

Chemistry, B.S.

The Bachelor of Science in Chemistry prepares students for excellence in graduate or medical school, and employment in the chemical, biotechnological, or pharmaceutical industries. Students learn a wide array of topics in Chemistry, Mathematics, and Physics. The program emphasizes the "hands-on" nature of chemistry in laboratory courses, giving students the tools that chemists need to pursue research. They also learn how to write scientific reports, analyze data, and place these results in a broader scientific context. Accomplished majors are encouraged to pursue independent research with a professor, and to present their work internally and at national meetings.

¹ CHEM 4881 and CHEM 4891 will not fulfill an Advanced Chemistry elective for the Chemistry B.A. or B.S. degree.

² In order for the B.S. degree to be certified by the American Chemical Society (ACS), the student must take CHEM 4401 Biochemistry I and either CHEM 4003 Inorganic Synthesis or BIOL 4344 Research Techniques in Biochemistry. Further, two additional advanced courses (CHEM 4002 or higher or BIOL 4376) of at least 3 credits must be successfully completed to fulfill the ACS mandated requirement of four in-depth courses. Finally, in order to fulfill the ACS mandated requirement of 400 laboratory hours excluding General Chemistry, each student must complete either CHEM 4207 Advanced Organic Preparations OR any two (2) of the following: CHEM 4004 Crystallography and Diffraction; CHEM 4103 Instrumental Design; CHEM 4107 Drug Analysis; CHEM 4108 Investigative Chemistry, BIOL 4344 Research Techniques in Biochemistry, or one instance may be a research course of at least 3 credits of (CHEM 3881 Cooperative Research, CHEM 3891 Undergraduate Research, CHEM 4881 Cooperative Research or CHEM 4891 Undergraduate Research).

³ Only one of these may be counted as an advanced science course.

Calculation of Major GPA

Courses listed under the major requirements for the degree will be included in the calculation of the major GPA. Courses that could not apply toward the major as an elective or required course would not be counted in the calculation of the major GPA. This would include CHEM 1027, for example.

Distinction in Major

To graduate with Distinction in Major, students are required to achieve a 3.33 GPA or higher in all the Chemistry courses in their major.

Suggested Academic Plan

All prospective majors should schedule an appointment with one of the departmental advisors (names of current Faculty Advisors are available in the About section) to plan a program of study. The recommended order of courses for the major is listed below; a different order is acceptable as long as the student adheres to prerequisite requirements.
