

Middle Grades Education BSEd with Science and Language Arts Concentration

Overview

Offered by the the Department of Teaching and Learning, the **Bachelor of Science in Education in Middle Grades Education** prepares undergraduate students for middle level teaching (fourth to eighth grades).

The College of Education and Human Development's program in Middle Grades Education is designed to ensure not only that there are certified teachers to fill the growing vacancies, but that our students graduate highly knowledgeable about learning and teaching as well as committed to pre/adolescent learners from diverse ethnic, economic and geographic backgrounds. To that end, our program focuses on building deep content-specific pedagogical knowledge aligned to the breadth of academic standards and the wide-ranging developmental needs of middle grades students. To develop a strong link between learning theories and actual pedagogical practice, we also require that our students engage in early, often and strategic field/clinical education experiences in middle grades settings.

Our program stands out as cutting-edge because we prepare undergraduate students to teach in both the upper elementary and middle grades classrooms.

Middle Grades Education students **must select one of the following concentrations**:

- Language Arts
- Mathematics
- Mathematics and Language Arts
- Mathematics and Science
- Science
- Science and Language Arts
- Social Studies

In addition to becoming certified to teach all elementary subjects in 4-6th grades, all students in the **BSEd in Middle Grades Education with a Concentration in Science and Language Arts** will pursue dual certification for 7-8th grades in the ;areas of science and language arts. The required number of credit hours is 126 credits for this concentration.
