The College of Education at Temple University promotes education – in schools, in the workplace, in organizations, and in the community – as a critically important way to achieve social justice. Our mission is to prepare our students to become agents of change who employ cutting-edge understandings and evidence-based practices in any setting in which they might work. Our faculty include experts not only in early childhood/elementary, middle-grades, and secondary teacher education, but also in adult and organizational development, applied behavior analysis, career and technical education, counseling psychology, higher education, leadership, school psychology, special education, teaching English to speakers of other languages, and urban education.

In our research, we work both to conduct well-designed investigations that have the potential to improve learning and teaching, especially for historically underserved populations, and to provide effective mentorship of master's and doctoral students so that they can engage in similar kinds of investigations on their own. In our teaching, we strive to infuse empirical findings into our coursework in ways that provide practitioners and prospective practitioners with deep understandings of research and theory and of effective practice. As a result of our strategic location in North Philadelphia and our long history of collaboration with the School District of Philadelphia and other community partners, the College of Education is uniquely situated to bring its research and teaching into practice in order to have a collective impact in the surrounding neighborhoods. We also endeavor, however, to bring our work to the largest possible audience in the city of Philadelphia, the region, and the nation, as well as globally.
