pre-Health Professions concentration, the Department of Kinesiology has a memorandum of understanding with Temple University's Doctor of Physical Therapy (DPT) program providing academically gifted students the opportunity to enter into a 3 + 3 program. Students who are accepted into Temple's DPT program at the conclusion of their junior year are allowed to count the first year of their DPT program as the fourth year of their undergraduate studies, thus eliminating one year of academic work. Students can only start the 3 + 3 program the first semester of their freshmen year.

Kinesiology Pre-Health Professions Concentration, 3+3 Program

Students must meet the admissions requirements (http://cph.temple.edu/pt/degree-programs/doctor-physical-therapy-dpt/33-accelerated-pre-baccalaureate-admission) for early admission to Temple University's College of Public Health Doctor of Physical Therapy program. If you are applying to other physical therapy programs, please use the web to find admissions requirements.

Guidelines for the Completion of the Bachelor of Science Degree from the Department of Kinesiology

• Bachelor of Science candidates in the Department of Kinesiology must complete all requirements for their major before entering the Doctor of Physical Therapy (DPT) Program in the College of Public Health with the following exception: Pre-Health Professions 3+3 students may count 27 to 31 equivalent credit hours from the first year in the DPT Program in the College of Public Health to fulfill their general credit hour requirements for the B.S. degree in the Department of Kinesiology.

• Admission into the Department of Kinesiology's Pre-Health Professions concentration's 3+3 program is highly competitive and challenging. If you are interested in pursuing this accelerated program, you must declare it immediately upon admission and talk to an advisor within the department prior to registering for your first-semester classes. Your SAT scores and high school transcript must support your capacity to handle successfully a rigorous academic workload. Students in this program must be able to achieve and maintain cumulative and prerequisite GPAs of 3.50 or better.

• If students fail to get admitted into the College of Public Health's DPT program after their junior year, they are required to finish their program within the Department of Kinesiology as defined in the academic plan's alternate fourth year.

Summary of Requirements

University Requirements

All new students are required to complete the university's General Education (GenEd (p. 143)) curriculum.
All Temple students must take a minimum of two writing-intensive courses as part of the major. The specific writing-intensive courses required for this major are KINS 3296 and KINS 4296.

**College Requirement**

All College of Public Health undergraduates must successfully complete the College Core Course, HRPR 1001 Public Health: The Way We Live, Work and Play. Because of the highly structured nature of the 3+3 program, students in the program may have to take HRPR 1001 in the summer or as an overload course.

**Major Requirements**

**Kinesiology Core Courses**

Nursing

Nancy L. Rothman, Ed.D., R.N., Interim Chair
Jones Hall 515
215-707-4687
rothman@temple.edu
http://cph.temple.edu/nursing

Philosophy

The Department of Nursing addresses the complexity of economic, social, and health care needs of the global community. Consistent with the mission statements of both Temple University and the College of Public Health, the Department of Nursing stimulates life-long learning through research, education, practice, and service. Faculty members of the Department of Nursing believe that nursing is a profession based on a unique body of knowledge derived from nursing research, the humanities and sciences, and hold as essential to their teaching mission the following core values: creativity, cultural competence, excellence, inquiry, integrity, leadership, and respect. Curriculum and research activities focus on clients’ health needs and the nursing care of diverse populations with an emphasis on the underserved. The faculty believes that health care is a basic human right.

The faculty believes that baccalaureate education is essential preparation for entry into professional nursing practice. The Master of Science in Nursing (MSN) Program prepares nurses at an advanced level of nursing science and is required for preparation as a nurse educator or clinical nurse leader. The MSN Program prepares students to synthesize and apply concepts from nursing and related disciplines to engage in evidence-based decision-making, practice and leadership. The Doctor of Nursing Practice (DNP) Program at Temple University prepares advanced practice nurse practitioners. The Doctor of Nursing Practice encompasses advanced clinical practice that influences health care outcomes for individuals, families, and populations including the direct care of individual patients, management of care for individuals and populations, administration of nursing and health care organizations, and the development and implementation of health policy. The DNP prepares leaders for the discipline and profession of nursing that will have the skills to address issues of health disparities.

At each level of education, students learn and apply general nursing principles and concepts to client care. Role development, professional socialization, critical thinking, and evidence-based practice are emphasized. Faculty members are role models who facilitate active learning, self-direction, and a spirit of inquiry. Faculty members are involved in scholarly and professional activities, maintain clinical competence, and conduct, disseminate, and utilize research.

Nursing, as an integral part of the complex health care system, shares responsibility with other disciplines for assuring the availability of comprehensive health services to all consumers. Health is a dynamic state, which embodies physical, psychological, and social dimensions, not merely the absence of illness. The definition of optimal health varies with the client and is determined by personal goals and values and past and present health factors. Nursing is a humanistic profession characterized by the therapeutic use of self in a holistic approach to the care of clients. Nursing supports clients in achieving and maintaining optimal health through health promotion, illness prevention, disease management, health restoration, and rehabilitation. Clients are conceptualized as individuals, families, and communities. The client is an open system engaged in interaction with the environment. Clients perceive and respond to environmental stimuli as integrated wholes.

The professional nurse provides leadership in directing and coordinating nursing care and is accountable to clients and the profession through ongoing evaluation of nursing practice. The professional nurse advocates for optimal client health through counseling, teaching, and social, organizational, and political action. Professional nurses are committed to professional growth and the expansion and validation of nursing knowledge.

Programs

Accreditation

The program is approved by the State Board of Nursing, Commonwealth of Pennsylvania, and is accredited by the Commission on Collegiate Nursing Education (CCNE). CCNE can be reached at One Dupont Circle NW, Suite 503, Washington, D.C. 20036, 202-887-6791. Graduates are eligible to sit for the National Council Licensure Examination (NCLEX) leading to licensure as a Registered Nurse.

The degree of Bachelor of Science in Nursing may be conferred upon a student by recommendation of the faculty and upon the satisfactory completion of a minimum of 122 credit hours with a minimum cumulative GPA of 2.0 overall and in the major. The minimum passing grade in all required nursing major courses is 73% (C); this includes all courses listed under Department of Nursing Requirements and Nursing Major requirements.

Summary of Requirements

University Requirements

All students are required to complete the university’s General Education (GenEd p. 143) curriculum.

All students must take a minimum of two writing-intensive courses as part of the major. The writing-intensive courses required for this major are NURS 4198 and NURS 4296.

College Requirement

All College of Public Health undergraduates must successfully complete the College Core Course, HRPR 1001 Public Health: The Way We Live, Work and Play.

Clinical/Fieldwork Agency Compliance

Please note the Nursing program requires students to complete clinical/field education experiences at facilities both on and off the University campus. These placements will require criminal background checks, Act 33/34 clearances and a drug screen. The results of these requirements may limit and potentially eliminate placement options for the student which can, in turn, result in an inability to meet graduation requirements. Additionally, conviction of a misdemeanor, felony, or felonious or illegal act may prevent you from becoming credentialed and/or licensed to practice nursing. Students will also need a medical history, physical examination, immunization record, and annual influenza vaccines. Students who do not comply with the required health and immunization requirements will not be permitted to attend clinical and will be dismissed from the Nursing program. Practice of deceit in the submission of any of the above documentation is cause for immediate dismissal from the Nursing program.

Bachelor of Science in Nursing (B.S.N.): Registered Nurse Option

Nancy L. Rothman, Ed.D., R.N., Interim Chair
Jones Hall 515
215-707-4687
rothman@temple.edu
cph.temple.edu/nursing

Note: The BSN-RN program is currently not accepting students. Please contact the Department of Nursing to inquire about the future status of the program.

Accreditation

The program is approved by the State Board of Nursing, Commonwealth of Pennsylvania, and is accredited by the Commission on Collegiate Nursing Education (CCNE). CCNE can be reached at One Dupont Circle NW, Suite 503, Washington, D.C. 20036, 202-887-6791. Graduates are eligible to sit for the National Council Licensure Examination (NCLEX) leading to licensure as a Registered Nurse.
The degree of Bachelor of Science in Nursing may be conferred upon a student by recommendation of the faculty and upon the satisfactory completion of a minimum of 122 credit hours with a minimum cumulative GPA of 2.00 overall and in the major. The minimum passing grade in all required nursing major courses is 73% (C); this includes all courses listed under Department of Nursing Requirements and Nursing Major Requirements.

**Bachelor of Science in Nursing (BSN): Registered Nurse Option**

RN students follow the same curricular path as pre-licensure BSN students. Registered nurses apply directly to the BSN Program. RN applicants must meet the following admission criteria:

1. successful completion of an NLN-AC accredited nursing program with a cumulative GPA of 3.50 or higher;
2. submission of a completed Undergraduate Application for Transfer Students;
3. submission of application fee;
4. submission of all college transcripts and school of nursing transcript; and
5. current unencumbered license as a Registered Nurse.

Once accepted into the BSN program, RN students are awarded thirty-one (31) nursing credits on the basis of completion of their original nursing program, and any additional transfer credits as determined by the Office of Undergraduate Admissions. Registered nurses accepted into the program are required to complete thirty (30) nursing credits within the BSN curriculum, the University’s General Education requirements, and all required Nursing prerequisite courses.

**Clinical/Fieldwork Agency Compliance**

Please note the Nursing program requires students to complete clinical/field education experiences at facilities both on and off the University campus. These placements will require criminal background checks, Act 33/34 clearances and a drug screen. The results of these requirements may limit and potentially eliminate placement options for the student which can, in turn, result in an inability to meet graduation requirements. Additionally, conviction of a misdemeanor, felony, or felonious or illegal act may prevent you from becoming credentialed and/or licensed to practice nursing. Students will also need a medical history, physical examination, immunization record, and annual influenza vaccines. Students who do not comply with the required health and immunization requirements will not be permitted to attend clinical and will be dismissed from the Nursing program. Practice of deceit in the submission of any of the above documentation is cause for immediate dismissal from the Nursing program.

**Required Nursing Courses for the RN Option**

**Total Credit Hours**

30

1. Writing Intensive
2. Statistics is a prerequisite
3. Capstone Course. Must be taken in the last semester of study.

**Rehabilitation Sciences**

The Department of Rehabilitation Sciences is at the forefront of innovative academics, research, and knowledge translation activities to support those who have long-term disabilities or who are at risk of experiencing short- or long-term disruptions in their lives, in order to help them live full, satisfying,
active, and meaningful lives. Our disciplines are based on evidence-based practices that have been shown to improve the lives of many individuals from various backgrounds and conditions.

Encompassing Therapeutic Recreation and Occupational Therapy, our programs are nationally recognized for academic excellence, cutting-edge research, and outstanding service that enhances and promotes health and wellness.

**Occupational Therapy** [http://cph.temple.edu/rs/academics-rehabilitation-sciences/occupational-therapy]

These graduate programs identify and address the aspects of injury or disability that prevent people from performing essential tasks or engaging in activities that are meaningful to them. Activities and adaptation are used to improve function, performance, independence, and quality of life, with a particular expertise and focus on meaningful participation in community settings.

**Therapeutic Recreation** [http://cph.temple.edu/rs/academics-rehabilitation-sciences/therapeutic-recreation]

These undergraduate and graduate programs prepare students for careers as entry-level and advanced recreation therapists who use play and recreation as a means of psychosocial adaptation, health promotion, rehabilitation, and life quality for children, adults, and the elderly who have illnesses and disabilities.

**What Makes Us Distinct?:**

- We guide national policies, programs, and practices that improve the delivery of services to diverse populations of individuals with disabilities and facilitate their community participation, inclusion, and active living.
- Our innovative philosophy is firmly grounded in the social model of disability, the World Health Organization’s International Classification of Functioning, Disability, and Health, capabilities theory, and the independent living movement philosophy.
- Key concepts in our approach include ecological, opportunity, strengths-based, evidence-based, and empowerment.
- Both our therapeutic recreation and occupational therapy programs are accredited and many aspects exceed accreditation standards.
- Our academic philosophy focuses on appropriate experiences and evidenced-based interventions for people of all ages who experience disabilities and other life challenges.
- Consistent with our solid science and research underpinnings, our professional training emphasizes state-of-the-art, evidence-based practices.

**Innovation and Outreach**

Intensive student engagement in research projects is beneficial to students’ clinical practice and may influence their interest in pursuing an academic career in research. Our four innovative research labs are:

- Active Living and Quality of Life for Older Adults
- Autism Spectrum Disorders (ASD) and ADHD
- The International Classification of Functioning, Disability & Health (ICF) and Recreational Therapy Evidence Based Practice
- Temple University Collaborative on Community Inclusion for Individuals with Psychiatric Disabilities [http://www.tucollaborative.org]

Our program’s research, education, and service are guided by a respect for and understanding of cultural and ethnic diversity and human rights, while acknowledging that other challenges, such as racism, sexism, classism, and homophobia/heterosexism, interact with ableism and other disability-specific discrimination in ways that further limit community participation, inclusion, and active living.

**Programs**

- Bachelor of Science in Therapeutic Recreation (p. 729)

**Bachelor of Science in Therapeutic Recreation**

Rhonda Nelson Ph.D., CTRS, Associate Professor, Program Director
1700 N. Broad Street
Suite 304
215-204-2703
rhonda.nelson@temple.edu
http://cph.temple.edu/rs/academics-rehabilitation-sciences/therapeutic-recreation

**About the Therapeutic Recreation Major**

The Therapeutic Recreation Program offers two degrees:
• B.S. in Therapeutic Recreation
• M.S. in Recreation Therapy

Additionally, the Therapeutic Recreation program offers an accelerated M.S. degree program (5 year B.S. to M.S. degree program), which provides the opportunity for qualifying students studying therapeutic recreation as an undergraduate to begin taking graduate level courses within their undergraduate curriculum and therefore complete an M.S. in Recreation Therapy in a total of 5 years (4 year B.S. + 1 year M.S.).

Recreation therapists use recreation and leisure activities to facilitate recovery, health, and wellness in individuals with disabilities. The primary goal of the undergraduate program is to prepare entry-level recreation therapists to use play and recreation generally, and recreation therapy specifically, as a means of psychosocial adaptation, health promotion, rehabilitation, and life quality for children, adults, and the elderly who have illness and disability. The curriculum is focused on assuring that graduates have proficiency in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains to function as recreation therapists in traditional and emerging service delivery settings. Alumni of Temple’s therapeutic recreation degree programs can be found in a wide range of health and human services agencies. They are employed in diverse settings, including hospitals, rehabilitation centers, nursing homes, assisted-living facilities, schools, and community recreation agencies. According to the U.S. Department of Labor, employment opportunities are expected to increase approximately 17% over the next ten years, as fast as the average for all other occupations. A growth in employment opportunities will be most prevalent in the areas of aging/nursing care facilities, working with students with disabilities in schools, and outpatient medical facilities vs. inpatient care.

Mission of the Program
The Therapeutic Recreation Program strives to be a world-class academic and research unit committed to advancing the role of play, recreation, and leisure opportunities in health promotion, rehabilitation, and disease prevention for diverse individuals with chronic illnesses and disabilities across the life span. The program provides exceptional educational experiences, conducts discipline-expanding research, and contributes to society via programs that explore and test evidenced-based innovations in practice and policy. The program’s mission includes

• instilling knowledge, values, ethics, and skills that will guide students in their future academic pursuits and their professional practice in therapeutic recreation at the local, national, and international levels;
• being a leading contributor to the ever-changing knowledge base in health, leisure, and disability studies through research and other scholarly activities;
• providing innovative and responsive educational opportunities, research, and service in collaboration with local, regional, and national agencies and organizations; and
• fostering interdisciplinary collaborations to promote a better understanding of the importance of physically and socially active lifestyles to health, well-being, and quality of life.

Central to the overall mission of the Therapeutic Recreation Program is a commitment to access and diversity. This is realized through a commitment to ensuring equal access to all qualified applicants and a commitment to promoting equal access to recreation and leisure opportunities for all people regardless of age, economics, race, gender, culture, sexual orientation, religion, or abilities.

Certification
Following satisfactory completion of all coursework and internship requirements, graduates with the Bachelor of Science degree in Therapeutic Recreation are eligible to sit for the national certifying examination in therapeutic recreation administered by the Educational Testing Services (ETS) and the National Council on Therapeutic Recreation Certification (NCTRC).

A Bachelor of Science (B.S.) degree in Therapeutic Recreation is awarded to students upon satisfactory completion of a minimum of 121 semester hours of credit with a minimum GPA of 2.00 overall and a minimum GPA of 2.5 for classes in the major. Students completing this degree are eligible to sit for the national credentialing examination for recreation therapists.

Summary of Requirements

University Requirements

• All students are required to complete the General Education (GenEd (p. 143)) curriculum. Please note that the University GenEd curriculum has specific rules regarding the completion of this university requirement (for example, the number of courses a student may take in one department to satisfy GenEd Requirements), so careful review of the GenEd section of this Bulletin is encouraged.
• MATH 0701 (4 credits) and/or ENG 0701 (4 credits), if required by placement testing.
• All Temple students must take a minimum of two writing-intensive courses as part of the major. Writing Intensive classes in Therapeutic Recreation include:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>THRC 3096</td>
<td>Assessment and Documentation in Therapeutic Recreation</td>
<td>3</td>

<td>Research and Evaluation in Therapeutic Recreation</td>
<td>3</td>
</tr>
<tr>
<td>THRC 4196</td>
<td>Therapeutic Recreation Clinical Procedures</td>
<td>3</td>
</tr>
</tbody>
</table>
• Students are also encouraged to review university requirements for successful progression through their academic careers. Knowledge of course repeat policies, including the withdrawal policy, academic standing, and rules on taking courses elsewhere can be found in this Bulletin.

**College Requirement**

All College of Public Health undergraduates must successfully complete the College Core Course, HRPR 1001 Public Health: The Way We Live, Work and Play.

**Clearance Requirements**

Please note the Therapeutic Recreation program requires students to complete clinical/field education experiences at facilities both on and off the University campus. These placements will require criminal background checks, Act 33/34 clearances and perhaps a drug screen. The results of these requirements may limit and potentially eliminate placement options which can, in turn, result in an inability to meet graduation requirements. Additionally, conviction of a misdemeanor, felony, or felonious or illegal act may prevent you from becoming credentialed and/or licensed to practice in therapeutic recreation.

**Therapeutic Recreation Program Requirements**

Students must complete a set of specific courses in the major, including Health Related Professions Core, Cognate Core, Therapeutic Recreation major courses, and two credit-earning field-based clinical internships (THRC 3185 and THRC 4185). Students must also complete other non-credit earning requirements as part of the major, including 70 hours of professional development / volunteer experiences relevant to the major, criminal and child abuse clearances, health immunization and physical documentation, and certification in First-Aid/CPR.

</tbody>
</table>
THRC 4211  Therapeutic Recreation and Physical Disabilities
THRC 4213  Therapeutic Recreation and Pediatric Healthcare

Total Credit Hours  81-83

1. Students must successfully pass all Health Related Professions courses and Cognate Core courses with a minimum grade of C. Students not demonstrating the ability to meet this academic requirement will not be permitted to progress to the upper-division Therapeutic Recreation Core and related electives in the curriculum.

2. Students should consult with their advisor for information on the distinctions between Anatomy and Physiology selection sequence and its implication for the degree and career goals. Satisfactory completion of KINS 1221 and KINS 1222 sequence or KINS 1223 and KINS 1224 sequence will meet the two-course GenEd Science and Technology requirement. The courses are similar, but not interchangeable, and must be taken in the correct sequence. Students choosing the KINS 1221 and KINS 1222 sequence may need to take an additional 2-credit elective to meet credit hours degree graduation requirement. Please see a departmental advisor for clarification.

All Therapeutic Recreation courses must be completed with a grade of C or higher.

Suggested Academic Plan
Bachelor of Science in Therapeutic Recreation
Requirements for New Students starting in the 2015-2016 Academic Year

---

1. MATH 0824 is recommended to meet prerequisite requirements for PSY 1003/SOC 1167
2. You should consult your advisor for information on the distinctions between the anatomy and physiology selection sequence and its implication for your degree and career goals. Satisfactory completion of the KINS 1221 and KINS 1222 sequence or the KINS 1223 and KINS 1224 sequence will meet the two-course GenEd Science & Technology requirement. These courses are similar but not interchangeable. Courses must be taken in the correct sequence. Students choosing KINS 1221 and KINS 1222 should be sure to take a sufficient number of elective credits to meet credit hour degree requirements. Please see a departmental advisor for clarification.
3. Indicates Writing Intensive course for the major.
4. Four Therapeutic Recreation Elective courses (12 credits) are required for graduation.
5. These courses are offered in the fall semester only.
6. These courses are offered in the spring semester only.
7. Indicates Writing Intensive capstone for the major.

**Note**: Students may lighten their academic load in the fall and spring semesters by taking classes during the summer sessions. Please see a departmental advisor to explore summer course offerings and suitable options.
The Bachelor of Science (BS) degree in Public Health is housed within the Department of Social and Behavioral Sciences of the College of Public Health. The undergraduate curriculum prepares students for diverse careers in the public health field that focus on creating, implementing, and evaluating interventions and programs designed to improve the health status and quality of life for all individuals. As one of the few accredited undergraduate public health programs in the country, the department offers a Bachelor of Science degree in public health that serves as a national model in which students study the broad range of public health concerns, including individual disease prevention and injury/harm reduction behaviors, distribution and development of disease through epidemiological assessment and community program development, implementation, and evaluation. Students learn to use educational interventions to provide health information, gain experience in assessing the needs of target populations, clarify program goals and objectives, and develop strategies to motivate and involve their clients/patients in educational interventions. All Public Health majors take a set of common theoretical courses designed to promote an understanding of health, wellness, and disease prevention. After completing university-required General Education courses, Public Health students complete courses in the core disciplines of public health within the Department of Social and Behavioral Sciences as well as courses in other important and related disciplines, such as epidemiology, environmental health, and health services. Students also participate in over 600 hours of fieldwork experience in public health agencies, organizations, or other entities to gain invaluable real-world experience in the field.

The Public Health major trains entry-level public health workers to provide frontline preventive health information, services, and health behavior interventions at the community level, particularly in communities with high-risk populations. Majors receive intensive pre-professional training and direct public health work experience through internship experiences available throughout the city of Philadelphia. There are also opportunities to work alongside faculty members in one of the many research labs and centers in the Department. Graduates typically work in voluntary health agencies, public health departments, hospitals, rehabilitation centers, corporate work sites, community health organizations, family planning clinics, and managed-care facilities. Some graduates also go on to graduate public health programs (Master of Public Health or Master of Science in Epidemiology) or programs in other health-related professions. Eligible students in the Public Health BS Program also can apply for the 4+1 BS-MPH degree, in which they can earn a Master's of Public Health degree at Temple in 5 years.

**Mission of the Department**

The mission of the Department of Social and Behavioral Sciences is to promote healthy communities and train professionals and scholars who will excel in public health practice and research. We are committed to creating, testing and disseminating innovative social and behavioral health promotion and intervention programs that effectively address the unmet health needs of vulnerable and underserved populations. Our mission is achieved by leading and engaging in public health education, and service efforts, often in collaboration with community partners.

The Department of Social and Behavioral Sciences follows the requirements set forth by Temple University regarding General Education. The department has also established additional Core and Cognate requirements for all Public Health majors.

**Programs**

- Bachelor of Science in Public Health (p. 734)
- Certificate in Emergency Management with Special Populations (p. 737)
- Minor in Public Health (p. 738)

**Bachelor of Science in Public Health**

**Summary of Requirements**

**University Requirements**

All students are required to complete the university's General Education (GenEd (p. 143)) curriculum.
All Temple students must take a minimum of two writing-intensive courses as part of the major. The specific writing-intensive courses required for this major are PBHL 3496 and PBHL 3596.

**College Requirement**
All College of Public Health undergraduates must successfully complete the College Core Course, HRPR 1001 Public Health: The Way We Live, Work and Play.

**Clearance Requirements**
Please note the Public Health program requires students to complete clinical/field education experiences at facilities both on and off the University campus. These placements may require criminal background checks, Act 33/34 clearances and perhaps a drug screen. The results of these requirements may limit and potentially eliminate placement options which can, in turn, result in an inability to meet graduation requirements.

**Public Health Program Requirements**
Students must complete a set of specific courses in the major, including a Health-Related Professions Core course, Cognate Core courses, and Public Health Major courses, including two credit-earning internships (PBHL 3185 and PBHL 4185). Also required are two public health electives, one Cognate elective and three general (free) electives. The major requires a minimum of 122 total credits.

All Public Health course work (those courses with a PBHL designation and courses approved as a cognate elective) must be completed with a grade of C or higher.

Cognate Elective
Select one course with approval of a departmental academic advisor 3

Total Credit Hours 93

1 Students must successfully pass the Health-Related Professions Core course, the Cognate Core courses, and general electives with a minimum grade of C- or higher. Students not demonstrating the ability to meet this academic requirement will not be permitted to progress to the upper-division Public Health and related electives in the curriculum.

2 Students should consult with their advisor for information on the distinctions between Anatomy and Physiology selection sequence and its implication for the degree and career goals. Satisfactory completion of the KINS 1221 and KINS 1222 sequence or the KINS 1223 and KINS 1224 sequence will meet the two-course GenEd Science and Technology requirement. The courses are similar, but not interchangeable, and must be taken in the correct sequence. Students choosing the KINS 1221 and KINS 1222 sequence may need to take an additional 2-credit elective to meet credit hours degree graduation requirement. Please see a departmental advisor for clarification.

3 Additional listings may be obtained from the academic advisor and approved for elective credit.

Students choosing KINS 1221 and KINS 1222 sequence may need to take an additional 2-credit elective to meet credit hours degree graduation requirement. Please see your advisor for clarification.

**Certificate in Emergency Management with Special Populations**

Sylvia Twersky-Bumgardner, M.P.H.
215-204-9316
sylviatb@temple.edu

Temple University’s Department of Public Health, in collaboration with Temple’s Center for Research Preparedness Education and Practice (C-PREP), is offering classes for preparing the public health workforce and emergency managers to address the needs of special populations in a competency-
based and practice-oriented framework. In emergency management a special population is any group of people that needs extra support to be prepared for an emergency, as well as those needing community support to respond successfully and recover in disasters or emergency situations. These classes are for practitioners in emergency preparedness and response, public health professionals, undergraduate students, and recent graduates with an interest in emergency preparedness and response. This program consists of a four- or five-course sequence, depending on previous coursework. For current Public Health majors and minors at Temple University, two of these courses can be used to fulfill elective requirements. The certificate program can be finished in either one or two years part-time, and most of the courses are offered online so that students from all over the globe and at different stages in their career can take advantage of the program. This certificate will be listed on your transcript upon completion. FEMA Higher Ed calls this program a national first in their April 11, 2008, program report.

**Prerequisite (1 course)**

This course may be waived if the student can demonstrate either NIMS certification or similar coursework taken at a college or university with a grade of B or better.

PBHL 2207 Principles of Emergency Management: A Public Health Perspective 3

**Core (3 courses)**

The Core courses will address the basic competencies in emergency preparedness, response, and mitigation. Within these core competencies the needs of special populations will be addressed.

PBHL 2202 Man-Made Disasters: Radiological, Chemical & Biological Terrorism 3
PBHL 2208 Natural Disasters: Response & Recovery 3
PBHL 2215 Special Populations: Strategic Community Outreach 3

**Elective (1 course)**

The electives will allow the student to customize the certificate program to meet their educational objectives and professional needs within the rubric of emergency preparedness and special populations. This includes the option to take graduate-level electives as appropriate. Recommended electives include:

PBHL 2201 Health Communication (graduate or undergraduate credits; in-person) 3
PBHL 2205 Coping with Life Stress Workshop (graduate or undergraduate credits; online) 3
or PBHL 5004 Understanding Stress and Change
PBHL 5009 Risk Communication & PH (graduate; in-person) 3

**Minor in Public Health**

*Note: The Public Health minor requirements have changed for the 2015-2016 academic year. If you declared the Public Health minor prior to fall 2015, please consult a departmental advisor regarding the minor requirements that you must fulfill.*

**Required Courses**

PBHL 1101 Introduction to Public Health 3
HRPR 2103 Health Psychology and Human Behavior 3
PBHL 2102 Environmental Health 3
PBHL 2219 Biostatistics and Public Health 3
PBHL 3101 Epidemiology (see advisor to register) 3

**Public Health Elective ¹**

Select one of the following: 3

PBHL 1103 International Health
PBHL 1104 Nutrition and Health
PBHL 1105 Society, Drug, and Alcohol Perspectives
PBHL 1106 Human Sexuality
PBHL 1201 Contemporary Health Issues
PBHL 2101 Disease Prevention and Control
PBHL 2201 Health Communication
PBHL 2203 AIDS and Society (Inter-session/Summer)
PBHL 2214 Power, Politics & Payments in U.S. Healthcare

**Total Credit Hours** 18
Other electives may be taken with the advice and permission of a departmental advisor.
School of Social Work

Cheri Carter, Ph.D., M.S.W., Assistant Professor, Undergraduate Program Director

http://cph.temple.edu/ssa/

Mission and Goals

The School of Social Work (SSW) was established in 1969 to prepare individuals for professional practice and for positions of leadership in social work and in the broader human services arena. The distinctive mission of the school, rooted in humanistic and democratic values, is reflected in a broad and vigorous commitment to the elimination of human suffering and social injustice and to the promotion of human rights and social equality. Its educational programs are therefore centered on intervention strategies on behalf of those populations and persons who are underserved, victimized, or denied full access to social opportunities and resources. Poverty, racism, sexism, homophobia, and other forms of discrimination and disenfranchisement are priority concerns of the school, as are those social problems associated with life in the inner city.

The School of Social Work is dedicated to societal transformations to eliminate social, political, and economic injustices for poor and oppressed populations, and advance the quality of life for all through the following:

• Education emphasizing the discovery of knowledge and the use of critical inquiry and professional ethics to guide solution-seeking and action-taking to effect social change among professional social workers in front-line, supervisory, managerial, and other leadership positions.
• Research and scholarship to advance applied knowledge and generate evidence-based strategies to resolve problems occurring between people and their social environments at local, state, national, and global levels.
• Public service that aids the dissemination of knowledge and evidence-based strategies and that aids the responsiveness of the school to the needs of constituents through collaborations and partnerships with communities, agencies, and organizations.

B.S.W. Program Objectives

At the completion of the B.S.W. curriculum, students will demonstrate the ability to do the following:

1. Apply strategies of social change and advocacy that help advance social, political, and economic justice.
2. Use critical inquiry and scientific research methods, both qualitative and quantitative, to evaluate and advance one’s own social work practice and that of the profession.
3. Understand and work to eliminate the forms and mechanisms of oppression and discrimination at all system levels.
4. Practice with knowledge, skills, and respect with regard to age, class, color, culture, ethnicity, family structure, gender, language, marital status, national origin, physical and/or mental disabilities, race, religion, sex, and sexual orientation.
5. Understand and adhere to the values, ethical standards and principles of the social work profession.
6. Use knowledge of the social work profession’s history, concerns, and societal contributions to inform contemporary issues in practice.
7. Practice with the skills and knowledge base of a culturally competent generalist social work practitioner at all system levels.
8. Demonstrate professional use of self in their practice with effective communication skills, self-awareness, inclusion of supervision and consultation, and the creation of positive change within organizations and service delivery systems.
9. Understand, analyze, influence, and formulate social policies.
10. Critically apply theoretical frameworks, supported by empirical evidence, that offer insight into the development and behavior of individuals over the lifespan and the interactions among individuals, families, groups, organizations, and communities.

Accreditation

The Bachelor of Social Work and the Master of Social Work programs are accredited by the Council on Social Work Education. This attests to the educational quality of the curricula and to the qualifications of graduates to assume professional positions that legally require applicants to have these degrees.
Honors/Honor Society

Dean’s List - Each fall and spring semester, those undergraduates who have met the credit hour and academic criteria for their school or college are placed on the Dean’s List. See the Dean's List (p. 92) policy for specific GPA and credit-hour requirements.

Alpha Delta Mu National Social Work Honor Society - Students with a cumulative GPA of 3.50 or above may apply for nomination to Alpha Delta Mu. Juniors and seniors are eligible for membership. Students should discuss this with their advisors.

Student Groups

Students at Temple University’s School of Social Work are part of a diverse community. The school offers an opportunity to be in class with diverse students who have had different life experiences and who represent varied points of view. In addition to classroom learning, SSW offers a number of ways in which students can come together as a community.

SSW Student Collective

The main student organization at SSW is the SSW Student Collective. The collective is the organization of both undergraduate and graduate students matriculated in the SSW Program. The Student Collective sponsors activities each academic year of a social, educational, and professional nature. Student representatives, selected by the collective, sit on various school committees as voting members. The collective was formed to represent a unified student voice that incorporates all the diversity of the student body.

In addition to the SSW Student Collective, students can choose to participate in the following social work organizations at SSW. The activity level of these groups varies from year to year since their existence is dependent on students stepping forward and organizing meetings and events.

National Social Work Honor Society (Beta Rho Chapter, Alpha Delta Mu)

The purpose of this organization is to advance excellence in social work practice and to encourage, stimulate, and maintain scholarship of the individual members in all fields, particularly in social work. For current activities, see the bulletin board in the lobby on the fifth floor of Ritter Hall Annex.

Alumni Association

For more information about SSWs alumni association, contact the General Alumni Association for names and numbers of current officers at 215-204-7521.

National Association of Social Workers, Philadelphia Division (NASW)

NASW is a professional organization that works on behalf of its members and the consumers they serve. Applications are available on the NASW bulletin board in the lobby on the fifth floor of Ritter Hall Annex.

Latino Social Work Organization (LSWO)

LSWO was founded in 1992 by a group of young social workers in Chicago. Temple students involved in LSWO have advocated for quality bilingual/bicultural services to Latinos and other oppressed communities.

Student Association of Black Social Workers (SABSW)

SABSW is a nonprofit organization created to serve African-American students and the community. The SABSW works towards unifying black social work students in the School of Social Work. The SABSW will also work with any student organization on campus or the immediate community to further the educational, political, academic, communal, and social plight of students at large.

Pride in Social Work (PSW)

PSW provides support, education, and advocacy for gay, lesbian, bisexual and transgendered students and their supporters. For additional information on Pride in Social Work at Temple University, contact Professor Bernie Newman at 215-204-1205.

Underground Railroad, Temple Depot (URR)

The URR works together with the Poor People’s Economic Human Rights Campaign focusing on direct actions, such as lobbying, advocacy, demonstrations, and support of grass-roots movements for social justice.

Student Contact Information

Students are asked to call the Office of Enrollment and Student Services (OESS) of the College of Public Health at 215-204-2602 or the below contacts with questions. For contact information in a specific department other than the School of Social Work, visit the web site at http://cph.temple.edu/.

Academic Program and Academic Advising

gradette.willis@temple.edu

Academic Policies & Regulations

Please see the Undergraduate Academic Policies (p. 81). Students are responsible for complying with all university-wide academic policies that apply to their individual academic status. Additional and unique policies, or exceptions for the School of Social Work, appear below.

Program Performance

Social work majors are expected to maintain a cumulative GPA of 2.00 or above. Students are expected to attain grades of C- or above in each of the professional and professionally related courses. Students who obtain a D+ or below in any course in the social work major must repeat the course.

Collegial Warning will be issued to students whose GPA falls below 2.00 for one semester. Students should not register for more than 12 credits until they improve their GPA.

Collegial Probation: Students who fall below a 2.00 for their cumulative GPA will be placed on probation. They may register for no more than 12 credits for the next term, in order to optimize the chance of improving their GPA. If their GPA is still below a 2.00 after two semesters of academic probation, students are subject to being dropped from the Social Work program.

Being Dropped from the Program: If a student does not achieve a cumulative average of 2.00 or show evidence of substantive scholastic improvement after two semesters on collegial probation and a 12-credit roster, the student is subject to being dropped from the School of Social Work.

Re-enrollment Request

To re-enter the School of Social Work, students must complete a Re-Enrollment Request and send it to the fax number designated on the last page of the request. Applications of students seeking re-enrollment after an absence of one or more semesters, not including summers, will be reviewed by the Director of the B.S.W. Program. If the student is accepted for re-enrollment, his or her program for completion of degree requirements will be planned in accordance with those currently operative in the program. If courses were taken elsewhere, applicants are responsible for having official transcripts available when submitting the request form.

Transfer from Schools within the University

Students who are in good standing at Temple University may transfer to the School of Social Work at any point during their academic career. Before applying to transfer to Social Work, Temple students must attend a Change of Program session. These are explained on the College of Public Health website under Student Advising. Transfer applications will not be processed until the student attends the Change of Program session. Students will be notified of the decision regarding their request to change majors to Social Work in an e-mail from the university. A minimum GPA of 2.00 is required for admission.

Prior to transferring, students are encouraged to arrange to meet with both the original school advisor and the SSW advisor or BSW Program Director. Because of the professional requirements and the sequential nature of the curriculum, students are encouraged to enter the program as early as possible. Students must be majors in the social work program for a minimum of two years and a summer.

General Graduation Requirements

In order to receive a Bachelor of Social Work degree, a student must complete a minimum of 120 semester hours, which includes the University General Education (GenEd (p. 143)) curriculum, the College of Public Health Core course (HRPR 1001) and the School of Social Work curriculum. A
potential graduate must also hold a cumulative GPA of 2.00 or better (having received a C- or better in all social work courses) and meet any additional requirements, such as completion of a graduation application.

Military Science Courses

Undergraduate students in the School of Social may apply up to 12 credits of military science courses at the 3000 and 4000 levels in Aerospace Studies (Air Force ROTC), Military Science (Army ROTC), and Naval Science (Navy ROTC).

Academic Advising

The College of Public Health has an extensive system of academic advising provided by professional and faculty advisors. In the School of Social Work, when students reach junior or senior standing, they are assigned to faculty advisors who assist with mentoring as students progress in their professional training. Early and regular contact with the advisor can be extremely helpful. The advisor is a knowledgeable person with whom students may discuss issues of concern in relation to university regulations, course selection, and career paths.

Academic advisors are particularly important for social work majors. The Bachelor of Social Work curriculum is organized so that courses scheduled to be taken later in the program build on the knowledge and skill foundation provided in the liberal arts and social work courses taken earlier. For this reason, most social work courses designate successful completion (with a C- or better) of earlier courses as prerequisite to taking later courses. Additionally, SSW requires that three of the social work courses required in each semester of the senior year—the research course, the seminar in social work practice, and the field practicum—be taken concurrently. This program of study for BSW students has been carefully designed and approved by faculty. It is intended to provide students with a coherent, integrated, and high-quality learning experience.

Although students must assume primary responsibility for knowing the requirements for their degree and for acquiring information about their academic status, student advisors can help students if they have any questions. Academic advisors strive to avoid errors when advising students about their program requirements; however, schools and colleges cannot assume liability for errors in advising.

Transfer Students from Schools Outside of Temple

The Offices of Admissions and of the Senior Vice Provost for Undergraduate Studies are responsible for the university's relations with local community colleges and for oversight of curricular policies related to student transfer into Temple. These offices assist in the evaluation and re-evaluation of transfer courses for GenEd, major, and elective credits at Temple, and interpret university transfer policies for students, faculty members, and academic advisors. (See Undergraduate Admissions regarding transfer admissions (p. 23).) Once accepted into the University, transfer students will be invited to an orientation session and encouraged subsequently to set up an appointment with a SSW academic advisor. Transfer students are expected to be majors in the program a minimum of two years and a summer in order to complete curricular requirements.

Administrators

Laura A. Siminoff, Dean, Ph.D., Johns Hopkins University
Bernie Newman, Department Chair, Ph.D., University of Pittsburgh
Cheryl Hyde, Director, M.S.W. Program, Ph.D., University of Michigan

Mission Statement

The School of Social Work, which is part of the College of Public Health, is dedicated to societal transformations to eliminate social, political, and economic injustices for poor and oppressed populations, and advance the quality of life for all through the following:

- Education emphasizing the discovery of knowledge, use of critical inquiry, and professional ethics to guide solution-seeking and action-taking to effect social change among professional social workers in front-line, supervisory, managerial, and other leadership positions.
- Research and scholarship to advance applied knowledge and generate evidence-based strategies to resolve problems occurring between people and their social environments at local, state, national, and global levels.
• Public service that aids the dissemination of knowledge and evidence-based strategies through collaborations and partnerships with communities, agencies, and organizations.

Goals
The goals of the School of Social Work are the following:

• preparation of ethical and competent social work practitioners and leaders who are committed to social and economic justice and to the eradication of barriers to the fullest development of human potential,
• provision of educational opportunities to a diverse population of students representative of the constituencies served,
• production of scholarship and research that contributes to the social work knowledge base, and
• engagement in service-related activities with relevant constituencies.

B.S.W. Curricular Objectives
By completion of their undergraduate studies, students will be able to

• apply skills and knowledge of generalist social work practice with systems of all sizes;
• understand human behavior from holistic and developmental perspectives that encompass dynamic interaction among social, political, cultural, economic, psychological, spiritual, and biological factors;
• critically select and apply theories and research findings to social work practice;
• understand and adhere to professional social work values and ethics;
• assess situations using knowledge about the effects of structural injustices based on race, class, gender, culture, sexual orientation, ability, age, and other forms of oppression;
• exercise self-awareness and reflection as part of the development of their professional and personal selves;
• engage in practice that enhances the capabilities of people to transform their lives and communities;
• communicate effectively verbally, non-verbally and in writing with agencies, advocates, legislators, policy makers, and people in client status;
• practice social work with a commitment to social and economic justice and the empowerment of individuals, families, groups, organizations, and communities;
• evaluate the effectiveness of their own practice;
• understand the relationship of historic social patterns, values, and institutional arrangements, recognizing their impact on social welfare policy and services and on the social work profession;
• use supervision and consultation to enhance their professional development and the delivery of services;
• understand the dynamics of human service organizations and know how to engage in productive organizational change; and
• understand how global issues affect local practice.

The B.S.W. Curriculum
The B.S.W. curriculum is organized so that courses scheduled to be taken later in the program assume, and build on, the knowledge and skill foundation provided in the General Education and social work courses taken earlier. For this reason, most social work courses designate successful completion (with a C- or better) of earlier courses as prerequisite to taking later courses. Additionally, the SSW requires that three of the social work courses required in each semester of the senior year—the research course, the seminar in social work practice, and the field practicum—be taken concurrently. This program of study for B.S.W. students has been carefully designed and approved by faculty. It is intended to provide students with a coherent, integrated, and high-quality learning experience.

Requirements for the Degree of Bachelor of Social Work (B.S.W.)

University Requirements
• All students are required to complete the university General Education (GenEd (p. 143)) curriculum.
  (Students who entered prior to fall 2011 should check with their advisor for the appropriate year and program requirements.
• All Temple students must take a minimum of two writing-intensive courses at Temple as part of the major. The specific writing-intensive courses required for this major are SSWU 3096 and SSWU 4396.

College Requirement
• All CPH students, including SSW students, must complete the College Core Course, HRPR 1001.

Clearance Requirements
Please note the Social Work program requires students to complete clinical/field education experiences at facilities both on and off the University campus. These placements will require criminal background checks, Act 33/34 clearances and perhaps a drug screen. The results of these requirements
may limit and potentially eliminate placement options which can, in turn, result in an inability to meet graduation requirements. Additionally, conviction of a misdemeanor, felony, or felonious or illegal act may prevent you from becoming credentialed and/or licensed to practice social work.

### School of Social Work Requirements

- Satisfactory completion of a minimum of 120 semester hours of credit.
- A minimum cumulative GPA of 2.00 overall and in the major.
- A grade of C- or higher is required in all courses satisfying GenEd and Social Work major requirements.

**Total Credit Hours: 85**

### Field Work Practice

A minimum of 400 hours in supervised field settings is required. Students are overseen by an M.S.W. (or B.S.W. with at least two years of experience). They are directly involved in professional tasks in the agency and in the community. This component of the educational program of study facilitates the
integration of classroom learning, particularly in the social work subject areas of human behavior, policy, practice, and research. Students apply what they are learning and receive feedback from both classroom and field instructors on their work. Field work practice consists of 10 credits of the 51 credits of professional social work courses specified above.

Some of the fields of practice in the five-county Philadelphia area in which majors do their field work are these:

- **Aging**: including adult service centers as well as assistance in a variety of public and private organizations with treatment and protective functions;
- **Children and Youth**: child abuse, foster care and adoption agencies, parenting and support services;
- **Community Organization/Planning**: public issues and policies, neighborhood services at settlements, Y’s, community centers;
- **Correctional/Justice**: probation, parole, prison, community rehabilitation organizations;
- **Developmental Disabilities**: community-living arrangements, day programs, other public and private functions;
- **Education**: schools and alternative education programs;
- **Family Services**: material aid, crisis intervention, ongoing counseling;
- **Health/Hospitals**: advising, counseling, direct service with and on behalf of patients; a variety of functions in hospitals and community health centers;
- **Legal**: public agencies assisting low-income population in matters relating to law, housing, and discrimination;
- **Mental Health**: small and large institutions, community-based units, public and private auspices;
- **Substance Abuse**: counseling and other direct service in a variety of settings, both public and private;
- **Violence and Domestic Issues**: domestic violence of all kinds, sexual assault, and child abuse, in a wide variety of settings.

### Suggested Academic Plan

#### Bachelor of Social Work

**Requirements for New Students starting in the 2015-2016 Academic Year**

Note: The symbols (F), (S), (SS1) or (SS2) after the course number indicates that the class is offered ONLY in the semester indicated:

(F) = offered only in fall semester  
(S) = offered only in spring semester  
(SS1) = offered only in first summer session  
(SS2) = offered only in second summer session

- Social Work Elective | 3

**Term Credit Hours** | 14

**Total Credit Hours:** 120-121

1. Refer to GenEd Science & Technology (p. 156) for information on a GS Waiver.
2. ECON 0858 satisfies the University GedEd U.S. Society requirement as well as SSW's Economics requirement.
3. 16 hour/week field practicum requirement.
In order to receive a Bachelor of Social Work degree, a student must complete a minimum of 120 semester hours, which includes the University General Education (GenEd (p. 143)) curriculum and the School of Social Work curriculum. A potential graduate must also hold a cumulative GPA of 2.00 or better (having received a C- or better in all social work courses), and meet any additional requirements, such as the Exit Interview.

Social Work Minor

The Social Work Minor is a great complement to majors such as criminal justice, psychology, education, pharmacy, and other allied disciplines.

The Social Work Minor introduces students to the knowledge, values, and skills necessary to

• comprehend the structures and functions of the field of social work;
• develop a more informed position on social policy issues;
• appreciate the economic, social, political, ethical and epistemological challenges that societies and their citizens face in responding to basic human needs;
• grasp the critical importance of social capital to communities and the larger society;
• become actively involved in helping to address social needs; and
• broaden and further enhance their professional career paths.

The Social Work minor consists of nine courses (23 credit hours), all of which are offered at the Main campus. The courses explore the following social work knowledge domains:

• Social policy development in historical, political, and economic context (SSWU 2003);
• Social problems and social policy analysis (SSWU 2004);
• Theories of human behavior within the context of the social environment (SSWU 3007);
• Helping processes across systems of all sizes (SSWU 3005, SSWU 3015, SSWU 3006, SSWU 3016);
• Verbal, non-verbal and written communication skills (SSWU 1002); and
• Institutional racism or group dynamics (SSWU 3096 or SSWU 3011).

Professional and faculty advisors in the school or college in which the student is currently majoring are available to help students interested in adding a social work minor to their program of study.

Introduction

Given the current pace of social and technological change in the world community, a firm grounding in the liberal arts is essential to one's prospects for success. Although recent trends in higher education highlight the proliferation of job-specific training, a well-rounded, liberal arts education is more relevant now than ever before. While highly specialized training and knowledge may prove helpful in landing one's first job, those who will build successful careers and lead us into the future will have a much broader, more transferable set of skills. Our graduates will be able to think critically while analyzing complex issues and developing creative solutions to problems that we have not yet imagined. The written and oral communication skills honed by a liberal arts program will allow our graduates to communicate their ideas concisely and effectively to both specialized and lay audiences. Working across disciplines to evaluate ideas and arguments throughout their college career, liberal arts graduates develop the technological and cultural literacy necessary to thrive in the global marketplace. In short, our leaders of the future will possess the skills and attributes that have long defined a liberal arts education.

In the College of Liberal Arts, our students learn how to learn by exploring a rich diversity of rigorous coursework in the humanities and social sciences, including anthropology, English, history, philosophy, sociology, religion, psychology and foreign languages. Many of our courses are taught in intimate, seminar-style settings that encourage students to engage our world-class faculty in meaningful discourse that expands world views and enhances analytical reasoning skills. Equally important is the flexibility afforded students within the liberal arts curriculum, which provides them with myriad opportunities to supplement their classroom education in meaningful ways by participating in study abroad programs, engaging in directed research, pursuing original scholarship through independent studies, and gaining valuable professional experience in internship programs. Taken together, these liberal arts experiences not only prepare students for rewarding careers, but for fulfilling lives as informed and engaged citizens of the world.
Accreditation

Departments and programs at Temple University are accredited by the Middle States Commission on Higher Education (www.msche.org (http://www.msche.org)). Individual departments and programs may carry additional accreditation by the official accreditation body for that discipline.

Special Programs

Professional Development

Patrick Gordon, Senior Professional Development Advisor
1810 Liacouras Walk, Suite 301
pgordon@temple.edu
(215) 204-7971

Elizabeth Anselmo, Professional Development Advisor
1810 Liacouras Walk, Suite 301
elizabeth.anselmo@temple.edu
(215) 204-7971

Given the rapidly-changing nature of the world economy, a degree in the liberal arts has never been more valuable. Our professional development advisors teach students in the liberal arts how they can best leverage their skills to prepare for careers in a broad array of industries, including government, non-profit, corporate, education, etc. We are committed to enhancing students’ professionalism and empowering students to present themselves successfully as candidates for internships and employment opportunities. We also work with students interested in preparing for graduate or professional school.

We provide an array of services to students in the College of Liberal Arts, including:

• Drafting and editing resumes
• Writing and revising cover letters
• Planning and preparing for graduate and professional school
• Developing effective strategies for finding internships and employment opportunities
• Building your personal brand and managing your online presence

In addition to working individually with students, our professional development advisors collaborate with faculty, administrators, and prospective employers to coordinate and host a number of career-related workshops and events, including:

• Information sessions
• Career fairs
• Employer visits
• Skill-building training workshops
• Alumni networking events

Affiliated Academic Courses

CLA 1002 Professional Development for Liberal Arts Majors (1 s.h.): Designed to guide students as they explore the transferability of the skills they have acquired in the liberal arts with an emphasis on the value of those skills in the marketplace. Students will learn how to search effectively for internship and career opportunities, communicate professionally, develop an application-ready résumé and prepare for networking and professional interviews.

CLA 2685 Internship (1 to 12 s.h.): Provides students with the opportunity to complete an internship for upper-level elective credit in the College of Liberal Arts. Interested students should meet with a professional development advisor and complete an internship contract.

First-Year Writing Program

www.cla.temple.edu/english/fywp/

1046 Anderson Hall

Shannon Walters, Director
215-204-1820
skw145@temple.edu

Rachael Groner, Associate Director
215-204-2212
rgroner@temple.edu
First-Year Writing includes two main 4-credit courses, ENG 0701 Introduction to Academic Discourse and ENG 0802 Analytical Reading and Writing. First-Year Writing also includes ENG 0711 and ENG 0812, which are alternative versions of ENG 0701 and ENG 0802 (respectively) designated especially for English as a Second Language (ESL) students. The ESL sections of all of our courses are equivalent in weight and credit to their direct counterparts.

Entering students are either placed into the 0701-0802 sequence, placed into 0802 only, or exempted from these courses entirely. Placement is based on a formula which takes into account the results of the placement exam, high school rank, and the SAT verbal score.

If a student places into ENG 0701/ENG 0711, he or she may not enroll in ENG 0802/ENG 0812 until ENG 0701/ENG 0711 is completed successfully, with a grade of C- or better. ENG 0802/ENG 0812 may not be taken for credit by students who have successfully completed ENG 0902 Honors Literature/Reading/Writing.

ENG 0802/ENG 0812 is a required course in the General Education program. Students are strongly advised to successfully complete ENG 0802/ENG 0812 before taking IH 0851 and IH 0852, any upper-level course in the College of Liberal Arts (all courses numbered 2000-4999), and all Writing Intensive courses (course numbers ending in -96, -97, and -98).

Students are advised to take the required three-course sequence of Analytical Reading and Writing, Mosaic I, and Mosaic II (IH 0851 and IH 0852) in order and in successive semesters.

emily.mears@temple.edu

The Intellectual Heritage Program offers a two-course sequence, IH 0851 Mosaic: Humanities Seminar I and IH 0852 Mosaic: Humanities Seminar II, which is part of the university General Education curriculum. Engaging with some of the rich, complex, and historically-significant texts that have shaped our culture, students build strong communication skills and intellectual curiosity. Students become familiar with some of the key concepts and moments in Western and other intellectual traditions.

Students are required to complete the General Education Curriculum. Transfer students should see their academic advisor for more information regarding their IH placement. Satisfactory completion of ENG 0802 is strongly advised prior to taking the Mosaic sequence. Honors versions of the Mosaic sequence are offered as IH 0951 and IH 0952, respectively.

**Study Abroad**

Undergraduates majoring in any liberal arts discipline may pursue a large variety of study abroad options. Temple University has campuses in Rome, Italy, and Tokyo, Japan. We offer programs in London, England, Oviedo, Spain, and exchange programs with universities in England, Germany, and Puerto Rico. Summer programs are offered in a number of countries, such as France, Germany, Ghana, Great Britain, India, Italy, Japan, and South Africa. In addition, CLA undergraduates can choose to study in non-Temple programs around the world.

Four advisors in CLA specialize in assisting students in planning their curriculum to take advantage of the study abroad option(s): Nicole Conley, Dina Malennikova, Jocelyn Tutrani, and Melissa Valdes. Students are urged to see an advisor about one year prior to their anticipated study abroad semester to determine their academic plan.

See the Office of Education Abroad and Overseas Campuses, 200 Tuttleman Learning Center or http://studyabroad.temple.edu/ for more information about study abroad options.

**University Honors Program**

The College of Liberal Arts participates in the university-wide honors program. Go to the University Honors Program (p. 51) section in this Bulletin for more information.
Departmental Honors Programs
Several departments in the College of Liberal Arts offer an Honors track for their majors. Students should consult the Bulletin information listed under the individual majors for eligibility, specific program requirements, and contacts.

Five Year BA/MA 4+1 Programs
Some departments in the College of Liberal Arts offer their high-achieving majors the opportunity to apply to their Master of Arts degree program during their junior year. Students admitted into these programs typically take up to 12 graduate credits that count towards both the BA and the MA degrees, leaving only one year of additional coursework beyond the BA to complete the MA program. In addition, students are not required to take the Graduate Record Examination, the standardized test most students take to gain entry to graduate school. The departments offering this option are: Criminal Justice and English. For more information on this program, consult your faculty advisor.

Temple Law Scholars Program
Paul Crowe, Director
7th floor Anderson Hall
215-204-8591
pcrowe@temple.edu

The Temple Law Scholars Program provides an opportunity for outstanding students to gain provisional admission to the Temple University Beasley School of Law at the same time they are accepted into the College of Liberal Arts. As Temple Law Scholars, students spend their undergraduate years in Temple's Honors Program, after which they enroll in the Beasley School of Law, leading to the JD degree. Scholars will take advantage of special opportunities, including internships, mock trial competitions, attendance at special events and lectures, and sitting in on law school classes.

The Temple Law Scholars Program is highly selective. To be considered, applicants must be accepted into the Honors Program. High class standing, high SAT scores, and superior letters of recommendation are expected, as is an articulate, thoughtful essay. In addition, other criteria used in the decision-making process include above-average maturity, community service, leadership, and a genuine commitment to the legal profession and service to others.

Application to the Temple Law Scholars Program takes place at the same time students apply to the College of Liberal Arts. The application materials include the Temple undergraduate admission application, the Temple Law Scholars application, a letter of recommendation, and an essay on a topic assigned by the Temple Law Scholars admissions committee. An interview may also be required. The deadline for receipt of all application materials is April 1. Applications received before March 1 will receive priority treatment.

Honor Societies and Awards for Achievement

Awards
During the graduation season in May, the Baccalaureate Awards Ceremony is held to honor seniors who have demonstrated outstanding academic performance and/or exceptional service to the college. Junior scholarship recipients are recognized at an annual event in the fall. These prizes are awarded competitively and are a testament to the excellence of the College of Liberal Arts undergraduates. For more information on awards offered for particular majors, see www.cla.temple.edu/awards-and-scholarships/, the web site for your department, or ask your faculty advisor about the awards nomination process.

Phi Beta Kappa
See the Honor Societies (p. 57) section of the Undergraduate Bulletin.

Student Association Information

Majors' Associations
Most of the departments in the College of Liberal Arts support student interest groups, clubs, and majors’ associations. These organizations provide opportunities for students from the individual disciplines of the liberal arts to meet one another and to extend the learning experience beyond the classroom. Some of these associations invite their alumni back to campus to connect with current undergraduates and talk with them about the wide range of career options open to liberal arts graduates.

Participation in the majors' associations has significant benefits. Active involvement cultivates skills in leadership, team work, cultural sensitivity, and public speaking, all of which are highly valued in the workplace. Students are strongly encouraged to participate in these organizations. For more information, see your department's website or faculty advisor.
Special Facilities

College of Liberal Arts - Information Technology (CLA IT)

The College of Liberal Arts offers cutting-edge technology and resources for students, faculty and staff. Our IT staff manages over 100 technology-enabled smart classrooms, more than 560 computer stations in both laboratory, kiosk, and classroom settings, in addition to a wireless network with 100% coverage in all CLA spaces.

www.cla.temple.edu/it/

Anderson Hall, Room 21
215-204-3213

Marc Getty, Director of Information Technology
marc.getty@temple.edu
215-962-5603

Rodney Holloway, Evening Manager, Computer Labs
R.T.Holloway@temple.edu

Crystal Schulz, Daytime Manager, Computer Labs
crystal.schulz@temple.edu

Computer Labs and Computer Classrooms

CLA IT maintains 11 computer classrooms ranging in size from 14 to 70 seats, plus a 100 seat public drop-in lab located in Anderson 21. For complete details, see www.cla.temple.edu/it/labs/.

Hours of Operation:

Fall/Spring Semesters and Study/Exam Days: All facilities are open 7:30 AM to 9:30 PM Monday through Thursday and until 7:30 PM on Fridays. The exceptions are Weiss 640 and both Tuttleman labs. Weiss 640 closes at 7:30 PM daily. For the Tuttleman labs hours, please visit the Writing Center web site (http://www.temple.edu/writingctr). There are no weekend hours.

Summer Sessions, Spring Break, and Winter Break: All facilities are open 8:00 AM to 7:30 PM Monday through Friday with the exception of the Tuttleman labs. For the Tuttleman labs hours, please visit the Writing Center web site (http://www.temple.edu/writingctr). There are no weekend hours.

Media Learning Center (MLC)

The Media Learning Center, a service of the College of Liberal Arts, is located within the Education Technology Center in Anderson Hall, Room AL21. The MLC provides audio, video, 16mm, slide, and printed materials for faculty use in the classroom. The center also provides facilities for students to view course related media.

www.cla.temple.edu/mlc/

Student Contact Information

On the department or academic program pages within this Bulletin, students will find contact information for departmental representatives (department chairs, undergraduate advisors, etc.) Other faculty contact information is available using the Cherry and White directory https://directory.temple.edu/ or by visiting the departmental web sites, located at the College of Liberal Arts home page: www.cla.temple.edu.

Faculty members keep regular office hours each semester, which are posted on syllabi and in the department offices.

Academic Policies & Regulations

University policies and regulations generally apply to all undergraduate students and provide a framework within which schools and colleges may specify further conditions or variations appropriate to students in their courses or programs.

Academic Residency Requirements

Upon transferring into the College of Liberal Arts, all students must complete at least 30 credits of coursework as a degree-seeking student, completing at least half of the courses required for any major, minor, or certificate program at Temple University.

In order to be considered for Latin honors (cum laude, magna cum laude, and summa cum laude), a student must complete a minimum of 60 credits at Temple University and meet the GPA requirements as set out in the University policy.
Course Levels
All College of Liberal Arts undergraduate courses are open to all students who have successfully completed appropriate course prerequisites and are divided into four categories:

- Preparatory courses numbered 0700-0799.
- General Education courses numbered 0800-0999.
- Upper-level courses numbered 2000-4999.

Courses Taken at Other Institutions
Degree-seeking Temple students must always petition for the prior approval of their dean or dean's designee to take courses at another institution. (Refer to Permission to Complete a Course at Another Institution after Matriculation (p. 98).) Petitions are available in the College of Liberal Arts Center for Academic Advising and Professional Development.

Dean's List
Each fall and spring semester, those undergraduates who have met the credit hour and academic criteria for their school or college are placed on the Dean's List. See the Dean's List (p. 92) policy for specific GPA and credit-hour requirements.

Declaration of Major
Students in the College of Liberal Arts must declare their major before completing 60 credits, including credits transferred from other institutions. Undeclared students with 45 or more credits are required to meet with an advisor in the Center for Academic Advising and Professional Development before registering.

Foreign Language Course Placement Policy
Students who have studied a foreign language in the four years prior to admission to Temple must take a placement exam if they wish to continue in that language. If a period of more than four years has elapsed between a student’s graduation from high school and admission to college, s/he is eligible to enroll in the first level of the language s/he studied in high school.

If a student enrolls in a course level lower than the placement score indicates, s/he will not receive graduation credit for the course or will be dropped from the course by the College of Liberal Arts. If a student wishes to receive credit for a course lower than that indicated by the placement exam, s/he must receive permission from the department chair or program coordinator for that language.

Heritage speakers (also known as native speakers) of a foreign language taught by Temple University must meet with the language program coordinator or department chairperson to assess their readiness and course placement in the language skills sequence. Students will not receive credit for courses lower than their placement indicates. A student with pre-existing language skills (family background, travel or study in a foreign country, participation in non-credit summer language institutes, etc.) who then enrolls in lower division courses in that same language will not receive graduation credit for the course and may be dropped from the course by the College of Liberal Arts.

Foreign Language Regression in Coursework Policy
- Students who have completed 4000 level coursework may enroll in courses at the 3000 level, but not at the 1000 or 2000 level.
- Students who have completed the 3000 level may enroll in courses at the 2000 level, but not at the 1000 level.
- Students who have completed a 2000 level course may not enroll at the 1000 level.
- General Education courses at the 0800 and 0900 levels are not language skills courses and are open to all students.

If a student seeks permission for an exception to the Regression policy, he or she should discuss the request with the program coordinator for the language.

Intra-University Transfer
Students who wish to Intra-University Transfer (IUT) into the College of Liberal Arts from other colleges and schools at Temple must have at least a 2.0 GPA in the intended major and overall. Students will not be permitted to IUT as undeclared majors if they have completed, or are in the process of completing, 60 or more credits.

Graduation Application Process
During the semester immediately prior to the semester in which students will complete their degree requirements, they must apply for graduation by completing the on-line graduation application available through Self Service Banner. Students planning to graduate in August or January must apply by April 1 and students planning to graduate in May must apply by November 1.
All applications received by the deadlines noted above will be reviewed by academic advisors in advance of the next semester and students will be notified of any necessary schedule revisions to fulfill remaining requirements.

Students are responsible for ensuring their intended graduation date is up-to-date by contacting their advisor.

Placement Tests
All incoming freshmen must take diagnostic English, mathematics, and foreign language placement tests. Transfer students who have not completed ENG 0802 or a college-level math course are also required to take placement examinations. The results of these tests determine if students are required to enroll in introductory composition and mathematics courses. Students assigned to ENG 0701/ENG 0711 must register each semester for that course until the requirement is completed. Only upon successful completion of ENG 0701/ENG 0711 can such students enroll in ENG 0802/ENG 0812. Students assigned to courses designed to remedy deficiencies in mathematics are required to complete those courses (MATH 0701 or MATH 0702) before enrolling in the mathematics component of the University General Education Program (GenEd (p. 143)). Incoming students must also take a foreign language placement examination if they plan to continue a language previously studied or if they wish to place out of the foreign language requirement.

Plagiarism & Academic Cheating
Plagiarism and academic cheating are unacceptable in College of Liberal Arts courses. The development of independent thought and a respect for the thoughts of others is essential to intellectual growth. The penalty for plagiarism or cheating as a first offense is normally an F in the course in which the offense is committed. In such cases, the instructor will write a report to the dean. The CLA Grievance Committee will adjudicate appeals made by students and serious cases, or repeat offenses, referred to the committee by an instructor or the dean. The dean may recommend suspension or expulsion from the university when warranted. Instructors may also refer the offense to the University Disciplinary Committee (UDC) for adjudication.

The prohibition against plagiarism and cheating is intended to foster this independence and respect. For more information, see Academic Honesty (p. 36) under Student Responsibilities.

Academic Standing, Warning, Probation, Dismissal, & Reinstatement
To maintain academic good standing in the university, a student enrolled in an associate or baccalaureate degree-seeking program must achieve both a semester grade point average and a cumulative grade point average of at least a 2.0. See the University policy on Academic Standing (http://policies.temple.edu/getdoc.asp?policy_no=02.10.11) for details on academic warning, academic probation, academic dismissal and reinstatement. There is a related policy on Academic Forgiveness (http://policies.temple.edu/getdoc.asp?policy_no=02.10.17).

Withdrawal from Classes
During the first two weeks of the fall or spring semester or summer sessions, students may drop one or more courses with no record of the class appearing on the transcript. In weeks three through nine of the fall or spring semester, or during weeks three and four of the summer sessions, students may withdraw with the assistance of an academic advisor—or by using the withdrawal function in Self-Service Banner (SSB). Instructors’ signatures are not required to withdraw. The course will be recorded on the transcript with the notation of “W,” indicating that the student withdrew. After week nine of the fall or spring semester, or week four of summer sessions, students may not withdraw from courses.

For the complete policy, please refer to the Academic Policies (p. 102) section of this Bulletin.

Requirements for the Baccalaureate Degree

Credit Hour Requirements
Bachelor of Arts and Bachelor of Science degrees in the College of Liberal Arts require a minimum of 123 credits, distributed according to the university and college policy outlined below, with at least a 2.0 cumulative grade point average (GPA). A minimum 2.0 GPA must also be maintained in College of Liberal Arts and College of Science and Technology (hereafter “CLA/CST”) coursework and in the major.

To earn a CLA baccalaureate degree, a student must complete a minimum of 123 credits, including: 90 credits in CLA/CST courses, 45 credits of which must be at the upper level (numbered 2000-4999). Of that, 6 credits must be outside the student’s major division (e.g. Social Sciences or Humanities).

A maximum of 9 credits of Independent Study can be applied to the Bachelor's degree. This does not include internship, externship, or research credits.

Degree Eligibility
The College of Liberal Arts does not award baccalaureate degrees to students who have already completed an accredited first Bachelor’s, Master’s, or Ph.D. degree, regardless of when the degree was completed.

University Requirements
All students entering an undergraduate degree program are required to complete the university General Education (GenEd (p. 143)) curriculum.
All students must take a minimum of two writing-intensive courses at Temple University as designated by their major requirements. The specific writing-intensive courses required for each major are listed on the individual program pages and are identified by “WI.”

**Foreign Language/Global Studies Requirement for Bachelor of Arts Students**

**NOTE:** This is *not* required for students majoring in the Bachelor of Science in Neuroscience: Systems, Behavior, & Plasticity program.

1. All B.A. students complete the second level of a foreign language;
2. All B.A. students must complete at least one course from the GenEd Global/World Society category; and
3. All B.A. students must complete one of the following options:

   - Third level of a foreign language;
   - Demonstrated proficiency in a foreign language;
   - A second General Education Global/World Society course;
   - Study Abroad at an approved program; or
   - Take one Global Studies course from the following list:

*(Please note: The Foreign Language/Global Studies requirement does not pertain to students pursuing the B.S. in Neuroscience. Neuroscience majors under the GenEd program must complete one Global/World Society course.)*

**Major**

Students must also complete the requirements of a major. The minimum acceptable grade in a course taken to fulfill major requirements is a "C-," though students need a 2.0 GPA overall in major coursework in order to graduate. At least half of the coursework required for a major must be taken at Temple University.

Students are permitted to double-major (both inside CLA and across schools and colleges) but Temple University does not permit transcription of a third major.

Students are encouraged to declare their major as soon as possible, and university policy requires that a major must be declared by the time a student has earned 60 credits.

Major requirements are determined by the effective semester of their declaration. The Center for Academic Advising and Professional Development is responsible for making this assignment and informs the student via e-mail.

Students who wish to declare or change their major or minor should consult the Center for Academic Advising and Professional Development at 1810 Liacouras Walk, Suite 301.

**B.A. and B.S. majors are offered in the divisions of the Humanities and the Social Sciences.**

- **Humanities**: English, French, German, Greek and Roman Classics, Italian, Japanese (only available at our Japan campus), Philosophy, Religion, and Spanish (includes tracks in Language, Literature and Linguistics, Professional Studies, Education)
- **Social Sciences**: African American Studies, American Studies, Anthropology (includes tracks in Human Biology and Visual Anthropology), Asian Studies, Criminal Justice, Economics, Environmental Studies, Geography and Urban Studies, Global Studies, History, Jewish Studies, Latin American Studies, Mathematical Economics, Neuroscience: Systems, Behavior and Plasticity (B.S.), Political Science, Psychology, Sociology (includes track in Sociology of Health), and Women's Studies

**Upper-level Distribution Requirements**

All B.A. and B.S. students in the College of Liberal Arts must complete upper-level distribution requirements by taking two upper-level (numbered 2000-4999) CLA courses outside the curriculum division of the major (or upper-level College of Science and Technology courses) as stated above. Students who have double majors in two different divisions automatically satisfy the distribution requirement.

*Note: The Humanities Division has been expanded to include upper-level courses in Art History from the Tyler School of Art.*

**Military Science Courses**

Undergraduate students in the College of Liberal Arts whose degree programs allow for free electives may apply up to 12 credits of military science courses at the 3000 and 4000 levels in Aerospace Studies (Air Force ROTC), Military Science (Army ROTC), and Naval Science (Navy ROTC).

**Courses Inapplicable to Graduation**

Students will not receive credits for lower-level courses after successful completion of higher-level courses in sequenced courses of study. This only applies to the First Year Writing sequence in English (0701-0802), and all courses in Mathematics and Foreign Languages. For example, after passing a SPAN 1002 course, a student will not receive credits for SPAN 1001.

**Credit/No Credit**

During the junior and senior years, any College of Liberal Arts student who is in good standing and taking a minimum of 12 semester hours may elect to take one course each semester on a Credit/No Credit basis, except for courses that count toward major, minor, GenEd, or distributional requirements. Application must be made at the Center for Academic Advising and Professional Development during the first two weeks of a fall or spring semester course and during the first three days of a first or second summer session course.
Special Major & Minor Requirements

Interdisciplinary Major

Rather than major in an existing department or program, students may apply for a major in Interdisciplinary Studies. The proposed major should consist of coursework totaling at least 36 semester hours and be justified in terms of some thematic unit of cohesive rationale. The program must not closely resemble any major currently available in the College of Liberal Arts.

The proposed major program may include courses outside of the College of Liberal Arts, but at least 24 semester hours must be in upper-level liberal arts or science courses. The student's proposal must be sponsored by two faculty members from different departments, at least one of whom must be in the College of Liberal Arts. Approval for the program must be obtained from the College of Liberal Arts’ Center for Academic Advising and Professional Development prior to the initiation of the last 60 semester hours of the degree.

Honors Interdisciplinary Major

Students in the University Honors Program may apply for a College of Liberal Arts Honors Interdisciplinary Major. They must complete the degree requirements of the B.A. in the College of Liberal Arts and the requirements for the Interdisciplinary Major described above as well as the requirements for the University Honors Program. Approval for this program must also be obtained from the University Honors Committee prior to the initiation of the last 60 semester hours of the degree.

In addition, the proposed major program should include submission of an acceptable honors thesis to the University Honors Oversight Committee.

Minor

Students may also choose to complete the requirements for a minor. The minimum acceptable grade in a course taken to fulfill minor requirements is “C-,” though students need a 2.0 GPA in the minor in order to have it awarded at graduation. At least half of the courses taken by a student to fulfill the minor must be taken at Temple. Students may declare a minor at the Center for Academic Advising and Professional Development, 1810 Liacouras Walk, Suite 301. The College of Liberal Arts offers minors in:

- African American Studies
- American Studies
- Ancient Mediterranean Studies (see Classics)
- Anthropology (General)
- Anthropology (Visual)
- Arabic
- Asian-American Studies
- Asian Studies
- Chinese
- Classics
- Clinical and Health Psychology
- Cognitive Neuroscience (see Psychology)
- Criminal Justice
- Economics
- English
- Environmental Studies
- French
- Geography and Urban Studies
- German
- Global Studies
- History
- Italian
- Japanese
- Jewish Studies
- Latin American Studies
- Lesbian, Gay, Bisexual and Transgender Studies (LGBT)
- Neuroscience Research
- Philosophy
- Political Science
- Portuguese
Certificates of Specialization

Students may choose to complete the requirements for an additional certificate of specialization. At least half of the courses taken by a student to fulfill a certificate of specialization must be taken at Temple. Students may declare a certificate in the Center for Academic Advising and Professional Development, 1810 Liacouras Walk, Suite 301. Certificates of specialization are available in the following programs:

- Asian Business and Society (see Asian Studies)
- Foreign Languages: Arabic, Chinese, French, German, Italian, Japanese, Spanish (see departments)
- Geographic Information Systems (see Geography and Urban Studies)
- Health Research (see Sociology)
- Jewish Secular Studies (see Jewish Studies)
- Latin American Studies Semester (see Spanish)
- Management Career (see Economics)
- Political Economy (see Economics and Political Science)
- Spanish and Latin American Studies for Business (see Spanish)
- Spanish and Latino Studies for the Health and Human Services Professions (see Spanish)
- Women's Studies (see Women's Studies)
- Writing (see English)

Academic Advising

Center for Academic Advising and Professional Development
1810 Liacouras Walk, Suite 301
215-204-7971
claaac@temple.edu

www.cia.temple.edu/advising

The Center for Academic Advising and Professional Development in the College of Liberal Arts helps students plan curricula, choose majors, make vocational and post-graduate plans, and resolve a variety of academic matters. Services are provided by a staff of full-time professional advisors. The Center informs students about the results of placement testing and assignment into corresponding courses. Monitoring of academic progress and graduation clearance is also the responsibility of the Advising Center. Through individual appointments and group workshops, the Center offers the following services:

- New Student Orientation.
- Advising and registration assistance for all students in the College of Liberal Arts. Students enrolled in the University Honors Program also receive advising in the Honors Program Office in Tuttleman Learning Center, Suite 201. Students are strongly encouraged to seek faculty advising in their major department.
- It is recommended, and in some cases required, that students consult with an advisor prior to registration. The advisor will review the proposed coursework and inform students of the requirements for graduation. In addition, the advisor helps students achieve breadth in their curriculum and provides other needed assistance.
- Academic advising provides an opportunity for students to develop a meaningful education plan compatible with their life goals. Students can also meet with advisors to discuss a variety of academic concerns and identify solutions. Students on academic probation or experiencing academic difficulty work with advisors to learn strategies for overcoming the obstacles to success.
- Intra-University Transfer (IUT) Advising for students changing programs and moving into the College of Liberal Arts from other schools and colleges within Temple. During mandatory group advising sessions, students transferring to Liberal Arts learn about collegial degree requirements, policies and procedures, and complete the Change of Program form.
- Approving special requests including: leave of absence (p. 97); academic forgiveness (http://policies.temple.edu/getdoc.asp?policy_no=02.10.17); course repeats (http://policies.temple.edu/getdoc.asp?policy_no=02.10.12); re-enrollment at the University (http://www.temple.edu/vpus/documents/request_to_reenroll.pdf); permission to take courses elsewhere (http://www.temple.edu/vpus/documents/permission_courses_elsewhere.pdf); registration overload (p. 82); credit/no-credit (p. 92) option for free electives; and other questions regarding University or College policies (p. 81). (Click the links to be directed to more information on specific policies.)
All academic advisors are trained to evaluate information carefully to give students the best possible advice. **Primary responsibility for course selection and degree completion rests with the student.** Every student must be aware of the requirements of his or her degree and should collaborate with an advisor regularly to ensure timely completion of his or her program.

**Department-Based Advisors**

All departments in the College of Liberal Arts have designated faculty advisors, undergraduate chairs, or embedded professional advisors, with whom students can discuss the requirements of their major, minor, and/or certificate programs. For a listing of CLA faculty advisors, consult: www.cla.temple.edu/advising/departmental/.

**Student Grievance Procedures**

Title IX of the Educational Amendments Act of 1972 requires that each college or university establish due process for the resolution of academic grievances. This is to protect students from prejudiced and capricious academic evaluation. All undergraduate students enrolled in the College of Liberal Arts have a right to appeal grades which they deem unfair and unreasonable. The student must provide evidence indicating a mistake, fraud, or bad faith on the part of an instructor. Students will not be allowed to grieve a grade unless it is accompanied by such evidence.

Students should first contact their instructor to discuss the grade(s) in question, and if the matter cannot be resolved at that level, students are then urged to talk with the chairperson for the department in which this course was given. Chairperson information is available in this publication. A student must initiate the first stage of an academic grievance by the dates in the College of Liberal Arts Grievance Procedure, available at www.cla.temple.edu/students/undergraduate/grievances/.

For more information, students should contact the college’s Grievance Officer, Amanda Gibson, at gibson@temple.edu or 215-204-8504.

**Non Academic Grievances**

Students may have grievances that are not academic in nature. Such grievances should be directed to other offices on campus, which may include the Office of the Dean of Students, the Equal Opportunity Compliance office, Office of University Housing and Residential Life, and other units on campus. Students unsure as to where to proceed with a non-academic grievance should consult either with the Office of the Dean of Students or the college’s Center for Academic Advising and Professional Development.

**Pre-Law Advising**

**Preparation for the Study of Law**

All law schools accept the degree of Bachelor of Arts as fulfillment of their requirements for admission. The Pre-Legal Education Committee of the Association of American Law Schools and the Temple University School of Law stress the importance of a well-rounded education. Liberal arts majors are considered excellent preparation for law school. Although Temple University does not have a specific major in Pre-Law, we do offer specialized advising for students interested in applying to law school, as well as majors in challenging disciplines that will help students hone their critical thinking, analytical, and communication skills. Since the legal profession makes extensive use of both the written and spoken English language as professional tools, the law student should have extensive preparation in English in undergraduate courses. Because a large part of a lawyer’s work requires problem solving and sound judgment, students should take courses that help develop creative power in thinking. The study of law, furthermore, rests upon a broad knowledge of western civilization, including its political, economic, and social institutions; hence, the student preparing for law should schedule courses which afford this broad background. Some law schools also recommend two semesters of accounting. After selecting a field of concentration, the student schedules courses in consultation with both the advisor in the area of concentration and with the pre-law advisor in the Center for Academic Advising and Professional Development of the College of Liberal Arts.

**Courses of Special Interest to Pre-Law Students**

While no specific undergraduate courses or majors are required for admission to accredited law schools, pre-law students are advised to select courses and programs of study that are intellectually challenging, while helping to develop necessary skills and knowledge.

To develop the communications skills of reading and comprehension, expository writing, and speaking:

PHIL 1196  Introduction to Philosophy  3
PHIL 2121  Introduction to Ethical Theory  3
STRC 3336  Argumentation  3

Computer Science and Mathematics

Natural Science

Courses that are "law-related" because they either require reading of law cases or concern the study of particular legal issues are listed below for the convenience of interested students. Law school admissions officials prefer that pre-law students take very few such courses, believing that the teaching of law more appropriately belongs in the province of the law school. It may be useful, however, for students who are uncertain about attending law school to test their level of interest by selecting one or more of the following courses in the College of Liberal Arts:

AMST 3033  Courtroom in American Society  3
CJ 2501  Introduction to Criminal Law  3
CJ 3201  The American Jury System  3
CJ 3502  Criminal Procedure: Prosecution & Adjudication  3
HIST 2105  Race and the U.S. Constitution  3
PHIL 1062  Morality and the Law  3
PHIL 2154  Political Philosophy  3
PHIL 3243  Philosophy of Law  3
POLS 3121  American Constitutional Principles I  3
POLS 3123  American Constitutional Principles II: Civil Rights in America  3
POLS 3411  Classical Political Philosophy  3
SOC 3243  Social Movements and Conflict  3
WMST 4004  Women and Criminal Justice  3

Since most law schools require applicants to submit the score earned on the Law School Aptitude Test, administered periodically by the Law School Admissions Service, students planning to study law should consult the pre-law advisor prior to the senior year to determine whether the school to which they plan to apply will require such a test and to determine the dates when such examinations are given. Prospective law students should consult the pre-law advisor about requirements for admission to law school, law school scholarship assistance, and opportunities in the legal profession. To satisfy statutory requirements, early in their senior year, prospective law students should consult the pre-law advisor concerning the legal requirements for practicing law in the state in which the student desires to study and practice.

Phi Alpha Delta Law Fraternity, International

Students interested in College of Liberal Arts pre-law studies are encouraged to join Phi Alpha Delta. Its pre-law program assists "undergraduate students to make an 'informed choice' in selecting law as a career, deciding which law school to attend, and in preparing for the rigors of law school."

Phi Alpha Delta was formed "to advance the ideals of liberty and equal justice under law; to stimulate excellence in scholarship; to inspire the virtues of compassion and courage; to foster integrity and professional competence; to promote the welfare of its members; and to encourage their moral, intellectual, and cultural advancement." For more information about Phi Alpha Delta and College of Liberal Arts pre-law society, please contact Dr. Paul Crowe, pre-law advisor, at 215-204-8591 or pcrowe@temple.edu.

Faculty

Go to the College of Liberal Arts web site at www.cla.temple.edu and click on the individual department for a list of faculty in that department. See also https://directory.temple.edu/.

Zain Abdullah, Associate Professor, Department of Religion, College of Liberal Arts; Ph.D., The New School for Social Research.

Carolyn T. Adams, Professor Emerita, Department of Geography and Urban Studies, College of Liberal Arts; Ph.D., Washington University.
Howard Addison, Assistant Professor (Teaching/Instructional), Department of Intellectual Heritage, College of Liberal Arts; Ph.D., Graduate Theological Foundation.

Hiram Aldarondo, Associate Professor, Department of Spanish and Portuguese, College of Liberal Arts; Ph.D., University of Chicago.

Joseph D. Alkus, Instructor (Teaching/Instructional), Department of Criminal Justice, College of Liberal Arts; M.S., National Louis University.

David Allen, Associate Professor (Teaching/Instructional), Department of Sociology, College of Liberal Arts; Ph.D., University of California Berkeley.

Lauren B. Alloy, Professor, Department of Psychology, College of Liberal Arts; Ph.D., University of Pennsylvania.

Rebecca T. Alpert, Professor, Department of Religion, College of Liberal Arts; Ph.D., Temple University.

Michael Altimore, Associate Professor (Teaching/Instructional), Department of Sociology, College of Liberal Arts; Ph.D., University of Iowa.

Elizabeth Alvarez, Assistant Professor (Teaching/Instructional), Department of Intellectual Heritage, College of Liberal Arts; Ph.D., University of Chicago Divinity School.

Nilgün Anadolu-Okur, Associate Professor, Department of African American Studies, College of Liberal Arts; Ph.D., Hacettepe University.

Max Andrucki, Assistant Professor (Teaching/Instructional), Department of Geography and Urban Studies, College of Liberal Arts; Ph.D., University of Leeds.

Kevin T. Arceneaux, Associate Professor, Department of Political Science, College of Liberal Arts; Ph.D., Rice University.

Molefi Kete Asante, Professor, Department of African American Studies, College of Liberal Arts; Ph.D., University of California Los Angeles.

Alira Ashvo-Munoz, Assistant Professor (Teaching/Instructional), Department of Spanish and Portuguese, College of Liberal Arts; Ph.D., University of Texas at Austin.

Philip Atkins, Assistant Professor (Teaching/Instructional), Department of Philosophy, College of Liberal Arts; Ph.D., University of California Santa Barbara.

Kathleen Auerhahn, Associate Professor, Department of Criminal Justice, College of Liberal Arts; Ph.D., University of California Riverside.

James D. Bachmeier, Assistant Professor, Department of Sociology, College of Liberal Arts; Ph.D., University of California Irvine.

Marcia B. Bailey, Assistant Professor (Teaching/Instructional), Department of Intellectual Heritage, College of Liberal Arts; Ph.D., Colgate Rochester Crozer Divinity.

Debra Bangasser, Assistant Professor, Department of Psychology, College of Liberal Arts; Ph.D., Rutgers University.

Steven R. Belenko, Professor, Department of Criminal Justice, College of Liberal Arts; Ph.D., Columbia University.

Jamal Benin, Instructor (Teaching/Instructional), Department of Intellectual Heritage, College of Liberal Arts; M.A., Temple University.

Paul Benzon, Assistant Professor (Teaching/Instructional), Department of Writing Program, College of Liberal Arts; Ph.D., Rutgers University.

Daniel W. Berman, Associate Professor, Department of Greek and Roman Classics, College of Liberal Arts; Ph.D., Yale University.

Lila Corwin Berman, Associate Professor, Department of History, College of Liberal Arts; Ph.D., Yale University.

Susan Bertolino, Instructor (Teaching/Instructional), Department of Intellectual Heritage, College of Liberal Arts; M.A., University of Chicago.

Kathleen A. Biddick, Professor Emerita, Department of History, College of Liberal Arts; Ph.D., University of Toronto.

Marcus Bingenheimer, Assistant Professor, Department of Religion, College of Liberal Arts; Dr.Phil., Wurzburg University.

Erwin A. Blackstone, Professor, Department of Economics, College of Liberal Arts; Ph.D., University of Michigan.

Khalid A. Y. Blankinship, Associate Professor, Department of Religion, College of Liberal Arts; Ph.D., University of Washington.

Michael L. Bogmann, Associate Professor, Department of Economics, College of Liberal Arts; Ph.D., Cornell University.

Aryeh I. Botwinick, Professor, Department of Political Science, College of Liberal Arts; Ph.D., Princeton University.

Gary W. Bowman, Associate Professor, Department of Economics, College of Liberal Arts; Ph.D., Carnegie Mellon University.

Lucy Bregman, Professor, Department of Religion, College of Liberal Arts; Ph.D., University of Chicago Divinity School.
Lisa A. Briand, Assistant Professor, Department of Psychology, College of Liberal Arts; Ph.D., University of Michigan.

Sheldon R. Brivic, Professor, Department of English, College of Liberal Arts; Ph.D., University of California Berkeley.

Seth C. Bruggeman, Associate Professor, Department of History, College of Liberal Arts; Ph.D., College of William and Mary.

Andrew Buck, Professor Emeritus, Department of Economics, College of Liberal Arts; Ph.D., University of Illinois.

Sarah Sunn Bush, Assistant Professor, Department of Political Science, College of Liberal Arts; Ph.D., Princeton University.

Gregory Byala, Assistant Professor (Teaching/Instructional), Department of Writing Program, College of Liberal Arts; Ph.D., Yale University.

Michelle D. Byng, Associate Professor, Department of Sociology, College of Liberal Arts; Ph.D., University of Virginia.

Niambi Carter, Assistant Professor, Department of African American Studies, College of Liberal Arts; Ph.D., Duke University.

Sanjoy Chakravorty, Professor, Department of Geography and Urban Studies, College of Liberal Arts; Ph.D., University of Southern California.

Colin Chamberlain, Assistant Professor, Department of Philosophy, College of Liberal Arts; Ph.D., Harvard University.

Isabelle Chang, Assistant Professor (Teaching/Instructional), Department of Psychology, College of Liberal Arts, Temple University.

Linda Chavers, Instructor (Teaching/Instructional), Department of Intellectual Heritage, College of Liberal Arts; Ph.D., Harvard University.

Jason M. Chein, Associate Professor, Department of Psychology, College of Liberal Arts; Ph.D., University of Pittsburgh.

Eunice Y. Chen, Assistant Professor, Department of Psychology, College of Liberal Arts; Ph.D., University of Sydney.

Rujuta P. Chincholkar-Mandelia, Assistant Professor (Teaching/Instructional), Department of Women's Studies, College of Liberal Arts, Temple University.

Fletcher Chmara-Huff, Assistant Professor (Teaching/Instructional), Department of Geography and Urban Studies, College of Liberal Arts; Ph.D., Ohio State University.

Daniel Chomsky, Assistant Professor (Teaching/Instructional), Department of Political Science, College of Liberal Arts; Ph.D., Northwestern University.

Steven E. Cole, Associate Professor, Department of English, College of Liberal Arts; Ph.D., University of Washington.

Bette Collier-Thomas, Professor, Department of History, College of Liberal Arts; Ph.D., George Washington University.

Gretchen A. Condran, Associate Professor, Department of Sociology, College of Liberal Arts; Ph.D., University of Pennsylvania.

Whitley Cooke, Associate Professor (Teaching/Instructional), Department of Writing Program, College of Liberal Arts; Ph.D., University of Oklahoma.

Norma Corrales-Martín, Assistant Professor (Teaching/Instructional), Department of Spanish and Portuguese, College of Liberal Arts; Ph.D., Ohio University.

Lindsay Craig, Assistant Professor (Teaching/Instructional), Department of Philosophy, College of Liberal Arts; Ph.D., University of Cincinnati.

Nyron Crawford, Assistant Professor, Department of Political Science, College of Liberal Arts; Ph.D., Ohio State University.

Paul Crowe, Associate Professor (Teaching/Instructional), Department of Philosophy, College of Liberal Arts; Ph.D., Catholic University of Louvain.

Alicia Aileen Cunningham-Bryant, Assistant Professor (Teaching/Instructional), Department of Intellectual Heritage, College of Liberal Arts; Ph.D., Yale University.

Beth K. Curran, Associate Professor (Teaching/Instructional), Department of French, German, Italian and Slavic, College of Liberal Arts; Ph.D., Rutgers University.

Roman A. Cybriwsky, Professor, Department of Geography and Urban Studies, College of Liberal Arts; Ph.D., Pennsylvania State University.

Amanda Czerniawski, Assistant Professor (Teaching/Instructional), Department of Sociology, College of Liberal Arts; Ph.D., Columbia University.

Tirthatanmoy Das, Associate Professor (Teaching/Instructional), Department of Economics, College of Liberal Arts; Ph.D., State University of New York at Binghamton.

Heath Fogg Davis, Associate Professor, Department of Political Science, College of Liberal Arts; Ph.D., Princeton University.

Barbara A. Day-Hickman, Associate Professor, Department of History, College of Liberal Arts; Ph.D., University of California Irvine.
Richard E. Deeg, Professor, Department of Political Science, College of Liberal Arts; Ph.D., Massachusetts Institute of Technology.

Kevin J. Delaney, Professor, Department of Sociology, College of Liberal Arts; Ph.D., State University of New York Stony Brook.

Samuel R. Delany, Professor, Department of English, College of Liberal Arts; Ph.D., The Bronx High School of Science.

John A. Dern, Associate Professor (Teaching/Instructional), Department of Intellectual Heritage, College of Liberal Arts; Ph.D., Lehigh University.

Dimitrios I. Diamantaras, Associate Professor, Department of Economics, College of Liberal Arts; Ph.D., University of Rochester.

Nguyen Thi Dieu, Associate Professor, Department of History, College of Liberal Arts; Ph.D., Aix-en-Provence.

Kenneth M. Dossar, Assistant Professor (Teaching/Instructional), Department of Intellectual Heritage, College of Liberal Arts; Ph.D., Temple University.

Myrna Douzjian, Assistant Professor (Teaching/Instructional), Department of Intellectual Heritage, College of Liberal Arts; Ph.D., University of California Los Angeles.

Hope N. Doyle, Associate Professor (Teaching/Instructional), Department of Spanish and Portuguese, College of Liberal Arts; Ph.D., University of Texas at Austin.

Deborah A. G. Drabick, Associate Professor, Department of Psychology, College of Liberal Arts; Ph.D., State University of New York Stony Brook.

Jayne Kribbs Drake, Associate Professor, Department of English, College of Liberal Arts; Ph.D., Pennsylvania State University.

Douglas Duckworth, Assistant Professor, Department of Religion, College of Liberal Arts; Ph.D., University of Virginia.

William C. Dunkelberg, Professor Emeritus, Department of Economics, College of Liberal Arts; Ph.D., University of Michigan.

Rachel Blau DuPlessis, Professor Emerita, Department of English, College of Liberal Arts; Ph.D., Columbia University.

Jaime Duran, Assistant Professor (Teaching/Instructional), Department of Spanish and Portuguese, College of Liberal Arts; Ph.D., Temple University.

Michael M. Eisman, Associate Professor, Department of History, College of Liberal Arts; Ph.D., University of Pennsylvania.

David B. Elesh, Associate Professor, Department of Sociology, College of Liberal Arts; Ph.D., Columbia University.

Lauren Ellman, Assistant Professor, Department of Psychology, College of Liberal Arts; Ph.D., University of California Los Angeles.

Eugene Ericksen, Professor Emeritus, Department of Sociology, College of Liberal Arts; Ph.D., University of Michigan.

Julia Ericksen, Professor Emerita, Department of Sociology, College of Liberal Arts; Ph.D., University of Pennsylvania.

Rosario R. Espinal, Professor, Department of Sociology, College of Liberal Arts; Ph.D., Washington University-St. Louis.

Jamie J. Fader, Assistant Professor, Department of Criminal Justice, College of Liberal Arts; Ph.D., University of Pennsylvania.

Mohsen Fardmanesh, Associate Professor, Department of Economics, College of Liberal Arts; Ph.D., Yale University.

Paul Farnsworth, Professor, Department of Anthropology, College of Liberal Arts; Ph.D., University of California Los Angeles.

Robert L. Fauber Jr., Associate Professor, Department of Psychology, College of Liberal Arts; Ph.D.

Daniel Featherston, Assistant Professor (Teaching/Instructional), Department of Writing Program, College of Liberal Arts; Ph.D., University of Arizona.

Barbara Ferman, Professor, Department of Political Science, College of Liberal Arts; Ph.D., Brandeis University.

Kenneth Finkel, Professor (Teaching/Instructional), Department of American Studies, College of Liberal Arts; M.A., Temple University.

K. Orfeo Fioretos, Associate Professor, Department of Political Science, College of Liberal Arts; Ph.D., Columbia University.

Alexa Firat, Assistant Professor (Teaching/Instructional), Department of Asian and Middle Eastern Languages and Studies, College of Liberal Arts; Ph.D., University of Pennsylvania.

Ariane Fischer, Assistant Professor (Teaching/Instructional), Department of Intellectual Heritage, College of Liberal Arts; Ph.D., George Washington University.

Talissa Ford, Assistant Professor, Department of English, College of Liberal Arts; Ph.D., University of California Berkeley.

Joseph S. Foster, Assistant Professor (Teaching/Instructional), Department of Intellectual Heritage, College of Liberal Arts; Ph.D., Temple University.
Sergio R. Franco, Associate Professor, Department of Spanish and Portuguese, College of Liberal Arts; Ph.D., University of Pittsburgh.

Amy L. Friedman, Assistant Professor (Teaching/Instructional), Department of Writing Program, College of Liberal Arts; Ph.D., University of London.

Joseph Friedman, Professor, Department of Economics, College of Liberal Arts; Ph.D., University of California Berkeley.

Yukari Fujisawa, Instructor (Teaching/Instructional), Department of Asian and Middle Eastern Languages and Studies, College of Liberal Arts; M.A., Eastern Michigan University.

Akim Gabriel, Instructor (Teaching/Instructional), Department of French, German, Italian and Slavic, College of Liberal Arts; M.A., Temple University.

Inmaculada M. García-Sánchez, Assistant Professor, Department of Anthropology, College of Liberal Arts; Ph.D., University of California Los Angeles.

Timothy Garelick, Assistant Professor (Teaching/Instructional), Department of Psychology, College of Liberal Arts; Ph.D., Lehigh University.

Paul B. Garrett, Associate Professor, Department of Anthropology, College of Liberal Arts; Ph.D., New York University.

Suzanne Gauch, Associate Professor, Department of English, College of Liberal Arts; Ph.D., State University of New York at Buffalo.

James R. Getz, Assistant Professor (Teaching/Instructional), Department of Intellectual Heritage, College of Liberal Arts; Ph.D., Brandeis University.

Maurizio Giammarco, Assistant Professor (Teaching/Instructional), Department of Intellectual Heritage, College of Liberal Arts; Ph.D., Temple University.

Melissa R. Gilbert, Professor, Department of Geography and Urban Studies, College of Liberal Arts; Ph.D., Clark University.

Tania Giovannetti, Associate Professor, Department of Psychology, College of Liberal Arts; Ph.D., Drexel University.

Joseph Giuffre, Assistant Professor (Teaching/Instructional), Department of Intellectual Heritage, College of Liberal Arts, Rutgers University.

Kristin Gjesdal, Associate Professor, Department of Philosophy, College of Liberal Arts; Ph.D., University of Oslo.

Travis F. Glasson, Associate Professor, Department of History, College of Liberal Arts; Ph.D., Columbia University.

Petra Goedde, Associate Professor, Department of History, College of Liberal Arts; Ph.D., Northwestern University.

Eli C. Goldblatt, Professor, Department of English, College of Liberal Arts; Ph.D., University of Wisconsin-Madison.

Luis T. González del Valle, Professor Emeritus, Department of Spanish and Portuguese, College of Liberal Arts; Ph.D., University of Massachusetts Amherst.

Cynthia M. Gooch, Assistant Professor (Teaching/Instructional), Department of Psychology, College of Liberal Arts; Ph.D., Princeton University.

Judith Goode, Professor Emerita, Department of Anthropology, College of Liberal Arts; Ph.D., Cornell University.

Alex Gottesman, Assistant Professor, Department of Greek and Roman Classics, College of Liberal Arts; Ph.D., University of Chicago.

Thomas J. Gould, Professor, Department of Psychology, College of Liberal Arts; Ph.D., Indiana University.

Kimberly Ann Goyette, Associate Professor, Department of Sociology, College of Liberal Arts; Ph.D., University of Michigan.

Cristina Gragnani, Assistant Professor, Department of French, German, Italian and Slavic, College of Liberal Arts; Ph.D., Harvard University.

Peter Gran, Professor, Department of History, College of Liberal Arts; Ph.D., University of Chicago.

Sherri L. Grasmuck, Professor, Department of Sociology, College of Liberal Arts; Ph.D., University of Texas.

Douglas Greenfield, Associate Professor (Teaching/Instructional), Department of Intellectual Heritage, College of Liberal Arts; Ph.D., Columbia University.

Leonard O. Greenfield, Professor, Department of Anthropology, College of Liberal Arts; Ph.D., University of Michigan.

Elizabeth Groff, Associate Professor, Department of Criminal Justice, College of Liberal Arts; Ph.D., University of Maryland.

Rachael Groner, Associate Professor (Teaching/Instructional), Department of Writing Program, College of Liberal Arts; Ph.D., Purdue University.

Lisa Grunberger, Assistant Professor (Teaching/Instructional), Department of Writing Program, College of Liberal Arts; Ph.D., University of Chicago Divinity School.
Alexandra Guisinger, Assistant Professor, Department of Political Science, College of Liberal Arts; Ph.D., Yale University.

Elizabeth Gunderson, Assistant Professor, Department of Psychology, College of Liberal Arts; Ph.D., University of Chicago.

Michael G. Hagen, Associate Professor, Department of Political Science, College of Liberal Arts; Ph.D., University of California Berkeley.

Simon Hakim, Professor, Department of Economics, College of Liberal Arts; Ph.D., University of Pennsylvania.

Raymond Halnon, Instructor (Teaching/Instructional), Department of Sociology, College of Liberal Arts; B.A., Boston College.

Espen Hammer, Professor, Department of Philosophy, College of Liberal Arts; Ph.D., The New School for Social Research.

Patricia Hansell, Associate Professor (Teaching/Instructional), Department of Anthropology, College of Liberal Arts; Ph.D., Temple University.

Donald A. Hanula, Associate Professor, Department of Liberal Arts; Ph.D., University of Notre Dame.

Carissa M. Harris, Assistant Professor, Department of English, College of Liberal Arts; Ph.D., Northwestern University.

M. Kay Harris, Associate Professor Emerita, Department of Criminal Justice, College of Liberal Arts; M.A., University of Chicago.

Philip W. Harris, Associate Professor Emeritus, Department of Criminal Justice, College of Liberal Arts.

Carol Harris-Shapiro, Assistant Professor (Teaching/Instructional), Department of Intellectual Heritage, College of Liberal Arts; Ph.D., Temple University.

Allison Hayes-Conroy, Assistant Professor, Department of Geography and Urban Studies, College of Liberal Arts; Ph.D., Clark University.

Richard G. Heimberg, Professor, Department of Psychology, College of Liberal Arts; Ph.D., Florida State University.

Katherine Henry, Associate Professor, Department of English, College of Liberal Arts; Ph.D., Rutgers University.

Kevin A. Henry, Assistant Professor, Department of Geography and Urban Studies, College of Liberal Arts; Ph.D., McGill University.

Karen Klaiber Hersch, Associate Professor, Department of Greek and Roman Classics, College of Liberal Arts; Ph.D., Rutgers University.

Michael Hesson, Assistant Professor (Teaching/Instructional), Department of Anthropology, College of Liberal Arts; Ph.D., University of Pennsylvania.

Matthew L. Hiller, Associate Professor, Department of Criminal Justice, College of Liberal Arts; Ph.D., Texas Christian University.

Kathryn A. Hirsh-Pasek, Professor, Department of Psychology, College of Liberal Arts; Ph.D., University of Pennsylvania.

William L. Holmes, Associate Professor, Department of Economics, College of Liberal Arts; Ph.D., University of Illinois at Urbana-Champaign.

Jonathan C. Holmquist, Associate Professor, Department of Spanish and Portuguese, College of Liberal Arts; Ph.D., Princeton University.

Kathy M. Houff, Assistant Professor (Teaching/Instructional), Department of Writing Program, College of Liberal Arts; Ph.D., University of Georgia.

Alistair Q. Howard, Associate Professor (Teaching/Instructional), Department of Political Science, College of Liberal Arts; Ph.D., George Washington University.

Roselyn Hsueh, Assistant Professor, Department of Political Science, College of Liberal Arts; Ph.D., University of California Berkeley.

Shuchen Susan Huang, Assistant Professor (Teaching/Instructional), Department of Asian and Middle Eastern Languages and Studies, College of Liberal Arts; Ph.D., University of Massachusetts.

Richard H. Immerman, Professor, Department of History, College of Liberal Arts; Ph.D., Boston College.

Michael Ingram, Assistant Professor (Teaching/Instructional), Department of Writing Program, College of Liberal Arts; M.F.A., University of Iowa.

Cheryl L. Irons-Guynn, Assistant Professor (Teaching/Instructional), Department of Criminal Justice, College of Liberal Arts; J.D., Temple University.

Andrew C. Isenberg, Professor, Department of History, College of Liberal Arts; Ph.D., Northwestern University.

Jessie B. Iwata, Instructor (Teaching/Instructional), Department of Intellectual Heritage, College of Liberal Arts, Temple University.

Alesha Jackson, Assistant Professor (Teaching/Instructional), Department of Writing Program, College of Liberal Arts; Ph.D., University of Pennsylvania.

Peter James, Associate Professor (Teaching/Instructional), Department of Psychology, College of Liberal Arts; Ph.D., Lehigh University.

Stephen Jankiewicz, Assistant Professor (Teaching/Instructional), Department of Intellectual Heritage, College of Liberal Arts; Ph.D., Rutgers University.
Wilbert L. Jenkins, Associate Professor, Department of History, College of Liberal Arts; Ph.D., Michigan State University.

Jayasinhji Jhala, Associate Professor, Department of Anthropology, College of Liberal Arts; Ph.D., Harvard University.

Kareem J. Johnson, Assistant Professor (Teaching/Instructional), Department of Psychology, College of Liberal Arts; Ph.D., University of Michigan.

Peter R. Jones, Professor, Department of Criminal Justice, College of Liberal Arts; Ph.D., Aberystwyth University.

Priya Joshi, Associate Professor, Department of English, College of Liberal Arts; Ph.D., Columbia University.

Joyce A. Joyce, Professor, Department of English, College of Liberal Arts; Ph.D., University of Georgia.

Nyasha Junior, Assistant Professor, Department of Religion, College of Liberal Arts; Ph.D., Princeton Theological Seminary.

Hana Muzika Kahn, Assistant Professor (Teaching/Instructional), Department of Spanish and Portuguese, College of Liberal Arts; Ph.D., Rutgers University.

Andrew Karpinski, Associate Professor, Department of Psychology, College of Liberal Arts; Ph.D.

Deborah Karr, Assistant Professor (Teaching/Instructional), Department of Writing Program, College of Liberal Arts; Ed.D., Temple University.

Robert L. Kaufman, Professor, Department of Sociology, College of Liberal Arts; Ph.D., University of Wisconsin.

Michael W. Kaufmann, Associate Professor, Department of English, College of Liberal Arts; Ph.D., Columbia University.

Charles Kaylor, Assistant Professor (Teaching/Instructional), Department of Geography and Urban Studies, College of Liberal Arts; M.U.P., University of Michigan.

Gabriella Kecskes, Assistant Professor (Teaching/Instructional), Department of Writing Program, College of Liberal Arts; Ph.D., Temple University.

Philip C. Kendall, Professor, Department of Psychology, College of Liberal Arts; Ph.D., Virginia Commonwealth University.

Dustin Kidd, Associate Professor, Department of Sociology, College of Liberal Arts; Ph.D., University of Virginia.

Han-Kyul Kim, Assistant Professor (Teaching/Instructional), Department of Philosophy, College of Liberal Arts; Ph.D., University of York.

Jacob Kim, Assistant Professor (Teaching/Instructional), Department of Religion, College of Liberal Arts; Ph.D., Temple University.

Sook Kyung Kim, Associate Professor (Teaching/Instructional), Department of Writing Program, College of Liberal Arts; Ed.D., Temple University.

Susan Klepp, Professor Emerita, Department of History, College of Liberal Arts; Ph.D., University of Pennsylvania.

Joshua Klugman, Professor, Department of Sociology, College of Liberal Arts; Ph.D., Indiana University.

Robin A. Kolodny, Professor, Department of Political Science, College of Liberal Arts; Ph.D., Johns Hopkins University.

Kyriakos M. Kontopoulos, Professor, Department of Sociology, College of Liberal Arts; Ph.D., Harvard University.

Rita Krueger, Associate Professor, Department of History, College of Liberal Arts; Ph.D., Harvard University.

Fyodor I. Kushnirsky, Professor, Department of Economics, College of Liberal Arts; Ph.D., Plekhanov Institute of the National Economy.

Kenneth L. Kusmer, Professor, Department of History, College of Liberal Arts; Ph.D., University of Chicago.

George M. Lady, Professor, Department of Economics, College of Liberal Arts; Ph.D., Johns Hopkins University.

Peter Lavelle, Assistant Professor, Department of History, College of Liberal Arts; Ph.D., Cornell University.

Anne Layman-Horn, Assistant Professor (Teaching/Instructional), Department of Writing Program, College of Liberal Arts; Ph.D., New York University.

Mindie Lazarus-Black, Professor, Department of Anthropology, College of Liberal Arts; Ph.D., University of Chicago.

Don Lee, Professor, Department of English, College of Liberal Arts; M.F.A., Emerson College.

Jeffrey Ethan Lee, Assistant Professor (Teaching/Instructional), Department of Intellectual Heritage, College of Liberal Arts; Ph.D., New York University.

Sue-Im Lee, Associate Professor, Department of English, College of Liberal Arts; Ph.D., University of Illinois at Chicago.

Michael A. Leeds, Professor, Department of Economics, College of Liberal Arts; Ph.D., Princeton University.
Frank Leib, Assistant Professor (Teaching/Instructional), Department of Intellectual Heritage, College of Liberal Arts; M.D., Temple University.

Mark A. Leuchter, Associate Professor, Department of Religion, College of Liberal Arts; Ph.D., University of Toronto.

Heather Levi, Assistant Professor (Teaching/Instructional), Department of Anthropology, College of Liberal Arts; Ph.D., New York University.

Judith A. Levine, Assistant Professor, Department of Sociology, College of Liberal Arts; Ph.D., Northwestern University.

Laura S. Levitt, Professor, Department of Religion, College of Liberal Arts; Ph.D., Emory University.

Richard L. Libowitz, Associate Professor (Teaching/Instructional), Department of Intellectual Heritage, College of Liberal Arts; Ph.D., Temple University.

Vasiliki M. Limberis, Professor, Department of Religion, College of Liberal Arts; Th.D., Harvard University.

Jay B. Lockenour, Associate Professor, Department of History, College of Liberal Arts; Ph.D., University of Pennsylvania.

Peter Logan, Professor, Department of English, College of Liberal Arts; Ph.D., University of California Berkeley.

Sheree Logue, Assistant Professor (Teaching/Instructional), Department of Psychology, College of Liberal Arts; Ph.D., Indiana University.

Gerardo Augusto Lorenzino, Associate Professor, Department of Spanish and Portuguese, College of Liberal Arts; Ph.D., Graduate Center, City University of New York.

Hilary Iris Lowe, Assistant Professor (Teaching/Instructional), Department of History, College of Liberal Arts; Ph.D., University of Kansas.

Joshua Lukin, Assistant Professor (Teaching/Instructional), Department of Writing Program, College of Liberal Arts; Ph.D., State University of New York at Buffalo.

Meghan Foster Lynch, Assistant Professor, Department of Political Science, College of Liberal Arts; Ph.D., Yale University.

Johanna Catherine Maclean, Associate Professor, Department of Economics, College of Liberal Arts; Ph.D., Cornell University.

Louis S. Mangione, Associate Professor, Department of Asian and Middle Eastern Languages and Studies, College of Liberal Arts; Ph.D., Cornell University.

Benny C. Marcus, Associate Professor (Teaching/Instructional), Department of Sociology, College of Liberal Arts; Ph.D., University of Texas at Austin.

Joseph Margolis, Professor, Department of Philosophy, College of Liberal Arts; Ph.D., Columbia University.

David L. Margules, Professor, Department of Psychology, College of Liberal Arts; Ph.D., University of Michigan.

Peter J. Marshall, Associate Professor, Department of Psychology, College of Liberal Arts; Ph.D., University of Cambridge.

James Martin, Assistant Professor (Teaching/Instructional), Department of Writing Program, College of Liberal Arts; Ph.D., Binghamton University.

John Masker, Assistant Professor (Teaching/Instructional), Department of Political Science, College of Liberal Arts; Ph.D., Boston College.

Robert J. Mason, Professor, Department of Geography and Urban Studies, College of Liberal Arts; Ph.D., Rutgers University.

Michele Masucci, Professor, Department of Geography and Urban Studies, College of Liberal Arts; Ph.D., Clark University.

Melinda Mattingly, Assistant Professor (Teaching/Instructional), Department of Psychology, College of Liberal Arts; Ph.D., Saint Louis University.

Ama Mazama, Associate Professor, Department of African American Studies, College of Liberal Arts; Ph.D., La Sorbonne Nouvelle, Paris III.

Walter Thomas McAllister, Assistant Professor (Teaching/Instructional), Department of Writing Program, College of Liberal Arts; M.F.A., University of Iowa.

Patricia M. McCarthy, Instructor (Teaching/Instructional), Department of English, College of Liberal Arts; M.A., Temple University.

Michael S. McCloskey, Associate Professor, Department of Psychology, College of Liberal Arts; Ph.D., University of Southern Mississippi.

Stanley McDonald, Assistant Professor (Teaching/Instructional), Department of Writing Program, College of Liberal Arts; M.F.A., Brown University.

Joan Mellen, Professor, Department of English, College of Liberal Arts; Ph.D., City University of New York.

Patricia Melzer, Assistant Professor, Department of French, German, Italian and Slavic, College of Liberal Arts; Ph.D., Clark University.

Ming Meng, Assistant Professor (Teaching/Instructional), Department of Economics, College of Liberal Arts; Ph.D., University of Alabama, Tuscaloosa.
Jeremy Mennis, Associate Professor, Department of Geography and Urban Studies, College of Liberal Arts; Ph.D., Pennsylvania State University.

Joanne C. Metzger, Assistant Professor (Teaching/Instructional), Department of Criminal Justice, College of Liberal Arts; J.D., Widener University School of Law.

Aldona Middlesworth, Instructor (Teaching/Instructional), Department of Intellectual Heritage, College of Liberal Arts; M.A., Temple University.

Marina Mikhailova, Assistant Professor (Teaching/Instructional), Department of Anthropology, College of Liberal Arts; Ph.D., University of Chicago.

Juris M. Milestone, Assistant Professor (Teaching/Instructional), Department of Anthropology, College of Liberal Arts; Ph.D., Temple University.

Nichole E. Miller, Assistant Professor, Department of English, College of Liberal Arts; Ph.D., University of California Irvine.

Robin N. Mitchell-Boyask, Professor, Department of Greek and Roman Classics, College of Liberal Arts; Ph.D., Brown University.

Pamela Beth Monaco, Assistant Professor (Teaching/Instructional), Department of Intellectual Heritage, College of Liberal Arts, Temple University.

Patricia A. Moore-Martinez, Assistant Professor (Teaching/Instructional), Department of Spanish and Portuguese, College of Liberal Arts; Ph.D., Temple University.

Hortensia R. Morell, Professor, Department of Spanish and Portuguese, College of Liberal Arts; Ph.D., University of Wisconsin-Madison.

Thomas Morton, Assistant Professor (Teaching/Instructional), Department of Spanish and Portuguese, College of Liberal Arts; Ph.D., University of Pennsylvania.

Geoffrey Moss, Assistant Professor (Teaching/Instructional), Department of Sociology, College of Liberal Arts; Ph.D., Columbia University.

Andrew R. Mossin, Assistant Professor (Teaching/Instructional), Department of Intellectual Heritage, College of Liberal Arts; Ph.D., Temple University.

Gary A. Mucciaroni, Professor, Department of Political Science, College of Liberal Arts; Ph.D., University of Wisconsin-Madison.

Srimati Mukherjee, Associate Professor (Teaching/Instructional), Department of Writing Program, College of Liberal Arts; Ph.D., University of Louisiana.

Shigenori Nagatomo, Professor, Department of Religion, College of Liberal Arts; Ph.D., University of Hawaii.

Michael Neff, Associate Professor (Teaching/Instructional), Department of Intellectual Heritage, College of Liberal Arts; M.A., University of Pennsylvania.

Harvey R. Neptune, Associate Professor, Department of History, College of Liberal Arts; Ph.D., New York University.

Nora S. Newcombe, Professor, Department of Psychology, College of Liberal Arts; Ph.D., Harvard University.

Steven L. Newman, Associate Professor, Department of English, College of Liberal Arts; Ph.D., Johns Hopkins University.

David Nickerson, Associate Professor, Department of Political Science, College of Liberal Arts; Ph.D., Yale University.

Daniel T. O’Hara, Professor, Department of English, College of Liberal Arts; Ph.D., Temple University.

Thomas Olino, Assistant Professor, Department of Psychology, College of Liberal Arts; Ph.D., Stony Brook University.

Ingrid Olson, Associate Professor, Department of Psychology, College of Liberal Arts; Ph.D., Yale University.

David J. Organ, Assistant Professor (Teaching/Instructional), Department of Geography and Urban Studies, College of Liberal Arts; Ph.D., University of California Berkeley.

Richard Orodenker, Instructor (Teaching/Instructional), Department of Intellectual Heritage, College of Liberal Arts; M.A., Johns Hopkins University.

Miles D. Ornell, Professor, Department of English, College of Liberal Arts; Ph.D., Harvard University.

Jena Osman, Professor, Department of English, College of Liberal Arts; Ph.D., State University of New York at Buffalo.

Lara Ostacic, Assistant Professor, Department of Philosophy, College of Liberal Arts; Ph.D., University of Notre Dame.

Sharon C. Ostrow, Instructor (Teaching/Instructional), Department of Criminal Justice, College of Liberal Arts; Ph.D., Rutgers University.

Willis F. Overton, Professor Emeritus, Department of Psychology, College of Liberal Arts; Ph.D., Clark University.

Randall J. Pabich, Assistant Professor (Teaching/Instructional), Department of Intellectual Heritage, College of Liberal Arts, Temple University.

Christine Palumbo-De Simone, Professor (Teaching/Instructional), Department of Writing Program, College of Liberal Arts; Ph.D., Temple University.
Catherine Panzarella, Associate Professor (Clinical), Department of Psychology, College of Liberal Arts; Ph.D., Temple University.

Marcela Pardes, Assistant Professor (Teaching/Instructional), Department of Spanish and Portuguese, College of Liberal Arts; Ph.D., Temple University.

Vinay Parikh, Assistant Professor, Department of Psychology, College of Liberal Arts; Ph.D., Punjabi University.

Nicolette Parisi, Assistant Professor (Teaching/Instructional), Department of Criminal Justice, College of Liberal Arts; J.D., Temple University.

Ann L. Peak, Assistant Professor (Teaching/Instructional), Department of Intellectual Heritage, College of Liberal Arts; Ph.D., Temple University.

C. Hamil Pearsall, Assistant Professor, Department of Geography and Urban Studies, College of Liberal Arts; Ph.D., Clark University.

Elizabeth W. Pearson, Instructor (Teaching/Instructional), Department of Intellectual Heritage, College of Liberal Arts, Sarah Lawrence College.

José Manuel Pereiro Otero, Associate Professor, Department of Spanish and Portuguese, College of Liberal Arts; Ph.D., University of Colorado Boulder.

Donna Marie Peters, Assistant Professor (Teaching/Instructional), Department of Sociology, College of Liberal Arts; Ph.D., The New School for Social Research.

Sonja Peterson-Lewis, Associate Professor, Department of African American Studies, College of Liberal Arts; Ph.D., University of Florida-Gainesville.

Carolyn Phipps, Assistant Professor (Teaching/Instructional), Department of Spanish and Portuguese, College of Liberal Arts; Ph.D., Princeton University.

Montserrat Piera, Associate Professor, Department of Spanish and Portuguese, College of Liberal Arts; Ph.D., Pennsylvania State University.

Mark A. Pollack, Professor, Department of Political Science, College of Liberal Arts; Ph.D., Harvard University.

Lori Pompa, Instructor (Teaching/Instructional), Department of Criminal Justice, College of Liberal Arts; M.S.W., Rutgers University.

Gary D. Pratt, Assistant Professor (Teaching/Instructional), Department of Intellectual Heritage, College of Liberal Arts; M.A., Brandeis University.

Olia Prokopenko, Instructor (Teaching/Instructional), Department of French, German, Italian and Slavic, College of Liberal Arts; M.A., Karazin National University.

Peter Puchek, Assistant Professor (Teaching/Instructional), Department of Writing Program, College of Liberal Arts; Ph.D., Lehigh University.

Victor M. Pueyo Zoco, Assistant Professor, Department of Spanish and Portuguese, College of Liberal Arts; Ph.D., State University of New York Stony Brook.

David E. Racker, Assistant Professor (Teaching/Instructional), Department of Intellectual Heritage, College of Liberal Arts; Ph.D., Tulane University.

John C. Raines, Professor Emeritus, Department of Religion, College of Liberal Arts; Ph.D.

Anthony Ranere, Professor Emeritus, Department of Anthropology, College of Liberal Arts; Ph.D., University of California Davis.

Jerry H. Ratcliffe, Professor, Department of Criminal Justice, College of Liberal Arts; Ph.D., University of Nottingham (UK).

Elliot A. Ratzman, Assistant Professor (Teaching/Instructional), Department of Religion, College of Liberal Arts; Ph.D., Princeton University.

Aunshul P. Rege, Assistant Professor, Department of Criminal Justice, College of Liberal Arts; Ph.D., Rutgers University.

George F. Rengert, Professor Emeritus, Department of Criminal Justice, College of Liberal Arts; Ph.D., University of North Carolina.

Terry Rey, Associate Professor, Department of Religion, College of Liberal Arts; Ph.D., Temple University.

Eunsook Ha Rhee, Assistant Professor (Teaching/Instructional), Department of Writing Program, College of Liberal Arts; Ed.D., Temple University.

Monica Ricketts, Assistant Professor, Department of History, College of Liberal Arts; Ph.D., Harvard University.

Moritz Ritter, Assistant Professor, Department of Economics, College of Liberal Arts; Ph.D., University of Toronto.

Paula D. Robison, Associate Professor, Department of English, College of Liberal Arts; Ph.D., University of Pennsylvania.

L. Christie Rockwell, Associate Professor, Department of Anthropology, College of Liberal Arts; Ph.D., University of California Davis.

Norman Roessler, Associate Professor (Teaching/Instructional), Department of Intellectual Heritage, College of Liberal Arts; Ph.D., University of Pennsylvania.

Wilbert J. Roget, Associate Professor, Department of French, German, Italian and Slavic, College of Liberal Arts; Ph.D., University of Pittsburgh.
Caterina Gouvis Roman, Assistant Professor, Department of Criminal Justice, College of Liberal Arts; Ph.D., American University.

Jessica Roney, Assistant Professor, Department of History, College of Liberal Arts; Ph.D., Johns Hopkins University.

Christina Rosan, Assistant Professor, Department of Geography and Urban Studies, College of Liberal Arts; Ph.D., Massachusetts Institute of Technology.

Cathryn Jo Rosen, Associate Professor, Department of Criminal Justice, College of Liberal Arts; LL.M., Temple University.

Christopher Roy, Assistant Professor (Teaching/Instructional), Department of Anthropology, College of Liberal Arts; Ph.D., Princeton University.

Eileen Ryan, Assistant Professor, Department of History, College of Liberal Arts; Ph.D., Columbia University.

James Salazar, Associate Professor, Department of English, College of Liberal Arts; Ph.D., University of California Berkeley.

Rickie Sanders, Professor, Department of Geography and Urban Studies, College of Liberal Arts; Ph.D., Ohio State University.

Sheryl Sawin, Assistant Professor (Teaching/Instructional), Department of Intellectual Heritage, College of Liberal Arts, University of Rochester.

Jeremy Schipper, Associate Professor, Department of Religion, College of Liberal Arts; Ph.D., Harvard University.

Kolson Schlosser, Assistant Professor (Teaching/Instructional), Department of Geography and Urban Studies, College of Liberal Arts; Ph.D., Pennsylvania State University.

Joseph M. Schwartz, Professor, Department of Political Science, College of Liberal Arts; Ph.D., Harvard University.

Jordan Shapiro, Instructor (Teaching/Instructional), Department of Intellectual Heritage, College of Liberal Arts, Pacifica Graduate Institute.

Pamela J. Shapiro, Assistant Professor (Teaching/Instructional), Department of Psychology, College of Liberal Arts; Ph.D., Temple University.

Jacob Shell, Assistant Professor, Department of Geography and Urban Studies, College of Liberal Arts; Ph.D., Syracuse University.

Adam Joseph Shellhorse, Assistant Professor, Department of Spanish and Portuguese, College of Liberal Arts; Ph.D., University of California Berkeley.

Thomas F. Shipley, Associate Professor, Department of Psychology, College of Liberal Arts; Ph.D., University of Pennsylvania.

Muffy E. Siegel, Associate Professor, Department of English, College of Liberal Arts; Ph.D., University of Massachusetts.

Jill K. Sigman, Assistant Professor (Teaching/Instructional), Department of Intellectual Heritage, College of Liberal Arts; Ph.D., Brown University.

Marilyn Silberfein, Professor Emerita, Department of Geography and Urban Studies, College of Liberal Arts; Ph.D., Syracuse University.

Pedro Silos, Associate Professor, Department of Economics, College of Liberal Arts; Ph.D., University of Iowa.

Daniel A. Silverman, Assistant Professor (Teaching/Instructional), Department of Criminal Justice, College of Liberal Arts; J.D., Temple University.

Bryant Simon, Professor, Department of History, College of Liberal Arts; Ph.D., University of North Carolina at Chapel Hill.

Alan S. Singer, Professor, Department of English, College of Liberal Arts; Ph.D., University of Washington.

Matthew Smetona, Assistant Professor (Teaching/Instructional), Department of Intellectual Heritage, College of Liberal Arts; Ph.D., Temple University.

Hillel David Soifer, Assistant Professor, Department of Political Science, College of Liberal Arts; Ph.D., Harvard University.

Miriam Solomon, Professor, Department of Philosophy, College of Liberal Arts; Ph.D., Harvard University.

John A. Sorrentino, Associate Professor, Department of Economics, College of Liberal Arts; Ph.D., Purdue University.

C. Christopher Soufas, Professor, Department of Spanish and Portuguese, College of Liberal Arts; Ph.D., Duke University.

Teresa Scott Soufas, Professor, Department of Spanish and Portuguese, College of Liberal Arts; Ph.D., Duke University.

Laura Spagnoli, Associate Professor (Teaching/Instructional), Department of French, German, Italian and Slavic, College of Liberal Arts; Ph.D., University of Pennsylvania.

Howard Spodek, Associate Professor, Department of History, College of Liberal Arts; Ph.D., University of Chicago.

Gerald J. Stahler, Professor, Department of Geography and Urban Studies, College of Liberal Arts; Ph.D., Temple University.

Damien Stankiewicz, Assistant Professor, Department of Anthropology, College of Liberal Arts; Ph.D., New York University.
Laurence D. Steinberg, Professor, Department of Psychology, College of Liberal Arts; Ph.D., Cornell University.

R. Michael Stewart, Professor Emeritus, Department of Anthropology, College of Liberal Arts; Ph.D., Catholic University.

Mary Stricker, Associate Professor (Teaching/Instructional), Department of Sociology, College of Liberal Arts; Ph.D., Temple University.

Dorothy Stringer, Associate Professor (Teaching/Instructional), Department of Writing Program, College of Liberal Arts; Ph.D., University at Albany, State University of New York.

William J. Stull, Professor, Department of Economics, College of Liberal Arts; Ph.D., Massachusetts Institute of Technology.

Sandra L. Suárez, Professor, Department of Political Science, College of Liberal Arts; Ph.D., Yale University.

Charles E. Swanson, Associate Professor, Department of Economics, College of Liberal Arts; Ph.D., University of Minnesota.

Elizabeth Sweet, Assistant Professor (Teaching/Instructional), Department of Geography and Urban Studies, College of Liberal Arts; Ph.D., University of Illinois at Chicago.

Leonard J. Swidler, Professor, Department of Religion, College of Liberal Arts; Ph.D., University of Wisconsin.

Benjamin Talton, Associate Professor, Department of History, College of Liberal Arts; Ph.D., University of Chicago.

Ralph B. Taylor, Professor, Department of Criminal Justice, College of Liberal Arts; Ph.D., Johns Hopkins University.

Ronald D. Taylor, Associate Professor, Department of Psychology, College of Liberal Arts; Ph.D., University of Michigan.

Brian Teare, Assistant Professor, Department of English, College of Liberal Arts; M.F.A., Indiana University.

Rebecca Testai, Professor, Department of Sociology, College of Liberal Arts; Ph.D., University of Pennsylvania.

Kimberly Thomas, Assistant Professor (Teaching/Instructional), Department of Writing Program, College of Liberal Arts; Ph.D., Indiana University of Pennsylvania.

Ruth P. Thomas, Professor, Department of French, German, Italian and Slavic, College of Liberal Arts; Ph.D., Yale University.

Barbara E. Thornbury, Associate Professor, Department of Asian and Middle Eastern Languages and Studies, College of Liberal Arts; Ph.D., University of British Columbia.

Teshale Tibebu, Professor, Department of History, College of Liberal Arts; Ph.D., State University of New York at Binghamton.

Paul D. Toth, Assistant Professor, Department of Spanish and Portuguese, College of Liberal Arts; Ph.D., University of Pittsburgh.

LaTosha Traylor, Assistant Professor, Department of Criminal Justice, College of Liberal Arts; Ph.D., University of Illinois at Chicago.

Tara N. Tripp, Instructor (Teaching/Instructional), Department of Criminal Justice, College of Liberal Arts; M.S., St. Joseph's University.

Kathleen S. Uno, Associate Professor, Department of History, College of Liberal Arts; Ph.D., University of California Berkeley.

Gregory J. W. Urwin, Professor, Department of History, College of Liberal Arts; Ph.D., University of Notre Dame.

Nicole Martorano Van Cleve, Assistant Professor, Department of Criminal Justice, College of Liberal Arts; Ph.D., Northwestern University.

Ryan Vander Wielen, Associate Professor, Department of Political Science, College of Liberal Arts; Ph.D., Washington University-St. Louis.

Lawrence Venuti, Professor, Department of English, College of Liberal Arts; Ph.D., Columbia University.

Pablo S. Vila, Professor, Department of Sociology, College of Liberal Arts; Ph.D., University of Texas Austin.

Gerald A. Vision, Professor, Department of Philosophy, College of Liberal Arts; Ph.D., University of Michigan.

E. Rely Vílcicá, Assistant Professor, Department of Criminal Justice, College of Liberal Arts; Ph.D., Temple University.

Thomas J. Waidzunas, Assistant Professor, Department of Sociology, College of Liberal Arts; Ph.D., University of California San Diego.

David L. Waldestreicher, Professor, Department of History, College of Liberal Arts; Ph.D., Yale University.

Shannon Walters, Assistant Professor, Department of English, College of Liberal Arts; Ph.D., Pennsylvania State University.

Grant H. Ward, Assistant Professor (Teaching/Instructional), Department of Intellectual Heritage, College of Liberal Arts; Ph.D., Temple University.
Jeffrey T. Ward, Assistant Professor, Department of Criminal Justice, College of Liberal Arts; Ph.D., University of Florida.

Owen J. Ware, Assistant Professor, Department of Philosophy, College of Liberal Arts; Ph.D., University of Toronto.

Donald Wargo, Associate Professor (Teaching/Instructional), Department of Economics, College of Liberal Arts; Ph.D., Temple University.

Anthony Waskie, Assistant Professor (Teaching/Instructional), Department of French, German, Italian and Slavic, College of Liberal Arts; Ph.D., New York University.

David Harrington Watt, Professor, Department of History, College of Liberal Arts; Ph.D., Harvard University.

David Waxler, Instructor (Teaching/Instructional), Department of Psychology, College of Liberal Arts, Rutgers University.

Ronald W. Webb, Instructor (Teaching/Instructional), Department of Latin American Studies, College of Liberal Arts; Ph.D., Pennsylvania State University.

Douglas Webber, Assistant Professor, Department of Economics, College of Liberal Arts; Ph.D., Cornell University.

Marsha A. Weinraub, Professor, Department of Psychology, College of Liberal Arts; Ph.D., University of Michigan.

Robert W. Weisberg, Professor, Department of Psychology, College of Liberal Arts; Ph.D., Princeton University.

Charles A. Weitz, Associate Professor, Department of Anthropology, College of Liberal Arts; Ph.D., Pennsylvania State University.

Susan Wells, Professor, Department of English, College of Liberal Arts; Ph.D., University of Texas at Austin.

Wayne N. Welsh, Professor, Department of Criminal Justice, College of Liberal Arts; Ph.D., University of California Irvine.

Sharon White, Assistant Professor (Teaching/Instructional), Department of Writing Program, College of Liberal Arts; Ph.D., University of Denver.

Sydney D. White, Associate Professor, Department of Religion, College of Liberal Arts; Ph.D., University of California Berkeley.

Catherine Wiley, Assistant Professor (Teaching/Instructional), Department of English, College of Liberal Arts; Ph.D., Temple University.

Kimberly D. Williams, Assistant Professor, Department of Anthropology, College of Liberal Arts; Ph.D., Ohio State University.

Roland L. Williams Jr., Associate Professor, Department of English, College of Liberal Arts; Ph.D., University of Pennsylvania.

Gregory Winch, Assistant Professor (Teaching/Instructional), Department of Writing Program, College of Liberal Arts; Ph.D., Southern Illinois University.

Brad Windhauser, Assistant Professor (Teaching/Instructional), Department of Writing Program, College of Liberal Arts; M.F.A., Queens University of Charlotte.

Gordon Witty, Assistant Professor (Teaching/Instructional), Department of Asian and Middle Eastern Languages and Studies, College of Liberal Arts; M.A., University of Pennsylvania.

David Wolfsdorf, Associate Professor, Department of Philosophy, College of Liberal Arts; Ph.D., University of Chicago.

Jennifer D. Wood, Associate Professor, Department of Criminal Justice, College of Liberal Arts; Ph.D., University of Toronto.

Matt Wray, Associate Professor, Department of Sociology, College of Liberal Arts; Ph.D., University of California Berkeley.

Hongling Xie, Associate Professor, Department of Psychology, College of Liberal Arts; Ph.D., University of North Carolina at Chapel Hill.

Philip R. Yannella, Professor, Department of English, College of Liberal Arts; Ph.D., University of Wisconsin-Milwaukee.

Sean Yom, Assistant Professor, Department of Political Science, College of Liberal Arts; Ph.D., Harvard University.

Reiko Yoshida, Instructor (Teaching/Instructional), Department of Asian and Middle Eastern Languages and Studies, College of Liberal Arts; M.A., West Chester University.

Ralph F. Young, Professor (Teaching/Instructional), Department of History, College of Liberal Arts; Ph.D., Michigan State University.

Yuan Yuan, Assistant Professor (Teaching/Instructional), Department of Economics, College of Liberal Arts; Ph.D., University of Wisconsin-Madison.

Lu Zhang, Assistant Professor, Department of Sociology, College of Liberal Arts; Ph.D., Johns Hopkins University.

Shanyang Zhao, Professor, Department of Sociology, College of Liberal Arts; Ph.D., University of Maryland.
Mission

Temple University's Department of African American Studies provides students with a textured intellectual experience through the systematic Afrocentric study of the thought, behavior and practices of African people globally. Inasmuch as our faculty and students pursue knowledge from the perspective of African people as both agents and subjects of experience, we also remain open to plural understandings emanating from the multicultural society in which we live, and the rapidly shrinking world beyond. Students engage in critical discourse about issues of race, ethnicity, gender, sexuality, class and culture across a great expanse of time and geographical space. Our classes interrogate African frames of reference, from the classical to the contemporary periods, tracing continuities and transformations from Africa to numerous diasporic communities worldwide.

We commit ourselves to the shaping and evolution of our discipline, and to positive change in our communities. Through enhanced mentoring and cooperative pedagogy, we cultivate the academic excellence, social responsibility and political engagement necessary for subsequent generations of scholars to carry this work into the future.

Curriculum

The curriculum stresses the skills necessary to think critically, write clearly, argue persuasively, and solve problems effectively. Students are exposed to theory and research in a variety of subject areas and are encouraged to engage in active research and service beyond the classroom.

Career Opportunities

Alumni of the African American Studies program have entered careers in primary and secondary education and administration, social work and administration, research design, law enforcement, city government, and have also worked with museums and other cultural and artistic institutions. Several African American Studies alumni and alumnae are active in local and national entertainment in roles that include music production, film making, acting, and script writing. Many others have earned graduate degrees in a variety of areas, including law, the health-related professions such as medicine and nursing, public administration, and the social sciences, including political science, history, psychology, sociology, and anthropology.

Awards and Honors

The department offers three internal awards for graduating seniors—two privately-sponsored awards for outstanding academic performance and one departmental award for outstanding service. The Department of African American Studies supervises the Temple in Ghana program, which allows students to study for six weeks during the summer at the University of Ghana in Accra.

Programs

- Bachelor of Arts in African American Studies (p. 775)
• Minor in African American Studies (p. 778)

Bachelor of Arts in African American Studies

The curriculum for the Bachelor of Arts in African American Studies stresses the skills necessary to think critically, write clearly, argue persuasively, and solve problems effectively. Students are exposed to theory and research in a variety of subject areas and are encouraged to engage in active research and service beyond the classroom.

Career Opportunities

Alumni of the African American Studies program have entered careers in primary and secondary education and administration, social work and administration, research design, law enforcement, city government, and have also worked with museums and other cultural and artistic institutions. Several African American Studies alumni and alumnae are active in local and national entertainment in roles that include music production, filmmaking, acting, and script writing. Many others have earned graduate degrees in a variety of areas, including law, the health-related professions such as medicine and nursing, public administration, and the social sciences, including political science, history, psychology, sociology, and anthropology.

Summary of Degree Requirements

University Requirements:

• MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
• All Temple students must take a minimum of two writing-intensive courses as part of the major. The African American Studies major requires AAS 1296 and AAS 4096.
• Students must complete requirements of the General Education (GenEd) Program. See the General Education (p. 143) section of the Undergraduate Bulletin for more details.

College of Liberal Arts Requirements:

• Completion of a minimum of 123 credits, including:
  • 90 credits in CLA/CST courses;
  • 45 credits of which must be at the upper level (numbered 2000-4999).
    • For Social Science majors, 6 upper level credits (numbered 2000-4999) must be taken in Humanities Subject Areas: Arabic, Chinese, English, French, German, Greek (Ancient), Greek and Roman Classics, Hebrew, Hindi, Italian, Japanese, Latin, Philosophy, Religion, Russian, and Spanish in the College of Liberal Arts, Art History in the Tyler School of Art, or any department in the College of Science and Technology.
  • A minimum GPA of 2.0, cumulatively, in CLA/CST coursework, and in the major.
  • Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.
  • Foreign Language/Global Studies Requirements:
    • All students must complete or test out of the first and second levels of a foreign language - these courses are numbered 1001 and 1002;
    • All students must complete at least one course from the GenEd Global/World Society category; and
    • All Bachelor of Arts students must complete one of the following options:
      • Third semester of a foreign language;
      • Demonstrated proficiency beyond the third semester in a foreign language (placement exam or certification from the language department);
      • Take one Global Studies course from the list on the CLA College Graduation Requirements (p. 755) page;
      • Study Abroad at an approved program; or
      • Take a second General Education Global/World Society course.
• Notes on Foreign Language Study
  • The third level of language is numbered 1003 in French, German, Italian, Spanish, and Portuguese and numbered 2001 in all other foreign language subjects.
  • Students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honor society Phi Beta Kappa. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)
  • See the College of Liberal Arts Policies (p. 753) section of this Bulletin for more information on the Foreign Language Placement, Regression in Coursework, and guidelines for students' other experiences with language.

General Electives are typically one-third of a student's program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

AAS 3215 Languages and Cultures of West Africa 3
AAS 2201 African Civilization 3
AAS 3268 Critical Readings in African American History 3
AAS 2255 Introduction to Research Methods (fall semester only) 3

Electives
Select two (2) additional courses, one of which must be at or above the 2000 level. 1 6

Total Credit Hours 21

1 Make these selections based on the content areas in which you desire greater familiarity (e.g., African American Studies literature, African American Studies social issues, African American Studies psychology, etc.). One of these two upper-level courses may be an African American Studies-related course outside the department; however, students must seek written approval from the African American Studies undergraduate director prior to enrolling in outside courses that they want to apply toward the African American Studies minor.

Minors are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

American Studies is a broad-based interdisciplinary program that explores the rich complexity of American culture and American lives. Courses focus on national myths and everyday realities, race and ethnicity, work, technology, media and popular culture, architecture and city planning, and the production and consumption of art forms like photography, film, dance, and music. In American Studies, though, we do not treat these topics as discrete categories, but instead explore their relationships to each other. For instance, we look at ideas about race and class embedded in national symbols and ideas. Through a variety of courses and in a mix of different categories, American Studies provides students with a deep understanding of the many forces and ideas shaping America over a long sweep of time in any number of places, the East, the West, in the heartland and at the borders.

The program also offers student internship opportunities and other hands-on kinds of learning at a variety of cultural institutions in Philadelphia and the Delaware Valley. American Studies courses are challenging and thought-provoking and many of them are cross-listed with the Temple University Honors Program. The major program stresses development of reading, writing, and analytical skills that are necessary for successful careers in a range of professional fields.

American Studies majors go on to graduate school in the humanities and social sciences, law school, and medical school. They also may take jobs in schools, non-profit organizations, museums, libraries, business, social services, public relations, and the media.

Programs

- Bachelor of Arts in American Studies (p. 779)
- Minor in American Studies (p. 783)
- Minor in Asian American Studies (p. 782)

Bachelor of Arts in American Studies

Summary of Degree Requirements

University Requirements:

- MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
- All Temple students must take a minimum of two writing-intensive courses as part of the major. The specific courses required for this major are: AMST 2098, and AMST 4097 (or AMST 4098 with permission).
- Students must complete requirements of the General Education (GenEd) Program. See the General Education (p. 143) section of the Undergraduate Bulletin for more details.

College of Liberal Arts Requirements:

- Completion of a minimum of 123 credits, including:
  - 90 credits in CLA/CST courses;
  - 45 credits of which must be at the upper level (numbered 2000-4999).
    - For Social Science majors, 6 upper level credits (numbered 2000-4999) must be taken in Humanities Subject Areas: Arabic, Chinese, English, French, German, Greek (Ancient), Greek and Roman Classics, Hebrew, Hindi, Italian, Japanese, Latin, Philosophy, Religion, Russian, and Spanish in the College of Liberal Arts, Art History in the Tyler School of Art, or any department in the College of Science and Technology.
- A minimum GPA of 2.0, cumulatively, in CLA/CST coursework, and in the major.
- Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.
- Foreign Language/Global Studies Requirements:
  - All students must complete or test out of the first and second levels of a foreign language - these courses are numbered 1001 and 1002;
  - All students must complete at least one course from the GenEd Global/World Society category; and
  - All Bachelor of Arts students must complete one of the following options:
    - Third semester of a foreign language;
    - Demonstrated proficiency beyond the third semester in a foreign language (placement exam or certification from the language department);
    - Take one Global Studies course from the list on the CLA College Graduation Requirements (p. 755) page;
    - Study Abroad at an approved program; or
    - Take a second General Education Global/World Society course.
- Notes on Foreign Language Study
  - The third level of language is numbered 1003 in French, German, Italian, Spanish, and Portuguese and numbered 2001 in all other foreign language subjects.
  - Students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honor society Phi Beta Kappa. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)
General Electives are typically one-third of a student's program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

Senior Independent Study

Total Credit Hours 39

1 Specific subjects change each semester. See class schedule for information on a particular offering. AMST 2120 may meet one or more of the above requirements with permission of the director.

2 These can include choices from the American Studies core courses as well as choices from all other American Studies courses.

3 Students must take at least three courses outside of the major selected in consultation with the American Studies director and congruent with an American Studies focus. We recommend that at least 6 of these credits be in American history or literature.

4 Students must take the Senior Seminar in their final year of study (usually offered in Fall semester). Only in rare circumstances and with special permission can students satisfy the capstone by taking AMST 4098.

Distinction in Major

American Studies majors may graduate with distinction in the major if they have a GPA of at least 3.5 in the major and a cumulative GPA of at least 3.0.

**Total Credit Hours:** 123

1. Choose this course with the American Studies Director.
2. Students must take AMST 4097 (usually offered in fall semester) in their final year of study. Only in rare circumstances and with special permission can students satisfy the capstone by taking AMST 4098.

**Minor in Asian American Studies**

This interdisciplinary minor focuses on Asian American history, culture, and contemporary issues as well as their Asian roots and American context. The Asian American Minor is six courses (18 s.h.), four in Asian American Studies, one in American Studies, and one Asian Studies course under an Asian Studies or cross-listed number, as distributed in the requirements list.

In lieu of taking regular academic courses, students can earn credits through fieldwork and independent study under a professor’s guidance. This minor is a useful credential for majors in education, journalism and communication, social administration, health science, social science, humanities, history, pre-law studies, and business fields such as personnel and marketing.

**Requirements for the Minor**

**Asian American Courses**

Select four of the following: 12

- AMST 2107 Asian American Experiences
- AMST 1901 Honors American Lives
- AMST 3074 Introduction to Asian American Literature
- AMST 2096 Asian Diaspora
- AMST 2097 Asian Women in Transition

**American Studies Course on race or ethnicity**

Select one of the following: 1 3
AMST 2071 Immigrant Experiences in America
AMST 2072 Puerto Ricans in Philadelphia
AMST 3071 African American Experiences
AMST 3101 Latino Identity in the U.S.
ITAL 4161 Italian American Literature and Culture

Asian Studies Course
Select one course under an Asian Studies or cross-listed number ² 3

Total Credit Hours 18

1 or an alternative approved by an Asian Studies faculty advisor
2 Advisors can help choose from a list of over 60 courses.

Minors are awarded only at the time of completion of the bachelor’s degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor’s degree.

Minor in American Studies

Requirements for the American Studies Minor
Select six American Studies courses, at least three of which should be taken from the American Studies Core Areas listed below: 18

American Biography and Work
AMST 1001 American Lives
or AMST 1901 Honors American Lives
AMST 1002 Key Documents in American Culture Before World War I
AMST 1042 Work in America

American Culture
AMST 2011 The Arts in America
AMST 2012 American Things: Introduction to Material Culture
AMST 2022 Museums and American Culture
AMST 3011 Photography in America
AMST 3012 Film and American Society
AMST 3013 The Documentary Mode
AMST 3061 Media and American Popular Culture
AMST 2120 Topics in American Culture ¹
or AMST 2900 Honors Topics in American Culture

Place in American Life
AMST 2051 American Places: Home, City, Region
or AMST 2951 Honors American Places: Home, City, Region
AMST 2021 Philadelphia Neighborhoods
AMST 3022 Architecture, Urban Design, and American Culture
AMST 3051 American Frontiers
or AMST 3951 Honors American Frontiers
AMST 2001 Tourism in America
AMST 2120 Topics in American Culture ¹
or AMST 2900 Honors Topics in American Culture

Diversity in America
AMST 2096 Asian Diaspora
AMST 2097 Asian Women in Transition
AMST 3096 The American Woman: Visions and Revisions

Change in America
AMST 2041 Technology and American Culture
AMST 2064 America in the 1950’s
AMST 3041 Contemporary Trends in the American Workplace
AMST 3032 Literature and Political Change
AMST 3033  Courtroom in American Society
AMST 3901  Honors Ideal America: Reform, Revolution, and Utopia
AMST 3031  Political Protest and Culture in the '60s
or AMST 3931  Honors Political Protest and Culture in the 60's
AMST 3075  Literature of American Slavery
AMST 2031  Radicalism in the United States
AMST 2032  Critical Moments in the American Past
AMST 2065  Global America
AMST 2120  Topics in American Culture
or AMST 2900  Honors Topics in American Culture

1 Specific subjects change each semester. See class schedule for information on a particular offering.

Minors are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

jessica.brennan@temple.edu

Anthropology is the study of human origins, development, and diversity. Anthropologists explore the ways in which people understand and adapt to living in a variety of settings, ranging from urban environments to rural villages, all over the world and across time. Anthropologists are interested in investigating such questions as: What does it mean to be human? What are the historical, social, political, economic, and environmental pressures that have helped shape the experiences of particular groups of people? How do human beings interact with the physical environment? Does the language that one speaks affect the ways in which one thinks and experiences the world? Anthropology includes four broad sub-fields, all of which are well represented at Temple University: Cultural Anthropology, Archaeology, Biological Anthropology, and Linguistic Anthropology.

Undergraduate majors in Anthropology pursue one of three courses of study: General Anthropology, the Human Biology concentration, or the Visual Anthropology track. Laboratory facilities, internships, fieldwork, and experiential learning courses provide students with practical experiences in all of Anthropology's sub-fields. A minor can be taken in General Anthropology or in Visual Anthropology.

**Programs**

- Bachelor of Arts in Anthropology (p. 784)
- Bachelor of Arts in Anthropology: Human Biology Concentration (p. 788)
- Bachelor of Arts in Anthropology: Visual Anthropology Track (p. 791)
- Minor in Anthropology (p. 794)
- Minor in Visual Anthropology (p. 794)

**Bachelor of Arts in Anthropology**

**General Anthropology**

The general anthropology major is intended to give students a foundation in all of the four sub-fields associated with the discipline of anthropology. Each of the sub-fields requires the development of a number of skills, including: formulating hypotheses; developing research programs and proposals; applying theories to the interpretation of artifacts and other data; and gathering ethnographic information through participant-observation. There is
sufficient flexibility in the requirements for the general anthropology major so that a student with an interest in a specific sub-field can focus their program of study in that area - or not, if a more general program is of interest.

With its focus on human diversity and its emphasis on cultural relativism, the general anthropology major well prepares students for the issues they are likely to encounter in today’s workplaces. At Temple we offer a number of courses on such topics as the Anthropology of Policy, Medical Anthropology, and Urban Anthropology, which prepare students for careers in public administration, social work, health policy, urban planning, and other aspects of public policy-related work, in addition to professional careers in fields such as business, law, and medicine. Anthropology students are also well-prepared to participate in activities which call for cultural sensitivity and an understanding of cultural differences, such as the teaching of English as a foreign language and other work with immigrant communities or work in the global marketplace. A variety of courses on archaeology prepare students for careers in the field of cultural resources management and historic preservation.

Interested students can contact the faculty advisor for additional information. A brochure describing the General Anthropology major can be obtained in the department.

Summary of Degree Requirements

University Requirements:

• MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
• All Temple students must take a minimum of two writing-intensive courses as part of the major. All General Anthropology majors take ANTH 2396 and one of the following writing-intensive courses for this requirement: ANTH 4196, ANTH 4398, ANTH 4596, or ANTH 4897.
• Students must complete requirements of the General Education (GenEd) Program. See the General Education (p. 143) section of the Undergraduate Bulletin for more details.

College of Liberal Arts Requirements:

• Completion of a minimum of 123 credits, including:
  • 90 credits in CLA/CST courses;
  • 45 credits of which must be at the upper level (numbered 2000-4999).
    • For Social Science majors, 6 upper level credits (numbered 2000-4999) must be taken in Humanities Subject Areas: Arabic, Chinese, English, French, German, Greek (Ancient), Greek and Roman Classics, Hebrew, Hindi, Italian, Japanese, Latin, Philosophy, Religion, Russian, and Spanish in the College of Liberal Arts, Art History in the Tyler School of Art, or any department in the College of Science and Technology.
• A minimum GPA of 2.0, cumulatively, in CLA/CST coursework, and in the major.
• Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.
• Foreign Language/Global Studies Requirements:
  • All students must complete or test out of the first and second levels of a foreign language - these courses are numbered 1001 and 1002;
  • All students must complete at least one course from the GenEd Global/World Society category; and
  • All Bachelor of Arts students must complete one of the following options:
    • Third semester of a foreign language;
    • Demonstrated proficiency beyond the third semester in a foreign language (placement exam or certification from the language department);
    • Take one Global Studies course from the list on the CLA College Graduation Requirements (p. 755) page;
    • Study Abroad at an approved program; or
    • Take a second General Education Global/World Society course.
• Notes on Foreign Language Study
  • The third level of language is numbered 1003 in French, German, Italian, Spanish, and Portuguese and numbered 2001 in all other foreign language subjects.
  • Students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honor society Phi Beta Kappa. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)
  • See the College of Liberal Arts Policies (p. 753) section of this Bulletin for more information on the Foreign Language Placement, Regression in Coursework, and guidelines for students’ other experiences with language.

General Electives are typically one-third of a student's program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

Major Requirements (37-38 credits):

Fundamentals Courses
ANTH 2104  Fundamentals of Archaeology  
ANTH 2396  Fundamentals of Cultural Anthropology  
ANTH 2507  Fundamentals of Linguistic Anthropology  
ANTH 2705  Fundamentals of Biological Anthropology  

Methods Course
Select one of the following:  3-4
ANTH 3170  Methods in Archaeology  
ANTH 3175  Heritage Management in Archaeology  
ANTH 3189  Field Session in Archaeology  
ANTH 3389  Fieldwork in Ethnography  
ANTH 3444  Advanced Production of Anthropological Media  
ANTH 3509  Language Socialization and Cultural Reproduction  
ANTH 3510  Theory and Method in Linguistic Anthropology  
ANTH 3770  Methods in Physical Anthropology  
ANTH 3771  Quantitative Methods in Anthropology  

Capstone Course
Select one of the following:  3
ANTH 4196  Theory and Practice of Contemporary Archaeology  
ANTH 4398  Research in Socio-Cultural Anthropology  
ANTH 4596  Capstone in Linguistic Anthropology  
ANTH 4897  Research in Biological Anthropology  

Anthropology Electives  6
Select a minimum of three advanced electives in Anthropology numbered between 3000-4999  9
Select three upper-level electives numbered 2000-4999  9

Total Credit Hours  37-38

---

1  Required for all Archaeology courses numbered 3000+.
2  Required for all Cultural & Visual Anthropology courses numbered 3000+.
3  Required for all Linguistic Anthropology courses numbered 3000+.
4  Required for all Biological Anthropology courses numbered 3000+.
5  Additional methods courses can be taken as electives; ANTH 3170 and ANTH 3770 are topics courses and may be taken multiple times for additional credit.
6  Note: Electives may not have been used to satisfy other requirements of the major.

Distinction in Major
Anthropology majors may graduate with distinction in the major if they have earned a GPA of 3.5 or higher.

Bachelor of Arts in Anthropology: Human Biology Concentration

The Human Biology concentration in Anthropology prepares students for careers in medicine, dentistry, physical therapy, optometry, podiatry, and other allied health fields. Human Biology students major in Anthropology but take departmental courses primarily in biological anthropology. These courses deal in human genetics, human paleontology, human physiology, and human reproductive biology and behavior. They stress an evolutionary perspective on humans and integrate molecular, whole-organism, population, and species-level data on humans. The Human Biology concentration also includes required courses in biology, and elective options in human anatomy, physiology, and public health. This program also encourages students to take courses in other disciplines to fulfill admission requirements to professional schools in the health sciences. As a result, our students have the broad, liberal arts background that many professional schools find attractive.

Interested students should contact the pre-med advisor at 1810 Liacouras Walk, 1st Floor, or the Human Biology Concentration advisor, Dr. Charles Weitz, at 215-204-7330 or weitz@temple.edu. A brochure describing the Human Biology Concentration can be obtained in the Anthropology Department, room 209, Gladfelter Hall.

Summary of Degree Requirements

University Requirements:

- MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
- All Temple students must take a minimum of two writing-intensive courses as part of the major. All students majoring in the Anthropology Human Biology concentration must take ANTH 3796 and ANTH 4897.
- Students must complete requirements of the General Education (GenEd) Program. See the General Education section of the Undergraduate Bulletin for more details.

College of Liberal Arts Requirements:

- Completion of a minimum of 123 credits, including:
  - 90 credits in CLA/CST courses;
  - 45 credits of which must be at the upper level (numbered 2000-4999),
    - For Social Science majors, 6 upper level credits (numbered 2000-4999) must be taken in Humanities Subject Areas: Arabic, Chinese, English, French, German, Greek (Ancient), Greek and Roman Classics, Hebrew, Hindi, Italian, Japanese, Latin, Philosophy, Religion, Russian, and Spanish in the College of Liberal Arts, Art History in the Tyler School of Art, or any department in the College of Science and Technology.
  - A minimum GPA of 2.0, cumulatively, in CLA/CST coursework, and in the major.
  - Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.

- Foreign Language/Global Studies Requirements:
  - All students must complete or test out of the first and second levels of a foreign language - these courses are numbered 1001 and 1002;
  - All students must complete at least one course from the GenEd Global/World Society category; and
  - All Bachelor of Arts students must complete one of the following options:
    - Third semester of a foreign language;
    - Demonstrated proficiency beyond the third semester in a foreign language (placement exam or certification from the language department);
    - Take one Global Studies course from the list on the CLA College Graduation Requirements (p. 755) page;
    - Study Abroad at an approved program; or
    - Take a second General Education Global/World Society course.

- Notes on Foreign Language Study
  - The third level of language is numbered 1003 in French, German, Italian, Spanish, and Portuguese and numbered 2001 in all other foreign language subjects.
  - Students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honor society Phi Beta Kappa. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)
  - See the College of Liberal Arts Policies (p. 753) section of this Bulletin for more information on the Foreign Language Placement, Regression in Coursework, and guidelines for students’ other experiences with language.
General Electives are typically one-third of a student’s program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

**Major Requirements (39 credits):**

 Completion of either Biology sequence fulfills the GenEd Science & Technology requirement.

**Bachelor of Arts in Anthropology: Visual Anthropology Track**

The Visual Anthropology curriculum emphasizes a well-rounded liberal arts background and a comprehensive understanding of the world's varied systems of visual representation. The Visual Anthropology curriculum allows students to combine cultural anthropology with the study and practice of visual communication. Courses in the Visual Anthropology curriculum combine topics and methods familiar to the social sciences, humanities, and media arts. It is well suited to those students interested in popular culture as well as the fine arts; documentary and ethnographic film as well as feature film; all forms of artistic performance, including the folk arts, fine arts, popular arts, and media arts; televisal communication, including both broadcast and narrowcast forms; and home media and alternative media. Additional attention is now dedicated to relationships of globalization and New Media.

In the Visual Anthropology curriculum, literary traditions and criticism find a place alongside pictorial traditions and media criticism. Students may do original research that involves still photography and/or video production. Students apply field methods familiar to cultural anthropology to achieve a better understanding of the processes and products of visual communication. Laboratories are available for both still photography and video production.

There are ongoing field programs in North America, Japan, and India. The summer program in India is intended to investigate Indian civilization through an anthropological and historical approach of its religions and artistic traditions, both ancient and contemporary. For more details on the summer program in India, go to the Temple University in India web site (http://studyabroad.temple.edu/sites/temple-summer-in-india).

Interested students should contact the Visual Anthropology Advisor, Jayasinhji Jhala, at 215-204-7727 or jjhala@temple.edu. A brochure describing the Visual Anthropology curriculum can be obtained in the Anthropology Department, room 209, Gladfelter Hall.

**Summary of Degree Requirements**

**University Requirements:**

- MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.

- All Temple students must take a minimum of two writing-intensive courses as part of the major. All Visual Anthropology majors take ANTH 2396 and ANTH 4496.

- Students must complete requirements of the General Education (GenEd) Program. See the General Education (p. 143) section of the Undergraduate Bulletin for more details.

**College of Liberal Arts Requirements:**

- Completion of a minimum of 123 credits, including:
  - 90 credits in CLA/CST courses;
  - 45 credits of which must be at the upper level (numbered 2000-4999).

  - For Social Science majors, 6 upper level credits (numbered 2000-4999) must be taken in Humanities Subject Areas: Arabic, Chinese, English, French, German, Greek (Ancient), Greek and Roman Classics, Hebrew, Hindi, Italian, Japanese, Latin, Philosophy, Religion, Russian, and Spanish in the College of Liberal Arts, Art History in the Tyler School of Art, or any department in the College of Science and Technology.

  - A minimum GPA of 2.0, cumulatively, in CLA/CST coursework, and in the major.
• Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.

• Foreign Language/Global Studies Requirements:
  • All students must complete or test out of the first and second levels of a foreign language - these courses are numbered 1001 and 1002;
  • All students must complete at least one course from the GenEd Global/World Society category; and
  • All Bachelor of Arts students must complete one of the following options:
    • Third semester of a foreign language;
    • Demonstrated proficiency beyond the third semester in a foreign language (placement exam or certification from the language department);
    • Take one Global Studies course from the list on the CLA College Graduation Requirements (p. 755) page;
    • Study Abroad at an approved program; or
    • Take a second General Education Global/World Society course.

• Notes on Foreign Language Study
  • The third level of language is numbered 1003 in French, German, Italian, Spanish, and Portuguese and numbered 2001 in all other foreign language subjects.
  • Students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honor society Phi Beta Kappa. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)
  • See the College of Liberal Arts Policies (p. 753) section of this Bulletin for more information on the Foreign Language Placement, Regression in Coursework, and guidelines for students' other experiences with language.

General Electives are typically one-third of a student’s program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

Major Requirements - Visual Anthropology (36-37 credits):

1 Required for all Cultural & Visual Anthropology courses numbered 3000+

Minors are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Arabic

Programs

• Certificate of Specialization in Arabic (p. 795)
• Minor in Arabic (p. 795)

Certificate of Specialization in Arabic

A Certificate of Specialization in Arabic focuses on learning language skills and developing a strong foundation for the effective use of Arabic socially and professionally. This program should be of particular interest to students considering careers in international business, government service, or other professions where foreign language proficiency is important. This program has two tracks: one for students who enter Temple University with little or no previous background in Arabic; and one for students who enter Temple University with a previous background in Arabic.

The curriculum consists of six developmentally-sequenced semesters of instruction in Arabic. Students with no background in Arabic will begin the six-course sequence with ARBC 1001 and will complete the certificate with a total of 20 credits. Students who enter the program with a placement above ARBC 1001 will need to complete the six-course requirement by taking either or both ARBC 4183 and ARBC 4283, and will complete the certificate with 18-19 credits. A grade of C- or higher must be earned in all required courses to qualify for the certificate.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ARBC 1001</td>
<td>Arabic Elements I 1</td>
<td>4</td>
</tr>
<tr>
<td>ARBC 1002</td>
<td>Arabic Elements II 1</td>
<td>4</td>
</tr>
<tr>
<td>ARBC 2001</td>
<td>Arabic Intermediate I</td>
<td>3</td>
</tr>
<tr>
<td>ARBC 2002</td>
<td>Arabic Intermediate II</td>
<td>3</td>
</tr>
<tr>
<td>ARBC 3001</td>
<td>Arabic Advanced I</td>
<td>3</td>
</tr>
<tr>
<td>ARBC 3002</td>
<td>Arabic Advanced II</td>
<td>3</td>
</tr>
</tbody>
</table>

1 Students who place above ARBC 1001 will need to complete the six-course requirement by taking either or both ARBC 4183 and ARBC 4283.

Certificates are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Minor in Arabic

The minor in Arabic focuses on intermediate and advanced language skills and an understanding of contemporary Arabic culture. Students who already have a grounding in Arabic and are interested in languages, literature, film, and culture will find this minor of particular interest. This program is ideal for students considering careers in international business, government service, or other professions where foreign language proficiency is important. Students who place out of one or more of the Arabic language courses may replace those requirements with independent study or electives as approved by the Arabic faculty advisor.

<table>
<thead>
<tr>

<td>3</td>
</tr>
</tbody>
</table>
Minors are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Asian & Middle Eastern Languages & Studies

Asian Studies

Asian Studies draws on the resources of many departments to provide a comprehensive program of study on Asia (especially East Asia). Majors may concentrate on a geographic area, field, or theme(s). By combining language with the study of politics, history, society, art, religion, philosophy, and literature, each student can construct a major tailored to his or her individual interests. The curriculum gives students a foundation for living or working in
Asia, or continuing their studies through developing a knowledge base, cross-cultural sensitivity, analytic thinking, and communication and writing skills in English and Asian languages.

The Asian Studies program will assist students in:

- understanding the broad foundations of at least one major Asian culture, including the history, culture, socio-economic, and political organization;
- recognizing the utility of different humanistic and social science disciplines in understanding a culture;
- understanding the distinction between theory and data and the links between the two components while drawing generalizations from actual social experience;
- recognizing the way language serves as a foundation of culture;
- understanding the issues and requirements of cross-cultural communication; and
- taking more initiative in educating themselves, to make analytical generalizations, to make ethical choices, and to feel confident in these and other exercises of personal responsibility.

Career Opportunities

After graduation, students find employment in a variety of fields, including international business, government, nonprofit organizations, and educational institutions. Some choose to continue their education in law, business, or pursue doctoral degrees in related academic fields, including history, religion, and Asian Studies.

Study Abroad at Temple University Japan

Temple University’s campus in Tokyo, Japan (TUJ) can provide students with experience abroad while taking their coursework. If you have an interest in studying at TUJ consult the Office of Education Abroad and Overseas Campuses (http://studyabroad.temple.edu/sites/temple-japan-semester) and the TUJ web site (https://www.tuj.ac.jp).

Student Organization

The East West Club offers lectures, films, and career development programs, as well as fun and fellowship through extracurricular activities.

Programs

- Bachelor of Arts in Asian Studies (p. 797)
- Certificate in Asian Business & Society (p. 800)
- Minor in Asian American Studies (p. 801)
- Minor in Asian Studies (p. 802)

Bachelor of Arts in Asian Studies

Summary of Degree Requirements

University Requirements:

- MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
- All Temple students must take a minimum of two writing-intensive courses as part of the major. The specific courses that will fulfill this requirement are ASST 4096 and one of the following: ASST 2097, ASST 2098, ASST 2696, ASST 3696, ASST 4696.
- Students must complete requirements of the General Education (GenEd) Program. See the General Education (p. 143) section of the Undergraduate Bulletin for more details.

College of Liberal Arts Requirements:

- Completion of a minimum of 123 credits, including:
  - 90 credits in CLA/CST courses;
  - 45 credits of which must be at the upper level (numbered 2000-4999).
  - For Social Science majors, 6 upper level credits (numbered 2000-4999) must be taken in Humanities Subject Areas: Arabic, Chinese, English, French, German, Greek (Ancient), Greek and Roman Classics, Hebrew, Hindi, Italian, Japanese, Latin, Philosophy, Religion, Russian, and Spanish in the College of Liberal Arts, Art History in the Tyler School of Art, or any department in the College of Science and Technology.
- A minimum GPA of 2.0, cumulatively, in CLA/CST coursework, and in the major.
- Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.

Foreign Language/Global Studies Requirements:

- The language proficiency requirement of the Asian Studies major exceeds the minimum requirements of the College of Liberal Arts; no additional coursework is required.
Notes on Foreign Language Study

- The third level of language is numbered 1003 in French, German, Italian, Spanish, and Portuguese and numbered 2001 in all other foreign language subjects.
- Students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honor society Phi Beta Kappa. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)
- See the College of Liberal Arts Policies (p. 753) section of this Bulletin for more information on the Foreign Language Placement, Regression in Coursework, and guidelines for students' other experiences with language.

General Electives are typically one-third of a student's program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

Major Requirements (minimum 33 credits):

Foundation Courses
Select two of the following: 6

- ASST 1801 Chinese and Japanese Literature in Cultural Context
- ASST 2074 Geography of East and South Asia
- ASST 2501 Introduction to East Asia: China
- ASST 2502 Introduction to East Asia: Japan

Language
Select one of the following (fourth semester): 3

- HIN 2002 Hindi Intermediate II
- CHI 2002 Chinese Intermediate II
- JPNS 2002 Intermediate Japanese II
- KRN 2002 Korean Intermediate II
- VTNM 2002 Second-Year Vietnamese II

Writing-Intensive Elective
Select one of the following: 3

- ASST 2097 Asian Diaspora
- ASST 2098 Japanese Popular Culture and its Literature
- ASST 2696 Introduction to Islam
- ASST 3696 Asian Women in Transition
- ASST 4696 Modern Japan: Empire, War, Society

Asian Studies Electives
Select six electives from three different subject areas: 18

Capstone Course
ASST 4096 Seminar in Asian Studies: 3

Total Credit Hours 33

Asian Language Proficiency Requirement
The language requirement may be satisfied by coursework or proficiency in the language for heritage speakers. The examination tests listening, speaking, and reading comprehension as well as written communications in any Asian language approved by the Asian Studies advisor.

Students who demonstrate proficiency beyond the fourth semester are not required to replace this with an Asian Studies approved elective.

Distinction in the Major
Asian Studies majors may graduate with distinction in the major if they have a GPA of at least 3.5 in the major and a cumulative GPA of at least 3.0.

</table>

1. IB 2501 and ASST 2511 are cross-listed.
2. The country of the Asian Studies Country Elective and the Asian Studies Writing-Intensive Elective must match the country of the language studied. For example, if the language requirement is met with Chinese, then courses on China must be chosen for both the Country and Writing-Intensive Electives.
3. The language requirement may also be satisfied by examination of speaking, listening and interpreting, and reading skills in any Asian language approved by the Asian Studies faculty advisor.

Certificates are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

**Minor in Asian American Studies**

This interdisciplinary minor focuses on Asian American history, culture, and contemporary issues as well as their Asian roots and American context. The Asian American Minor is six courses (18 s.h.), four in Asian American Studies, one in American Studies, and one Asian Studies course under an Asian Studies or cross-listed number, as distributed in the requirements list.

In lieu of taking regular academic courses, students can earn credits through fieldwork and independent study under a professor's guidance. This minor is a useful credential for majors in education, journalism and communication, social administration, health science, social science, humanities, history, pre-law studies, and business fields such as personnel and marketing.

**Requirements for the minor**

**Asian American Courses**

Select four of the following:  

<table>
<thead>
<tr>

1. May incorporate the study of South and Southeast Asia, ASST 1051, ASST 1052, if approved by the Asian Studies advisor.

2. The language requirement may be satisfied by examination of oral/aural and reading skills in any Asian language approved by the Asian Studies head advisor.

Minors are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

## Chinese

The Chinese area of study is part of the Department of Asian and Middle Eastern Languages and Studies (formerly named the Department of Critical Languages).

### Programs

- Certificate of Specialization in Chinese (p. 802)
- Minor in Chinese (p. 803)

## Certificate of Specialization in Chinese

A certificate of specialization in Chinese focuses on learning language skills and developing a strong foundation for the effective use of Chinese socially and professionally. This program should be of particular interest to students considering careers in international business, government service, or other professions where foreign language proficiency is important. This program also contributes to meeting the diverse language needs of students with personal or academic interests in China and its culture. A grade of C- or higher must be earned in all required courses.

**Total Credit Hours** 20
Certificates are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

**Minor in Chinese**

The minor in Chinese focuses on learning Chinese language, literature, film, and culture. This program will be of particular interest to students considering careers in international business, government service, or other professions where Chinese language proficiency is important. This program also contributes to meeting the diverse language needs of students with personal or academic interests in China and its culture.

This minor requires 5 courses taken in Chinese and one course focused on some aspect of Chinese history, politics, or culture taken in another department or program in the College of Liberal Arts. Students should see the faculty in the Department of Asian and Middle Eastern Languages and Studies (formerly Critical Languages Department) for more information on placement and appropriate course selection.

The minor can only be taken as part of an undergraduate degree program. An average of 2.0 in all Chinese courses as well as a minimum grade of C- must be earned in all courses used for the minor. The specific courses required for the program are detailed in the Course List below.

Students in the Department of Greek and Roman Classics study the cultures and languages of two major civilizations of the ancient Mediterranean world. Classics is an interdisciplinary field of study which encompasses major disciplines of the liberal arts: languages, history, literature, art, and philosophy. Students select from two different major concentration options: either Classical Languages & Literature or Classical Civilization, depending on their interests and goals.

Classics offers a sound liberal arts background that prepares students for any career. Classics majors have held senior positions in government, law, and public service organizations, have founded and headed companies and organizations, and have worked as correspondents and journalists. Recent Temple Classics majors have gone on to law school, veterinary school, graduate school, and business and teaching careers.

Classics Majors and Minors are encouraged to study a semester at Temple’s Rome Campus.
The organization for majors and minors is the Temple Classics Club, and there is a chapter of the national honorary society for Classics, Eta Sigma Phi, on campus.

Programs

- Bachelor of Arts in Classics with a Concentration in Classical Civilizations (p. 804)
- Bachelor of Arts in Classics with a Concentration in Classical Languages and Literature (p. 807)
- Minor in Ancient Mediterranean Studies (p. 809)
- Minor in Classical Languages and Literature (p. 810)

Bachelor of Arts in Classics with a Concentration in Classical Civilizations

Summary of Degree Requirements

1. **University Requirements:**
   - MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
   - All Temple students must take a minimum of two writing-intensive courses as part of the major. See below for a list of the specific courses required for your major.
   - Students must complete requirements of the General Education (GenEd) Program. See the General Education (p. 143) section of the Undergraduate Bulletin for more details.

2. **College of Liberal Arts Requirements:**
   - Completion of a minimum of 123 credits, including: 90 credits in CLA/CST courses, 45 credits of which must be at the upper level (numbered 2000-4999). For Humanities majors, 6 upper level credits must be earned in the Social Sciences: African American Studies, American Studies, Anthropology, Asian Studies, Criminal Justice, Economics, Environmental Studies, Geography and Urban Studies, History, Jewish Studies, Latin American Studies, Lesbian, Gay, Bisexual and Transgender Studies, Mathematical Economics, Neuroscience: Systems, Behavior and Plasticity, Political Science, Psychology, Sociology, Women's Studies, or any department in the College of Science and Technology.
   - A minimum GPA of 2.0, cumulatively, in CLA/CST coursework, and in the major.
   - Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.

3. **Foreign Language/Global Studies Requirements:**
   - All students must complete the second level of a foreign language;
   - All students must complete at least one course from the GenEd Global/World Society category; and
   - All students must complete one of the following options:
     - Third level of a foreign language;
     - Demonstrated proficiency in a foreign language;
     - A second General Education Global/World Society course;
     - Study Abroad at an approved program; or
     - Take one Global Studies course from the list on the CLA College Graduation Requirements (p. 755) page.

4. **General Electives** are typically one-third of a student's program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

5. **Major Requirements (a minimum of 35 credits in Ancient Greek, Latin, Greek and Roman Classics and related course work):**

   **Required Courses**
   - GRC 2101 The Greeks 3
   - GRC 2102 The Romans 3

   **Language Courses**
   Select two courses in Ancient Greek or two courses in Latin language: 7-8
   - GRKA 1001 Ancient Greek 1
   - GRKA 1002 Ancient Greek 2
   - LAT 1001 Latin 1
   - LAT 1002 Latin 2

   **Writing Intensive Courses**
   Select two of the following: 6
   - GRC 3596 Ancient City: Periclean Athens
Schools, Colleges, and Divisions

<table>

<td>Ancient City: Byzantium</td>
</tr>
<tr>
<td>GRC 3897</td>
<td>Ancient City: Jerusalem</td>
</tr>
</tbody>
</table>

**Art History Course**

Select one of the following: 4

- ARTH 2105 Roman Art and Archaeology
- ARTH 2111 Minoan Art
- ARTH 2135 Art and Archaeology of Ancient Rome and the Mediterranean
- ARTH 2215 Late Antique/Byzantine Art
- ARTH 2129 Greek and Roman Sculpture
- ARTH 2196 Greek and Roman Sculpture
- ARTH 2216 Early Medieval Visual Culture

**Greek & Roman Classic Courses**

Select three of the following: 9

- GRC 1003 Greek Drama and Culture
- GRC 1004 Introduction to the Ancient City
- GRC 2001 Slavery in Antiquity
- GRC 2002 Gender in Classical Antiquity
- GRC 2003 Race: Ancient and Modern
- GRC 2011 Classical Greek and Roman Mythology
- GRC 3000 Topics in Classical Culture
- GRC 3096 Romans and Their Literature
- GRC 3196 Classical Greek and Roman Mythology
- GRC 3296 Comparative Mythology
- GRC 3311 Ancient Greek Historians
- GRC 3312 Ancient Roman Historians
- GRC 3396 Classical Epic
- GRC 3496 Writing Seminar

Select one course in a related department with consultation of your faculty advisor. This elective may be taken in Anthropology, Art History, History, Philosophy or Religion. 3

**Total Credit Hours** 35

1 GRKA 1003 may be substituted for GRKA 1001 and GRKA 1002

**Distinction in Major**

Distinction in Major requires a senior thesis and a minimum GPA of 3.5 in Greek, Latin, or Greek and Roman Classics courses.

**Suggested Academic Plan**

**Bachelor of Arts in Classics: Classical Civilizations Concentration**

**Requirements for New Students starting in the 2015-2016 Academic Year**

**Year 1**

Total Credit Hours 18-20

1 Students who demonstrate proficiency in Ancient Greek or Latin will need to take two additional courses. Students may opt to take either advanced courses in the language or additional electives. See faculty advisor for assistance in course selection.

2 Cycle of five cities offered: Jerusalem, Augustan Rome, Byzantium, Periclean Athens, Hellenistic Alexandria.

3 The elective can be from this department or from another department, such as Anthropology, Art History, Religion, History, or Philosophy, as approved by Greek & Roman Classics department advisors.

Minors are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

**Minor in Classical Languages and Literature**

**Requirements**

**Classical Language Requirement** 0-14

Select either Ancient Greek 1-4 or Latin 1-4 (or demonstrate proficiency):

Select four Greek & Roman Classic Electives 12

At least two electives must be at the 2000 level or higher. Courses must be selected from Ancient Greek, Latin, Greek and Roman Classics or courses on aspects of the ancient Greek and Roman world offered in other Temple University departments such as Art History, History, Religion, and Philosophy with approval of the Classics faculty advisor.

Total Credit Hours 15-29

1 GRKA 1003 may be used to substitute for GRKA 1001 and GRKA 1002.

Minors are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

**Criminal Justice**

5th Floor Gladfelter Hall
Mission and Goals

The mission of the Bachelor of Arts program in Criminal Justice is to foster a comprehensive understanding of the nature of crime and the effectiveness and fairness of society’s efforts to prevent and control it. Students engage in a multi-disciplinary approach to the study of crime, offenders, and victims, as well as the agencies, goals, laws, policies, and processes of the criminal justice system. Emphasis is upon promoting critical thinking about the kinds of questions and problems that shape developments in research, practice, policy and reform, and the skills utilized by scholars and professionals in the field.

Majoring in criminal justice helps to prepare students for careers as practitioners, researchers, and academics in a variety of public and private sector professions in both adult and juvenile systems of justice, at the federal, state, and local levels of government. It also provides the core liberal arts foundations for students interested in alternative career paths or advanced education in law school and graduate programs in criminal justice, criminology, and related social-science fields.

Internship

Many students opt to take our specialized internship program, earning 3 credits for CJ 4077 Criminal Justice Practicum (which can be used toward the electives in the major) and 3, 6, or 9 credits in the CJ 4087 Criminal Justice Practicum Lab, which count towards the 123 credits required for graduation but may not be used to fulfill any requirements of the Criminal Justice major. This program runs in the Fall, Spring, and Summer (over the two summer sessions).

Criminal Justice Honors Program

The Department has its own Honors Program in which majors who are also University Honors students may tailor their honors experience to include a criminal justice specialization. In addition to the honors-level elective courses offered, an invaluable part of the program is the opportunity for students to develop an honors thesis based upon an undergraduate research project individually mentored by a criminal justice professor.

Criminal Justice 4+1 BA/MA Program

High-achieving undergraduates will be invited by the faculty of the Criminal Justice Department to apply for the BA/MA 5 year program. Students admitted to this program begin taking graduate courses along with their undergraduate curriculum in their last three undergraduate semesters. They then complete the remaining requirements of a MA in Criminal Justice in the subsequent year. Up to 9 credits of graduate work may count for both the Bachelor’s and Master’s degree programs; these are used as Criminal Justice major electives in the undergraduate degree. Eligible students have a minimum 3.5 overall GPA and will have completed 83 credits of their overall program by the time they are admitted to this program in the spring of their Junior year. Students must have completed the following courses to be considered for this program: CJ 1001, CJ 2401, CJ 2601, and CJ 2602.

Eligible students will receive notification at the end of their Sophomore year, and applications will be accepted until September 30th of their Junior year.
Programs
- Bachelor of Arts in Criminal Justice (p. 812)
- Minor in Criminal Justice (p. 814)

Bachelor of Arts in Criminal Justice

Summary of Degree Requirements

University Requirements:
- MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
- All Temple students must take a minimum of two writing-intensive courses as part of the major. The specific courses required for this major are CJ 2696, and one of the following: CJ 4096, CJ 4098, or CJ 4196.
- Students must complete requirements of the General Education (GenEd) Program. See the General Education (p. 143) section of the Undergraduate Bulletin for more details.

College of Liberal Arts Requirements:
- Completion of a minimum of 123 credits, including:
  - 90 credits in CLA/CST courses;
  - 45 credits of which must be at the upper level (numbered 2000-4999).
  - For Social Science majors, 6 upper level credits (numbered 2000-4999) must be taken in Humanities Subject Areas: Arabic, Chinese, English, French, German, Greek (Ancient), Greek and Roman Classics, Hebrew, Hindi, Italian, Japanese, Latin, Philosophy, Religion, Russian, and Spanish in the College of Liberal Arts, Art History in the Tyler School of Art, or any department in the College of Science and Technology.
  - A minimum GPA of 2.0, cumulatively, in CLA/CST coursework, and in the major.
  - Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.
- Foreign Language/Global Studies Requirements:
  - All students must complete or test out of the first and second levels of a foreign language - these courses are numbered 1001 and 1002;
  - All students must complete at least one course from the GenEd Global/World Society category and
  - All Bachelor of Arts students must complete one of the following options:
    - Third semester of a foreign language;
    - Demonstrated proficiency beyond the third semester in a foreign language (placement exam or certifcation from the language department);
    - Take one Global Studies course from the list on the CLA College Graduation Requirements (p. 755) page;
    - Study Abroad at an approved program; or
    - Take a second General Education Global/World Society course.
- Notes on Foreign Language Study
  - The third level of language is numbered 1003 in French, German, Italian, Spanish, and Portuguese and numbered 2001 in all other foreign language subjects.
  - Students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honor society Phi Beta Kappa. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)
  - See the College of Liberal Arts Policies (p. 753) section of this Bulletin for more information on the Foreign Language Placement, Regression in Coursework, and guidelines for students’ other experiences with language.

General Electives are typically one-third of a student's program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

### Electives in Major
Select seven Criminal Justice electives numbered 2000-4999 (may not overlap with any of the above-noted courses or their equivalents) 2

Total Credit Hours 42

1 **DUPLICATE CREDIT WARNING:**
   - The following courses have similar content and students may only earn academic credit for one from each set:
     - CJ 4001 Crime and Social Policy OR CJ 4096 Writing Seminar: Crime and Social Policy
     - CJ 4101 Critical Issues in Law Enforcement OR CJ 4196 Writing Seminar: Critical Issues in Law Enforcement

2 A student may count CJ 4077 toward the Criminal Justice major electives. CJ 4087 does not count toward the major requirements.

### Distinction in Major
Criminal Justice majors may graduate with distinction in the major if they have earned a GPA of 3.5 in the major and a cumulative GPA of at least 3.25.

### Suggested Academic Plan
Please note that this is a suggested academic plan. Depending on your situation, your academic plan may look different.

The major in economics exposes a student to the economist's way of thinking about social problems and behavior. The major helps a student understand the economic aspect of current events and public policy and is good preparation for careers in law and business.

The student honorary fraternity is Omicron Delta Epsilon. Along with the more general student organization, The Economics Society, it provides opportunities for students to network with other students and with practicing economists in learning more about economics and finding internships and employment opportunities.

There is also a Cooperative Education option. Through this program, students may earn income while gaining valuable work experience which can enhance their job market prospects upon graduation. By completing an academic research project under the guidance of a faculty member, Co-op students may earn credit for ECON 3581.

Programs

Bachelor of Arts in Economics

The major in economics exposes a student to the economist's way of thinking about social problems and behavior. The major helps a student understand the economic aspect of current events and public policy and is good preparation for careers in law and business.

Pending approval, students who wish to earn a BA and an MA in Economics may do so in a combined 4+1 program. Students begin graduate study during their undergraduate program and are able to count some electives towards both degrees. This program is only open to students who will complete both degrees in a total of five years. See the Economics faculty advisor if you are considering this option.

The student honorary fraternity is Omicron Delta Epsilon. Along with the more general student organization, The Economics Society, it provides opportunities for students to network with other students and with practicing economists in learning more about economics and finding internships and employment opportunities.

There is also a Cooperative Education option. Through this program, students may earn income while gaining valuable work experience which can enhance their job market prospects upon graduation. By completing an academic research project under the guidance of a faculty member, Co-op students may earn credit for ECON 3581.

Summary of Degree Requirements

University Requirements:

- MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
• All Temple students must take a minimum of two writing-intensive courses as part of the major. The specific courses required for this major are ECON 3598 and one of the following: ECON 3596, ECON 3597, ECON 3696, ECON 3697.
• Students must complete requirements of the General Education (GenEd) Program. See the General Education (p. 143) section of the Undergraduate Bulletin for more details.

College of Liberal Arts Requirements:

• Completion of a minimum of 123 credits, including:
  • 90 credits in CLA/CST courses;
  • 45 credits of which must be at the upper level (numbered 2000-4999).
  • For Social Science majors, 6 upper level credits (numbered 2000-4999) must be taken in Humanities Subject Areas: Arabic, Chinese, English, French, German, Greek (Ancient), Greek and Roman Classics, Hebrew, Hindi, Italian, Japanese, Latin, Philosophy, Religion, Russian, and Spanish in the College of Liberal Arts, Art History in the Tyler School of Art, or any department in the College of Science and Technology.
• A minimum GPA of 2.0, cumulatively, in CLA/CST coursework, and in the major.
• Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.

• Foreign Language/Global Studies Requirements:
  • All students must complete or test out of the first and second levels of a foreign language, these are numbered 1001 and 1002;
  • All students must complete at least one course from the GenEd Global/World Society category; and
  • All Bachelor of Arts students must complete one of the following options:
    • Third semester of a foreign language;
    • Demonstrated proficiency beyond the third semester in a foreign language (placement exam or certification from the language department);
    • Take one Global Studies course from the list on the CLA College Graduation Requirements (p. 755) page;
    • Study Abroad at an approved program; or
    • Take a second General Education Global/World Society course.

• Notes on Foreign Language Study
  • The third level of language is numbered 1003 in French, German, Italian, Spanish, and Portuguese and numbered 2001 in all other foreign language subjects.
• Students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honors society Phi Beta Kappa. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)
• See the College of Liberal Arts Policies (p. 753) section of this Bulletin for more information on the Foreign Language Placement, Regression in Coursework, and guidelines for students other experiences with language.

### Bachelor of Arts in Mathematical Economics

Dimitrios Diamantaras, Advisor  
Department of Economics  
Ritter Annex, Room 623  
215-204-8169  
dimitrios.diamantaras@temple.edu

Boris A. Datskovsky, Advisor  
Department of Mathematics  
Wachman Hall, Room 632  
215-204-7847  
boris.datskovsky@temple.edu

The Departments of Economics and Mathematics offer the Mathematical Economics program as a platform for systematic concentration in the mathematical approach to economics. Economics has progressed in the last several decades by making extensive use of mathematical techniques. As a result, students who wish to pursue graduate study in economics, finance, accounting, and other disciplines that make an extensive use of economics need a thorough grounding in both economics and mathematics.
The Mathematical Economics curriculum provides this grounding with a broad selection of courses that cover all important areas of economics and the mathematical tools required for a critical, deep mastery of these areas. This program is especially recommended for those students who intend to pursue graduate studies in economics. The program and its requirements are described in full in the Intercollegial Programs (p. 161) section of this Bulletin.

## Certificate in Political Economy

William Lynn Holmes, Department of Economics  
215-204-8175  
whelmes@temple.edu

Sandra Suarez, Department of Political Science  
215-204-1468  
suarez@temple.edu

This is a joint program offered by the Department of Economics and the Department of Political Science leading to certificate of specialization in political economy.

### Purpose

The purpose of the Political Economy program is to provide undergraduate students with the opportunity to study more intensely the relationship between the political and economic spheres of society. The program is based on the belief that a focused examination of this relationship provides us with a better understanding of several social phenomena. Chief among these is a better understanding of public policy choices and the policy making process, as well as a better understanding of how government actions affect the process of economic change and vice versa.

For these reasons the Political Science and Economics departments offer an interdisciplinary certificate in Political Economy. The program is open to all matriculated undergraduate students. Applicants need not be declared majors in either economics or political science. The Political Economy program provides an excellent preparation for graduate study in the social sciences and for the study of law.

### Program Requirements

The program consists of two components: required core courses at the lower-division level and elective courses at the upper-division level.

#### Core Courses

All students must take the following core courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON 1101</td>
<td>Macroeconomic Principles</td>
<td>3</td>
</tr>
<tr>
<td>or ECON 1901</td>
<td>Honors Macroeconomic Principles</td>
<td>3</td>
</tr>
<tr>
<td>ECON 1102</td>
<td>Microeconomic Principles</td>
<td>3</td>
</tr>
<tr>
<td>or ECON 1902</td>
<td>Honors Microeconomic Principles</td>
<td></td>
</tr>
<tr>
<td>POLS 1101</td>
<td>The American Political System</td>
<td>3</td>
</tr>
<tr>
<td>or POLS 1911</td>
<td>Honors Introduction to American Politics</td>
<td></td>
</tr>
</tbody>
</table>

Select one of the following: (3 credits)

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>POLS 1201</td>
<td>Foreign Governments and Politics</td>
</tr>
<tr>
<td>or POLS 1921</td>
<td>Honors Foreign Governments and Politics</td>
</tr>
<tr>
<td>POLS 1301</td>
<td>International Politics</td>
</tr>
<tr>
<td>or POLS 1931</td>
<td>Honors International Politics</td>
</tr>
</tbody>
</table>

#### Elective Courses

All students must successfully complete (grade of C- or better) four courses from the following list. Two of the four courses must be in economics, and two courses must be in political science. Students should select courses that correspond to their own substantive interests and are encouraged to take cognate areas (e.g., if you choose international politics courses, also choose international economics courses). Students should plan their schedules well in advance, since some courses are not offered each semester.

Select two of the following: (6 credits)

Management Career Certificate

William Holmes, Advisor
215-204-8175
william.holmes@temple.edu

Erwin Blackstone, Advisor
215-204-5027
erwin.blackstone@temple.edu

This certificate program is designed for students who intend to seek employment in the business or nonprofit sectors of the economy. It is designed to provide students with skills that complement those acquired through a traditional liberal arts education and to make the students more appealing to potential employers.

Stephanie Morawski, Administrator
The English department has a distinguished faculty of nationally-known critics, writers, and scholars who will teach you, usually in small classes. You will choose from a range of exciting courses (about forty English courses each semester) and from interdisciplinary programs such as the Five-year Program in English and Education, or a double major in English and any other department throughout the university. Internships are offered with area institutions such as the Temple Press, the University of Pennsylvania Press, the Urban League, WHYY public radio, Philadelphia Magazine, United Way, the Red Cross, Bread and Roses, J. B. Lippincott Publishers, and the Academy of Natural Sciences. The department offers community-based projects, such as the New City Press and our Institute for the Study of Literature, Literacy, and Culture. There is an active program of readings by resident and visiting writers and artists. Students are active in writing and producing our literary magazine: Hyphen.

Programs

- Bachelor of Arts in English (p. 822)
- Bachelor of Arts in English with a Concentration in Creative Writing (p. 825)
- Certificate in Writing (p. 827)
- Minor in English (p. 828)

Bachelor of Arts in English

The English major helps students develop as readers of interesting, complex texts, including literary texts. Majors read writing from a variety of historical contexts and cultures; this experience builds their understanding of the relation between society and language. English majors become critical and reflective readers, aware of the history and development of writing in English. They are also good, inventive writers who are able to analyze problems, do careful and inventive research, argue and evaluate the arguments of others.

The English major is good preparation for a career in writing or editing—of stories, speeches, legal documents, advertising, research projects, poems, grant proposals, essays, or letters. English majors also find careers in publishing and journalism, public relations, business, industry, management, marketing, social services, and government. English is a strong pre-professional major for law, medicine, library science, and teaching, from the elementary to the post-secondary level.

Summary of Degree Requirements

University Requirements:

- MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
- All Temple students must take a minimum of two writing-intensive courses as part of the major. For the English major, these courses are ENG 2097 and a 4000 level Capstone Seminar.
- Students must complete requirements of the General Education (GenEd) Program. See the General Education (p. 143) section of the Undergraduate Bulletin for more details.

College of Liberal Arts Requirements:

- Completion of a minimum of 123 credits, including:
  - 90 credits in CLA/CST courses;
  - 45 credits of which must be at the upper level (numbered 2000-4999).
  - For Humanities majors, 6 upper level credits must be earned in the Social Science and interdisciplinary subject areas: African American Studies, American Studies, Anthropology, Asian Studies, Criminal Justice, Economics, Environmental Studies, Geography and Urban Studies, Global Studies, History, Jewish Studies, Latin American Studies, Lesbian, Gay, Bisexual, and Transgender Studies, Liberal Arts, Neuroscience (CLA), Political Science, Psychology, Sociology, Women's Studies, or any department in the College of Science and Technology.
  - A minimum GPA of 2.0, cumulatively, in all CLA/CST coursework, and in the major department.
  - Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.

- Foreign Language/Global Studies Requirements:
  - All students must complete or test out of the first and second levels of a foreign language - these courses are numbered 1001 and 1002;
  - All students must complete at least one course from the GenEd Global/World Society category; and
• All Bachelor of Arts students must complete one of the following options:
  • Third semester of a foreign language;
  • Demonstrated proficiency beyond the third semester in a foreign language (placement exam or certification from the language department);
  • Take one Global Studies course from the list on the CLA College Graduation Requirements (p. 755) page;
  • Study Abroad at an approved program; or
  • Take a second General Education Global/World Society course.

• Notes on Foreign Language Study
  • The third level of language is numbered 1003 in French, German, Italian, Spanish, and Portuguese and numbered 2001 in all other foreign language subjects.
  • Students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honor society Phi Beta Kappa. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)
  • See the College of Liberal Arts Policies (p. 753) section of this Bulletin for more information on the Foreign Language Placement, Regression in Coursework, and guidelines for students’ other experiences with language.

General Electives are typically one-third of a student's program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

1. Register with the English Department.
Bachelor of Arts in English with a Concentration in Creative Writing

The English major helps students develop as readers of interesting, complex texts, including literary texts. Majors read writing from a variety of historical contexts and cultures; this experience builds their understanding of the relation between society and language. English majors become critical and reflective readers, aware of the history and development of writing in English. They are also good, inventive writers who are able to analyze problems, do careful and inventive research, argue and evaluate the arguments of others.

The English major is good preparation for a career in writing or editing—of stories, speeches, legal documents, advertising, research projects, poems, grant proposals, essays, or letters. English majors also find careers in publishing and journalism, public relations, business, industry, management, marketing, social services, and government. English is a strong pre-professional major for law, medicine, library science, and teaching, from the elementary to the post-secondary level.

Summary of Degree Requirements

University Requirements:

- MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
- All Temple students must take a minimum of two writing-intensive courses as part of the major. For the English major, these courses are ENG 2097 and a 4000 level Capstone Seminar.
- Students must complete requirements of the General Education (GenEd) Program. See the General Education (p. 143) section of the Undergraduate Bulletin for more details.

College of Liberal Arts Requirements:

- Completion of a minimum of 123 credits, including:
  - 90 credits in CLA/CST courses;
  - 45 credits of which must be at the upper level (numbered 2000-4999).
    - For Humanities majors, 6 upper level credits must be earned in the Social Science and interdisciplinary subject areas: African American Studies, American Studies, Anthropology, Asian Studies, Criminal Justice, Economics, Environmental Studies, Geography and Urban Studies, Global Studies, History, Jewish Studies, Latin American Studies, Lesbian, Gay, Bisexual, and Transgender Studies, Liberal Arts, Neuroscience (CLA), Political Science, Psychology, Sociology, Women's Studies, or any department in the College of Science and Technology.
  - A minimum GPA of 2.0, cumulatively, in all CLA/CST course work, and in the major department.
  - Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.

- Foreign Language/Global Studies Requirements:
  - All students must complete or test out of the first and second levels of a foreign language - these courses are numbered 1001 and 1002;
  - All students must complete at least one course from the GenEd Global/World Society category; and
  - All Bachelor of Arts students must complete one of the following options:
    - Third semester of a foreign language;
    - Demonstrated proficiency beyond the third semester in a foreign language (placement exam or certification from the language department);
    - Take one Global Studies course from the list on the CLA College Graduation Requirements (p. 755) page;
    - Study Abroad at an approved program; or
    - Take a second General Education Global/World Society course.

- Notes on Foreign Language Study
  - The third level of language is numbered 1003 in French, German, Italian, Spanish, and Portuguese and numbered 2001 in all other foreign language subjects.
  - Students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honor society Phi Beta Kappa. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)
  - See the College of Liberal Arts Policies (p. 753) section of this Bulletin for more information on the Foreign Language Placement, Regression in Coursework, and guidelines for students’ other experiences with language.

General Electives are typically one-third of a student's program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

Electives in English
Four courses in English numbered 2000-3999. 1 12

Total Credit Hours 18

1 No more than two of which are in writing (creative, technical or business)

Minors are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Environmental Studies

www.cla.temple.edu/gus

Melissa Gilbert, Chair of Geography & Urban Studies
309 Gladfelter Hall
215-204-4429
mgilbert@temple.edu

Kolson Schlosser, Director of Environmental Studies
338 Gladfelter Hall
215-204-2185
The Environmental Studies major and minor examine the nature, causes, and consequences of human interactions with the environment. Students in Environmental Studies are equipped with the intellectual and methodological tools to understand and address the crucial environmental issues of our time and the impact on individuals, society, and the planet.

The major and minor focus on the four themes of globalization, sustainability, social justice, and geographic methods that are increasingly central to understanding the serious environmental challenges we face. The Environmental Studies program is housed in the Department of Geography and Urban Studies and Environmental Studies majors and minors learn geographic theory and methods that examine the complexity of human-environmental interactions; the increasing interconnectedness of the global economy, environment, culture and politics; and the importance of place/context in people's daily lives.

Environmental Studies students are introduced to environmental processes, contemporary environmental issues and policies, and geospatial technologies, including GIS, and qualitative and quantitative social science research methods. The Environmental Studies gateway courses are designed to develop the theoretical and methodological frameworks and tools necessary to understand the relationships between people and their environment as they interact through local and global connections. In required courses and electives, students examine environmental policy and the role of political institutions; the geography of natural resources; environmental decision-making; natural hazards and risk assessment; environmental ethics and legal issues; health and the environment; environmental justice; food access; etc. The electives give students the opportunity to develop an area of emphasis around their particular interests. Students focus on an individualized research project in their Senior Research Seminar. Each student’s program is developed with a departmental advisor to suit individual interests and is designed to maximize educational and career opportunities. We encourage our students to incorporate a semester abroad and/or an internship into their plan of study.

**Themes**

The Department has identified several informal areas of concentration to assist students in making course selections. These do not constitute formal tracks but rather provide guidelines for developing a personalized curriculum. Students can focus on the following themes:

- Globalization
- Social Justice
- Urban Sustainability
- Geographic Methods

**Career Preparation**

Environmental Studies graduates are especially competitive in the job market because of their technical and critical thinking skills, a sense of the complexity of interactions between humans and the environment, and their ability to synthesize information at a variety of scales. Students have the opportunity to gain technical skills in spatial statistics, Geographic Information Systems (GIS), cartographic production and design, and qualitative methods that are highly valued by employers. Our graduates find employment with nonprofits (domestic and international), planning or government agencies, consulting firms, and citizens’ organizations. Many also go on to graduate programs in geography, planning, environmental studies, law, and other fields. The Department of Labor expects that employment for geographers, planners, and other geographic professions will grow at a rate of twenty percent or more for the next decade.
Programs Offered

We offer a Bachelor of Arts and a minor in Environmental Studies, and a certificate in Geographic Information Systems (GIS). Many of our students choose to complete a double major, a minor in a complementary discipline, and/or the GIS certificate.

Double-Counting Across Curricula

Many students elect to take a combination of the Environmental Studies major or minor and the Geography and Urban Studies major or minor, as they are complementary programs.

The ONLY courses that can double-count between the Environmental Studies and the Geography and Urban Studies majors are: ENST 3161 Spatial Statistics/GUS 3161 Spatial Statistics; ENST 2097 Research Design in Environmental Studies/ GUS 2197 Research Design in Geography and Urban Studies; ENST 3062 Fundamentals of Geographic Information Systems/GUS 3062 Fundamentals of Geographic Information Systems. When used for the major in either program, these courses may not be used to fulfill the minor elective requirements of the other program. Note GUS 4198 Senior Seminar in Geography and Urban Studies and ENST 4198 Senior Research Seminar are NOT cross-listed seminars. Anyone pursuing a double major in Geography and Urban Studies and Environmental Studies must take both capstone courses.

Students are not permitted to combine a major or minor in Environmental Studies and a major or minor in Environmental Science in the College of Science and Technology.

Internships

We encourage students to apply their skills and knowledge in a credit-bearing internship that utilizes their academic training. Assignments at planning, social service, environmental and other agencies, as well as at firms that specialize in mapping and geographic data analysis, have helped in securing employment opportunities after graduation. The internship is complemented by a seminar in which students reflect on their experiences. Contact Dr. Andrucki (max.andrucki@temple.edu) for more information on this opportunity.

Certificate in Geographic Information Systems (GIS)

This certificate is open to undergraduate students in all majors at Temple University. This four-course certificate introduces students to information technology and spatial analysis. GIS skills are increasingly in demand by employers and according to the Department of Labor, the industry has a high annual growth rate of 35 percent. Fields that use GIS skills include public health, social and natural sciences, journalism, urban and ecological planning, criminal justice, engineering, design, communications, and business, etc. Students interested in the Certificate in GIS should see that section of this Bulletin or contact guses@temple.edu with questions.

Gamma Theta Upsilon

We nominate students for membership in the National Honorary Society in Geography on the basis of GPA. Students, who are initiated annually, can submit articles to the GTU journal and apply for national scholarships.

Programs

- Bachelor of Arts in Environmental Studies (p. 830)
- Minor in Environmental Studies (p. 835)

Bachelor of Arts in Environmental Studies

The Environmental Studies major, offered by the Department of Geography and Urban Studies, examines the nature, causes and consequences of human interactions with the environment. Students in Environmental Studies gain the intellectual and methodological tools to understand and address the crucial environmental issues of our time and the impact on individuals, society, and the planet.

The Environmental Studies gateway courses are designed to develop the theoretical and methodological frameworks and tools necessary to understand the relationships between people and their environment as they interact through local to global connections. Environmental studies majors are introduced to environmental processes, the geography of natural resources, geospatial technologies, and qualitative and quantitative social science research methods. In required courses and electives, students examine environmental policy and the role of political institutions; environmental decision-making; natural hazards and risk assessment; environmental ethics and legal issues; health and the environment, and environmental justice. The electives give students the opportunity to develop an area of emphasis around their particular interests.

Summary of Degree Requirements

University Requirements:

- MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
- All Temple students must take a minimum of two writing-intensive courses as part of the major. The specific courses required for this major are ENST 2097 and ENST 4198.
• Students must complete requirements of the General Education (GenEd) Program. See the General Education section (p. 143) of the Undergraduate Bulletin for more details.

**College of Liberal Arts Requirements:**

• Completion of a minimum of 123 credits, including:
  - 90 credits in CLA/CST courses;
  - 45 credits of which must be at the upper level (numbered 2000-4999).
    - For Social Science majors, 6 upper level credits (numbered 2000-4999) must be taken in Humanities Subject Areas: Arabic, Chinese, English, French, German, Greek (Ancient), Greek and Roman Classics, Hebrew, Hindi, Italian, Japanese, Latin, Philosophy, Religion, Russian, and Spanish in the College of Liberal Arts, Art History in the Tyler School of Art, or any department in the College of Science and Technology.
  - A minimum GPA of 2.0, cumulatively, in CLA/CST coursework, and in the major.
  - Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.

• **Foreign Language/Global Studies Requirements:**
  - All students must complete or test out of the first and second levels of a foreign language - these courses are numbered 1001 and 1002;
  - All students must complete at least one course from the GenEd Global/World Society category; and
  - All Bachelor of Arts students must complete one of the following options:
    - Third semester of a foreign language;
    - Demonstrated proficiency beyond the third semester in a foreign language (placement exam or certification from the language department);
    - Take one Global Studies course from the list on the CLA College Graduation Requirements (p. 755) page;
    - Study Abroad at an approved program; or
    - Take a second General Education Global/World Society course.

• **Notes on Foreign Language Study**
  - The third level of language is numbered 1003 in French, German, Italian, Spanish, and Portuguese and numbered 2001 in all other foreign language subjects.
  - Students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honor society Phi Beta Kappa. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)
  - See the College of Liberal Arts Policies (p. 753) section of this Bulletin for more information on the Foreign Language Placement, Regression in Coursework, and guidelines for students' other experiences with language.

**General Electives** are typically one-third of a student's program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

**Major Requirements (40 credits in Environmental Studies and related coursework):**

**Gateway courses**

**Electives**
Select three upper-level courses in Environmental Studies from the list of approved electives below. ¹

Select one ENST course numbered 0800-4999 ²

Select one course numbered 2000-4999 in ENST or a related subject area.

**Total Credit Hours** 40

¹ No electives may double-count between the Environmental Studies major and either the Geography & Urban Studies major or minor.

² One General Education course taken in Environmental Studies may count towards the major.

### Double-Counting Across Curricula

Many students elect to take a combination of the Environmental Studies major or minor and the Geography and Urban Studies major or minor as they are complementary programs.

The ONLY courses that can double-count between the Geography and Urban Studies and Environmental Studies majors are: GUS 3161/ENST 3161, GUS 2197/ENST 2097, and ENST 3062/GUS 3062. When used for the major in either program, these courses may not be used to fulfill the minor elective requirements of the other program.

Note GUS 4198 and ENST 4198 are NOT cross-listed seminars. Anyone pursuing a double major in Geography & Urban Studies and Environmental Studies must take both capstone courses.

Students may not combine a major or minor in Environmental Studies and a major or minor in Environmental Science in the College of Science and Technology.

### Environmental Studies Electives List

Note: Upper-level Science and Liberal Arts courses from this list can be used to satisfy the CLA 45 credit upper-level distribution requirement. Please consult with an advisor.

Total Credit Hours: 123
Minor in Environmental Studies

The minor in Environmental Studies is composed of 18 credits. Students are required to take one of the Gateway courses, either ENST 2001 or ENST 2002. Students also take 5 elective courses: one at any level and four at the upper level 2000+, which they can use to focus on their own particular interests.

The French major helps students develop skills in reading, writing and oral communication while providing them with a rich understanding of the literature, cinema, history, and traditions of one or more Francophone cultures. In all classes, students focus on communication and communities, comparisons and connection, and culture. As they improve their linguistic skills and study various forms of cultural production from other nations, French majors also strengthen their ability to analyze and interpret in a way that contributes to their education above and beyond courses they take for the major. Through study at Temple, often enhanced by study abroad, French majors gain insight into their own identities and assumptions in relation to others. Majors complete the program with an ability to communicate, a grounding in literary tradition, and an awareness of cultural differences that has become increasingly important in the contemporary world.

The French major is a good preparation for a career that requires analytical thinking and communication skills in general, which includes the domains of education, business, government service, travel, and tourism. It is a good major or a second major for students planning to attend law or medical school. Studies have shown that learning a foreign language helps raise scores on the LSAT, GRE, and MCAT exams. This course of study also proves valuable to anyone who plans to work for a multinational corporation.

The French courses are often small, allowing students to get to know each other and their professors well. The program helps prepare students enrolled in the School of Education for careers teaching French and provides the opportunity to students enrolled in the Fox School of Business to acquire a certificate in French with a special course on French in the business world.

Study Abroad

Students declaring a major or minor in the department are encouraged to study abroad. Temple University has a summer program at the Sorbonne in Paris. Credits earned through the Temple Sorbonne Program (http://studyabroad.temple.edu/sites/temple-summer-in-france) may be used toward the French major, minor, certificate and for satisfaction of the GenEd World Society requirement.
Programs

- Bachelor of Arts in French (p. 836)
- Certificate in French (p. 838)
- Minor in French (p. 838)

Bachelor of Arts in French

Summary of Degree Requirements

University Requirements:

- MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
- All Temple students must take a minimum of two writing-intensive courses as part of the major. The specific courses required for this major are FREN 2096 and FREN 3096.
- Students must complete requirements of the General Education (GenEd) Program. See the General Education (p. 143) section of the Undergraduate Bulletin for more details.

College of Liberal Arts Requirements:

- Completion of a minimum of 123 credits, including:
  - 90 credits in CLA/CST courses;
  - 45 credits of which must be at the upper level (numbered 2000-4999).  
    - For Humanities majors, 6 upper level credits must be earned in the Social Science and interdisciplinary subject areas: African American Studies, American Studies, Anthropology, Asian Studies, Criminal Justice, Economics, Environmental Studies, Geography and Urban Studies, Global Studies, History, Jewish Studies, Latin American Studies, Lesbian, Gay, Bisexual, and Transgender Studies, Liberal Arts, Neuroscience (CLA), Political Science, Psychology, Sociology, Women's Studies, or any department in the College of Science and Technology.
  - A minimum GPA of 2.0, cumulatively, in all CLA/CST coursework, and in the major department.
  - Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.

- Foreign Language/Global Studies Requirements:
  - The requirements for the major in French exceed the CLA minimum for this requirement.

- Notes on Foreign Language Study
  - The third level of language is numbered 1003 in French, German, Italian, Spanish, and Portuguese and numbered 2001 in all other foreign language subjects.
  - Students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honor society Phi Beta Kappa. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)
  - See the College of Liberal Arts Policies (p. 753) section of this Bulletin for more information on the Foreign Language Placement, Regression in Coursework, and guidelines for students' other experiences with language.

General Electives are typically one-third of a student's program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

Major Requirements: Ten courses in French (30 credits)

Prerequisites: FREN 1001, FREN 1002, and FREN 1003 with a minimum grade of C or equivalent placement.

Course levels are incremental in skills and content. Courses must be taken sequentially or in some instances may be taken concurrently. Students who initially place beyond FREN 1003 may begin with FREN 2001 or a course beyond 2001, as appropriate.

Total Credit Hours

**Distinction in Major**

To be considered for Distinction in Major, students must:

- Complete the requirements for the concentration in French with a GPA of at least 3.50;
- Be recommended to the chair of the department by the French faculty advisor after consultation with the French faculty;
- Have an overall GPA of at least 3.25.

**Suggested Academic Plan**

Please note that this is a suggested academic plan. Depending on your situation, your academic plan may look different.

The Geography and Urban Studies major and minor combines the discipline of geography and the field of urban studies to offer a program that emphasizes geographic theory and methods to the study of urban and regional processes and problems in the U.S. and international settings. Students in Geography and Urban Studies are equipped with the intellectual and methodological tools necessary to understand and address a wide range of environmental, economic, social, and political challenges that are central to the well-being of billions of people in an urbanizing world.

The major and minor focus on the four themes of globalization, sustainability, social justice, and geographic methods that are increasingly central to understanding and addressing global challenges. There is a resurgence of interest in geographic theory and methods that examine the complexity of human-environmental interactions; the increasing interconnectedness of the global economy, environment, culture and politics; and the importance of place/context in people’s daily lives.

Geography and Urban Studies students are introduced to urban processes, spatial relations, geospatial technologies, including GIS, and qualitative and quantitative social science research methods. In required courses and electives, students examine urban issues; the role of political institutions; policy-
making; and human interactions with the environment. The Geography and Urban Studies gateway courses are designed to develop the theoretical and methodological frameworks and tools necessary to understand the relationships among people, places, and the environment as they interact through local and global connections. The electives give students the opportunity to develop an area of emphasis around their particular interests. Students focus on an individualized research project in their Senior Research Seminar. Each student’s program is developed with a departmental advisor to suit individual interests and is designed to maximize educational and career opportunities. We encourage our students to incorporate a semester abroad and/or an internship into their plan of study.

Themes
The department has identified several informal areas of concentration to assist students in making course selections. These do not constitute formal requirements but rather provide guidelines for developing a personalized curriculum. Students can focus on the following themes:

- Globalization
- Social Justice
- Urban Sustainability
- Geographical Methods

Career Preparation
Geography and Urban Studies graduates are especially competitive in the job market because of their technical and critical thinking skills, a sense of the complexity of interactions between humans and the environment, and their ability to synthesize information at a variety of scales. Students have the opportunity to gain technical skills in spatial statistics, Geographic Information Systems (GIS), cartographic production and design, and qualitative methods that are highly valued by employers. Our graduates find employment with nonprofits (domestic and international), planning or government agencies, consulting firms, and citizens’ organizations. Many also go on to graduate programs in geography, planning, environmental studies, law and other fields. The Department of Labor expects that employment for geographers, planners and other geographic professions is expected to grow at a rate of twenty percent or more for the next decade.

Programs Offered
We offer a Bachelor of Arts and a minor in Geography and Urban Studies, and a certificate in Geographic Information Systems. Many of our students choose to complete a double major, a minor in a complementary discipline, or the GIS certificate.

Double-Counting Across Curricula Policy
Many students elect to take a combination of the Geography and Urban Studies major or minor and the Environmental Studies major or minor and/or the Environmental Science major or minor as they are complementary programs, but there are limits in terms of which courses may count for the two curricula:

The ONLY courses that can double-count between the Geography and Urban Studies and Environmental Studies majors are: GUS 3161 Spatial Statistics/ENST 3161 Spatial Statistics; GUS 2197 Research Design in Geography and Urban Studies/ENST 2097 Research Design in Environmental Studies; GUS 3062 Fundamentals of Geographic Information Systems /ENST 3062 Fundamentals of Geographic Information Systems. When used for the major in either program, these courses may not be used to fulfill the minor elective requirements of the other program.

Note GUS 4198 Senior Seminar in Geography and Urban Studies and ENST 4198 Senior Research Seminar are NOT cross-listed seminars. Anyone pursuing a double major in Geography & Urban Studies and Environmental Studies must take both capstone courses.

Gamma Theta Upsilon
We nominate students for membership in the National Honorary Society in Geography on the basis of GPA. Students, who are initiated annually, can submit articles to the GTU journal and apply for national scholarships.

Internships
We encourage students to apply their skills and knowledge in a credit-bearing internship that utilizes their academic training. Assignments at planning, social service, environmental and other agencies, as well as at firms that specialize in mapping and geographic data analysis, have helped our graduates in securing employment opportunities. The internship is complemented by a seminar in which students discuss their experiences. Contact Dr. Andrucki (max.andrucki@temple.edu) for more information on this opportunity.

Double Major with the College of Education
Students may elect to earn certification in secondary school social studies by combining a major in Geography and Urban Studies with a major in Social Studies Education. Students may also earn certification through a Geography and Urban Studies major by following the 5-year B.A./M.A. program. For more information on this opportunity, please contact the CLA Center for Academic Advising and Professional Development.
Certificates of Specialization in Travel & Tourism

Students may take a series of courses that examine the rapidly growing fields of tourism and recreation from an urban/geographical perspective.

Certificate of Specialization in the Geography of Tourism

The courses in this certification program examine all the world's culture regions and the linkages among them. Students can elect courses relevant to either domestic or international tourism. Additional courses would then be chosen to help the student acquire a sense of place as well as strategies for learning about new locations.

Certificate in the Geography of Sports, Recreation & Tourism Planning

Students in this program who are interested in urban recreation and sports can take courses related to urban social and policy issues, while those interested in outdoor/rural recreation can take courses on environmental issues. The course on geographical information systems (GIS) is particularly relevant to tourism planning.

Programs

- Bachelor of Arts in Geography and Urban Studies (p. 841)
- Certificate in Geographic Information Systems (p. 844)
- Minor in Geography and Urban Studies (p. 844)

Bachelor of Arts in Geography and Urban Studies

The objective of the Bachelor of Arts program in Geography and Urban Studies is to provide students with an understanding of:

- How space, place, and scale shape the interaction between environment and society;
- Critical thinking skills developed through examining a range of analytical approaches to investigate geographic, urban, and environmental processes;
- Contemporary explanatory frameworks in Geography and Urban Studies such as: political ecology, feminist and poststructuralist theory, and development theory;
- The application of information technology skills to analyze spatial and temporal information, processes, and patterns through integrative research experiences;
- Practical considerations of community and environmental organizational settings at the local and regional scales.

Summary of Degree Requirements

University Requirements:

- MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
- All Temple students must take a minimum of two writing-intensive courses as part of the major. The specific courses required for this major are GUS 2197 and GUS 4198.
- Students must complete requirements of the General Education (GenEd) Program. See the General Education (p. 143) section of the Undergraduate Bulletin for more details.

College of Liberal Arts Requirements:

- Completion of a minimum of 123 credits, including:
  - 90 credits in CLA/CST courses;
  - 45 credits of which must be at the upper level (numbered 2000-4999).
    - For Social Science majors, 6 upper level credits (numbered 2000-4999) must be taken in Humanities Subject Areas: Arabic, Chinese, English, French, German, Greek (Ancient), Greek and Roman Classics, Hebrew, Hindi, Italian, Japanese, Latin, Philosophy, Religion, Russian, and Spanish in the College of Liberal Arts, Art History in the Tyler School of Art, or any department in the College of Science and Technology.
  - A minimum GPA of 2.0, cumulatively, in CLA/CST coursework, and in the major.
  - Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.

Foreign Language/Global Studies Requirements:

- All students must complete or test out of the first and second levels of a foreign language - these courses are numbered 1001 and 1002;
- All students must complete at least one course from the GenEd Global/World Society category; and
- All Bachelor of Arts students must complete one of the following options:
  - Third semester of a foreign language;
• Demonstrated proficiency beyond the third semester in a foreign language (placement exam or certification from the language department);
• Take one Global Studies course from the list on the CLA College Graduation Requirements (p. 755) page;
• Study Abroad at an approved program; or
• Take a second General Education Global/World Society course.

• Notes on Foreign Language Study
  • The third level of language is numbered 1003 in French, German, Italian, Spanish, and Portuguese and numbered 2001 in all other foreign language subjects.
  • Students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honor society Phi Beta Kappa. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)
  • See the College of Liberal Arts Policies (p. 753) section of this Bulletin for more information on the Foreign Language Placement, Regression in Coursework, and guidelines for students' other experiences with language.

General Electives are typically one-third of a student's program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

Major Requirements (39 credits):

Gateway Courses
GUS 2001 Cities 3
GUS 2002 Space and Place 3

Research Methods courses
GUS 2197 Research Design in Geography and Urban Studies 3
GUS 3062 Fundamentals of Geographic Information Systems 3
GUS 3161 Spatial Statistics 3

Research Methods elective
Select one of the following: 3
- GUS 3001 Images of the City in Popular Culture
- GUS 3061 Fundamentals of Cartography
- GUS 3063 Environmental Remote Sensing
- GUS 3064 Qualitative Methods
- GUS 4065 Urban Geographic Information Systems

International Course
Select one of the following: 3
- GUS 2032 Urban Systems in a Global Economy
- GUS 2073 African Development
- GUS 2074 East and South Asia
- GUS 2121 Russian Cities
- GUS 3052 Environmental Problems in Asia
- GUS 3073 Geography of Travel and Tourism
- GUS 3076 Metropolitan Tokyo
- GUS 4000 Special Topics in Geography and Urban Studies
- GUS 4021 International Urbanization
- GUS 4075 Comparative Regional Development

Geography and Urban Studies electives
Select 1 GUS course numbered 0800-4999 3
Select 4 GUS courses numbered 2000-4999 12

Capstone Course
GUS 4198 Senior Seminar in Geography and Urban Studies 3

Total Credit Hours 39

1 No electives may double-count between the Geography & Urban Studies major and either the Environmental Studies major or minor.
### Distinction in the Major

Geography and Urban Studies students can graduate with distinction if they have, at the time of graduation, a 3.5 GPA in the major and a 3.0 cumulative GPA.

### Suggested Academic Plan

**Bachelor of Arts in Geography and Urban Studies**

**Requirements for New Students starting in the 2015-2016 Academic Year**

Certificate in Geographic Information Systems

Geographic information has become one of the lynchpins of the Information Age and this explosion in interest in Geographic Information Systems (GIS) is fueling demand for well-trained professional practitioners. The undergraduate Certificate in Geographic Information Systems will provide students with the necessary knowledge base to embark on careers as GIS professionals. Students who complete this program will be competitive for entry-level jobs in GIS and GIS-related jobs in industry, government, and non-profit organizations based on their conceptual understanding and practical skills in GIS.

The Certificate in Geographic Information Systems requires four courses (12 credits) for students in any major other than Geography and Urban Studies or Environmental Studies. This program is open to undergraduate students in any major.

Students majoring in Geography and Urban Studies or Environmental Studies may double count GUS 3161/ENST 3161 and GUS 3062/ENST 3062 for their major and the certificate. GUS and Environmental Studies majors need only two electives from the approved list below that are unique to the certificate (they cannot double-count with the major requirements).

Certificates are awarded only at the time of completion of the bachelor’s degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor’s degree.

Minor in Geography and Urban Studies

The minor in Geography and Urban Studies is composed of 18 credits. Students are required to take one of the Gateway courses, either GUS 2001 or GUS 2002. Students also take 5 elective courses: one at any level and four at the upper level 2000+, which they can use to focus on their own particular interests.

German is a major world language spoken in Germany, Austria, and Switzerland, as well as in some communities in the United States. Whether you are interested in literature, music, theater, film, or art, German culture is a rich and exciting tradition. Temple’s German program provides broad linguistic, cultural, and practical experiences to prepare students to participate meaningfully in the German-speaking world.

The German major and minor help students achieve their learning goals, whether they want to go on to use German to communicate with friends in Germany, Austria, or Switzerland; to engage in business with German partners; to work in government or in the media; or to participate in German culture. They develop skills in reading, writing, and oral communication while acquiring a rich understanding of the literature, cinema, history and culture of the German-speaking world.

Students who study German at Temple find that the program prepares them to do well in whatever they choose upon graduation; the German major is a good preparation for a career that requires analytical thinking and communication skills in general, which includes the domains of education, business, government service, travel, and tourism. It is a good major or second major for students planning to attend law school or medical school. Studies have shown that learning a foreign language helps raise scores on the LSAT, GRE, and MCAT examinations. This course of study also proves valuable to anyone who plans to work for a multinational corporation.

The German courses are often small, allowing students to get to know one another and their professors well. The program helps prepare students enrolled in the Fox School of Business and Management to acquire a special language certificate including a special course on German in the business world. Outside of class, students can share conversations and activities informally or with the Temple University German Society.

**Study Abroad**

Students declaring a major or minor in the department are strongly encouraged to study abroad. Temple University has programs at the universities of Hamburg, Tübingen, and Leipzig in Germany. Courses completed in these programs may be credited toward the German major or minor and in partial satisfaction of the CLA Global Studies requirement.

Students interested in Study Abroad should discuss their plans with the faculty advisor in German early in their academic program.

**Programs**

- Bachelor of Arts in German (p. 846)
- Certificate in German (p. 848)
Bachelor of Arts in German

Summary of Degree Requirements

University Requirements:

• MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
• All Temple students must take a minimum of two writing-intensive courses as part of the major. The specific courses required for this major are GER 3096 and GER 4296.
• Students must complete requirements of the General Education (GenEd) Program. See the General Education section (p. 143) of the Undergraduate Bulletin for more details.

College of Liberal Arts Requirements:

• Completion of a minimum of 123 credits, including:
  • 90 credits in CLA/CST courses;
  • 45 credits of which must be at the upper level (numbered 2000-4999).
  • For Humanities majors, 6 upper level credits must be earned in the Social Science and interdisciplinary subject areas: African American Studies, American Studies, Anthropology, Asian Studies, Criminal Justice, Economics, Environmental Studies, Geography and Urban Studies, Global Studies, History, Jewish Studies, Latin American Studies, Lesbian, Gay, Bisexual, and Transgender Studies, Liberal Arts, Neuroscience (CLA), Political Science, Psychology, Sociology, Women's Studies, or any department in the College of Science and Technology.
  • A minimum GPA of 2.0, cumulatively, in all CLA/CST coursework, and in the major department.
  • Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.
• Foreign Language/Global Studies Requirements:
  • The language requirements of the German major exceed the minimum College of Liberal Arts requirements; no additional coursework is necessary for this requirement.
  • Notes on Foreign Language Study
    • The third level of language is numbered 1003 in French, German, Italian, Spanish, and Portuguese and numbered 2001 in all other foreign language subjects.
    • Students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honor society Phi Beta Kappa. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)
    • See the College of Liberal Arts Policies (p. 753) section of this Bulletin for more information on the Foreign Language Placement, Regression in Coursework, and guidelines for students' other experiences with language.

General Electives are typically one-third of a student's program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

Major Requirements: Ten courses in German (30 credits/10 Courses)

Prerequisites: GER 1001 and GER 1002, with a minimum grade of C or equivalent placement.

Course levels are incremental in skills and content. Courses must be taken sequentially or in some instances may be taken concurrently. Students who initially place beyond GER 1003 may begin with GER 2001 or at the 2000-level, as appropriate.

Total Credit Hours 30

^ Students who place out of GER 1003 will need one additional elective; those who place out of GER 2001 will need two additional electives.

Indicates writing capstone for the major.
Up to two upper-level courses outside of the department will count as electives if they relate to the major as approved in writing by the department advisor.

**Distinction in Major**

To be considered for Distinction in the German Major, students must:

- Complete the requirements for the concentration in German with a GPA of at least 3.50;
- Have an overall GPA of at least 3.25;
- Be recommended to the chair of the department by the German faculty advisor after consultation with the German department faculty.

**Suggested Academic Plan**

Please note that this is a suggested academic plan. Depending on your situation, your academic plan may look different.

**Bachelor of Arts in German**

**Requirements for New Students starting in the 2015-2016 Academic Year**

**Total Credit Hours:** 123

**Certificate in German**

**Requirements for the Special Foreign Language Certificate in German**

| GER 1001 | Introduction to German I | 4 |
| GER 1002 | Introduction to German II | 4 |
| GER 1003 | Introduction to German III | 3 |
| GER 2001 | Intermediate | 3 |
| GER 2501 | German for Business I | 3 |

Select one from:  
| GER 3096 | Composition I | 3 |
| GER 3201 | Culture and Civilization I | 3 |

**Total Credit Hours:** 20

Certificates are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

**Minor in German**

**Requirements**

Prerequisites: GER 1001 or equivalent placement with a minimum grade of C.

| GER 1002 | Introduction to German II ¹ | 4 |
| GER 1003 | Introduction to German III | 3 |
| GER 2001 | Intermediate | 3 |
| GER 3096 | Composition I ² | 3 |
| GER 3201 | Culture and Civilization I | 3 |
Select one German Elective from 2000-, 3000-, and 4000-level courses  

| Credit Hours | 3 |

Students who place out of GER 1002 will meet the requirement for the minor with 18 credits.

Indicates writing capstone

Note: Up to two upper-level courses outside of the department will count as electives if they relate to the major and are approved by the faculty advisor in German.

Minors are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Global Studies

208 Gladfelter Hall
215-204-7577

Students gain advanced knowledge about international cultures and perspectives as well as essential skills like critical thinking and effective communication that are prized by every professional industry.

Foreign language proficiency and study abroad experience will also make Global Studies graduates attractive job candidates in a variety of industries, including business, civil service, government, education, law, medicine and health.

The Global Studies curriculum includes courses from a number of liberal arts disciplines, all focused on how societies interact with one another in a variety of contexts.

A bachelor's degree in Global Studies prepares students to:

• Understand complex global problems using tools from multiple disciplines, including economic analysis, social science and historical methods.
• Communicate ideas about global issues effectively, through written work, oral expression and digital communication tools.
• Look beyond local and national boundaries to see themselves as part of a global network, the sustainability of which requires ethical and moral forthrightness.
• Experience other cultures, by studying a world language and participating in a regional enrichment experience such as study abroad.
• Thrive professionally in a variety of careers in an increasingly global marketplace.

Careers

Students with a degree in Global Studies thrive in a variety of industries, including local and national government, advocacy, policy development, the business sector and diplomacy.

Programs

• Bachelor of Arts in Global Studies (p. 849)
• Minor in Global Studies (p. 857)

Bachelor of Arts in Global Studies

We live in a time of ever-faster global integration. People, goods, services, and ideas now move with astonishing speed across national boundaries. Many of the major issues that shape our lives are global in scope: war and terrorism, climate change, migration, human rights, public health, economic growth and decline, religion and ideologies, fashion and music, media and technology. This interdisciplinary program invites students to reach across disciplines and learn from a wide array of knowledge and methods in order to be better prepared for a global world.
The Global Studies curriculum offers a foundation through a set of four introductory courses, as well as specialization in one of three concentrations: Global Security, Global Economy, and Global Cultures. The introductory courses will prepare you for the concentrations by studying alternative disciplinary and problem-based approaches to global studies. Within this general framework, the three concentrations will allow the students to identify a specialized program of study drawing from a structured set of concentration-specific requirements and electives, culminating in a research-based and writing-intensive capstone seminar.

In order to develop a world perspective, students in Global Studies will take two full years (through 4th semester) of a foreign language and will either participate in an approved study abroad program or take additional area studies courses. Students will work with their advisor and the Education Abroad office to identify the best fit with their language skills, disciplinary interests, career plans, and financial capabilities.

**Career Potential**

Global Studies is not a major with a limiting, predefined career destination. Today, a large and growing number of careers can and do feature international or global components. The major in Global Studies will offer students a broad but rigorous course of study that will combine the development of a sophisticated understanding of global changes, cultures, and perspectives while building critical analytical, communication, and intellectual skills they will need in any professional career.

This major is an obvious choice for students aiming specifically for an international career in government, business, or the non-profit sector, and its interdisciplinary and multidisciplinary nature will provide an appropriate foundation for work or graduate study in any field affected by global change.

**Summary of Degree Requirements**

**University Requirements:**

- MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
- All Temple students must take a minimum of two writing-intensive courses as part of the major. The specific courses required for this major are GBST 2096 and GBST 4096.
- Students must complete requirements of the General Education (GenEd) Program. See the General Education (p. 143) section of the Undergraduate Bulletin for more details.

**College of Liberal Arts Requirements:**

- Completion of a minimum of 123 credits, including:
  - 90 credits in CLA/CST courses;
  - 45 credits of which must be at the upper level (numbered 2000-4999).
  - For Social Science majors, 6 upper level credits (numbered 2000-4999) must be taken in Humanities Subject Areas: Arabic, Chinese, English, French, German, Greek (Ancient), Greek and Roman Classics, Hebrew, Hindi, Italian, Japanese, Latin, Philosophy, Religion, Russian, and Spanish in the College of Liberal Arts, Art History in the Tyler School of Art, or any department in the College of Science and Technology.
  - A minimum GPA of 2.0, cumulatively, in CLA/CST coursework, and in the major.
  - Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.
  - Foreign Language/Global Studies Requirements:
    - Global Studies majors are required to complete the fourth level of a foreign language, which exceeds the CLA minimum requirement. No additional coursework is required.
    - Notes on Foreign Language Study
      - The third level of language is numbered 1003 in French, German, Italian, Spanish, and Portuguese and numbered 2001 in all other foreign language subjects.
      - Students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honor society Phi Beta Kappa. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)
      - See the College of Liberal Arts Policies (p. 753) section of this Bulletin for more information on the Foreign Language Placement, Regression in Coursework, and guidelines for students' other experiences with language.

**General Electives** are typically one-third of a student’s program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

**Major Requirements (33-55 credits - varies according to foreign language placement and regional enrichment options):**

### Global Security Concentration (6 courses)

The quest for security, and the seemingly endless recurrence of interstate war are fundamental features of an anarchical world of sovereign states. Historically, this led students of security to focus on state power, military strategy, geopolitics, diplomacy and conflict in the international arena. In the 21st century, interstate wars have been joined by both increasingly destructive civil wars within countries, and by international and global terrorism perpetrated by non-state actors. In this concentration, students will draw on disciplines as diverse as history, political science, anthropology, geography and criminal justice to understand the causes of war, the security strategies of states, and the rise of new and challenging security threats in the 21st century.

¹ These courses require prerequisites beyond those covered in the Global Studies Foundation courses; students wishing to take these courses should plan accordingly.

**Global Economy Concentration (6 courses)**

Economic globalization is one of the defining features of the contemporary world. This concentration introduces students to fundamental features of the global economy from multiple disciplinary perspectives, including in the areas of trade, finance, and development. It studies the origins and consequences of globalization for development and growth, income and poverty, literacy and health, as well as political, demographic, environmental, and cultural changes. Students examine the evolution of cooperation among states in managing the global economy, and the role of history, politics, and technology in shaping international, national, and local relations.

1 ECON 1102 is, together with ECON 1101 (a Foundation course for all Global Studies majors), the basic requirement for all upper-division Economics courses. Both courses should therefore be taken as soon as possible in the course sequence for all students in the Global Economy concentration.

2 These courses require prerequisites beyond those covered in the Global Studies Foundation courses; students wishing to take these courses should plan accordingly.

### Global Cultures Concentration (6 courses)

The Global Cultures concentration studies cultural formation, cultural change, and cultural interaction among peoples across the world. "Culture" is defined as learned systems of values, beliefs, and practices that bind a group of people together and give common meaning to their lived experiences. These groups can be local, regional, national or international; they are shaped by various structures of power and are continuously migrating. Students in the Global Cultures concentration will examine the interaction of global and local cultures and study aspects of cultural circulation, transaction, and mobility through courses in Literature, Film, Religion, History, Anthropology, and Sociology.

Students are encouraged to study abroad, but if not possible, can replace with the area studies requirements as noted in this grid.

**Minor in Global Studies**

Students interested in enhancing their degree program with a firm grounding in the understanding of globalization and its impact on national and international security, the globalized economy, and global cultures may opt to declare a minor in Global Studies. The minor includes the primary features of the major coursework, without the requirements for foreign language and regional enrichment.

The faster our lives change, the more we need to understand our past, reflect on our present, and make decisions for our future. History helps us to understand who we are and where we came from. It provides unique insights and perspectives for our personal and professional pursuits.

The History Department divides its courses between American History, European History, and non-Western History. Within each division, one can choose history courses in political, diplomatic, social, cultural, economic, gender, and ethnic history. Students should concentrate in one field of history and also be well-versed in the three main divisions.

Temple History graduates have gone into a wide range of careers; business, law, politics, education, historical preservation, and information resources are just a few of the many areas. History arms the student for a maximum amount of flexibility for career choices.

Temple students regularly participate in the intellectual life of the region through their connections to such organizations and institutions as the McNeil Center for Early American Studies, the Balch Institute for Ethnic Studies, the Pennsylvania Historical Society, the Atwater Kent Museum, and the American Philosophical Society.

The Department of History offers an Honors Program for majors with outstanding academic records. Qualified majors are invited to join Phi Alpha Theta, the History honor society. Both minors and majors participate in the Undergraduate History Association. Special Programs allow undergraduates to major in History and earn teaching certification, or to major in History and earn a Master's in Education in five years (program administered through the School of Education).

Programs

- Bachelor of Arts in History (p. 860)
- Minor in History (p. 863)

Bachelor of Arts in History

The history major consists of a step approach. Courses numbered 1000-1999 are introductory level; courses numbered 2000-2999 are intermediate level, and courses numbered 3000–4999 are advanced level. Courses with "9" as a second digit are honors courses and are usually restricted to honors students.

The history major requires twelve courses (36 credits). Students must take two introductory level courses, of which one is selected from courses numbered 1000–1099 and one from courses numbered 1100–1999. Three courses (9 credits) are required at the 2000 level. Three elective courses (9 credits) are required at the 3000 level. All history majors take two required writing seminars: in the Junior year, students take a 3000 level writing course and in the Senior year, they take a complimentary Capstone course at the 4000 level. All writing intensive courses end in -96, -97 or -98. Finally, students may select two history courses (6 credits) at any level.

- Within these broad requirements, students must complete a minimum of two courses in U.S. history, two courses in European history, and three courses in Asian, African, Latin American or Global/Comparative history.
- Two of the courses in any category or level must be predominantly pre-1900 in content.
- Students should take four courses that represent an area of concentration based on some geographic or thematic intellectual rationale. The area of concentration should be defined in writing and approved by a departmental advisor ideally at the start of the junior year and no later than the start of the senior year.

History Honors Program

To participate in the History Honors Scholar Program, you must first apply to the University Honors office. Any History major who has earned or is in the process of earning 60 credits and has roughly a 3.7 cumulative GPA can apply for the program. The application form is available on the Honors web site: http://honors.temple.edu/. Students in the program take six courses (18 credits), including HIST 4934 Honors Historiography and Research Methods, HIST 4997 Honors Thesis Seminar and four upper-level Honors electives (any department). With careful planning, these Honors courses can ALSO fulfill the requirements for the History major so that students need not delay graduation. For example, the Honors Thesis Seminar (HIST 4997 Honors Thesis Seminar) fulfills the normal “capstone/writing” requirement, and the electives, if chosen from History offerings, will also fulfill major
requirements. Students must maintain a 3.4 GPA in History and a 3.4 GPA overall. Make an appointment to meet with the Honors Advisor, Travis Glasson (travis.glasson@temple.edu), for advice on completing the application and to discuss your intellectual interests.

**Summary of Degree Requirements**

**University Requirements:**
- MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
- All Temple students must take a minimum of two writing-intensive courses as part of the major.
- Students must complete requirements of the General Education (GenEd) Program. See the General Education section (p. 143) of the Undergraduate Bulletin for more details.

**College of Liberal Arts Requirements:**
- Completion of a minimum of 123 credits, including:
  - 90 credits in CLA/CST courses;
  - 45 credits of which must be at the upper level (numbered 2000-4999).
- For **Social Science majors**, 6 upper level credits (numbered 2000-4999) must be taken in Humanities Subject Areas: Arabic, Chinese, English, French, German, Greek (Ancient), Greek and Roman Classics, Hebrew, Hindi, Italian, Japanese, Latin, Philosophy, Religion, Russian, and Spanish in the College of Liberal Arts, Art History in the Tyler School of Art, or any department in the College of Science and Technology.
- A minimum GPA of 2.0, cumulatively, in CLA/CST coursework, and in the major.
- Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.
- **Foreign Language/Global Studies Requirements:**
  - All students must complete or test out of the first and second levels of a foreign language - these courses are numbered 1001 and 1002;
  - All students must complete at least one course from the GenEd Global/World Society category; and
  - All Bachelor of Arts students must complete one of the following options:
    - Third semester of a foreign language;
    - Demonstrated proficiency beyond the third semester in a foreign language (placement exam or certification from the language department);
    - Take one Global Studies course from the list on the CLA College Graduation Requirements (p. 755) page;
    - Study Abroad at an approved program; or
    - Take a second General Education Global/World Society course.
- **Notes on Foreign Language Study**
  - The third level of language is numbered 1003 in French, German, Italian, Spanish, and Portuguese and numbered 2001 in all other foreign language subjects.
  - Students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honor society *Phi Beta Kappa*. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)
  - See the College of Liberal Arts Policies (p. 753) section of this Bulletin for more information on the Foreign Language Placement, Regression in Coursework, and guidelines for students' other experiences with language.

**General Electives** are typically one-third of a student's program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

**Major Requirements (36 credits):**

NOTE: **These twelve** courses have both level and subject matter distributions. Any given course may count in both Category A (level) and Category B (content area) and possibly Category C (time period) as well. Please see the course descriptions for more information on which category/categories are applicable.

Select a minimum of 12 courses in History, distributed as follows:

Select one Capstone Writing Seminar at the 4000-level (ends in -96, -97, -98)

Category B (Content Area)
- Two courses from Category A must be in American history.
- Two courses from Category A must be in European history.
- Three courses from Category A must be in Global/Comparative History, Asian, African, or Latin American history.

Category C (Time Period)
- Two courses from Category A must focus on a period pre-1900.

Total Credit Hours 36

Distinction in Major

To receive Distinction in Major, students must complete HIST 4934 Honors Historiography and Research Methods and HIST 4997 Honors Thesis Seminar. The end product of the *Honors Thesis Seminar* is an Honors Thesis, which the student will present at a scholarly conference sponsored by the department. The Honors Thesis will also fulfill the History major’s thesis/capstone requirement. Students must maintain a 3.4 GPA in all history courses and a 3.4 GPA in Temple courses overall. Students who are not in the University Honors Program will require special permission from the History Honors Scholar Program Director, Travis Glasson (travis.glasson@temple.edu) to enroll in HIST 4934 and HIST 4997.

Minor in History

Requirements

A History minor is an ideal complement to other majors and programs at Temple, from medicine to journalism, from computer science to finance, from film to marketing. Students with a minor in history are required to take six courses totaling eighteen credit hours. Of the six courses, at least two must be numbered 2000 or above and at least one course must be numbered 3000 or above.

Select two Introductory History courses numbered 1000-1999 6
Select at least two 2000-2999 Intermediate History Courses 6
Select at least one 3000-3999 Advanced History Course 3
Select one History 1000-4999 course 3

Total Credit Hours 18

Minors are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Italian

532 Anderson Hall
Why study Italian?

Apart from being the number one study abroad destination among university students, Italy's importance in the corporate world and its complimentary pairing with humanities studies make Italian the fourth most studied foreign language in the United States. The Italian Major at Temple University is an interdisciplinary course of study that, in addition to being built on requirements of language proficiency and core knowledge of Italian literary history, places strong emphasis on cultural, global, and national identity studies. An additional learning goal for students of Italian is to demonstrate understanding and appreciation of cultural perspectives and practices in the Italian-speaking world. The program's methodology is based on a communicative approach coupled with technology–based student engagement practice to enhance the students' language retention, level of competency, and proficiency, as well as to provide a window into Italian culture. The transferable communication and critical thinking skills acquired by the program prove invaluable to employers of liberal arts graduates.

Study Abroad

Students declaring a major or minor in Italian are encouraged to study abroad. Temple has its own campus in Rome, Italy, which offers courses in a variety of fields, including language, art, art history, architecture, and international business. Students interested in studying in Italy should discuss their plans with the Italian faculty advisor as early as possible.

Programs

- Bachelor of Arts in Italian (p. 864)
- Certificate in Italian (p. 867)
- Minor in Italian (p. 867)

Study Abroad

Students declaring a major or minor in Italian are encouraged to study abroad. Temple has its own campus in Rome, Italy, which offers courses in a variety of fields, including language, art, art history, architecture, and international business. Students interested in studying in Italy should discuss their plans with the Italian faculty advisor as early as possible.

Summary of Degree Requirements

University Requirements:
• MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.

• All Temple students must take a minimum of two writing-intensive courses as part of the major. The specific courses required for this major are ITAL 3096, and either ITAL 2096 or ITAL 4096.

• Students must complete requirements of the General Education (GenEd) Program. See the General Education section (p. 143) of the Undergraduate Bulletin for more details.

College of Liberal Arts Requirements:

• Completion of a minimum of 123 credits, including:
  • 90 credits in CLA/CST courses;
  • 45 credits of which must be at the upper level (numbered 2000-4999).
    • For Humanities majors, 6 upper level credits must be earned in the Social Science and interdisciplinary subject areas: African American Studies, American Studies, Anthropology, Asian Studies, Criminal Justice, Economics, Environmental Studies, Geography and Urban Studies, Global Studies, History, Jewish Studies, Latin American Studies, Lesbian, Gay, Bisexual, and Transgender Studies, Liberal Arts, Neuroscience (CLA), Political Science, Psychology, Sociology, Women's Studies, or any department in the College of Science and Technology.
  • A minimum GPA of 2.0, cumulatively, in all CLA/CST coursework, and in the major department.
  • Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.

• Foreign Language/Global Studies Requirements:
  • The requirements of the Italian major exceed the minimum requirements of the College of Liberal Arts; no additional coursework is required.

  Notes on Foreign Language Study
  • The third level of language is numbered 1003 in French, German, Italian, Spanish, and Portuguese and numbered 2001 in all other foreign language subjects.
  • Students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honor society Phi Beta Kappa. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)
  • See the College of Liberal Arts Policies (p. 753) section of this Bulletin for more information on the Foreign Language Placement, Regression in Coursework, and guidelines for students' other experiences with language.

General Electives are typically one-third of a student's program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

Total Credit Hours                              30

1 Students who place out of ITAL 1003 will need one additional elective; those who place out of ITAL 2001 will need two additional electives.
2 Indicates writing capstone for the major.
3 Up to two cognate courses in English may be accepted (with written permission of the Italian advisor) as part of the required elective courses.

Distinction in Major

To be considered for Distinction in Major in Italian, students must:

• Complete the requirements for the concentration in Italian with a GPA of at least 3.50;
• Have an overall GPA of at least 3.25;
• Be recommended to the chair of the department by the Italian faculty advisor.

**Total Credit Hours:** 19

\(^1\) Students with proficiency in Italian may replace ITAL 1002 and ITAL 1003 with upper level courses taught in Italian. See the faculty advisor for more information.

Minors are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

### Japanese

The College of Liberal Arts offers a major in Japanese (at the Temple University Japan campus only) as well as a minor and a certificate. For information about the Japanese major, visit the Japanese (p. 171) program page.
Programs

- Certificate of Specialization in Japanese (p. 868)
- Minor in Japanese (p. 868)

Certificate of Specialization in Japanese

The Certificate of Specialization in Japanese focuses on learning language skills and developing a strong foundation for the effective use of Japanese socially and professionally. This program will be of particular interest to students considering careers in international business, government service, or other professions where foreign language proficiency is important. This program also contributes to meeting the diverse language needs of students with personal or academic interests in Japan and its culture.

This certificate can only be taken as part of an undergraduate degree program and is awarded at the time of graduation. It requires an average of 2.0 in Japanese and a minimum grade of C- or higher must be earned in all required courses listed below.

Total Credit Hours 20

Certificates are awarded only at the time of completion of the bachelor’s degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor’s degree.

Minor in Japanese

The Minor in Japanese emphasizes language study while also recognizing the importance of learning about Japan through work in fields such as literature, history, anthropology, and religion. This program will be of particular interest to students interested in careers in academia, business, government, or other professions where Japanese language proficiency is important.

This minor requires a minimum of 12 credits in Japanese and 6 credits in Japanese-related courses. The minor can only be taken as part of an undergraduate degree program and is awarded at the time of graduation. An average of 2.0 in all Japanese courses as well as a minimum grade of C- must be earned in all courses used for the minor. The specific courses required for the program are detailed in the list below.

Students who place out of JPNS 2002, JPNS 3001, and/or JPNS 3002 may substitute Japanese electives. See the department of Asian and Middle Eastern Languages and Studies (formerly Critical Languages Department) for more information on placement and appropriate substitutions.

Select any two CLA courses that focus exclusively on Japan 6

Total Credit Hours 18

Minors are awarded only at the time of completion of the bachelor’s degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor’s degree.

Jewish Studies

Mark Leuchter, Faculty Advisor
mleuchte@temple.edu
Jewish Studies is an interdisciplinary field that allows students to sample courses across the liberal arts curriculum at Temple University. Central to Jewish Studies is an examination of the history, culture, beliefs, customs, practices, texts, and languages of the Jewish people. It addresses the legacy of over 2,000 years of Jewish life as it has been lived in Jewish communities across the globe. At Temple we pay particular attention to contemporary issues of Jewish culture, identity, and practice. Students can either major or minor in Jewish Studies or do a certificate program in Jewish Secular Studies.

Programs

- Bachelor of Arts in Jewish Studies (p. 869)
- Certificate in Jewish Secular Studies (p. 872)
- Minor in Jewish Studies (p. 872)

Bachelor of Arts in Jewish Studies

Summary of Degree Requirements

University Requirements:

- MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
- All Temple students must take a minimum of two writing-intensive courses as part of the major. The specific courses required for this major are JST 4096 and one additional Jewish Studies elective that is writing-intensive.
- Students must complete requirements of the General Education (GenEd) Program. See the General Education section (p. 143) of the Undergraduate Bulletin for more details.

College of Liberal Arts Requirements:

- Completion of a minimum of 123 credits, including:
  - 90 credits in CLA/CST courses;
  - 45 credits of which must be at the upper level (numbered 2000-4999).
    - For Social Science majors, 6 upper level credits (numbered 2000-4999) must be taken in Humanities Subject Areas: Arabic, Chinese, English, French, German, Greek (Ancient), Greek and Roman Classics, Hebrew, Hindi, Italian, Japanese, Latin, Philosophy, Religion, Russian, and Spanish in the College of Liberal Arts, Art History in the Tyler School of Art, or any department in the College of Science and Technology.
- A minimum GPA of 2.0, cumulatively, in CLA/CST coursework, and in the major.
- Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.
- Foreign Language/Global Studies Requirements:
  - All students must complete or test out of the first and second levels of a foreign language - these courses are numbered 1001 and 1002;
  - All students must complete at least one course from the GenEd Global/World Society category; and
  - All Bachelor of Arts students must complete one of the following options:
    - Third semester of a foreign language;
    - Demonstrated proficiency beyond the third semester in a foreign language (placement exam or certification from the language department);
    - Take one Global Studies course from the list on the CLA College Graduation Requirements (p. 755) page;
    - Study Abroad at an approved program; or
    - Take a second General Education Global/World Society course.

Notes on Foreign Language Study

- The third level of language is numbered 1003 in French, German, Italian, Spanish, and Portuguese and numbered 2001 in all other foreign language subjects.
- Students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honor society Phi Beta Kappa. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)
- See the College of Liberal Arts Policies (p. 753) section of this Bulletin for more information on the Foreign Language Placement, Regression in Coursework, and guidelines for students' other experiences with language.
**General Electives** are typically one-third of a student's program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

---

1 All students must take two writing-intensive courses in their major. In addition to JST 4096, students must select one Jewish Studies elective that is writing-intensive.

Students interested in a history or religion focus should consult with a Jewish Studies advisor to plan an individual program of study.
**Distinction in Major**

Jewish Studies majors may graduate with distinction if they have a GPA of 3.5 or better in the major, a cumulative GPA of 3.0 or better, and a grade of 3.5 or better in the capstone course (JST 4096, an individual research project with a specific faculty member, intended for majors in the final semester of coursework).

**Suggested Academic Plan**

Please note that this is a *suggested* academic plan. Depending on your situation, your academic plan may look different.

**Bachelor of Arts in Jewish Studies**

Minors are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

## Latin American Studies

www.cla.temple.edu/fas

Hiram Aldarondo, Chair, Spanish & Portuguese
427 Anderson Hall
215-204-1706
Latin American Studies is a diverse, interdisciplinary curriculum that includes a major, a minor and an opportunity for students to participate in the Latin American Studies Semester.

Latin American Studies Semester (LASS)

The Latin American Studies Semester (LASS) has been offered every spring semester since 1973. It is a program designed to provide an intensive experience in the study of the Spanish language in combination with an interdisciplinary study of life and contemporary issues in Latin America.

LASS is an integration of several courses, totaling 17 semester hours credit, and must be taken as a package. Because of the credit-hour load and because the objective is to concentrate on Spanish and Latin American Studies, no other courses may be taken without prior approval.

The prerequisite for participation in LASS is two semesters of university-level Spanish or the equivalent. Students with more advanced levels of course background are encouraged to participate in the program as well. All participants in the program may expect to achieve marked improvement in Spanish fluency in only one semester.

- Morning sessions held from 9:00 to 11:50 on Mondays, Wednesdays and Fridays offer language instruction and conversation practice at intermediate and advanced levels guided by native or near native speakers.
- Morning sessions held from 9:30 to 10:50 and from 11:00 to 12:20 on Tuesdays and Thursdays focus on Latin American culture and economic development.
- A LASS Seminar held on Tuesdays and Thursdays from 1:10 to 3:00 highlights a series of topics in Latin American and Latino studies, includes presentations by guest speakers, and also provides for personal contact with the Latino community of Philadelphia.

An integral part of the LASS program is a three-week trip to Costa Rica. The trip is akin to a laboratory in which students can practice their developing language skills. They experience firsthand a Latin American country's culture, history, and social development.

Programs

- Bachelor of Arts in Latin American Studies (p. 874)
- Minor in Latin American Studies (p. 877)

Bachelor of Arts in Latin American Studies

The Latin American Studies major is an interdisciplinary program with a focus on the study of social problems of Latin America. Latin America's art, literature, and religious thought have been universally recognized for their high quality and contribution to world civilization. At the same time, extreme social inequality persists in Latin America in addition to rapid urban growth, dramatic ecological change, and political upheavals with powerful local and global implications. The Latin American Studies major offers a variety of courses that examine these issues. To complete the major, students must take twelve 3-credit courses in Latin American Studies and demonstrate a reading and speaking knowledge of Spanish or Portuguese.

Summary of Degree Requirements

University Requirements:

- MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
- All Temple students must take a minimum of two writing-intensive courses as part of the major. The specific courses required for this major are LAS 4097 and one of the following: LAS 2097, LAS 2098, LAS 4698.
- Students must complete requirements of the General Education (GenEd) Program. See the General Education (p. 143) section of the Undergraduate Bulletin for more details.

College of Liberal Arts Requirements:

- Completion of a minimum of 123 credits, including:
  - 90 credits in CLA/CST courses;
  - 45 credits of which must be at the upper level (numbered 2000-4999).
For Social Science majors, 6 upper level credits (numbered 2000-4999) must be taken in Humanities Subject Areas: Arabic, Chinese, English, French, German, Greek (Ancient), Greek and Roman Classics, Hebrew, Hindi, Italian, Japanese, Latin, Philosophy, Religion, Russian, and Spanish in the College of Liberal Arts, Art History in the Tyler School of Art, or any department in the College of Science and Technology.

A minimum GPA of 2.0, cumulatively, in CLA/CST coursework, and in the major.

Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.

Foreign Language/Global Studies Requirements:
- All students must complete or test out of the first and second levels of a foreign language - these courses are numbered 1001 and 1002;
- All students must complete at least one course from the GenEd Global/World Society category; and
- All Bachelor of Arts students must complete one of the following options:
  - Third semester of a foreign language;
  - Demonstrated proficiency beyond the third semester in a foreign language (placement exam or certification from the language department);
  - Take one Global Studies course from the list on the CLA College Graduation Requirements (p. 755) page;
  - Study Abroad at an approved program; or
  - Take a second General Education Global/World Society course.

Notes on Foreign Language Study
- The third level of language is numbered 1003 in French, German, Italian, Spanish, and Portuguese and numbered 2001 in all other foreign language subjects.
- Students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honor society Phi Beta Kappa. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)
- See the College of Liberal Arts Policies (p. 753) section of this Bulletin for more information on the Foreign Language Placement, Regression in Coursework, and guidelines for students' other experiences with language.

General Electives are typically one-third of a student's program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

### Minor in Latin American Studies

#### Requirements

The Latin American Studies Minor enables students to combine the requirements of their majors with the study of Latin America. It is designed to be of particular value to students who intend to engage in technical, professional, business, or government work involving Latin America. To earn the minor, students must complete six 3-credit courses in subjects with a Latin American emphasis and demonstrate a reading knowledge and speaking facility of Spanish or Portuguese.

**Introductory course**

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>LAS 1001</td>
<td>Perspectives on Latin America</td>
<td>3</td>
</tr>
</tbody>
</table>

**Electives**

Select five Latin American Studies Electives numbered 1000-4999

**Language Proficiency Requirement**

Select one of the following:

- Spanish or Portuguese 2000+
- Latin American Studies Semester (LASS) Proficiency examination

**Total Credit Hours**

1. Students who successfully complete the Latin American Studies Semester (LASS Program) need only four additional LAS electives. They are waived LAS 1001, one elective course, and the language proficiency requirement.

2. Students also must demonstrate reading knowledge and speaking facility of Spanish or Portuguese.

Minors are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.
Lesbian, Gay, Bisexual & Transgender (LGBT)

morawski@temple.edu

www.cla.temple.edu/womenstu/lgbt/minor/

Lesbian Gay Bisexual and Transgender Studies analyzes gender, sexuality, and sexual orientation as they are understood by various disciplines and in cross-cultural perspectives. The minor enables students to become familiar with concepts, theories, history, literature, and socio-political issues concerning the LGBT community. It also gives students an opportunity to examine and think critically about the intersections of sexuality, sex, and gender and become aware of the diversity of attitudes about sexuality in different cultures and historical eras.

Total Credit Hours 18

Minors are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Liberal Studies

www.cla.temple.edu/liberalstudies

The College of Liberal Arts offers a general degree in Liberal Studies for students who are not able to select a single discipline that would meet their professional goals and interests. This major program offers two tracks: Humanities and Social Sciences. The major in Liberal Studies is essentially self-designed, other than some common writing intensive coursework and a course that emphasizes critical thinking. It is purposely flexible so students can develop a program of study that will help them achieve a specific personal or professional goal that might be unrelated to a traditional discipline.

The Liberal Studies major was designed to meet the unique needs of working adults who may have delayed college or who are returning after a long absence from school. Courses are offered year-round at Main Campus, Ambler Campus, Online, and at Temple Center City. Students may combine locations as their schedule dictates.

Program

• Bachelor of Arts in Liberal Studies (p. 878)

Bachelor of Arts in Liberal Studies

The primary goal of the Liberal Studies curriculum is to assist students in developing their analytical, critical thinking, reading, writing and research skills, as they progress through a challenging curriculum that is primarily of their own design. This program is primarily designed to meet the needs of working
adults who have stopped out of college, or who have difficulty finding a major in one of the other disciplines in the College of Liberal Arts that meets their scheduling needs. This program will be offered at Main, Ambler, and Temple Center City campuses. Select courses will be offered online.

The curriculum is a broad-based liberal arts degree, primarily focused on upper division coursework selected by the student in keeping with his/her professional and academic goals.

All students in the Liberal Studies major begin their studies in CLA 2096, Introduction to Liberal Studies. This writing intensive, interdisciplinary course brings students together and (re)introduces the idea of academic research, writing, and participation in the academic enterprise. Instructors will select a topic of their choice and examine it from a variety of perspectives and viewpoints in the various disciplines of the liberal arts.

Later in their program of study, all Liberal Studies majors will take AMST 2098 Reading Culture to complete the second required writing intensive course for the General Education Curriculum.

Critical Thinking (either PHIL 1055 or PSY 1004) is the foundations-level course for this major.

Students must select a track, either Humanities or Social Sciences, and follow the requirements of that track. Within their track, students select a “concentration” of five courses all taken in a single department in their chosen track, all of which are numbered 2000-4999. If a particular course requires a lower-level prerequisite, this prerequisite is taken in addition to the required upper level courses of their program. Four upper level “breadth” courses numbered 2000+ are selected from other cognate departments within their chosen track. In lieu of the CLA Distribution requirement, students in the Bachelor of Liberal Studies major will take four courses numbered 2000-4999 in the “other” track (Humanities or Social Sciences).

Life Experience Portfolio Review

Students in the Liberal Studies major will have the opportunity to submit a portfolio for review to earn up to 6 credits of professional “life experience.” See your faculty advisor for more information.

For more information, contact Dr. Annette Bakley (amb@temple.edu), Senior Vice Dean of the College of Liberal Arts.

Summary of Degree Requirements

University Requirements:

• MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
• All Temple students must take a minimum of two writing-intensive courses as part of the major. The writing-intensive courses required for this major are CLA 2096 and AMST 2098.
• Students must complete requirements of the General Education (GenEd) Program. See the General Education (p. 143) section of the Undergraduate Bulletin for more details

College of Liberal Arts Requirements:

• Completion of a minimum of 123 credits, including:
  • 90 credits in CLA/CST courses;
  • 45 credits of which must be at the upper level (numbered 2000-4999).
    • The distribution requirement is built into this major.
  • A minimum GPA of 2.0, cumulatively, in CLA/CST coursework, and in the major.
  • Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.

• Foreign Language/Global Studies Requirements:
  • All students must complete or test out of the first and second levels of a foreign language - these courses are numbered 1001 and 1002;
  • All students must complete at least one course from the GenEd Global/World Society category; and
  • All Bachelor of Arts students must complete one of the following options:
    • Third semester of a foreign language;
    • Demonstrated proficiency beyond the third semester in a foreign language (placement exam or certification from the language department);
    • Take one Global Studies course from the list on the CLA College Graduation Requirements (p. 755) page;
    • Study Abroad at an approved program; or
    • Take a second General Education Global/World Society course.

• Notes on Foreign Language Study
  • The third level of language is numbered 1003 in French, German, Italian, Spanish, and Portuguese and numbered 2001 in all other foreign language subjects.
  • Students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honor society Phi Beta Kappa. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)
• See the College of Liberal Arts Policies (p. 753) section of this Bulletin for more information on the Foreign Language Placement, Regression in Coursework, and guidelines for students other experiences with language.

**General Electives** are typically one-third of a student's program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

**Major Requirements - 16 courses/48 credits, distributed as follows:**

A major in Neuroscience enables students to pursue a curriculum in several departments, colleges, and schools at Temple University in one of the most dynamic areas of science. Neuroscience is an interdisciplinary field addressing neural and brain function at multiple levels. It encompasses a broad domain that ranges from molecular genetics and neural development, to brain processes involved in cognition and emotion, to mechanisms and consequences of neurodegenerative disease. The field of neuroscience also includes mathematical and physical principles involved in modeling neural systems and in brain imaging.

The undergraduate, interdisciplinary Neuroscience Major will culminate in a Bachelor of Science degree. Many high-level career options within and outside of the field of neuroscience are open to students with this major. This is a popular major with students aiming for professional careers in the health sciences such as in medicine, dentistry, pharmacy, physical and occupational therapy, and veterinary science.

Students interested in graduate school in biology, chemistry, communications science, neuroscience, or psychology are also likely to find the Neuroscience Major attractive.

Programs

- Bachelor of Science in Neuroscience: Systems, Behavior & Plasticity (p. 883)
- Minor in Neuroscience Research (p. 887)

Bachelor of Science in Neuroscience: Systems, Behavior & Plasticity

The Bachelor of Science degree in Neuroscience includes 52-54 required credits: 25 credits in Neuroscience, 6-8 credits in electives on neuroscience topics from a variety of participating departments, and 21 credits of co-requisite courses in Biology, Chemistry, and Psychology. Students majoring in Neuroscience will be strongly encouraged to participate in research by taking courses in independent study as part of their elective credits for the major. Independent study opportunities will be offered in many of the laboratories of the more than 130 neuroscientist faculty members in the various colleges and schools participating in Temple University’s Neuroscience Program.

Summary of Degree Requirements

University Requirements:

- MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
- All Temple students must take a minimum of two writing-intensive courses as part of the major. The specific courses required for this major are NSCI 3096 and NSCI 4197.
- Students must complete requirements of the General Education (GenEd) Program. See the General Education section (p. 143) of the Undergraduate Bulletin for more details.

College of Liberal Arts Requirements:

- Completion of a minimum of 123 credits, including:
• 90 credits in CLA/CST courses;
• 45 credits of which must be at the upper level (numbered 2000-4999).
  - For Social Science majors, 6 upper level credits (numbered 2000-4999) must be taken in Humanities Subject Areas: Arabic, Chinese, English, French, German, Greek (Ancient), Greek and Roman Classics, Hebrew, Hindi, Italian, Japanese, Latin, Philosophy, Religion, Russian, and Spanish in the College of Liberal Arts, Art History in the Tyler School of Art, or any department in the College of Science and Technology.
• A minimum GPA of 2.0, cumulatively, in CLA/CST coursework, and in the major.
• Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, or minor requirements.
• Note: For Neuroscience majors, there is no CLA Foreign Language/Global Studies Requirement because it is a Bachelor of Science program. However, students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honor society Phi Beta Kappa. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)

General Electives are typically one-third of a student's program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

Total Credit Hours 52-54

Students should check prerequisites for all courses.

Combining the Major in Neuroscience with Major or Minor Programs in Psychology

Students who choose to double-major in Neuroscience and Psychology may count the following courses towards both majors without taking replacement coursework:

- PSY 1001 Introduction to Psychology
- PSY 1003 Statistics for Psychology
- NSCI 3096 Conducting Neuroscience Research
- BIOL 1012 General Biology II
- CHEM 1031 General Chemistry I & CHEM 1033 General Chemistry Laboratory I
- CHEM 1032 General Chemistry II & CHEM 1034 General Chemistry Laboratory II

For students who major in Neuroscience and minor in Psychology, the following courses may count towards both programs without taking replacement coursework:

- PSY 1001 Introduction to Psychology
- PSY 1003 Statistics for Psychology
- NSCI 3096 Conducting Neuroscience Research

Distinction in Neuroscience Major

Majors in Neuroscience: Systems, Behavior and Plasticity have the opportunity to be awarded departmental distinction upon graduation. Graduation with Distinction can be achieved by maintaining a Grade Point Average of 3.0 or better in all Neuroscience Courses, completing two semesters of Independent Study in Neuroscience (NSCI 4182 & NSCI 4282) with an A- or better, and successfully completing a neuroscience research project based on the independent study work and described in a research paper and poster presented to Neuroscience Program faculty and students.

CHEM 1031/CHEM 1033 and CHEM 1032/CHEM 1034 fulfill the GenEd Science & Technology requirement. Prerequisite for CHEM 1031 is MATH 1021 with a C or better or placement into MATH 1022.
Minor in Neuroscience Research

The Neuroscience Research Minor expands opportunities for Temple students to get research experience and to become more competitive in their applications to graduate and professional schools. The required courses in the Neuroscience Research Minor focus on basic neuroscience, cellular and molecular neuroscience, and techniques.

In addition to formal coursework, independent study resulting in a research project is required. The Neuroscience Research Project is a unique project developed over two semesters of independent study. The project is submitted in written form (research article format) and is presented to Neuroscience faculty members and graduate students as a poster. This project may not overlap with projects for other programs (e.g., Honors).

Because of some overlap in coursework, the students must choose to minor in either the Neuroscience Research or the Cognitive Neuroscience minor.

Total Credit Hours 18-19

Minors are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Major in Psychology with a Neuroscience Research Minor

Students who major in Psychology and take the Neuroscience Research Minor may double count one elective and NSCI 3096 Conducting Neuroscience Research for both programs without taking any replacement coursework.

bwilson@temple.edu
The Philosophy Department offers a B.A. degree program as well as a minor. The B.A. program is designed to provide a solid foundation for various professions in business, government, and professional schools (such as law and medicine), as well as an excellent background for the further study of philosophy. The department makes special provisions for students who have chosen the major as preparation for entry into law school. These students should follow a path slightly different from that of traditional majors, as indicated under the BA requirements (p. 889). The Philosophy Department always has many majors who are transfer students. Students should be sure to see the departmental advisor to make the necessary adjustments for their progress through the major.

**Programs**
- Bachelor of Arts in Philosophy (p. 888)
- Minor in Philosophy (p. 892)

**Bachelor of Arts in Philosophy**

**Summary of Degree Requirements**

**University Requirements:**
- MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
- All Temple students must take a minimum of two writing-intensive courses as part of the major. The specific courses required for this major are PHIL 1196, and either PHIL 4297 or PHIL 4298.
- Students must complete requirements of the General Education (GenEd) Program. See the General Education section (p. 143) of the Undergraduate Bulletin for more details.

**College of Liberal Arts Requirements:**
- Completion of a minimum of 123 credits, including:
  - 90 credits in CLA/CST courses;
  - 45 credits of which must be at the upper level (numbered 2000-4999).
    - For Humanities majors, 6 upper level credits must be earned in the Social Science and interdisciplinary subject areas: African American Studies, American Studies, Anthropology, Asian Studies, Criminal Justice, Economics, Environmental Studies, Geography and Urban Studies, Global Studies, History, Jewish Studies, Latin American Studies, Lesbian, Gay, Bisexual, and Transgender Studies, Liberal Arts, Neuroscience (CLA), Political Science, Psychology, Sociology, Women's Studies, or any department in the College of Science and Technology.
- A minimum GPA of 2.0, cumulatively, in all CLA/CST coursework, and in the major department.
- Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.
- **Foreign Language/Global Studies Requirements:**
  - All students must complete or test out of the first and second levels of a foreign language - these courses are numbered 1001 and 1002;
  - All students must complete at least one course from the GenEd Global/World Society category; and
  - All Bachelor of Arts students must complete one of the following options:
    - Third semester of a foreign language;
    - Demonstrated proficiency beyond the third semester in a foreign language (placement exam or certification from the language department);
    - Take one Global Studies course from the list on the CLA College Graduation Requirements (p. 755) page;
    - Study Abroad at an approved program; or
    - Take a second General Education Global/World Society course.

**Notes on Foreign Language Study**
- The third level of language is numbered 1003 in French, German, Italian, Spanish, and Portuguese and numbered 2001 in all other foreign language subjects.
- Students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honor society Phi Beta Kappa. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)
- See the College of Liberal Arts Policies (p. 753) section of this Bulletin for more information on the Foreign Language Placement, Regression in Coursework, and guidelines for students’ other experiences with language.

**General Electives** are typically one-third of a student's program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

**Major Requirements:** 12 courses in Philosophy (36 credits):
PHIL 1066  Introduction to Logic  3
PHIL 2161  History of Philosophy: Greek  3
PHIL 2172  History of Philosophy: Modern  3
PHIL 1196  Introduction to Philosophy  3

**Ethics**
Select one of the following:  3
- PHIL 3222  Contemporary Ethical Theory
- PHIL 3226  Classics in Moral Philosophy
- PHIL 4225  Metaethics

**Senior Seminar**
PHIL 4298  Senior Seminar  3
or PHIL 4297  Pre-Law Tutorial

Six additional Philosophy courses at the 2000+ level  18

**Total Credit Hours**  36

---

1  For scheduling reasons, especially for transfer students, another ethics-related course is often substituted.
2  PHIL 2196 does NOT count as an elective for the Philosophy major.

**Suggested Requirements for the Philosophy Major with a Pre-Law Emphasis:**

PHIL 1196  Introduction to Philosophy  3
PHIL 1055  Critical Thinking  3
PHIL 2161  History of Philosophy: Greek  3
PHIL 2172  History of Philosophy: Modern  3
PHIL 3243  Philosophy of Law  3
PHIL 4297  Pre-Law Tutorial  3
PHIL 3085  Pre-Law Internship  3
Five additional Philosophy courses at the 2000+ level  15

**Total Credit Hours**  36

---

**Distinction in Major**
Successful completion of PHIL 4999.

**Suggested Academic Plans**

**Bachelor of Arts in Philosophy**

**Requirements for New Students starting in the 2015-2016 Academic Year**

**Year 1**

**Fall**

- ENG 0802, 0812, or 0902  Analytical Reading and Writing [GW]  4
- GenEd Quantitative Literacy Course [GQ]  4
- Foreign Language 1001 - first level  4
- GenEd Breadth Course  3

**Term Credit Hours**  15

**Spring**

- IH 0851 or 0951  Mosaic: Humanities Seminar I [GY]  3
- Foreign Language 1002 - second level  4
- GenEd Breadth Course  3
- PHIL 1066  Introduction to Logic  3
- PHIL 1196  Introduction to Philosophy [WI]  3

**Term Credit Hours**  16

**Year 2**

**Fall**
IH 0852 or 0952 Mosaic: Humanities Seminar II [GZ] 3
GenEd Breadth Course 3
GenEd Breadth Course 3
PHIL 2161 History of Philosophy: Greek 3
One 0800-4999 Elective in Any School or College 2
Select one of the following:
   Foreign Language - third level
   GenEd Global/World Society course
   Internationally Focused Course From Approved List

Three Philosophy electives numbered 2000-4999 2 9

Total Credit Hours 21

1 For scheduling reasons, especially for transfer students, another ethics-related course is often substituted.
2 PHIL 2196 does NOT count as an elective for the Philosophy minor.

Minors are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Political Science

408 Gladfelter Hall
215-204-7796
www.cla.temple.edu/politicalscience/

Gary Mucciaroni, Chair
409 Gladfelter Hall
215-204-6195
The Political Science major and minor provide students with access to a wide range of courses in American politics at the local, state, and federal levels, as well as courses focused on countries around the world, international relations, and classical and modern political thought.

The key educational goal of the political science program is to help students acquire a strong foundation in communications skills while learning about political behavior, governments, political processes, and public policies. Through a curriculum that includes coursework in American, comparative, and international politics, and political theory, students develop analytical, research, and writing skills in step-wise fashion from introductory to upper-level courses. Students gain experience in how to develop sophisticated analytical arguments, strong written and oral presentation skills, and the capacity to conduct empirical research.

Political Science graduates pursue a wide range of careers. They may work in government offices (at local, state, and federal levels); political campaigns; private voluntary organizations; unions, advocacy and community organizations; foundations, social services, and educational institutions. A degree in Political Science is excellent preparation for law school, public policy programs, and graduate studies in international affairs.

The department can arrange internships, which are typically linked to academic study. In addition, the Experiential Learning Program offers internships combined with academic seminars.

The department works closely with several student organizations, including the Political Science Majors Association, the Political Science Society, and the Political Science Honor Society - Pi Sigma Alpha, Temple Chapter.

**Special Programs**

**Political Science Honors Program**

The Political Science Honors Program is designed to give highly motivated Political Science students the opportunity to take academically rigorous honors seminars with other honors students, and to acquire the skills necessary to undertake in-depth independent research on topics of interest. The Department's Honors Program is excellent preparation for graduate school.

**Distinction in Major:** Political Science majors who have completed their sophomore year with a 3.6 GPA or above are eligible to be a member of the Departmental Honors Program in Political Science. Departmental Honors students are allowed to take a two course writing-intensive sequence (POLS 3996 Junior Honors Capstone Seminar and POLS 4996 Senior Honors Capstone Seminar) in their junior and senior years. Students who pass both courses with a B or better will graduate with Distinction in Major. This is noted on the transcript. Note: POLS 3996 counts as an upper-level elective and writing intensive course and POLS 4996 counts as the senior capstone requirement.

**Admission into the Departmental Honors Program:** Eligible students will be contacted via e-mail in the spring semester. Students who believe they are eligible for the program but who were not notified are encouraged to contact the Undergraduate Chair, Dr. Orfeo Fioretos, kof@temple.edu for more information.

**Funding and Support**

- Honors Program students may apply for financial support to cover research-related activities, such as visits to archives, travel to present a scholarly paper, etc., through the Creative Arts, Research and Scholarship (CARAS) Program (http://www.temple.edu/vpus/opportunities/CARAS.htm).
- Funding is also available through the Diamond Research Scholars Program (http://www.temple.edu/vpus/opportunities/ResearchScholars.htm).
- Honors students are also encouraged to submit their completed senior thesis to the Library Prize for Undergraduate Research (http://guides.temple.edu/libraryprize).

**Internship/Experiential Learning**

The internship experience provides students the opportunity to learn more about the discipline and potential career paths through a workplace experience. Students may count up to 6 credits towards the requirements of the major (major electives) in approved internship placements. (Additional credits may count toward free electives; check with your academic advisor.) Interested students should contact Dr. Alistair Howard alistair@temple.edu for more information.
The Political Economy Certificate Program

The Department of Political Science and the Department of Economics offer an interdisciplinary program leading to a Certificate in Political Economy. The program focuses on the interaction between government and the economy and is ideal preparation for students planning careers in either the public or private sector. It also provides an excellent foundation for graduate studies in law, the social sciences, and public administration. The program is open to all matriculated students in the university. Contact Dr. Richard Deeg, rdeeg@temple.edu, for specific details and requirements.

Pre-Law Studies

Political Science is one of the most popular majors for pre-law students. Although law schools neither give preference to any particular major nor require any specific undergraduate courses, they do make some general recommendations about getting a sound Liberal Arts education. For more information, students should visit CLA Pre-Law (http://www.cla.temple.edu/prelaw).

In general, pre-law students should develop skills in communicating ideas in both written and spoken form. In addition, pre-law students should sharpen their analytical abilities and ability to think logically. Law schools also recommend that pre-law students acquire in-depth understanding of at least one social science (such as Political Science). Finally, some knowledge of business structure and terminology may be useful in law school. For further information, students interested in pre-law studies should contact Dr. Paul Crowe in the Philosophy Department, pcrowe@temple.edu or Ms. Elizabeth Reynard, ereynard@temple.edu in the Academic Advising Center.

Study Away Opportunities

The Pennsylvania Capital Semester

The Institute for Public Affairs sponsors an internship semester each fall and spring in Harrisburg in association with Temple’s Harrisburg campus. Students have the opportunity to explore government affairs, policymaking and implementation first-hand while being full-time students and staying on track to graduation. If accepted, students are guaranteed an internship, as Temple makes the initial contacts, and gears placements toward student interests. Internships are with the legislature, executive branch, media, advocacy organizations, non-profits, and lobbying and development firms. All majors are encouraged to apply.

For further information, refer to The Pennsylvania Capital Semester site (http://www.cla.temple.edu/ipa/about/the-pennsylvania-capital-semester).

Contact: Michelle J. Atherton, Associate Director, Institute for Public Affairs, 840 Anderson Hall, 215-204-9074, mjather@temple.edu.

The Washington Semester

The Washington Semester allows Temple students to gain valuable career experience in the nation’s capital, while remaining full-time students. If accepted into the program, students register for three courses for a 15-credit semester in the fall and spring, 9 credits for the internship and 3 each for a leadership seminar and academic course. Summer programs are also available for 12 credits with a 6-credit internship. The Institute for Public Affairs serves as liaison to The Washington Center, a well-established and well-regarded provider of educational programs in Washington, DC through which Temple students receive internships and take classes. Programs range from service and the arts, to business and global trade, to media and communications, and politics and more.

For further information refer to The Washington Semester site (http://www.cla.temple.edu/ipa/the-washington-semester).

Contact: Michelle J. Atherton, Associate Director, Institute for Public Affairs, 840 Anderson Hall, 215-204-9074, mjather@temple.edu.

Study Abroad

Temple provides a number of opportunities for students to study abroad; and the experience of living in, and meeting people from, other cultures; seeing different countries; and learning a foreign language can greatly enrich the undergraduate experience. The Office of Education Abroad and Overseas Campuses (200 Tuttleman Learning Center; phone: 215-204-0720; http://studyabroad.temple.edu/) has information on a variety of programs abroad. Temple study abroad locations include Tokyo, Rome, London, Paris, Germany, and Mexico.

Student Organizations

The Political Science Majors Association is the organization of all Political Science majors at Temple University. The primary purpose of the association is to represent the opinions and interests of undergraduate majors within the Political Science Department. The association sponsors activities for undergraduate majors, including career forums, lectures, student and faculty mixers, law and graduate forums, seminars on popular topics, and trips to Harrisburg.

Pi Sigma Alpha is the national Political Science Honor Society, into which students who have distinguished themselves in the field of political science are inducted. Inquiries about membership should be directed to the faculty advisor of Pi Sigma Alpha, Dr. Robin Kolodny, rkolsony@temple.edu.

Programs

• Bachelor of Arts in Political Science (p. 895)
• Minor in Political Science (p. 897)
Bachelor of Arts in Political Science

Course Sequencing for Political Science Majors

Students begin the major by taking four introductory courses: POLS 1101, POLS 1201, POLS 1301, and POLS 2496.

Courses should be sequenced so that students take the introductory courses before the upper-level courses. POLS 1101 is an introduction to U.S. politics and should be taken before upper-level courses in this area. Similarly, POLS 1201 introduces foreign governments and precedes upper-level courses in this field. POLS 1301 introduces international politics and is a prerequisite for upper-level courses in this subject matter. POLS 2496 introduces political theory and should be taken after a student has had several Political Science courses and should precede upper-level theory courses.

Once the introductory courses are completed, students can move on to the electives at the upper level (numbered 2000-4999), of which 3 are needed. Students should pay particular attention to the order in which they take the research methods-capstone sequence (which is taken concurrent with the electives; see notes below). The first course in this sequence is POLS 2503 Evidence and Knowledge, a research design course that teaches students how to conduct empirical research, an essential skill for successfully completing the upper-level courses.

Evidence and Knowledge will lay the foundation for the next two capstone preparation courses (numbered 3501 through 3599). These research-intensive courses focus on an advanced topic, like other upper level courses, but they also place an emphasis on sharpening the research skills covered in the first course. Once two capstone prep/research intensive courses are completed, the student enrolls in a capstone seminar, the culminating experience of the Political Science major.

Summary of Degree Requirements

University Requirements:

- MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
- All Temple students must take a minimum of two writing-intensive courses as part of the major. The specific courses required for this major are POLS 2496 and POLS 4896.
- Students must complete requirements of the General Education (GenEd) Program. See the General Education (p. 143) section of the Undergraduate Bulletin for more details.

College of Liberal Arts Requirements:

- Completion of a minimum of 123 credits, including:
  - 90 credits in CLA/CST courses;
  - 45 credits of which must be at the upper level (numbered 2000-4999).
  - For Social Science majors, 6 upper level credits (numbered 2000-4999) must be taken in Humanities Subject Areas: Arabic, Chinese, English, French, German, Greek (Ancient), Greek and Roman Classics, Hebrew, Hindi, Italian, Japanese, Latin, Philosophy, Religion, Russian, and Spanish in the College of Liberal Arts, Art History in the Tyler School of Art, or any department in the College of Science and Technology.
  - A minimum GPA of 2.0, cumulatively, in CLA/CST coursework, and in the major.
  - Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.
  - Foreign Language/Global Studies Requirements:
    - All students must complete or test out of the first and second levels of a foreign language - these courses are numbered 1001 and 1002;
    - All students must complete at least one course from the GenEd Global/World Society category; and
    - All Bachelor of Arts students must complete one of the following options:
      - Third semester of a foreign language;
      - Demonstrated proficiency beyond the third semester in a foreign language (placement exam or certification from the language department);
      - Take one Global Studies course from the list on the CLA College Graduation Requirements (p. 755) page;
      - Study Abroad at an approved program; or
      - Take a second General Education Global/World Society course.
  - Notes on Foreign Language Study
    - The third level of language is numbered 1003 in French, German, Italian, Spanish, and Portuguese and numbered 2001 in all other foreign language subjects.
    - Students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honor society Phi Beta Kappa. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)
• See the College of Liberal Arts Policies (p. 753) section of this Bulletin for more information on the Foreign Language Placement, Regression in Coursework, and guidelines for students’ other experiences with language.

**General Electives** are typically one-third of a student’s program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

**Minor in Political Science**

**Requirements**

**Introduction**

Select two of the following: 6

- POLS 1101 The American Political System
- POLS 1201 Foreign Governments and Politics
- POLS 1301 International Politics
- POLS 2496 Introduction to Political Philosophy

**Electives**
Select 4 upper-level courses numbered 2000-4999 \(^1\)

**Total Credit Hours**

18

\(^1\) With the exception of POLS 2496

Minors are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

**Psychology**

The Temple University Undergraduate Psychology program provides a modern curriculum covering a breadth of content, ranging from biological bases of cognition and behavior to sociocultural influences on human interactions and psychological disorders. The curriculum is designed to develop students' critical thinking skills through emphasis of the scientific basis of Psychology and courses in statistics and research methodology. The program also emphasizes the integration and synthesis of information across courses and activities through the stepwise progression of the curriculum from the introductory, foundational, and advanced classes up to the final capstone course that is taken in the senior year. Students are strongly encouraged to develop applied skills through rigorous and highly focused experiential learning in research laboratories and community-based internships. The curriculum is designed to be sufficiently flexible to satisfy the diversity of needs among undergraduates. An individually tailored curriculum may be selected for the purpose of preparing students for employment or further study in psychology, neuroscience, medicine, law, business, or other fields.

Psychology identifies several learning goals for each level of instruction in the program. At the introductory level (PSY 1001, PSY 1002, PSY 1003, PSY 1004), goals include familiarity with the scientific grounding of the discipline (PSY 1001), basic statistics (PSY 1003) and scientific methods (PSY 1004), as well as information on how to prepare for a career in psychology or a related discipline (PSY 1002). At the Foundation level (2000-level courses), students develop deeper knowledge of the fascinating content areas in the discipline, which are broadly organized in two groups:

1. Developmental/Clinical/Social (DCS); and

Students are required to choose at least two courses from each of these two general areas, and this ensures familiarity with the breadth of the discipline. These courses cover a wide range of topics from the functions of the neuron to the development of moral thought. At the Advanced level (3000-3620), students continue to develop critical thinking skills to dispassionately examine conflicting claims, analyze data, organize research papers, and become more proficient with the scientific process in a writing intensive course (PSY 3096). Students also are required to select four courses with the option of continuing to develop breadth or choosing to delve into greater depth in one area, such as clinical psychology. Finally, at the 4000 level, Capstone is the only course offered. This writing-intensive course is designed to help students integrate their knowledge base, to refine their critical and writing skills, and generally to synthesize their knowledge of the discipline.

**Collaborative Research**

Up to four terms of Collaborative Research (PSY 3791, PSY 3891, PSY 4791, and PSY 4891) may be taken as free electives that count toward the CLA upper-level course requirement. Enrolling in Collaborative Research allows students to work alongside faculty members and their graduate students.
in a research laboratory setting. Through these experiences, students learn how studies are designed and conducted. They also learn how data are collected, analyzed, and interpreted. Research experiences are very important for students interested in applying to graduate school in psychology. To find information on research labs, visit the Collaborative Research site (http://www.cla.temple.edu/psychology/research-opportunities/faculty-sponsors-for-collaborative-research).

**Internship/Practicum**

With permission, students may obtain course credit for psychology experiences in the workplace (PSY 3785 and PSY 3787). These courses count as upper level electives for the BA degree, but may not be used as electives for the major requirements in Psychology. Internships allow students to apply psychological theories that are learned in the classroom to real-life situations. Internships also help to build an employment record and may complement applications for graduate work in psychology, social work, or another field. Internships are available in a number of different applications in psychology, including, but not limited to: organizational; applied behavior analysis; education; clinical and counseling psychology; autism research; probation officers; and a variety of other placements.

For more information, visit the Internship & Practicum site (http://www.cla.temple.edu/psychology/undergraduate/psychology-internship-and-practicum) or e-mail Dr. Peter James at pjames@temple.edu.

**Policies Regarding Curricular Overlaps**

There are several related majors and minors offered from the Psychology Department, including the major and minor in Psychology, the Cognitive Neuroscience minor in Psychology, the Clinical and Health Psychology minor, the major in Neuroscience (see Neuroscience Section for details) and the Neuroscience Research minor.

Students majoring in Psychology may take a minor in Cognitive Neuroscience, a second major in Neuroscience, or a minor in Neuroscience Research. Psychology majors are not permitted to take the minor in Clinical and Health Psychology but are permitted to take those courses as electives in their major.

Students who opt to double major in Psychology and Neuroscience may double-count the following required courses without taking additional electives in their major to replace the credits:

- PSY 1001 Introduction to Psychology
- PSY 1003 Statistics for Psychology
- PSY 3096 Conducting Psychological Research or NSCI 3096 Conducting Neuroscience Research
- BIOL 1012 General Biology II
- CHEM 1031 General Chemistry I/CHEM 1033 General Chemistry Laboratory I
- CHEM 1032 General Chemistry II/CHEM 1034 General Chemistry Laboratory II

Students who major in Psychology and minor in Cognitive Neuroscience may double count a maximum of two courses.

Students who major in Psychology and minor in Neuroscience Research may double count one elective course and

- PSY 3096 Conducting Psychological Research or NSCI 3096 Conducting Neuroscience Research

**Programs**

- Bachelor of Arts in Psychology (p. 899)
- Minor in Clinical and Health Psychology (p. 904)
- Minor in Cognitive Neuroscience (p. 905)
- Minor in Psychology (p. 905)

**Bachelor of Arts in Psychology**

Students who major in Psychology are encouraged to participate in the Psychology Honors Program, Psychology Majors Association, and Honor Societies for Psychology majors, including Psi Chi and Phi Beta Kappa.

**The Psychology Honors Program**

A main goal of the Psychology Honors program is to provide each student with an individualized experience that will prepare them for psychological research in the future. This program is designed as a two-year study that begins with critical thinking, writing, and the study of methodology. Grade requirement is a 3.5 GPA across all courses. Upon completion of this program, students will have produced a senior thesis and presented their work at a student poster session. Some students present research at regional or national meetings.

Students earn Distinction in Major upon completion of the Psychology Honors program.
For more information, refer to the Psychology Honors Program section of the Psychology Undergraduate site (http://www.cla.temple.edu/psychology/undergraduate).

## The Undergraduate Psychology Majors’ Association

The goal of the Psychology Majors’ Association (PMA) is to provide opportunities for students to apply their appreciation of psychology through activities outside of the classroom. PMA also promotes networking between students and faculty members within the psychology department. PMA members participate in a variety of opportunities including volunteer work, field trips, workshops on graduate school, and current topics in psychology, and career development. More information is available at Psychology Majors Association (http://www.cla.temple.edu/psychology/psychology-majors-association).

## Psi Chi - The National Honor Society in Psychology

Psi Chi, the National Honor Society in Psychology, has an active chapter at Temple University. The minimum requirements for membership in Psi Chi are a 3.20 cumulative GPA and a 3.50 GPA in Psychology courses. Psi Chi members are given opportunities for growth and development within the field of psychology. Psi Chi encourages students to engage in research opportunities within psychology as well as continue their education in graduate studies. For more information, contact psichi@temple.edu.

## Phi Beta Kappa

Phi Beta Kappa is the oldest honor society in the United States. It was developed to foster and recognize excellence in the humanities and sciences. More information about Phi Beta Kappa requirements and activities is available at Honor Societies (p. 57).

## Summary of Degree Requirements

### University Requirements:

- MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
- All Temple students must take a minimum of two writing-intensive courses as part of the major. The specific courses required for this major are PSY 3096 Conducting Psychological Research and one of the following capstone courses: PSY 4496, PSY 4596, PSY 4696, PSY 4796, PSY 4996.
- Students must complete requirements of the General Education (GenEd) Program. See the General Education section (p. 143) of the Undergraduate Bulletin for more details.

### College of Liberal Arts Requirements:

- Completion of a minimum of 123 credits, including:
  - 90 credits in CLA/CST courses;
  - 45 credits of which must be at the upper level (numbered 2000-4999).
    - For Social Science majors, 6 upper level credits (numbered 2000-4999) must be taken in Humanities Subject Areas: Arabic, Chinese, English, French, German, Greek (Ancient), Greek and Roman Classics, Hebrew, Hindi, Italian, Japanese, Latin, Philosophy, Religion, Russian, and Spanish in the College of Liberal Arts, Art History in the Tyler School of Art, or any department in the College of Science and Technology.
  - A minimum GPA of 2.0, cumulatively, in CLA/CST coursework, and in the major.
  - Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.
  - Foreign Language/Global Studies Requirements:
    - All students must complete or test out of the first and second levels of a foreign language - these courses are numbered 1001 and 1002;
    - All students must complete at least one course from the GenEd Global/World Society category; and
    - All Bachelor of Arts students must complete one of the following options:
      - Third semester of a foreign language;
      - Demonstrated proficiency beyond the third semester in a foreign language (placement exam or certification from the language department);
      - Take one Global Studies course from the list on the CLA College Graduation Requirements (p. 755) page;
      - Study Abroad at an approved program; or
      - Take a second General Education Global/World Society course.
• **Notes on Foreign Language Study**
  - The third level of language is numbered 1003 in French, German, Italian, Spanish, and Portuguese and numbered 2001 in all other foreign language subjects.
  - Students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honor society Phi Beta Kappa. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)
  - See the College of Liberal Arts Policies (p. 753) section of this Bulletin for more information on the Foreign Language Placement, Regression in Coursework, and guidelines for students' other experiences with language.

General Electives are typically one-third of a student's program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

**Major Requirements (minimum 44 credits; 40 credits in Psychology plus 4 credits in a designated science area):**

**Psychology Science Requirement**

- Select one of the following:
  - 4
  - BIOL 1001 Human Biology
  - BIOL 1011 General Biology I
  - CHEM 1021 Introduction to Chemistry I
  - CHEM 1023 and Introduction to Chemistry Laboratory I
  - CHEM 1027 Applications of Chemistry
  - CHEM 1031 General Chemistry I
  - CHEM 1033 and General Chemistry Laboratory I
  - PHYS 1021 Introduction to General Physics I
  - EES 1001 Introductory Geology
  - EES 2001 Physical Geology

**Developmental/Clinical/Social (DCS) Foundation Courses**

- Select two of the following:
  - 6
  - PSY 2201 Foundations of Psychopathology
  - PSY 2301 Foundations of Developmental Psychology
  - PSY 2401 Foundations of Social Psychology
  - PSY 2402 Foundations of Industrial and Organizational Psychology
  - PSY 2601 Foundations of Health Psychology

**Brain and Cognitive Sciences (BCS) Foundation Courses**

- Select two of the following:
  - 6
  - PSY 2101 Foundations of Cognitive Psychology
  - PSY 2103 Foundations of Learning and Behavior Analysis
  - PSY 2104 Foundations of Sensation and Perception
  - PSY 2501 Foundations of Behavioral Neuroscience
  - PSY 2502 Foundations of Cognitive Neuroscience

**Required Methods Course**

- PSY 3096 Conducting Psychological Research | 3  |

**Advanced Courses (3000-3620)**

- Select three of the following:
  - 9
  - PSY 3003 Advanced Undergraduate Statistics
  - PSY 3005 Affective Neuroscience
  - PSY 3141 Neurobiology and Evolution of Social Behavior
  - PSY 3151 Direct Applications of Behavioral Principles
  - PSY 3152 Experimental Psychopathology

**Psychology Elective**

One additional course at the Foundation Level or the Advanced Level (2000-3620).

**Capstone Course**  
Select one of the following:
- PSY 4496 Capstone: History of Psychology  
- PSY 4596 Capstone: Fields of Psychology  
- PSY 4696 Capstone in Psychology  
- PSY 4796 Capstone: Research  
- PSY 4996 Honors Capstone

**Total Credit Hours**  
44-45

---

1. Foundation courses are prerequisites for the advanced (3000-level) areas.
2. Select three from any of the advanced courses (3000-3620) for which you have completed the prerequisite foundation course. These courses cover specialty areas within particular fields of psychology.  
   Note: PSY 3096 does not count toward the requirement.  
   Seniors only - minimum of 90 credits completed and completion PSY 3096.

See the "About" tab for more information on combining the various programs offered by Psychology and Neuroscience. Some programs cannot be combined; others permit a degree of overlap. All restrictions are listed in detail on that page.

**Individual Study Courses**

Permission of the instructor is required to register for these courses. For all Psychology majors and minors.

Minor in Clinical and Health Psychology

The minor in Clinical and Health Psychology from the Temple Psychology Department consists of 21 credits. The minor will introduce students to the specialties in psychology that focus on understanding health and illness through the study of the interplay among psychology, biology, and environment. This minor is designed for students who do not major in psychology but have interests in psychology, public health, and other health-related careers (e.g., nursing, speech therapy). Pre-med students will find that this minor will help to prepare for the new MCAT exam, which has been modified to include psychology topics.

Students outside Psychology majors may declare this minor. Seven courses are required.

Minor in Cognitive Neuroscience

Cognitive Neuroscience is an interdisciplinary field with a focus on a fundamental mystery of science: how the mind arises from the brain. A minor in Cognitive Neuroscience will strengthen the academic record of students who plan to apply for graduate programs. For example, in Psychology this minor will strengthen applicants' records for specializations such as Behavioral Neuroscience, Clinical Neuropsychology, Cognitive Psychology, or Psychophysiology. Students might also go into General Neuroscience or Cognitive Science. Pre-med students with a Cognitive Neuroscience minor would present distinctive profiles to medical school admissions offices.

Students in the College of Liberal Arts (including Psychology majors) as well as students in other colleges, schools, and departments may choose to minor in Cognitive Neuroscience. No more than two courses can be double-counted for the Psychology major and the Cognitive Neuroscience minor.

Minors are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Students must complete successfully the following courses with a grade of C- or better:

Minor in Psychology

The Minor in Psychology introduces the student to a representative array of Psychology courses, prepares the student for the minimal course requirements for acceptance to most Psychology graduate schools, and results in formal university recognition on the student's official transcript.

Minors are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

www.cla.temple.edu/religion

Religion is a pervasive, powerful, multifaceted, and enduring dimension of human experience. Religions have shaped complex cultures and countless individual lives. Religions are influential in the world today and will continue to be so in the future.

The academic study of religion is multidisciplinary, drawing upon approaches from history, literary studies, philosophy, and the social sciences. It is multicultural, exploring the beliefs, practices, and development of particular religious communities in many different cultures. The Religion Department provides a wide array of courses introducing students to the major religions of the world, with an emphasis upon the comparison of traditions and their encounter with one another. Instruction is offered in African and African American religions, Buddhism, Christianity, Confucianism, Hinduism, Judaism, and Daoism.

The major in Religion is very flexible by design; it easily accommodates study abroad plans, internship opportunities, or a second major or minor in a related discipline. Consult your academic advisor to develop a plan of study that meets your professional goals.

Career Preparation

Students who major in Religion develop a useful skill set that is in demand in a number of professions. Cultural sensitivity, analytical thinking, and excellent writing and verbal communications are the necessary training for careers related to public service, diplomacy, journalism, counseling, research, social work, health and human services, conflict resolution, and government. Some students go on to further study in doctoral programs, law school, medical school, or prepare for the ministry.

Programs

• Bachelor of Arts in Religion (p. 907)
• Minor in Religion (p. 910)
Bachelor of Arts in Religion

The Bachelor of Arts in Religion is a solid Liberal Arts degree, providing graduates with the knowledge base and the intellectual, analytical, communication, and interpersonal skills essential to succeed in any career. The faculty and course offerings provide an introduction to the major religions of the world, with an emphasis upon the comparison of traditions and their encounter with one another. Instruction is offered in African and African American religions, Buddhism, Christianity, Confucianism, Hinduism, Judaism, and Daoism.

Employment Prospects after graduation with the Bachelor's degree include the fields of Journalism and Communications, Social Work, Ministry/Chaplaincy, Pre-Law, Pre-Med/Health Services, Government/FBI, NGO's, Hospice/End-of-Life Care, International Enterprise, Education, Academic Research, Human Resources, Tourism and Hospitality.

Summary of Degree Requirements

University Requirements:

- MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
- All Temple students must take a minimum of two writing-intensive courses as part of the major. The specific courses required for this major are REL 4096, and either REL 2496 or REL 2596.
- Students must complete requirements of the General Education (GenEd) Program. See the General Education section (p. 143) of the Undergraduate Bulletin for more details.

College of Liberal Arts Requirements:

- Completion of a minimum of 123 credits, including:
  - 90 credits in CLA/CST courses;
  - 45 credits of which must be at the upper level (numbered 2000-4999).
    - For Humanities majors, 6 upper level credits must be earned in the Social Science and interdisciplinary subject areas: African American Studies, American Studies, Anthropology, Asian Studies, Criminal Justice, Economics, Environmental Studies, Geography and Urban Studies, Global Studies, History, Jewish Studies, Latin American Studies, Lesbian, Gay, Bisexual, and Transgender Studies, Liberal Arts, Neuroscience (CLA), Political Science, Psychology, Sociology, Women's Studies, or any department in the College of Science and Technology.
  - A minimum GPA of 2.0, cumulatively, in all CLA/CST coursework, and in the major department.
  - Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.

- Foreign Language/Global Studies Requirements:
  - All students must complete or test out of the first and second levels of a foreign language - these courses are numbered 1001 and 1002;
  - All students must complete at least one course from the GenEd Global/World Society category; and
  - All Bachelor of Arts students must complete one of the following options:
    - Third semester of a foreign language;
    - Demonstrated proficiency beyond the third semester in a foreign language (placement exam or certification from the language department);
    - Take one Global Studies course from the list on the CLA College Graduation Requirements (p. 755) page;
    - Study Abroad at an approved program; or
    - Take a second General Education Global/World Society course.

- Notes on Foreign Language Study
  - The third level of language is numbered 1003 in French, German, Italian, Spanish, and Portuguese and numbered 2001 in all other foreign language subjects.
  - Students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honor society Phi Beta Kappa. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)
  - See the College of Liberal Arts Policies (p. 753) section of this Bulletin for more information on the Foreign Language Placement, Regression in Coursework, and guidelines for students' other experiences with language.

General Electives are typically one-third of a student's program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

Major Requirements: Ten courses in Religion (30 credits):

Writing-Intensive Course
REL 2496  Introduction to the Bible  3
or REL 2596  What Is Christianity?

Non-Western Courses
Select two of the following:  6
REL 2101  Indian Philosophies and Religions
REL 2102  Introduction to Buddhism
REL 2201  Chinese Religions - Confucius to Mao
REL 2702  Religion in Contemporary Africa
REL 3101  Yoga & Tantric Mysticism
REL 3201  I-Ching, Tao, and Ch'an/Zen
REL 3301  Japanese Religions
REL 3302  Japanese Buddhism
REL 3701  Traditional Religions of Africa
REL 3702  African Religions and New World Culture

Electives
Select five additional Religion courses  1  15

Capstone
REL 4096  Capstone Seminar in Religion  2  3

Total Credit Hours  30

1  Up to two may be from courses numbered 0800-1999, and at least three must be from courses numbered 2000 and above.
2  Restricted to Religion majors only and minors with permission of instructor. Students must have completed at least five courses in the major prior to taking the capstone.

Transfer students: No more than five religion courses taken at other institutions may be accepted for the major. The director of undergraduate studies must determine that these meet the standards of the Religion major.

Distinction in Major in Religion
For graduation with Distinction in Major, an overall GPA of 3.25 is required with 3.5 in Religion courses.

Sociology is the study of human behavior in the context of the groups, organizations, institutions, and societies in which it occurs. The sociology department offers courses covering a wide range of topics, including: contemporary social issues, race and racism, sexuality and gender, health and health care, education, urban life, housing, organizations, family, political life, popular culture, immigration, law, international development and globalization. The sociological perspective pays close attention to diversity in culture, values, and human experience.

Careers Related to Sociology

Majoring in sociology prepares students for many careers and graduate programs by providing both a broad sociological perspective and specific research, statistical and analytic skills. Students gain experience in fieldwork and interviewing; they develop, administer and analyze surveys and statistics; and they write research reports. Sociology provides an excellent background for students planning to begin their careers upon graduation as well as those planning to pursue graduate education. Recent graduates have gone to work and graduate school in the areas of law, medicine, business, non-profits, community planning, social work, market research, and education. Students who are interested in a career in the health field can pursue a special sociology major focused on health-related coursework. The Health Track in Sociology prepares students for graduate studies in leading medical, dental, nursing, public health, and physical and occupational therapy programs as well as graduate programs in sociology and related fields.

Student Organizations and Opportunities

Sociology majors and minors are encouraged to participate in the Sociology Undergraduate Majors and Minors Association (SUMMA), which hosts academic, community service, and social events throughout the year. The department sponsors the Annual Student Research Conference in which students can present their work.

Awards

Awards available to sociology majors include the Robert K. Merton Award, the Sociology Prize, the Benjamin and Irma Robboy Award, the Othella Vaughn Award, and the Nelsi Beato Award.
Programs

- Bachelor of Arts in Sociology (p. 911)
- Bachelor of Arts in Sociology: Health Track (p. 913)
- Certificate in Health Research (p. 916)
- Minor in Sociology (p. 917)
- Minor in Sociology of Health (p. 917)

Bachelor of Arts in Sociology

Summary of Degree Requirements

- **University Requirements:**
  - MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
  - All Temple students must take a minimum of two writing-intensive courses as part of the major. The specific courses required for this major are SOC 3396 and SOC 4096.
  - Students must complete requirements of the General Education (GenEd) Program. See the General Education (p. 143) section of the Undergraduate Bulletin for more details.
- **College of Liberal Arts Requirements:**
  - Completion of a minimum of 123 credits, including:
    - 90 credits in CLA/CST courses;
    - 45 credits of which must be at the upper level (numbered 2000-4999).
    - For Social Science majors, 6 upper level credits (numbered 2000-4999) must be taken in Humanities Subject Areas: Arabic, Chinese, English, French, German, Greek (Ancient), Greek and Roman Classics, Hebrew, Hindi, Italian, Japanese, Latin, Philosophy, Religion, Russian, and Spanish in the College of Liberal Arts, Art History in the Tyler School of Art, or any department in the College of Science and Technology.
  - A minimum GPA of 2.0, cumulatively, in CLA/CST coursework, and in the major.
  - Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.
- **Foreign Language/Global Studies Requirements:**
  - All students must complete or test out of the first and second levels of a foreign language - these courses are numbered 1001 and 1002;
  - All students must complete at least one course from the GenEd Global/World Society category; and
  - All Bachelor of Arts students must complete one of the following options:
    - Third semester of a foreign language;
    - Demonstrated proficiency beyond the third semester in a foreign language (placement exam or certification from the language department);
    - Take one Global Studies course from the list on the CLA College Graduation Requirements page;
    - Study Abroad at an approved program; or
    - Take a second General Education Global/World Society course.
- **Notes on Foreign Language Study**
  - The third level of language is numbered 1003 in French, German, Italian, Spanish, and Portuguese and numbered 2001 in all other foreign language subjects.
  - Students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honor society Phi Beta Kappa. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)
  - See the College of Liberal Arts Policies section of this Bulletin for more information on the Foreign Language Placement, Regression in Coursework, and guidelines for students’ other experiences with language.

General Electives are typically one-third of a student's program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

Major Requirements (42 credits):

<table>
<thead>

---

1. SOC 4001 is only offered in the spring and SOC 4002 only in the fall; plan to take prior to SOC 4096. See advisor for course selection.

**Please check prerequisites for all Sociology courses.**
Russian, and Spanish in the College of Liberal Arts, Art History in the Tyler School of Art, or any department in the College of Science and Technology.

- A minimum GPA of 2.0, cumulatively, in CLA/CST coursework, and in the major.
- Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.

**Foreign Language/Global Studies Requirements:**
- All students must complete or test out of the first and second levels of a foreign language - these courses are numbered 1001 and 1002;
- All students must complete at least one course from the GenEd Global/World Society category; and
- All Bachelor of Arts students must complete one of the following options:
  - Third semester of a foreign language;
  - Demonstrated proficiency beyond the third semester in a foreign language (placement exam or certification from the language department);
  - Take one Global Studies course from the list on the CLA College Graduation Requirements (p. 755) page;
  - Study Abroad at an approved program; or
  - Take a second General Education Global/World Society course.

**Notes on Foreign Language Study**
- The third level of language is numbered 1003 in French, German, Italian, Spanish, and Portuguese and numbered 2001 in all other foreign language subjects.
- Students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honor society Phi Beta Kappa. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)
- See the College of Liberal Arts Policies (p. 753) section of this Bulletin for more information on the Foreign Language Placement, Regression in Coursework, and guidelines for students' other experiences with language.

**General Electives** are typically one-third of a student's program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

**Major Options: Health Track in Sociology (42 credits):**

**Required Courses**
- **SOC 1176**  
  Introduction to Sociology  
  \[3\]
- **SOC 3201**  
  Statistical Methods in Sociology \[^1\]  
  \[4\]
- **SOC 3396**  
  Development of Sociological Thought  
  \[3\]
- **SOC 3261**  
  Research Design and Methods \[^1\]  
  \[4\]
- **SOC 4096**  
  Senior Seminar  
  \[2\]  
  \[3\]

Two Sociology electives at the 2000 level or higher (one must be selected from the Health-related list below)  
\[6\]

Three Sociology electives at the 3000 level or higher (two must be selected from the Health-related list below)  
\[9\]

**Health-Related Cognate Courses**
- Two health-related 2000+ electives. See advisor for approved list.  
  \[6\]

**Advanced Methods Course**
- **SOC 4001**  
  Qualitative Research \[^3\]  
  \[4\]

  or **SOC 4002**  
  Data Analysis  
  \[4\]

**Health-related Courses**
- **SOC 2552**  
  Health and Disease in American Society
- **SOC 2530**  
  Selected Topics in Medical Sociology
- **SOC 2522**  
  The Sociology of Self
- **SOC 2553**  
  Sociology of Aging
- **SOC 2572**  
  Sex & Society
- **SOC 3511**  
  Sociology of the Environment
- **SOC 3521**  
  Global Health
- **SOC 3525**  
  Urban Health
- **SOC 3530**  
  Selected Topics in Medical Sociology
- **SOC 3546**  
  Sexuality and Gender
- **SOC 3559**  
  Health and Reproduction
- **SOC 3565**  
  Sociology of the Body
- **SOC 3575**  
  Population Studies
**SOC 3582  Independent Study in Medical Sociology**

**Total Credit Hours**  
42

1. Students must take SOC 3201 prior to or concurrently with SOC 3261.
2. Indicates writing capstone for major.
3. Students must complete SOC 3201 and SOC 3261 before taking either of the advanced methods courses, SOC 4001 or SOC 4002.

**Distinction in the Major**

Sociology majors graduate with distinction in the major if they have a GPA of 3.5 or higher in the major and a minimum cumulative GPA of 3.25.

**Suggested Academic Plan**

**Bachelor of Arts in Sociology: Health Track**

**Requirements for New Students starting in the 2015-2016 Academic Year**

SOC 3546 Sexuality and Gender
SOC 3559 Health and Reproduction
SOC 3565 Sociology of the Body
SOC 3575 Population Studies
SOC 3582 Independent Study in Medical Sociology

Total Credit Hours 18

1 Students must take SOC 3201 prior to, or concurrently with, SOC 3261.
2 Students must complete SOC 3201 and SOC 3261 before taking either of the advanced methods courses, SOC 4001 or SOC 4002.

Certificates are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

**Minor in Sociology**

The minor in sociology requires a minimum of six courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Description</th>
<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>SOC 1176</td>
<td>Introduction to Sociology</td>
<td>3</td>

The Department of Spanish and Portuguese provides instruction in the languages, cultures, and literatures of Spain, Spanish America, and the Luso-Brazilian world. It also teaches specialized courses in Business, Legal and Medical Spanish, including their translation. Coursework at the undergraduate level in Spanish, Portuguese, or Catalan develops proficiency of the four basic skills: speaking, listening, reading, and writing. Opportunities are also available for the in-depth study of Hispanic and Luso-Brazilian culture. Students may participate in special programs, including an intensive immersion program in Spanish and Latin American Studies; service learning and internships in areas of business, social service, and education in Philadelphia; and diverse programs abroad. Temple's computer language center, the special learning environment for the foreign languages, is available to students of all proficiency levels.

Spanish and Portuguese organizations and activities include, for instance, the recognition of outstanding students as they are inducted into Sigma Delta Pi, the National Hispanic Honor Society and the scholarly publications of the Society of Spanish and Spanish-American Studies. Further activities include the Spanish and Portuguese Clubs and Film Series.

Graduates of the Department of Spanish and Portuguese find careers in a wide range of areas, including education, business, government, and social service.

Students selecting the Spanish major must achieve competence in Spanish language skills in conjunction with qualifications outlined in one of three major options:

- Language, Literature, and/or Linguistics
- Language and Professional Studies
- Spanish for Education

Distinction in Major is awarded to Spanish majors in any of the three options who graduate with a 3.75 GPA in Spanish courses and a cumulative GPA of at least 3.25.
Opportunities

Latin American Studies Semester Certificate and Program

Each spring semester, the Spanish and Portuguese Department offers a 17-credit immersion program in Latin American Studies and Spanish. The LASS program (http://www.cla.temple.edu/spanpor/study-abroad/lass) combines 9 hours of intensive Spanish with 6 hours of study focusing on geography, history, and culture in Latin America, 2 hours of the LASS Seminar, and a three-week trip to Costa Rica. Successful completion of the program is awarded with a certificate of participation. Applications for LASS are received during October and November for the following spring. For more information, contact Dr. Hiram Aldarondo (haldaron@temple.edu), Program Director at 215-204-1706 or Dr. Patricia Moore-Martinez (pmoore04@temple.edu) at 215-204-1707.

Spring in Spain Program

The Temple Semester in Spain Program takes place over the spring semester in Oviedo, Spain. The 15-credit program combines coursework with faculty from the International Program at the University of Oviedo and with a Temple faculty member who directs the program. All courses are pre-approved for Temple University credit. Courses focus on aspects of Spanish language, culture, and literature. The program develops Spanish skills over a semester of intensive study in a Spanish-speaking environment; it also provides the opportunity to complete a number of Spanish courses that may be used to satisfy the requirements for the Temple major or minor in Spanish. The program begins with an initial orientation week in Madrid prior to the start of the semester. In Oviedo, lodging and meals are with Spanish families. For further information, contact the program director Dr. Jaime Duran (jduran@temple.edu) in the Department of Spanish and Portuguese or the Office of Education Abroad and Overseas Campuses (http://studyabroad.temple.edu).

Summer Abroad in Spain: Spanish Language and Culture

Temple University's summer program in Oviedo, Spain, provides students with the opportunity to learn the Spanish language while being immersed in that country's unique and diverse culture. The duration of the program is five weeks; students may enroll for a total of 6 credits. For further information, contact the program director Dr. Jaime Duran (jduran@temple.edu) in the Department of Spanish and Portuguese or the Office of Education Abroad and Overseas Campuses (http://studyabroad.temple.edu).

Summer Abroad in Brazil: Portuguese Language and Brazilian Culture

Temple University offers a six-week summer program in Salvador, Bahia, Brazil; students may enroll for a total of 6 credits. The program offers Portuguese language studied both at the elementary and more advanced levels. It also offers an intensive examination of culture in the state of Bahia; this aspect of the program focuses on history, politics, music, and dance, and it spotlights African origins and Afro-Brazilian influences on regional culture. For further information, contact the Office of Education Abroad and Overseas Campuses (http://studyabroad.temple.edu).

Junior Year and/or Summer School Abroad

Students declaring a concentration in the department may, under certain conditions, spend their junior year studying abroad. Application for permission to study abroad may be made during the second semester of the sophomore year. Only well-qualified students may be granted credit from Temple University after submitting proper credentials for established foreign study programs at institutions approved by the department. Students interested in a junior year abroad, or a summer school abroad, should discuss their plans early with their faculty advisor and the chair of the department.

Service Learning and Internships

Students of Spanish and Portuguese may participate in courses providing service learning opportunities through through organizations such as ‘Puentes Hacia El Futuro’ or SHINE (Students Helping in the Naturalization of Elders) as a part of their coursework. For students of Business Spanish, service learning opportunities are available through the Small Business Development Center at Temple. Spanish majors are encouraged to participate in a Spanish internship combining study and work opportunities in a variety of contexts in the Philadelphia area.

Programs

- Bachelor of Arts in Spanish: Language, Literature, & Linguistics Option (p. 920)
- Bachelor of Arts in Spanish: Language and Professional Studies Option (p. 922)
- Bachelor of Arts in Spanish: Spanish for Education Option (p. 924)
- Minor in Spanish (p. 927)
- Minor in Portuguese (p. 928)
- Certificate of Specialization in Spanish (p. 928)
- Certificate of Specialization in Spanish and Latin American Studies for Business (p. 928)
- Certificate of Specialization in Spanish and Latino Studies for the Health and Human Services Professions (p. 929)
- Latin American Studies Semester Certificate and Program (p. 930)
Bachelor of Arts in Spanish: Language, Literature, Linguistics Option

The Language, Literature and/or Linguistics option is designed for students who wish to develop advanced language skills in the study of Latin American Literature; Peninsular Literature; and/or Linguistics.

Summary of Degree Requirements

1. **University Requirements:**
   - MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
   - All Temple students must take a minimum of two writing-intensive courses as part of the major. The specific courses required for this major are SPAN 2096 and SPAN 3096.
   - Students must complete requirements of the General Education (GenEd) Program. See the General Education section (p. 143) of the Undergraduate Bulletin for more details.

2. **College of Liberal Arts Requirements:**
   - Completion of a minimum of 123 credits, including: 90 credits in CLA/CST courses, 45 credits of which must be at the upper level (numbered 2000-4999). For Humanities majors, 6 upper level credits must be earned in the Social Sciences: African American Studies, American Studies, Anthropology, Asian Studies, Criminal Justice, Economics, Environmental Studies, Geography and Urban Studies, History, Jewish Studies, Latin American Studies, Lesbian, Gay, Bisexual and Transgender Studies, Mathematical Economics, Neuroscience: Systems, Behavior and Plasticity, Political Science, Psychology, Sociology, Women's Studies, or any department in the College of Science and Technology.
   - A minimum GPA of 2.0, cumulatively, in all CLA/CST coursework, and in the major.
   - Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.

3. **Foreign Language/Global Studies Requirements:**
   - The requirements for the major in Spanish exceed the CLA minimum for this requirement.
   - **Notes on Foreign Language Study**
     - The third level of language is numbered 1003 in French, German, Italian, Spanish, and Portuguese and numbered 2001 in all other foreign language subjects.
     - Students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honor society Phi Beta Kappa. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)
     - See the College of Liberal Arts Policies (p. 753) section of this Bulletin for more information on the Foreign Language Placement, Regression in Coursework, and guidelines for students' other experiences with language.

4. **General Electives** are typically one-third of a student's program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

5. **Major Requirements (30 credits):**
   - Prerequisites: SPAN 1001, SPAN 1002, and SPAN 1003.
   - After completion of prerequisite courses, a total of ten courses are required for the major:

   **Writing Intensive Courses**
   - SPAN 2096 Composition (prerequisite for most 3000-level courses)
   - SPAN 3096 Advanced Analysis and Writing Skills

   **Electives**
   - A maximum of two electives may be selected at the 2000 level
   - A maximum of three electives may be selected at the 3000 level
   - A minimum of three electives must be selected at the 4000 level

   **Total Credit Hours**

   Total: 30

   1 Indicates writing capstone for the major.

Note: Up to two Catalan or Portuguese courses may be taken in place of two Spanish 2000/3000 level courses.

Bachelor of Arts in Spanish: Language & Professional Studies Option

The Language and Professional Studies option is designed for students who wish to develop language and professional skills as well as an awareness of Hispanic culture.

Summary of Degree Requirements

1. University Requirements:
   • MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
   • All Temple students must take a minimum of two writing-intensive courses as part of the major. The specific courses required for this major are SPAN 2096 and SPAN 3096.
   • Students must complete requirements of the General Education (GenEd) Program. See the General Education section (p. 143) of the Undergraduate Bulletin for more details.

2. College of Liberal Arts Requirements:
   • Completion of a minimum of 123 credits, including: 90 credits in CLA/CST courses, 45 credits of which must be at the upper level (numbered 2000-4999). For Humanities majors, 6 upper level credits must be earned in the Social Sciences: African American Studies, American Studies, Anthropology, Asian Studies, Criminal Justice, Economics, Environmental Studies, Geography and Urban Studies, History, Jewish Studies, Latin American Studies, Lesbian, Gay, Bisexual and Transgender Studies, Mathematical Economics, Neuroscience: Systems, Behavior and Plasticity, Political Science, Psychology, Sociology, Women’s Studies, or any department in the College of Science and Technology.
   • A minimum GPA of 2.0, cumulatively, in all CLA/CST coursework, and in the major.
   • Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.

3. Foreign Language/Global Studies Requirements:
   • The requirements for the major in Spanish exceed the CLA minimum for this requirement.
   • Notes on Foreign Language Study
     • The third level of language is numbered 1003 in French, German, Italian, Spanish, and Portuguese and numbered 2001 in all other foreign language subjects.
     • Students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honor society Phi Beta Kappa. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)
     • See the College of Liberal Arts Policies (p. 753) section of this Bulletin for more information on the Foreign Language Placement, Regression in Coursework, and guidelines for students’ other experiences with language.

4. General Electives are typically one-third of a student’s program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

5. Major Requirements (30 credits):
   • Prerequisites: SPAN 1001, SPAN 1002, and SPAN 1003.
   • After completion of prerequisite courses, a total of ten courses are required for the major:

<table>

## Bachelor of Arts in Spanish: Spanish for Education Option

The Spanish for Education option includes the Spanish-language courses required for certification in Spanish for Secondary Education in the College of Education at Temple and satisfies the requirements for the Spanish major in the College of Liberal Arts.

### Summary of Degree Requirements

#### 1. University Requirements:

- MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
- All Temple students must take a minimum of two writing-intensive courses as part of the major. The specific courses required for this major are SPAN 2096 and SPAN 3096.
- Students must complete requirements of the General Education (GenEd) Program. See the General Education section (p. 143) of the Undergraduate Bulletin for more details.

#### 2. College of Liberal Arts Requirements:

- Completion of a minimum of 123 credits, including: 90 credits in CLA/CST courses, 45 credits of which must be at the upper level (numbered 2000-4999). For Humanities majors, 6 upper level credits must be earned in the Social Sciences: African American Studies, American Studies, Anthropology, Asian Studies, Criminal Justice, Economics, Environmental Studies, Geography and Urban Studies, History, Jewish Studies, Latin American Studies, Lesbian, Gay, Bisexual and Transgender Studies, Mathematical Economics, Neuroscience: Systems, Behavior and Plasticity, Political Science, Psychology, Sociology, Women's Studies, or any department in the College of Science and Technology.
- A minimum GPA of 2.0, cumulatively, in all CLA/CST coursework, and in the major.
- Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.

#### 3. Foreign Language/Global Studies Requirements:
• The requirements for the major in Spanish exceed the CLA minimum for this requirement.

• Notes on Foreign Language Study
  • The third level of language is numbered 1003 in French, German, Italian, Spanish, and Portuguese and numbered 2001 in all other foreign language subjects.
  • Students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honor society Phi Beta Kappa. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)
  • See the College of Liberal Arts Policies (p. 753) section of this Bulletin for more information on the Foreign Language Placement, Regression in Coursework, and guidelines for students’ other experiences with language.

4. General Electives are typically one-third of a student’s program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

5. Major Requirements (30 credits):
  • Prerequisites: SPAN 1001, SPAN 1002, and SPAN 1003.
  • After completion of prerequisite courses, a total of ten courses are required for the major:

### Minor in Spanish

Six courses (18 credits) numbered 2000-4999 are required; the distribution of courses depends on the individual student's proficiency level. See the faculty advisor in Spanish for more information.

A maximum of three Spanish courses at the 2000 level  
A minimum of three Spanish courses at the 3000 level or higher

Minors are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.
Minor in Portuguese

The minor in Portuguese requires 6 courses (18-20) credits in Portuguese.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>

<tr>
<td>PORT 1002</td>
<td>Basic II</td>
<td>4</td>
</tr>
</tbody>
</table>

Select 4 Portuguese elective courses from 3000 and 4000 level offerings.  

Total Credit Hours 18-20

1 Students may substitute intermediate or advanced level courses for the beginning PORT 1001 and PORT 1002.
2 At least two Portuguese electives must be taken at the 4000 level.

Minors are awarded only at the time of completion of the bachelor’s degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor’s degree.

Certificate of Specialization in Spanish

The certificate requires completion of six courses, beginning with SPAN 1001 and advancing to more specialized study of Spanish designed to enhance career opportunities in business, communication, government, and social service. See your advisor or contact the Department of Spanish and Portuguese for more information.

<td>Composition</td>
<td>3</td>
</tr>
</tbody>
</table>

Select one 3000-level Spanish elective

Total Credit Hours 20

1 May be substituted with SPAN 2098.

Certificates are awarded only at the time of completion of the bachelor’s degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor’s degree.

Certificate of Specialization in Spanish and Latin American Studies for Business

This interdisciplinary certificate is designed to allow Temple students in business-related programs to develop skills and knowledge in two complementary areas so that they may compete more successfully in this growing job market. To earn this certificate, students need a minimum of 18 credits.

- LAS 2220  Special Topics - LASS Seminar
- LAS 2101  Latin America through Film and Fiction

Latin American Business Course
Select one of the following:
- LAS 2502  Fundamentals of Latin American Business
- IB 2502  Fundamentals of Latin American Business

Total Credit Hours 18

1  Students participating in SPAN 1076 must also complete SPAN 2002.
2  SPAN 1076 or SPAN 2098 count as two of the three required courses; each is 9 s.h. and taught in connection with the Latin American Studies Semester (LASS), an immersion program offered every spring. Students who choose this option must take at least one additional language course from this list.
3  These courses are part of the Latin American Studies Semester. The LASS Program is an integration of several courses totaling 17 s.h.: 9 credits are assigned to language instruction, 6 credits to culture and society, taught under LAS 2101 and SOC 2163, and 2 credits to the LASS Seminar. All instruction in LASS is in Spanish. The LASS Program runs every Spring term. For more information on the Latin American Studies Semester, visit www.cia.temple.edu/spanpor/study-abroad/lass/.

Certificates are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Certificate of Specialization in Spanish and Latino Studies for the Health and Human Services Professions

The combination of courses in this certificate program is designed to make participants especially qualified to provide health and human services to members of the Latino community. To earn this certificate, students need a minimum of 18 credits.

Requirements

Select three of the following: 9
- SPAN 1001  Basic I
- SPAN 1002  Basic II
- SPAN 1003  Intermediate
- SPAN 2001  Conversational Review
- SPAN 2096  Composition
- SPAN 2002  Hispanic Readings
- SPAN 1076  Intensive Practice in the Four Skills
- SPAN 2098  Advanced Intensive Practice in the Four Skills
- SPAN 2011  Heritage Spanish II

Select one of the following: 3
- SPAN 3601  Spanish for Health Professions
- SPAN 3602  Medical Spanish

Select one of the following: 3
- LAS 1001  Perspectives on Latin America
- LAS 2101  Latin America through Film and Fiction

Select one of the following: 3
- LAS 2072  Puerto Ricans in Philadelphia
- LAS 3020  Topics in Latino Studies
LAS 3101  
Latino Identity in the U.S.

Total Credit Hours  18

1 SPAN 1076 or SPAN 2098 count as two courses; each is 9 s.h. and taught in connection with the Latin American Studies Semester (LASS), an immersion program offered every spring. Students who choose this option need only take one additional course from this list.

Certificates are awarded only at the time of completion of the bachelor’s degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.

Latin American Studies Semester Certificate and Program

Each spring semester, the Spanish and Portuguese Department offers a 17-credit immersion program in Latin American Studies and Spanish. The program (LASS) combines 9 hours of intensive Spanish with 6 hours of study focusing on geography, history, and culture in Latin America, 2 hours of the LASS Seminar, and a three-week trip to Costa Rica. Successful completion of the program is awarded with a certificate of participation. Applications for LASS are received during October and November for the following spring. For information, contact Dr. Hiram Aldarondo (haldaron@temple.edu), Program Director (215-204-1706) or Dr. Patricia Moore-Martinez (patricia.moore-martinez@temple.edu) (215-204-1707).

Women's Studies offers a cohesive framework of inquiry for the examination of women, gender, and sexuality in the U.S. and around the world, as they relate to other social categories, such as race, class, disability, nationality, and ethnicity. As an interdisciplinary field, Women's Studies takes into account social, historical, and cultural variables in its study of women’s material and cultural experiences as a social group; the examination of the workings of gender as an analytical category, identity, and social force; and the social, political, and cultural functioning of sexuality. Women's Studies also seeks to transform traditional fields of study by incorporating new methodologies, data, theories, and frameworks developed by feminist scholars.

The Women's Studies Program offers an undergraduate major and minor that can be taken by students in the College of Liberal Arts or by students in other colleges. The certificate in Women's Studies is available only to students outside the College of Liberal Arts. In preparation for graduate school, Women's Studies majors have the opportunity to graduate with distinction in the major after completing an honors thesis.

The Women's Studies Program offers students the opportunity to study women, gender, and sexuality through an interdisciplinary curriculum taught by faculty from various departments across the university. Students learn to apply the methods and theories of social scientists, historians, philosophers, and literary critics to the study of women’s experiences, as well as gender and sexual identities. They explore a growing body of feminist theories that revise our understanding of gender, society, and culture. We encourage students not only to understand the importance of class, race, sexuality, physical ability, and gender to people's lives intellectually, but also to actively learn through their experiences in their fieldwork (internship) placement. After graduation, Women's Studies students enter professional schools in law, medicine and business; take graduate degrees in the humanities and social sciences; and pursue careers in health, counseling, teaching, and public advocacy.

- Certificate in Women's Studies (p. 933)
- Minor in Women's Studies (p. 933)

Bachelor of Arts in Women's Studies
Summary of Degree Requirements

University Requirements:

• MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
• All Temple students must take a minimum of two writing-intensive courses as part of the major. The specific courses required for this major are WMST 4396 and one Women’s Studies elective that is writing-intensive.
• Students must complete requirements of the General Education (GenEd) Program. See the General Education section (p. 143) of the Undergraduate Bulletin for more details.

College of Liberal Arts Requirements:

• Completion of a minimum of 123 credits, including:
  • 90 credits in CLA/CST courses;
  • 45 credits of which must be at the upper level (numbered 2000-4999).
    • For Social Science majors, 6 upper level credits (numbered 2000-4999) must be taken in Humanities Subject Areas: Arabic, Chinese, English, French, German, Greek (Ancient), Greek and Roman Classics, Hebrew, Hindi, Italian, Japanese, Latin, Philosophy, Religion, Russian, and Spanish in the College of Liberal Arts, Art History in the Tyler School of Art, or any department in the College of Science and Technology.
• A minimum GPA of 2.0, cumulatively, in CLA/CST coursework, and in the major.
• Only courses in which a student receives a grade of at least C- can satisfy GenEd, major, minor, or CLA Foreign Language and Global Studies requirements.
• Foreign Language/Global Studies Requirements:
  • All students must complete or test out of the first and second levels of a foreign language - these courses are numbered 1001 and 1002;
  • All students must complete at least one course from the GenEd Global/World Society category; and
  • All Bachelor of Arts students must complete one of the following options:
    • Third semester of a foreign language;
    • Demonstrated proficiency beyond the third semester in a foreign language (placement exam or certification from the language department);
    • Take one Global Studies course from the list on the CLA College Graduation Requirements (p. 755) page;
    • Study Abroad at an approved program; or
    • Take a second General Education Global/World Society course.
• Notes on Foreign Language Study
  • The third level of language is numbered 1003 in French, German, Italian, Spanish, and Portuguese and numbered 2001 in all other foreign language subjects.
  • Students are strongly encouraged to take the third level of a foreign language as it is the minimum required for election to the prestigious honor society Phi Beta Kappa. (Taking the course does not guarantee admission but not taking it guarantees exclusion.)
  • See the College of Liberal Arts Policies (p. 753) section of this Bulletin for more information on the Foreign Language Placement, Regression in Coursework, and guidelines for students’ other experiences with language.

General Electives are typically one-third of a student’s program of study and can be focused on a second major, a minor, or towards some other personal enrichment or professional goals. See an academic advisor for assistance in developing an academic plan for these courses.

Total Credit Hours 36
Majors will be permitted to take two of these eight courses outside Women's Studies (courses that are not cross listed) with the written permission of the advising coordinator. These courses must support the student’s academic or professional growth in conjunction with the major (e.g. a research methods course in another discipline for which the student will write on a subject related to gender or courses taken in a study abroad program).

At least one of the electives above (at any level) must be writing-intensive, ending in -96, -97 or -98.

The final requirement for the major is a two-course sequence. This sequence should be taken during the major’s last three semesters of enrollment. Students will select a field assignment (internship) with the assistance of the advising coordinator. This sequence is designed for students to learn how to write a research paper.

### Distinction in Major

Women's Studies students may graduate with a distinction in the major if they have a GPA of 3.5 or better in the major, a cumulative GPA of 3.0 or better, and successfully complete an honors thesis (minimum 3 credits) under the supervision of a faculty member from Women's Studies.

Certificate in Women’s Studies

This certificate is designed for students whose major is outside the College of Liberal Arts who want to pursue a Women’s Studies-oriented career.

Requirements

WMST 1076 Introduction to Women's Studies 3
or WMST 1096 Introduction to Women's Studies 3
WMST 4389 Field Work in Women's Studies 3
Two electives in Women's Studies 1 6

Total Credit Hours 12

1 At least one of these two courses must be at the upper level.

Certificates are awarded only at the time of completion of the bachelor’s degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor’s degree.

Minor in Women’s Studies

Requirements

WMST 1301 Foundations in Women's Studies 3
Six electives in Women's Studies 1 18

Total Credit Hours 21

1
At least three of the six electives must be taken at the upper level (WMST 2000-4999).

Minors are awarded only at the time of completion of the bachelor's degree and cannot be awarded either as a stand-alone program of study or after completion of the first bachelor's degree.
School of Media & Communication

Founded 1967

David Boardman, Dean
2020 N. 13th Street, Philadelphia, PA 19122
215-204-8421
http://smc.temple.edu/

Goals and Objectives

The School of Media and Communication generates knowledge and educates students to be ethical, analytical and creative leaders, producers and citizens in a multimedia and multicultural society. This mission is pursued through the training of students for leadership careers in media and communications, through advancing research and creative activity in these fields, and through serving the public need for free and open communication. The school is concerned not only with high standards of professional work but also with encouraging the next generation of teachers and media managers to develop an intellectual background and a sense of social responsibility. Toward this end, SMC students are encouraged to take coursework in disciplines outside the school. For some, history and political science are related areas of interest; others choose literature and the arts; still others choose business, economics, or the social sciences. In this way, the school participates in providing not only professional training but also a broad humanistic education for its students.

The faculty of the school comes from diverse backgrounds. Some have extensive professional experience as journalists, television producers, speech writers, advertising executives, and public relations practitioners. Others have come to Media and Communication through academic study, doing graduate work and continuing the practice of research and scholarship while teaching at Temple.

Renowned for their professional experience, research, and teaching, our faculty prepare our graduates for a wide range of careers in communication industries, as well as lead graduate students towards Ph.D., M.A., M.S., and M.J. degrees.

History

The study of communication began formally at Temple University with the founding of the Department of Journalism in 1927. It was the first such department in the Commonwealth.

Theater was an extracurricular activity at Temple until 1931, when formal courses were developed.

Radio-Television became an instructional division in 1947, and extensive film offerings were added in 1967. That year, Journalism and Radio-Television-Film joined Theater to form the School of Communications and Theater. In 1987 the highly-respected Department of Speech moved to the school from the College of Arts and Sciences. A year later, Speech became two departments: Rhetoric and Communication, and Speech-Language-Hearing.

The school was restructured in 1995. Radio-Television-Film became the Department of Film and Media Arts and the Department of Broadcasting, Telecommunications, and Mass Media; Journalism became Journalism, Public Relations, and Advertising; Rhetoric and Communication became Speech Communication. In 1998, the Department of Communication Sciences (Speech-Language-Hearing) moved to the College of Health Professions.

Effective Fall 2004, a change occurred with the Departments of Journalism, Public Relations and Advertising, and Speech Communication. Advertising became a separate department. The Department of Speech Communication changed its name to Strategic and Organizational Communication and includes Public Relations as one of three concentrations: Public Communication (formerly Speech Communication), Public Relations, and Organizational Leadership. In 2010, the Department of Strategic and Organizational Communication changed its name to the Department of Strategic Communication.

In Fall 2011, Communication Studies (p. 956) replaced the former Communications major.

On July 1, 2012, the School of Communications and Theater was renamed the School of Media and Communication. It houses the departments of Advertising; Journalism; Media Studies and Production (formerly Broadcasting, Telecommunications, and Mass Media); and Strategic Communication. The Communication Studies program remains a part of the School of Media and Communication. The Departments of Theater and Film and Media Arts comprised the Division of Theater, Film and Media Arts and joined Boyer School of Music and Dance and the Tyler School of Art to form the Center for the Arts.

Also in 2012, the Department of Broadcasting, Telecommunications, and Mass Media changed its name to Media Studies and Production while the Department of Strategic Communication renamed the Public Communication concentration to Rhetoric and Public Advocacy.

Special Facilities

The School of Media and Communication is housed in buildings designed for teaching, research, and production.
The primary location of the School is Annenberg Hall, which houses the Departments of Advertising; Journalism; and Media Studies and Production. Television and film production areas (studios and editing, graphics, and film labs) occupy the first floor. The building also includes extensive video and film editing areas, a 75-seat multimedia screening room, photographic labs, two news writing labs and smart classrooms.

The Department of Strategic Communication is housed in Weiss Hall.

The Joe First Media Center, SMC’s newest addition, is located on the first floor, linking Annenberg and Tomlinson Halls. The center is a communications and media hub for the school and includes a cyber-café, a multimedia information center, and a venue for displaying student work.

**Special Programs**

**TUTV - Temple University Television**

In Fall 2010, the university launched TUTV, a new regional cable television channel with associated new media platforms, which will showcase the innovative work done by Temple students, faculty, and alumni.

TUTV offices and master control are located on the first floor of Annenberg Hall and is a part of the Kal & Lucille Rudman Media Production Center. The Rudman Center also features a broadcast studio and a computer-equipped classroom. The station features news, sports, music, comedy, and documentary programs. TUTV presents content from many of the university’s other professional schools, plus programs produced in association with community cultural groups and professional broadcasters. Student volunteers are also accepted. For more information, contact the TUTV General Manager at paul.gluck@temple.edu.

**Temple Update**

Temple Update is a production course in which students can gain experience producing, reporting, and editing for a half-hour weekly news magazine format. The program airs on a cable outlet. The course gives students the opportunity to produce material for a résumé tape and provides students with valuable experience in field work, news writing, video editing, and the pressure of a live program.

**Internship Program**

Although the requirements may vary, internships are available to junior and senior students of every department in the school. Internships are for academic credit and must involve professional activity related to the student’s course of study. The internships must be approved by the administrator or faculty member charged with supervising internships.

**Study Away**

The School of Media and Communication offers several programs for students who are interested in studying away and strongly encourages students to participate in these programs.

The school offers semester programs in London and Dublin for undergraduate and graduate students. Students can spend either the fall or spring semester abroad, and have the option to study consecutive fall and spring semesters in these locations. The London semester coursework includes an SMC faculty-led course, required for all students, electives in advertising, journalism, media studies and production, strategic communication, film, theater, and more. An optional, guaranteed part-time internship placement in a student’s field of study is a popular component of the program. The Dublin semester program requires an Irish Life and Cultures course and offers both numerous electives and an optional but guaranteed part-time internship placement.

The Arcosanti program is a new offering for spring 2016. This program includes a media and ecology course for the duration of the spring semester with spring break travel to Arcosanti, Arizona, a hub of architecture and ecology.

Summer Study Away programs are also an important feature of the school’s special programs. Realizing the inestimable value of direct contact with professionals and other experts, the School of Media and Communication offers an annual 6-7 credit summer seminar in London on British Mass Media led by an SMC faculty member.

Temple Dublin is a five to six week-long program which allows students to experience the old and the new Dublin while taking 6-7 credits of SMC coursework.

Temple Peru is a new program for summer 2015 at Universidad San Ignacio de Loyola in Cusco. Students on this program earn 6-7 SMC credits and take courses in English with Peruvian and international students.

Temple South Africa offers students an opportunity to produce journalistic and documentary narrative, a body of photographic work, or to conduct media research for 6 credits in journalism. The program has a journalistic focus with the prime purpose of producing “news content.” This production will be multi-media inclusive of audio, photographs, text and video and will focus on use of mobile media. The program can accommodate students who do not have a journalism/production background, such as students interested in conducting term-paper-style research. However, that research must have a journalism-media focused topic.
The Communities and Organizations of New York program investigates the communicative components of New York City by focusing on its neighborhoods, organizations, and institutions. Coursework for this program is held on Saturdays, but students may also undertake an internship or academic experience component during the week as part of this study-away experience.

The Global Internship Program offers students the opportunity to participate in 8-week guaranteed, full-time internship opportunities in one of four international locations: Barcelona, Hong Kong, Paris, or London, or one of seven domestic locations: Boston, Chicago, Los Angeles, Miami, New York City, San Francisco or Washington, DC. All students, regardless of their internship location, spend time together on Temple's Main Campus studying Intercultural Communications in the Workplace as a group before they depart for their chosen destination. Students work one-on-one with an industry expert so as to secure an internship in their desired field. Each of the programs is a unique combination that includes travel, learning, and exciting events, with a resume building internship. Knowledge of a foreign language is not required to study in any of these locations. However, some previous experience with Spanish (for the Barcelona internship option), French (for the Paris internship option), or some proficiency in Mandarin and/or Cantonese (for the Hong Kong internship option) can lead to even more internship opportunities while abroad.

All semester and summer programs are open to qualified students from other universities and colleges and to others who choose to continue their education in a less formal manner than in a prescribed program of study.

SMC is also in the process of developing new Study Away programs. Check with the Study Away advisor for information on these developments. Current information on the SMC programs listed here is available from SMC Study Away at 215-204-2677 or 215-204-6535.

See Education Abroad (p. 49) for more information about University Study Abroad options.

**Student Contact**

For information about the School of Media and Communication, please contact the SMC Student Affairs at 215-204-5273.

**Academic Policies & Regulations**

Please see the Undergraduate Academic Policies (p. 81) section of this Bulletin. Students are responsible for complying with all university-wide academic policies as well as those of the School of Media and Communication that appear below.

**Academic Standing**

A matriculated undergraduate student in the university is in Academic Good Standing if enrolled in a baccalaureate degree-seeking program.

Please see the University’s policy on Academic Standing (p. 83) for detailed information about Academic Warning, Academic Probation, and Academic Dismissal.

**Credits Not Applied Toward the Degree**

Credits earned in the following courses are not applied toward a degree in the School of Media and Communication: lower-level courses in Military Science, Topical Studies, RCC, ELECT, and Mathematics 0015.

**Dean's List**

Each fall and spring semester, those undergraduates who have met the credit hour and academic criteria for their school or college are placed on the Dean's List. See the Dean's List (p. 92) policy for specific GPA and credit-hour requirements.

**Re-enrollment**

Students returning to the School of Media and Communication after an absence of one semester (unless an approved Leave of Absence form was filed prior to the leave) must use the Undergraduate Bulletin in effect at the time of readmission or any subsequent Undergraduate Bulletin. Credits more than 10 years old may not be applied toward a degree in the school. For application deadlines and the re-enrollment form, please visit: www.temple.edu/vpus/documents/request_to_reenroll.pdf.

**Transfer Students**

Refer to the Transfer Students Admissions (p. 23) section of this Bulletin for general information on transferring courses to Temple. In addition to these criteria, each department in the School of Media and Communication will evaluate any credit to be transferred into a major. This evaluation generally is done at the first meeting with a faculty advisor during the first semester. The maximum number of credit hours allowed to transfer in the major are: 12 hours in Advertising; 20 hours in Media Studies and Production; 24 hours in Communication Studies; 12 hours in Journalism; and 12 hours in Strategic Communication.

**School Requirements for Graduation**

The School of Media and Communication requires 124 credits to graduate; completion of the university General Education (GenEd (p. 143)) (p. 143) requirements; completion of departmental requirements, including two writing-intensive courses in the major; a minimum of 2.00 GPA, both cumulative and in the major; and completion of a maximum of 78 credits within the school and a minimum of 46 credits outside of the school.
Minimum and maximum credit requirements within each major are listed with the departmental requirements.

Students who are planning to graduate must schedule an official graduation review with an academic advisor and complete the application for graduation at least one semester prior to the anticipated graduation date. Appointments may be made in SMC Student Affairs/Advising, Annenberg Hall Room 9.

Program Descriptions

1. The total number of credit hours at graduation may be greater for some students based on initial placement exams, transfer evaluations, individual curricular choices, and academic progress.

2. Students must fulfill the necessary prerequisites for any given course or course sequence. See the Prerequisites and Co-requisites Policy (p. 99) in the university-wide Academic Policies section of this Bulletin.

Advising

SMC Student Affairs/Advising
9 Annenberg Hall
2020 N. 13th Street
Philadelphia, PA 19122
215-204-5273
http://smc.temple.edu/undergraduate/advising/
advice@temple.edu

Students in the School of Media and Communication are advised by professional academic advisors and faculty advisors. New students (up to 30 credits), transfer students in their first semester, interdepartmental majors, undeclared students, and students on academic probation make advising appointments in SMC Student Affairs/Advising, located on the ground floor of Annenberg Hall. All other students are advised by faculty in their respective departments. Consult your departmental office for assignment to the appropriate faculty advisor.

Academic advisors attempt to avoid errors when advising students about their program requirements, but schools and colleges cannot assume liability for errors in advising. Therefore, students must assume primary responsibility for knowing the requirements for their degree and for acquiring current information about their academic status.

Most students will be eligible to register for classes online via Self Service Banner through the TU Portal (https://tuportal4.temple.edu/cp/home/displaylogin). However, all students should meet with an advisor prior to the eligible registration period.

Students preparing to graduate must file the necessary paperwork at least one semester prior to the graduation date. At that time, an appointment should be made in SMC Student Affairs/Advising to complete a graduation review and application for graduation.

Faculty

Osei Appiah, Professor, Department of Advertising, School of Media and Communication; Ph.D., Stanford University.

Geoffrey Baym, Professor, Department of Media Studies and Production, School of Media and Communication; Ph.D., University of Utah.

David Boardman, Professor, Department of Journalism, School of Media and Communication; M.A., University of Washington.

Deborah Cai, Professor, Department of Strategic Communication, School of Media and Communication; Ph.D., Michigan State University.

Guillermo G. Caliendo, Assistant Professor (Teaching/Instructional), Department of Strategic Communication, School of Media and Communication; Ph.D., University of Pittsburgh.

John Edward Campbell, Assistant Professor, Department of Media Studies and Production, School of Media and Communication; Ph.D., University of Pennsylvania.

Amy L. Caples, Assistant Professor (Teaching/Instructional), Department of Media Studies and Production, School of Media and Communication; B.A., Temple University.

Jessica Castonguay, Assistant Professor (Teaching/Instructional), Department of Advertising, School of Media and Communication; Ph.D., University of Arizona.

William B. Cook, Assistant Professor (Teaching/Instructional), Department of Advertising, School of Media and Communication; M.A., Pennsylvania State University.

Brian Creech, Assistant Professor, Department of Journalism, School of Media and Communication; Ph.D., University of Georgia.
Sherri Hope Culver, Associate Professor (Teaching/Instructional), Department of Media Studies and Production, School of Media and Communication; M.L.A., University of Pennsylvania.

Fabienne L. Darling-Wolf, Associate Professor, Department of Journalism, School of Media and Communication; Ph.D., University of Iowa.

Jason del Gandio, Assistant Professor (Teaching/Instructional), Department of Strategic Communication, School of Media and Communication; Ph.D., Southern Illinois University, Carbondale.

Abbe S. Depretis, Assistant Professor (Teaching/Instructional), Department of Strategic Communication, School of Media and Communication; Ph.D., University of Maryland, College Park.

Brooke E. Duffy, Assistant Professor, Department of Advertising, School of Media and Communication; Ph.D., University of Pennsylvania.

Alison Ebbecke, Assistant Professor (Teaching/Instructional), Department of Strategic Communication, School of Media and Communication; B.A., Temple University.

Thomas E. Eveslage, Professor, Department of Journalism, School of Media and Communication.

Gregg C. Feistman, Associate Professor (Teaching/Instructional), Department of Strategic Communication, School of Media and Communication; M.A., Marist College.

Jan L. Fernback, Associate Professor, Department of Media Studies and Production, School of Media and Communication; Ph.D., University of Colorado.

Matthew R. Fine, Assistant Professor (Practice), Department of Media Studies and Production, School of Media and Communication; M.S., Columbia University.

Edward L. Fink, Professor, Department of Strategic Communication, School of Media and Communication; Ph.D., University of Wisconsin-Madison.

Jennifer Lovrinic Freeman, Assistant Professor (Teaching/Instructional), Department of Advertising, School of Media and Communication; B.S., Northwestern University.

Joseph Glennon, Assistant Professor (Teaching/Instructional), Department of Advertising, School of Media and Communication; B.A., University of Massachusetts.

Paul Gluck, Associate Professor (Practice), Department of Media Studies and Production, School of Media and Communication; B.A., Temple University.

Scott Gratson, Associate Professor (Teaching/Instructional), Department of Communication Studies, School of Media and Communication; Ph.D., University of Denver.

Bruce W. Hardy, Assistant Professor, Department of Strategic Communication, School of Media and Communication; Ph.D., University of Pennsylvania.

Christopher Harper, Professor, Department of Journalism, School of Media and Communication; M.J., Northwestern University.

Stacey J. Harpster, Assistant Professor (Teaching/Instructional), Department of Advertising, School of Media and Communication; M.B.A., Temple University.

R. Lance Holbert, Professor, Department of Strategic Communication, School of Media and Communication; Ph.D., University of Wisconsin-Madison.

Thomas L. Jacobson, Professor, Department of Media Studies and Production, School of Media and Communication; Ph.D., University of Washington.

Peter Jaroff, Assistant Professor (Practice), Department of Media Studies and Production, School of Media and Communication; B.A., Grinnell College.

Tricia S. Jones, Professor, Department of Strategic Communication, School of Media and Communication; Ph.D., Ohio State University.

Sheryi D. Kantrowitz, Assistant Professor (Teaching/Instructional), Department of Advertising, School of Media and Communication; BFA, Syracuse University.

Carolyn L. Kitch, Professor, Department of Journalism, School of Media and Communication; Ph.D., Temple University.

John S. Klotz, Associate Professor (Practice), Department of Media Studies and Production, School of Media and Communication; M.S., Rosemont College.

Lauren Kogen, Assistant Professor, Department of Media Studies and Production, School of Media and Communication; Ph.D., University of Pennsylvania.

Magdalena Konieczna, Assistant Professor, Department of Journalism, School of Media and Communication; Ph.D., University of Wisconsin-Madison.
Heather LaMarre, Assistant Professor, Department of Strategic Communication, School of Media and Communication; Ph.D., Ohio State University.

John A. Lent, Professor Emeritus, Department of Media Studies and Production, School of Media and Communication; Ph.D., University of Iowa.

Tony C. Liao, Assistant Professor, Department of Media Studies and Production, School of Media and Communication; Ph.D., Cornell University.

Matthew Lombard, Associate Professor, Department of Media Studies and Production, School of Media and Communication; Ph.D., Stanford University.

Michael L. Maynard, Associate Professor, Department of Advertising, School of Media and Communication; Ph.D., Rutgers University.

George W. Miller III, Associate Professor (Practice), Department of Journalism, School of Media and Communication; M.J., Columbia University.

Logan K. Molyneux, Assistant Professor, Department of Journalism, School of Media and Communication; Ph.D., University of Texas-Austin.

Bryan Monroe, Professor, Department of Media Studies and Production, School of Media and Communication.

William J. Mooney, Assistant Professor (Practice), Department of Media Studies and Production, School of Media and Communication; B.A., Goddard College.

Nancy E. Morris, Professor, Department of Media Studies and Production, School of Media and Communication; Ph.D., University of Pennsylvania.

Katherine A. Mueller, Assistant Professor (Teaching/Instructional), Department of Advertising, School of Media and Communication; B.F.A., Moore College of Art and Design.

Patrick D. Murphy, Associate Professor, Department of Media Studies and Production, School of Media and Communication; Ph.D., Ohio University.

Howard A. Myrick, Professor, Department of Media Studies and Production, School of Media and Communication; Ph.D., University of Southern California.

Maida Odom, Assistant Professor (Teaching/Instructional), Department of Journalism, School of Media and Communication; M.L.A., University of Pennsylvania.

Wazhmah Osman, Assistant Professor, Department of Media Studies and Production, School of Media and Communication; Ph.D., New York University.

Donnaly Pompper, Associate Professor, Department of Strategic Communication, School of Media and Communication; Ph.D., Temple University.

Hector Postigo, Associate Professor, Department of Media Studies and Production, School of Media and Communication; Ph.D., Rensselaer Polytechnic Institute.

Cornelius B. Pratt, Professor, Department of Strategic Communication, School of Media and Communication; Ph.D., University of Minnesota.

Dana K. Saewitz, Associate Professor (Teaching/Instructional), Department of Advertising, School of Media and Communication; M.L.A., University of Pennsylvania.

Adrienne Shaw, Assistant Professor, Department of Media Studies and Production, School of Media and Communication; Ph.D., University of Pennsylvania.

Larry Stains, Associate Professor (Teaching/Instructional), Department of Journalism, School of Media and Communication; M.J., Columbia University.

Lori L. Tharps, Assistant Professor, Department of Journalism, School of Media and Communication; M.S., Columbia University.

Edward J. Trayes, Professor, Department of Journalism, School of Media and Communication; Ph.D., University of Iowa.

Karen M. Turner, Associate Professor, Department of Journalism, School of Media and Communication; J.D., Northwestern University School of Law.

Elizabeth Leebron Tutelman, Professor, Department of Media Studies and Production, School of Media and Communication; Ph.D., Northwestern University.

Barry Vacker, Associate Professor (Teaching/Instructional), Department of Media Studies and Production, School of Media and Communication; Ph.D., University of Texas at Austin.

Francesca A. Viola, Assistant Professor (Teaching/Instructional), Department of Journalism, School of Media and Communication; J.D., Widener University.

Linn Washington, Associate Professor, Department of Journalism, School of Media and Communication; M.A., Yale Law School.

Kristine Trever Weatherston, Assistant Professor (Teaching/Instructional), Department of Media Studies and Production, School of Media and Communication; Ph.D., Virginia Commonwealth University.
Tracey Weiss, Assistant Professor (Teaching/Instructional), Department of Strategic Communication, School of Media and Communication; Ph.D., Temple University.

Thomas Wright, Assistant Professor (Teaching/Instructional), Department of Strategic Communication, School of Media and Communication; Ph.D., Purdue University.

Soo Min Yu, Assistant Professor, Department of Journalism, School of Media and Communication; Ph.D., Simon Fraser University.

Laura Zaylea, Assistant Professor (Teaching/Instructional), Department of Media Studies and Production, School of Media and Communication; M.F.A., San Francisco Art Institute.

Advertising

Osei Appiah, Ph.D.
Department Chair
215-204-4268

Department Office:
Annenberg Hall, Room 300
215-204-4268
http://smc.temple.edu/advertising/

Advertising is a competitive, creative, challenging and exciting industry, serving major businesses at the intersection of media and society. Advertising students will develop skills in strategic planning, research, copywriting, art direction, media buying and planning, sales, management, team work, leadership, and oral and written presentations. Students will be well prepared for careers in digital and traditional advertising as well as media and marketing organizations in all kinds of industries. Our program prepares students to work at the nexus of economic communications and social communications. They will be positioned to succeed in professional careers and to respond wisely as citizens, consumers, and community leaders.

Based on the evidence from over 5,000 survey questionnaires, full-time advertising students at Temple University fall into clearly-defined groups:

- Students energetically interested in advertising as a career;
- Students who have creative talent and wish to express it;
- Students who are broadly interested in media and the power and mystery of advertising;
- Students interested in marketing, sales, or business, but who do not wish to major in business or finance;
- Students who think advertising will be a fun way to get a job-oriented college degree.

Students in the Department of Advertising will learn:

- How to identify appropriate research designs for understanding consumer wants, needs, and communication behavior, and be able to interpret the results for developing brand and advertising strategies;
- How to conceive, write, design and produce advertising in all media formats which can be measured against marketing objectives and strategies;
- How to establish strategies and to negotiate executions for the investment of advertising dollars in all media vehicles and how to evaluate the results;
- How to manage client relations and the process of producing advertising from strategy through production at a profit.
- How to be prepared to respond to a rapidly-changing, fragmented digital media environment.

Programs

- Bachelor of Arts in Advertising: Account Management Concentration (p. 941)
- Bachelor of Arts in Advertising: Art Direction Concentration (p. 944)
- Bachelor of Arts in Advertising: Copywriting Concentration (p. 947)
- Bachelor of Arts in Advertising: Media Planning Concentration (p. 950)
- Bachelor of Arts in Advertising: Research & Strategy Concentration (p. 953)

Bachelor of Arts in Advertising: Account Management Concentration

This concentration offers preparation for careers in management, which will open doors for students in a broad array of industries in today's complex, fragmented media landscape. In the three advanced Account Management courses (ADV 3031, ADV 3033, and ADV 4034) students will learn about Digital Analytics and Reporting, Advertising Sales, and Account Management. Students are also required to take Introduction to Marketing (ADV 2111) in preparation for the advanced classes.
Requirements for the Degree

Summary of Requirements

1. University requirements:
   a. New students are required to complete the General Education (GenEd (p. 143)) curriculum.
   b. All students must take a minimum of two writing-intensive courses. The specific writing-intensive courses required for this major are ADV 1196 and ADV 4196.

2. Maximum of 78 credits in the School of Media and Communication.

3. Minimum of 48 credits in Advertising courses, maximum of 60 credits in Advertising courses.

4. A grade of C or higher must be attained in all required Advertising courses.

5. An overall GPA of 2.0 must be attained in the major.

6. 1000-level Advertising courses are prerequisites to 2000-level Advertising courses; 2000-level Advertising courses are prerequisites to 3000-level Advertising courses; 3000-level Advertising courses are prerequisites to 4000-level Advertising courses.

7. No more than 12 semester hours of transfer credits may be applied to Advertising major requirements.

8. No more than 8 credits may be taken in Kinesiology and Dance activities courses.

1 Students may substitute ADV 4101 for this requirement.
2 Advertising students must complete the 2000-level core course required for their concentration as noted above, and two additional 2000-level core courses.
3 Requires special permission from instructor.

Internships or Diamond Edge Communications

All advertising majors are required to do either a professional internship or be involved with Diamond Edge Communications (DEC), our student-run ad agency. Both offer students valuable hands-on experience in actual advertising-related professional experiences. DEC works with local Philadelphia clients, under the supervision of an advertising professor, to develop strategic plans, research, digital and traditional creative materials, media plans and presentations. The internship program is carefully managed by our Internship Directors to help students find the best possible internship opportunities. The Internship Directors, faculty members and SMC’s Director of Career Services will help students with preparation of résumés, cover letters, and LinkedIn pages. We will also guide students through the process of seeking and identifying quality internship opportunities.

1. See the list of elective options under Requirements. The courses students can take to fulfill their Advertising electives will vary from semester to semester.
2. ADV 3171, ADV 3185, and ADV 4103 require special permission from instructor.

Bachelor of Arts in Advertising: Art Direction Concentration

Conceptual thinking is a requirement for all creative people in advertising. In addition, students in Art Direction will develop hands-on skills in creating both digital and traditional advertising. Students in Art Direction must develop proficiency in the Adobe Creative Suite. Concentration courses are ADV 3052, ADV 3053 and ADV 4064. The Portfolio class provides students the opportunity to work in teams with copywriters and to develop a professional-quality portfolio. Note: Students entering after Spring 2016 must apply for acceptance in the Art Direction concentration after they have completed ADV 1001 and ADV 2151. Transfer students should apply immediately upon acceptance to Temple University. For more information about the Portfolio Application process, please click here: http://smc.temple.edu/advertising/curriculum/art-direction-track/.

Requirements for the Degree

Summary of Requirements

1. University requirements:
   a. New students are required to complete the General Education (GenEd (p. 143)) curriculum.
b. All students must take a minimum of two writing-intensive courses. The specific writing-intensive courses required for this major are ADV 1196 and ADV 4196.

2. Maximum of 78 credits in the School of Media and Communication.
3. Minimum of 48 credits in Advertising courses, maximum of 60 credits in Advertising courses.
4. A grade of C or higher must be attained in all required Advertising courses.
5. An overall GPA of 2.0 must be attained in the major.
6. 1000-level Advertising courses are prerequisites to 2000-level Advertising courses; 2000-level Advertising courses are prerequisites to 3000-level Advertising courses; 3000-level Advertising courses are prerequisites to 4000-level Advertising courses.
7. No more than 12 semester hours of transfer credits may be applied to Advertising major requirements.
8. No more than 8 credits may be taken in Kinesiology and Dance activities courses.

3 Requires special permission from instructor.
4 Sequence may not be taken concurrently.

Internships or Diamond Edge Communications

All advertising majors are required to do either a professional internship or be involved with Diamond Edge Communications (DEC), our student-run ad agency. Both offer students valuable hands-on experience in actual advertising-related professional experiences. DEC works with local Philadelphia clients, under the supervision of an advertising professor, to develop strategic plans, research, digital and traditional creative materials, media plans and presentations. The internship program is carefully managed by our Internship Directors to help students find the best possible internship opportunities. The Internship Directors, faculty members and SMC's Director of Career Services will help students with preparation of résumés, cover letters, and LinkedIn pages. We will also guide students through the process of seeking and identifying quality internship opportunities.

¹ See the list of elective options under Requirements. The courses students can take to fulfill their Advertising electives will vary from semester to semester.

² The Art Direction Portfolio application process begins with incoming students of Spring 2016. ADV 3052 requires application and acceptance into Art Direction concentration.

³ ADV 3171, ADV 3185 and ADV 4103 require special permission from instructor.

**NOTE:** Students in the Art Direction concentration must complete a portfolio review application and be accepted into the track. To begin the Art Direction courses in Year 3 Fall, students must submit the application by January 15. See advertising department website or office for details.

## Bachelor of Arts in Advertising: Copywriting Concentration

In an advertising agency, copywriters and art directors work in partnership to develop outstanding, innovative creative work. Copywriting students will take three advanced courses in copywriting. These advanced courses will help students develop their conceptual skills and writing talents in preparation for the competitive world of copywriting. The Portfolio class provides students the opportunity to work in teams with Art Directors and to work on the production of a professional-quality portfolio. Students following the Copywriting concentration take ADV 3022, ADV 3023, and ADV 4064.

## Requirements for the Degree

### Summary of Requirements

1. University requirements:
   a. New students are required to complete the General Education (GenEd) curriculum.
   b. All students must take a minimum of two writing-intensive courses. The specific writing-intensive courses required for this major are ADV 1196 and ADV 4196.

2. Maximum of 78 credits in the School of Media and Communication.

3. Minimum of 48 credits in Advertising courses, maximum of 60 credits in Advertising courses.

4. A grade of C or higher must be attained in all required Advertising courses.

5. An overall GPA of 2.0 must be attained in the major.
6. 1000-level Advertising courses are prerequisites to 2000-level Advertising courses; 2000-level Advertising courses are prerequisites to 3000-level Advertising courses; 3000-level Advertising courses are prerequisites to 4000-level Advertising courses.
7. No more than 12 semester hours of transfer credits may be applied to Advertising major requirements.
8. No more than 8 credits may be taken in Kinesiology and Dance activities courses.

1. Students may substitute ADV 4101 for this requirement.
2. Advertising students must complete the 2000-level core course required for their concentration as noted above, and two additional 2000-level core courses.
3. Requires special permission from instructor.
Internships or Diamond Edge Communications

All advertising majors are required to do either a professional internship or be involved with Diamond Edge Communications (DEC), our student-run ad agency. Both offer students valuable hands-on experience in actual advertising-related professional experiences. DEC works with local Philadelphia clients, under the supervision of an advertising professor, to develop strategic plans, research, digital and traditional creative materials, media plans and presentations. The internship program is carefully managed by our Internship Directors to help students find the best possible internship opportunities. The Internship Directors, faculty members and SMC's Director of Career Services will help students with preparation of résumés, cover letters, and LinkedIn pages. We will also guide students through the process of seeking and identifying quality internship opportunities.

### Bachelor of Arts in Advertising: Research & Strategy Concentration

Students following this concentration will receive training that helps them develop skills in strategic thinking and planning, understanding consumer behavior, conducting surveys, focus groups and other forms of research, analyzing data, testing copy and studying America's changing demographics. Strong research and strategic thinking skills will prepare students for a wide variety of careers in corporations, research firms, marketing companies and advertising agencies. Students in Research and Strategy take ADV 3031, ADV 3043 and ADV 4044. ADV 3042 is a recommended elective.

### Requirements for the Degree

**Summary of Requirements**

1. University requirements:
   - a. New students are required to complete the General Education (GenEd (p. 143)) curriculum.
   - b. All students must take a minimum of two writing-intensive courses. The specific writing-intensive courses required for this major are ADV 1196 and ADV 4196.

2. Maximum of 78 credits in the School of Media and Communication.

3. Minimum of 48 credits in Advertising courses, maximum of 60 credits in Advertising courses.

4. A grade of C or higher must be attained in all required Advertising courses.

5. An overall GPA of 2.0 must be attained in the major.

6. 1000-level Advertising courses are prerequisites to 2000-level Advertising courses; 2000-level Advertising courses are prerequisites to 3000-level Advertising courses; 3000-level Advertising courses are prerequisites to 4000-level Advertising courses.

7. No more than 12 semester hours of transfer credits may be applied to Advertising major requirements.

8. No more than 8 credits may be taken in Kinesiology and Dance activities courses.

### Total Credit Hours

48

---

¹ Students may substitute ADV 4101 for this requirement.

² Advertising students must complete the 2000-level course required for their concentration as noted above, and two additional 2000-level core courses.

³ Requires special permission from instructor.

### Internships or Diamond Edge Communications

All advertising majors are required to do either a professional internship or be involved with Diamond Edge Communications (DEC), our student-run ad agency. Both offer students valuable hands-on experience in actual advertising-related professional experiences. DEC works with local Philadelphia clients, under the supervision of an advertising professor, to develop strategic plans, research, digital and traditional creative materials, media plans and presentations. The internship program is carefully managed by our Internship Directors to help students find the best possible internship opportunities. The Internship Directors, faculty members and SMC's Director of Career Services will help students with preparation of résumés, cover letters, and LinkedIn pages. We will also guide students through the process of seeking and identifying quality internship opportunities.

### Suggested Academic Plan

Please note that this is a suggested academic plan. Depending on your situation, your academic plan may look different.

Communication Studies

Scott Gratson, Ph.D., Program Director
9C Annenberg Hall
215-204-6434
sgratson@temple.edu
http://smc.temple.edu/commstudies/

Communication Studies is a studies-based interdisciplinary major. It features the academic (aesthetic, analytical, critical, historical, theoretical) and interdisciplinary study of communication as represented by the departments included within the School of Media and Communication.

Designed to ensure flexibility and choice, Communication Studies allows students a chance to fully investigate multiple fields in the communications discipline. Emphasis is placed on providing an overview of Communication while also accentuating personal academic growth. Personal choice and options allow students a chance to complete the degree in a timely manner.

In this interdisciplinary program, Communication Studies students will select one of the following tracks as a distinctive area of investigation:

- Communication and Entrepreneurship;
- Contemporary Media Environments;
- Global Civil Society; or
- Policy, Regulation and Advocacy.

A Major of Distinction track is also available for advanced scholars.

The flexibility of the Communications Studies program offers students access to the field experiences, internships, and study away experiences vital to a comprehensive education. Students with a number of skill sets and academic interest areas are often drawn to this innovative program and graduates are poised for a number of professional and academic possibilities, such as graduate, law, or professional school. Graduates of this program will be well-suited to pursue a variety of positions across numerous aspects of the Communications field.

Students receive cross-curricular expertise through foundation and core courses. Academic rigor and student choice are at the very core of the program. Choices allow a student flexibility and curricular oversight ensures a solid, academically robust education. Courses are designed to allow student progress to be monitored at yearly intervals. Experiential learning is promoted, particularly during the junior and senior years. Cross cultural exchanges and experiences are integral aspects of the program's design. Advanced scholars have a distinct and individualized track.

Programs

- Bachelor of Arts in Communication Studies: Communication and Entrepreneurship Track (p. 960)
- Bachelor of Arts in Communication Studies: Contemporary Media Environments Track (p. 963)
- Bachelor of Arts in Communication Studies: Global Civil Society Track (p. 966)
Bachelor of Arts in Communication Studies: Major of Distinction (Thesis Track)

The Major of Distinction is an academically rigorous program for students who wish to construct an interdisciplinary curriculum that meets their individual interests across the SMC departments. In the Major of Distinction, each student works individually with a faculty advisor from a relevant SMC department to build a curriculum that goes beyond the offered tracks. The student completes five courses, four of which must be at the 3000 or 4000 level, and in the senior year completes a two-semester thesis. A student in the Major of Distinction must have completed three semesters of a foreign language (or equivalent with the approval of the Director of Communication Studies) by the time of graduation. If appropriate to the student's research, an advanced methods or theory course may be required by the student's faculty advisor.

Students apply for a Major of Distinction in the second semester of their sophomore year. To be considered, students must be on schedule to complete their Foundational and Core Communications courses by the end of their sophomore year. Also, students must have earned at least a 3.5 cumulative grade point average (GPA) in their Foundational and Core Communications courses along with a 3.25 overall GPA. Students must submit an application to the Director of Communication Studies that includes a statement of student's interest, a proposed curriculum, and a support letter from a full-time SMC faculty member willing to act as student's faculty advisor.

Once accepted into the Major of Distinction and in consultation with his or her faculty advisor and the Director of Communication Studies, each student constructs his or her own curriculum. The curriculum must contain five courses, four of which must be at the 3000 or 4000 level, and include courses from at least three of the SMC majors. Courses selected should be designed to lead to the senior-year thesis.

Summary of Requirements

The degree of Bachelor of Arts may be conferred upon a student majoring in Communication Studies by the recommendation of the faculty and upon satisfactory completion of a minimum of 124 semester hours (s.h.) of credit with a cumulative grade point average of 2.0 overall and in the major. Students must meet:

1. University requirements
   - All students are required to complete the General Education (GenEd (p. 143)) curriculum.
   - All students must take a minimum of two writing-intensive courses in the major at Temple University.

2. School of Media and Communication requirements (p. 937).
3. Minimum of 42 s.h. in Communication Studies.
4. Each course that fulfills a requirement for the major must be passed with a C- or better.
5. Maximum of 27 s.h. in any one SMC department may be counted toward the degree.
6. A maximum of 4 s.h. of Internship credit may be counted toward the degree.
7. A maximum of 8 s.h. combined of Independent Study and/or Special Projects may be counted toward the degree.
8. No more than 8 s.h. in Kinesiology and Dance activities courses.
9. Students may participate in study away programs.
10. Transfer students are required to complete a minimum of 24 s.h. of major courses at Temple.
11. Communication Studies majors may minor in established SMC minors. The Communication Studies student who declares a minor must complete the entire program requirements for both the major and the minor. Courses listed for both the Communication Studies major and SMC minor will only apply towards one of the curriculums. If the class is part of an array of courses, students will be required to take a different course to satisfy the major requirement.

Communication Studies: Major of Distinction (Thesis Track) Requirements

1. All Communication Studies majors must take the following two foundation courses:

<table>

Bachelor of Arts in Communication Studies: Communication and Entrepreneurship Track

This track focuses on the intersection between the field of communication and entrepreneurship. Classes will reflect the communicative and functional aspect of entrepreneurship by focusing on and critiquing organizational development. Developed from principles of digital convergence and innovation, this track reflects the need for a host of skills that will function in the digital workplace and will allow students to consider means of developing a more nuanced understanding of capitalism and its impacts.

Summary of Requirements

The degree of Bachelor of Arts may be conferred upon a student majoring in Communication Studies by the recommendation of the faculty and upon satisfactory completion of a minimum of 124 semester hours (s.h.) of credit with a cumulative grade point average of 2.0 overall and in the major. Students must meet:

1. University requirements
   • All students are required to complete the General Education (GenEd (p. 143)) curriculum.
   • All students must take a minimum of two writing-intensive courses in the major at Temple University.
2. School of Media and Communication requirements (p. 937).
3. Minimum of 42 s.h. in Communication Studies.
4. Each course that fulfills a requirement for the major must be passed with a C- or better.
5. Maximum of 27 s.h. in any one SMC department may be counted toward the degree.
6. A maximum of 4 s.h. of Internship credit may be counted toward the degree.
7. A maximum of 8 s.h. combined of Independent Study and/or Special Projects may be counted toward the degree.
8. No more than 8 s.h. in Kinesiology and Dance activities courses.
9. Students may participate in study away programs.
10. Transfer students are required to complete a minimum of 24 s.h. of major courses at Temple.
11. Communication Studies majors may minor in established SMC minors. The Communication Studies student who declares a minor must complete the entire program requirements for both the major and the minor. Courses listed for both the Communication Studies major and SMC minor will only apply towards one of the curriculums. If the class is part of an array of courses, students will be required to take a different course to satisfy the major requirement.

Communication Studies: Communication and Entrepreneurship Track Requirements

1. All Communication Studies majors must take the following two foundation courses:
   - CMST 1111 Communication and Public Life 3
   - MSP 1021 Media and Society 3
   Total Credit Hours 6

2. All majors will take five additional core courses. Students will select one course each from the categories below (15 credits). Students should plan to meet the prerequisites for courses in their selected track (see below) by taking appropriate core courses.

Core Courses
- CMST 2111 Communications Seminar 1 3

Communication Theory
- Select one of the following: 3
  - ADV 1101 Introduction to Media and Society
  - ADV 1102 Introduction to Advertising
  - JRN 1111 Journalism and Society
  - MSP 1011 Media Research

Research Methods
- Select one of the following: 3
  - ADV 1141 Introduction to Advertising Research 2
  - JRN 2101 Journalism Research 1
  - MSP 2141 Media Research 1

Total Credit Hours 15

1. Course has prerequisites.
2. Courses in various categories can only be counted once.

3. In consultation with a faculty advisor, a student must take seven courses (minimum 21 credits) from the list below.
   • Within the track, a student must take at least one course from at least three different departments.
   • At least four courses in the track must be taken at the 3000 or 4000 level. At least one of these four must be taken at the 4000 level.
   • Students must have met the prerequisites for courses in their track by taking the appropriate core courses (see above).
   • All students must take a minimum of two writing-intensive courses in the major. Writing-intensive courses end in the numbers 96, 97 and 98 and are noted (WI) in the list below.

**Bachelor of Arts in Communication Studies: Contemporary Media Environments Track**

This track provides an historical overview of communication technologies - from papyrus to moveable type, from the rotary press to broadcasting and the Internet - and the ways that they shape public life. It will introduce theories on the relationship between technology and society, focusing on the intersection between communication technologies and the public sphere.

**Summary of Requirements**

The degree of Bachelor of Arts may be conferred upon a student majoring in Communication Studies by the recommendation of the faculty and upon satisfactory completion of a minimum of 124 semester hours (s.h.) of credit with a cumulative grade point average of 2.0 overall and in the major. Students must meet:

1. University requirements
   - All students are required to complete the General Education (GenEd (p. 143)) curriculum.
   - All students must take a minimum of two writing-intensive courses in the major at Temple University.
2. School of Media and Communication requirements (p. 937).
3. Minimum of 42 s.h. in Communication Studies.
4. Each course that fulfills a requirement for the major must be passed with a C- or better.
5. Maximum of 27 s.h. in any one SMC department may be counted toward the degree.
6. A maximum of 4 s.h. of Internship credit may be counted toward the degree.
7. A maximum of 8 s.h. combined of Independent Study and/or Special Projects may be counted toward the degree.
8. No more than 8 s.h. in Kinesiology and Dance activities courses.
9. Students may participate in study away programs.
10. Transfer students are required to complete a minimum of 24 s.h. of major courses at Temple.
11. Communication Studies majors may minor in established SMC minors. The Communication Studies student who declares a minor must complete the entire program requirements for both the major and the minor. Courses listed for both the Communication Studies major and SMC minor will only apply towards one of the curriculums. If the class is part of an array of courses, students will be required to take a different course to satisfy the major requirement.

**Communication Studies: Contemporary Media Environment Track Requirements**

1. All Communication Studies majors must take the following two foundation courses:
   - CMST 1111 Communication and Public Life 3
   - MSP 1021 Media and Society 3

<table>
<thead>
<tr>
<th>Total Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>6</td>
</tr>
</tbody>
</table>

2. All majors will take five additional core courses. Students will select one course each from the categories below (15 credits). Students should plan to meet the prerequisites for courses in their selected track by taking appropriate core courses.

**Core Courses**
**CMST 2111**  Communications Seminar  

**Communication Theory**  
Select one of the following:

1  
Course has prerequisites.

3. In consultation with a faculty advisor, a student must take seven courses (minimum 21 credits) from the list below.  
- Within the track, a student must take at least one course from at least three different departments.  
- At least four courses in the track must be taken at the 3000 or 4000 level. At least one of these four must be taken at the 4000 level.  
- Students must have met the prerequisites for courses in their track by taking the appropriate core courses (see above).  
- All students must take a minimum of two writing-intensive courses in the major. Writing-intensive courses end in the numbers 96, 97 and 98 and are noted (WI) in the list below.

**Contemporary Media Environment Track Options**  

<table>
<thead>
<tr>
<th>Course</th>

### Bachelor of Arts in Communication Studies: Policy, Regulation and Advocacy Track

This track focuses on citizen advocacy in the field of communication as related to and shaped by communication policy and regulation. Students are introduced to historical and recent examples of citizen advocacy in communication policy through the examination of social movements, civic journalism, art and performance, and special interest groups tied to issues of race, gender, ethnicity, sexual orientation, and the environment.

### Summary of Requirements

The degree of Bachelor of Arts may be conferred upon a student majoring in Communication Studies by the recommendation of the faculty and upon satisfactory completion of a minimum of 124 semester hours (s.h.) of credit with a cumulative grade point average of 2.0 overall and in the major. Students must meet:

1. University requirements
   - All students are required to complete the General Education (GenEd (p. 143)) curriculum.
   - All students must take a minimum of two writing-intensive courses in the major at Temple University.

2. School of Media and Communication requirements (p. 937).
3. Minimum of 42 s.h. in Communication Studies.
4. Each course that fulfills a requirement for the major must be passed with a C- or better.
5. Maximum of 27 s.h. in any one SMC department may be counted toward the degree.
6. A maximum of 4 s.h. of Internship credit may be counted toward the degree.

8. No more than 8 s.h. in Kinesiology and Dance activities courses.
9. Students may participate in study away programs.
10. Transfer students are required to complete a minimum of 24 s.h. of major courses at Temple.
11. Communication Studies majors may minor in established SMC minors. The Communication Studies student who declares a minor must complete the entire program requirements for both the major and the minor. Courses listed for both the Communication Studies major and SMC minor will only apply towards one of the curriculums. If the class is part of an array of courses, students will be required to take a different course to satisfy the major requirement.

**Communication Studies: Policy, Regulation and Advocacy Track Requirements**

1. All Communication Studies majors must take the following two foundation courses:
   - **CMST 1111** Communication and Public Life  3
   - **MSP 1021** Media and Society  3
   **Total Credit Hours**  6

2. All majors will take five additional core courses. Students will select one course each from the categories below (15 credits). Students should plan to meet the prerequisites for courses in their selected track by taking appropriate core courses.
   **Core Courses**
   - **CMST 2111** Communications Seminar  3
   - **Communication Theory**
     - Select one of the following:  3
       - ADV 1101 Introduction to Media and Society
       - ADV 1102 Introduction to Advertising
       - JRN 1111 Journalism and Society
       - MSP 1011 Introduction to Media Theory
   - **Research Methods**
     - Select one of the following:  3
       - ADV 1141 Introduction to Advertising Research
       - JRN 2101 Journalism Research  1
       - MSP 2141 Media Research  1
   - **Analysis**
     - Select one of the following:  3
       - ADV 2151 Introduction to Art Direction: Visual Communication
       - MSP 2421 Media Popular Culture  1
       - STRC 1111 Public Speaking
       - or STRC 1911 Honors Public Speaking
   - **Cross-Cultural Perspectives**
     - Select one of the following:  3
       - STRC 2672 Global Communication and Leadership
       - STRC 3801 Intercultural Communication
   **Total Credit Hours**  15

  1 Course has prerequisites.

3. In consultation with a faculty advisor, a student must take seven courses (minimum 21 credits) from the list below.
   - Within the track, a student must take at least one course from at least three different departments.
   - At least four courses in the track must be taken at the 3000 or 4000 level. At least one of these four must be taken at the 4000 level.
   - Students must have met the prerequisites for courses in their track by taking the appropriate core courses (see above).
   - All students must take a minimum of two writing-intensive courses in the major, at least one must be taken at the 3000+ level. Writing-intensive courses end in the numbers 96, 97 and 98 and are noted (WI) in the list below.

Minor in Communication Studies

Scott Gratson, Ph.D., Program Director
9C Annenberg Hall
215-204-6434
sgratson@temple.edu
http://smc.temple.edu/commstudies/

The focus of the Communication Studies program is on the academic (aesthetic, analytical, critical, historical, theoretical) and interdisciplinary study of communication and media.

The minor will require students to take two foundational courses (6 credits) introducing students to the broad concepts of communication in public life and of media history and convergence. Students will then take one course from each of the follow categories (12 credits): Communication Theory, Research Methods, Analysis, and Cross-Cultural Perspectives.

Unlike Communication Studies majors, students will not be required to take advanced coursework.

The minor is available to undergraduate students in any major except Communication Studies. Other SMC students may declare the major, but all minor requirements must be separate from major requirements, with the exception of MSP 1021.

Requirements

Students will complete a total of 18 credits in the Communication Studies minor.

All students must take the following foundation courses (6 credits):

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CMST 1111</td>
<td>Communication and Public Life</td>
<td>3</td>
</tr>
<tr>
<td>MSP 1021</td>
<td>Media and Society</td>
<td>3</td>
</tr>
</tbody>
</table>

All students will take four additional core courses (12 credits). They will select one course each from the categories below:

Communication Theory

<table>

Students must earn at least a C- in all required courses.

International Communication Concentration

The International Communication Concentration (ICC) provides a theoretical and practical education in international and intercultural communication and media. This program allows students to develop sought-after competencies in cultural sensitivity and intercultural communication skills by encouraging students to reflect on their own cultural lenses. Students participating in the ICC program will be exposed to multiple international perspectives through internationally- and interculturally-oriented courses offered on Temple’s domestic campuses and may be supplemented with study abroad coursework.
This program is restricted to SMC students only.

To earn the International Communication Concentration transcript notation, a student must successfully complete a total of 18-20 credits of International / Intercultural studies courses, a maximum 9 credits of which may come from courses transferred into Temple, across 3 areas:

### Common Course
- **STRC 3801** Intercultural Communication 3

### SMC International/Intercultural courses

**Select three of the following:** 9

**Advertising**
- **ADV 3101** Creative Thinking for Advertising (Study Abroad sections only - London)
- **ADV 3185** Advertising Internship (International Internship only, through Study Abroad: London, Barcelona, Hong Kong)

**Journalism**
- **JRN 3254** International Reporting
- **JRN 3296** Travel Writing (Study Abroad sections only - London/Dublin)
- **JRN 3706** International News Communication
- **JRN 3751** Foreign Studies in Journalism (Study Abroad - London, Tokyo, Dublin, South Africa)
- **JRN 3885** Internship (International Internships only, through Study Abroad: London, Barcelona, Hong Kong)

**Media Studies & Production**
- **MSP 3296** Travel Writing (Study Abroad sections only - London/Dublin)
- **MSP 3471** Media and Cultural Differences
- **MSP 3572** Communication and Development
- **MSP 4453** Information Society
- **MSP 4496** Global Media
- **MSP 4571** Foreign Studies in BTMM (Study Abroad - London/Dublin)
- **MSP 4572** British Media and Telecommunication (Study Abroad - London)
- **MSP 4785** Internship (Study Abroad sections only - London)

**Strategic Communication**
- **STRC 2672** Global Communication and Leadership
- **STRC 3385** Internship in Rhetoric and Public Advocacy (International Internships only, through Study Abroad: London, Barcelona, Hong Kong)
- **STRC 3585** Internship in Public Relations (International Internship only, through Study Abroad: London, Barcelona, Hong Kong)
- **STRC 3685** Internship in Organizational Leadership (International Internship only, through Study Abroad: London, Barcelona, Hong Kong)
- **STRC 3670** Special Topics in Organizational Leadership

### International/Intercultural Electives outside of SMC

Two sequential courses (e.g. 1001 and 1002) in any one foreign language or any two of the following: 6-8

**Art History**
- **ARTH 1003** History of Art in Rome (Study Abroad - Rome)
- **ARTH 1155** Art Heritage of the Western World I
- **ARTH 1156** Art Heritage of the Western World II
- **ARTH 1801** Arts of Asia (Study Abroad - Japan)
- **ARTH 2001** European Crafts and Decorative Arts
- **ARTH 2102** Greek Mythology and Art
- **ARTH 2105** Roman Art and Archaeology
- **ARTH 2129** Greek and Roman Sculpture
- **ARTH 2135** Art and Archeology of Ancient Rome and the Mediterranean (Study Abroad - Rome)
- **ARTH 2428** High and Late Baroque Art in Rome (Study Abroad - Rome)
- **ARTH 2431** Southern Baroque Art: Italy and Spain
- **ARTH 2432** Northern Baroque Art
- **ARTH 2622** Galleries and Studios of Rome (Study Abroad - Rome)
- **ARTH 2651** Symbolism, Dada, and Surrealism

Journalism

Carolyn L. Kitch, Ph.D., Department Chair
George W. Miller III, MSJ, MLA, Assistant Department Chair
316 Annenberg Hall
215-204-7433
journ@temple.edu
http://smc.temple.edu/journalism/

The curriculum for Journalism is based on developing critical thinking in students for a multimedia, urban, journalistic environment. This requires a broad educational background coupled with rigorous professional training. The curriculum emphasizes subject matter from other disciplines, particularly those in the liberal arts. The department also believes that effective writing is central to communication and is, therefore, integral to the department curriculum.

Graduates of the program will develop:

1. Strong skills in reporting, writing, photography, audio/video newsgathering, print and web editing and design.
2. The ability to analyze critically past and present trends of journalism and to help craft alternative forms of journalism for the future.
3. A strong sense of ethical responsibility and the knowledge necessary for ethical decision-making.
4. An understanding of digital and interactive media technologies.
5. The ability to provide information in multimedia formats.
6. A culture of collaboration through team reporting....
7. ...in order to tell stories emanating from a diverse urban environment.
8. A keen understanding of the increasingly-global nature of today's journalistic environment.

Temple's Journalism Department is one of only two programs in Pennsylvania accredited by the Accrediting Council on Education in Journalism and Mass Communication (ACEJMC). The department has a chapter of the national journalism and mass communication honor society, Kappa Tau Alpha. Additionally, every spring the department awards thousands of dollars in scholarships to deserving majors.

Programs

- Bachelor of Arts in Journalism (p. 978)
Bachelor of Arts in Journalism

Students need to meet the department’s nine required courses as well as 18 credits of journalism electives, forming an area of emphasis. A capstone experience, JRN 4196, combines urban community journalism with multimedia storytelling. This capstone produces the online news site, PhiladelphiaNeighborhoods.com.

Students who major in Journalism enter a variety of careers, including those as web reporters and producers, newspaper reporters and editors, still and video photographers, radio and television reporters and producers, and magazine writers and editors.

Although students must ultimately be responsible for their own academic programs, freshmen and first-semester transfer students will first meet with a School of Media and Communication (SMC) academic advisor. During the sophomore and junior years, a student must meet at least once each year with a faculty advisor who is knowledgeable about the area of study the student is following.

Summary of Requirements

The degree of Bachelor of Arts may be conferred upon a student majoring in Journalism by recommendation of the faculty and upon satisfactory completion of a minimum of 124 semester hours of credit with a cumulative average of 2.0 overall and in the major.

Students must meet:

1. University requirements:
   a. All students are required to complete the General Education (GenEd (p. 143)) curriculum.
   b. All students must take a minimum of two writing-intensive courses in the major at Temple University. The specific writing-intensive courses required for this major are JRN 1196 and JRN 4196.

2. School of Media and Communication requirements (p. 937).

3. Minimum 45 credits in Journalism required. Maximum 52 credits in the School of Media and Communication permitted. Students must complete 72 credits outside the School of Media and Communication.
   a. Students are cautioned to plan their program so they do not exceed the 52-credit hour limit that is set by our accrediting body.

4. Journalism majors must receive a grade of C or higher in all required department courses and electives for them to count for the major.

5. A maximum of 6 credits may be earned for internships and a maximum of 3 credits for independent studies. If students plan to take multiple internships, please keep in mind the six-credit maximum. Internships may be taken for 1-3 credits.

6. Only 8 credits will be accepted from Kinesiology and Dance activity courses.

7. No more than 30 credits may be taken in any single CLA department without special written permission from the Department of Journalism. These requirements are to ensure a broad-based liberal arts education for each major.

8. Journalism-related coursework must be evaluated for transfer (including courses taken through study abroad programs after enrolling at Temple University) by the Department Chair. No more than 12 credits in total will be accepted for transfer from an accredited journalism/mass communication program; maximum 9 credits from a non-accredited program. Under no circumstances will credit be allowed for duplicate courses.

9. The department does not award credit for academic or life experience. Students with extensive experience may present evidence and petition for a waiver of department course requirements.

10. Coursework taken in Business Education, lower-level credits in Military Science, and the Extern Program are not applicable towards graduation.

Departmental Requirements for the Major

It is the student's responsibility to meet all course prerequisite requirements.

The Department of Media Studies and Production expands students’ knowledge and skills to create, evaluate, and manage media content and organizations. With the urban and global communities as their living laboratories, students draw on their creativity, entrepreneurship, intellectual curiosity and analytical abilities to navigate digital media in our global society.

Theory and practice are integrated into all areas of study in the major. Media Studies & Production students learn how to produce, evaluate and manage media content for traditional and emerging media in a variety of genres, including information (news and documentary), music, comedy, sports, drama, and commercial and noncommercial persuasion campaigns. They study institutions that create, distribute and investigate media products (e.g., production studios, television and radio networks and audience measurement companies) and learn how to create and operate successful media businesses. Media Studies & Production students learn to think purposefully and critically about media, and examine media roles in history, culture and society from many perspectives. They also learn how to act ethically as they interact with the world both in careers in media institutions and as media consuming and producing citizens.

Programs

- Bachelor of Arts in Media Studies and Production: Emergent Media Track (p. 981)
- Bachelor of Arts in Media Studies and Production: Media Analysis Track (p. 985)
- Bachelor of Arts in Media Studies and Production: Media Business and Entrepreneurship Track (p. 988)
- Bachelor of Arts in Media Studies and Production: Media Production Track (p. 992)
- Digital Media Technologies (p. )

Bachelor of Arts in Media Studies and Production: Emergent Media Track

The Emergent Media Professional Option track focuses on critical analysis and production in new digital media, specifically in mobile media, the web, and video games. Students who study this track develop an understanding of the global nature of the new digital media environment and its business practices, and production processes. Students who follow this track will be prepared for careers as digital media consultants, web designers, and marketing professionals in the converged media environment.

Requirements for the Degree

Summary of Requirements

The degree of Bachelor of Arts may be conferred upon a student majoring in Media Studies and Production by the recommendation of the faculty and upon satisfactory completion of a minimum of 124 semester hours of credit with a cumulative grade point average of 2.0 overall and in the major. Students must meet:

1. University requirements
   - All students are required to complete the General Education (GenEd (p. 143)) curriculum.
   - All students must take a minimum of two writing-intensive courses in the major at Temple University.

2. School of Media and Communication requirements (p. 937).
4. Each course that fulfills a requirement for the major must be passed with a C- or better.
5. All prerequisites must be met unless exempted in writing.
6. No more than 20 transfer credits may be applied to the Media Studies & Production major.
7. No more than 8 credits in Kinesiology and Dance activities courses.
8. No more than 12 credits total for internship, practicum, and independent study courses.

</tr>
</tbody>
</table>

Total Credit Hours: 42-43
Must be completed within the first 45 credits at Temple University. Students transferring in to Temple need to complete at least one Media Studies & Production foundation course at Temple, unless exempted by the chair of the department.

All majors must have 2.75 GPA or greater to enroll in the Internship (3-4 credit hours); all other majors with a lower GPA must complete at least one Practicum (MSP 4487, MSP 4596, MSP 4597, MSP 4687, MSP 4787, MSP 4887).

Taken during final 30 credits.

If MSP 4446 is taken, student will decide whether to count it as Media & Critical Topics requirement or Emergent Media Studies option since courses in various categories can only be counted once.

Internships and Senior Seminar

The academic experience for all Media Studies & Production majors culminates with the MSP 4039 Senior Seminar and MSP 4785 Internship for 3 or 4 credit hours (NOTE: To qualify for an internship, students must have Junior or Senior standing, a minimum of 2.75 GPA, and passing grades (C-) in the Media Studies & Production requirement courses. For students with a GPA lower than 2.75, a Practicum must be completed in place of the Internship). Together, these courses provide the opportunity to explore their potential professional futures. Internship opportunities exist locally (at virtually every media-oriented organization in the greater Philadelphia region), nationally (in New York City, Los Angeles, Chicago, and other U.S. media markets), and internationally (in London, Dublin, Paris, Barcelona, Hong Kong, and Tokyo through the School of Media and Communication's Study Away Program and Temple's Education Abroad Office). Students who wish to enroll in a second internship as an elective can take MSP 4786 for 1 to 3 credit hours.

Practica

There are six (6) practica options:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MSP 4487</td>
<td>TUTV Practicum</td>
<td>3</td>
</tr>
<tr>
<td>MSP 4596</td>
<td>TV News Production Practicum - Temple Update</td>
<td>4</td>
</tr>
<tr>
<td>MSP 4597</td>
<td>Sports Production Practicum</td>
<td>4</td>
</tr>
<tr>
<td>MSP 4687</td>
<td>Recording Industry Practicum</td>
<td>3</td>
</tr>
<tr>
<td>MSP 4787</td>
<td>Television Production Workshop</td>
<td>3 to 8</td>
</tr>
<tr>
<td>MSP 4887</td>
<td>Radio Production Practicum</td>
<td>3</td>
</tr>
</tbody>
</table>

Students enrolled in TUTV Practicum (MSP 4487) play a key role in the operation of Temple University Television (TUTV) and will work with the course instructor, engineering staffers and others to schedule the station and produce original content. In the TV News Production Practicum - Temple Update (MSP 4596), students produce a weekly live-to-tape TV newsmagazine that airs on local cable TV. The Sports Production Practicum (MSP 4597) is a weekly sports program produced by students. Recording Industry Practicum (MSP 4687) is an intensive, practical course that engages students in the day-to-day operation of our student-run record label. Television Production Workshop (MSP 4787) also fulfills the requirement of a practicum and involves the production of various content also for broadcast on local cable.

Media Studies & Production courses designated as "Practicum" can be taken as either Media Studies & Production electives or in place of MSP 4785 Internship.

1 All students are required to take at least two WI courses in their major so each competency area (Media Policy & Ethics, Media & Critical Topics, and International/Intercultural Media Issues) offers a WI option. If a student is eligible for MSP 4596 or MSP 4597 and chooses to take one of these courses to fulfill internship/practicum requirement, the course would also fulfill one of the WI requirements.

Bachelor of Arts in Media Studies and Production: Media Analysis Track

The Media Analysis Professional Option track introduces students to the critical understanding of the roles of media in contemporary life, including media technology as a cultural force; the nature of media institutions, audiences, and texts; and the media as a source of shared social identities. Students who select this track are prepared for careers as media consultants, editorial or technical writers, community activists, corporate communication producers, media scholars, and market research analysts.

Requirements for the Degree

Summary of Requirements

The degree of Bachelor of Arts may be conferred upon a student majoring in Media Studies and Production by the recommendation of the faculty and upon satisfactory completion of a minimum of 124 semester hours of credit with a cumulative grade point average of 2.0 overall and in the major. Students must meet:

1. University requirements
   • All students are required to complete the General Education (GenEd (p. 143)) curriculum.
   • All students must take a minimum of two writing-intensive courses in the major at Temple University.

2. School of Media and Communication requirements (p. 937).

4. Each course that fulfills a requirement for the major must be passed with a C- or better.

5. All prerequisites must be met unless exempted in writing.

6. No more than 20 transfer credits may be applied to the Media Studies & Production major.

7. No more than 8 credits in Kinesiology and Dance activities courses.

8. No more than 12 credits total for internship, practicum, and independent study courses.

**Total Credit Hours**  

- **42-43**

---

1. Must be completed within the first 45 credits at Temple University. Students transferring in to Temple need to complete at least one Media Studies & Production foundation course at Temple, unless exempted by the chair of the department.

2. All majors must have 2.75 GPA or greater to enroll in the Internship (3-4 credit hours); all other majors with a lower GPA must complete at least one Practicum (MSP 4487, MSP 4596, MSP 4597, MSP 4687, MSP 4787, MSP 4887).

3. Taken during final 30 credits.

4. Courses in various categories can only be counted once.

**Internships and Senior Seminar**

The academic experience for all Media Studies & Production majors culminates with the MSP 4039 Senior Seminar and MSP 4785 Internship for 3 or 4 credit hours (NOTE: To qualify for an internship, students must have Junior or Senior standing, a minimum of 2.75 GPA, and passing grades (C-) in the Media Studies & Production requirement courses. For students with a GPA lower than 2.75, a Practicum must be completed in place of the Internship). Together, these courses provide students the opportunity to explore their potential professional futures. Internship opportunities exist locally (at virtually every media-oriented organization in the greater Philadelphia region), nationally (in New York City, Los Angeles, Chicago, and other U.S. media markets), and internationally (in London, Dublin, Paris, Barcelona, Hong Kong, and Tokyo through the School of Media and Communication's Study Away Program and Temple's Education Abroad Office). Students who wish to enroll in a second internship as an elective can take MSP 4786 for 1 to 3 credit hours.

**Practica**

There are six (6) practica options:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MSP 4487</td>
<td>TUTV Practicum</td>
<td>3</td>
</tr>
<tr>
<td>MSP 4596</td>
<td>TV News Production Practicum - Temple Update</td>
<td>4</td>
</tr>
</tbody>
</table>
Students enrolled in TUTV Practicum (MSP 4487) play a key role in the operation of Temple University Television (TUTV) and will work with the course instructor, engineering staffers and others to schedule the station and produce original content. In the TV News Production Practicum - Temple Update (MSP 4596), students produce a weekly live-to-tape TV newsmagazine that airs on local cable TV. The Sports Production Practicum (MSP 4597) is a weekly sports program produced by students. Recording Industry Practicum (MSP 4687) is an intensive, practical course that engages students in the day-to-day operation of our student-run record label. Television Production Workshop (MSP 4787) also fulfills the requirement of a practicum and involves the production of various content also for broadcast on local cable.

Media Studies & Production courses designated as "Practicum" can be taken as either Media Studies & Production electives or in place of MSP 4785 Internship.

**Suggested Academic Plan**

Please note that this is a suggested academic plan. Depending on your situation, your academic plan may look different.

| **Term Credit Hours** | **15** |

**Total Credit Hours**: 124

---

1. All students are required to take at least two WI courses in their major. Media Analysis track offers the following WI options: MSP 3196, MSP 4296, MSP 4497, and MSP 4696. International/Intercultural Media Issues competency area also offers another WI option: MSP 4496. If a student is eligible for MSP 4596 or MSP 4597 and chooses to take one of these courses to fulfill internship/practicum requirement, the course would also fulfill one of the WI requirements.

### Bachelor of Arts in Media Studies and Production: Media Business and Entrepreneurship Track

The Media Business & Entrepreneurship Professional Option track introduces students to the practical and ethical ways to start, operate or participate in an enterprise that creates, produces, and/or distributes media content. Students who follow this track seek career opportunities as media entrepreneurs,
media production freelancers, owners/operators of production companies or recording studios, web site developers, or founders/owners of a station, channel or network.

Requirements for the Degree of Bachelor of Arts

Summary of Requirements
The degree of Bachelor of Arts may be conferred upon a student majoring in Media Studies and Production by the recommendation of the faculty and upon satisfactory completion of a minimum of 124 semester hours of credit with a cumulative grade point average of 2.0 overall and in the major. Students must meet:

1. University requirements
   • All students are required to complete the General Education (GenEd (p. 143)) curriculum.
   • All students must take a minimum of two writing-intensive courses in the major at Temple University.

2. School of Media and Communication requirements (p. 937).
4. Each course that fulfills a requirement for the major must be passed with a C- or better.
5. All prerequisites must be met unless exempted in writing.
6. No more than 20 transfer credits may be applied to the Media Studies & Production major.
7. No more than 8 credits in Kinesiology and Dance activities courses.
8. No more than 12 credits total for internship, practicum, and independent study courses.

\(^1\) Media Business & Entrepreneurship Track has one WI built in as an option (MSP 4696). All students are required to take at least two WI courses in their major so each competency area (Media Policy & Ethics, Media & Critical Topics, and International/Intercultural Media Issues) offers a WI option to fulfill one of the WI requirements. If a student is eligible for MSP 4596 or MSP 4597 and chooses to take one of these courses to fulfill internship/practicum requirement, the course would also fulfill one of the WI requirements.

**Bachelor of Arts in Media Studies and Production: Media Production Track**

The Media Production Professional Option track introduces students to conceptual and technical tools employed to create media content for the digital world. Students who study in this track develop strong professional skills as well as critical and analytical abilities that enable them to evaluate content for various media. They seek career opportunities as producers, writers, videographers, editors, recording engineers, web site designers, and talent in traditional and emerging media.

**Requirements for the Degree**

**Summary of Requirements**

The degree of Bachelor of Arts may be conferred upon a student majoring in Media Studies and Production by the recommendation of the faculty and upon satisfactory completion of a minimum of 124 semester hours of credit with a cumulative grade point average of 2.0 overall and in the major. Students must meet:

1. University requirements
   - All students are required to complete the General Education (GenEd p. 143) curriculum.
   - All students must take a minimum of two writing-intensive courses in the major at Temple University.

2. School of Media and Communication requirements (p. 937).
4. Each course that fulfills a requirement for the major must be passed with a C- or better.
5. All prerequisites must be met unless exempted in writing.
6. No more than 20 transfer credits may be applied to the Media Studies & Production major.
7. No more than 8 credits in Kinesiology and Dance activities courses.
8. No more than 12 credits total for internship, practicum, and independent study courses.

**Total Credit Hours**: 42-45
Internships and Senior Seminar

The academic experience for all Media Studies & Production majors culminates with the MSP 4039 Senior Seminar and MSP 4785 Internship for 3 or 4 credit hours (NOTE: To qualify for an internship, students must have Junior or Senior standing, a minimum of 2.75 GPA, and passing grades (C-) in the Media Studies & Production requirement courses. For students with a GPA lower than 2.75, a Practicum must be completed in place of the Internship). Together, these courses provide students the opportunity to explore their potential professional futures. Internship opportunities exist locally (at virtually every media-oriented organization in the greater Philadelphia region), nationally (in New York City, Los Angeles, Chicago, and other U.S. media markets), and internationally (in London, Dublin, Paris, Barcelona, Hong Kong, and Tokyo through the School of Media and Communication's Study Away Program and Temple's Education Abroad Office). Students who wish to enroll in a second internship as an elective can take MSP 4786 for 1 to 3 credit hours.

Practica

There are six (6) practicum options:

- MSP 4487 TUTV Practicum 3
- MSP 4596 TV News Production Practicum - Temple Update 4
- MSP 4597 Sports Production Practicum 4
- MSP 4687 Recording Industry Practicum 3
- MSP 4787 Television Production Workshop 3 to 8
- MSP 4887 Radio Production Practicum 3

Students enrolled in TUTV Practicum (MSP 4487) play a key role in the operation of Temple University Television (TUTV) and will work with the course instructor, engineering staffers and others to schedule the station and produce original content. In the TV News Production Practicum - Temple Update (MSP 4596), students produce a weekly live-to-tape TV newsmagazine that airs on local cable TV. The Sports Production Practicum (MSP 4597) is a weekly sports program produced by students. Recording Industry Practicum (MSP 4687) is an intensive, practical course that engages students in the day-to-day operation of our student-run record label. Television Production Workshop (MSP 4787) also fulfills the requirement of a practicum and involves the production of various content also for broadcast on local cable.

Media Studies & Production courses designated as "Practicum" can be taken as either Media Studies & Production electives or in place of MSP 4785 Internship.

Suggested Academic Plan

Please note that this is a suggested academic plan. Depending on your situation, your academic plan may look different.

**1** Media Production Professional Option Track offers the following WI options: MSP 3196 and MSP 4796. All students are required to take at least two WI courses in their major so each competency area (Media Policy & Ethics, Media & Critical Topics, and International/Intercultural Media Issues) offers a WI option to fulfill one of the WI requirements. If a student wishes to take MSP 4596 or MSP 4597 to fulfill internship/practicum requirement, the course would also fulfill one of the WI requirements.

### Strategic Communication

R. Lance Holbert, Ph.D., Chair
Weiss Hall 216A
215-204-3152
http://smc.temple.edu/strc/

The Department of Strategic Communication educates students in the theory and practice of public communication and leadership, with the primary emphasis on communication and social influence or advocacy. The department offers a bachelor's degree in four concentrations that focus on a general sequence, as well as on persuasion and political culture, communication in organizations, and communication strategies. Their overarching goal is to influence internal and external audiences.

The department offers the general sequence and three optional concentrations: Organizational Leadership, Public Relations, and Rhetoric and Public Advocacy. In addition to completing the department core, students may select and fulfill the requirements of a concentration. Until students choose a concentration within Strategic Communication, they are deemed enrolled in the general sequence of Strategic Communication. Students are also required to complete courses outside the school.

### Programs

- Bachelor of Arts in Strategic Communication (p. 996)
- Bachelor of Arts in Strategic Communication: Concentration in Organizational Leadership (p. 998)
- Bachelor of Arts in Strategic Communication: Concentration in Public Relations (p. 1000)
- Bachelor of Arts in Strategic Communication: Concentration in Rhetoric & Public Advocacy (p. 1003)
- Minor in Leadership (p. 1005)
- Minor in Public Relations (p. 1006)

### Bachelor of Arts in Strategic Communication

The General Sequence allows students more flexibility in studying strategic communication; more flexibility in meeting the necessary requirements of the major; and more flexibility in designing unique sequences of courses suited for particular goals and career paths.

### Summary of Requirements

The degree of Bachelor of Arts may be conferred upon a student majoring in Strategic Communication by the recommendation of the faculty and upon satisfactory completion of a minimum of 124 semester hours of credit with a cumulative grade point average of 2.0 overall and in the major. Students must meet:

1. University requirements:
   - All students required to complete the General Education (GenEd (p. 143)) curriculum.
   - All students must take a minimum of two writing-intensive courses in their major at Temple University.

2. School of Media and Communication requirements (p. 937).
3. Minimum 36 credit hours in Strategic Communication, including the department’s four Core courses (12 hours).
4. Maximum 54 credit hours may be taken in Strategic Communication courses.
5. A grade of C or higher must be attained in all required Strategic Communication courses.
6. No more than 12 semester hours of transfer credits may be applied to Strategic Communication requirements.
7. No more than 8 credits may be taken in Kinesiology and Dance activities courses.

Bachelor of Arts in Strategic Communication: Concentration in Organizational Leadership

The concentration in Organizational Leadership provides students with a thorough grounding in organizational and small-group communication. Students' coursework in these areas will incorporate a special focus on both the theories and skills needed for the creation and maintenance of fruitful leader-follower relationships.

Summary of Requirements

The degree of Bachelor of Arts may be conferred upon a student majoring in Strategic Communication by the recommendation of the faculty and upon satisfactory completion of a minimum of 124 semester hours of credit with a cumulative grade point average of 2.0 overall and in the major. Students must meet:

1. University requirements:
   • All students are required to complete the General Education (GenEd (p. 143)) curriculum.
   • All students must take a minimum of two writing-intensive courses in their major at Temple University.

2. School of Media and Communication requirements (p. 937).

3. Minimum 36 credit hours in Strategic Communication, including the department's four Core courses (12 hours).

4. Maximum 54 credit hours may be taken in Strategic Communication courses.

5. A grade of C or higher must be attained in all required Strategic Communication courses.

6. No more than 12 semester hours of transfer credits may be applied to Strategic Communication requirements.

7. No more than 8 credits may be taken in Kinesiology and Dance activities courses.

Bachelor of Arts in Strategic Communication: Concentration in Public Relations

Public Relations uses communication techniques to influence behaviors and attitudes. The Public Relations concentration combines public relations classes with requirements in public speaking, leadership, persuasion, and communication theory, and is satisfied through completing 36 semester hours in the major.

Summary of Requirements

The degree of Bachelor of Arts may be conferred upon a student majoring in Strategic Communication by the recommendation of the faculty and upon satisfactory completion of a minimum of 124 semester hours of credit with a cumulative grade point average of 2.0 overall and in the major. Students must meet:
1. University requirements:
   - All students are required to complete the General Education (GenEd (p. 143)) curriculum.
   - All students must take a minimum of two writing-intensive courses in their major at Temple University.

2. School of Media and Communication requirements (p. 937).
3. Minimum 36 credit hours in Strategic Communication, including the department's four Core courses (12 hours).
4. Maximum 54 credit hours may be taken in Strategic Communication courses.
5. A grade of C or higher must be attained in all required Strategic Communication courses.
6. No more than 12 semester hours of transfer credits may be applied to Strategic Communication requirements.
7. No more than 8 credits may be taken in Kinesiology and Dance activities courses.

---

1. May take STRC 2496 concurrently with either STRC 2551 or STRC 2552 (but not both).
2. Students in the PR concentration are strongly urged to take STRC 2552 before taking STRC 2551.
3. Open only to PR concentration and General Sequence students. Prerequisite: successful completion of STRC 2496, STRC 2551, STRC 2552 and STRC 3543.

Bachelor of Arts in Strategic Communication: Concentration in Rhetoric & Public Advocacy

The Rhetoric and Public Advocacy Concentration provides students with theory and practice in social influence. Students learn theories of advocacy in a variety of settings, gain experience in critical analysis of persuasive messages, and develop skills in creating strategic communications.

Summary of Requirements

The degree of Bachelor of Arts may be conferred upon a student majoring in Strategic Communication by the recommendation of the faculty and upon satisfactory completion of a minimum of 124 semester hours of credit with a cumulative grade point average of 2.0 overall and in the major. Students must meet:

1. University requirements:
   - All students are required to complete the General Education (GenEd (p. 143)) curriculum.
   - All students must take a minimum of two writing-intensive courses in their major at Temple University.

2. School of Media and Communication requirements (p. 937).

3. Minimum 36 credit hours in Strategic Communication, including the department's four Core courses (12 hours).

4. Maximum 54 credit hours may be taken in Strategic Communication courses.

5. A grade of C or higher must be attained in all required Strategic Communication courses.

6. No more than 12 semester hours of transfer credits may be applied to Strategic Communication requirements.

7. No more than 8 credits may be taken in Kinesiology and Dance activities courses.

**Minor in Leadership**

The Leadership Minor comprises six courses (18 s.h.) that provide students in other Temple University programs the opportunity to better prepare for life after graduation by acquiring the knowledge and skills required to communicate effectively and to lead at the organizational, team, and individual levels.

The goal of the Leadership Minor is to help students to understand that leadership is a communication and relational process, not a position. Viewed that way, leadership requires responsible, thoughtful reflection and action at all societal levels. That also requires competencies in being self-aware, in managing teams, in making ethical decisions, and leading with an intent to engender positive change.

Minor in Public Relations

The Public Relations minor consists of seven courses (21 s.h.) that provide students in other programs at Temple University the opportunity to better prepare them for life after graduation by gaining the knowledge and skill sets required to communicate effectively and lead at the organizational, team, and individual levels.

The goal of the Public Relations minor is to help students to understand that public relations is a communication and relational process, not a position. Viewed this way, public relations requires responsible, thoughtful reflection and action from all levels of organizations, not just those in leadership positions. This approach requires competencies of self-awareness, oral and written communication skills, ethical decision-making and action, and the ability to understand audiences and generate mutual win-win scenarios using a variety of communication tools to generate a vision and lead with, through, and for others to bring about positive change.

This program will build both knowledge and skills for students to understand true public relations, e.g., “relating” to publics in a meaningful two-way dialogue built on mutual trust and respect, and be able to effectively formulate a position and influence and empower others. They will be able to use the knowledge gained from this program to bridge the divide between the theoretical and practical application in the business they work in and the communities they serve.

Introduction

Science and technology were responsible for a profound transformation of the world in the 20th century and will drive the economy of the 21st century. The objectives of the undergraduate programs of the College of Science and Technology are to prepare students for careers in these important areas and to graduate informed, responsible citizens.

The college approaches science and technology as a body of knowledge that has an advancing frontier and a complex interface with society. The traditional mandate for a university is to provide undergraduate students with a comprehensive education and the opportunity to focus closely on a particular area of study. The College of Science and Technology embraces this mandate and extends additional opportunities to our students. Science and Technology students are encouraged to participate in faculty research projects and thus experience the advancement of this body of knowledge.

Bachelor of Science programs offer a greater concentration in major coursework, while Bachelor of Arts programs offer a greater variety of coursework. All programs offer undergraduates the opportunity to work with distinguished faculty and a richly-diverse and stimulating student body as they prepare for active roles in society.

Mission Statement

The mission of the College of Science and Technology is to seek academic excellence by providing outstanding instruction in the sciences, and to foster scientific research of the highest quality. In pursuing its mission the College is committed to meeting the needs of a diverse student body, and is truly dedicated to the founding principles of Temple University in providing a superior education to the prepared student. The educational mission of the College is pursued through offering a current curriculum that incorporates the fundamental principles as well as the latest discoveries in the major scientific disciplines.

Interdisciplinary degree programs and independent research projects allow the student to explore scientific boundaries. The College offers a general education curriculum that provides the opportunity for non-science majors to be better informed of the complex scientific and ethical issues facing society. The College also strives to improve science and mathematics education in the Philadelphia schools. All of these aspects of the educational mission of the College are achieved through the dedicated efforts of the faculty, who are leading scholars in their field.

The research mission of the College is pursued through a sustained effort to recruit the best and brightest new faculty, to aggressively develop promising research initiatives, and to create a modern science campus with facilities fully supportive of cutting-edge research. The College also strives to support the scholarly pursuits and professional activities of its faculty, who in turn advance their respective disciplines. In doing so, the College provides an outstanding environment for graduate and undergraduate research, with the Departments and Centers as focal points for interdisciplinary research initiatives and graduate degree programs. In pursuing its research mission the College of Science and Technology will be a vital participant in establishing Temple University as a recognized center of excellence in scientific research and development.

Admissions

See Undergraduate Admissions (p. 19) for more details.

Financial Aid / Scholarships

See Financial Aid: Scholarships & Grants (p. 137) for more details.

Special Programs

Study Abroad

See Education Abroad (p. 49) in the Opportunities section of this Bulletin and Temple University's Study Abroad web site at http://studyabroad.temple.edu/ for more information about study abroad options.
University Honors Program
Students in the College of Science and Technology may apply to the University Honors Program. Honors students are eligible to enroll in CST honors courses, provided that they have satisfied the prerequisites and co-requisites. Honors courses are designated with a nine as the second digit in the four-digit number, e.g. MATH 1941 is Honors Calculus I. See Academic Opportunities: University Honors Program (p. 51) for more information.

Undergraduate Research Program
Students in the College of Science and Technology may participate in real-world research experience with world-class scientists. Completing hands-on independent research is critical to the next step in a student's educational or professional career.

Science Scholars Program
The Science Scholars Program offers accomplished and motivated students additional research opportunities and mentorships.

TUteach Certification for Secondary Education
Eight Bachelor of Science programs enable students to prepare for secondary education certification while mastering the content of their field. The programs are: Biology with Teaching, Chemistry with Teaching, Earth and Space Science with Teaching, General Science with Teaching, Mathematics with Teaching, Mathematics and Computer Science with Teaching, Mathematics and Technology with Teaching, and Physics with Teaching. The programs require that students complete the collegial Bachelor of Science requirements and a total of 124 credits. See the TUteach Programs (p. 1162) for more details.

Accelerated Five-Year Bachelor's/Master's Programs with Teacher Certification
The Biology, Chemistry, Earth & Environmental Science, Mathematics, and Physics Departments enable talented students to complete both a Bachelor's degree in one of the above departments and a Master's degree in Education in a total of five years. After completing the Bachelor's degree in one of the aforementioned disciplines, students spend an additional year as a graduate student in the College of Education. Students must apply for the five-year Master's program during their sophomore year. If accepted, they will take both undergraduate major courses as well as Master's in Education courses beginning in their junior year. They complete their undergraduate major in their fourth year and their Master's in their fifth year. Students who complete this program earn a Master of Education degree and are certified to teach in Pennsylvania schools. See the College of Education (p. 393) for more details.

Early Admission to Professional Programs
Students in the College of Science and Technology who have been admitted to one of the following programs: Lewis Katz School of Medicine at Temple University, Temple University Kornberg School of Dentistry, Temple University School of Podiatry, Temple University School of Pharmacy, or the Doctorate of Physical Therapy, at the end of their third year and have completed 90 semester hours, including all course requirements for the major, College and University, may transfer their first year in professional study toward the completion of the credit requirements for the degree of Bachelor of Arts. Biology and Chemistry majors may also transfer approved courses in their first year of professional study toward the elective courses in their major.

Students in the College of Science and Technology who have been admitted to other health-related professional schools at the end of their third year with a cumulative GPA of at least 3.5 and who have completed 90 semester hours, including all course requirements of the major, College and University, may petition the dean for the transfer of their first year of professional study toward the completion of the credit requirements for the degree of Bachelor of Arts. University residency (p. 83) requirements must also be met.

Awards and Achievements
Awards
Juniors and seniors are often honored for outstanding performance in a variety of academic areas and for exceptional service to the College and the University. Information about these awards is available in departmental offices or in the Office of Student Services, 1810 Liacouras Walk, Room 203.

Distinction in Major
Many programs allow exceptional students to receive a Distinction in Major. Please see the Bulletin pages for the specific requirements for any particular major.

Phi Beta Kappa
See Honor Societies: Phi Beta Kappa (p. 57).
Student Associations

Majors' Associations

Many of the departments within the College of Science and Technology support student interest organizations known as Majors' Associations or Societies. Each department organization provides an opportunity for students to interact with faculty and other students who share similar interests. It is through these venues that students may influence course offerings, faculty recruitment, and departmental policy.

Pre-Professional Health Associations

Temple University has many pre-professional health organizations that may interest students in the College of Science and Technology. These organizations allow students to interact with others with similar professional interests and gain more knowledge about admissions requirements and examinations.

- American Medical Student Association
  https://temple.collegiatelink.net/organization/AMSA
- Alpha Epsilon Delta (AED) Health Pre-Professional Honor Society
  http://templeaed.weebly.com/index.html
- SNMA: Student National Medical Association

Student Contact
For information about the College of Science & Technology, please contact the Office of Student Services, 215-204-2890.

Contact information for academic programs can be found under the listing for each individual program.

Academic Policies & Regulations
Please see the Undergraduate Academic Policies (p. 81) in this Bulletin. Students are responsible for complying with all university-wide academic policies that apply to their individual academic status. Additional and unique policies, or exceptions for the College of Science and Technology (CST), appear below.

Academic Holds
Pre-Pharmacy
Pre-Pharmacy students who have completed 30 or more credits without declaring a major shall be placed on “academic hold” and directed to see a CST advisor before the priority registration period of the subsequent semester.

Program Warning
Any CST student who does not make satisfactory progress in the CST major or track may be placed on “academic hold” and directed to see a departmental or CST advisor before the priority registration period of the subsequent semester.

Undeclared
Students who have not declared a major who have completed 60 or more credits shall be placed on “academic hold” and directed to see a CST advisor before the priority registration period of the subsequent semester.

Adding or Changing Majors or Minors
See Change of Program below.

Backtracking
Students may not apply toward the degree program credit earned for a lower-level course, if the student has progressed two levels beyond the material being taught. For example, a student who has successfully completed PHYS 1062 Elementary Classical Physics II may not subsequently take PHYS 0847 How Things Work: The Physics of Everyday Life for degree credit. This rule applies to Math and Science courses, language courses, and other sequenced courses. Advanced students should consult with an advisor in the CST’s Office of Student Services before taking a lower-level course.

Change of Program (COP)

CST Students
In order to add or change majors or minors within the College of Science and Technology, a CST student must meet with an advisor in the CST’s Office of Student Services. The advisor will evaluate the student’s record in accordance with the following policy:

1. CST students in their first semester at Temple University who wish to add or change majors or minors within the CST will be automatically approved, provided they are taking, have satisfied or placed higher than a GenEd level or higher Mathematics course.

2. Continuing CST students who wish to add or change declared majors or minors within the CST must have a cumulative grade point average (GPA) of 2.00 or higher. Continuing CST students who wish to change their major to undeclared will be automatically approved, provided that the total of completed and registered credits is fewer than 60 credits.

3. CST students can complete a second major in the CST by fulfilling all requirements for the primary and second majors, including at least four distinct courses in the primary major and four distinct courses in the second major. Distinct courses are those that do not overlap to fulfill requirements in the other major.
Non-CST Students
To transfer into the College of Science and Technology (CST), a non-CST student must attend a Change of Program (COP) information session (http://cst.temple.edu/students/changing-your-major-or-minor). Prior to attending, the student’s record must be in accordance with the following policy:

1. Students in their first semester at Temple University who wish to transfer into CST will be automatically approved, provided that they are taking or have satisfied at least a GenEd level or higher Mathematics course.
2. Continuing students who wish to transfer into CST must have a cumulative grade point average (GPA) of 2.00 or higher and must have completed at least a GenEd level or higher Mathematics course and a GenEd level Science course (or additional GenEd level Mathematics) course, both with a grade of C (2.00) or better.

Once these parameters are met, the student then attends the Change of Program (COP) information session. In the COP, students receive information on the majors/minors offered in CST as well as resources available to students. Following the COP, students eligible to transfer into CST schedule an appointment to meet with an Academic Advisor. The advisor will go over program requirements and answer any additional questions.

Co-requisites and Prerequisites
Students may be de-enrolled from courses for which they do not meet prerequisites and co-requisites. (Please see the Prerequisites and Co-requisites (p. 99) policy for more information.) Students are responsible for reviewing and abiding by all course prerequisites and co-requisites in the Course Catalog (http://www.temple.edu/apply/common/catcheck.asp). The requirements are designed to assure that students are appropriately prepared to be successful in their courses. Prerequisites provide an efficient manner for students to register for the next course in a sequence for which they are prepared. Students who appropriately satisfy prerequisites are permitted to register for a first and second attempt. Completion of a prerequisite does not permit a student to enroll in the third attempt of a repeated course. Students may attempt a course for the third time only if they have received permission from the College, which is not guaranteed and may require additional coursework (See Repeat Policy below).

Course Eligibility
The College of Science and Technology offers four types of undergraduate courses:

1. Preparatory courses numbered 0700-0799: open to all students, including non-degree seeking students who have completed appropriate course prerequisites and have completed or are in the process of completing required co-requisite courses. If required, students must complete these courses before enrolling in any higher level courses in the same department.
2. General Education courses numbered 0800-0999: open to all students, including non-degree seeking students who have completed appropriate course prerequisites and have completed or are in the process of completing required co-requisite courses. These courses satisfy University General Education requirements as indicated in the course description.
3. Lower-Level courses numbered 1000-1999: open to all students, including non-degree seeking students who have completed appropriate course prerequisites and have completed or are in the process of completing required co-requisite courses. These are general foundation level courses in the various disciplines.
4. Upper-Level courses numbered 2000-4999: open to all students, including non-degree seeking students who have completed appropriate course prerequisites and have completed or are in the process of completing required co-requisite courses. These courses build on the foundation courses (and on other upper-level courses) to provide a focused exploration of field-specific content.
5. Graduate-Level courses numbered 5000-9999: undergraduate students are generally prohibited from taking Graduate-Level courses. In rare circumstances, special permission may be granted by the department for undergraduate students to take graduate courses.

Courses Inapplicable to Graduation
Semester hours earned in MATH 0701 or MATH 0702, lower-level military science (ROTC), and RCC-enhanced courses are not credited toward the minimum semester hours required for graduation.

Students will not be awarded duplicate credit for courses that are repeated in transfer or at Temple.

Students will not receive credit toward graduation for lower-level courses, which are two or more courses below either an already-completed course or their placement level. For example, if a student successfully completes MATH 1041 Calculus I, then they are not permitted to subsequently take MATH 1021 College Algebra for new credits.

A maximum of 8 semester hours of credit will be allowed by CST for life experience and CLEP examinations. A maximum of 4 courses or up to 12 semester hours will be allowed for upper-level Military Science (Army ROTC), Naval Science (Navy ROTC) or Aerospace Studies (Air Force ROTC) courses. A maximum of 12 total semester hours will be allowed for a combination of CLEP, Life Experience, and upper-level Military Science.

Courses Over Five Years Old
In admitting transfer or returning students, the College of Science and Technology will, when possible, allow credit for courses taken five or more years prior to the date of admission or re-enrollment. The College of Science and Technology may choose not to accept courses regardless of age for credit in the major. Foundation courses, courses of a technical nature or courses in a particularly dynamic field may not be accepted for credit.
Courses over five years old will be reviewed by the College to determine whether they will be accepted toward the degree. Final determination of the acceptability of such courses is the responsibility of the Office of Student Services and generally occurs after the student has matriculated or been rematriculated.

**Dean's List**

Each fall and spring semester, those undergraduates who have met the credit hour and academic criteria for their school or college are placed on the Dean's List. See the Dean's List (p. 92) policy for specific GPA and credit-hour requirements.

**Fly in 4**

Fly in 4 is a partnership between incoming freshmen and the university, potentially saving them thousands of dollars in debt. For more information on this program, see fly.temple.edu.

**Grading**

Major, Minor, and GenEd courses must be completed with a letter grade of C- or higher unless otherwise specified. Certain courses require a C or better in order to advance to the next level.

**Graduation Procedures**

All College of Science and Technology students are required to complete a graduation review with an advisor in the Office of Student Services prior to the start of their senior year. The graduation review involves a detailing of the courses and credits completed and those that remain to be completed for graduation. Students are expected to be active participants in the review and have equal responsibility for assuring the accuracy and completeness of the review.

Students must apply for graduation online via Self-Service Banner (SSB) early in the semester in which they will complete their degree requirements. For application deadlines, see the University's Undergraduate Graduation Procedures (p. 95).

**Life Experience Credits**

Students are required to write what proficiencies are developed by their life experience and designate courses similar to their background. The experience will be reviewed by the appropriate faculty. Students need a 2.5 minimum cumulative GPA in order to apply. A maximum of 12 semester hours is allowed for the combined category of life experience, upper-level military science (ROTC) courses, and CLEP/DSST examinations.

**Non-Traditional Credits**

A maximum of 12 semester hours of credit will be allowed by CST for life experience, upper-level military science (ROTC) courses, and CLEP/DSST examinations.

**Overload Requests**

Students in the College of Science and Technology must petition through the Office of Student Services for approval of an overload when they request to take more than 17 credits in either the fall or spring semesters or more than 8 credits in either summer session. The following items are considered when reviewing an overload petition:

- Minimum 2.75 GPA overall and in the last semester of graded coursework.
- The number of credits completed in previous semesters.
- The number of science and math courses taken previously in each semester.
- The amount of credits requested.
- The type of courses requested. The office focuses particularly on the number of science and math courses in the student's proposed roster.

Each petition will be reviewed individually based on the number of credits requested.

**Permission to Complete a Course(s) at Another Institution After Matriculation**

Students in the College of Science and Technology who wish to take courses at another institution after matriculation must petition the Office of Student Services for approval prior to enrolling in such a course. Petition forms are available at www.temple.edu/vpus/forms/index.htm. Students should first discuss their academic plans with their advisor. The student is then responsible for obtaining any needed course descriptions from the other institution and attaching it to the petition form. The student takes the petition to the corresponding Temple department for faculty review and then submits the petition to the Office of Student Services for final approval.

Courses taken without prior approval will not be transferrable toward the Temple degree. In addition, students must have completed the prerequisites and have completed or be completing any listed co-requisites of both the Temple equivalent course and course at the host institution.

Please see the University policy on Permission to Complete a Course at Another Institution after Matriculation (p. 98) for more information.
Placedment Tests

The results of placement tests determine if students are required to enroll in preparatory composition and mathematics courses. All incoming freshmen must take English and mathematics placement tests. Prior to taking the Placement tests, students are encouraged to review their English and mathematics work, and are particularly encouraged to use My Math Test (http://www.temple.edu/msrc/tutoring/MMT.asp) or ALEKS (http://www.temple.edu/msrc/tutoring/ALEKS.asp) as a refresher.

All CST transfer students are required to complete the math placement test, regardless of transfer credits. For students who have already completed their program’s mathematics requirement or the prerequisite requirement through transfer credits, the test will be used as a diagnostic tool. The test results will be informational only and will not restrict or dictate course selection nor negate the transferability of credits. The results of the placement exam should be discussed with an academic advisor at the time of the initial registration. Your advisor may suggest certain "bridge courses" that will assist you in preparing for more advanced coursework. Bridge courses build on content from courses for which you have received transfer credit, allow you to keep your credits, and support your preparation for the next course in your sequence.

If students are unsuccessful in courses beyond their placement results, they may be asked to repeat the prerequisite course at Temple regardless of transfer credits.

Transfer students who have not completed ENG 0802 are also required to take the English placement test. Students assigned to ENG 0701 or ENG 0711 must register each semester for that course until the requirement is completed. Only upon successful completion of ENG 0701 or ENG 0711 can such students enroll in ENG 0802 or ENG 0812.

Plagiarism and Academic Cheating

Plagiarism and academic cheating are prohibited by the College of Science and Technology. The development of independent thought and a respect for the thoughts of others is essential to intellectual growth. The prohibition of plagiarism and cheating is intended to foster this independence and respect. See the policy on Academic Honesty (p. 36) in this Bulletin.

The penalty for plagiarism or cheating as a first offense is normally an F in the course in which the offense is committed. In such cases, the instructor completes the Settlement of a Charge of Academic Dishonesty form and sends it to the Office of Student Services. The Office of Student Conduct and Community Standards generally adjudicates all cases and student appeals.

Pre-Pharmacy Track Students

Pre-Pharmacy track students must declare a primary major upon completion of 30 credits. Students who have completed 30 credits without declaring a primary major will have an academic hold placed on their record that will prevent them from registering. Students must meet with an advisor to declare a major in order to have the hold removed. All Pre-Pharmacy students should identify a “parallel” program of study in addition to indicating their intent to pursue Pharmacy School admission.

Prerequisites and Co-Requisites

Students may be de-enrolled from courses for which they do not meet prerequisites and co-requisites. (Please see the Prerequisites and Co-requisites (p. 99) policy for more information.) Students are responsible for reviewing and abiding by all course prerequisites and co-requisites in the Course Catalog (http://www.temple.edu/apply/common/catcheck.asp). The requirements are designed to assure that students are appropriately prepared to be successful in their courses. Prerequisites provide an efficient manner for students to register for the next course in a sequence for which they are prepared. Students who appropriately satisfy prerequisites are permitted to register for a first and second attempt. Completion of a prerequisite does not permit a student to enroll in the third attempt of a repeated course. Students may attempt a course for the third time only if they have received permission from the College, which is not guaranteed and may require additional coursework (See Repeat Policy below).

Program Performance

Students should maintain a 2.00 cumulative GPA in their major or track and make satisfactory progress towards their CST degrees. The Critical Path initiative has prompted the College to identify milestones in each major meant to guide students towards degree completion. Outreach efforts will be sent to students who have fallen off track based on their need to repeat courses or who have fallen below a 2.0 GPA within the College. Guidance will be offered to assist these students with making progress towards their degree and repairing their GPA.

Re-enrollment to the College of Science and Technology

College of Science and Technology students who have not enrolled for two consecutive semesters must submit a Request to Re-Enroll (http://www.temple.edu/vpus/documents/request_to_reenroll.pdf). Any existing holds must be cleared prior to re-enrollment and official transcripts provided for any college-level courses completed after leaving Temple University. Students who have been away for less than two semesters are subject to university policies and restrictions governing taking courses at another institution and must receive permission prior to enrollment in such courses. In addition, courses over five years old will be reviewed by the College to determine whether they will be accepted toward the degree. Final determination of the acceptability of such courses is the responsibility of the Office of Student Services and generally occurs after the student has been rematrículated.

The deadline for application to re-enroll for the fall semester is August 1; the deadline to re-enroll for the spring semester is December 1, and the deadline for summer semester I and II is April 1. Also see the policy on Academic Standing (http://policies.temple.edu/getdoc.asp?policy_no=02.10.11).
If the student's original curriculum is no longer available, students are required to follow the most current curriculum or choose another current curriculum, upon return. This applies to any student who has not registered for a single fall or spring semester. This can have significant impacts on degree progress and students are encouraged to discuss any planned absences with an advisor.

Full-time degree-seeking students have the option of pursuing a Leave of Absence for a period of no more than 2 semesters by submitting the Undergraduate Leave of Absence (http://www.temple.edu/vpus/documents/Undergraduate_Leave_Of_Absence_Petition.pdf) form. Please refer to the Leave of Absence Policy (http://policies.temple.edu/getdoc.asp?policy_no=02.10.16) for more information.

Repeating a Course
Students may attempt a course two times without restriction. Students in the College of Science & Technology are encouraged to meet with an advisor prior to attempting a course for the second time. A third attempt of any course is not guaranteed and requires permission of the student's home college. Petitions for a third attempt may require additional coursework, remediation, and/or academic/personal planning. Please refer to the University policy on Repeating a Course (p. 99) for further information.

Undeclared Majors
After completing 30 credits, undeclared majors in the College of Science and Technology will be notified that they need to select a major. Students who have completed 60 credits without declaring a major will have a hold placed on their record that will prevent them from registering. Students must meet with an advisor to declare a major in order to have the hold removed.

Warning, Probation and Dismissal
All University policies on warning, probation and dismissal are enforced with this addition: CST students who are put on Academic Warning or Probation should see an academic advisor to review their proposed schedule of courses. See the University's policy on Academic Standing (http://policies.temple.edu/getdoc.asp?policy_no=02.10.11) for more details.

General College Graduation Requirements
Requirements for the Bachelor of Science (B.S.) and the Bachelor of Arts (B.A.) Degrees
The College of Science and Technology offers two undergraduate degrees: a Bachelor of Arts (B.A.) and a Bachelor of Science (B.S.). The B.A. degree gives students a broad-based education, including the study of a foreign language. The B.S. degree is for those students who wish for more specialized training in their chosen disciplines.

Credit Hour Requirements
The College of Science and Technology requires that students complete a total of 123 credits for most programs. The TUteach programs (Biology with Teaching, Chemistry with Teaching, Earth & Space Science with Teaching, General Science with Teaching, Mathematics with Teaching, Mathematics and Computer Science with Teaching, Mathematics and Technology with Teaching, and Physics with Teaching) require students to complete a total of 124 credits. Of those totals, 90 credits must be in the College of Science and Technology or the College of Liberal Arts (CLA). A course shall count as a College of Science and Technology or College of Liberal Arts course if it is offered by a department or program in either of the respective colleges, or if it is in the department of Art History, or if it is taken to satisfy a major or minor requirement in the College of Science and Technology. Of those 90 credits, 45 must be in upper-level courses. Upper-level courses consist of course numbers at the 2000 level or above. Students receiving a Bachelor of Arts (as opposed to Bachelor of Science) degree must take at least two courses numbered 2000 or above in the College of Liberal Arts.

Courses Inapplicable to Graduation
Semester hours earned in MATH 0701, MATH 0702, lower-level military science (ROTC), and RCC-enhanced courses are not credited toward the minimum semester hours required for graduation.

Students will not be awarded duplicate credit for courses that are repeated in transfer or at Temple.

Students will not receive credit towards graduation for lower-level courses, which are two or more courses below either an already-completed course or their placement level. For example, if a student successfully completes MATH 1041 Calculus I, then they are not permitted to subsequently take MATH 1021 College Algebra for new credits.

A maximum of 8 semester hours of credit will be allowed by CST for life experience and CLEP examinations. A maximum of 4 courses or up to 12 semester hours will be allowed for upper-level Military Science (Army ROTC), Naval Science (Navy ROTC) or Aerospace Studies (Air Force ROTC) courses. A maximum of 12 total semester hours will be allowed for a combination of CLEP, Life Experience and upper-level Military Science (Army ROTC), Naval Science (Navy ROTC) or Aerospace Studies (Air Force ROTC) courses.

Grade Point Average (GPA) Requirement
The College of Science & Technology requires that students have a GPA of at least 2.00 overall and at least 2.00 in the courses applicable to their major and/or minor GPA.
**Residency Requirements**

Students who transfer into the College of Science and Technology must complete at least 45 of their last 60 semester hours of coursework at Temple. These credits must be applicable to their degree.

For Bachelor of Arts programs, 7 of the courses required for the major must be completed at Temple. For the Bachelor of Science programs that are within a single discipline, 9 of the courses required for the major must be completed at Temple. For the Bachelor of Science programs that are interdisciplinary, 10 of the courses required for the major must be completed at Temple.

In addition, half of the courses required in the department of the major must be taken at Temple. Please refer to degree programs for the specific number of major courses required.

**Bachelor of Science Requirements**

**General Education**

All students are required to complete the General Education (GenEd p. 143) requirements. The General Education curriculum consists of 25-26 s.h.

**Major**

Students must also complete the requirements of a departmental major. The minimum acceptable grade in a course taken to fulfill major requirements is a C- unless otherwise specified. Bachelor of Science majors are offered in the following programs:

- Applied Mathematics
- Biochemistry
- Biology
- Biology with Teaching
- Biophysics
- Chemistry
- Chemistry with Teaching
- Computer Science
- Earth and Space Science with Teaching
- Environmental Science
- General Science with Teaching
- Geology
- Information Science and Technology
- Mathematics
- Mathematics and Computer Science
- Mathematics and Physics
- Mathematics with Teaching
- Mathematics and Computer Science with Teaching
- Mathematics and Technology with Teaching
- Neuroscience - Cellular & Molecular
- Pharmaceutical Sciences
- Physics
- Physics with Teaching

**MINOR**

Students may also choose to complete the requirements for a minor. The minimum acceptable grade in a course taken to fulfill minor requirements is a C- unless otherwise specified. At least three of the courses credited towards the minor must be courses that were not credited towards the major or certificate. If the primary major is not within CST, the student should follow the policies of the home college regarding distinct courses. At least half of the courses taken by a student to fulfill the minor must be taken at Temple. Minors are available in the following programs:

- Biology
- Computer Science
- Digital Media Technologies (CIS/MSP)
- Geology
- Information Science and Technology
- Mathematics
• Physics

Certificate
Students may also choose to complete the requirements for a certificate. The minimum acceptable grade in a course taken to fulfill certificate requirements is a C- unless otherwise specified. At least two of the courses credited towards the certificate must be courses that were not credited towards the major or minor. If the primary major is not within CST, the student should follow the policies of the home college regarding distinct courses. At least half of the courses taken by a student to fulfill the certificate must be taken at Temple. Certificates are available in the following programs:
  • Computer Security & Digital Forensics
  • Fundamentals of Programming

Second Major
Students may complete a second major by fulfilling all requirements for the primary and second majors, including at least four distinct courses in the primary major and four distinct courses in the second major. If the primary major is not within CST, the student should follow the policies of the home college regarding distinct courses. General Education requirements must be satisfied in accordance with the requirements of the primary major. In instances of a double major, only one degree will be conferred.

Bachelor of Arts Requirements

General Education
All students are required to complete the General Education (GenEd (p. 143)) requirements. The General Education curriculum consists of 25-26 s.h.

Language Requirement
In addition to the University General Education requirement, Bachelor of Arts candidates must complete a second language requirement. B.A. degree candidates are required to successfully complete the second semester (typically courses numbered 1002) of a second language or demonstrate proficiency in a second language. Languages include: American Sign Language, Arabic, Chinese, French, German, Greek, Hebrew, Hindi, Italian, Japanese, Korean, Latin, Portuguese, Russian, Spanish, and Vietnamese.

Upper-level Distribution Requirements
Bachelor of Arts students must complete upper-level distribution requirements by taking two upper-level courses in one or more departments of the College of Liberal Arts or the department of Art History. Upper-level courses consist of course numbers at the 2000 level or above.

Students who have second majors, one of which is in the College of Liberal Arts or Art History, automatically satisfy the distribution requirement.

Major
Bachelor of Arts candidates must complete the requirements of a major. It is important to note that students enter the College of Science and Technology as Bachelor of Science majors. If students wish to change their degree choice to Bachelor of Arts, they must complete a declaration of major form in the Office of Student Services with an advisor. The minimum acceptable grade in a course taken to fulfill major requirements is a C- unless otherwise specified. B.A. majors are offered in the following programs:
  • Biology
  • Chemistry
  • Computer Science
  • Geology
  • Information Science and Technology
  • Mathematics
  • Mathematical Economics (MATH/ECON)
  • Natural Sciences
  • Physics

MINOR
Students may also choose to complete the requirements for a minor. The minimum acceptable grade in a course taken to fulfill minor requirements is a C- unless otherwise specified. At least three of the courses credited towards the minor must be courses that were not credited towards the major or certificate. If the primary major is not within CST, the student should follow the policies of the home college regarding distinct courses. At least half of the courses taken by a student to fulfill the minor must be taken at Temple. Minors are available in the following programs:
  • Biology
  • Computer Science
  • Digital Media Technologies (CIS/MSP)
• Geology
• Information Science and Technology
• Mathematics
• Physics

Certificate
Students may also choose to complete the requirements for a certificate. The minimum acceptable grade in a course taken to fulfill certificate requirements is a C- unless otherwise specified. At least two of the courses credited towards the certificate must be courses that were not credited towards the major or minor. If the primary major is not within CST, the student should follow the policies of the home college regarding distinct courses. At least half of the courses taken by a student to fulfill the certificate must be taken at Temple. Certificates are available in the following programs:
• Computer Security & Digital Forensics
• Fundamentals of Programming

Second Major
Students may complete a second major by fulfilling all requirements for the primary and second majors, including at least four distinct courses in the primary major and four distinct courses in the second major. General Education requirements must be satisfied in accordance with the requirements of the primary major. In instances of a double major, only one degree will be conferred.

Individual Program Requirements
Certain courses fulfill multiple requirements. In careful consultation with your advisor, you will be able to optimize curriculum choices.

The total number of hours required for the degree may vary based on initial placement exams, transfer evaluations, individual curriculum choices, and academic programs.

Listed under each degree program are the courses students must successfully complete to earn that particular B.A. or B.S. degree. These required courses are in addition to the General Education curriculum requirements.

Academic Advising

The Office of Student Services
1810 Liacouras Walk
Suite 203
215-204-2890
http://cst.temple.edu/
cstadv@temple.edu

The Office of Student Services in the College of Science and Technology guides students from New Student Orientation through graduation to assist them in ensuring that they complete all degree requirements and work to their fullest potential. Professional advisors (http://cst.temple.edu/students/advising-and-student-services/academic-advisors) help students plan courses, explore majors, research career opportunities, and understand Temple’s resources. Faculty advisors (http://cst.temple.edu/students/advising-and-student-services/faculty-advisors) in each major use their field experience and knowledge of departmental curriculum to help students choose courses consistent with their specific career objectives.

Specialized Services
• New Student Orientation: Group advising and registration appointments for all newly-admitted first-semester freshmen and transfer students.
• Advising and Registration Services: Students may want to meet with professional advisors at different times during their academic career to discuss their academic progress, develop educational and career goals, discover academic success strategies and check on their remaining graduation requirements. The express advising and advising-by-appointment schedule is available at http://cst.temple.edu/students/advising-and-student-services. Registration with an advisor is required for students with a cumulative, last semester attended or major/track GPA below 2.0 and for any students registering for more than 17 credits. Newly-admitted or readmitted students are also required to meet with an advisor for registration.
• Petition Processing: The Director and Assistant Director of Student Services review petitions on a rolling basis. Typical petition requests include those for a third registration for the same course, for an overload of credits, to complete a course at another institution after matriculation, for a leave of absence, for a withdrawal with an approved excuse, and for Exceptions to Policy.
• Progress Report: At 60 credits, students may schedule a progress report with their academic advisor to lay out a semester plan for completing the remaining requirements before graduation.
• Graduation Review: All College of Science and Technology students are required to complete a graduation review with an advisor in the Office of Student Services prior to the start of their senior year. The advisor will explain the remaining course and credit requirements needed to graduate. Students are expected to be active participants in the review and have equal responsibility for assuring the accuracy and completeness of the review.
Departmental Advising

After their New Student Orientation advising and registration session, students’ major departments will have access to their academic credentials for subsequent advising by faculty advisors. Faculty advising is very important in developing ties between a student’s academic program and his or her professional goals. Faculty advisors may assist students in finding research opportunities and professional internships and will help students choose courses that will best prepare them for their field of interest within a particular discipline. A list of Faculty Advisors (http://cst.temple.edu/students/advising-and-student-services/faculty-advisors) may be found on the CST web site.

Academic Advising and Student Responsibility

All academic advisors are trained to read and evaluate information carefully to give students the best possible advice. However, primary responsibility for curriculum completion rests with the student. Every student must be aware of the requirements of his or her degree and should collaborate with an advisor regularly to ensure timely completion of his or her program.

Student Advisors/Ombudspersons

Each department in the College of Science and Technology has a Student Advisor/Ombudsperson (SA/O) who is a qualified undergraduate student in that department. The SA/O is thoroughly familiar with requirements and curricula of the department and can competently advise fellow students on the courses and faculty members of the department. He or she also has information about career options for the department’s graduates. The SA/O also coordinates the student grievance procedure. A list of Student Advisors/Ombudspersons (http://cst.temple.edu/advising-and-student-services/student-ambassadors) is available on the CST web site. Each SA/O has an office in his or her department, and the SA/O program coordinator is located in the Office of Student Services.

Student Grievance Procedure

The SA/O is familiar with the College of Science and Technology Grievance Procedure and is the first person to consult in case of an academic grievance. The SA/O will serve as a student-faculty liaison and attempt to resolve the grievance through mediation. The College of Science and Technology grievance procedure (http://cst.temple.edu/students/advising-and-student-services/student-grievance-procedure) is available on the CST web site. A list of Student Advisors/Ombudspersons (http://cst.temple.edu/advising-and-student-services/student-ambassadors) is available on the CST web site.

Continuing Student Registration

Continuing student registration is the period during the fall and spring semesters when currently-enrolled students should register. Degree Audit Reports (DARS) provide a compact summary of a student’s progress toward a degree, including a list of requirements yet to be completed. Eligible students obtain their DARS documents via TUportal.

Prior to processing their registrations, freshmen are strongly recommended to meet with advisors to review their DARS documents and discuss course selections for the upcoming semester. New transfer students and continuing students in good academic standing are encouraged to meet with their departmental advisors before processing their schedules via Self-Service Banner. Students ineligible to use Self-Service Banner are required to meet with an advisor.

Pre-Professional Advising

Knowledge gained in the College of Science and Technology curricula provides the foundation needed in preparing for Professional Health School entrance exams. Many of the courses required by professional programs such as dentistry, medicine, pharmacy, and veterinary medicine are incorporated into College of Science and Technology curricula. This approach allows our students to fulfill degree requirements, while at the same time meeting admissions criteria for professional and graduate programs.

CST offers three ways in which students can pursue health professional programs.

- Students may complete a bachelor’s degree and apply to the health professional program.
- Students may apply to the 3+4 and 3+3 accelerated programs linked to particular Temple health professional programs by which they may complete both their bachelor and professional degree.
- Students may apply to the direct admit 3+4 pre-pharmacy & pharmacy program by which students would complete a Bachelor of Science in Pharmaceutical Sciences (BS-PS) and a Doctor of Pharmacy (PharmD).
- Students may apply to the 3+4 pre-pharmacy program by which students would only complete a Doctor of Pharmacy (PharmD).

Students interested in professional health programs should contact the Office of Pre-Professional Health Studies for detailed advising. The office is located in 1810 Liacouras Walk, Suite 100 and further information can be found at www.temple.edu/healthadvising. Applicants to professional health programs who are either pursuing a degree+professional program or the 3+professional program must complete a “Letter of Intent” with the Office of Pre-Professional Health Advising, preferably during their first semester but no later than the spring of their freshman year. Applicants to a Pharmacy program on a 3+4 track apply directly to the Pharmacy program. The curriculum and advising of these students is specifically tailored to fulfill the prerequisites set forth by the Temple University School of Pharmacy. Pre-pharmacy students must declare a major upon completion of 30 credits. All students should identify a “parallel” program of study in addition to indicating their intent to pursue a professional health program.
Faculty

Please go to the College of Science & Technology web site at cst.temple.edu and click on the individual department at the bottom of the page for a list of faculty in each department. See also https://directory.temple.edu/.

Abraham Abebe, Assistant Professor (Teaching/Instructional), Department of Mathematics, College of Science and Technology; Ph.D., University of North Carolina at Greensboro.

Ergin H. Ahmed, Assistant Professor (Research), Department of Physics, College of Science and Technology; Ph.D., Temple University.

Robert M. Aiken, Professor Emeritus, Department of Computer and Information Sciences, College of Science and Technology; Ph.D., Northwestern University.

Ola Ajaj, Assistant Professor (Teaching/Instructional), Department of Computer and Information Sciences, College of Science and Technology; Ph.D., Florida Atlantic University.

Shohreh Amini, Professor, Department of Biology, College of Science and Technology; Ph.D., University of Pennsylvania.

Edwin J. Anderson, Professor Emeritus, Department of Earth and Environmental Science, College of Science and Technology; Ph.D., Brown University.

Rodrigo B. Andrade, Associate Professor, Department of Chemistry, College of Science and Technology; Ph.D., Massachusetts Institute of Technology.

Eleni Anni, Associate Professor (Research), Department of Biology, College of Science and Technology.

Alla Arzumanyan, Assistant Professor (Teaching/Instructional), Department of Biology, College of Science and Technology; Ph.D., Yerevan State University.

Leonard B. Auerbach, Professor Emeritus, Department of Physics, College of Science and Technology; Ph.D., University of California Berkeley.

Jessica Babcock, Instructor (Teaching/Instructional), Department of Mathematics, College of Science and Technology; M.Ed., Temple University.

Darius Balcianas, Associate Professor, Department of Biology, College of Science and Technology; Ph.D., Uppsala University.

Jorune Balciuniene, Assistant Professor (Research), Department of Biology, College of Science and Technology; Ph.D., Uppsala University.

Michael Joseph Balsai, Assistant Professor (Teaching/Instructional), Department of Biology, College of Science and Technology; Ph.D., University of Pennsylvania.

Giora Baram, Associate Professor Emeritus, Department of Computer and Information Sciences, College of Science and Technology; Ph.D., University of Toledo.

Ershaad Basheer, Assistant Professor (Research), Department of Mathematics, College of Science and Technology; M.S., Jawaharlal Nehru Centre for Advanced Scientific Research.

Suman Batish, Assistant Professor (Teaching/Instructional), Department of Biology, College of Science and Technology; Ph.D., University of Cambridge.

Mary A. Beasten, Instructor (Teaching/Instructional), Department of Chemistry, College of Science and Technology; M.A., Temple University.

Richard Beigel, Professor, Department of Computer and Information Sciences, College of Science and Technology; Ph.D., Stanford University.

Gianfranco Bellipanni, Assistant Professor (Teaching/Instructional), Department of Biology, College of Science and Technology; Ph.D., University of Palermo.

Shiferaw S. Berhanu, Professor, Department of Mathematics, College of Science and Technology; Ph.D., Rutgers University.

Dorothy B. Berner, Professor Emeritus, Department of Biology, College of Science and Technology; Ph.D., University of Pennsylvania.

Md Zakirul Alam Bhuiyan, Assistant Professor (Research), Department of Computer and Information Sciences, College of Science and Technology.

Christopher J. Biehl, Instructor (Teaching/Instructional), Department of Computer and Information Sciences, College of Science and Technology; M.B.A., Temple University.

James L. Bloomer, Associate Professor Emeritus, Department of Chemistry, College of Science and Technology; Ph.D., University of London.

James D. Bloxton, Assistant Professor (Teaching/Instructional), Department of Chemistry, College of Science and Technology; Ph.D., Temple University.

Silvia Boffo, Assistant Professor (Research), Department of Biology, College of Science and Technology.
Vassil Boiadjiev, Assistant Professor (Teaching/Instructional), Department of Chemistry, College of Science and Technology; Ph.D., University of Wisconsin-Milwaukee.

Eric U. Borguet, Professor, Department of Chemistry, College of Science and Technology; Ph.D., University of Pennsylvania.

Elena Borovitskaya, Associate Professor (Teaching/Instructional), Department of Physics, College of Science and Technology; Ph.D., Institute of Applied Physics, Nizhni Novgorod, Russia.

Angela L. Bricker, Assistant Professor (Teaching/Instructional), Department of Biology, College of Science and Technology; Ph.D., University of Cambridge.

William S. Brinigar, Professor Emeritus, Department of Chemistry, College of Science and Technology; Ph.D., University of Kansas.

Theodore W. Burkhardt, Professor, Department of Physics, College of Science and Technology; Ph.D., Stanford University.

Ilya V. Buynevich, Assistant Professor, Department of Earth and Environmental Science, College of Science and Technology; Ph.D., Boston University.

Jeffrey Campbell, Assistant Professor (Teaching/Instructional), Department of Chemistry, College of Science and Technology; Ph.D., University of California Berkeley.

Vincenzo Carnevale, Assistant Professor (Research), Department of Biology, College of Science and Technology; Ph.D., International School for Advanced Studies, Trieste.

Frank N. Chang, Professor, Department of Biology, College of Science and Technology; Ph.D., University of Wisconsin.

Farzana Chaudhry, Assistant Professor (Teaching/Instructional), Department of Mathematics, College of Science and Technology; Ph.D., Oxford University.

Orin N. Chein, Professor Emeritus, Department of Mathematics, College of Science and Technology; Ph.D., New York University.

Steven M. Chemtob, Assistant Professor, Department of Earth and Environmental Science, College of Science and Technology; Ph.D., California Institute of Technology.

Hua Chen, Assistant Professor (Research), Department of Biology, College of Science and Technology; Ph.D., University of California Berkeley.

Je-Wei Chen, Assistant Professor (Teaching/Instructional), Department of Mathematics, College of Science and Technology; Ph.D., State University of New York Stony Brook.

Ke Chen, Assistant Professor, Department of Physics, College of Science and Technology; Ph.D., Chinese Academy of Sciences.

Paul Christner, Associate Professor (Teaching/Instructional), Department of Biology, College of Science and Technology; Ph.D., University of Pennsylvania.

Francis T. Christoph Jr., Associate Professor Emeritus, Department of Mathematics, College of Science and Technology; Ph.D., Rutgers University.

Bruce P. Conrad, Associate Professor Emeritus, Department of Mathematics, College of Science and Technology; Ph.D., University of California Berkeley.

Erik Cordes, Associate Professor, Department of Biology, College of Science and Technology; Ph.D., Pennsylvania State University.

Raymond F. Coughlin, Associate Professor, Department of Mathematics, College of Science and Technology; Ph.D., Illinois Institute of Technology.

Edward T. Crotty, Assistant Professor (Teaching/Instructional), Department of Computer and Information Sciences, College of Science and Technology.

Shumo Cui, Assistant Professor (Research), Department of Mathematics, College of Science and Technology.

Hai-Lung Dai, Professor, Department of Chemistry, College of Science and Technology; Ph.D., University of California Berkeley.

David R. Dalton, Professor, Department of Chemistry, College of Science and Technology; Ph.D., University of California Los Angeles.

Boris A. Datskovsky, Professor, Department of Mathematics, College of Science and Technology; Ph.D., Harvard University.

Alexandra Krull Davatzes, Assistant Professor, Department of Earth and Environmental Science, College of Science and Technology; Ph.D., Stanford University.

Nicholas Davatzes, Associate Professor, Department of Earth and Environmental Science, College of Science and Technology; Ph.D., Stanford University.

Bruce A. Davidson, Professor (Research), Department of Physics, College of Science and Technology.
Franklin A. Davis, Professor, Department of Chemistry, College of Science and Technology; Ph.D., Syracuse University.

Timothy S. Davis, Instructor (Teaching/Instructional), Department of Earth and Environmental Science, College of Science and Technology.

Nanjie Deng, Associate Professor (Research), Department of Chemistry, College of Science and Technology; Ph.D., Hyderabad University.

Louis F. Devicaris, Instructor (Teaching/Instructional), Department of Chemistry, College of Science and Technology; M.S., Villanova University.

Graham Dobereiner, Assistant Professor, Department of Chemistry, College of Science and Technology; Ph.D., Yale University.

Vasily Dolgushev, Professor, Department of Mathematics, College of Science and Technology; Ph.D., Massachusetts Institute of Technology.

Marilena Downing, Instructor (Teaching/Instructional), Department of Mathematics, College of Science and Technology; M.A., Temple University.

Eduard Dragut, Assistant Professor, Department of Computer and Information Sciences, College of Science and Technology; Ph.D., University of Illinois at Chicago.

Xiaojiang Du, Associate Professor, Department of Computer and Information Sciences, College of Science and Technology; Ph.D., University of Maryland College Park.

Leroy W. Dubeck, Professor Emeritus, Department of Physics, College of Science and Technology; Ph.D., Rutgers University.

Zbigniew Dziembowski, Associate Professor, Department of Physics, College of Science and Technology; Ph.D., Warsaw University.

Nina Edelman, Assistant Professor (Teaching/Instructional), Department of Mathematics, College of Science and Technology; M.A., University of Pennsylvania.

Khaled M. Elokely, Assistant Professor (Research), Department of Chemistry, College of Science and Technology.

Jennifer Emtage, Assistant Professor (Teaching/Instructional), Department of Biology, College of Science and Technology; Ph.D., Johns Hopkins University.

Ivan N. Erdelyi, Professor Emeritus, Department of Mathematics, College of Science and Technology; Ph.D., Victor Babes University of Cluj, Roumania.

Ananias A. Escalante, Professor, Department of Biology, College of Science and Technology; Ph.D., University of California Irvine.

Sarah R. Evangelista, Associate Professor Emeritus, Department of Mathematics, College of Science and Technology; M.A., Temple University.

Mark A. Feitelson, Professor, Department of Biology, College of Science and Technology; Ph.D., University of California Los Angeles.

Aleksey Filin, Assistant Professor (Research), Department of Chemistry, College of Science and Technology; Ph.D., Institute for Solid State Physics.

John Fiore, Instructor (Teaching/Instructional), Department of Computer and Information Sciences, College of Science and Technology; M.S., University of Pennsylvania.

Giacomo Fiorin, Assistant Professor (Research), Department of Biology, College of Science and Technology; Ph.D., International School for Advanced Studies, Trieste.

Steven Fleming, Professor (Teaching/Instructional), Department of Chemistry, College of Science and Technology; Ph.D., University of Wisconsin.

Natalie P. Flynn, Instructor (Teaching/Instructional), Department of Earth and Environmental Science, College of Science and Technology; M.A., Temple University.

Dieter Forster, Professor, Department of Physics, College of Science and Technology; Ph.D., Harvard University.

Jerrold Franklin, Professor Emeritus, Department of Physics, College of Science and Technology; Ph.D., University of Illinois.

Seema Freer, Associate Professor (Practice), Department of Biology, College of Science and Technology; Ph.D., Thomas Jefferson University.

Amy Freestone, Assistant Professor, Department of Biology, College of Science and Technology; Ph.D., University of California Davis.

Frank L. Friedman, Professor Emeritus, Department of Computer and Information Sciences, College of Science and Technology; Ph.D., Purdue University.

Ser-Wei Fu, Assistant Professor (Research), Department of Mathematics, College of Science and Technology; Ph.D., University of Illinois at Urbana-Champaign.

David Futer, Associate Professor, Department of Mathematics, College of Science and Technology; Ph.D., Stanford University.
Janos Galambos, Professor Emeritus, Department of Mathematics, College of Science and Technology; Ph.D., Eotvos University, Budapest, Hungary.

Leonard J. Garrett, Professor Emeritus, Department of Computer and Information Sciences, College of Science and Technology; Ph.D., University of Pennsylvania.

Edward T. Gawlinski, Associate Professor, Department of Physics, College of Science and Technology; Ph.D., Boston University.

Mohamed Ghalwash, Assistant Professor (Research), Department of Computer and Information Sciences, College of Science and Technology.

Jayakumar G. Gilbert, Assistant Professor (Teaching/Instructional), Department of Chemistry, College of Science and Technology; Ph.D., Drexel University.

Edward T. Gawlinski, Associate Professor, Department of Physics, College of Science and Technology; Ph.D., Boston University.

Mohamed Ghalwash, Assistant Professor (Research), Department of Computer and Information Sciences, College of Science and Technology.

Jayakumar G. Gilbert, Assistant Professor (Teaching/Instructional), Department of Chemistry, College of Science and Technology; Ph.D., Drexel University.

Jose Gimenez, Assistant Professor (Teaching/Instructional), Department of Mathematics, College of Science and Technology; B.S., Temple University.

Antonio Giordano, Professor, Department of Biology, College of Science and Technology; Ph.D., University of Trieste.

Antonio M. Goncalves, Professor Emeritus, Department of Chemistry, College of Science and Technology; Ph.D., University of Chicago.

Harry B. Gottlieb, Instructor (Teaching/Instructional), Department of Chemistry, College of Science and Technology; M.S., Villanova University.

Yury Grabovsky, Professor, Department of Mathematics, College of Science and Technology; Ph.D., New York University.

David E. Grandstaff, Professor, Department of Earth and Environmental Science, College of Science and Technology; Ph.D., Princeton University.

Alexander Gray, Assistant Professor, Department of Physics, College of Science and Technology; Ph.D., Lawrence Berkeley National Laboratory and University of California, Davis.

Edward R. Grubberg, Professor Emeritus, Department of Biology, College of Science and Technology; Ph.D., University of Illinois.

Yuhong Guo, Assistant Professor, Department of Computer and Information Sciences, College of Science and Technology; Ph.D., University of Alberta.

Cristian E. Gutiérrez, Professor, Department of Mathematics, College of Science and Technology; Ph.D., University of Buenos Aires.

Raymond Habas, Professor, Department of Biology, College of Science and Technology; Ph.D., State University of New York Stony Brook.

Seymour Haber, Professor Emeritus, Department of Mathematics, College of Science and Technology; Ph.D., Massachusetts Institute of Technology.

Peter Hagis Jr., Professor Emeritus, Department of Mathematics, College of Science and Technology; Ph.D., University of Pennsylvania.

Nahed Hamid, Instructor (Teaching/Instructional), Department of Mathematics, College of Science and Technology; M.S., Kean University.

Jun Han, Assistant Professor (Research), Department of Chemistry, College of Science and Technology; Ph.D., Texas A and M University.

Thommas E. Hanson, Professor Emeritus, Department of Biology, College of Science and Technology; Ph.D., Michigan State University.

William R. Harvey, Professor Emeritus, Department of Biology, College of Science and Technology; Ph.D., Harvard University.

Zameer U. Hasan, Professor, Department of Physics, College of Science and Technology; Ph.D., Australian National University, Canberra.

Stephen Blair Hedges, Professor, Department of Biology, College of Science and Technology; Ph.D., University of Maryland.

Meredith M. Hegg, Assistant Professor (Teaching/Instructional), Department of Mathematics, College of Science and Technology.

Emanuel B. Hey, Professor, Department of Biology, College of Science and Technology; Ph.D., State University of New York Stony Brook.

Omar Hijab, Professor, Department of Mathematics, College of Science and Technology; Ph.D., University of California Berkeley.

S. Robert Hiller, Professor Emeritus, Department of Biology, College of Science and Technology; Ph.D., Yale University.

David R. Hill, Professor, Department of Mathematics, College of Science and Technology; Ph.D., University of Pittsburgh.

David T. Hill, Assistant Professor (Teaching/Instructional), Department of Chemistry, College of Science and Technology; Ph.D., Temple University.

Ralph Hillman, Professor Emeritus, Department of Biology, College of Science and Technology; Ph.D., Yale University.

S. Tonia Hsieh, Assistant Professor, Department of Biology, College of Science and Technology; Ph.D., Harvard University.

Anthony Hughes, Associate Professor (Teaching/Instructional), Department of Computer and Information Sciences, College of Science and Technology; Ph.D., University of Illinois.
Maria Iavarone, Associate Professor, Department of Physics, College of Science and Technology; Ph.D., University of Napoli Federico II.

Giorgio P. Ingargiola, Associate Professor Emeritus, Department of Computer and Information Sciences, College of Science and Technology; Ph.D., University of Pennsylvania.

Robert L. Intemann, Professor Emeritus, Department of Physics, College of Science and Technology; Ph.D., Stevens Institute of Technology.

Susan A. Jansen-Varnum, Professor, Department of Chemistry, College of Science and Technology; Ph.D., University of Missouri-St. Louis.

Serge Jasmin, Assistant Professor (Teaching/Instructional), Department of Chemistry, College of Science and Technology; B.S., Temple University.

Bo Ji, Assistant Professor, Department of Computer and Information Sciences, College of Science and Technology; Ph.D., Ohio State University.

Kelli Shepard El Jones, Instructor (Teaching/Instructional), Department of Mathematics, College of Science and Technology.

Sunnie Joshi, Assistant Professor (Research), Department of Mathematics, College of Science and Technology; Ph.D., Texas A and M University.

Joseph Jupin, Instructor (Teaching/Instructional), Department of Computer and Information Sciences, College of Science and Technology.

Qing Kang, Assistant Professor (Research), Department of Chemistry, College of Science and Technology.

Krishna Kant, Professor, Department of Computer and Information Sciences, College of Science and Technology; Ph.D., University of Texas at Dallas.

James S. Karra, Associate Professor Emeritus, Department of Physics, College of Science and Technology; Ph.D., Rutgers University.

Gurpreet Kaur, Assistant Professor (Teaching/Instructional), Department of Biology, College of Science and Technology; Ph.D., Temple University.

Roy A. Keyer, Associate Professor (Teaching/Instructional), Department of Chemistry, College of Science and Technology; Ph.D., University of California Irvine.

Bojeong Kim, Assistant Professor, Department of Earth and Environmental Science, College of Science and Technology; Ph.D., Cornell University.

Isaac Klapper, Professor, Department of Mathematics, College of Science and Technology; Ph.D., New York University Courant Institute of Mathematical Sciences.

Michael L. Klein, Professor, Department of Chemistry, College of Science and Technology; Ph.D., University of Bristol.

Elliot B. Koffman, Professor Emeritus, Department of Computer and Information Sciences, College of Science and Technology; Ph.D., Case Western Reserve University.

Axel Kohlmeyer, Professor (Research), Department of Mathematics, College of Science and Technology.

James F. Korsh, Professor, Department of Computer and Information Sciences, College of Science and Technology; Ph.D., University of Pennsylvania.

Svetlana Kotochigova, Professor (Research), Department of Physics, College of Science and Technology; Ph.D., St. Petersburg State University.

V. Sankrithi Krishnan, Professor Emeritus, Department of Mathematics, College of Science and Technology.

Grant R. Krow, Professor Emeritus, Department of Chemistry, College of Science and Technology; Ph.D., Princeton University.

Rob J. Kulathinal, Assistant Professor, Department of Biology, College of Science and Technology; Ph.D., McMaster University.

Sudhir Kumar, Professor, Department of Biology, College of Science and Technology; Ph.D., Pennsylvania State University.

Eugene Kwatny, Professor, Department of Computer and Information Sciences, College of Science and Technology; Ph.D., Drexel University.

Sally Kyvernitis, Instructor (Teaching/Instructional), Department of Computer and Information Sciences, College of Science and Technology; M.S., Indiana University.

Mortimer M. Labes, Professor Emeritus, Department of Chemistry, College of Science and Technology; Ph.D., Massachusetts Institute of Technology.

Paul S. LaFollette Jr., Associate Professor, Department of Computer and Information Sciences, College of Science and Technology; M.D., Temple University.

Rolf Lakaemper, Associate Professor, Department of Computer and Information Sciences, College of Science and Technology; Ph.D., University of Hamburg.

Savio Laricchia, Assistant Professor (Research), Department of Physics, College of Science and Technology.
Sigurd Y. Larsen, Professor Emeritus, Department of Physics, College of Science and Technology; Ph.D., Columbia University.

Longin Jan Latecki, Professor, Department of Computer and Information Sciences, College of Science and Technology; Ph.D., University of Hamburg.

Michael Lawlor, Assistant Professor (Teaching/Instructional), Department of Chemistry, College of Science and Technology; Ph.D., Massachusetts Institute of Technology.

David Letkovitz, Professor Emeritus, Department of Computer and Information Sciences, College of Science and Technology; Ph.D., University of Pennsylvania.

Edward S. Letzter, Professor, Department of Mathematics, College of Science and Technology; Ph.D., University of Washington.

Robert J. Levis, Professor, Department of Chemistry, College of Science and Technology; Ph.D., Pennsylvania State University.

Ronald M. Levy, Professor, Department of Chemistry, College of Science and Technology; Ph.D., Harvard University.

Zhihai Li, Assistant Professor (Research), Department of Chemistry, College of Science and Technology; Ph.D., University of Aachen.

David A. Liberles, Associate Professor, Department of Biology, College of Science and Technology; Ph.D., California Institute of Technology.

Chyanlong Lin, Associate Professor, Department of Physics, College of Science and Technology; Ph.D., Temple University.

Haibin Ling, Associate Professor, Department of Computer and Information Sciences, College of Science and Technology; Ph.D., University of Maryland College Park.

Seymour Lipschutz, Professor Emeritus, Department of Mathematics, College of Science and Technology; Ph.D., New York University.

Maria E. Lorenz, Associate Professor (Teaching/Instructional), Department of Mathematics, College of Science and Technology; Ph.D., University of Southern California.

Martin W. Lorenz, Professor, Department of Mathematics, College of Science and Technology; Ph.D., Universität Giessen.

Sheryl L. Love, Assistant Professor (Teaching/Instructional), Department of Biology, College of Science and Technology; Ph.D., Temple University.

A. Marjatta Lyra, Professor, Department of Physics, College of Science and Technology; Ph.D., University of Stockholm.

Marcella Macaluso, Associate Professor (Research), Department of Biology, College of Science and Technology; Ph.D., University of Palermo.

Christopher M. MacDermaid, Assistant Professor (Research), Department of Chemistry, College of Science and Technology.

C. Jeffrey Martoff, Professor, Department of Physics, College of Science and Technology; Ph.D., University of California Berkeley.

Spiridoula Matsika, Professor, Department of Chemistry, College of Science and Technology; Ph.D., Ohio State University.

Kathleen E. Mc Kinley, Instructor (Practice), Department of Mathematics, College of Science and Technology; M.S., Saint Joseph's University.

Rose Marie McGinnis, Instructor (Teaching/Instructional), Department of Computer and Information Sciences, College of Science and Technology; M.B.A., Temple University.

Michelle Hedwig McGowan, Assistant Professor (Teaching/Instructional), Department of Biology, College of Science and Technology; Ph.D., Rutgers University.

George Mehler, Assistant Professor (Practice), Department of Mathematics, College of Science and Technology; Ph.D., Temple University.

Jatinder S. Mehta, Professor, Department of Mathematics, College of Science and Technology; Ph.D., University of Wisconsin.

Gerardo A. Mendoza, Professor, Department of Mathematics, College of Science and Technology; Ph.D., Massachusetts Institute of Technology.

Bernard Meth, Professor Emeritus, Department of Mathematics, College of Science and Technology; Ph.D., University of Pittsburgh.

Andreas Metz, Associate Professor, Department of Physics, College of Science and Technology; Ph.D., Institut Für Kernphysik Universität Mainz.

Zein-Eddine Meziani, Professor, Department of Physics, College of Science and Technology; Ph.D., Université de Paris XI.

Ted W. Mihalisin, Professor Emeritus, Department of Mathematics, College of Science and Technology; Ph.D., University of Rochester.

Richard L. Miller, Professor Emeritus, Department of Biology, College of Science and Technology; Ph.D., University of Chicago.

Irina Mitrea, Professor, Department of Mathematics, College of Science and Technology; Ph.D., University of Minnesota.
Sayaka Miura, Assistant Professor (Research), Department of Biology, College of Science and Technology; Ph.D., Pennsylvania State University.

Shahram Mohrekesh, Assistant Professor (Teaching/Instructional), Department of Computer and Information Sciences, College of Science and Technology.

Karl Morris, Assistant Professor (Teaching/Instructional), Department of Computer and Information Sciences, College of Science and Technology; Ph.D., Florida International University.

Michael I. Mote, Professor Emeritus, Department of Biology, College of Science and Technology; Ph.D., University of California Los Angeles.

Sudipto Mukherjee, Assistant Professor (Research), Department of Chemistry, College of Science and Technology.

Atsuhiro Muto, Assistant Professor, Department of Earth and Environmental Science, College of Science and Technology.

George H. Myer, Professor Emeritus, Department of Earth and Environmental Science, College of Science and Technology; Ph.D., Yale University.

James Napolitano, Professor, Department of Physics, College of Science and Technology; Ph.D., Stanford University.

William D. Nathan, Professor Emeritus, Department of Mathematics, College of Science and Technology; Ph.D., Syracuse University.

Stuart E. Neff, Professor Emeritus, Department of Biology, College of Science and Technology; Ph.D., Cornell University.

Donald E. Neville, Professor Emeritus, Department of Physics, College of Science and Technology; Ph.D., University of Chicago.

Matthew Newby, Assistant Professor (Teaching/Instructional), Department of Physics, College of Science and Technology.

Allen W. Nicholson, Professor, Department of Biology, College of Science and Technology; Ph.D., University of Pennsylvania.

Rhonda H. Nicholson, Assistant Professor (Teaching/Instructional), Department of Biology, College of Science and Technology; Ph.D., Wayne State University.

John Noel, Assistant Professor (Research), Department of Physics, College of Science and Technology; Ph.D., Texas A and M University.

John T. Nosek, Professor, Department of Computer and Information Sciences, College of Science and Technology; Ph.D., Temple University.

Jonathan Nyquist, Professor, Department of Earth and Environmental Science, College of Science and Technology; Ph.D., University of Wisconsin.

Zoran Obradovic, Professor, Department of Computer and Information Sciences, College of Science and Technology; Ph.D., Pennsylvania State University.

Johanan Odhner, Assistant Professor (Research), Department of Chemistry, College of Science and Technology.

Elmer L. Offenbacher, Professor Emeritus, Department of Physics, College of Science and Technology; Ph.D., University of Pennsylvania.

Michael Opferman, Assistant Professor (Teaching/Instructional), Department of Physics, College of Science and Technology.

Charles Osborne, Assistant Professor (Teaching/Instructional), Department of Mathematics, College of Science and Technology; Ph.D., Temple University.

Maria A. Pacheco, Assistant Professor (Research), Department of Biology, College of Science and Technology.

Karen B. Palter, Associate Professor, Department of Biology, College of Science and Technology; Ph.D., Princeton University.

Ellen Panofsky, Assistant Professor (Teaching/Instructional), Department of Mathematics, College of Science and Technology; Ph.D., Lehigh University.

Michael Paolone, Assistant Professor (Research), Department of Physics, College of Science and Technology; Ph.D., University of South Carolina Columbia.

Christopher Pascucci, Instructor (Teaching/Instructional), Department of Computer and Information Sciences, College of Science and Technology; M.S., University of Pennsylvania.

Eli A. Passow, Professor Emeritus, Department of Mathematics, College of Science and Technology; Ph.D., Yeshiva University.

Susan Patterson, Associate Professor, Department of Biology, College of Science and Technology; Ph.D., University of Washington.

John A. Paulos, Professor, Department of Mathematics, College of Science and Technology; Ph.D., University of Wisconsin.

Haowei Peng, Assistant Professor (Research), Department of Physics, College of Science and Technology.
John P. Perdew, Professor, Department of Physics, College of Science and Technology; Ph.D., Cornell University.

Isaak Pesenson, Professor (Teaching/Instructional), Department of Mathematics, College of Science and Technology; Ph.D., Academy of Science of the ASSR.

Hala O. Pflugfelder, Professor Emeritus, Department of Mathematics, College of Science and Technology; Ph.D., Albert-Ludwigs-Universität Freiburg im Breisgau.

Claudia Pine-Simon, Instructor (Teaching/Instructional), Department of Computer and Information Sciences, College of Science and Technology; M.S., University of Pennsylvania.

Alexander Platt, Assistant Professor (Research), Department of Biology, College of Science and Technology; Ph.D., Harvard University.

Arthur T. Poe, Professor Emeritus, Department of Computer and Information Sciences, College of Science and Technology; Ph.D., University of Illinois at Urbana-Champaign.

Sergei L. Kosakovsky Pond, Professor, Department of Science and Technology.

Andrew Price, Associate Professor (Teaching/Instructional), Department of Chemistry, College of Science and Technology; Ph.D., Purdue University.

Sean Gillian Queisser, Assistant Professor, Department of Mathematics, College of Science and Technology.

K. Raghunandan, Professor Emeritus, Department of Mathematics, College of Science and Technology; Ph.D., Colorado State University.

Daniele Ramella, Assistant Professor (Teaching/Instructional), Department of Chemistry, College of Science and Technology.

Yi Rao, Assistant Professor (Research), Department of Chemistry, College of Science and Technology; Ph.D., Institute of Chemistry, Chinese Academy of Sciences.

Harry P. Rappaport, Professor Emeritus, Department of Biology, College of Science and Technology; Ph.D., Yale University.

Robert Rang, Assistant Professor (Teaching/Instructional), Department of Chemistry, College of Science and Technology; Ph.D., University of Michigan.

Sujith Ravi, Assistant Professor, Department of Earth and Environmental Science, College of Science and Technology; Ph.D., University of Virginia.

Louis Raymon, Professor Emeritus, Department of Mathematics, College of Science and Technology; Ph.D., Yeshiva University.

Daniel Reich, Professor Emeritus, Department of Mathematics, College of Science and Technology; Ph.D., Princeton University.

Brian Rider, Professor, Department of Mathematics, College of Science and Technology; Ph.D., New York University Courant Institute of Mathematical Sciences.

Peter S. Riseborough, Professor, Department of Physics, College of Science and Technology; Ph.D., Imperial College London.

Igor Rivin, Professor, Department of Mathematics, College of Science and Technology; Ph.D., Princeton University.

Flavio Rizzolio, Assistant Professor (Research), Department of Biology, College of Science and Technology; Ph.D., University of Pavia.

Shepherd K. Roberts, Professor Emeritus, Department of Biology, College of Science and Technology; Ph.D., Princeton University.

Dmitri Romanov, Professor (Research), Department of Physics, College of Science and Technology; Ph.D., Novosibirsk Institute of Semiconductor Physics, USSR Academy of Sciences.

Charles W. Ross, Associate Professor (Teaching/Instructional), Department of Chemistry, College of Science and Technology.

Adele Ruosi, Associate Professor (Research), Department of Physics, College of Science and Technology.

Prakash C. Rushi, Instructor (Teaching/Instructional), Department of Mathematics, College of Science and Technology; M.Ed., Temple University.

Adrienn Ruzsinszky Perdew, Assistant Professor, Department of Physics, College of Science and Technology; Ph.D., Budapest University of Technology and Economics.

Douglas T. Saladik, Associate Professor (Teaching/Instructional), Department of Biology, College of Science and Technology; Ph.D., Temple University.

Robert E. Salomon, Professor Emeritus, Department of Chemistry, College of Science and Technology; Ph.D., University of Oregon.

Robert W. Sanders, Professor, Department of Biology, College of Science and Technology; Ph.D., University of Georgia.

Christian E. Schafmeister, Professor, Department of Chemistry, College of Science and Technology; Ph.D., University of California San Francisco.
John J. Schiller, Associate Professor, Department of Mathematics, College of Science and Technology; Ph.D., University of Pennsylvania.

William F. Schmitt, Professor Emeritus, Department of Computer and Information Sciences, College of Science and Technology; Ph.D., University of Pennsylvania.

Robert L. Sears, Professor Emeritus, Department of Biology, College of Science and Technology; Ph.D., University of California Berkeley.

Benjamin Seibold, Assistant Professor, Department of Mathematics, College of Science and Technology; Ph.D., University of Kaiserslautern.

Arun Sethuraman, Assistant Professor (Research), Department of Biology, College of Science and Technology; Ph.D., Iowa State University.

Cinzia Sevignani, Assistant Professor (Teaching/Instructional), Department of Biology, College of Science and Technology; Ph.D., University of Modena.

Brent Sewall, Assistant Professor, Department of Biology, College of Science and Technology; Ph.D., University of California Davis.

Yunfeng Shan, Department of Biology, College of Science and Technology.

Joel B. Sheffield, Professor, Department of Biology, College of Science and Technology; Ph.D., University of Chicago.

Yuan Justin Shi, Associate Professor, Department of Computer and Information Sciences, College of Science and Technology; Ph.D., University of Pennsylvania.

Scott M. Sieburth, Professor, Department of Chemistry, College of Science and Technology; Ph.D., Harvard University.

Jeremy Sivek, Assistant Professor (Teaching/Instructional), Department of Mathematics, College of Science and Technology; Ph.D., University of Pittsburgh.

Jonathan Smith, Associate Professor (Teaching/Instructional), Department of Chemistry, College of Science and Technology; Ph.D., Wesleyan University.

Gregory S. Smutzer, Associate Professor (Teaching/Instructional), Department of Biology, College of Science and Technology; Ph.D., State University of New York at Buffalo.

Daniel D. Spaeth, Assistant Professor (Teaching/Instructional), Department of Biology, College of Science and Technology; Ph.D., Temple University.

Francis C. Spano, Professor, Department of Chemistry, College of Science and Technology; Ph.D., Princeton University.

Nikolaos Sparveris, Assistant Professor, Department of Physics, College of Science and Technology; Ph.D., University of Athens.

Rachel Spigler, Assistant Professor, Department of Biology, College of Science and Technology; Ph.D., University of Georgia.

Avinash Srinivasan, Assistant Professor (Teaching/Instructional), Department of Computer and Information Sciences, College of Science and Technology; Ph.D., Florida Atlantic University.

Ranganatha Srinivasan, Professor, Department of Mathematics, College of Science and Technology; Ph.D., Wayne State University.

Robert J. Stanley, Professor, Department of Chemistry, College of Science and Technology; Ph.D., Pennsylvania State University.

Leon Steinberg, Professor Emeritus, Department of Mathematics, College of Science and Technology; Ph.D., University of Pennsylvania.

Matthew Stover, Assistant Professor, Department of Mathematics, College of Science and Technology; Ph.D., University of Texas at Austin.

Daniel R. Strongin, Professor, Department of Chemistry, College of Science and Technology; Ph.D., University of California Berkeley.

Deborah Stull, Assistant Professor (Teaching/Instructional), Department of Biology, College of Science and Technology; Ph.D., Yale University.

Jianwei Sun, Assistant Professor (Research), Department of Physics, College of Science and Technology; Ph.D., Tulane University.

Yugang Sun, Associate Professor, Department of Chemistry, College of Science and Technology; Ph.D., University of Science and Technology of China.

Bernd Surrow, Associate Professor, Department of Physics, College of Science and Technology; Ph.D., University of Hamburg.

Daniel B. Szyld, Professor, Department of Mathematics, College of Science and Technology; Ph.D., New York University.

Raza A. Tahir-Kheli, Professor Emeritus, Department of Physics, College of Science and Technology; Ph.D., Oxford University.

Stephen T. Takats, Professor Emeritus, Department of Biology, College of Science and Technology; Ph.D., University of Wisconsin-Madison.
Chiu Chiang Tan, Assistant Professor, Department of Computer and Information Sciences, College of Science and Technology; Ph.D., College of William and Mary.

Jacqueline C. Tanaka, Associate Professor, Department of Biology, College of Science and Technology; Ph.D., University of Illinois.

Hong Tang, Assistant Professor (Research), Department of Physics, College of Science and Technology; Ph.D., Northwestern Polytechnical University.

Rongjia Tao, Professor, Department of Physics, College of Science and Technology; Ph.D., Columbia University.

Dennis O. Terry Jr., Associate Professor, Department of Earth and Environmental Science, College of Science and Technology; Ph.D., University of Nebraska.

Allan E. Thomas, Assistant Professor (Teaching/Instructional), Department of Chemistry, College of Science and Technology; Ph.D., Temple University.

H. Frank Thornton, Associate Professor Emeritus, Department of Mathematics, College of Science and Technology; M.A., Princeton University.

Laura Toran, Professor, Department of Earth and Environmental Science, College of Science and Technology; Ph.D., University of Wisconsin.

Darius H. Torchinsky, Assistant Professor, Department of Physics, College of Science and Technology; Ph.D., Massachusetts Institute of Technology.

Georgia Triantafillou, Professor, Department of Mathematics, College of Science and Technology; Ph.D., University of Bonn, Germany.

Tsvetelin D. Tsankov, Assistant Professor (Teaching/Instructional), Department of Physics, College of Science and Technology; Ph.D., Drexel University.

Allison Tumarkin-Deratzian, Associate Professor (Teaching/Instructional), Department of Earth and Environmental Science, College of Science and Technology; Ph.D., University of Pennsylvania.

Gene C. Ulmer, Professor Emeritus, Department of Earth and Environmental Science, College of Science and Technology; Ph.D., Pennsylvania State University.

Wendy Urban, Instructor (Teaching/Instructional), Department of Computer and Information Sciences, College of Science and Technology; M.B.A., Temple University.

Shivaiah Vaddypally, Assistant Professor (Research), Department of Chemistry, College of Science and Technology; Ph.D., Hyderabad University.

Ann M. Valentine, Associate Professor, Department of Chemistry, College of Science and Technology; Ph.D., Massachusetts Institute of Technology.

Elena Ya Vishik, Assistant Professor (Teaching/Instructional), Department of Mathematics, College of Science and Technology; Ph.D., Moscow Pedagogical Institute.

Vladimir Visnjic, Assistant Professor (Teaching/Instructional), Department of Mathematics, College of Science and Technology; Ph.D., University of Bonn, Germany.

Evelyn Vleck, Instructor (Teaching/Instructional), Department of Biology, College of Science and Technology; M.A., William Paterson College.

Vincent Voelz, Assistant Professor, Department of Chemistry, College of Science and Technology; Ph.D., University of California San Francisco.

Slobodan Vucetic, Associate Professor, Department of Computer and Information Sciences, College of Science and Technology; Ph.D., Washington State University.

Doreen Wald, Instructor (Teaching/Instructional), Department of Mathematics, College of Science and Technology; M.Ed., Temple University.

Chelsea Walton, Assistant Professor, Department of Mathematics, College of Science and Technology.

Anduo Wang, Assistant Professor, Department of Computer and Information Sciences, College of Science and Technology.

Charles Wang, Associate Professor (Teaching/Instructional), Department of Computer and Information Sciences, College of Science and Technology.

Pei Wang, Associate Professor (Teaching/Instructional), Department of Computer and Information Sciences, College of Science and Technology; Ph.D., Indiana University.

Richard B. Waring, Associate Professor, Department of Biology, College of Science and Technology; Ph.D., Essex University.

Stephen S. Washburne, Associate Professor Emeritus, Department of Chemistry, College of Science and Technology; Ph.D., Massachusetts Institute of Technology.
Patrick Waters, Assistant Professor (Research), Department of Mathematics, College of Science and Technology.

Bradford B. Wayland, Professor, Department of Chemistry, College of Science and Technology; Ph.D., University of Illinois.

Weerasinghe Arachchige Kushan Weerasinghe, Instructor (Research), Department of Chemistry, College of Science and Technology.

Robert B. Weinberg, Professor Emeritus, Department of Physics, College of Science and Technology; Ph.D., Columbia University.

Richard C. Weisenberg, Professor Emeritus, Department of Biology, College of Science and Technology; Ph.D., University of Chicago.

Sarah Wengenroth, Assistant Professor, Department of Chemistry, College of Science and Technology; Ph.D., Duke University.

Vladimira V. Wilent, Assistant Professor (Teaching/Instructional), Department of Chemistry, College of Science and Technology; Ph.D., University of Pennsylvania.

Michael Wilhelm, Assistant Professor (Research), Department of Chemistry, College of Science and Technology; Ph.D., University of Pennsylvania.

Katherine A. Willets, Associate Professor, Department of Chemistry, College of Science and Technology.

John R. Williams, Professor Emeritus, Department of Chemistry, College of Science and Technology; Ph.D., University of Western Australia.

Matthaeus Wolak, Assistant Professor (Research), Department of Physics, College of Science and Technology.

Paul Wolfgang, Instructor (Teaching/Instructional), Department of Computer and Information Sciences, College of Science and Technology; B.S.E.E., University of Pennsylvania.

Jie Wu, Professor, Department of Computer and Information Sciences, College of Science and Technology; Ph.D., Florida Atlantic University.

Wei Wu, Assistant Professor (Teaching/Instructional), Department of Mathematics, College of Science and Technology; Ph.D., University of Leuven.

Xifan Wu, Assistant Professor, Department of Physics, College of Science and Technology; Ph.D., Rutgers University.

William Wuest, Assistant Professor, Department of Chemistry, College of Science and Technology; Ph.D., University of Pennsylvania.

Stephanie L. Wunder, Professor, Department of Chemistry, College of Science and Technology; Ph.D., University of Massachusetts.

Xiaoxing Xi, Professor, Department of Physics, College of Science and Technology; Ph.D., Peking University and Institute of Physics.

Junchao Xia, Associate Professor (Research), Department of Physics, College of Science and Technology.

Xiaojun Xu, Assistant Professor (Research), Department of Physics, College of Science and Technology; Ph.D., Chinese Academy of Sciences.

Wei-Shih Yang, Professor, Department of Mathematics, College of Science and Technology; Ph.D., Cornell University.

Weidong Yang, Associate Professor, Department of Biology, College of Science and Technology; Ph.D., Fudan University.

Zenghui Yang, Assistant Professor (Research), Department of Physics, College of Science and Technology.

Alexander P. Yates, Associate Professor, Department of Computer and Information Sciences, College of Science and Technology; Ph.D., University of Washington.

Jingjie Yu, Assistant Professor (Research), Department of Biology, College of Science and Technology.

Liping Yu, Assistant Professor (Research), Department of Physics, College of Science and Technology.

Tan Yuen, Associate Professor, Department of Physics, College of Science and Technology; Ph.D., Temple University.

Michael J. Zdilla, Assistant Professor, Department of Chemistry, College of Science and Technology; Ph.D., Princeton University.

Qiang Zeng, Assistant Professor, Department of Computer and Information Sciences, College of Science and Technology.

Bin Zhang, Assistant Professor (Research), Department of Physics, College of Science and Technology; Ph.D., University of Pittsburgh.

Dong Zhou, Assistant Professor (Research), Department of Mathematics, College of Science and Technology; Ph.D., Temple University.

David E. Zitarelli, Professor Emeritus, Department of Mathematics, College of Science and Technology; Ph.D., Pennsylvania State University.

Matthew Zumbrum, Assistant Professor (Research), Department of Mathematics, College of Science and Technology; Ph.D., University of Delaware.
Accelerated Programs

The College of Science and Technology has a variety of accelerated programs in partnership with professional and graduate programs.

1. Temple Professional School Programs (Lewis Katz School of Medicine at Temple University, Temple University Kornberg School of Dentistry, Temple University School of Podiatry, Temple University School of Pharmacy) agree to cooperate in providing an accelerated 3 + 4 undergraduate/professional school education leading to a Bachelor of Arts degree in the College of Science and Technology and a Doctorate degree from the Professional School. Also, the College of Science and Technology and the Temple University College of Public Health agree to cooperate in providing an accelerated 3 + 3 undergraduate/graduate education leading to a Bachelor of Arts degree in the College of Science and Technology and a Doctorate of Physical Therapy in the College of Public Health. The joint programs will each consist of a minimum of 90 semester hours of undergraduate coursework toward completion of a Bachelor of Arts degree in the College of Science and Technology at Temple University and the regular curriculum in the professional program.

2. Many departments in the College of Science and Technology cooperate in providing an accelerated 4 + 1 undergraduate/graduate education leading to a Bachelor of Arts or Science degree in the College of Science and Technology as well as a Masters of Arts or Science degree from the Graduate School.

3. Temple's College of Education cooperates in providing a 4 + 1 undergraduate/graduate education leading to a Bachelor of Arts or Science degree in the College of Science and Technology as well as a Masters of Education degree from the College of Education.

Below are the links to more specific details on the agreements with Temple's Graduate and Professional Schools:

Programs

Five-Year Master's Program

Five-Year B.A./M.A.

Chemistry majors at the beginning of their junior year may apply for admission to the fifth-year M.A. Program. Upon admission to the program and satisfactory completion of the program requirements, the student is assured of having a master's degree at the end of the fifth year. Interested students should contact their advisor for details. For more information, see the following program pages: Chemistry B.A. (p. 1087) and Chemistry M.A. (http://bulletin.temple.edu/graduate/scd/cst/chemistry-ma)

FIVE-YEAR MASTER'S PROGRAM

B.A. in Computer Science / M.S. in Computer Science

High achieving Computer Science majors with at least 5 semesters at Temple are qualified to apply to the Five Year Master's Program.

- Students may apply to the Five Year Program after completing a progress review in CST advising, meeting with the Faculty advisor, and registering for their sixth term. These must be completed before their Senior year. They are admitted before their Senior year. In addition to having a GPA of 3.5 or higher, students must be able to complete at least 99 credits (including CIS 3207 and CIS 3223) before the start of their Senior year. Please note that many of our graduate CS electives expect a background in networking and math (e.g., Calculus III, Linear Algebra Statistics), so students should select their undergraduate courses appropriately.
- During their Senior year, students take 24 credits, 9 credits of which are graduate. These 9 graduate credits count three ways: (a) as general undergraduate credit, (b) as upper level undergraduate CS elective credit, (c) as graduate credit.
- After their Senior year, students receive their undergraduate degree, then are formally admitted to the graduate program (with 9 graduate credits already completed).
- During their fifth year, students take an additional 21 graduate credits and graduate with a Master's degree.
Interested students should contact their advisor for details. For more information, see the following program pages: Computer Science B.A. (p. 1097) and Computer Science M.S. (http://bulletin.temple.edu/graduate/scd/cst/computer-science-ms) and the CIS Department’s Graduate Page (http://temple.edu/cis/graduate) (includes link to application).

Dental, 3+N Program

College of Science and Technology
Students must meet the admissions requirements ([http://dentistry.temple.edu/admissions/requirements](http://dentistry.temple.edu/admissions/requirements)) for early admission to the Temple University Kornberg School of Dentistry. If you are applying to other dental schools, please use the web to find admissions requirements.

**Guidelines for Completion of the Bachelor of Arts Degree in the College of Science & Technology**

- Bachelor of Arts candidates in the College of Science and Technology (CST) must complete all requirements for the major before entering the School of Dentistry with the exception of the following:
  1. Biology majors may count up to three of the following first year School of Dentistry courses as Biology electives:
     - DENT D277 Physiology so long as the student has not previously earned credit for BIOL 3334;
     - DENT D100 Biochemistry so long as the student has not previously earned credit for BIOL 4375;
     - DENT D101 General & Oral Histology so long as the student has not previously earned credit for BIOL 2235;
     - DENT D202 Gross Anatomy so long as the student has not previously earned credit for BIOL 2233.
  2. Chemistry majors may count the following first year School of Dentistry course as a Chemistry elective:
     - DENT D100 Biochemistry so long as the student has not previously earned credit for BIOL 4375/ CHEM 4401.

- College of Science and Technology students may count up to 33 equivalent credit hours from the first year at the School of Dentistry as equivalents of upper-level credits in the College of Science and Technology or the College of Liberal Arts.
- College of Science and Technology students may count up to 33 equivalent credit hours from the first year at the School of Dentistry to fulfill their general credit hour requirements for the Bachelor of Arts degree in the College of Science and Technology.
- Appropriate course sequences for majors offered by the College of Science and Technology will be available in the Office of Student Services (1810 Liacouras Walk, Suite 203) or Pre-Professional Health Studies (1810 Liacouras Walk, Suite 100) and will be shared with prospective and current students.

**Suggested Academic Plan for CST + Dental School 3+4 Program**

Below is a suggested academic plan. Individual plans will vary based on previous course work, AP credits, performance on University placement tests, and specific undergraduate major. Students who qualify for the 3+4 program will develop an individual academic plan with the Pre-Professional Health Studies during their first semester at the University.

**First Year - Dental School**

Approximately 34 credits of course work completed during the first year of Dental School will be applied to the CST major's total number of earned hours needed for the completion of the degree requirements for graduation. For some majors, course work will count as elective hours in the major; for all others, course work counts as elective hours toward the completion of the minimum of 123 credits for the undergraduate degree. In planning an undergraduate schedule it is essential to consult with an academic advisor.

**Notes:**

1. Students in the Accelerated Program must have been pre-approved through the Pre-Professional Health Studies (PPHS) and have signed an "Intent to Pursue" form during their first semester. This form must be on file with PPHS.
2. Because students in an accelerated program must meet both the course requirements for entry to professional school and the course requirements for their major, it is necessary for these students to consult with an advisor in their major as well as the PPHS as early in their academic career as possible. Failure to do so may make completing the required courses in the first 90 hours impossible.
3. The academic plan presented here is a generic plan; the actual plan will depend on choice of major and number of AP credits applied from high school transcript.
4. With some exceptions, CST students must complete the requirements for their major within their first 90 hours; course work in the first year of professional school counts as elective hours toward degree completion.
5. Biology Majors - Some of the course work during the first year of Dental School can be counted for Biology electives as well as general electives for degree completion. Certain electives are excluded. Be sure to consult with an academic advisor.
6. Non Life-Science Majors - In order to complete the required courses in 3 years, majors that do not overlap with pre-medical course requirements must have AP credit, take an overload, or enroll in summer session classes.

FIVE-YEAR MASTER'S PROGRAM

B.A. and M.S. in Information Science and Technology

High achieving IST majors with at least 5 semesters at Temple are qualified to apply to the Five Year Master's Program.

• Students may apply to the Five Year Program after completing a progress review in CST advising, meeting with the Faculty advisor, and registering for their sixth term. These must be completed before the Spring of their Junior year. They are admitted before their Senior year. In addition to having a GPA of 3.5 or higher, students must be able to complete at least 99 credits (including CIS 2033 Computational Probability and Statistics, CIS 3329 Network Architectures, and CIS 3342 Networked Application Systems) before the start of their Senior year.

• During their Senior year, students take 24 credits, 9 credits of which are graduate. These 9 graduate credits count three ways: (a) as general undergraduate credit, (b) as upper level undergraduate CS elective credit, (c) as graduate credit.

• After their Senior year, students receive their undergraduate degree, then are formally admitted to the graduate program (with 9 graduate credits already completed).

• During their fifth year, students take an additional 21 graduate credits and graduate with a Master's degree.

Interested students should contact their advisor for details. For more information, see the following program pages: Information Science & Technology B.A. (p. 1107) and Information Science & Technology M.S. (http://bulletin.temple.edu/graduate/scd/cst/information-science-technology-ms) and the CIS Department's Graduate Page (http://temple.edu/cis/graduate) (includes link to application).

Five-Year Master's Program

The Combined B.A./M.S. Program

To participate in this five-year program, a mathematics major should be enrolled in the B.A. program. Application to continue in the M.S. program must be made to the graduate chair of the department no later than the first semester of the senior year. To be accepted by the M.S. program, a student must have a GPA of at least 3.25 in Mathematics courses when the application is made. Students must complete MATH 3141, MATH 3142, and MATH 4051 in place of MATH 3137 and MATH 3138, and MATH 3098 in place of MATH 3096 in order to be considered for admission to the Master's program. In addition to completing the B.A. requirements, the student must complete four additional graduate-level mathematics courses numbered 5000 and above by the end of her/his senior year. If the General Education and College requirements have also been met, the student will be awarded the B.A. degree at the conclusion of this portion of the program. All courses must be passed with a grade of C- or better, and no more than two graduate courses can carry a grade less than B- for the student to continue with the M.S. portion of the program.

Fifth-Year Course Requirements

The student will take a total of six graduate-level courses, selected to conform to the M.S. requirements. At the end of the fifth year, the student must either write a master's thesis or pass one of the following examinations:

- Master's Comprehensive Examination in Pure Mathematics
- Master's Comprehensive Examination in Applied Mathematics
- Ph.D. Combined Comprehensive Examination (M.S. level pass)

For more information, see the following program pages: Mathematics B.A. (p. 1138) and Mathematics M.S. (http://bulletin.temple.edu/graduate/scd/cst/mathematics-ms)

Medical, 3+N Program

College of Science and Technology
Students who entered Temple University as Health Scholars are able to be considered for early admissions (http://www.temple.edu/medicine/admissions) to the Lewis Katz School of Medicine at Temple University as BA/MD Accelerated Option candidates. The 3+4 option is only with Lewis Katz School of Medicine. If interested in applying to other schools, students will need to follow a 4+4 option.

Guidelines for Completion of the Bachelor of Arts Degree in the College of Science & Technology

- Health Scholar Bachelor of Arts candidates in the College of Science and Technology (CST) must complete all requirements for the major before entering the Lewis Katz School of Medicine with the exception of the following:

  Biology majors may count up to three of the following first year Lewis Katz School of Medicine courses as Biology electives:

  MS1-Block1 (Fundamentals of Anatomy) as long as the student has not already received credit for BIOL 2233;
  MS1-Block2 (Fundamentals of Medicine 1); MS1-Blocks3&4 (Biological Systems I: Cardiovascular, Blood, Respiratory and Renal Systems & Biological Systems II: Gastrointestinal, Endocrine, Bone and Reproductive Systems);
  MS1-Block5 (Biological Systems III: Nervous and Musculoskeletal Systems) as long as the student has not already received credit for BIOL 3334 or BIOL 3352;
  MS1-Block6 (Biological Systems IV: Inflammation, Immune System and Skin).

- College of Science and Technology Health Scholars may count up to 33 equivalent credit hours from the first year at the Lewis Katz School of Medicine as equivalents of upper-level credits in the College of Science and Technology or the College of Liberal Arts.

- College of Science and Technology Health Scholars may count up to 33 equivalent credit hours from the first year at the Lewis Katz School of Medicine to fulfill their general credit hour requirements for the Bachelor of Arts degree in the College of Science and Technology.

- Appropriate course sequences for majors offered by the College of Science and Technology will be available in the Office of Student Services (1810 Liacouras Walk, Suite 203) and will be shared with prospective students and current Health Scholars. Advising on progress toward career goal and eventual presentation as a Health Scholar (3+4 or 4+4) will occur through Pre-Professional Health Studies (1810 Liacouras Walk, Suite 100).

Suggested Academic Plan for CST + Medical School 3+4 Program

Below is a suggested academic plan. Individual plans will vary based on previous course work, AP credits, performance on University placement tests, and specific undergraduate major. Health Scholars who qualify for the 3+4 program will develop an individual academic plan with Pre-Professional Health Studies during their first semester at the University.

**First Year - Medical School**

Approximately 34 credits of course work completed during the first year of Medical School will be applied to the CST major’s total number of earned hours needed for the completion of the degree requirements for graduation. For some majors, course work will count as elective hours in the major; for all others, course work counts as elective hours toward the completion of the minimum of 123 credits for the undergraduate degree. In planning an undergraduate schedule it is essential to consult with an academic advisor.

Notes:

1. Students in the Accelerated Program must have entered Temple University as Health Scholars through Pre-Professional Health Studies (PPHS) and have signed an “Intent to Pursue” form during their first semester. This form must be on file with PPHS.

2. Because students in an accelerated program must meet both the course requirements for entry to professional school and the course requirements for their major, it is necessary for these students to consult with an advisor in their major as well as PPHS as early in their academic career as possible. Failure to do so may make completing the required courses in the first 90 hours impossible.

1. Students must also complete a Biochemistry prerequisite course prior to entering Lewis Katz School of Medicine at Temple University. They may choose from either CHEM 4401 or BIOL 4375. Although not a requirement for taking the MCAT, it is recommended that students complete Biochemistry prior to taking the MCAT. In addition, students must also complete an Introduction to Psychology (PSY 1001) AND Introduction to Sociology (SOC 1176) course prior to taking the MCAT.
3. The academic plan presented here is a generic plan; the actual plan will depend on choice of major and number of Advanced Placement (AP) credits applied from the high school transcript.

4. With some exceptions, CST students must complete the requirements for their major within their first 90 hours; course work in the first year of professional school counts as elective hours toward degree completion.

5. Biology Majors - Some of the course work during the first year of Medical School can be counted for Biology electives as well as general electives for degree completion. Certain electives are excluded. Be sure to consult with an academic advisor.

6. Non Life-Science Majors - In order to complete the required courses in 3 years, majors that do not overlap with pre-medical course requirements must have AP credit, take an overload, or enroll in summer session classes.

healthadvising@temple.edu

The Bachelor of Science in Pharmaceutical Sciences is designed for students who are planning to obtain both a Bachelor of Science in Pharmaceutical Sciences and a Doctor of Pharmacy degree in seven years. It provides a solid science foundation and broad liberal arts education while preparing students for careers in the areas of research/laboratory work, quality control, and administration in pharmaceutics, biotechnology, and healthcare industries.

This major is only open to incoming freshman who are direct admits to the Temple University School of Pharmacy. Current students who have been admitted to the Pharmacy School and can complete this major within their first year of Temple University School of Pharmacy are welcome to declare this major.

The B.S. in Pharmaceutical Sciences is a 4-year, non-licensure, undergraduate bachelor’s degree program, and does not qualify the student for state board examination to become a registered pharmacist.

Students must meet the admissions requirements (http://pharmacy.temple.edu/admissions) for early admission to the Temple University School of Pharmacy.

Bachelor of Science

Summary of Requirements for the Degree

1. University Requirements (123 total s.h.)
   - MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
   - All Temple students must take a minimum of two writing-intensive courses at Temple as part of their major. ENG 2696 and one other Writing Intensive course will satisfy the writing-intensive requirement.
   - Students must complete the General Education (GenEd) requirements.
     - The General Education Curriculum consists of approximately 25-26 s.h. See the General Education (p. 143) section of the Undergraduate Bulletin for the GenEd curriculum.
     - Students who complete CST majors typically receive a waiver for 2 Science & Technology (GS) and 1 Quantitative Literacy (GQ) GenEd courses.

2. College Requirements
   - 45 Upper Level (2000+) credits within the College of Science & Technology (CST) or the College of Liberal Arts (CLA). School of Pharmacy courses may be used for up to 33 of these credits.
   - 90 credits within the College of Science & Technology (CST) or the College of Liberal Arts (CLA). School of Pharmacy courses may be used for up to 33 of these credits.

3. Major Requirements for Bachelor of Science (41 s.h.)
   - (F) - Fall only course
   - (S) - Spring only course

1 The anatomy and physiology courses must either both be KINS courses or BIOL courses. Students may not mix and match these courses.

(F) - Fall only course
(S) - Spring only course

NOTES:
- 62-65 credits - required undergraduate prerequisites for admission to the Pharmacy Program.
- 28-25 credits - required to fulfill undergraduate degree requirements including GenEd and Writing Intensive requirements.
- 33 credits - School of Pharmacy credits.

**Pharmacy, 3+N Program**

College of Science and Technology
Office of Student Services
1810 Liacouras Walk, Suite 203
215-204-2890
cstadv@temple.edu
Students must meet the admissions requirements (http://pharmacy.temple.edu/admissions) for early admission to the Temple University School of Pharmacy. If you are applying to other pharmacy schools, please use the web to find admissions requirements.

**Guidelines for Completion of the Bachelor of Arts Degree in the College of Science & Technology**

- Bachelor of Arts candidates in the College of Science and Technology (CST) must complete all requirements for the major before entering the School of Pharmacy with the exception of the following:

  1. Biology majors may count up to three of the following first year Temple University School of Pharmacy's Pharmaceutical Sciences courses as Biology electives:

     PS P158 Ant. Infective Agents;
     PS P155 Principles of Infectious Diseases so long as the student has not previously earned credit for BIOL 3317;
     PS P151 Medicinal Chemistry I or PS P164 Pharmacology so long as the student has not previously earned credit for BIOL 4375;
     PS P152 Medicinal Chemistry II so long as the student has not previously earned credit for BIOL 4376.

  2. Chemistry majors may count the following first year Temple University School of Pharmacy course as a Chemistry elective:

     PS P151 Medicinal Chemistry I so long as the student has not previously earned credit for BIOL 4375/CHEM 4401.

- College of Science and Technology students may count up to 33 equivalent credit hours from the first year at the School of Pharmacy as equivalents of upper-level credits in the College of Science and Technology or College of Liberal Arts.

- College of Science and Technology students may count up to 33 equivalent credit hours from the first year at the School of Pharmacy to fulfill their general credit hour requirements for the Bachelor of Arts degree in the College of Science and Technology.

- Appropriate course sequences for majors offered by the College of Science and Technology will be available in the Office of Student Services (1810 Liacouras Walk, Suite 203) or Pre-Professional Health Studies (1810 Liacouras Walk, Suite 100) and will be shared with prospective and current students.

**Suggested Academic Plan for CST + Pharmacy School 3+4 Program**

Below is a suggested academic plan. Individual plans will vary based on previous course work, AP credits, performance on University placement tests, and specific undergraduate major. Students who qualify for the 3+4 program will develop an individual academic plan with Pre-Professional Health Studies during their first semester at the University.

First Year - Pharmacy School
Approximately 33 credits of course work completed during the first year of Pharmacy School will be applied to the CST major's total number of earned hours needed for the completion of the degree requirements for graduation. For some majors, course work will count as elective hours in the major; for all others, course work counts as elective hours toward the completion of the minimum of 123 credits for the undergraduate degree. In planning an undergraduate schedule it is essential to consult with an academic advisor.

Students may take one of the following course sequences for the Anatomy & Physiology requirement:
KINS 1221 & KINS 1222
KINS 1223 & KINS 1224
BIOL 2233 & BIOL 3334
Students may NOT mix and match these courses.

Notes:
1. Students in the Accelerated Program must have been pre-approved through Pre-Professional Health Studies (PPHS) and have signed an "Intent to Pursue" form by their second semester. This form must be on file with PPHS.

2. Because students in an accelerated program must meet both the course requirements for entry to professional school and the course requirements for their major, it is necessary for these students to consult with an advisor in their major as well as PPHS as early in their academic career as possible. Failure to do so may make completing the required courses in the first 90 hours impossible.

3. The academic plan presented here is a generic plan; the actual plan will depend on choice of major and number of AP credits applied from high school transcript.

4. With some exceptions, CST students must complete the requirements for their major within their first 90 hours; course work in the first year of professional school counts as elective hours toward degree completion.

5. Biology Majors - Some of the course work during the first year of Pharmacy School can be counted for Biology electives as well as general electives for degree completion. Certain electives are excluded. Be sure to consult with an academic advisor.

6. Non Life-Science Majors - In order to complete the required courses in 3 years, majors that do not overlap with pre-medical course requirements must have AP credit, take an overload, or enroll in summer session classes.

Physical Therapy, 3+N Program

College of Science and Technology
Office of Student Services
1810 Liacouras Walk, Suite 203
215-204-2890
cstadv@temple.edu

Office of Pre-Professional Health Studies
1810 Liacouras Walk, Suite 100
215-204-2513
healthadvising@temple.edu

Students must meet the admissions requirements (http://cph.temple.edu/pt/degree-programs/doctor-physical-therapy-dpt/33-accelerated-pre-baccalaureate-admission) for early admission to Temple University's College of Public Health Doctorate of Physical Therapy program. If you are applying to other physical therapy programs, please use the web to find admissions requirements.

Guidelines for the Completion of the Bachelor of Arts Degree from the College of Science & Technology

- Bachelor of Arts candidates in the College of Science and Technology (CST) must complete all requirements for their major before entering the Doctor of Physical Therapy (DPT) Program in the College of Public Health (CPH) with the exception of the following:
  - Biology majors may count one of the following first year DPT Program courses as one of their three required Biology electives:
    - PHTH 8521 Neuroscience
    - PHTH 8522 Rehabilitative Pathophysiology
    - PHTH 8523 Movement Science II
  - CST students may count up to 33 equivalent credit hours from the first year at the DPT Program in the CPH as equivalents of upper-level credits in the CST or College of Liberal Arts.
  - CST students may count up to 33 equivalent credit hours from the first year at the DPT Program in the CPH to fulfill their general credit hour requirements for the B.A. degree in the CST.
  - Appropriate course sequences for majors offered by the College of Science and Technology will be available in the Office of Student Services (1810 Liacouras Walk, Suite 203) or Pre-Professional Health Studies (1810 Liacouras Walk, Suite 100) and will be shared with prospective and current students.

Suggested Academic Plan for CST + Doctor of Physical Therapy 3+3 Program

Below is a suggested academic plan. Individual plans will vary based on previous course work, AP credits, performance on University placement tests, and specific undergraduate major. Students who qualify for the 3+4 program will develop an individual academic plan with Pre-Professional Health Studies during their first semester at the University.

Five-Year Master’s Program

The Combined Five-Year B.A./M.S.

This program allows a talented student to obtain both a bachelor's and a master's degree in five years. A physics major may apply for the program during the junior or senior year. Please consult the advisor for details. For more information, see the following program pages: Physics B.A. (p. 1154) and Physics M.S. (http://bulletin.temple.edu/graduate/scd/cst/physics-ms)

**Five-Year Master's Program**

**The Combined Five-Year B.S./M.S.**

This program allows a talented student to obtain both a bachelor's and a master's degree in five years. A physics major may apply for the program during the junior or senior year. Please consult the advisor for details. For more information, see the following program pages: Physics B.S. (p. 1158) and Physics M.S. (http://bulletin.temple.edu/graduate/scd/cst/physics-ms)

**Podiatry, 3+N Program**

College of Science and Technology
Office of Student Services
1810 Liacouras Walk, Suite 203
215-204-2890
cstadv@temple.edu

Office of Pre-Professional Health Studies
1810 Liacouras Walk, Suite 100
215-204-2513
healthadvising@temple.edu

Students must meet the admissions requirements (http://podiatry.temple.edu/admissions/requirements) for early admission to the Temple University School of Podiatric Medicine. If you are applying to other podiatry schools, please use the web to find admissions requirements.

**Guidelines for Completion of the Bachelor of Arts Degree in the College of Science & Technology**

- Bachelor of Arts candidates in the College of Science and Technology (CST) must complete all requirements for the degree program before entering the School of Podiatric Medicine with the exception of the following:
  1. Biology majors may use up to three of the following first year School of Podiatry Biomedical Studies (PBMS) courses as replacements for Biology electives:
     - PBMS P100 Histology as long as the student has not previously earned credit for BIOL 2235;
     - PBMS P102 General Anatomy as long as the student has not previously earned credit for BIOL 2233;
     - PBMS P104 Neurophysiology as long as the student has not previously earned credit for BIOL 3352 or BIOL 3358;
     - PBMS P110 Biochemistry as long as the student has not previously earned credit for BIOL 4375;
     - PBMS P111 Physiology as long as the student has not previously earned credit for BIOL 3334.

  2. Chemistry majors may use up to one of the following first year Temple University School of Podiatry courses as replacements for Chemistry electives:
     - PBMS P110 Biochemistry as long as the student has not previously earned credit for BIOL 4375 or CHEM 4401.

- College of Science and Technology students may count up to 33 equivalent credit hours from the first year at the School of Podiatric Medicine as equivalents of upper-level credits in the College of Science and Technology or the College of Liberal Arts.
- College of Science and Technology students may count up to 33 equivalent credit hours from the first year at the School of Podiatric Medicine to fulfill their general credit hour requirements for the Bachelor of Arts degree in the College of Science and Technology.
- Appropriate course sequences for majors offered by the College of Science and Technology will be available in the Office of Student Services (1810 Liacouras Walk, Suite 203) or Pre-Professional Health Studies (1810 Liacouras Walk, Suite 100) and will be shared with prospective and current students.

**Suggested Academic Plan for CST + Podiatry School 3+4 Program**

Below is a suggested academic plan. Individual plans will vary based on previous course work, AP credits, performance on University placement tests, and specific undergraduate major. Students who qualify for the 3+4 program will develop an individual academic plan with Pre-Professional Health Studies during their first semester at the University.

---

**First Year - Podiatry School**

Approximately 33 credits of course work completed during the first year of Podiatry School will be applied to the CST major's total number of earned hours needed for the completion of the degree requirements for graduation. For some majors, course work will count as elective hours in the major; for all others, course work counts as elective hours toward the completion of the minimum of 123 credits for the undergraduate degree. In planning an undergraduate schedule it is essential to consult with an academic advisor.
Students must also complete a Biochemistry prerequisite prior to entering Temple's School of Podiatric Medicine. They may choose from either CHEM 4401 or BIOL 4375. Although it is not a requirement for taking the MCAT, it is recommended that students complete Biochemistry prior to taking the MCAT. In addition, students must also complete an Introduction to Psychology (PSY 1001) AND Introduction to Sociology (SOC 1176) course prior to taking the MCAT.

Students should be aware that some Podiatry schools will accept either MCAT or DAT (Dental Admissions Test) to meet entrance guidelines.

Notes:

1. Students in the Accelerated Program must have been pre-approved through the Office of Pre-Professional Health Studies (PPHS) and have signed an "Intent to Pursue" form during their first semester. This form must be on file with PPHS.
2. Because students in an accelerated program must meet both the course requirements for entry to professional school and the course requirements for their major, it is necessary for these students to consult with an advisor in their major as well as PPHS as early in their academic career as possible. Failure to do so may make completing the required courses in the first 90 hours impossible.
3. The academic plan presented here is a generic plan; the actual plan will depend on choice of major and number of AP credits applied from high school transcript.
4. With some exceptions, CST students must complete the requirements for their major within their first 90 hours; course work in the first year of professional school counts as elective hours toward degree completion.
5. Biology Majors - Some of the course work during the first year of Podiatry School can be counted for Biology electives as well as general electives for degree completion. Certain electives are excluded. Be sure to consult with an academic advisor.
6. Non Life-Science Majors - In order to complete the required courses in 3 years, majors that do not overlap with pre-medical course requirements, must have AP credit, take an overload, or enroll in summer session classes.

Biology

evelyn.vleck@temple.edu

Biology spans a continuum of organization from molecules and cells to individuals and ecosystems. The programs are designed to give students a broad base, while allowing a measure of sub-field specialization. All Biology majors are required to take a two-semester series of “Introduction to Biology” classes, plus separate courses in Genetics, Cell Biology, and Ecology, followed by three (for a B.A. degree) or six (for the B.S. degree) biology electives. There are special programs in Biochemistry, Biology with Teaching, Biophysics, Environmental Science, Natural Science, and Neuroscience that the Biology department offers in conjunction with others.

The Bachelor of Science degree in Biology program provides a strong preparation for those wishing to attend professional or graduate school in biology or related disciplines such as cell or molecular biology, ecology, bioinformatics, biochemistry, biophysics, medicine, pharmacy, dentistry, and allied health fields. It is recommended for those who intend to enter the scientific workforce upon completion of a bachelor’s degree.

The Bachelor of Arts degree in Biology program, which also provides the essential background for professional schools, is appropriate for those who are planning for careers in fields where a science background with additional breadth is advantageous.

The Bachelor of Science degree in Neuroscience - Cellular & Molecular is designed to provide rigorous preparation in scientific knowledge at the molecular and cellular level to those students interested in pursuing advanced studies and professional development in neuroscience, medicine or a related field in life sciences. In addition to neuroscience, graduates in the major will be well prepared for graduate or professional studies in cell or molecular biology, biochemistry, biophysics, biomedical sciences, medicine, pharmacy, dentistry, and many allied health fields. Neuroscience graduates who do not pursue graduate studies will be prepared to accept technical positions in industry (pharmaceutical, biotech) or government and university laboratories. Graduates will be ready to conduct research on a range of neuroscience and related topics at the level of cells or molecules, including nervous system function, development, disease or injury.

The Bachelor of Science degree in Biochemistry prepares students for excellence in graduate or medical school, and employment in the chemical, biotechnological, or pharmaceutical industries. Students learn a wide array of topics in Biology, Chemistry, Mathematics, and Physics. In upper division studies, Biochemistry majors learn to apply biochemical principles to real-life situations via problem-based approaches in their courses. Laboratory
courses give students the tools they will need as biochemists to pursue research. Accomplished majors are encouraged to pursue independent research with a professor, and to present their work internally and at national meetings.

The Bachelor of Science degree in Biophysics fulfills all medical and pharmacy school requirements. Biophysics students interested in research careers can pursue a graduate degree in biophysics, biology, molecular biology or neuroscience, as well as the combined MD/PhD degree in medical physics, health physics or nuclear medicine.

The Bachelor of Arts degree in Natural Sciences provides students more breadth than traditional science programs. Many exciting areas of scientific inquiry, such as the neurosciences, environmental sciences, and biophysical sciences, require general science backgrounds that encompass multiple science disciplines. Students planning graduate study or technical careers in one of these interdisciplinary areas, as well as students preparing for careers in health sciences, legal professions, science education, science-related business, or social service might be well served by the B.A. in the Natural Sciences. However, this program of study will not prepare students for graduate study in a traditional science discipline nor will it prepare students for technical employment in a traditional science discipline.

The Bachelor of Science degree in Biology with Teaching and Bachelor of Science degree in General Science with Teaching are part of Temple's innovative "TUteach" secondary education teacher-training program. The programs prepare students for a career in secondary school teaching with the full content knowledge of their corresponding majors without teaching. The education courses in the B.S. with Teaching include supervised teaching in school district classrooms and emphasize inquiry-based approaches to learning. Students in the B.S. with Teaching degree program become eligible for a Pennsylvania teacher certification when they complete all the requirements for the degree that include theoretical and practical courses in education specifically designed for science and mathematics majors.

Programs

• Biochemistry, B.S. (p. )
• Biology, B.A. (p. 1059)
• Biology, B.S. (p. 1063)
• Biology with Teaching, B.S. (p. )
• Biology, B.A./M.Ed. (p. )
• Biology, B.S./M.Ed. (p. )
• Biology, Minor (p. 1067)
• Biophysics, B.S. (p. )
• Environmental Science, B.S. (p. )
• General Science with Teaching, B.S. (p. )
• Natural Sciences, B.A. (p. 1073)
• Neuroscience - Cellular & Molecular, B.S. (p. 1077)

The Bachelor of Arts in Biology, which also provides the essential background for professional schools, is appropriate for those who are planning for careers in fields where a science background with additional breadth is advantageous.

Bachelor of Arts

Summary of Requirements for the Degree

1. University Requirements
   • MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
• All Temple students must take a minimum of two writing-intensive courses at Temple as part of their major. Following is a list of courses that can be used to satisfy the writing-intensive requirement:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 2296</td>
<td>Genetics (S)</td>
<td>4</td>
</tr>
<tr>
<td>BIOL 3096</td>
<td>Cell Structure and Function (F)</td>
<td>4</td>
</tr>
<tr>
<td>BIOL 3396</td>
<td>Scientific Writing for Biology: The Art of Communicating</td>
<td>3</td>
</tr>
</tbody>
</table>

• Students must complete General Education (GenEd) requirements.
  • The General Education Curriculum consists of approximately 25-26 s.h. See the General Education (p. 143) section of the Undergraduate Bulletin for the GenEd curriculum.
  • Students who complete CST majors typically receive a waiver for 2 Science & Technology (GS) and 1 Quantitative Literacy (GQ) courses.

2. College Requirements
• 45 Upper Level (2000+) credits within the College of Science & Technology (CST) or the College of Liberal Arts (CLA).
• 90 credits within the College of Science & Technology (CST) or the College of Liberal Arts (CLA).
• Two (2) Upper Level (2000+) Liberal Art courses.
• Second (2nd) Level of a Foreign Language (1002).

3. Major Requirements for Bachelor of Arts (60-63 s.h.)

<tr>
<td>BIOL 4591</td>
<td>Research in Neuroscience</td>
<td>1-4</td>
</tr>
</tbody>
</table>

A GPA of 2.0 or better is required in Biology courses in order to graduate.

### Distinction in the Major

To be eligible for distinction in the major, a student must retain a grade point average of 3.2 or better (overall and in the major); should register for BIOL 4391 Accelerated Research in Biology or BIOL 4291 Extradepartmental Research for a total of 6 s.h. over two semesters; and must write a final research paper and present his/her research at a departmental research poster session before graduation. A student, however, does not have to enroll in the distinction program in order to participate in departmental research. Other courses (BIOL 2082 Independent Research I and BIOL 3082 Independent Research II), provide credit toward graduation and research experience, and are available to undergraduate students from their sophomore through their senior year. A student may register for BIOL 3082 more than one semester, however only one semester may be completed for a grade. The additional semester may be taken for credit/no credit. In all cases, permission of the faculty and application to the department Honors Committee is required before registering for research credits.

### Calculation of Major GPA

The list of courses that are used to calculate major GPA is determined by the department. Students should consult with their academic advising unit for the applicable courses. In general, courses that could not apply toward the major as an elective or a required course are not counted for the major GPA. This would include BIOL 1011, for example.

A total of up to 3 s.h. of Biology research courses numbered lower than 4000 (to include: BIOL 3082, BIOL 3181, BIOL 3183, BIOL 3281, BIOL 3681, and BIOL 3781) may be taken for a letter grade. Any additional credits in research courses in this category can be taken only on a CR/NC basis. No research courses numbered lower than 4000 may be used for Biology elective credit.

### Suggested Academic Plan

#### Bachelor of Arts in Biology

**Requirements for New Students starting in the 2015-2016 Academic Year**

**Year 1**

**Fall**

Select one of the following:

The Bachelor of Science in Biology provides a strong preparation for those wishing to attend professional or graduate school in biology or related disciplines such as cell or molecular biology, ecology, bioinformatics, biochemistry, biophysics, medicine, pharmacy, dentistry, and allied health fields. It is recommended for those who intend to enter the scientific workforce upon completion of a bachelor’s degree.

**Bachelor of Science**

**Summary of Requirements for the Degree**

1. University Requirements
   - MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
   - All Temple students must take a minimum of two writing-intensive courses at Temple as part of their major. Following is a list of courses that can be used to satisfy the writing-intensive requirement:
     - BIOL 2296 Genetics 4
     - BIOL 3096 Cell Structure and Function 4
     - BIOL 3396 Scientific Writing for Biology: The Art of Communicating 3
   - Students must complete the General Education (Gen Ed) requirements.
• The General Education Curriculum consists of approximately 25-26 s.h. See the General Education (p. 143) section of the Undergraduate Bulletin for the Gen Ed curriculum.

• Students who complete CST majors typically receive a waiver for 2 Science & Technology (GS) and 1 Quantitative Literacy (GQ) Gen Ed courses.

2. College Requirements

• 45 Upper Level (2000+) credits within the College of Science & Technology (CST) or the College of Liberal Arts (CLA).

• 90 credits within the College of Science & Technology (CST) or the College of Liberal Arts (CLA).

3. Major Requirements for Bachelor of Science (69-75 s.h.)

Total Credit Hours 69-75

(F) - Fall only course
(S) - Spring only course

1 Up to two (2) Biology Electives (6-8 s.h.) may be replaced by Cognate electives selected from the following (B.S. degree only): ANTH 2764; CHEM 3301, CHEM 3302; MATH 2043; PHYS 2501, PHYS 4301; STAT 5002 (if substituted for BIOL 3312; students are not allowed to use both BIOL 3312 and STAT 5002 as upper-level electives).

2 Students who choose MATH 1038 must also take the linked course MATH 1039.

Note: A grade of C or higher in CHEM 1031 is required to take BIOL 1111. Grades of C or higher in both CHEM 1031 and CHEM 1032 are required to take BIOL 2112. A grade of C or higher in BIOL 1111 and BIOL 2112 is required to take upper-level Biology courses, and a C- or higher is required unless otherwise specified in all other courses for the major, including course prerequisites. Most research and Independent Study courses are not available for major credit, such as:

<table>
<thead>
<tr>
<th>Course</th>
<th>Description</th>

<tr>
<td>BIOL 4591</td>
<td>Research in Neuroscience</td>
<td>1 to 4</td>
</tr>
</tbody>
</table>

A GPA of 2.0 or better is required in Biology courses in order to graduate.

Distinction in the Major

To be eligible for distinction in the major, a student must retain a grade point average of 3.2 or better (overall and in the major); should register for BIOL 4391 Accelerated Research in Biology or BIOL 4291 Extradepartmental Research for a total of 6 s.h. over two semesters; and must write a final research paper and present his/her research at a departmental research poster session before graduation. A student, however, does not have to enroll in the distinction program in order to participate in departmental research. Other courses (BIOL 2082 Independent Research I and BIOL 3082 Independent Research II), provide credit toward graduation and research experience, and are available to undergraduate students from their sophomore through their senior year. A student may register for BIOL 3082 more than one semester, however only one semester may be completed for a grade. The additional semester may be taken for credit/no credit. In all cases, permission of the faculty and application to the department Honors Committee is required before registering for research credits.

Calculation of Major GPA

The list of courses that are used to calculate major GPA is determined by the department. Students should consult with their academic advising unit for the applicable courses. In general, courses that could not apply toward the major as an elective or a required course are not counted for the major GPA. This would include BIOL 1011, for example.

A total of up to 3 s.h. of Biology research courses numbered lower than 4000 (to include: BIOL 3082, BIOL 3181, BIOL 3183, BIOL 3281, BIOL 3681, and BIOL 3781) may be taken for a letter grade. Any additional credits in research courses in this category can be taken only on a CR/NC basis. No research courses numbered lower than 4000 may be used for Biology elective credit.

Total Credit Hours: 123

1. Students who choose MATH 1038 must also take the linked course MATH 1039.
2. If the student has taken the necessary prerequisite courses, some of the Biology or Cognate elective courses may be taken before the Spring semester of Year 3.

(F) - Fall only course

(S) - Spring only course

Biology, Minor

Dr. Allen Nicholson, Chair
Biology-Life Sciences Building, Room 255
215-204-8851

Dr. Joel Sheffield, Faculty Advisor (Last names A-M)
Biology-Life Sciences Building, Room 311
215-204-8839
joel.sheffield@temple.edu

Ms. Evelyn Vleck, Faculty Advisor (Last names N-Z)
Biology-Life Science Building, Room 248P
215-204-6528
evelyn.vleck@temple.edu

Minor Requirements

Students interested in acquiring basic knowledge in biology but not wishing to major in the subject may pursue a minor by successful completion of BIOL 1111 and BIOL 2112 (Introduction to Biology I and II) or their Honors alternates, BIOL 1911 and BIOL 2912, plus three additional upper-level 2200 or above Biology electives (see course descriptions for exceptions). At least one of these additional Biology electives must have a laboratory component.

Note that CHEM 1031 and CHEM 1032 (with labs) or their Honors alternates are the co-requisites or prerequisites for BIOL 1111 and BIOL 2112, and that a grade of C or higher in BIOL 1111 and BIOL 2112 is required to take Biology electives. BIOL 2227, BIOL 2296, and BIOL 3096 can be taken as electives for the minor. Please consult the Biology Department's advisor when choosing the three additional courses to ensure that prerequisites have been satisfied.

A minimum of 18 credits in Biology is required for the minor.

Environmental Science, B.S.

Dr. Laura Toran, Program Director
Beury Hall, Room 223
215-204-2352
Students will be equipped with the scholarly background and intellectual skills to understand a wide range of pressing environmental issues, and they will come to appreciate the physical, economic, political, demographic, and ethical factors that define those issues. Among the many environmental problems central to our program are groundwater contamination, suburban sprawl, river basin management, environmental justice, and the greening of abandoned urban spaces. Our graduates find employment with government environmental agencies, citizens’ organizations, consulting firms, and corporate environmental affairs departments.

**Bachelor of Science**

**Summary of Requirements for the Degree**

1. University Requirements (123 total s.h.)
   - MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
   - All Temple students must take a minimum of two writing-intensive courses at Temple as part of their major. Following is a list of courses that can be used to satisfy the writing-intensive requirement:

**Topic Electives**
ENVS 3000 Special Topics in Environmental Science 3 to 4
ENVS 4082 Independent Study: Environmental Science 1 to 3
ENVS 4085 Internship: Environmental Science 3
ENST 3000 Special Topics in Environmental Studies 3
ENST 4896 Environmental Physiology 3
HORT 2334 Food Crops I 3
HORT 2353 Food Crops II 3
HORT 3514 Landscape Restoration 3

**Note:** EES 3091 is not available for major credit.

1 One hydrology course is a required course. The second course may be taken as an elective.

(F) - Fall only course
(S) - Spring only course
(SS) - Summer session only

**Calculation of Major GPA**
The list of courses that are used to calculate major GPA is determined by the department. Students should consult with their academic advising unit for the applicable courses. In general, courses that could not apply toward the major as an elective or a required course are not counted for the major GPA. This would include CHEM 1027, for example.

**Distinction in Major**
To graduate with Distinction in Major, students are required to achieve a 3.5 GPA for courses required for the major. If the difficulty of courses chosen as electives is high, then a 3.3 GPA will earn Distinction in Major. This determination will be made by the appropriate faculty. In addition, a student graduating with distinction has no grade below C in the remaining courses required for the major.

**Suggested Academic Plan**
Please note that this is a suggested academic plan. Depending on your situation, your academic plan may look different.

Natural Sciences, B.A.

Dr. Susan Varnum, Program Director
Beury Hall, Room 130
215-204-6390
susan.varnum@temple.edu

The Bachelor of Arts (B.A.) in the Natural Sciences provides students more breadth than traditional science programs. Many exciting areas of scientific inquiry, such as the neurosciences, environmental sciences, and biophysical sciences, require general science backgrounds that encompass multiple science disciplines.

Students planning graduate study or technical careers in one of these interdisciplinary areas, as well as students preparing for careers in health sciences, legal professions, science education, science-related business, or social service might be well served by the B.A. in the Natural Sciences.

However, this program of study will not prepare students for graduate study in a traditional science discipline nor will it prepare students for technical employment in a traditional science discipline.

Bachelor of Arts

Summary of Requirements for the Degree

1. University Requirements (123 total s.h.)
   • MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
   • All Temple students must take a minimum of two writing-intensive courses at Temple as part of their major. Following is a list of courses that can be used to satisfy the writing-intensive requirement:
     Select two of the following:
     - BIOL 2296 Genetics (S)
     - BIOL 3096 Cell Structure and Function (F)
     - BIOL 3396 Scientific Writing for Biology: The Art of Communicating
     - CHEM 4196 Techniques of Chemical Measurement II
     - CHEM 3397 & CHEM 3398 Physical Chemistry Laboratory I and Physical Chemistry Laboratory II
     - EES 2096 Climate Change: Oceans To Atmosphere (S - even years)
     - ENG 2696 Technical Writing
     - PHIL 2196 Perspectives on Science and Mathematics
     - PHIL 2596 Philosophical Perspectives on the Environment
     - PHYS 2796 Introduction to Modern Physics (S)
     - PHYS 4796 Experimental Physics (S)
   • Students must complete the General Education (GenEd) requirements.
     • The General Education Curriculum consists of approximately 25-26 s.h. See the General Education (p. 143) section of the Undergraduate Bulletin for the GenEd curriculum.
Students who complete CST majors typically receive a waiver for 2 Science & Technology (GS) and 1 Quantitative Literacy (GQ) GenEd courses.

2. College Requirements

- 90 credits within the College of Science & Technology (CST) or the College of Liberal Arts (CLA).
- 45 Upper-Level (2000+) credits within the College of Science & Technology (CST) or the College of Liberal Arts (CLA).
- Second (2nd) Level of a Foreign Language (1002).

3. Major Requirements for Bachelor of Arts (56-64 s.h.)

### Biology

Select one of the following:

<table>

PHYS 1022 Introduction to General Physics II
PHYS 1062 Elementary Classical Physics II
PHYS 2022 General Physics II
PHYS 2922 Honors General Physics II

Upper Elective Science

Four Upper-Level (2000+) elective science courses ² 12-16

Successful completion of a comprehensive general science exam at the conclusion of the major course requirements.

Total Credit Hours 56-64

¹ Students may choose to take MATH 1038 instead of MATH 1041 as part of the MATH 1041 & MATH 1042 sequence. If so, they must also take the linked course MATH 1039.

² The four science electives chosen to satisfy the science concentration must be taken from the same department. The departments you can choose electives from are: Biology, Chemistry, Earth & Environmental Science or Physics. In the circumstance where a laboratory course is the complement of a lecture course, both must be completed to fulfill the requirement for ONE science elective.

Note: In addition to the overall major residency requirements, half of the concentration area must be completed at Temple.

Note: A grade of C or higher in CHEM 1031 and CHEM 1032 is required to take BIOL 1111 and BIOL 2112. A grade of C or higher in BIOL 1111 and BIOL 2112 is required to take upper-level Biology courses, and a C- or higher is required unless otherwise specified in all other courses for the major, including course prerequisites.

Calculation of Major GPA

The list of courses that are used to calculate major GPA is determined by the department. Students should consult with their academic advising unit for the applicable courses. In general, courses that could not apply toward the major as an elective or a required course are not counted for the major GPA. This would include MATH 1022, for example.

Distinction in Major

To graduate with a Distinction in Natural Sciences a student is required to achieve a 3.33 GPA or higher in all of the content area courses in the major.

Suggested Academic Plan

Bachelor of Arts in Natural Sciences

Requirements for New Students starting in the 2015-2016 Academic Year

Year 1

Neuroscience - Cellular & Molecular, B.S.

Dr. Allen Nicholson, Chair
Biology-Life Sciences Building, Room 255
215-204-8851

Dr. Joel Sheffield, Faculty Advisor
Biology-Life Sciences Building, Room 311
215-204-8839
jbs@temple.edu

The Bachelor of Science degree in Neuroscience - Cellular & Molecular is designed to provide rigorous preparation in scientific knowledge at the molecular and cellular level to those students interested in pursuing advanced studies and professional development in neuroscience, medicine or a related field in life sciences. In addition to neuroscience, graduates in the major will be well prepared for graduate or professional studies in cell or molecular biology, biochemistry, biophysics, biomedical sciences, medicine, pharmacy, dentistry, and many allied health fields. Neuroscience graduates who do not pursue graduate studies will be prepared to accept technical positions in industry (pharmaceutical, biotech) or government and university laboratories. Graduates will be ready to conduct research on a range of neuroscience and related topics at the level of cells or molecules, including nervous system function, development, disease or injury.

Bachelor of Science

Summary of Requirements for the Degree

1. University Requirements (123 total s.h.)
   - MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
   - All Temple students must take a minimum of two writing-intensive courses at Temple as part of their major. Following is a list of courses that can be used to satisfy the writing-intensive requirement: BIOL 2296 and BIOL 3096.
   - Students must complete the General Education (GenEd) requirements.
     - The General Education Curriculum consists of approximately 25-26 s.h. See the General Education (p. 143) section of the Undergraduate Bulletin for the GenEd curriculum.
     - Students who complete CST majors typically receive a waiver for 2 Science & Technology (GS) and 1 Quantitative Literacy (GQ) GenEd courses.

2. College Requirements
   - 45 Upper Level (2000+) credits within the College of Science & Technology (CST) or the College of Liberal Arts (CLA).
   - 90 credits within the College of Science & Technology (CST) or the College of Liberal Arts (CLA).

3. Major Requirements for Bachelor of Science (75-81 s.h.)

   Biology
   - BIOL 1111 Introduction to Biology I 4

<th>75-81</th>
</tr>
</thead>
</table>

1. Students who choose MATH 1038 must also take the linked course MATH 1039.
2. Two of the four electives must be within the College of Science & Technology.
3. CIS 1166 or CIS 1966 may be replaced with CIS 1053.
4. Neuroscience Research/Independent Study courses should be determined in consultation with the Neuroscience faculty advisor. Students are required to have both a B- or above in BIOL 3352 and a Science GPA of 3.0. The Science GPA is to consist of all Biology courses, Chemistry through Organic Chemistry, Calculus, and Physics.

(F) - Fall course only
(S) - Spring only course

Note: A grade of C or higher in CHEM 1031 and CHEM 1032 is required to take BIOL 1111 and BIOL 2112. A grade of C or higher in BIOL 1111 and BIOL 2112 is required to take upper-level Biology courses, and a C- or higher is required unless otherwise specified in all other courses for the major, including course prerequisites.

Calculation of Major GPA

The list of courses that are used to calculate major GPA is determined by the department. Students should consult with their academic advising unit for the applicable courses. In general, courses that could not apply toward the major as an elective or a required course are not counted for the major GPA. This would include BIOL 1011, for example.

A total of up to 3 s.h. of Biology research courses numbered lower than 4000 may be taken for a letter grade, including:

<table>
<thead>
<tr>
<th>Course</th>
<th>Description</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 2082</td>
<td>Independent Research I (not repeatable)</td>
<td>2 to 4</td>
</tr>
<tr>
<td>BIOL 3082</td>
<td>Independent Research II</td>
<td>1 to 4</td>
</tr>
<tr>
<td>BIOL 3181</td>
<td>Cooperative Research in Biochemistry</td>
<td>3</td>
</tr>
<tr>
<td>BIOL 3183</td>
<td>Junior Independent Research</td>
<td>3</td>
</tr>
<tr>
<td>BIOL 3281</td>
<td>Cooperative Research in Biochemistry</td>
<td>3</td>
</tr>
<tr>
<td>BIOL 3681</td>
<td>Cooperative Studies</td>
<td>2 to 4</td>
</tr>
<tr>
<td>BIOL 3781</td>
<td>Cooperative Studies</td>
<td>2 to 4</td>
</tr>
<tr>
<td>BIOL 4291</td>
<td>Extradepartmental Research</td>
<td>1 to 4</td>
</tr>
</tbody>
</table>

Any additional credits in research courses in this category can be taken only on a CR/NC basis. No research courses numbered lower than 4000 may be used for Biology elective credit.

Distinction in the Major

Distinction in Neuroscience is awarded based upon the completion of two semesters of BIOL 4591, submission of a paper, a poster presentation, and maintaining a GPA of 3.2.

The Department of Chemistry is one of the oldest departments in the university and has a long record of preparing students for careers in science. Both Bachelor of Arts (B.A.) and Bachelor of Science (B.S.) degrees are available, depending upon a student’s career goals. Since a significant portion of America’s chemical industry is centered in the Philadelphia region, there is a wide range of career opportunities locally available. Although most of our students have gone on to medicine, dentistry, or the chemical industry, recent graduates have also gone on to careers in law, forensics, and even art restoration.

All prospective majors should schedule an appointment with one of the departmental advisors (see list above) to plan a program of study.

The Bachelor of Arts in Chemistry is designed for students who are planning for a non-research career in a field related to Chemistry. Students learn a wide array of topics in Chemistry, Mathematics, and Physics. Students learn how to write scientific reports, analyze data, and place these results in a broader scientific context.

The Bachelor of Science in Chemistry prepares students for excellence in graduate or medical school, and employment in the chemical, biotechnological, or pharmaceutical industries. Students learn a wide array of topics in Chemistry, Mathematics, and Physics. The program emphasizes the “hands-on” nature of chemistry in laboratory courses, giving students the tools that chemists need to pursue research. They also learn how to write scientific reports, analyze data, and place these results in a broader scientific context. Accomplished majors are encouraged to pursue independent research with a professor, and to present their work internally and at national meetings.

The Bachelor of Science in Biochemistry prepares students for excellence in graduate or medical school, and employment in the chemical, biotechnological, or pharmaceutical industries. Students learn a wide array of topics in Biology, Chemistry, Mathematics, and Physics. In upper division studies, Biochemistry majors learn to apply biochemical principles to real-life situations via problem-based approaches in their courses. Laboratory
courses give students the tools they will need as biochemists to pursue research. Accomplished majors are encouraged to pursue independent research with a professor, and to present their work internally and at national meetings.

**Total Credit Hours** 78-81

(F) - Fall only course  
(S) - Spring only course

1. With approval from the faculty advisor, two semesters of Undergraduate Research (BIOL 4391/4491 or CHEM 3891/4891) for a minimum of 6 credits can be used to fulfill one of the Biochemistry electives.

2. Students who choose MATH 1038 must also take the linked course MATH 1039.

**Note:** A grade of C or higher in CHEM 1031 and CHEM 1032 is required to take BIOL 1111 and BIOL 2112. A grade of C or higher in BIOL 1111 and BIOL 2112 is required to take upper-level Biology courses, and a C- or higher is required unless otherwise specified in all other courses for the major, including course prerequisites. Most research and Independent Study courses are not available for major credit, such as:

<table>

</tr>
<tr>
<td>BIOL 4483</td>
<td>Accelerated Research in Biochemistry</td>
</tr>
</tbody>
</table>
Calculation of Major GPA

The list of courses that are used to calculate major GPA is determined by the department. Students should consult with their academic advising unit for the applicable courses. In general, courses that could not apply toward the major as an elective or a required course are not counted for the major GPA. This would include BIOL 1011, for example.

Distinction in Major

To graduate with Distinction in Major, students are required to achieve a 3.33 GPA or higher in all the Biology and Chemistry courses in their major.

Suggested Academic Plan

All prospective majors should schedule an appointment with one of the departmental advisors (names of current Faculty Advisors are available in the About section) to plan a program of study. The recommended order of courses for the major is listed below; a different order is acceptable as long as the student adheres to prerequisite requirements.

**Term Credit Hours**  
16

**Total Credit Hours:**  
123

---

1 Students who choose MATH 1038 must also take the linked course MATH 1039.

2 Biochemistry majors taking CHEM 3405 instead of CHEM 3301 cannot also receive Biochemistry elective credit for it. Biochemistry majors who want to take CHEM 4196 or the combination of CHEM 3397 & CHEM 3398 as a Biochemistry elective must take the CHEM 3301-CHEM 3302 sequence as CHEM 3405 does not serve as a prerequisite for these courses or any other course that has CHEM 3301 as a prerequisite or co-

requisite.
It is strongly encouraged that CHEM 3103/CHEM 3105 be taken prior to any laboratory courses numbered above CHEM 3105.

(F) - Fall only course  
(S) - Spring only course

**Biochemistry Electives**

Students are required to take two advanced biochemistry electives from the following list:

Select two of the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Term</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 3201</td>

The Bachelor of Arts in Chemistry is designed for students who are planning for a non-research career in a field related to Chemistry. Students learn a wide array of topics in Chemistry, Mathematics, and Physics. Students learn how to write scientific reports, analyze data, and place these results in a broader scientific context.

**Bachelor of Arts**

**Summary of Requirements for the Degree**

1. **University Requirements** (123 total s.h.)
   - MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
   - All Temple students must take a minimum of two writing-intensive courses in their major at Temple. For Chemistry majors, one must be CHEM 4196 and the second should be either CHEM 3397 or CHEM 3398.
   - Students must complete the General Education (GenEd) requirements.
     - The General Education Curriculum consists of approximately 25-26 s.h. See the General Education (p. 143) section of the *Undergraduate Bulletin* for the GenEd curriculum.
     - Students who complete CST majors typically receive a waiver for 2 Science & Technology (GS) and 1 Quantitative Literacy (GQ) GenEd courses.

2. **College Requirements**
   - 45 Upper Level (2000+) credits within the College of Science & Technology (CST) or the College of Liberal Arts (CLA).
   - 90 credits within the College of Science & Technology (CST) or the College of Liberal Arts (CLA).
   - Second (2nd) Level of a Foreign Language (1002).

3. **Major Requirements for Bachelor of Arts** (53 s.h.)

**Chemistry**

### Chemistry, B.S.

Dr. Robert Levis, Chair  
Beury Hall, Room 130  
215-204-7118

Dr. Spiridoula Matsika, Faculty Advisor (Last names A-G)  
Beury Hall, Room 242  
215-204-7703  
spiridoula.matsika@temple.edu

Dr. Robert Stanley, Faculty Advisor (Last names H-N)  
Beury Hall, Room 250B  
215-204-2027  
robert.stanley@temple.edu

Dr. Michael Zdilla, Faculty Advisor (Last names O-Z)  
Beury Hall, Room 440  
215-204-7886  
michael.zdilla@temple.edu

The Bachelor of Science in Chemistry prepares students for excellence in graduate or medical school, and employment in the chemical, biotechnological, or pharmaceutical industries. Students learn a wide array of topics in Chemistry, Mathematics, and Physics. The program emphasizes the "hands-on" nature of chemistry in laboratory courses, giving students the tools that chemists need to pursue research. They also learn how to write scientific reports, analyze data, and place these results in a broader scientific context. Accomplished majors are encouraged to pursue independent research with a professor, and to present their work internally and at national meetings.

### Bachelor of Science

#### Summary of Requirements for the Degree

1. University Requirements (123 total s.h.)
   - MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
   - All Temple students must take a minimum of two writing-intensive courses at Temple as part of their major. Following is a list of courses that can be used to satisfy the writing-intensive requirement:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOL 2296</td>
<td>Genetics (S)</td>

<td></td>
</tr>
</tbody>
</table>

- Students must complete the General Education (GenEd) requirements.
  - The General Education Curriculum consists of approximately 25-26 s.h. See the General Education (p. 143) section of the Undergraduate Bulletin for the GenEd curriculum.
  - Students who complete CST majors typically receive a waiver for 2 Science & Technology (GS) and 1 Quantitative Literacy (GQ) GenEd courses.

2. College Requirements

- 45 Upper Level (2000+) credits within the College of Science & Technology (CST) or the College of Liberal Arts (CLA).
- 90 credits within the College of Science & Technology (CST) or the College of Liberal Arts (CLA).

3. Major Requirements for Bachelor of Science (70-74 s.h.)

<td>Honors General Physics II</td>
</tr>
</tbody>
</table>

**Total Credit Hours**

70-74

(F) - Fall only course
(S) - Spring only course

**Note:** CHEM 3091 is not available for major credit.

1 Only one of these may be counted as an advanced science course.

2 Students who choose MATH 1038 must also take the linked course MATH 1039.

**Calculation of Major GPA**

The list of courses that are used to calculate major GPA is determined by the department. Students should consult with their academic advising unit for the applicable courses. In general, courses that could not apply toward the major as an elective or a required course are not counted for the major GPA. This would include CHEM 1027, for example.
**Distinction in Major**

To graduate with Distinction in Major, students are required to achieve a 3.33 GPA or higher in all the Chemistry courses in their major.

**Suggested Academic Plan**

All prospective majors should schedule an appointment with one of the departmental advisors (names of current Faculty Advisors are available in the About section) to plan a program of study. The recommended order of courses for the major is listed below; a different order is acceptable as long as the student adheres to prerequisite requirements.

**Bachelor of Science in Chemistry**

**Total Credit Hours:** 123

1. Students who choose MATH 1038 must also take the linked course MATH 1039.
2. It is strongly encouraged that CHEM 3103/CHEM 3105 be taken before all chemistry laboratory courses numbered above 3105.
3. Advanced Chemistry Courses for B.S. students consist of all courses in Chemistry having a number of 4002 or above. If the student has successfully completed the appropriate prerequisite course, a graduate course in Chemistry may be included in this category.
4. In order for the B.S. degree to be certified by the American Chemical Society (ACS), the student must take CHEM 4401 Biochemistry I and either CHEM 4003 Inorganic Synthesis or BIOL 4344 Research Techniques in Biochemistry. Further, two additional advanced courses (CHEM 4002 or higher or BIOL 4376) of at least 3 credits must be successfully completed to fulfill the ACS mandated requirement of four in-depth courses. Finally, in order to fulfill the ACS mandated requirement of 400 laboratory hours excluding General Chemistry, each student must complete either CHEM 4207 Advanced Organic Preparations OR any two (2) of the following: CHEM 4004 Crystallography and Diffraction; CHEM 4103 Instrumental Design; CHEM 4107 Drug Analysis; CHEM 4108 Investigative Chemistry; BIOL 4344 Research Techniques in Biochemistry, or one instance may be a research course of at least 3 credits of (CHEM 3881 Cooperative Research, CHEM 3891 Undergraduate Research, or CHEM 4891 Undergraduate Research).

**Advanced Science Courses**

Only one of the following may be counted as an advanced science course:

**Advanced Science Courses**

Only one of the following may be counted as an advanced science course:
Computer & Information Science

Dr. Jie Wu, Chair
Science Education and Research Center, Room 304
215-204-8450

Sally Kyvernitis, Faculty Advisor, Computer Science
Science Education and Research Center, Room 330
215-204-2030
sallyk@temple.edu

Ms. Wendy Urban, Faculty Advisor, Information Science and Technology
Science Education and Research Center, Room 352
215-204-5236
wendy.urban@temple.edu

Science and technology are the foundations of our future. The Department of Computer and Information Sciences (CIS) is focused on the understanding of fundamental scientific principles and the application of these principles to solving complex problems, using computing technology. In order to meet current and future information and technology needs, the CIS Department offers two undergraduate programs: Computer Science (CS) and Information Science and Technology (IS&T).

The CS curriculum provides an in-depth study of the science of computing, including computer systems, software design and implementation, math and theory. Elective courses are offered in many areas, including mobile and web application development, security (digital forensics, intrusion detection, ethical hacking, network and information security), intelligent systems (artificial intelligence, computer vision, graphics, robotics, game programming), data science (databases, bioinformatics), systems programming (operating systems, high performance computing, distributed and cloud computing), and networks (wireless and sensor networks, ad hoc networks). The program is targeted to students with a strong interest in software design and development with a strong foundation in math, theory, and system software. Our students are involved in innovative research and product development; they have careers in systems and applications development, systems analysis and consulting. Many of our students continue onto graduate study and research in computer and information sciences.

The IS&T curriculum focuses on the skills of applying technologies to solving problems in computing. The technologies and methods include databases, web and mobile application development, client-server computing, network security, project management, software engineering principles, and quality assurance methodologies. The program is targeted for students who have a strong interest in applying computing technologies to solving problems in
science, business, education, and government agencies. Our IS&T graduates are also involved in innovative product developments. They hold jobs as consultants, network engineers, business and systems analysts, database administrators, and web and application developers.

Each of these programs leads to either a BA or a BS degree in order to accommodate students with diverse backgrounds and interests.

The department also offers a Mathematics and Computer Science program intended for students who are interested in computer science and mathematical computing. It provides a solid knowledge of theoretical computer science and its mathematical foundations and compares favorably with other theoretically-oriented computer science programs. The program is particularly recommended to those students who are interested in pursuing a graduate degree in computer science or computational mathematics.

We also offer dual BS, accelerated BS and MS, dual PhD programs, and minors in CS, IS&T and Digital Media that are tailored to students who are interested in cross-disciplinary programs.

Temple's B.A. in Computer Science provides an in-depth study of the science of computing, including mathematical/theoretical foundations as well as systems and application software development. Students are prepared (but not required) to take electives in topics such as artificial intelligence, machine learning, robotics, computer vision, graphics, game programming, bioinformatics, databases, big data, mobile and web application development, cloud computing, high performance computing, wireless and sensor networks, network and information security, and digital forensics. Students who select the B.A. in Computer Science can often have a second major and still be able to graduate within four years. This program is for students with an interest in the fundamentals of computing, who want to apply their computer science knowledge to a second area of interest and/or contribute to innovative research and product development. Our students have careers in software development, systems analysis, and consulting; they are also prepared for graduate study and research in Computer and Information Sciences.

**Bachelor of Arts**

**Summary of Requirements for the Degree**

1. University Requirements (123 total s.h.)
   - MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
   - All Temple students must take a minimum of two writing intensive courses at Temple as part of their major: ENG 2696 and either CIS 4397 or CIS 4398.
• Students must complete the General Education (GenEd) requirements.
  • The General Education Curriculum consists of approximately 25-26 s.h. See the General Education (p. 143) section of the Undergraduate Bulletin for the GenEd curriculum.
  • Students who complete CST majors typically receive a waiver for 2 Science & Technology (GS) and 1 Quantitative Literacy (GQ) GenEd courses.

2. College Requirements
  • 45 Upper Level (2000+) credits within the College of Science & Technology (CST) or the College of Liberal Arts (CLA).
  • 90 credits within the College of Science & Technology (CST) or the College of Liberal Arts (CLA).
  • Two (2) Upper Level (2000+) Liberal Art courses.
  • Second (2nd) Level of a Foreign Language (1002).

3. Major Requirements for Bachelor of Arts (55 s.h.)

**Chemistry Sequence**

Select one Chemistry Lab Science A: 1

- CHEM 1021 & CHEM 1023
  - Introduction to Chemistry I and Introduction to Chemistry Laboratory I (Lab Science A)
- CHEM 1031 & CHEM 1033
  - General Chemistry I and General Chemistry Laboratory I (Lab Science A)
- CHEM 1951 & CHEM 1953
  - Honors General Chemical Science I and Honors Chemical Science Laboratory I (Lab Science A)

Select one Chemistry Lab Science B 1

- CHEM 1022 & CHEM 1024
  - Introduction to Chemistry II and Introduction to Chemistry Laboratory II (Lab Science B)
- CHEM 1032 & CHEM 1034
  - General Chemistry II and General Chemistry Laboratory II (Lab Science B)
- CHEM 1952 & CHEM 1954
  - Honors General Chemical Science II and Honors Chemical Science Laboratory II (Lab Science B)

**Earth & Environmental Science Sequence** 2

Select this Lab Science A

- EES 2001
  - Physical Geology

Select one Lab Science B (both have co-reg) 2

- EES 2011
  - Mineralogy I (Lab Science B with CHEM 1031 corequisite)
- EES 2061
  - Introduction to Geochemistry (Lab Science B with CHEM 1031 corequisite)

**Physics Sequence** 3

Select one Physics Lab Science A

- PHYS 1021
  - Introduction to General Physics I (for non Physics majors)
- PHYS 1061
  - Elementary Classical Physics I (Calculus based, for Physics majors)
- PHYS 2021
  - General Physics I (Calculus based)
- PHYS 2921
  - Honors General Physics I (F)

Select one Physics Lab Science B 3

- PHYS 1022
  - Introduction to General Physics II (for non Physics majors)
- PHYS 1062
  - Elementary Classical Physics II (Calculus based, for Physics majors)
- PHYS 2022
  - General Physics II (Calculus based)
- PHYS 2922
  - Honors General Physics II (S)

---

1. Students can choose to mix-and-match the Chemistry Sequence A and B courses. However, they must take at least 1 course from Chemistry Sequence A and 1 from Chemistry Sequence B. Note: Chemistry courses consist of a three-credit lecture plus a one-credit lab.

2. The Earth & Environmental Science (EES) sequence will require students to take CHEM 1031 as a co-requisite to either of the two EES Sequence B courses.

3. Students can choose to mix-and-match the Physics Sequence A and B courses. However, they must take at least 1 course from Physics Sequence A and 1 from Physics Sequence B.

---

**Calculation of Major GPA**

The list of courses that are used to calculate major GPA is determined by the department. Students should consult with their academic advising unit for the applicable courses. In general, courses that could not apply toward the major as an elective or a required course are not counted for the major GPA. This would include CIS 1056, for example.

**Distinction in Major**

To graduate with Distinction in Major, students are required to have a 3.50 or higher grade point average (GPA) both in the major and overall, as well as be recommended by the department of Computer & Information Science.

</table>
1. University Requirements (123 total s.h.)
   • MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
   • All Temple students must take a minimum of two writing-intensive courses at Temple as part of their major: ENG 2696 and either CIS 4397 or CIS 4398.
   • Students must complete the General Education (GenEd) requirements.
     • The General Education Curriculum consists of 25-26 s.h. See the General Education (p. 143) section of the Undergraduate Bulletin for the GenEd curriculum.
     • Students who complete CST majors typically receive a waiver for 2 Science & Technology (GS) and 1 Quantitative Literacy (GQ) GenEd courses.

2. College Requirements
   • 45 Upper Level (2000+) credits within the College of Science & Technology (CST) or the College of Liberal Arts (CLA).
   • 90 credits within the College of Science & Technology (CST) or the College of Liberal Arts (CLA).

3. Major Requirements for Bachelor of Science (72 s.h.)

**Total Credit Hours:** 19-20
Computer Security & Digital Forensics, Certificate

Dr. Jie Wu, Chair
Science Education and Research Center, Room 304
215-204-8450

Ms. Wendy Urban, Faculty Advisor
Science Education and Research Center, Room 352
215-204-5236
wendy.urban@temple.edu

This certificate is appropriate for CIS majors\(^1\) or experienced industry professionals\(^2\) who are interested in focusing in the security area. Students can add this to their existing CS, IS&T or CS/Math major. At least two of these courses CANNOT count towards the electives for the major. In other words, you need to have two distinct courses for the certificate that are not counting towards any major elective courses; one of the electives can count for both.

\(^1\) Matriculated students are primarily CIS majors due to prerequisites.
\(^2\) Non-matriculated students must have 2+ years of experience in the IT sector working in systems and network administration and/or security domains. Requires instructor permission.

Certificate Requirements

Prerequisites

Students desiring a Certificate in Computer Security & Digital Forensics must have already completed the following or have equivalent industry experience:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CIS 1068</td>
<td>Program Design and Abstraction</td>
<td>4</td>
</tr>
<tr>
<td>or CIS 1968</td>
<td>Honors Program Design and Abstraction</td>
<td></td>
</tr>
<tr>
<td>CIS 1166</td>
<td>Mathematical Concepts in Computing I</td>
<td>4</td>
</tr>
<tr>
<td>or CIS 1966</td>
<td>Honors Mathematical Concepts in Computing I</td>
<td></td>
</tr>
<tr>
<td>CIS 2229</td>
<td>Architecture, Operating Systems and Networking</td>
<td>4</td>
</tr>
<tr>
<td>or CIS 2107</td>
<td>Computer Systems and Low-Level Programming</td>
<td></td>
</tr>
<tr>
<td>CIS 2168</td>
<td>Data Structures</td>
<td></td>
</tr>
</tbody>
</table>

Total Credit Hours: 16

Required Courses

Students desiring a Certificate in Computer Security & Digital Forensics must complete the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CIS 3605</td>
<td>Introduction to Digital Forensics</td>
<td>3</td>
</tr>
<tr>
<td>CJ 1001</td>
<td>Introduction to Criminal Justice</td>
<td>3</td>
</tr>
<tr>
<td>or CJ 4007</td>
<td>Computer Crime</td>
<td></td>
</tr>
<tr>
<td>CIS 4378</td>
<td>Computer and Network Security</td>
<td>4</td>
</tr>
<tr>
<td>or CIS 3319</td>
<td>Wireless Networks and Security</td>
<td></td>
</tr>
</tbody>
</table>

Total Credit Hours: 10

Fundamentals of Programming, Certificate

Dr. Jie Wu, Chair
Science Education and Research Center, Room 304
215-204-8450

Ms. Wendy Urban, Faculty Advisor
Science Education and Research Center, Room 352
215-204-5236
wendy.urban@temple.edu
This certificate is appropriate for anyone interested in adding technology to your existing studies. Computer Science, Information Science and Technology, Math and Computer Science, or Math and Computer Science with Teaching majors cannot get this certificate. The certificate provides knowledge and skills in two programming languages as well as database knowledge.

Certificate Requirements

This certificate program is not open to Computer Science, Information Science and Technology, Math and Computer Science, or Math and Computer Science with Teaching majors. Students desiring a certificate in Fundamentals of Programming are required to satisfy the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CIS 1051</td>
<td>Introduction to Problem Solving and Programming in Python</td>
<td>4</td>
</tr>
<tr>
<td>or CIS 1057</td>
<td>Computer Programming in C</td>
<td>4</td>
</tr>
<tr>
<td>or CIS 1068</td>
<td>Program Design and Abstraction</td>
<td>4</td>
</tr>
<tr>
<td>or CIS 1968</td>
<td>Honors Program Design and Abstraction</td>
<td>4</td>
</tr>
<tr>
<td>CIS 2109</td>
<td>Database and File Management Systems</td>
<td>4</td>
</tr>
</tbody>
</table>

Total Credit Hours: 12

- If a student has taken CIS 1068 and CIS 2168, CIS 2168 should be substituted for CIS 1051/CIS 1057 to prevent backtracking.
- Additional courses needed to complete a CS minor are CIS 1166, CIS 2107, CIS 2168, and one CS elective.
- Additional courses need to complete an IS&T minor are CIS 1048, and two of (CIS 1166, CIS 2168, CIS 2229 or CIS 3xxx class).

Information Science & Technology, B.A.

Dr. Jie Wu, Chair
Science Education and Research Center, Room 304
215-204-8450

Ms. Wendy Urban, Faculty Advisor
Science Education and Research Center, Room 352
215-204-5236
wendy.urban@temple.edu

Students in the IS&T curriculum develop the skills and the knowledge necessary to analyze information problems and to apply current technology to their solution. The emphasis is to develop problem-solving and communication skills.

The technologies and methods include databases, web and mobile application development, client-server computing, network security, project management, software engineering principles, and quality assurance methodologies. A two-semester capstone project course is required. This course is designed to help students integrate what they have learned in other courses and apply this knowledge in the design and implementation of a software application.

The program is targeted for students who have a strong interest in applying computing technologies to solving problems in business, education, science, and government agencies. Our IS&T graduates are also involved in innovative product developments. They hold jobs as consultants, network engineers, business and systems analysts, database administrators, and web and application developers.

Bachelor of Arts

Summary of Requirements for the Degree

1. University Requirements (123 total s.h.)
   - MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
   - All Temple students must take a minimum of two writing intensive courses at Temple as part of their major. Following is a list of courses that can be used to satisfy the writing-intensive requirement: CIS 4296 and CIS 4396.
   - Students must complete the General Education (GenEd) requirement.
     - The General Education Curriculum consists of approximately 25-26 s.h. See the General Education (p. 143) section of the Undergraduate Bulletin for the GenEd curriculum.
     - Students who complete CST majors typically receive a waiver for 2 Science & Technology (GS) and 1 Quantitative Literacy (GQ) GenEd courses.

2. College Requirements
   - 90 credits within the College of Science & Technology (CST) or the College of Liberal Arts (CLA).
   - 45 Upper Level (2000+) credits within the College of Science & Technology (CST) or the College of Liberal Arts (CLA).
   - Second (2nd) Level of a Foreign Language (1002).
3. Major Requirements for Bachelor of Arts (60 s.h.)

PHYS 2022
General Physics II (Calculus based)

PHYS 2922
Honors General Physics II (S)

1 Students can choose to mix-and-match the Chemistry Sequence A and B courses. However, they must take at least 1 course from Chemistry Sequence A and 1 from Chemistry Sequence B. Note: Chemistry courses consist of a three-credit lecture plus a one-credit lab.

2 The Earth & Environmental Science (EES) sequence will require students to take CHEM 1031 as a co-requisite to either of the two EES Sequence B courses.

3 Students can choose to mix-and-match the Physics Sequence A and B courses. However, they must take at least 1 course from Physics Sequence A and 1 from Physics Sequence B.

Calculation of Major GPA

The list of courses that are used to calculate major GPA is determined by the department. Students should consult with their academic advising unit for the applicable courses. In general, courses that could not apply toward the major as an elective or a required course are not counted for the major GPA. This would include CIS 1056, for example.

Distinction in Major

To graduate with Distinction in Major, students are required to have a 3.50 or higher grade point average (GPA) both in the major and overall, as well as be recommended by the department of Computer & Information Science.

Suggested Academic Plan

Bachelor of Arts in Information Science & Technology

1 IS&T majors are required to have completed MATH 1022. They can then choose either MATH 1031, MATH 1038\(^2\), MATH 1041 or MATH 1941.
2 Students who choose MATH 1038 must also take the linked course MATH 1039.

### Information Science & Technology, B.S.

Dr. Jie Wu, Chair  
Science Education and Research Center, Room 304  
215-204-8450

Ms. Wendy Urban, Faculty Advisor  
Science Education and Research Center, Room 352  
215-204-5236
Students in the IS&T curriculum develop the skills and the knowledge necessary to analyze information problems and to apply current technology to their solution. The emphasis is to develop problem-solving and communication skills.

The technologies and methods include databases, web and mobile application development, client-server computing, network security, project management, software engineering principles, and quality assurance methodologies. A two-semester capstone project course is required. This course is designed to help students integrate what they have learned in other courses and apply this knowledge in the design and implementation of a software application.

The program is targeted for students who have a strong interest in applying computing technologies to solving problems in business, education, science, and government agencies. Our IS&T graduates are also involved in innovative product developments. They hold jobs as consultants, network engineers, business and systems analysts, database administrators, and web and application developers.

The BS program gives students the further opportunity to explore their interests in the variety of electives available to them.

Other courses communicated to the students from the IS&T Faculty Advisor.

**Laboratory Science Courses**

Two (2) laboratory science courses 8

**Total Credit Hours**

72-76

(F) - Fall only course

(S) - Spring only course

1 IS&T majors are required to have completed MATH 1022. They can then choose either MATH 1031, MATH 1038, MATH 1041 or MATH 1941.

2 Students who choose MATH 1038 must also take the linked course MATH 1039.

3 A maximum of two sections may be taken from CIS 3281 and CIS 4282. CIS 3281 may be taken once within this two-section sequence.

4 Must select within a Sequence for Laboratory Science A and Laboratory Science B. See the Sequenced Laboratory Science list below for the science options.

- Students may also select other 3000-level Computer & Information Science courses for which they meet the prerequisites as long as that course is not already used for the IS&T degree.
- No more than two courses that do not have formal classes and a text, such as Independent Study, Directed Study, and co-op may be used to satisfy the elective requirement. In addition, the co-op course may only be taken once.
- Students with senior standing and a minimum overall 3.25 GPA may also request permission from both the IS&T advisor and course instructor to use graduate courses (5xxx level) as electives.

In general, courses that could not apply toward the major as an elective or a required course are not counted for the major GPA. This would include CIS 1056, for example.

**Distinction in Major**

To graduate with Distinction in Major, students are required to have a 3.50 or higher grade point average (GPA) both in the major and overall, as well as be recommended by the department of Computer & Information Science.

Information Science & Technology, Minor

Dr. Jie Wu, Chair
Science Education and Research Center, Room 304
215-204-8450

Ms. Wendy Urban, Faculty Advisor
Science Education and Research Center, Room 352
215-204-5236
wendy.urban@temple.edu

Minor Requirements

Students desiring a minor in Information Science and Technology are required to satisfy the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CIS 1048</td>
<td>Introduction to IS&amp;T</td>
<td>3</td>
</tr>
<tr>
<td>CIS 1068</td>
<td>Program Design and Abstraction</td>
<td>4</td>
</tr>
<tr>
<td>or CIS 1968</td>
<td>Honors Program Design and Abstraction</td>
<td></td>
</tr>
</tbody>
</table>

Plus any 3 courses from (CIS 1166, CIS 2168, CIS 2109, CIS 2229, 3xxx level CIS course with faculty advisor approval). For CS majors who want an IS&T minor, you need to take CIS 2109, CIS 3309 and a 3xxx-level IS&T course distinct from your CS courses (selected with IS&T faculty advisor). If you took CIS 4331, you cannot take CIS 2109 and will need to see the faculty advisor for a replacement course. You need 3 distinct courses from your CS major and CIS 1048 does not count.

Total Credit Hours: 16-19

Mathematics & Computer Science, B.S.

Dr. Jie Wu, Chair, Computer & Information Science
Science Education and Research Center, Room 304
215-204-8450

Dr. Anthony Hughes, Faculty Advisor for Mathematics & Computer Science
Science Education and Research Center, Room 341
215-204-7910
anthony.hughes@temple.edu

Dr. Edward Letzter, Chair, Mathematics
Wachman Hall, Room 638
215-204-7841

Dr. Boris Datskovsky, Director of Undergraduate Studies, Mathematics
Wachman Hall, Room 632
215-204-7847
bdats@temple.edu

This program is intended for students who are interested in computer science and mathematical computing. It provides a solid knowledge of theoretical computer science and its mathematical foundations and compares favorably with other theoretically-oriented computer science programs. The program is particularly recommended to those students who are interested in pursuing a graduate degree in computer science or computational mathematics.
Bachelor of Science

Summary of Requirements for the Degree

1. University Requirements (123 total s.h.)
   - MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
   - All Temple students must take a minimum of two writing-intensive courses at Temple as part of their major. Following is a list of courses that can be used to satisfy the writing-intensive requirement:
     - CIS 4397 Independent Research in Computer Science
     - CIS 4398 Projects in Computer Science
     - MATH 3098 Modern Algebra
     - MATH 4096 Senior Problem Solving
   - Students must complete the General Education (GenEd) requirements.
   - The General Education Curriculum consists of approximately 25-26 s.h. See the General Education (p. 143) section of the Undergraduate Bulletin for the GenEd curriculum.
   - Students who complete CST majors typically receive a waiver for 2 Science & Technology (GS) and 1 Quantitative Literacy (GQ) GenEd courses.

2. College Requirements
   - 90 credits within the College of Science & Technology (CST) or the College of Liberal Arts (CLA).
   - 45 Upper Level (2000+) credits within the College of Science & Technology (CST) or the College of Liberal Arts (CLA).

3. Major Requirements for Bachelor of Science (72-73 s.h.)

   **Computer & Information Science courses**
   - CIS 1068 Program Design and Abstraction
   - or CIS 1968 Honors Program Design and Abstraction
   - CIS 1166 Mathematical Concepts in Computing I
   - or CIS 1966 Honors Mathematical Concepts in Computing I
   - CIS 2107 Computer Systems and Low-Level Programming
   - CIS 2166 Mathematical Concepts in Computing II
   - CIS 2168 Data Structures
   - CIS 3207 Introduction to Systems Programming and Operating Systems
   - CIS 3223 Data Structures and Algorithms
   - Select one of the following:
     - CIS 3238 Software Design (S)
     - 3000+ CIS Elective

   **Mathematics courses**
   - MATH 1038 Calculus I with Lab
   - MATH 1041 Calculus I
   - MATH 1941 Honors Calculus I
   - MATH 1042 Calculus II
   - or MATH 1942 Honors Calculus II
   - MATH 2043 Calculus III
   - or MATH 2943 Honors Calculus III
   - Select one of the following:
     - MATH 2101 Linear Algebra
     - MATH 2103 Linear Algebra with Computer Lab
     - MATH 2111 Basic Concepts of Math
     - MATH 3031 Probability Theory I
     - MATH 3096 Introduction to Modern Algebra
     - or MATH 3098 Modern Algebra
     - MATH 3137 Real & Complex Analysis I (F)
     - or MATH 3043 Numerical Analysis I
   - Select one of the following:
<table>
<thead>
<tr>
<th>Course</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 3138</td>
<td>Real &amp; Complex Analysis II (S)</td>
</tr>
<tr>
<td>3000+ MATH Elective</td>
<td></td>
</tr>
</tbody>
</table>

### Science courses

Select one of the following sequences: 8

<table>
<thead>
<tr>
<th>Course</th>

</tr>
<tr>
<td>PHYS 2921</td>
<td>Honors General Physics I</td>
</tr>
<tr>
<td>&amp; PHYS 2922</td>
<td>and Honors General Physics II</td>
</tr>
</tbody>
</table>

### Capstone course

Select one of the following: 3

<table>
<thead>
<tr>
<th>Course</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>CIS 4397</td>
<td>Independent Research in Computer Science 3</td>
</tr>
<tr>
<td>CIS 4398</td>
<td>Projects in Computer Science 3</td>
</tr>
<tr>
<td>MATH 4096</td>
<td>Senior Problem Solving 3</td>
</tr>
</tbody>
</table>

### Total Credit Hours

72-73

(F) - Fall only course  
(S) - Spring only course

1. Must be approved by Computer & Information Science faculty advisor.
2. Students who choose MATH 1038 must also take the linked course MATH 1039.
3. CIS 3238 is the prerequisite for CIS 4397 and CIS 4398 and should be taken as a 3000+ Computer & Information Science elective, if you plan to take CIS 4397 or CIS 4398 as the capstone course. MATH 3138 is one of the prerequisites for MATH 4096 and should be selected as a 3000+ Math elective if you plan to take MATH 4096 as the capstone course.

### Calculation of Major GPA

The list of courses that are used to calculate major GPA is determined by the department. Students should consult with their academic advising unit for the applicable courses. In general, courses that could not apply toward the major as an elective or a required course are not counted for the major GPA. This would include MATH 1022, for example.

### Distinction in Major

To graduate with Distinction in Mathematics & Computer Science, a student should meet the following requirements:

1. At the time of graduation, the student's overall grade point average (GPA), including all college-level courses, must be at least 3.50.
2. Students must have a 3.50 or higher grade point average in the 3000+ level Computer Science courses.
3. Students must have a GPA of 3.50 or higher in their 3000+ level Mathematics courses.
4. Students must complete MATH 3098 and one of the following two-semester analysis sequences:

<table>
<thead>
<tr>
<th>Course</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 3043</td>
<td>Numerical Analysis I</td>
</tr>
<tr>
<td>&amp; MATH 3044</td>
<td>and Numerical Analysis II</td>
</tr>
<tr>
<td>MATH 3137</td>
<td>Real &amp; Complex Analysis I</td>
</tr>
<tr>
<td>&amp; MATH 3138</td>
<td>and Real &amp; Complex Analysis II</td>
</tr>
<tr>
<td>MATH 3141</td>
<td>Advanced Calculus I</td>
</tr>
<tr>
<td>&amp; MATH 3142</td>
<td>and Advanced Calculus II</td>
</tr>
</tbody>
</table>

CIS 3238 is the prerequisite for CIS 4397 and CIS 4398 and should be taken as a 3000+ Computer & Information Science elective, if you plan to take CIS 4397 or CIS 4398 as the capstone course.

**Earth & Environmental Science**

Dr. Jonathan Nyquist, Chair  
Beury Hall, Room 326  
215-204-7172

Dr. Allison Tumarkin-Deratzian, Faculty Advisor  
Beury Hall, Room 315B  
215-204-2321  
altd@temple.edu
The Department of Earth and Environmental Science offers students the opportunity to study the Earth with a variety of traditional and environmental geology course work. The faculty work closely with students to give a combination of field-based experience and current laboratory and computational techniques. The Department offers B.A. and B.S. degrees in Geology and advises students receiving the B.S. degree in Environmental Science.

Programs

- Earth & Space Science with Teaching, B.S. (p. )

Beury Hall, Room 315B
215-204-2321
altd@temple.edu

Students will be equipped with the scholarly background and intellectual skills to understand a wide range of pressing environmental issues, and they will come to appreciate the physical, economic, political, demographic, and ethical factors that define those issues. Among the many environmental problems central to our program are groundwater contamination, suburban sprawl, river basin management, environmental justice, and the greening of abandoned urban spaces. Our graduates find employment with government environmental agencies, citizens’ organizations, consulting firms, and corporate environmental affairs departments.

Bachelor of Science

Summary of Requirements for the Degree

1. University Requirements (123 total s.h.)
   - MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
   - All Temple students must take a minimum of two writing-intensive courses at Temple as part of their major. Following is a list of courses that can be used to satisfy the writing-intensive requirement:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>EES 2096</td>
<td>Climate Change: Oceans To Atmosphere (S)</td>

ENST 4896  Environmental Physiology  3
HORT 2334  Food Crops I  3
HORT 2353  Food Crops II  3
HORT 3514  Landscape Restoration  3

**Note:** EES 3091 is not available for major credit.

1. One hydrology course is a required course. The second course may be taken as an elective.

(F) - Fall only course
(S) - Spring only course
(SS) - Summer session only

**Note:** A grade of C or higher in CHEM 1031 and CHEM 1032 is required to take BIOL 1111 and BIOL 2112. A grade of C or higher in BIOL 1111 and BIOL 2112 is required to take upper-level Biology courses, and a C- or higher is required unless otherwise specified in all other courses for the major, including course prerequisites.

**Calculation of Major GPA**
The list of courses that are used to calculate major GPA is determined by the department. Students should consult with their academic advising unit for the applicable courses. In general, courses that could not apply toward the major as an elective or a required course are not counted for the major GPA. This would include CHEM 1027, for example.

**Distinction in Major**
To graduate with Distinction in Major, students are required to achieve a 3.5 GPA for courses required for the major. If the difficulty of courses chosen as electives is high, then a 3.3 GPA will earn Distinction in Major. This determination will be made by the appropriate faculty. In addition, a student graduating with distinction has no grade below C in the remaining courses required for the major.
Suggested Academic Plan

Please note that this is a suggested academic plan. Depending on your situation, your academic plan may look different.

**Geology, B.A.**

Dr. Jonathan Nyquist, Chair  
Beury Hall, Room 326  
215-204-7172

Dr. Allison Tumarkin-Deratzian, Faculty Advisor  
Beury Hall, Room 315B  
215-204-2321  
altd@temple.edu

The B.A. program is not intended for prospective geologists. The B.A. program is suitable for pre-medicine or pre-law students or for students planning to teach earth science in secondary schools.

**Bachelor of Arts**

**Summary of Requirements for the Degree**

1. **University Requirements (123 total s.h.)**
   - MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
• All Temple students must take a minimum of two writing-intensive courses at Temple as part of their major. Following is a list of courses that can be used to satisfy the writing-intensive requirement: EES 2096, EES 2097, EES 3096, or EES 4696.

• Students must complete the General Education (GenEd) requirements.
  • The General Education Curriculum consists of approximately 25-26 s.h. See the General Education (p. 143) section of the Undergraduate Bulletin for the GenEd curriculum.
  • Students who complete CST majors typically receive a waiver for 2 Science & Technology (GS) and 1 Quantitative Literacy (GQ) GenEd courses.

2. College Requirements
• 90 credits within the College of Science & Technology (CST) or the College of Liberal Arts (CLA).
• 45 Upper Level (2000+) credits within the College of Science & Technology (CST) or the College of Liberal Arts (CLA).
• Two (2) Upper-Level (2000+) Liberal Arts courses.
• Second (2nd) Level of a Foreign Language (1002).

3. Major Requirements for Bachelor of Arts (55-56 s.h.)

Chemistry

</tbody>
</table>
1 Students who choose MATH 1038 must also take the linked course MATH 1039.
2 Two (2) of the five (5) EES electives must be writing-intensive and one (1) of the five (5) EES elective courses can be outside of the department with faculty advisor approval.
3 One foundation course must be within mathematics and two foundation courses must be within science.

Calculation of Major GPA
The list of courses that are used to calculate major GPA is determined by the department. Students should consult with their academic advising unit for the applicable courses. In general, courses that could not apply toward the major as an elective or a required course are not counted for the major GPA. This would include CHEM 1027, for example.

Senior Research Project
Students whose cumulative GPA is at least 3.25 at the end of the first semester of their junior year are eligible to undertake a senior research project. In the second semester of their junior year, students must select a faculty research advisor and, with the advisor, prepare a written research proposal. After the research advisor and the undergraduate Earth & Environmental Science advisor approve the proposal, the student may register for up to four (4) hours of EES 4082 Individual Study Program for a grade. Additional credits may be offered in subsequent semesters, but only for Credit/Non-Credit (CR/NC), to carry out the research project. Normally, the project will involve field or laboratory work in the summer between the junior and senior years and lead to presentation of the results at a departmental seminar.

Distinction in Major
To graduate with distinction in the major, students are required to achieve a 3.5 GPA in EES and Upper Level Science Electives for the major. In addition, a student graduating with distinction has no grade below C in the remaining courses required for the major.

altd@temple.edu

The B.S. program prepares students for immediate entry into a career in geology or for graduate studies. Career opportunities for geologists in industry and government include environmental and geohazard assessment, evaluation of waste disposal sites, groundwater modeling, and exploration for natural resources. The B.S. program is excellent preparation for graduate study and ultimately for a career in research, teaching, industry, or government.

The B.S. program includes an intensive 4-6 week summer course in Field Geology, typically taken in the summer following the Junior or Senior year.

Bachelor of Science

Summary of Requirements for the Degree

1. University Requirements (123 total s.h.)
   - MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
   - All Temple students must take a minimum of two writing-intensive courses at Temple as part of their major. Following is a list of courses that can be used to satisfy the writing intensive requirement: EES 2096, EES 2097, EES 3096, or EES 4696.
   - Students must complete the General Education (GenEd) requirements.
     - The General Education Curriculum consists of approximately 25-26 s.h. See the General Education (p. 143) section of the Undergraduate Bulletin for the GenEd curriculum.
     - Students who complete CST majors typically receive a waiver for 2 Science & Technology (GS) and 1 Quantitative Literacy (GQ) GenEd courses.

2. College Requirements
   - 90 credits within the College of Science & Technology (CST) or the College of Liberal Arts (CLA).
   - 45 Upper Level (2000+) credits within the College of Science & Technology (CST) or the College of Liberal Arts (CLA).

3. Major Requirements for Bachelor of Science (70-73 s.h.)

   Chemistry
   Select one of the following: 4
   - CHEM 1031 & CHEM 1033: General Chemistry I and General Chemistry Laboratory I
   - CHEM 1951 & CHEM 1953: Honors General Chemical Science I and Honors Chemical Science Laboratory I (F)

   Mathematics
   Select one of the following: 4
   - MATH 1038: Calculus I with Lab

</table>

### Total Credit Hours

70-73

(F) - Fall only course

(S) - Spring only course

1. Students who choose MATH 1038 must also take the linked course MATH 1039.
2. The B. S. program includes an intensive 4-6 week summer course in Field Geology, typically taken in the summer following the junior or senior year.
One of the four electives must be writing intensive.

**NOTE:** Science Foundation Electives (SFE) and Science Upper-Level Electives (SUE) courses cannot be double-counted.

**Calculation of Major GPA**

The list of courses that are used to calculate major GPA is determined by the department. Students should consult with their academic advising unit for the applicable courses. In general, courses that could not apply toward the major as an elective or a required course are not counted for the major GPA. This would include CHEM 1027, for example.

**Senior Research Project**

Students whose cumulative GPA is at least 3.25 at the end of the first semester of their junior year are eligible to undertake a senior research project. In the second semester of their junior year, students must select a faculty research advisor and, with the advisor, prepare a written research proposal. After the research advisor and the undergraduate Earth & Environmental Science advisor approve the proposal, the student may register for up to four (4) hours of EES 4082 Individual Study Program for a grade. Additional credits may be offered in subsequent semesters, but only for Credit/Non-Credit (CR/NC), to carry out the research project. Normally, the project will involve field or laboratory work in the summer between the junior and senior years and lead to presentation of the results at a departmental seminar.

**Distinction in Major**

To graduate with distinction in the major, students are required to achieve a 3.5 GPA in EES and Upper Level Science Electives for the major. In addition, a student graduating with distinction has no grade below C in the remaining courses required for the major.

**Suggested Academic Plan**

**Bachelor of Science in Geology**

**Requirements for New Students starting in the 2015-2016 Academic Year**

Total Credit Hours: 123

(F) - Fall only course  
(S) - Spring only course  
(SS) - Summer Session

1. Students who choose MATH 1038 must also take the linked course MATH 1039.
2. Summer field camp is required of all B.S. geology majors and is usually taken in the summer of the junior or senior year. Students choose summer field camps at other institutions which are typically 4-6 weeks in length with tuition typically ranging from $2,000 to $4,000. The Earth & Environmental Science Department holds fundraisers throughout the year to help defray the costs. Students may also apply for research scholarships at CST and at the university. The Earth & Environmental Science undergraduate advisor must approve the choice of field camp.

### Science Foundation Electives

NOTE: Two courses required from this list.

</tr>
</tbody>
</table>

Science Foundation Electives (SFE) and Science Upper-Level Electives (SUE) courses cannot be double-counted.

Earth & Environmental Science electives must be above 2001, and at least one must be writing-intensive. At most, one of the EES electives or SUEs may be a graduate-level course with permission of the faculty advisor.

**Geology, Minor**

Dr. Jonathan Nyquist, Chair  
Beury Hall, Room 326  
215-204-7172  

Dr. Allison Tumarkin-Deratzian, Faculty Advisor  
Beury Hall, Room 315B  
215-204-2321  
altd@temple.edu

Students interested in acquiring a basic knowledge of Geology but not wishing to major in Geology may pursue a minor in Geology by successfully completing the following courses:

<table>

</tbody>
</table>

Four Earth & Environmental Science electives numbered above 2001, with a minimum of 14 credits, chosen with the approval of the undergraduate Earth & Environmental Science advisor.  

**Total Credit Hours**  
26  

(F) - Fall only course
Students who choose MATH 1038 must also take the linked course MATH 1039.

Mathematics

Dr. Edward Letzter, Chair
Wachman Hall, Room 638
215-204-7841

Dr. Boris Datskovsky, Associate Chair
Wachman Hall, Room 632
215-204-7847
mathadvising@temple.edu

Dr. Maria E. Lorenz, Undergraduate Chair
Wachman Hall, Room 542
215-204-6764
mathadvising@temple.edu

The mathematics major prepares students for careers, graduate study, and professional programs requiring solid mathematical, quantitative, or analytical skills.

There are several degree programs from which to choose:

• Bachelor of Arts in Mathematics,
• Bachelor of Science in Mathematics,
• Bachelor of Science in Applied Mathematics,
• Bachelor of Science in Mathematics with Teaching, and
• Joint programs with Computer and Information Science, Economics, and Physics

The Bachelor of Arts in Mathematics provides a solid mathematical foundation and also allows for the most flexibility.

The Bachelor of Science in Mathematics provides an in-depth theoretical background focusing on the traditional core areas of mathematics. This program provides a foundation for graduate study or careers in fields using sophisticated quantitative and mathematical analysis. In particular, this program is suitable preparation for graduate study in mathematics.

The Bachelor of Science in Applied Mathematics focuses on mathematical and computational methods applicable in the sciences, engineering, and industry. In particular, this degree is suitable preparation for professions featuring sophisticated mathematical modeling and/or scientific computing. This degree is also suitable preparation for graduate study in applied mathematics or related disciplines.

The Bachelor of Science in Mathematics with Teaching program is aimed at students interested in teaching mathematics at the high school level. This program combines a solid mathematical foundation with the pedagogical training necessary for success as a high school teacher. This program also satisfies Pennsylvania's teacher certification requirements.

Five-year combined bachelor's and master's programs are also available.

Students should consult with an advisor to design a program best fitted to their interests and goals.

Programs

• Applied Mathematics, B.S. (p. 1135)
• Mathematical Economics, B.A. (p. 1138)
• Mathematics & Computer Science, B.S. (p.  )
• Mathematics & Physics, B.S. (p.  )
• Mathematics & Technology with Teaching, B.S. (p.  )
• Mathematics with Teaching, B.S. (p.  )
• Mathematics, B.A. (p. 1138)
• Mathematics, B.A./M.Ed. (p.  )
• Mathematics, B.A./M.S. (p.  )
• Mathematics, B.S. (p. 1142)
• Mathematics, B.S./M.Ed. (p.  )
• Mathematics, B.S./M.S. (p. 1135)
• Mathematics, Minor (p. 1145)
• Mathematics/Computer Science with Teaching, B.S. (p. 1145)

## Applied Mathematics, B.S.

Dr. Edward Letzter, Chair, Mathematics  
Wachman Hall, Room 638  
215-204-7841

Dr. Boris Datskovsky, Associate Chair  
Wachman Hall, Room 632  
215-204-7847  
mathadvising@temple.edu

Dr. Maria E. Lorenz, Undergraduate Chair  
Wachman Hall, Room 542  
215-204-6764  
mathadvising@temple.edu

The Bachelor of Science in Applied Mathematics focuses on mathematical and computational methods applicable in the sciences, engineering, and industry. In particular, this degree is suitable preparation for professions featuring sophisticated mathematical modeling and/or scientific computing. This degree is also suitable preparation for graduate study in applied mathematics or related disciplines.

Students should consult with an advisor to design a program best fitted to their interests and goals.

## Bachelor of Science

### Summary of Requirements for the Degree

1. University Requirements (123 total s.h.)
   - MATH 0701 (4 s.h.) and/or ENG 0701 (4 s.h.), if required by placement testing.
   - All Temple students must take a minimum of two writing-intensive courses at Temple as part of their major. Following is a list of courses that can be used to satisfy the writing-intensive requirement:
     - MATH 3096: Introduction to Modern Algebra 3 s.h.
     - or MATH 3098: Modern Algebra 3 s.h.
     - MATH 4096: Senior Problem Solving 3 s.h.
   - Students must complete the General Education (GenEd) requirements.
     - The General Education Curriculum consists of approximately 25-26 s.h. See the General Education (p. 143) section of the Undergraduate Bulletin for the GenEd curriculum.
     - Students who complete CST majors typically receive a waiver for 2 Science & Technology (GS) and 1 Quantitative Literacy (GQ) GenEd courses.

2. College Requirements
   - 90 credits within the College of Science & Technology (CST) or the College of Liberal Arts (CLA).
   - 45 Upper-Level (2000+) credits within the College of Science & Technology (CST) or the College of Liberal Arts (CLA).

3. Major Requirements for Bachelor of Science (66-67 s.h.)

Physics courses
Select one of the following: 4
PHYS 1061 Elementary Classical Physics I
PHYS 2021 General Physics I
PHYS 2921 Honors General Physics I (F)
Select one of the following: 4
PHYS 1062 Elementary Classical Physics II
PHYS 2022 General Physics II
PHYS 2922 Honors General Physics II (S)

Total Credit Hours 66-67

(F) - Fall only course
(S) - Spring only course

1 Students who choose MATH 1038 must also take the linked course MATH 1039.

Calculation of Major GPA
The list of courses that are used to calculate major GPA is determined by the department. Students should consult with their academic advising unit for the applicable courses. In general, courses that could not apply toward the major as an elective or a required course are not counted for the major GPA. This would include MATH 1022, for example.

Distinction in Major
To graduate with Distinction in Applied Mathematics a student should meet the following requirements:

1. All requirements for the degree in Applied Mathematics must be met with a GPA of at least 3.50 in the Mathematics courses.
2. At the time of graduation, the student's overall GPA, including all college-level courses, must be at least 3.25.
3. Students must complete MATH 3098 instead of MATH 3096 in order to qualify for a Distinction in Major.
4. A student must have a GPA of 3.50 or higher in MATH 3141, MATH 3142, MATH 3098, MATH 4051 and any additional courses from the following list:
   MATH 3043 Numerical Analysis I 4
   MATH 3044 Numerical Analysis II 3
   MATH 3101 Topics in Modern Algebra 3

Any 4000-level course other than individual study
