Accelerated Degree Programs

Temple University offers several Accelerated Degree Programs arranged between undergraduate and graduate or professional schools and colleges. These programs enable academically qualified students to earn a bachelor's and an advance degree - graduating sooner than they would have completing two distinct programs.

+1 Undergraduate/Graduate Accelerated Programs

Eligible undergraduate students use up to 12 specified graduate credits approved by the school/college to fulfill requirements for their undergraduate degree. Upon graduation from their undergraduate program, students move seamlessly into their graduate program, which they complete, in most cases, in one additional year. Students should meet with their advisor as soon as possible to discuss requirements for eligibility and the application process.

3+3, 3+4 Undergraduate/Professional Accelerated Programs
Eligible undergraduate students complete their undergraduate degree with coursework required in the first year of a professional school. To be eligible the student must be accepted into the professional school program. Students selected to participate finish their professional studies more quickly.
Accelerated Scholar Programs allow Pre: Medicine, Dentistry, Pharmacy, and Podiatry (3+4 Tracks) students as well as Physical Therapy (3+3 Track) students the option of earning both their Bachelor's degree and Graduate Degrees in a shorter period of time after successful passing all courses in the first year of professional school. To be eligible, the student must be accepted into the professional school program and successfully complete the first year of study at one of the professional programs listed above.

Students interested in this type of accelerated program should contact Kimberly Buck-Speck in the Office of Pre-Professional Health Studies as early in their undergraduate academic career as possible to discuss eligibility, as well as the professional school application process.
