  - Landscape Architecture, M.L.Arch. ........................................... 58

- **Graduate Certificate: Sustainable Community Planning** ............. 60

- **Graduate Certificate: Transportation Planning** .......................... 61

- **Center for the Performing and Cinematic Arts / Boyer College of Music and Dance** ..................... 63
  - Choral Conducting, M.M. ........................................................ 65
  - Collaborative Piano and Chamber Music, M.M. ............................ 68
  - Collaborative Piano and Opera Coaching, M.M. ......................... 71
  - Dance, M.A. ........................................................................ 74
  - Dance, M.F.A. ..................................................................... 76
  - Dance, Ph.D. ....................................................................... 78
  - Instrumental Conducting: Wind-Band Emphasis, M.M. ..................... 80
  - Jazz Studies, M.M. ............................................................... 83

- **Music, M.A.** ....................................................................... 86

- **Music, M.S.** ....................................................................... 88

- **Music, Ph.D.** ..................................................................... 91

- **Music Composition, M.M.** .................................................. 95

- **Music Education, M.M.** ....................................................... 98

- **Music Education, Ph.D.** ..................................................... 101

- **Music History, M.M.** ........................................................ 105

- **Music Performance/Bassoon, M.M.** ....................................... 108

- **Music Performance/Cello, M.M.** .......................................... 111

- **Music Performance/Clarinet, M.M.** ........................................ 115

- **Music Performance/Classical Guitar, M.M.** .............................. 118

- **Music Performance/Double Bass, M.M.** .................................. 122

- **Music Performance/Euphonium, M.M.** .................................... 125

- **Music Performance/Flute, M.M.** ............................................. 129

- **Music Performance/French Horn, M.M.** .................................... 132

- **Music Performance/Harp, M.M.** ............................................. 136

- **Music Performance/Harpichord, M.M.** ..................................... 139

- **Music Performance/Oboe, M.M.** ............................................. 143

- **Music Performance/Percussion, M.M.** ...................................... 146

- **Music Performance/Piano, M.M.** ............................................ 150

- **Music Performance/Saxophone, M.M.** ..................................... 153

- **Music Performance/Trombone, M.M.** ....................................... 157

- **Music Performance/Trumpet, M.M.** ......................................... 160

- **Music Performance/Tuba, M.M.** ............................................ 164

- **Music Performance/Viola, M.M.** ............................................ 167

- **Music Performance/Violin, M.M.** .......................................... 171

- **Music Performance/Voice, M.M.** .......................................... 174

- **Music Performance/Bassoon, D.M.A.** ..................................... 177

- **Music Performance/Cello, D.M.A.** .......................................... 182

- **Music Performance/Clarinet, D.M.A.** ....................................... 186

- **Music Performance/Double Bass, D.M.A.** ................................ 191

- **Music Performance/Euphonium, D.M.A.** ................................... 195

- **Music Performance/Flute, D.M.A.** .......................................... 199

- **Music Performance/French Horn, D.M.A.** ................................ 204

- **Music Performance/Harp, D.M.A.** .......................................... 208

- **Music Performance/Historical Keyboard, D.M.A.** ...................... 213

- **Music Performance/Oboe, D.M.A.** .......................................... 217

- **Music Performance/Percussion, D.M.A.** ................................... 222

- **Music Performance/Piano, D.M.A.** ......................................... 226

- **Music Performance/Trombone, D.M.A.** .................................... 230

- **Music Performance/Trumpet, D.M.A.** ....................................... 235

- **Music Performance/Tuba, D.M.A.** .......................................... 239

Temple Bulletins 2018-2019

The Bulletin provides enrolled students with the information they need regarding their chosen academic path and helps prospective students make important enrollment decisions.

The information in this bulletin is subject to change by Temple University at any time. Neither this bulletin nor any parts of it may be relied upon as a contract between Temple University and any student, applicant, or other user of this site. All prospective and current students should consult with appropriate University Offices to verify current information and the status of policies, programs, descriptions of curricula, or other information in this bulletin.

Undergraduate Bulletin

The current Undergraduate Bulletin is for students who began school in Fall 2018.

For students who began prior to Fall 2018, see the Archives.

About This Bulletin

The Graduate Bulletin is a presentation of specific information about the graduate academic programs offered under the umbrella of Temple University's Graduate School. This version of the Graduate Bulletin has a release date of July 1, 2018 for the 2018-2019 academic year.

Although every effort is made to provide complete and accurate information in the Graduate Bulletin, the program and certificate descriptions are announcements only and in no way serve as a contract. As new programs go into effect and programs are modified, the Graduate Bulletin is updated.

If a program of interest cannot be found among the programs delineated and described in the Graduate Bulletin, it may be regarded as a professional degree program at Temple University. Information on professional programs can be found by visiting the appropriate school or college website of Kornberg School of Dentistry (http://dentistry.temple.edu), Beasley School of Law (http://www.law.temple.edu), the Lewis Katz School of Medicine (https://medicine.temple.edu), the School of Pharmacy (http://pharmacy.temple.edu), and the School of Podiatric Medicine (http://podiatry.temple.edu).
### Academic Calendar

This academic calendar is based on the Academic Calendar published by the Office of the University Registrar at www.temple.edu/registrar/documents/calendars/18-19.asp, but includes dates of vital importance to graduate students (indicated with a leading asterisk) found only herein:

#### July 2018

*Nominations for Round 2 of Presidential, University, and Future Faculty Fellowships due in the Graduate School

**March 2019**

Spring Break (No Classes) Monday, 3/4 - Sunday, 3/10
Last day of classes for Spring 2019 7-week session 7A Monday, 3/11
First day of classes for Spring 2019 7-week session 7B Tuesday, 3/12
Last day to add/drop for Spring 2019 7-week session 7B Monday, 3/18
Last day to withdraw from Spring 2019 16-week full-term course(s) Monday, 3/18
*Nominations for Doctoral Dissertation and Master of Fine Arts Project Completion Grants for Fall 2019 due in the Graduate School Friday, 3/22, 4:00 PM
*Applications for First Summers Research Initiative Awards for Summer 2019 due in the Graduate School Friday, 3/22, 4:00 PM

**April 2019**

Last day to withdraw from Spring 2019 7-week session 7B course(s) Monday, 4/8
*Last day for May 2019 graduates to submit final dissertation/thesis to the Graduate School Monday, 4/22
Last day of classes for Spring 2019 16-week full term Monday, 4/29
Last day of classes for Spring 2019 7-week session 7B Monday, 4/29

**May 2019**

University Commencement Thursday, 5/9
Diploma date for the Spring 2019 term Thursday, 5/9
First day of classes for Summer 2019 12-week term Monday, 5/13
First day of classes for First Summer 2019 6-week full term Monday, 5/13
First day of classes for First Summer 2019 4-week session 4A Monday, 5/13
Last day to add/drop for First Summer 2019 4-week session 4A Thursday, 5/16
Last day to add/drop for First Summer 2019 6-week full term Friday, 5/17
Last day to apply for August 2019 graduation Saturday, 5/18
Last day to add/drop for Summer 2019 12-week term Wednesday, 5/22
Memorial Day (No Classes) Monday, 5/27

Last day to withdraw from First Summer 2019 4-week session 4A course(s) Tuesday, 5/28

**June 2019**

Last day to withdraw from First Summer 2019 6-week full-term course(s) Monday, 6/3
Last day of classes for First Summer 2019 4-week session 4A Monday, 6/10
First day of classes for First Summer 2019 4-week session 4B Tuesday, 6/11
Last day to add/drop for First Summer 2019 4-week session 4B Monday, 6/17
Last day of classes for First Summer 2019 6-week full term Monday, 6/24
First day of classes for Second Summer 2019 6-week full term Tuesday, 6/25
Last day to withdraw from Summer 2019 12-week term course(s) Thursday, 6/27
Last day to withdraw from First Summer 2019 4-week session 4B course(s) Thursday, 6/27

**July 2019**

Last day to add/drop for Second Summer 2019 6-week full term Monday, 7/1
Independence Day (No Classes) Thursday, 7/4
Last day of classes for First Summer 2019 4-week session 4B Monday, 7/15
First day of classes for Second Summer 2019 4-week session Wednesday, 7/17
Last day to add/drop for Second Summer 2019 4-week session Thursday, 7/18
Last day to withdraw from Second Summer 2019 6-week full-term course(s) Thursday, 7/18
*Last day for August 2019 graduates to submit final dissertation/thesis to the Graduate School Monday, 7/22
Last day to withdraw from Second Summer 2019 4-week session course(s) Friday, 7/26

**August 2019**

Last day of classes for Summer 2019 12-week term Thursday, 8/8
Last day of classes for Second Summer 2019 6-week full term Thursday, 8/8
Last day of classes for Second Summer 2019 4-week session Saturday, 8/10
Diploma date for the Summer 2019 term Sunday, 8/11
## Graduate School Policies

While the information presented is complete and accurate to the best of our abilities, the policies detailed herewith in no way serve as a contract. Some programs impose more stringent requirements than those set by the Graduate Board and the Graduate School. Applicants and enrolled students should contact their dean’s office to review school/college policies and consult their graduate advisors to review current program requirements. The policies posted herewith are continuously undergoing revision.

### 02.23 Admission Requirements

#### 02.23.11 Minimum Requirements for Admission

- A baccalaureate degree or its equivalent, as recognized by Temple University, from an accredited post-secondary institution is required.
- Admission of students is initially subject to standards set by the Graduate School and to any higher standards set by individual programs. The minimum admissions standard for all graduate students is ordinarily an undergraduate grade point average of “B” or 3.0 on a 4.0 scale, or the functional equivalent for students who have attended universities outside of the United States.
- The Graduate School considers exceptions to the admissions requirement if the student meets one of these criteria:
  - Achievement of a 3.25 cumulative grade point average in a least 9 credits of graduate work at an accredited university in the United States or equivalent academic performance in a university outside the United States.
  - Scores above the 65th percentile on the verbal and quantitative portions of the Graduate Record Examination (or other standardized test, such as the Graduate Management Admission Test).
  - Attainment of a 3.5 grade point average during her/his final two years of undergraduate work.

#### 02.23.12 Examination Requirements for Admission

A school/college and program may require an examination such as the Graduate Record Examination (GRE®), the Graduate Management Admission Test (GMAT®), or the Miller Analogies Test (MAT™). Such examinations must have been taken within the past five years or appear on the official Temple University record of a student who has been previously enrolled.

#### 02.23.13 International Students

If an applicant attended any institution that does not routinely issue complete academic records in English, s/he must submit official copies of native language records and literal translations prepared by an appropriate university or government official. Alternately, the applicant may submit the academic documents to a credential evaluation organization approved by Temple University and request that the evaluation be sent directly to the intended program at Temple University. At the same time, an unofficial copy of the academic records on which the outside evaluation is based should be sent to the intended program at Temple University.

#### 02.23.13.01 An applicant who does not hold a baccalaureate degree from an institution in which the sole language of instruction is English is required to present official scores from one of the following tests of English to meet these minimum English language requirements:
- Test of English as a Foreign Language (TOEFL®). The minimum score required is 79 on the internet-based (iBT) or 550 on the paper-based (PBT) version for all programs, with the exception of the Master of Music (MM) in performance, for which a TOEFL score of 71 iBT or 525 PBT is acceptable.

- International English Language Testing System (IELTS™). The minimum score required on the academic version of the test is 6.5.

- PTE Academic™. The minimum score required is 53.

### 02.23.14 School and College Admissions Criteria

The faculties of each program establish additional admissions requirements that are approved by the graduate council or other governance body of the school/college. Additional requirements beyond the Temple University minimum requirements typically include the following:

- standardized tests
- grades and/or completion of specific coursework
- evidence of writing ability
- professional experience
- statement of goals and expressed specific interests in research or other creative activities
- portfolios
- auditions
- letters of recommendation

Because admissions requirements for graduate programs vary widely, an applicant must contact the school/college and program for current information. It is the responsibility of the applicant to submit all required credentials and other evidence of qualifications by the deadline set by the school/college and program.

### 02.23.15 Applications

#### 02.23.15.01

Application deadlines vary by program as shown in the Graduate Bulletin. To be considered for any form of graduate student financial support, an applicant should apply in advance of posted deadlines. To be considered for Temple University fellowships, an applicant must apply by December 15 for admission the following Fall term. Only a student who has been admitted may be considered for Assistantships, Fellowships, Scholarships, and Student Financial Aid (loans or work-study).

#### 02.23.15.02

Prospective students may apply to more than one degree program, but must submit a complete application to each. A student accepted into a graduate program may matriculate in only one program, except in the case of officially designated dual degree programs.

#### 02.23.15.03

Applicants to dual degree programs must be admitted to both degree programs and complete all requirements for both degrees. Admission to one program does not guarantee admission to the other.

#### 02.23.15.04

All students must apply for graduation and pay the associated fees by the deadline listed in the Temple University Academic Calendar and/or in the version of the Graduate School Calendar adapted for graduate students. This is the only means by which a diploma is produced and an awarded degree transcripted. The graduation application is accessed through TUportal by selecting **Self Service Banner (SSB)**, then **Student » >Student Records » > Apply to Graduate**.

### 02.23.16 Change of Degree Program

#### 02.23.16.01

A matriculated student in a doctoral program may, with the approval of the advisor and the dean of the school/college, request a transfer to a master's degree program in the same department and field without reapplying. The department or program must review the student's record and make the final decision about accepting the student into the master's degree program.

#### 02.23.16.02

A matriculated student in a master's program must apply for admission to the doctoral program, even in the same department and field. (This is not applicable if the student was admitted into the Ph.D. program at the time of admission into the master's program.) The procedures for applying are governed by the dean of the school/college and graduate council or other governance body.
Students must be appropriately registered for courses. Those who are not on the published grade list for a course may not receive a grade or credit for that course. Students are advised to utilize Self-Service Banner (SSB), accessible through the TUportal, to confirm billing and registration status, particularly when adding a course, dropping a class, or otherwise revising their roster. All students are responsible for ensuring that their registration is accurate. Note that any student who is registered for a course but does not attend will be billed for the course and will receive a final grade of “F” from the instructor.

02.24.11 Grades

02.24.11.01 Courses graded A, A-, B+, B, B-, C+, C, C-, D+, D, D-, and F are used to calculate the graduate grade point average (GPA). No grade below a "C-" can be used to fulfill any graduate requirement.

An “R” (Registered) grade indicates registration for the preliminary/comprehensive exam or a thesis, dissertation, or final project that is still in progress—and its use is restricted to this purpose. Therefore, the only courses that can receive an “R” grade are:

- 9993 - Master's Comprehensive Examination
- 9994 - Doctoral Preliminary/Candidacy Examination
- 9995 - Thesis/Project or Master of Fine Arts Credits
- 9996 - Master's Thesis Credits
- 9998 - Dissertation Proposal/Candidacy
- 9999 - Dissertation Credits

Courses numbered 9993 through 9999 cannot be graded “I” (Incomplete). These ongoing examinations and research projects require registration every term until their completion. Only the number of required s.h. for the completion of each of the aforementioned courses in the published program of study for each graduate degree offered by a department and found on the Graduate Bulletin webpage can and must be changed from an “R” grade to an assigned final grade of A, A-, B+, B, B-, C+, C, C-, D+, D, D-, F, or P. All other “R” grades in excess of the required published s.h. for a program of study found on the Graduate Bulletin webpage remain on the transcript for all terms as “R.” The GPA does not include courses designated “R.” In addition, “R”-graded courses in excess of the amount required for degree completion are not included in the number of hours completed nor the number of hours passed.

The “R” grade is not—and cannot be used as—a substitute for an “I” grade. The “I” grade is appropriate for a one-term didactic course that will be completed within a year or assigned the contracted default grade.

“P” indicates Pass. Individual schools may authorize the use of Pass/Fail only for practica, seminars, and other courses for which traditional grading is inappropriate and only when all students are graded on a P/F basis. No grade points are assigned to either the “P” or “F” grade. In a course with the P/F grading option, “P” is equivalent to A, A-, B+, B, B-, C+, C, or C-, and “F” is equivalent to D+, D, D-, or F.

No grade points are assigned to either the "CR" (Credit) or "NC" (No Credit) grade. "CR" is equivalent to A, A-, B+, B, B-, C+, C, or C-, while "NC" is equivalent to D+, D, D-, or F.

02.24.11.02 A student who receives more than two grades below "B-" or more than one grade of "F" is dismissed for failure to maintain satisfactory grades.

02.24.11.03 A minimum cumulative GPA of 3.0 is required in order to graduate.

02.24.11.04 A doctoral student must take at least 2 s.h. of Dissertation Research (9999) after having been advanced to candidacy. Because these courses reflect continuing work on a single project, the student receives a grade (A, A-, B+, B, B-, C+, C, C-, D+, D, D-, F or Pass/Fail, depending on the departmental grading system) for only the final term after having fulfilled this requirement, which entails filing the final approved dissertation with the Graduate School.

02.24.11.05 To remain in Academic Good Standing at Temple University, a non-matriculated or matriculated graduate student must achieve a term GPA of at least 3.0 for each term and maintain a cumulative GPA of at least 3.0 for all work completed at Temple University. The policy on Academic Good Standing operates in conjunction with Graduate School Policy 02.24.11.02 concerning substandard grades.

02.24.12 Incompletes

An instructor may assign an Incomplete ("I") to a student who does not complete all coursework. The "I" may be changed to a letter grade if the student completes the coursework within one calendar year.

02.24.12.01 The student must file a contract with the faculty member of record stating what outstanding work remains to be completed. The faculty member must sign the contract and retain it in the student’s permanent departmental file. All work must be completed, graded, and the change of grade filed with the Office of the University Registrar within one calendar year of the assignment of the Incomplete.

02.24.12.02.01 Change to Incomplete Policy

Effective Fall 2003, the President instituted a policy change regarding Incompletes (see Policy 02.10.13: Incomplete Coursework Policy at http://policies.temple.edu/PDF/41.pdf) for graduate and undergraduate students. As part of the Incomplete contract, the faculty member must assign a default grade that will apply if work is not completed per the contract or within one year of the assignment of the Incomplete grade.
02.24.12.03 A student who receives a Permanent Incomplete and wishes to receive credit for that course is required to re-register, pay tuition, and retake that course to receive a grade.

02.24.13 Credits for Coursework in a Degree Program

No course may be used to satisfy a credit hour requirement for more than one degree, except where course requirements for one degree (master's degree) are required for a more advanced degree (e.g., Ph.D.) or have been designated as eligible to satisfy the requirements of an officially designated dual degree program.

02.24.14 Repeating a Course for Additional Credit

A student may repeat an Independent Study or other course for additional credit if the course content varies each term as designated in the Graduate Bulletin.

02.24.15 Repeating a Course for Credit

A student may, with the permission of the advisor and graduate program director, retake a course once in order to improve the grade. The higher grade is used to calculate the graduate GPA. The s.h. for the course are counted only once toward graduation requirements.

02.24.16 Graduate Credit for Undergraduate Courses

A graduate student may take an undergraduate upper division course for graduate credit only with the advanced written permission of the student’s advisor and the dean of the school/college, prior to the first day of classes. Permission is granted only if the graduate student is required to complete more advanced work than that required of undergraduates, and the “Request to Take an Undergraduate Course for Graduate Credit” form, found in TUPortal under the tools tab within “University Forms,” specifies the nature and extent of the additional work (e.g., a research paper or project). To receive graduate credit, the student must pay graduate tuition and fees.

02.24.17 Enrollment in Undergraduate Courses Not for Graduate Credit

A student admitted to a graduate program may enroll in an undergraduate course to elevate her/his level of preparation to the standard expected of an entering graduate student, but such courses cannot be used to satisfy a graduate degree requirement.

02.24.18 Prerequisites

02.24.18.01 A prerequisite is preparatory work that must be completed prior to undertaking specified coursework in the degree program. Credits earned completing prerequisites do not count toward the total number of s.h. required for the degree.

02.24.18.02 Grades earned in prerequisite courses, if graduate level, are included in the graduate GPA and, irrespective of level, in the determination of standards of scholarship.

02.24.19 Credit for Coursework Taken as a Non-Matriculated Student

A matriculated student may be allowed credit for up to 9 s.h. of graduate coursework, graded “B” or higher, taken before matriculation. These credits may be accepted in addition to the Advanced Standing Credit allowed if approved by the dean and the graduate council or other governance body of the school/college.

02.24.20 Advanced Standing Credit (defined as credit for coursework taken prior to matriculation and outside of Temple University)

02.24.20.01 Graduate coursework taken at an accredited institution prior to matriculation, and graded “B” or higher, may be accepted toward a Temple University master’s degree. (Refer to Graduate School Policy 02.24.21.02 for limitations.)

02.24.20.02 Graduate coursework taken at an accredited institution prior to matriculation and graded “B” or higher as part of a master’s degree program may be accepted for Advanced Standing Credit toward a doctoral degree. For doctoral programs that do not require the student to complete a master’s degree at Temple University, the number of Advanced Standing Credits that may be accepted by a doctoral program cannot exceed the number of graduate s.h. required for the master’s degree in the same or a closely related discipline at Temple University. Individual programs may have more restrictive limits on the number of graduate s.h. eligible to be considered for Advanced Standing Credit. The deans of the school/college and the graduate council or other governance body determine the courses to be deemed eligible.

02.24.20.03 For a student to receive Advanced Standing Credit, the graduate program director must make a recommendation to the dean of the school/college to accept the student’s credits from a master’s degree or other graduate work taken prior to matriculation in the degree program, whether the previous work was taken at Temple University or at another institution. The dean of the school/college has final authority over accepting the recommendation to grant Advanced Standing Credit in individual cases as long as the number and type of credits accepted do not exceed those allowed by the Graduate School.

02.24.21 Transfer Credit (defined as credit for coursework taken following matriculation and outside of Temple University)

02.24.21.01 The dean of the school/college and the graduate council or other governance body may accept a limited number of Transfer Credits. The coursework must be graduate level, taken at an accredited institution, and graded “B” or higher. (Refer to Graduate School Policy 02.24.21.02 for limitations.)

02.24.21.02 The combined number of Transfer Credits and Advanced Standing Credits (see Graduate School Policies 02.24.20.01 and 02.24.21.01) that may be accepted by a master’s program cannot exceed 20% of the s.h. required for the degree (e.g., in a 30-s.h. master’s degree, a maximum of 6 s.h. of credit is allowed).
A doctoral program may accept as many Transfer Credits as have been approved by the dean of the school/college up to the limit established by the Graduate School.

The Graduate School may be petitioned for an exception if the request is supported by the student's program and school/college.

**Auditing**

A student may audit a course with the written permission of the instructor at the time of registration. For this purpose, a Special Approval Form must be signed by the instructor and submitted along with a Registration/Schedule Revision Form. The student must register for the course and pay the regular per-credit fee.

The registration for any course may not be changed from audit to credit or vice versa after the second week of classes during the Fall or Spring term or after the first three days of classes during the Summer sessions.

Audited courses do not meet prerequisite or graduation requirements.

**Withdrawal**

A student may "drop" a class during the first two weeks of the Fall or Spring term or Summer sessions and during customized drop/add/withdrawal dates set by Temple University. The course is removed from the transcript. The student is not financially responsible for the dropped course(s).

An excused withdrawal is generally only approved for all courses in a term. In exceptional cases, an excused withdrawal can be approved for a single course when the need to withdraw is directly attributed to requirements related to that course. To request an excused withdrawal, a "Petition for Withdrawal with Approved Excuse," found at http://www.temple.edu/vpus/documents/withdrawal_approved_excuse_forms.pdf, must be filed within one year from the end date of the term for which the student seeks the excused withdrawal. If the excused withdrawal is granted:

- The course is recorded on the transcript with the notation of "WE."
- The student may be financially responsible for courses from which s/he has withdrawn.

An excused withdrawal is generally only approved for all courses in a term. In exceptional cases, an excused withdrawal can be approved for a single course when the need to withdraw is directly attributed to requirements related to that course. To request an excused withdrawal, a "Petition for Withdrawal with Approved Excuse," found at http://www.temple.edu/vpus/documents/withdrawal_approved_excuse_forms.pdf, must be filed within one year from the end date of the term for which the student seeks the excused withdrawal. If the excused withdrawal is granted:

- The course is recorded on the transcript with the notation of "WE."
- The student may be financially responsible for courses from which s/he has withdrawn with an approved excuse.

Circumstances beyond her/his control may petition for an "excused withdrawal" or "withdrawal with approved excuse." The extenuating circumstances that inhibit continued enrollment at Temple University are limited to serious medical conditions, serious family emergencies, military deployment, the student's death, and other catastrophic circumstances.

Courses taken prior to matriculation may be counted toward a degree only if they meet the program’s criteria for currency. Generally, courses taken within the past five years are considered current. In some schools and colleges, coursework taken in a master’s degree more than five years prior to matriculation may be considered eligible for Advanced Standing Credit.

To remain in Academic Good Standing, a graduate student must maintain continuous enrollment (i.e., 1 or more s.h. each Fall and Spring; also in the Summer for those students graduating in Summer) from the term of matriculation through the term of graduation. The only exception for continuous enrollment/registration is for a student on a Leave of Absence.

A graduate student who is not continuously enrolled for two consecutive terms — whether as a result of not returning from an approved Leave of Absence term or because a Leave of Absence was never requested — is considered inactive, must apply for readmission, and must be accepted to the graduate program in order to continue. Readmitted graduate students do not retain their original Bulletin year and must follow the most current requirements for the graduate degree program.

To be designated full-time, a graduate student (including all recipients of Graduate School Fellowships) must be enrolled for 9 or more s.h. of coursework until all coursework is completed.

To be designated full-time, a graduate student who holds an Assistantship that requires at least 20 hours of service per week must be enrolled in 6 s.h. until all coursework is completed.

To be designated full-time, a graduate student who has completed required coursework for the degree must be enrolled in at least 1 s.h. of one of the following:
OR any other terminal or culminating experience or project required beyond coursework to complete the degree, including Music Master Performance (9184), Master's or MFA Project (9995), and Master's Thesis (9996).

02.25.13 Conditions of Full-Time Status

02.25.13.01 No limit is set on the number of terms a student may be classified as full-time, although the expected time-to-degree is an important consideration. See the Graduate Bulletin for each program’s allotted length.

02.25.13.03 A graduate student who has completed coursework and is enrolled in at least 1 s.h. of:

- 9184 - Music Master Performance
- 9284 - Music Doctoral Performance
- 9994 - Preliminary Examination
- 9995 - Master's or MFA Project
- 9996 - Master's Thesis
- 9998 - Dissertation Proposal
- 9999 - Dissertation Research

will automatically be classified as full-time. Contact the Graduate School about full-time status concerns only when exceptional circumstances warrant.

02.25.14 Leave of Absence

02.25.14.01 The dean of the school/college, on the recommendation of the advisor, may grant a full-time matriculated student a Leave of Absence upon presentation of a completed “Leave of Absence Request” form.

02.25.14.01.01 As of Fall 2016, both graduate and undergraduate students have access to the Registrar's Leave of Absence workflow, which replaces the paper form. At the graduate level, both full- and part-time degree-seeking students may apply for a Leave of Absence. A Leave of Absence must be in place by the end of each term’s schedule revision period.

02.25.14.02.02 While on a Leave of Absence, a student retains admitted student status and remains eligible for the following privileges:

- Retention of the university requirements in place for her/his academic program at the time of her/his first term at Temple and the requirements in place for her/his degree or degree concentration at the time of declaration.
- Temple email access.
- Priority and self-registration for the approved term of return.
- Library access and borrowing privileges.

02.25.14.02.03 A student granted a Leave of Absence is not considered a registered student. As a non-enrolled student, s/he is not eligible for:

- Academic advising related to progress toward completion of the degree while on a Leave of Absence.
- Financial aid disbursements during the terms while on a Leave of Absence. Students on a Leave of Absence are reported to lenders and loan service agencies as "not enrolled" and need to contact lenders for information on possible repayment requirements.
- Enrollment verification, given her/his status as "not enrolled," which could affect eligibility for health insurance, etc., while on a Leave of Absence.
- Use of Student Health Services or any other university services not listed in Graduate School Policy 02.25.14.02.02 above while on a Leave of Absence.
- Campus Housing while on a Leave of Absence.

02.25.14.03 A Leave of Absence does not extend the time limit for completing a graduate degree. A student may not be granted more than four terms of leave except for a serious condition.

02.25.15 Time Limits for a Degree

02.25.15.01 The time limit begins with the term of matriculation and ends with the term in which the degree is earned.

02.25.15.02 The time limits for a master’s degree are three to six years. See the program descriptions in the Graduate Bulletin.

02.25.15.03 The time limit for a doctoral degree is seven years.
An extension of time may be requested by master’s and doctoral candidates. To ensure currency, a student who requests an extension of time beyond that allowed for a graduate degree may be required to retake coursework and/or examinations.

**Master’s Examination and Thesis**

**Master’s Examinations**

- A student may take the master’s comprehensive examination, in whole or in part, no more than twice.
- A student who fails all or part of the comprehensive examination twice is dismissed.

**Master’s Thesis**

- For current requirements, see the specific degree program in the Graduate Bulletin.

**Doctoral Examinations/Culminating Experiences**

Doctoral Examinations/Culminating Experiences require a minimum of 6 s.h., with at least 2 s.h. of the 6 s.h. required to be in course number 9999. The remaining 4 s.h. can be a combination of the following course numbers: 9994, 9998, and/or 9999. Departments may require additional s.h. to fulfill Doctoral Examinations/Culminating Experiences since 6 s.h. constitute the minimum requirement. Doctoral students must maintain continuous enrollment from matriculation to graduation.

**Preliminary Examinations**

- A doctoral student who has completed all coursework for the degree, but has not passed the preliminary examination, must register each Fall and Spring term for 1 s.h. of course number 9994, “Preliminary Examination Preparation.” The student must be registered for 9994 in the term in which the examination is taken, including the Summer session. A student who is required to retake the preliminary examination in whole or in part must re-register for 1 s.h. of 9994 in the term in which the examination is retaken.
- A student may take the doctoral preliminary examination, in whole or in part, no more than twice.
- A student who fails all or part of the preliminary examination twice is dismissed.
- Three or more members of the Graduate Faculty must approve the content of the doctoral preliminary examination. It must be graded fairly and in a manner that prohibits any one faculty member from determining whether a student passes or fails.

**Preliminary Examination Time Limits**

- To ensure currency, a doctoral student who has not successfully defended the dissertation within five years of passing the preliminary examination may be required to retake and pass that examination to remain in Academic Good Standing.
- When the five-year limit is reached, the student is to be notified by the school/college/program if s/he must retake and pass the preliminary examination within one term.
- Failure to retake and pass the preliminary examination within one term results in dismissal by the school/college/program.

**Elevation to Candidacy**

A doctoral student is elevated to candidacy upon completion of all coursework and examination requirements (including foreign language or other proficiency examinations) for the degree after filing an approved dissertation proposal along with the “Dissertation Proposal Transmittal for Elevation to Candidacy” form, found in TUportal under the Tools tab within “University Forms,” to the Graduate School.

**Doctoral Dissertation**

**Doctoral Advisory Committee/Sponsoring Committee**

- A sponsoring committee must include at least three members of the Temple University Graduate Faculty, two of whom, including the chair, must be members of the candidate’s degree program or approved to serve in that capacity with the advanced written approval of the Graduate School.
- A committee may be expanded to include other Temple University faculty and/or qualified experts from outside Temple University, provided that a majority of the members of the Doctoral Advisory Committee are members of the Temple University Graduate Faculty.
- If the proposed additional member is not a member of the Graduate Faculty, the chair of the Doctoral Advisory Committee must request approval by submitting the “Nomination for Service on Doctoral Committee” form, found in TUportal under the Tools tab within “University Forms,” and a current curriculum vitae to the Graduate School. Approval of the member must be received prior to the approved proposal being filed with the Graduate School.
### Graduate School Policies

#### 02.28.11.04
If a change is made in the composition of the Doctoral Advisory Committee, the change must be approved by the chair of the initial committee and the dean of the school/college. The change must be noted on the "Request for Change in Dissertation Committee" form, found in TUportal under the Tools tab within “University Forms,” and filed with the Graduate School prior to posting the final defense.

#### 02.28.11.05
The dean of the school/college and the graduate council or other governance body define who is responsible for approving the composition of Doctoral Advisory Committees in their respective school/college.

#### 02.28.11.06
The chair and each member of the Doctoral Advisory Committee work with the student to provide guidance to develop a proposal in which the student demonstrates broad knowledge of the field, current methods of investigation, and the ability to conduct the proposed research on a realistic timeline.

#### 02.28.11.07
Emeritus faculty may serve on a dissertation sponsoring or examination committee provided the emeritus faculty member retains Graduate Faculty status by continuing to satisfy college/department criteria and responsibilities established for Graduate Faculty status.

#### 02.28.11.08
Emeritus faculty may chair dissertations if:
- the emeritus faculty member was the chair of an approved dissertation proposal submitted to the Graduate School prior to retirement; and
- the emeritus faculty member continues to satisfy college/department criteria and responsibilities established for Graduate Faculty to chair dissertations.

#### 02.28.12 Dissertation Proposal

#### 02.28.12.01
A student who has passed preliminary examinations but has not filed an approved dissertation proposal with the Graduate School by the last day to Drop/Add in the term must register each Fall and Spring for course number 9998, “Pre-Dissertation Research.”

#### 02.28.12.02
When all members of the Doctoral Advisory Committee have signed the proposal, the proposal represents an agreement between the student and the committee that the theoretical and methodological approaches being taken are considered acceptable if the work is conducted appropriately and within the timeline proposed. The Doctoral Advisory Committee may not unilaterally require significant theoretical or methodological changes. The committee and the student may jointly agree on such changes but are advised to put the changes in writing.

#### 02.28.12.03
Within 30 days of all members of the Doctoral Advisory Committee signing the proposal, it must be filed with the student’s department and with the Graduate School. The proposal must include an official “Dissertation Proposal Transmittal for Elevation to Candidacy” form, found in TUportal under the Tools tab within “University Forms,” that bears the signatures of the Doctoral Advisory Committee members and the date approved.

#### 02.28.13 Dissertation Research

#### 02.28.13.01
A doctoral candidate must register each Fall and Spring term, and in the term in which the oral examination is held, for course number 9999, “Dissertation Research.”

#### 02.28.13.02
If the oral examination is held in the Summer session, the student must register for 9999 in the Summer session but will not be required to register in the Fall if the 30-day deadline for making final revisions extends into the Fall.

#### 02.28.13.03
A doctoral student must complete a minimum of 2 s.h. of course number 9999, “Dissertation Research,” after elevation to candidacy.

### Defense of Doctoral Dissertation

#### 02.28.14.01
To be defensible, a doctoral dissertation must:
- meet the standards for original research or other creative work in the field;
- uphold the ethics and standards governing research or creative work in the discipline;
- demonstrate mastery of the research methodology and subject matter;
- demonstrate an understanding of the contribution of the body of knowledge to the discipline or disciplines involved; and
- meet the standard of writing and presentation expected in any academic or scholarly publication or production, including grammar, spelling, formatting, and general readability.

#### 02.28.14.02
A candidate whose dissertation fulfills the standards of scholarship and the commitments made in the proposal, and any modifications made to it as specified above, is entitled to an oral defense of the dissertation.

#### 02.28.15 Dissertation Examining Committee

#### 02.28.15.01
A Dissertation Examining Committee is responsible for evaluating the quality of the dissertation and conducting the oral defense.
A Dissertation Examining Committee must include the chair and all members of the Doctoral Advisory Committee and at least one outside examiner not previously involved with the dissertation writing or the Doctoral Advisory Committee.

The chair of the Dissertation Examining Committee must be a member of the Graduate Faculty but may not be the chair of the candidate’s Doctoral Advisory Committee. This person, responsible for coordinating the defense, must be identified when the defense is posted with the Graduate School. If the dean of the school/college and the graduate council have a written policy that calls for the chair of the Dissertation Examining Committee to be elected only when the defense is convened, the person named in the posting to the Graduate School remains responsible for filing all official forms with the school/college and Graduate School.

The outside examiner may not be a faculty member in the candidate’s degree program. The examiner must be doctorally prepared and, if s/he is from outside Temple University, must be approved by the Graduate School at least two weeks prior to the oral defense.

If the outside examiner or any other proposed member of the Dissertation Examining Committee is not a member of the Graduate Faculty, the chair of the Doctoral Advisory Committee must request approval by submitting the “Nomination for Service on Doctoral Committee” form, found in TUportal under the Tools tab within “University Forms,” and a current curriculum vitae to the Graduate School at least four weeks in advance of the scheduled defense. Approval must be received prior to posting the oral defense.

To be eligible to post the Oral Defense/Final Examination, the candidate must have:
- an approved Dissertation Examining Committee;
- distributed a complete copy of the final dissertation to all members of the Dissertation Examining Committee; and
- identified the chair or the person responsible for the Dissertation Examining Committee in accordance with the policies of the school/college.

The candidate must submit the official, signed “Announcement of Dissertation Defense” form, found in TUportal under the Tools tab within “University Forms,” to the Graduate School 10 or more working days before the scheduled defense. A defense cannot be held without written confirmation of approval and receipt of the defense paperwork from the Graduate School.

The announcement of the oral defense must be posted publicly. Any member of the Graduate Faculty has the right to request a copy of the dissertation from the dean of the school/college in advance of the defense and may participate in the defense.

If a person other than a member of the Dissertation Examining Committee or Graduate Faculty wishes to be present at the oral defense as a guest, the chair of the Dissertation Examining Committee is responsible for determining the appropriateness of the request and for making the final decision.

All members of the Dissertation Examining Committee must be physically present for the defense, except in the case of an emergency. The Graduate School may, in serious circumstances, give prior written approval for no more than one member to be absent. The candidate and chair of the Doctoral Advisory Committee must, however, both be present for a valid defense.

A member of the Dissertation Examining Committee whose absence has been approved by the Graduate School must still participate in the defense through some means (e.g., telephone, video-conference, written comments, and/or questions to be asked by another member), except in the case of a sudden, serious emergency.

The Dissertation Examining Committee evaluates both the dissertation and a candidate’s performance in the oral examination to determine whether or not the candidate passes. Only officially recognized members of a Dissertation Examining Committee have the authority to determine whether or not the candidate passes the final defense.

Doctoral candidates who pass the oral defense may be required to make revisions to the dissertation as a condition of completing the degree. The chair of the Doctoral Advisory Committee is typically responsible to review and approve revisions, although any member of the Dissertation Examining Committee may require the candidate to submit a final draft for approval. The final revised dissertation must be submitted to the Graduate School within 30 calendar days of the oral defense or the defense is nullified and another oral defense must be scheduled.

If a Dissertation Examining Committee requires substantial revisions that cannot be made within 30 calendar days, the committee must suspend the defense until a majority agrees that the dissertation is sufficiently revised to be defendable. A candidate must repost the oral defense with the Graduate School. The chair of the Doctoral Advisory Committee is responsible for notifying the Graduate School that a defense was suspended.

### 02.28.19 Authorship and Prior Publication

A doctoral dissertation may have only one author. A candidate's previously published work may be included in the dissertation if the work meets the following criteria:

- The research was conducted by the candidate while a doctoral student at Temple University.
- It has not been used to meet the requirements for another degree.
- It is not co-authored, unless the role of the candidate was clearly defined in the co-authored work.
- It is logically connected with and integrated into the dissertation.
- By its inclusion, it does not violate any existing copyright or contractual agreement.
- Co-authored works that do not meet the criteria above may be included as appendices if they include the names of all authors and the contribution of the candidate is stated.

### 02.28.20 Filing Dissertations

### 02.28.21 Final Authority Over Doctoral Dissertation

The Graduate School and the Graduate Board have the authority to review and approve all doctoral dissertations prior to awarding the degree.

### 02.29 ACADEMIC APPEALS TO THE GRADUATE BOARD

#### 02.29.11.01 Title IX of the Educational Amendments Act requires that each college or university establish due procedures for the resolution of grievances. A student should consult her/his school/college for information about filing grievances.

#### 02.29.11.02 A graduate student must follow all school/college and departmental policies and procedures governing grade appeals and appeals for all other academic matters. The Graduate Board and Graduate School have authority over reinstatement after academic or administrative dismissal. A student must file a "Petition to the Graduate School or Graduate Board Student Appeals Committee for Reinstatement," found in TUportal under the Tools tab within "University Forms," with the Graduate School to initiate an appeal to either body for reinstatement. A student who has been academically or administratively dismissed and no longer has access to TUportal should contact the Graduate School for a copy of the reinstatement form.

#### 02.29.12 Petitions for Reinstatement After Academic Dismissal

A graduate student may file a "Petition to the Graduate School or Graduate Board Student Appeals Committee for Reinstatement," found in TUportal under the Tools tab within "University Forms" or available from the Graduate School directly, with the Graduate Board Student Appeals Committee following dismissal:

- If the student has failed the comprehensive or preliminary examinations, in whole or in part, twice.
- If the student has failed to maintain satisfactory grades in accordance with Standards of Scholarship in the university, school/college, and/or program.
- If the student has failed to make academic progress as defined by the school/college and program.

#### 02.29.13 Petitions for Reinstatement After Administrative Dismissal

A student who has been administratively dismissed (i.e., has exceeded the time limit or failed to maintain continuous enrollment and is therefore ineligible to register, or who has withdrawn) may file a "Petition to the Graduate School or Graduate Board Student Appeals Committee for Reinstatement" by first contacting the Graduate School for a copy of the reinstatement form. A representative for the Graduate School may respond to these petitions administratively or refer them to the Graduate Board Student Appeals Committee.

#### 02.29.14 Appeals of Graduate Board Decisions

A student can appeal decisions by the Graduate Board Student Appeals Committee only on procedural grounds. The appeal should be directed to the Provost.

#### 02.29.15 Readmission

A student who has withdrawn, been dismissed for failure to maintain continuous enrollment for more than one term, or has exceeded the time limit and is therefore ineligible to register, may be required to file a new Application for Admission. See [https://www.temple.edu/grad/admissions/howtoapply.htm](https://www.temple.edu/grad/admissions/howtoapply.htm) for the appropriate application link at Temple University. If accepted, the student is considered newly matriculated at the time of admission and will be required to complete all current program requirements.

### 02.30 EXIT REQUIREMENTS (Restatement of Graduate School Policy 02.23.15.04 on Applying for Graduation)
All students must apply for graduation and pay the associated fees by the deadline listed in the Temple University Academic Calendar and/or in the version of the Graduate School Calendar adapted for graduate students. This is the only means by which a diploma is produced and an awarded degree transcripted. The graduation application is accessed through Tuportal by selecting Self Service Banner (SSB), then Student » Student Records » Apply to Graduate.

Scope of Policy and Rationale for Students Called to Military Service Obligation

Temple University is governed by federal and state laws on the duties to and the rights of students who are members of the U.S. Armed Forces, including the National Guard and the reserves, when they are temporarily unable to attend classes or have to suspend their studies due to service requirements. Policy 03.70.11: Temple University Policy for Students Called to Military Service Obligation (http://policies.temple.edu/getdoc.asp?policy_no=03.70.11) is intended to conform fully to pertinent federal and state laws.

Policy Statement

I. Withdrawal from classes for a military service obligation:

1. Students called to a military service obligation should contact the Office of the University Registrar, Second Floor, Conwell Hall. Each such student has the following options:
   a. If prior to the official drop/add deadline, drop classes and receive a full refund.
   b. If after the official drop/add deadline, drop from classes and receive a full refund. A grade notation of "M" will be applied to each course to indicate drop due to military obligation.
   c. Receive an "Incomplete (I)" if eligible according to university policy. If the student chooses this option, then if the student is not able to fulfill the course completion requirement(s), regardless of the circumstances, the student cannot later choose option "a" above. (See Policy 02.10.13: Incomplete Coursework (http://policies.temple.edu/PDF/41.pdf).)

2. Students should provide advance written notice with supporting documents of their military service obligation to the Office of the University Registrar.
   a. If unable to provide advance notice of the military service due to military necessity, students will submit at the time of reenrollment an attestation that the student performed service in the uniformed services that necessitated the student's absence from the institution.

II. Reenrollment for service members after a military service obligation:

1. Students will be promptly reenrolled with the same academic status ¹ when last in attendance or last admitted, subject to paragraphs 2 and 3 below. Temple will make reasonable efforts ² at no extra cost to the students to help them become prepared or to enable the students to complete their program. However, if it is determined after reasonable efforts, that any such student is unable to complete her/his program or that there are no reasonable efforts that can be taken to prepare the student to resume the program at the point where s/he left off or to enable the student to complete the program, Temple is not required to readmit the student upon her/his return.

2. Students will be promptly reenrolled if the cumulative length of the absence and of all previous absences by reason of service in the uniformed services does not exceed five years. Students whose previous absences cumulatively exceed five years are subject to the established reenrollment policy and procedures.

3. Students who seek reenrollment will provide to Temple documentation to establish that the student has not exceeded the service limitation of total cumulative absence of five years.

III. Additional Services

Graduate students may have special problems resulting from a military service obligation, such as a maximum number of years permitted to complete a particular academic program. Graduate students who need an extension or adjustment to their programs due to military service obligations should contact the Graduate School, Fifth Floor, Carnell Hall.

Veterans' tuition benefits at Temple are administered by the Office of the University Registrar.

1. “Academic status” is defined by the Code of Federal Regulations, 34 CFR 668.18, et seq.
2. “Reasonable efforts” is defined by the Code of Federal Regulations, 34 CFR 668.18, et seq.

Notes

1. Dates of official enactment and amendments:
   Amended by the President on September 20, 2001. First effective Fall 2001.
   Amended by the President in May 2015. First effective December 3, 2014.

2. History:
   Supersedes Presidential Policy Statement No. I-23, Temple University Policy for Students Called to Active Military Service.
Supersedes previous version designated as Presidential Policy 03.70.11, Temple University Policy for Students Called to Military Action. The December 2014 amendment aligns Temple's policy with requirements of the Department of Defense readmission policies and Department of Education requirements for returning service members (ED 34 C.F.R. 668.8 and 668.18 respectively).

3. **Cross References:**

Tuition and Fees

Pennsylvania Residency Classification

Based on a student’s domicile, Temple University has two tuition schedules. One is relevant for Pennsylvania residents, and the other for out-of-state residents and international students. For tuition purposes, Pennsylvania residency is determined in accordance with the criteria outlined in the “Pennsylvania Residency Guidelines (http://www.temple.edu/registrar/documents/downloads/PennsylvaniaResidencyGuidelinesandApplication.pdf).” Questions about Pennsylvania residency, individual student status, change of domicile, or appeals for residency classification are answered on the website of the Office of the University Registrar.

2018-2019 Tuition

Tuition costs are priced per credit, as shown below by school and college for all graduate programs. The amounts listed are applicable for the Fall and Spring terms, as well as the various Summer sessions, of the 2018-2019 academic year:

¹ Inquire of the department as deposit amounts vary by program.

All tuition and fees are subject to change by action of the Board of Trustees.
Graduate students are eligible for financial assistance from federal, state, private, and university sources. To qualify for most types of financial aid, students must first be admitted to a graduate program. Questions about financial assistance should be directed to Temple University's Office of Student Financial Services (http://sfs.temple.edu).

Federal Support

Federal Stafford Loans

Applying for Federal Stafford Loans requires completion of the Free Application for Federal Student Aid (FAFSA). At Temple University, unsubsidized Stafford Loans are available to full-time graduate students up to a maximum amount of $20,500 annually.

Federal Work Study

Eligibility for the Federal Work-Study Program is based on the applicant's need as determined by the information on the applicant's FAFSA. In addition, students must be enrolled at least half-time and maintain satisfactory academic progress. Students are paid bi-weekly for hours worked.

University Support

Temple University provides financial support that includes assistantships, internships, externships, and fellowships. Assistantships, internships, and externships are awarded through departments and non-academic units based on need and fit. Interested applicants should consult with advisors or department chairpersons about the application procedures relevant to a desired position, as defined herewith:

- **Teaching Assistant:** Student engages in lecturing, instructing, and supervising academic activities in the classroom, laboratory, studio, theater, or recitation or tutorial section; providing academic support in a laboratory, studio, or office; or working in another setting in which academic instruction takes place. Teaching must be assigned according to Policy 04.21.12: Workload Guidelines for Teaching Assistants and Research Assistants (http://www.temple.edu/grad/finances/documents/Policy_04.21.12_Workload_Guidelines.pdf). Expressly excluded are teaching of elementary or secondary students as part of community service projects and teaching that is not for university credit or is otherwise non-academic in nature, such as for recreational purposes.

- **Research Assistant:** Student engages in archival, clinical, field, laboratory, library, museum, or survey research or in another research activity supervised by a faculty member or researcher on a sponsored project. Completion of the "RA Individual Declaration of Academic Benefit" form is required for the term of the award.

- **Academic Intern:** Student engages in academic, performance, and professional activities that are central parts of the instructional program and directly related to the student's degree program (e.g., clinical practice, musical or theatrical production), but cannot be classified as either research or teaching. The activities must be directly supervised by a faculty member/preceptor in the student's school/college.

- **Graduate Extern:** Student provides service that may entail academic and professional experience or development, although the activities are not directly supervised by a faculty member/preceptor in the student's degree program.

Assistantships

Teaching Assistantships require the performance of instructional activity. It is important to note that all graduate students who are assigned instructional responsibilities, where the language of instruction is English, must be certified as competent in spoken English. Consult your school/college dean's office for information on the SPEAK test process. As an alternative to teaching, Research Assistantships allow students to pursue research under the direction of a faculty member.

Assistantships, whether teaching or research, include both a stipend and tuition. To be considered for a Teaching or Research Assistantship, a student must have achieved a GPA of 3.25 or higher. In addition, the minimum GPA of 3.25 must be maintained throughout the duration of the assistantship.

Internships and Externships

Temple University offers a variety of Academic Internships and Graduate Externships to a limited number of graduate students. Academic and administrative departments determine the selection process for these awards. To be considered for an internship or externship, a student must have achieved a GPA of 3.25 or higher. In addition, the minimum GPA of 3.25 must be maintained throughout the duration of the internship/externship.

Interested students should consult the department/program of their choice for specific details. Internships include support in the form of a stipend and tuition. Externships provide a stipend. Recipients of these awards are required to perform up to 20 hours of service per week.

University-Wide Fellowships

Temple University offers a limited number of fellowships to support outstanding students in doctoral or master of fine arts degree programs. Self-nomination is not permitted. Nominations for fellowships are submitted on one of the Fellowship Nomination forms by the department/program only. Competition for fellowship awards occurs annually in the month of February. Specific deadlines are found on the Graduate School calendar and/or on the forms.

Fellowships typically provide support, including a stipend and tuition, for four years, with shorter terms for those enrolled in a master of fine arts degree program. The fellowship recipient is typically supported for two years with no service required or permitted. For the other two years, fellowship recipients are required to perform up to 20 hours of service per week as a Teaching Assistant or Research Assistant. Competition is for three different classifications of fellowship:

- **Presidential and Presidential Future Faculty Fellowships** are the most prestigious awards. Competition is reserved for only the most outstanding candidates.

- **University Fellowships** are awarded to outstanding incoming graduate students. These awards are intended to support students who demonstrate outstanding potential for success in their chosen fields.

- **Future Faculty Fellowships** are intended to attract outstanding students who would diversify the professoriate. Candidates are newly admitted graduate students from underrepresented groups in the applicant's discipline who show exceptional leadership and/or have overcome significant obstacles in pursuing an academic career.

Financial Information

Student Financial Services

Eligibility for the Federal Work-Study Program is based on the applicant's need as determined by the information on the applicant's FAFSA. In addition, students must be enrolled at least half-time and maintain satisfactory academic progress. Students are paid bi-weekly for hours worked.

University Support

Temple University provides financial support that includes assistantships, internships, externships, and fellowships. Assistantships, internships, and externships are awarded through departments and non-academic units based on need and fit. Internships and Externships

Temple University offers a variety of Academic Internships and Graduate Externships to a limited number of graduate students. Academic and administrative departments determine the selection process for these awards. To be considered for an internship or externship, a student must have achieved a GPA of 3.25 or higher. In addition, the minimum GPA of 3.25 must be maintained throughout the duration of the internship/externship.

Interested students should consult the department/program of their choice for specific details. Internships include support in the form of a stipend and tuition. Externships provide a stipend. Recipients of these awards are required to perform up to 20 hours of service per week.

University-Wide Fellowships

Temple University offers a limited number of fellowships to support outstanding students in doctoral or master of fine arts degree programs. Self-nomination is not permitted. Nominations for fellowships are submitted on one of the Fellowship Nomination forms by the department/program only. Competition for fellowship awards occurs annually in the month of February. Specific deadlines are found on the Graduate School calendar and/or on the forms.

Fellowships typically provide support, including a stipend and tuition, for four years, with shorter terms for those enrolled in a master of fine arts degree program. The fellowship recipient is typically supported for two years with no service required or permitted. For the other two years, fellowship recipients are required to perform up to 20 hours of service per week as a Teaching Assistant or Research Assistant. Competition is for three different classifications of fellowship:

- **Presidential and Presidential Future Faculty Fellowships** are the most prestigious awards. Competition is reserved for only the most outstanding candidates.

- **University Fellowships** are awarded to outstanding incoming graduate students. These awards are intended to support students who demonstrate outstanding potential for success in their chosen fields.

- **Future Faculty Fellowships** are intended to attract outstanding students who would diversify the professoriate. Candidates are newly admitted graduate students from underrepresented groups in the applicant's discipline who show exceptional leadership and/or have overcome significant obstacles in pursuing an academic career.
The Fellowship Nomination forms for the forthcoming academic year include those for Presidential and Presidential Future Faculty Fellow nominees, as well as for University and Future Faculty Fellow nominees. To be considered for nomination, applicants are urged to submit materials to the program of application by December 15.

**University Grants**

Two highly competitive awards are designed to accelerate the degree completion process by offering significant financial support to promising students. Both awards are nonrenewable. When application is made, the applicant must acknowledge that, if selected as an award recipient, they become ineligible for any other funding from Temple University both during the period of award and beyond. These grants are awarded once during the Fall term and once during the Spring term. The application process requires a student application and a departmental nomination form.

**Doctoral Dissertation Completion Grant**

For the Doctoral Dissertation Completion Grant, departments nominate doctoral students who have completed all requirements for the degree, except the required dissertation, and are advanced to candidacy. The Doctoral Dissertation Completion grant includes a stipend and one credit of tuition remission. The award is for five months.

**Master of Fine Arts Project Completion Grant**

The Master of Fine Arts Project Completion Grant carries a stipend and one credit of tuition remission. Departments nominate students who have completed all requirements for their degrees, except the required project. The award is for five months.

**First Summers Research Initiative**

The First Summers Research Initiative (FSRI) is a competition for summer research awards for domestic doctoral students at Temple University who are traditionally underrepresented in their field of study. The purpose of these awards is to provide eligible students with funding to encourage their pursuit of research activity in the first, second, and/or third summers of their graduate studies. The FSRI Award is valued at $6,000. Applicants can apply each summer until they achieve candidacy, although preference is given to first-time applicants.

Applicants for the FSRI award must meet the following criteria:

1. Enrollment in a Ph.D. program at Temple University in which the student is considered underrepresented in her/his field of study (i.e., as an ethnic minority or as a woman in the STEM disciplines), as determined by both National Science Foundation data and Temple demographics
2. U.S. citizenship
3. A minimum GPA of 3.5 at the time of the award
4. A formalized mentorship for the summer research experience with a faculty member at Temple University
5. Submission of a detailed plan for the mentored summer research experience prepared by the applicant and her/his faculty mentor, along with a cover letter from the mentor

The following criteria disqualify an applicant to garner the award:

1. Receipt of financial aid from Temple University in the form of fellowship, assistantship, internship, or externship or employment as a student worker during the summer award period

**Student Health Insurance**

All full-time graduate students have the opportunity to enroll in one of Temple University’s health insurance plans. Teaching Assistants, Research Assistants, Academic Interns, and Graduate Externs receive health insurance benefits. Fellowship recipients have similar options. For questions regarding the plans, please visit www.temple.edu/hr/students.
Graduate Student Services

Numerous resources are available to graduate students at Temple University to enhance their educational and personal experiences. Chief among these are:

- Career Center
- Disability Resources and Services
- Military and Veteran Services Center
- Student Health and Wellness

Career Center
www.temple.edu/provost/careercenter/
220 Mitten Hall
1913 N. Broad Street
Philadelphia, PA 19122
careercenter@temple.edu
215-204-7981
Fax: 215-204-4462

Open Monday–Friday, 8:30 a.m.–5:00 p.m.
Drop in to meet with a career coach for 15 minutes: Monday–Friday, 11:00 a.m.–3:00 p.m.
Schedule an appointment for an extended 30-minute session.

The Career Center at Temple University is a central resource that empowers students and alumni through comprehensive career development services. Every Temple graduate student can own her/his future through both in-person and online career services. Expert advice on preparing a resume, writing a cover letter, and networking is available. Graduate students can also meet with career coaches to receive the tools and guidance to explore their career options, build their professional brand, gain experience, and make their path for life-long career success. In addition, students can access a variety of online career resources such as a list of career services offerings in select schools and colleges, as found at www.temple.edu/provost/careercenter/resources/online.html.

Disability Resources and Services
disabilityresources.temple.edu
100 Ritter Hall Annex
1301 Cecil B. Moore Avenue
Philadelphia, PA 19122
drs@temple.edu
215-204-1280
TTY: 215-204-1786
Fax: 215-204-6794

Open Monday–Friday, 8:30 a.m.–5:00 p.m.
Appointments should be made in advance with a staff member.

Temple University is committed to the full inclusion of students with a disability in all programs and services. The goal is to build a learning community wherein people with diverse abilities are valued and included in all facets of life at the University.

Disability Resources and Services (DRS), a free and confidential service, facilitates access and accommodations on an individualized basis and provides opportunities for students with a disability to grow and develop.

Students who connect with DRS include those with physical, visual, hearing, and speech disabilities; health, mental health, and autism spectrum conditions; attention deficits; brain injuries; and learning disabilities. Many student veterans, student athletes, honors students, and international students who have a disability connect with DRS.

Dedicated, knowledgeable DRS staff meet with graduate students to determine eligibility for accommodations and discuss strategies for educational success. DRS develops programs and workshops to support student retention and provides training and awareness about access and inclusion to the entire University community.

All graduate students in need of such services should contact DRS on Main Campus to register, although services are available at all Temple University campuses. Each campus has an identified DRS liaison to aid the graduate student in accessing these services:

- Academic accommodations, including:
  - Alternate format materials
  - Note-taking support
  - Sign language interpreters and CART services
  - Testing accommodations
- Accessible housing
- Assistive technology
- Career development
- Intake assessment
- Mentoring and leadership development opportunities
- Scholarships

Military and Veteran Services Center
www.temple.edu/veterans
601 Conwell Hall
1801 N. Broad Street
Philadelphia, PA 19122
tuets@temple.edu
215-204-VETS or 215-204-6130

Open Monday–Friday, 8:30 a.m.–5:00 p.m.

Temple University is committed to assisting veterans, military students, and their dependents with making a smooth transition from the military to student life. To assist with this transition, the Military and Veteran Services Center works with various departments to plan and implement educational and social programs to help veteran students succeed at Temple University. Temple is recognized for its support of U.S. military veterans and active duty service members in their pursuit of a college education. Designated by U.S. News & World Report as one of the nation's "Best Colleges for Veterans" and ranked in the top 20% of Military Friendly® Schools by G.I. Jobs Magazine since 2010, Temple University, a proud participant of the Yellow Ribbon Program, provides access to excellence and opportunities for success for military service members and veterans who are admitted to and/or enrolled at Temple. Each school and college, as well as all the key student services departments that provide direct service to veterans, has a designated veteran point-of-contact person to help assist students as well as a veteran academic advisor.

PA Act 46
Pennsylvania Act 46 of 2014 requires public institutions of higher education in Pennsylvania to provide veteran students, as defined
in the Act, with preference in course scheduling. Non-compliance may be reported to the Pennsylvania Department of Education by submitting the Higher Education Student Complaint form found at www.education.pa.gov/ (http://www.education.pa.gov).

PA Act 11
Under Chapters 30, 31, 33, and 35 and Sections 1606 and 1607, Pennsylvania Act 11, which became law on July 1, 2015, mandates Temple University to charge the in-state tuition rate to out-of-state students living in Pennsylvania and using their GI Bill benefits. Eligible students have their student account adjusted to reflect the in-state tuition rate. Temple also reviews the financial aid package and makes any necessary adjustments based on the in-state tuition rate.

Veterans Certification Process
Veterans may enroll as full-time or part-time students, but benefits are based on enrollment status. To access your benefits, you must complete the following steps before the beginning of the first academic term in which you are enrolled at Temple University:

- Write your TUID on the front of your Certificate of Eligibility. To obtain a Certificate of Eligibility, visit www.benefits.va.gov/gibill/ (http://www.benefits.va.gov/gibill) and click on the “Apply for Benefits” tab or call 1-888-GI-Bill1.
- Upload the Certificate of Eligibility and/or other documents in the Veterans Benefit Declaration link in the Registrar’s Channel on TUportal.
- If you are receiving Chapter 35 DEA benefits, you must also write the social security number of the parent who transferred benefits.

NOTE: Not submitting your Certificate of Eligibility in advance can negatively affect the timely and accurate processing of your program benefit payments.

To use your GI Bill benefits for a term, you must be registered for classes. Click on the Veterans Benefit Declaration link in the Registrar’s Channel on TUportal. Then select the term, choose “yes” under process benefits, provide your credit hours, and click “save declaration.” This process notifies the certifying official that you are ready to have your benefits processed for that term.

If you do not want to use your GI Bill benefits for the term, go to the Veterans Benefit Declaration link, select the term, choose “no” under process benefits, and click “save declaration.”

The Veterans Coordinator in the Office of the University Registrar is available to answer questions concerning VA benefits at 215-204-7378 or OurVeterans@temple.edu. For more information on VA benefits, go to www.benefits.va.gov/gibill/ (http://www.benefits.va.gov/gibill).

Student Health Services
www.temple.edu/studenthealth
1810 Liacouras Walk, Fourth Floor
Philadelphia, PA 19122
215-204-7500
Fax: 215-204-4660

Open Monday–Tuesday, 8:30 a.m.–5:00 p.m.; Wednesday, 10:00 a.m.–5:00 p.m.; Thursday–Friday, 8:30 a.m.–5:00 p.m.

Student Health Services strives to promote a high standard of health among all Temple University students through programs in preventive medicine and health education, in addition to diagnosis and treatment of injury and illness. Care providers include doctors, nurse practitioners, and nurses. Services offered at the Main, Ambler, and Health Sciences Center campuses include basic medical care, an immunization/allergy injection clinic, family planning services, and a self-care center. Other services offered at Main Campus include nutritional consultation and HIV testing.

Tuttleman Counseling Services
counseling.temple.edu/
1810 Liacouras Walk
Philadelphia, PA 19122
215-204-7276
Fax: 215-204-5419

Open Monday–Friday, 8:30 a.m.–5:00 p.m.
Walk-in Clinic Hours: Monday–Tuesday, 10:00 a.m.–1:30 p.m.; Wednesday, 9:00 a.m.–12 noon; Thursday–Friday, 10:00 a.m.–1:30 p.m.

Appointments are required except in emergency situations when immediate care is required.

Tuttleman Counseling Services (TCS) is a comprehensive provider of mental health services to Temple’s student population. Services are free and confidential for all registered students. Our mission is to support and enhance the psychological functioning of our students and thereby support the academic mission of the University. It is recognized that our students are dealing with a variety of major life issues as they pursue their education, including affiliation, career choices, identity formation, relationships, and separation and individuation. In addition, some students come to us with prior mental health histories and medication needs.

TCS is first and foremost a provider of individual and group counseling services, although couple and family counseling are available at the student’s request. This foundation provides students with support and guidance for a wide variety of problems, from adjustment issues and transitory difficulties to more serious psychological problems and even severe mental illness. Whenever possible, we seek to help students avoid or reduce self-harm that may stem from making poor choices. TCS provides services in the following areas:

Psychological Services is staffed by licensed psychologists who provide brief individual, couple, and group counseling, as well as referral, consultation, and educational workshops. Some common issues that are addressed, either individually or in groups, include academic performance; anxiety, depression, or stress; career decisions; eating disorders; family problems; LGBTQIA issues; loss and/or grief; procrastination; racism; relationship problems; sexism; sexuality and sexually-transmitted diseases; shyness; and vocational counseling. The Psychological Services staff also assists students in locating resources.
and other services available on campus or in the city that are specific to their needs.

**Psychiatric Services** is committed to caring for the mental health needs of Temple University students by providing psychiatric evaluations, medication consultations, and short-term individual psychotherapy. The psychiatrist also responds to referrals from other TCS units and serves as a liaison to the Health Sciences Center. Students are seen by appointment, except in emergency situations when immediate care is required.

**CASA (Campus Alcohol and Substance Awareness)** is a comprehensive program focusing on all aspects of alcohol and other drug use and abuse. The CASA program is staffed by counselors who work with students individually and in groups.

**SACE (Sexual Assault Counseling and Education)** staff provide crisis intervention, individual counseling, survivor advocacy, and groups for survivors of assault, child sexual abuse, domestic violence, and sexual harassment.

**Wellness Resource Center**

wellness.temple.edu/
Mitten Hall, Lower Level
1913 N. Broad Street
Philadelphia, PA 19122
tuheart@temple.edu
215-204-8436
Fax: 215-204-9710

Open Monday–Friday, 8:30 a.m.–5:00 p.m.

The Wellness Resource Center is the on-campus health education and prevention office. Staffed by master's- and doctoral-level health professionals and supported by peer health educators, the Wellness Resource Center is committed to providing comprehensive wellness resources and services that empower Temple University students to make informed, healthier choices and achieve academic success. Center staff also work with faculty, staff, and departments in training and consultation capacities to support them in addressing student health needs and concerns. The Wellness Resource Center's multifaceted model helps to create a collective consciousness of wellness on Temple's campus with the hope of producing students who are not only well-educated but also healthy. Training, consultation, and programs on a variety of topics are offered, including alcohol and sex; alcohol and substance abuse; body image and nutrition; diversity; healthy relationships; HIV; LGBTQIA; mental health; safer sex; self-esteem; sexual assault, rape, and dating violence; sexuality: orientation, gender, and identity; sexually transmitted infections; and stress/time management.

The Wellness Resource Center provides a safe space for students to receive free, anonymous, or confidential health information in a supportive environment. Students are engaged in a variety of ways, including campus-wide wellness events, condom sales, course instruction, health programming, health-related referrals, HIV testing, individual health education sessions, peer education, and promotion of a healthier campus environment.

The Wellness Resource Center also offers students opportunities to get involved as peer educators and interns. These students receive comprehensive wellness training, preparing them to support campus-wide health and wellness initiatives. Students can receive academic credit for their work with the Wellness Resource Center. A limited number of paid positions are available to students who successfully complete SBS 2304 HEART Peer Educator Training (3 s.h.).

Tyler School of Art

Tyler School of Art has a preeminent reputation among institutions of higher education chiefly as a result of the collective record of achievement produced by its graduates. Tyler graduate programs are intended for students whose work has achieved strong definition and who seek continued growth and education in their discipline. Internationally recognized graduate faculty bring a reputation for excellence in academic research, studio practice, and teaching with a broad range of attitudes and philosophic positions. The educational atmosphere at Tyler is characterized by a system of mentorship that encourages diversity, respect for individual direction, and a rigorous exchange of ideas and creative challenges.

The philosophy on which Tyler School of Art was founded has contributed to the school's success. Since 1935, Tyler has grown from a small art school in suburban Elkins Park, PA, to encompass a wide range of programs on the Main Campus of Temple University. Stella Elkins Tyler, the donor of the estate on which the art school was founded, had a keen interest in progressive education and a deep appreciation of her mentor: Boris Blai, sculptor, who was appointed the founding dean of the school. It was her expressed wish that the estate become an environment for the advancement of the fine arts, scholarly study in the arts, and individual creativity.

In December 2015, Tyler School of Art became home to the Departments of Community and Regional Planning (now the Department of Planning and Community Development) and of Landscape Architecture and Horticulture, which previously resided in the School of Environmental Design. These two departments, along with Tyler's Department of Architecture, now form the Division of Architecture and Environmental Design. For more information on the Division, including the programs offered therein, visit http://bulletin.temple.edu/graduate/scd/tyler-div/.

Today, Tyler School of Art constitutes a major facet in a comprehensive set of arts programs at Temple University. Tyler School of Art educates, motivates, and inspires individuals who enter society as artists, architects, art historians, designers, and educators with the highest aspirations for achievement, producing innovative work that is publicly presented and critically considered. The school's location in the Northeast Corridor not only makes the extensive art collections and institutions of Philadelphia, New York City, and Washington, D.C. easily accessible, but also allows for opportunities to complement Tyler's faculty with an extensive program of visiting artists, critics, and scholars drawn from these cultural centers.

A Tyler education distinguishes its students as individuals who are well prepared for the unprecedented opportunities available today in the fields of architecture, art, and design.

**Programs**

**Degree Programs and Certificates**

- Art Education, M.Ed. (p. 33)
- Art History, M.A. (p. 34)

- Graduate Certificate: Transportation Planning

**Graduate Faculty**

- **Mariola Alvarez**, Assistant Professor, Department of Art History, Tyler School of Art; Ph.D., University of California.
- **Gerard F. Brown**, Assistant Professor, Department of Foundations, Tyler School of Art; M.A., School of the Art Institute of Chicago.
- **Susan E. Cahan**, Professor, Department of Art History, Tyler School of Art; Ph.D., Graduate Center, City University of New York.
- **Tracy E. Cooper**, Professor, Department of Art History, Tyler School of Art; Ph.D., Princeton University.
- **Chad D. Curtis**, Associate Professor, Department of Crafts, Tyler School of Art; M.F.A., Alfred University, New York State College of Ceramics.
- **Sasha Eisenman**, Associate Professor, Department of Landscape Architecture and Horticulture, Tyler School of Art; Ph.D., Rutgers University.
- **Amze J. Emmons**, Associate Professor, Department of Graphic Arts and Design, Tyler School of Art; M.F.A., University of Washington.
- **Seher Erdogan Ford**, Assistant Professor, Department of Architecture, Tyler School of Art; M.Arch., Yale University.
- **Jane DeRose Evans**, Professor, Department of Art History, Tyler School of Art; Ph.D., University of Pennsylvania.
- **Clifton R. Fordham**, Assistant Professor, Department of Architecture, Tyler School of Art; M.Arch., Yale University.
- **Mark T. Gibson**, Assistant Professor, Department of Art History, Tyler School of Art; M.F.A., Yale University.
- **Philip Glahn**, Associate Professor, Department of Painting, Drawing and Sculpture, Tyler School of Art; Ph.D., City University of New York.
- **Abby Ryan Guido**, Assistant Professor, Department of Graphic Arts and Design, Tyler School of Art; M.B.A., Temple University.
- **Marcia B. Hall**, Professor, Department of Art History, Tyler School of Art; Ph.D., Harvard University.
- **Sally W. Harrison**, Professor, Department of Architecture, Tyler School of Art; M.Arch., Massachusetts Institute of Technology.
- **Jesse Harrod**, Assistant Professor, Department of Crafts, Tyler School of Art; M.F.A., School of the Art Institute of Chicago.
David Herman Jr., Assistant Professor, Department of Art Education and Community Arts Practices, Tyler School of Art; Ph.D., University of North Texas.

Kelly A. Holohan, Professor, Department of Graphic Arts and Design, Tyler School of Art; M.F.A., Temple University.

Richard D. Hricko, Professor, Department of Graphic Arts and Design, Tyler School of Art; M.F.A., University of Iowa.

Pauline Hurley-Kurtz, Associate Professor, Department of Landscape Architecture and Horticulture, Tyler School of Art; M.L.A., University of Pennsylvania.

Renee E. Jackson, Assistant Professor, Department of Art Education and Community Arts Practices, Tyler School of Art; Ph.D., Concordia University.

Gabriel Kaprielian, Assistant Professor, Department of Architecture, Tyler School of Art; M.Arch., University of California Berkeley.

Lisa Kay, Assistant Professor, Department of Art Education and Community Arts Practices, Tyler School of Art; Ed.D., Northern Illinois University.

Nichola Kinch, Associate Professor, Department of Foundations, Tyler School of Art; M.F.A., Temple University.

Stephanie A. Knopp, Professor, Department of Graphic Arts and Design, Tyler School of Art; M.F.A., The Pennsylvania State University.

Robert T. Kuper, Associate Professor, Department of Landscape Architecture and Horticulture, Tyler School of Art; M.L.A., Auburn University.

Baldev S. Lamba, Associate Professor, Department of Landscape Architecture and Horticulture, Tyler School of Art; M.L.A., University of Pennsylvania.

Scott R. Laserow, Professor, Department of Graphic Arts and Design, Tyler School of Art; B.F.A., Temple University.

Robert Lugo, Assistant Professor, Department of Crafts, Tyler School of Art; M.F.A., The Pennsylvania State University.

Dermot MacCormack, Associate Professor, Department of Graphic Arts and Design, Tyler School of Art; B.F.A., National College of Art and Design, Dublin.

Martha Madigan, Professor, Department of Graphic Arts and Design, Tyler School of Art; M.F.A., School of the Art Institute of Chicago.

Lynn A. Mandarano, Associate Professor, Department of Planning and Community Development, Tyler School of Art; Ph.D., University of Pennsylvania.

Pablo Meninato, Associate Professor, Department of Architecture, Tyler School of Art; Ph.D., Universidade Federal do Rio Grande do Sul.

Rebecca Michaels, Associate Professor (Teaching/Instructional), Department of Graphic Arts and Design, Tyler School of Art; M.F.A., Temple University.

Leah Modigliani, Assistant Professor, Department of Foundations, Tyler School of Art; Ph.D., Stony Brook University.

Susan M. Moore, Professor, Department of Painting, Drawing and Sculpture, Tyler School of Art; M.F.A., University of California Davis.

Dona R. Nelson, Professor, Department of Painting, Drawing and Sculpture, Tyler School of Art; B.F.A., The Ohio State University.

Emily Neumeier, Assistant Professor, Department of Art History, Tyler School of Art; Ph.D., University of Pennsylvania.

Rashida Ng, Associate Professor, Department of Architecture, Tyler School of Art; M.Arch., University of Pennsylvania.

Sharyn A. O’Mara, Associate Professor, Department of Crafts, Tyler School of Art; M.F.A., Rhode Island School of Design.

Odili Donald Odita, Associate Professor, Department of Painting, Drawing and Sculpture, Tyler School of Art; M.F.A., Cranbook Academy of Art.

Karyn Olivier, Associate Professor, Department of Painting, Drawing and Sculpture, Tyler School of Art; M.F.A., Bennington College.

Michael Olszewski, Associate Professor, Department of Landscape Architecture and Horticulture, Tyler School of Art; Ph.D., University of Delaware.

Pepón Osorio, Professor, Department of Art Education and Community Arts Practices, Tyler School of Art; M.A., Columbia University.

Erin Pauwels, Assistant Professor, Department of Art History, Tyler School of Art; Ph.D., Indiana University, Bloomington.

Bryan Martin Satalino, Assistant Professor (Teaching/Instructional), Department of Graphic Arts and Design, Tyler School of Art; M.F.A., Temple University.

Paul E. Sheriff, Professor, Department of Graphic Arts and Design, Tyler School of Art; B.F.A., Temple University.

Mark Shetabi, Associate Professor, Department of Painting, Drawing and Sculpture, Tyler School of Art; M.F.A., Pennsylvania Academy of the Fine Arts.

Robert Z. Shuman Jr., Associate Professor, Department of Architecture, Tyler School of Art; B.Arch., Temple University.

Gerald D. Silk, Professor, Department of Art History, Tyler School of Art; Ph.D., University of Virginia.

Samantha Simpson, Associate Professor, Department of Foundations, Tyler School of Art; M.F.A., San Francisco Art Institute.

Hester Stinnett, Professor, Department of Graphic Arts and Design, Tyler School of Art; M.F.A., Temple University.

Kim D. Strommen, Professor, Department of Graphic Arts and Design, Tyler School of Art; M.F.A., Washington University.

Lolly Tai, Professor, Department of Landscape Architecture and Horticulture, Tyler School of Art; Ph.D., Heriot-Watt University, Edinburgh College of Art.

Christian Tomaszewski, Assistant Professor (Teaching/Instructional), Department of Painting, Drawing and Sculpture, Tyler School of Art; M.F.A., Academy of Fine Arts in Poznan, Poland.
Admission Requirements and Deadlines

Application Deadline:

Fall: January 6
Spring: November 1

All applications are evaluated together after deadline date.

APPLY ONLINE to this graduate program.

Letters of Reference:

Number Required: 3

From Whom: Letters of recommendation should be obtained from college/university faculty, art teachers or supervisors, and curators or gallery directors familiar with the applicant's academic and artistic competence. The letters should be submitted with the application at https://apply.temple.edu/Tyler/, along with the statement of goals and resume.

Coursework Required for Admission Consideration: Applicants must have an undergraduate degree, 40 undergraduate studio credits, and 9 art history credits.

Bachelor's Degree in Discipline/Related Discipline: A degree in Art or Art Education is required. Official transcripts from all universities/colleges attended, whether or not a degree was awarded, must be sent to the Tyler School of Art, Graduate Admissions Office, 2001 N. 13th Street, Philadelphia, PA 19122-6016.

Statement of Goals: Approximately 500 to 1,000 words include your interest in Temple's program in particular, your future career goals, and your academic and artistic endeavors and achievements.

Standardized Test Scores:

GRE/MAT: Required, with scores in the 50th percentile or higher on the verbal and/or analytical sections. Students with concerns about scores should contact the Chair of the Art Education and Community Arts Practices Department.

TOEFL: 79 iBT or 550 PBT minimum

IELTS: 6.5 minimum

Portfolio: Applicants must submit a portfolio that consists of 20 images representative of their range of experience and the immediate direction of their work. Include a variety of drawings. Portfolios are to be uploaded at https://temple.slideroom.com, as instructed at the website. SlideRoom requires an additional fee for this service. Original work, slides, CD-ROMs, catalogs, photographs, books, and/or binders are not acceptable substitutes for the SlideRoom portfolio and will not be reviewed or returned.

Resume: Current resume required.

Transfer Credit: Upon approval of the Art Education Program Director, the student's advisor, and the Associate Dean, up to 9 credits of graduate work completed at Temple University within a five-year period may be transferred into the program. Up to 6 credits of graduate coursework taken at other accredited institutions within the prior five years before matriculation may be considered for transfer into the program after the student has enrolled. No decisions are made until a student has successfully completed 15 matriculated credits at Tyler. The maximum number of credits a student may transfer is 9.
Program Requirements

General Program Requirements:
Number of Credits Required Beyond the Baccalaureate: 33, or 48 with Teaching Certification

Required Courses:

Total Credit Hours 15

The M.Ed. with Teaching Certification program of 48 credits, along with successful completion of the Praxis Fundamental Subjects: Content Knowledge exam and Praxis Art: Content Knowledge exam, provides all of the requirements for Pennsylvania State Certification in Art for Kindergarten through twelfth grade.

Internship: An internship is required if seeking Teaching Certification.

Culminating Events:

Artwork Review:
At the end of the final term’s residence, the student is required to pass a graduate review of artwork conducted by a committee of Art Education and Studio Art faculty.

Thesis:
The thesis for M.Ed. students is a scholarly master's paper (ARTE 9991) developed through research under the guidance of an advisor. The paper stands in lieu of a comprehensive examination.

Art History, M.A.

TYLER SCHOOL OF ART (http://tyler.temple.edu/#/prospective)

About the Program

The Art History Department offers courses of study leading to the Master of Arts and the Doctor of Philosophy degrees. The M.A. is intended to provide breadth and thoroughness in the study of Art History, either as preparation for future graduate study or as the foundation for careers in related areas.

Time Limit for Degree Completion: 3 years

Campus Location: Main

Full-Time/Part-Time Status: The degree program can be completed on a full- or part-time basis.
Interdisciplinary Study: The Fine Arts Administration Track promotes interdisciplinary study as students take courses in Art History and in business through the Fox School of Business and Management.

Study Abroad: Students researching Italian topics may be eligible for a fellowship to study in Rome. Doctoral students have priority. In addition, opportunities for study and excavating abroad are offered in the summer.

Accreditation: This degree program is accredited by the National Association of Schools of Art and Design.

Areas of Specialization: The curriculum includes courses in all periods and phases of Western art history, as well as special concentrations in Aegean, Greek, and Roman art; Latin American art; Modern and Contemporary American and European art; Northern Renaissance and Northern Baroque art; Renaissance and Baroque painting, sculpture, and architecture; and the History of Prints. It also introduces a wide variety of critical methods and approaches.

Job Prospects: The program is intended to provide breadth and thoroughness in the study of Art History as preparation for future graduate study or as the foundation for careers in related areas.

Non-Matriculated Student Policy: Non-matriculated students must contact the Art History Department for information.

Financing Opportunities: Teaching Assistantships are offered, but are ordinarily reserved for doctoral students. They carry a stipend and full tuition remission for up to 9 credits per term. Applications should include a statement of previous teaching and/or research experience, areas of interest and future goals, unofficial transcripts, and curriculum vitae. Applicants interested in being considered for a Teaching Assistantship must submit their application by January 15.

Eligible graduate students are encouraged to apply for work study. Work-study grants may be used to assist in the image-digitizing project and other slide room activities.

Admission Requirements and Deadlines

Application Deadline:

**Fall:** December 15
**Spring:** November 1

Applications are reviewed in March and November, or as they are received after the deadline dates. Students wishing to be considered for fellowships and teaching assistantships must apply by December 15.

**APPLY ONLINE to this graduate program.**

Letters of Reference:

**Number Required:** 3

**From Whom:** Letters of recommendation should be obtained from college/university faculty members, gallery directors, and/or curators familiar with the applicant's academic and artistic competence. The letters should be submitted with the application at https://apply.temple.edu/Tyler/, along with the statement of goals, resume, and writing sample.

Coursework Required for Admission Consideration: Five courses in Art History are required for admissions consideration; two surveys and one upper-level course in each of three areas to include Ancient or Medieval art; Renaissance or Baroque art; and Modern and Contemporary American and European art. Strong applicants to the program who meet the prerequisites, except in the number of courses, may be admitted conditionally. These students are permitted to enroll in a maximum of four undergraduate courses to complete the required prerequisites. A direct track to the Ph.D. in Art History is also offered for exceptionally well-qualified applicants. See the Art History, Ph.D. (p. 36) page for more information.

Bachelor’s Degree in Discipline/Related Discipline: A baccalaureate degree is required, but it need not be in Art History. Official transcripts from all universities/colleges attended, whether or not a degree was awarded, must be sent to the Tyler School of Art, Graduate Admissions Office, 2001 N. 13th Street, Philadelphia, PA 19122-6016.

Statement of Goals: Approximately 500 to 1,000 words include your interest in Temple’s program, your research goals, your future career goals, and your academic and research achievements. Submit at https://apply.temple.edu/Tyler/ along with letters of reference, resume, and writing sample.

Standardized Test Scores:

**GRE:** Required. Scores are typically in the 75-99% range, particularly on the verbal section.

**TOEFL:** 79 iBT or 550 PBT minimum

**IELTS:** 6.5 minimum

Writing Sample: The writing sample should demonstrate your ability to research and write a scholarly paper on a topic in Art History. The paper should be no more than 10 pages in length and fully referenced according to a professional, scholarly style manual. Submit at https://apply.temple.edu/Tyler/ along with the letters of reference, statement of goals, and resume.

Transfer Credit: The Graduate School allows the transfer of a maximum of 6 credits taken within a five-year period before matriculation for credit toward the master’s degree. These credits must be in Art History, at the graduate level, with at least a final grade of B, and must not have been used as part of the fulfillment of requirements for another degree awarded to the student.

Program Requirements

General Program Requirements:

**Number of Credits Required Beyond the Baccalaureate:** 30 for the Thesis Track; 36 for the Fine Arts Administration Track

Total Credit Hours: 36

Language Examination: Students must demonstrate a reading knowledge of two foreign languages: German and either French, Italian, Spanish, or another relevant language. This requirement is applicable for both the Thesis and the Fine Arts Administration Tracks.

Culminating Events:
Comprehensive Examination:
The comprehensive examination is a slide examination covering all of Western art. It is usually taken in the third term of study. The exam is applicable for both the Thesis and the Fine Arts Administration Tracks.

Thesis:
Students in the Thesis Track need to write a master's thesis, a document detailing independent research that demonstrates the student's mastery of her/his primary area of interest.

Internship:
The internship constitutes the culminating event for students completing the Fine Arts Administration Track. Following the completion of all course requirements, students complete an internship for which six credits are granted.

Art History, Ph.D.

TYLER SCHOOL OF ART (http://tyler.temple.edu/#/prospective)

About the Program

The Art History Department offers courses of study leading to the Master of Arts and the Doctor of Philosophy degrees. The Ph.D. is intended to prepare students for college teaching or other research-oriented positions.

Time Limit for Degree Completion: 7 years

Campus Location: Main

Full-Time/Part-Time Status: The degree program can be completed on a full- or part-time basis.

Study Abroad: Students researching Italian topics may be eligible for a fellowship to study in Rome. Doctoral students have priority. In addition, opportunities for study and excavating abroad are offered in the summer.

Ranking: In its evaluation of Art History doctoral programs by Academic Analytics, the Art History Department at Tyler School of Art was ranked out of 62 national Ph.D. programs as follows: 12th in 2006-07, 2nd in 2007-08, and 15th in 2008-09. Academic Analytics uses the Faculty Scholarly Productivity Index™ (FSP Index) and the Faculty Scholarly Productivity Database (FSP Database) to rank doctoral programs at Research Universities. It measures the scholarly productivity of faculty using their book and journal publications, journal article citations, federally funded research grants, and honorific awards. Because all Ph.D. programs are included in the database, Academic Analytics also establishes faculty productivity benchmarks based on national standards within the particular discipline.

Accreditation: This degree program is accredited by the National Association of Schools of Art and Design.

Areas of Specialization: The curriculum includes courses in all periods and phases of Western art history, as well as special concentrations in Aegean, Greek, and Roman art; Latin American art; Modern and Contemporary American and European art; Northern Renaissance and Northern Baroque art; Renaissance and Baroque painting, sculpture, and architecture; and the History of Prints. It also introduces a wide variety of critical methods and approaches.

Job Prospects: The program is intended to provide breadth and thoroughness in the study of Art History as preparation for a career in college teaching, research, or a related area.

Non-Matriculated Student Policy: Non-matriculated students must contact the Art History Department for information.

Financing Opportunities: Exceptionally qualified students who apply for the Ph.D. may be nominated for prestigious Presidential, University, and Future Faculty Fellowships. The department also offers some Teaching
Assistantships. Applicants interested in being considered for these awards must submit their application by January 15.

Assistantships carry a stipend and full tuition remission for up to 9 credits per term. Applications should include a statement of previous teaching and/or research experience, areas of interest and future goals, unofficial transcripts, and curriculum vitae. Teaching Assistantships are ordinarily reserved for doctoral students.

Eligible graduate students are encouraged to apply for work study. Work-study grants may be used to assist in the image-digitizing project and other activities in the Visual Resources Collection.

**Admission Requirements and Deadlines**

**Application Deadline:**
- **Fall:** December 15
- **Spring:** November 1

The Department of Art History offers a doctoral program for students with an M.A. degree, as well as for exceptionally well-prepared students with a B.A., who may be admitted directly without first earning a master's degree. A strong art history background, appropriate languages, and indicators of high achievement are requisites for students with a B.A. only. Applicants should declare an intention to enter this program.

Applications are processed as they are received throughout the year. Most applications are received before the deadline dates. Students wishing to be considered for fellowships and teaching assistantships must apply by December 15.

APPLY ONLINE to this graduate program.

**Letters of Reference:**
*Number Required: 3*

*From Whom:* Letters of recommendation should be obtained from college/university faculty members, gallery directors, and/or curators familiar with the applicant's academic and art historical competence. The letters should be submitted with the application at https://apply.temple.edu/Tyler/, along with the statement of goals, resume, and writing sample.

**Coursework Required for Admission Consideration:** Five courses in Art History are required for admissions consideration: two surveys and one upper-level course in each of three areas to include Ancient or Medieval art; Renaissance or Baroque art; and Modern and Contemporary American and European art. Strong applicants to the program who meet the prerequisites, except in the number of courses, may be admitted conditionally. These students are permitted to enroll in a maximum of four undergraduate courses to complete the required prerequisites. Official transcripts from all universities/colleges attended, whether or not a degree was awarded and whether the courses were taken as an undergraduate or a graduate student, must be sent to the Tyler School of Art, Graduate Admissions Office, 2001 N. 13th Street, Philadelphia, PA 19122-6016.

**Bachelor's Degree in the Discipline/Related Discipline:** A baccalaureate degree is required, but it need not be in Art History.

**Statement of Goals:** Approximately 500 to 1,000 words include your interest in Temple's program, your research goals, your future career goals, and your academic and research achievements. Submit at https://apply.temple.edu/Tyler/ along with letters of reference, resume, and writing sample.

**Standardized Test Scores:**
- **GRE:** Required. Scores are typically in the 75-99% range on the verbal and analytical sections.
- **TOEFL:** 100 iBT or 600 PBT minimum
- **IELTS:** 7.5 minimum

**Resume:** Current curriculum vitae required. Submit at https://apply.temple.edu/Tyler/ along with letters of reference, statement of goals, and writing sample.

**Writing Sample:** The writing sample should demonstrate your ability to research and write a scholarly paper on a topic in Art History. The paper should be no more than 10 pages in length and fully referenced according to a professional, scholarly style manual. Submit at https://apply.temple.edu/Tyler/ along with the letters of reference, statement of goals, and resume.

**Program Requirements**

**General Program Requirements:**
*Number of Credits Required Beyond the Master's: 30*
*Number of Credits Required Beyond the Bachelor's: 60*

**Required Courses:**
The program requires 60 graduate-level credits in Art History beyond the B.A. degree. Up to 9 credits can be taken in graduate courses outside the department if the coursework is relevant to the student's field and approved by the student's advisor. Up to 6 credits may be taken in directed research, and 6 credits are required in writing the dissertation.

**Language Examination:** Students must demonstrate a reading knowledge of two foreign languages: German and either French or Italian. With permission of the Director of Graduate Studies, the student may substitute another language appropriate to her/his field.

**Culminating Events:**

**Qualifying Paper:**
The qualifying paper is required of those entering the program with a bachelor's degree. At the end of the third term of coursework, such students are required to submit a long paper to demonstrate their command of scholarly research and writing. This is done in lieu of a master's thesis. The ability to continue in the Ph.D. program is contingent on the quality of this paper. If the qualifying paper is not deemed acceptable, the student is transferred to the M.A. program.

**Dissertation:**
The Doctoral Advisory Committee is formed to oversee the student's doctoral research and is comprised of at least three Graduate Faculty members. Two members, including the Chair, must be from the Art History Department. The composition of the Doctoral Advisory Committee must be approved by the department's Graduate Committee. The Chair is responsible for overseeing and guiding the student's progress,
coordinating the responses of the committee members, and informing the student of her/his academic progress.

The Dissertation Examining Committee evaluates the student's dissertation and oral defense. This committee is comprised of the Doctoral Advisory Committee and at least one additional Graduate Faculty member from outside the Art History Department. The Outside Examiner should be identified no later than the beginning of the term in which the student will defend the dissertation.

If a student needs to change a member of a committee, the new member must be approved by the department's Graduate Committee and registered with the Graduate Secretary and the Graduate School.

Students who are preparing to defend their dissertation should confirm a time and date with their Doctoral Advisory Committee and register with the designated person/office at least 15 days before the defense is to be scheduled. After the department has arranged the time, date, and room for the defense, the student must send the Graduate School a completed "Announcement of Dissertation Defense" form, found in TUportal under the Tools tab within "University Forms," at least 10 working days before the defense. The department posts flyers announcing the defense.

Ceramics/Glass, M.F.A.

TYLER SCHOOL OF ART (http://tyler.temple.edu/#/prospective)

About the Program

The graduate program in Ceramics/Glass is a two-year, 60-credit program leading to the Master of Fine Arts degree. The program usually accommodates four to six people studying ceramics and two to four individuals in glass. Our nationally recognized faculty, who bring to the program a reputation for excellence in teaching with a wide range of attitudes and philosophical positions, are complemented by an extensive schedule of visiting artists and critics. Students can also draw from the cultural resources of Philadelphia and the nearby art centers of New York and Washington, DC.

Time Limit for Degree Completion: 4 years

Campus Location: Main

Full-Time/Part-Time Status: Full-time status is required.

Interdisciplinary Study: The focus in Ceramics or Glass is augmented and balanced by specially designed graduate-level Art History courses and seminars; a required interdisciplinary seminar; and studio electives that ensure cross-disciplinary contact among students.

Affiliation(s): Tyler's Ceramics/Glass faculty are members of the Advisory Board of the Clay Studio, the American Crafts Council, the Glass Arts Society, the National Council on Education in the Ceramic Arts, and the Philadelphia Ceramic Consortium. These associations enhance the curriculum by providing an extensive program of visiting artists, workshops, and guest lecturers.

Study Abroad: The Crafts area participates in faculty and student exchange programs with the Glasgow School of Art in Scotland.

Accreditation: This degree program is accredited by the National Association of Schools of Art and Design.

Areas of Specialization: In the Ceramics area, equipment is available for wheel work, mold making, and slip casting projects. Large kilns are also available for hand building and sculpture. The Glass studios are designed for the creation of works in all areas of glass blowing, glass casting, glass fusing, and kiln work. Students are expected to demonstrate both conceptual and technical excellence in a given area, as well as a profound interest in research and experimentation.

Job Prospects: The M.F.A. program prepares graduates for careers as professional artists, craftspersons, designers, and educators.

Non-Matriculated Student Policy: M.F.A. courses are restricted to matriculated students.

Financing Opportunities: The principal duties of a Teaching Assistant (TA) or Academic Intern (AI) include assisting faculty members in preparing apparatus or materials for demonstrations and maintenance and/or monitoring of studio and exhibition areas and equipment.

Admission Requirements and Deadlines

Application Deadline:
Fall: January 6

Applications are evaluated together after the deadline date.
APPLY ONLINE to this graduate program.

Letters of Reference:
Number Required: 3

From Whom: Letters of recommendation should be obtained from college/university faculty members, gallery directors, and/or curators familiar with the applicant's academic and artistic competence. The letters should be submitted with the application at https://apply.temple.edu/Tyler/, along with the statement of goals and resume.

Coursework Required for Admission Consideration: 40 undergraduate studio credits and 12 art history credits are required.

Bachelor's Degree in Discipline/Related Discipline: A baccalaureate degree and portfolio in Ceramics or Glass are required. Official transcripts from all universities/colleges attended, whether or not a degree was awarded, must be sent to the Tyler School of Art, Graduate Admissions Office, 2001 N. 13th Street, Philadelphia, PA 19122-6016.

Statement of Goals: Approximately 500 to 1,000 words include your interest in Tyler's program, your research goals, your future career goals, and your academic and artistic achievements.

Standardized Test Scores:
TOEFL: 79 iBT or 550 PBT minimum
IELTS: 6.5 minimum

Portfolio: As a Master of Fine Arts applicant, you must submit a portfolio that consists of 20 images representative of the immediate direction of your work. Portfolios are to be uploaded at https://temple.slideroom.com, as instructed at the website. SlideRoom requires an additional fee for this service. Original work, slides, CD-ROMs, catalogs, photographs, books, and/or binders are not acceptable substitutes for the SlideRoom portfolio and will not be reviewed or returned.

Resume: Current resume required.

Transfer Credit: Upon approval of the appropriate department chairperson and the Vice Dean, up to 9 credits of graduate work may be transferred into the M.F.A. program as Art History or Studio electives. Only credits received within five years of the transfer request are eligible. No decisions are made concerning transfer credits until students have successfully completed 15 matriculated credits at Tyler. The maximum number of credits a student may transfer is 9.

**Graphic and Interactive Design, M.F.A.**

TYLER SCHOOL OF ART (http://tyler.temple.edu/#/prospective)

**About the Program**

The graduate program in Graphic and Interactive Design is a two-year, 60-credit program leading to the Master of Fine Arts degree. Authorship of large-scale design projects is central to the program. M.F.A. students create the content of their work in seminar and thesis classes. The execution of work in the M.F.A. program is expected to meet the exacting visual and technical demands of the graphic design profession.

**Time Limit for Degree Completion:** 4 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** Full-time status is required.

**Interdisciplinary Study:** The focus in Graphic and Interactive Design is augmented and balanced by specially designed graduate-level Art
History courses and seminars; a required interdisciplinary seminar; and studio electives that ensure cross-disciplinary contact among students.

**Accreditation:** This degree program is accredited by the National Association of Schools of Art and Design.

**Areas of Specialization:** The design faculty at Tyler is made up of practicing graphic and interactive designers with established reputations in the field. It is the goal of the design faculty to challenge students to achieve the highest level of excellence in their work.

**Job Prospects:** Graduates from the M.F.A. program have been extremely successful in the field. They work for print and web design companies, advertising agencies, publishing companies, and design departments of major corporations. They also work in film and television, music packaging and promotion, and product design and packaging, and as freelance illustrators.

**Non-Matriculated Student Policy:** M.F.A. courses are restricted to matriculated students.

**Financing Opportunities:** The principal duties of a Teaching Assistant (TA) include assisting faculty members in the classroom or laboratory: preparing apparatus, software, or material for demonstration; conducting tutorials and discussion sections; teaching classes; and monitoring and maintaining studio and computer facilities. In addition, an Academic Intern (AI) may assist in the Tyler Publications Office.

**Admission Requirements and Deadlines**

**Application Deadline:**
- **Fall:** January 6
- Applications are evaluated together after the deadline date.

**APPLY ONLINE to this graduate program.**

**Letters of Reference:**
**Number Required:** 3

**From Whom:** Letters of recommendation should be obtained from college/university faculty members, art directors, and/or designers familiar with the applicant’s academic and artistic competence. The letters should be submitted with the application at https://apply.temple.edu/Tyler/, along with the statement of goals and resume.

**Coursework Required for Admission Consideration:** 40 undergraduate studio credits and 12 art history credits are required.

**Baccalaureate Degree in Discipline/Related Discipline:** A baccalaureate degree and a portfolio specific to Graphic and Interactive Design are required. This program is not accepting applications for the 2018-2019 academic year.

**Metals/Jewelry/CAD-CAM, M.F.A.**
TYLER SCHOOL OF ART (http://tyler.temple.edu/#/prospective)

**About the Program**
The graduate program in Metals/Jewelry/CAD-CAM is a two-year, 60-credit program leading to the Master of Fine Arts degree. The program targets four areas of endeavor: artistic development, preparation for college teaching, designing for industry, and developing entrepreneurial skills. Our nationally recognized faculty, who bring to the program a reputation for excellence in teaching with a wide range of attitudes and philosophic positions, are complemented by an extensive schedule of visiting artists and critics. Students can also draw from the cultural resources of Philadelphia and the nearby art centers of New York and Washington, DC.

**Time Limit for Degree Completion:** 4 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** Full-time status is required.

**Interdisciplinary Study:** The focus in Metals/Jewelry/CAD-CAM is augmented and balanced by specially designed graduate-level Art History courses and seminars; a required interdisciplinary seminar; and studio electives that ensure cross-disciplinary contact among students.

**Study Abroad:** The Metals/Jewelry/CAD-CAM area participates in faculty and student exchange programs with the Glasgow School of Art in Scotland.

**Accreditation:** This degree program is accredited by the National Association of Schools of Art and Design.

**Areas of Specialization:** Graduate students in the Metals/Jewelry/CAD-CAM area utilize traditional materials as well as the latest technologies and materials in the field. The faculty, all recognized professionals in the field, know that many graduate students expect to teach at the college level. Therefore, emphasis is placed on preparing graduates for a career in academia. This preparation includes introduction to CAD-CAM and other digital technologies such as webpage design and digital photography.

**Job Prospects:** The M.F.A. program prepares graduates for careers as professional artists, craftspersons, designers, and educators.

**Non-Matriculated Student Policy:** M.F.A. courses are restricted to matriculated students.

**Financing Opportunities:** The principal duties of a Teaching Assistant (TA) or Academic Intern (AI) include assisting faculty members in preparing apparatus or materials for demonstrations as well as maintenance and/or monitoring of studio and exhibition areas and equipment.

Painting, M.F.A.

TYLER SCHOOL OF ART (http://tyler.temple.edu/#/prospective)

About the Program

The graduate program in Painting is a two-year, 60-credit program leading to the Master of Fine Arts degree. The program emphasizes Painting as an ongoing discipline that is rooted in a rich history. It derives its vitality from what painters share with artists of the past in conjunction with the contemporary world. We are committed to providing our students with an understanding of the broad cultural and historical context in which art is made and experienced.

Time Limit for Degree Completion: 4 years

Photography, M.F.A.

TYLER SCHOOL OF ART (http://tyler.temple.edu/#/prospective)

About the Program

The graduate program in Photography is a two-year, 60-credit program leading to the Master of Fine Arts degree. The Photography program offers a variety of specialized workshops focusing on current cultural and personal issues. Within the M.F.A. program, we encourage the development of an intimate and productive working environment utilizing a variety of photographic and digital media, resulting in an individual thesis exhibition.

Time Limit for Degree Completion: 4 years

Campus Location: Main

Full-Time/Part-Time Status: Full-time status is required.

Interdisciplinary Study: The focus in Photography is augmented and balanced by specially designed graduate-level Art History courses and seminars; a required interdisciplinary seminar; and studio electives that ensure cross-disciplinary contact among students.

Study Abroad: Tyler students may elect to spend a term or year in the Rome program, subject to the approval of the Photography faculty.

Accreditation: This degree program is accredited by the National Association of Schools of Art and Design.

Areas of Specialization: The Photography area houses studios that facilitate the use of various creative approaches to the medium, including handmade cameras, large-format photography, offset production, experimental and digital imaging, historical processes, critical theory, professional digital color, black-and-white printmaking, and career options for artists.

Job Prospects: The M.F.A. program prepares graduates for careers as professional photographers and educators. M.F.A. graduates also explore the many fields of applied art and act as curators, critics, and researchers.

Non-Matriculated Student Policy: M.F.A. courses are restricted to matriculated students.

Financing Opportunities: The principal duties of the Teaching Assistant (TA) or Academic Intern (AI) include assisting faculty members in preparing apparatus or materials for demonstrations and maintenance and/or monitoring of studio and exhibition areas and equipment.

Admission Requirements and Deadlines

Application Deadline:

Fall: January 6

Applications are evaluated together after the deadline date.

APPLY ONLINE to this graduate program.

Letters of Reference:

Number Required: 3

From Whom: Letters of recommendation should be obtained from college/university faculty members and gallery directors/curators familiar with the applicant's academic and artistic competence. The letters should be submitted with the application at https://apply.temple.edu/Tyler/, along with the statement of goals and resume.

Coursework Required for Admission Consideration: 40 undergraduate studio credits and 12 art history credits are required.

Bachelor's Degree in Discipline/Related Discipline: A baccalaureate degree and a portfolio in Photography are required. Official transcripts from all universities/colleges attended, whether or not a degree was awarded, must be sent to the Tyler School of Art, Graduate Admissions Office, 2001 N. 13th Street, Philadelphia, PA 19122-6016.

Statement of Goals: Approximately 500 to 1,000 words include your specific interest in Tyler's program, your research goals, your future career goals, and your academic and artistic achievements.

Standardized Test Scores:

TOEFL: 79 iBT or 550 PBT minimum
IELTS: 6.5 minimum

**Portfolio:** As a Master of Fine Arts applicant, you must submit a portfolio that consists of 20 images representative of the immediate direction of your work. Portfolios are to be uploaded at https://temple.slideroom.com, as instructed at the website. SlideRoom requires an additional fee for this service. Original work, slides, CDROMs, catalogs, photographs, books, and/or binders are not acceptable substitutes for the SlideRoom portfolio and will not be reviewed or returned.

**Resume:** Current resume required.

**Transfer Credit:** Upon approval of the department chairperson and the Vice Dean, up to 9 credits of graduate work may be transferred into the M.F.A. program as Art History or Studio electives. Only credits received within five years of the transfer request are eligible. No decisions are made concerning transfer credits until students have successfully completed 15 matriculated credits at Tyler. The maximum number of credits a student may transfer is 9.

1. Courses are sequenced to be taken in the Fall and Spring terms. The sequence is repeated a second year for a total of four courses taken over four terms.
2. Of the four required courses, two must be Art History Seminar classes chosen from a range of graduate offerings (5000 to 5800 or 8000 to 9980).
3. Course descriptions can be viewed on the Class Schedule (http://www.temple.edu/apply/common/cdcheck.asp). Please note that taking any course under the 5000 level for graduate credit requires prior approval from the studio area head.

**Culminating Events:**

**Thesis Exhibition:**
An approved thesis exhibition, written statement of working philosophy, and slide and/or CD portfolio are required at the final review in order to meet the M.F.A. requirements. The thesis exhibition should be the fruit of the two years' studio research and practice in which the student engaged. The student defends her/his thesis exhibition to the review committee. The committee then evaluates the exhibition as pass with distinction, pass, or fail.

**Printmaking, M.F.A.**

TYLER SCHOOL OF ART (http://tyler.temple.edu/#/prospective)

**About the Program**

The graduate program in Printmaking is a two-year, 60-credit program leading to the Master of Fine Arts degree. The program provides a challenging, professionally directed curriculum with classes that offer a broad range of methods, approaches, and practical applications in the field of Printmaking. Students are encouraged to develop a personal vision and direction in their work. M.F.A. candidates have 24-hour access to a separate, fully equipped print studio.

**Time Limit for Degree Completion:** 4 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** Full-time status is required.

**Interdisciplinary Study:** The focus in Printmaking is augmented and balanced by specially designed graduate-level Art History courses and seminars; a required interdisciplinary seminar; and studio electives that ensure cross-disciplinary contact among students.

**Study Abroad:** Students can elect to spend one of the two years of the program at Temple's campus in Rome. As space is limited, faculty approval is required.
Accreditation: This degree program is accredited by the National Association of Schools of Art and Design.

Areas of Specialization: The Printmaking area encompasses facilities for silkscreen, lithography, and etching. M.F.A. candidates work with faculty who are actively exhibiting professional artists. The faculty encourage the exploration of advanced printmaking techniques that include color and photo-etching, metal engraving, mezzolint, photolithography, viscosity color printing, woodcut, and full utilization of the computer as an image-creating tool.

Job Prospects: The M.F.A. program prepares graduates for careers as professional artists and educators.

Non-Matriculated Student Policy: M.F.A. courses are restricted to matriculated students.

Financing Opportunities: The principal duties of a Teaching Assistant (TA) or Academic Intern (AI) include assisting faculty members in preparing apparatus or materials for demonstrations, as well as maintenance and/or monitoring of studio and exhibition areas and equipment.

Sculpture, M.F.A.
TYLER SCHOOL OF ART (http://tyler.temple.edu/#/prospective)

About the Program
The graduate program in Sculpture is a two-year, 60-credit program leading to the Master of Fine Arts degree. The program provides an intense and stimulating work environment for the extremely motivated student of Sculpture. It is intended to prepare the student for practice as a professional artist and can offer foundation experience for university teaching if the participant is so motivated.

Time Limit for Degree Completion: 4 years

Campus Location: Main

Full-Time/Part-Time Status: Full-time status is required.

Interdisciplinary Study: The focus in Sculpture is augmented and balanced by specially designed graduate-level Art History courses and seminars; a required team-taught interdisciplinary seminar with students of Painting; studio electives that ensure cross-disciplinary contact among students; and access to specialized technical areas.

Study Abroad: Students can elect to spend a summer in Rome or with the Crafts Department program in Scotland.

Accreditation: This degree program is accredited by the National Association of Schools of Art and Design.

Areas of Specialization: Courses provide a framework in which to develop individual creative practices and professional goals within a community of peers. The faculty to student ratio of three full-time Sculpture professors to eight graduate students provides a supportive learning environment, while encouraging a spirit of friendly competition. All of the professors are actively exhibiting artists with differing aesthetics. All are committed teachers. Our graduate students are selected to represent a diversity of sculptural approaches. Faculty are able to mentor research in a range of areas in sculptural practice.

Job Prospects: The M.F.A. program prepares graduates for careers as professional artists and educators.

Non-Matriculated Student Policy: M.F.A. courses are restricted to matriculated students.

Financing Opportunities: The principal duties of a Teaching Assistant (TA) or Academic Intern (AI) include assisting faculty members in preparing and teaching undergraduate classes.

Admission Requirements and Deadlines
Application Deadline:
Fall: January 6

Applications are evaluated together after the deadline date.

APPLY ONLINE to this graduate program.

Letters of Reference:
Number Required: 3

From Whom: Letters of recommendation should be obtained from college/university faculty members, gallery directors, and/or curators familiar with the applicant's academic competence and abilities in the professional visual arts. The letters should be submitted with the application at https://apply.temple.edu/Tyler/, along with the statement of goals and resume.

Coursework Required for Admission Consideration: 40 undergraduate studio credits and 12 art history credits are required.

Bachelor's Degree in Discipline/Related Discipline: A baccalaureate degree and a documented portfolio of sculptural work are required. A wide range of media/disciplines may be appropriate, including IE-traditional and mixed sculptural media, performance, installation, and time/sound-based media. Official transcripts from all universities/colleges attended, whether or not a degree was awarded, must be sent to the Tyler School of Art, Graduate Admissions Office, 2001 N. 13th Street, Philadelphia, PA 19122-6016.

Statement of Goals: Approximately 500 to 1,000 words include your interest in Tyler's program, your research goals and philosophy of work, your future career goals, and your academic and artistic achievements.

Standardized Test Scores:
TOEFL: 79 iBT or 550 PBT minimum
IELTS: 6.5 minimum

Portfolio: As a Master of Fine Arts applicant, you must submit a portfolio that consists of 20 images representative of the immediate direction of your work. **Graduate Certificate: Arts in Community**

TYLER SCHOOL OF ART (http://tyler.temple.edu/#/prospective)

**About the Certificate**

The graduate certificate in Community in Arts was started as a commitment to the many and varied communities in Philadelphia and to Tyler students' education as artists to combine artistic disciplines with skills and knowledge in community organizing, positioning them for an expanded civic role in the 21st century. The certificate program develops and delivers university courses, after-school workshops, intergenerational forums, interdisciplinary performances, and site-specific installations. At its core are community partnerships and internships that enable Tyler/Temple students to expand their art disciplines as community collaborators. For several years, the Community in Arts program has created a body of community-based arts works, establishing a network of relationships and ongoing presence in neighborhoods that translates into continued projects. We have worked with youth and adults, organizations and families, in North Philadelphia neighborhoods and beyond, building a broad range of community arts partnerships that stimulate dialogue and share history to create exhibitions and interdisciplinary performances based on community lives and stories and shared student experiences.

**Time Limit for Certificate Completion:** 4 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The graduate certificate must be completed on a part-time basis presently.
Ranking: Tyler School of Art has been ranked as one of the top 10 art schools in the country by U.S. News & World Report, Graduate School edition.

Accreditation: The Tyler School of Art is accredited by the National Association of Schools of Art and Design.

Job Prospects: The certificate program is primarily dedicated to producing well-trained community arts organizers and educators.

Non-Matriculated Student Policy: All courses are available to non-matriculated graduate students who register by submitting a standard form along with a copy of their undergraduate and/or graduate transcript(s) indicating degree awarded to the Tyler Office of Admissions. When the student completes 9 credits, s/he must declare her/his intention to complete the Community in Arts certificate by submitting the “Non-Degree Seeking Student Request to Exceed 9 Credits of Graduate Coursework for Certificate Program” form, found in TUportal under the Tools tab within “University Forms,” to the Tyler Office of Admissions.

Admission Requirements and Deadlines

Application Deadline:

Fall and Spring admissions are on a rolling basis. Interested students should contact the Tyler Office of Admissions for permission to enroll in coursework.

Bachelor’s Degree in Discipline/Related Discipline: Applicants must hold a baccalaureate degree.

Other: Matriculated graduate students may take certificate classes as electives for their program of study with the approval of their program advisor.

Tyler School of Art / Division of Architecture and Environmental Design

In December 2015, the Temple University Board of Trustees moved the Departments of Landscape Architecture and Horticulture and of Planning and Community Development along with the Center for Sustainable Communities to the Tyler School of Art. In 2016, the Board approved the creation of the Division of Architecture and Environmental Design as a part of Tyler.

The mission of the Division of Architecture and Environmental Design is the enhancement of the relationship between individuals, social patterns, and political systems and the natural, built, and cultural environments of contemporary life. The programs uphold the environmental traditions established by the Pennsylvania School of Horticulture for Women and carried forward by our founding Department of Landscape Architecture and Horticulture, as well as a commitment to the present and future sustainability of neighborhoods, cities, and regions by our Department of Planning and Community Development. The Division’s core values are student-centered learning, community engagement, and environmental responsibility.

The Department of Architecture offers the Master of Architecture, a first professional degree program at the graduate level accredited by the National Architecture Accrediting Board. The department engages the city, exploring and addressing the ethical and social dimensions of architecture and the urban environment. Through this engagement, it seeks to develop an ethos of responsibility in students, preparing them to become effective leaders in practices and discourses surrounding the complex global and local issues of our time. The M.Arch. is housed in the LEED Silver certified (2014) Architecture Building on the Main campus of Temple University.

The Department of Landscape Architecture and Horticulture traces its origins to the Pennsylvania School of Horticulture for Women, founded in 1911 at Ambler Campus. In Fall 2010, it added a Master of Landscape Architecture (M.L.Arch.) degree. The department’s evolution has combined theory with practice, continuing the tradition of blending art and science with practical experience. Committed to excellence in ecologically based education, the department provides students with the knowledge and understanding of sustainable environments. Through an ecological approach to planning, design, development, and care of the land, the programs in Landscape Architecture and Horticulture promote the development of skills to improve the quality of urban, suburban, and rural communities. Courses and programs are offered that utilize the 187-acre Ambler campus as both an arboretum and a living laboratory for faculty and students. Students also have the opportunity to conduct research in a state-of-the-art greenhouse.

The Department of Planning and Community Development was established in 2002, originally as the Department of Community and Regional Planning. It prepares students to be skilled practitioners for the development of skills to improve the quality of urban, suburban, and rural communities by providing a broad-based understanding and awareness of multi-dimensional aspects of urban, suburban, and rural community challenges and the means of effecting change from both grass-roots and public policy perspectives. Students have the option of completing degree requirements at the Temple Center City Campus (TUCC) or the Ambler campus.

Architecture, M.Arch.

TYLER SCHOOL OF ART (http://tyler.temple.edu/#/prospective)

DIVISION OF ARCHITECTURE AND ENVIRONMENTAL DESIGN

About the Program

The Master of Architecture (M.Arch.) program is a first professional degree that prepares students for the practice of architecture through a rigorous course of study that engages students with urgent urban, architectural, and environmental issues. The program is structured to enable students to learn theories and methodologies of architectural design as well as to understand the social, economic, political, and technological forces that shape the built environment.

The curriculum is centered on a progressive sequence of design studios, intensive courses that require the synthesis and application of knowledge from other classes. Seminars in research, history/theory, building technology, and professional practice address questions in tandem with design studios. Elective courses allow students to pursue specializations with focus and intent. Together, the architecture courses satisfy professional accreditation requirements. During the final year of study, students may apply to engage in a self-directed research and design inquiry that culminates in a design thesis. The year-long architectural thesis is advanced by the individual student’s interests and skills under the guidance of an advisor.

The Architecture Department offers three tracks for the M.Arch.: a 1-year, 2-year, or 3-year program depending on a student’s educational background upon entry to the degree:

- The 1-year track is a +1 accelerated undergraduate-graduate program that enables qualified and eligible students to complete the 60-credit M.Arch. degree within a year after graduation with the Bachelor of Science in Architecture pre-professional degree. This accelerated degree program consists of a minimum of 111 credits of undergraduate coursework, and a maximum of 12 credits of graduate coursework to count toward both the undergraduate and graduate degrees. Upon successful completion of the fourth year, students receive a Bachelor of Science in Architecture. At the end of the contiguous fifth year (including two summer terms of graduate coursework), students receive a Master of Architecture degree. To be eligible for the program, students must be declared as an Architecture major; have a minimum of 3.25 cumulative GPA in at least 45 credits of coursework taken at Temple; be able to complete
their undergraduate degree in four full-time terms (beginning with their first term taking a graduate course as an undergraduate); and be able to complete the graduate degree in one additional year, including the two summer terms of graduate coursework.

- The 2-year track is a 60-credit degree program for students who earn Temple University’s Bachelor of Science in Architecture (B.S.Arch.) degree and for students from other four-year pre-professional degree programs with equivalent course content, nationally and internationally.
- The 3-year track provides a curriculum of up to 90 credits for students with a degree in subjects outside of architecture or without a pre-professional degree in architecture. The first year of this program provides a rigorous introduction to architectural design that consists of up to 30 credits of pre-professional studies, including design studios, building technology courses, and history and theory seminars. Each student is individually evaluated and placed into courses. The number of credits students will need to take within the first year varies depending on the amount of pre-professional architectural course content that has been previously satisfied by the candidate. Students who have little or no architectural content at the undergraduate level will be required to take the full 30 credits of pre-professional studies in architecture. Students who have degrees in architectural studies may receive advanced standing within the 3-year track.

**Time Limit for Degree Completion:** 5 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The curriculum is designed for a full-time load of 15 credits per term. Students are, however, able to complete the degree program on a part-time basis.

**Study Abroad:** M.Arch. students in the Professional Track may choose to study at the TU Rome or TU Japan campuses in the Spring terms.

**Accreditation:** The M.Arch. degree program is accredited by the National Architectural Accrediting Board (NAAB), which requires publication of the following statement:

In the United States, most registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit professional degree programs in architecture offered by institutions with U.S. regional accreditation, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted an eight-year, three-year, or two-year term of accreditation, depending on the extent of its conformance with established educational standards. Doctor of Architecture and Master of Architecture degree programs may require a pre-professional undergraduate degree in architecture for admission. However, the pre-professional degree is not, by itself, recognized as an accredited degree.

Temple University Architecture Department offers the following NAAB-accredited degree programs:

- M.Arch. (B.S.Arch. pre-professional degree + 60 graduate credits)
- M.Arch. (baccalaureate degree + up to 90 graduate credits)

The next accreditation visit for all programs is 2022.

**Job Prospects:** The Master of Architecture is an accredited professional degree program that prepares students for a career as a professional architect. Because this is an urban program located centrally in Philadelphia, engagement with the local professional community is a primary characteristic of the program. During their time in the program, students are provided with many opportunities to engage with members of the profession through design critiques and mentorship initiatives.

**Licensure:** In the United States, most state architecture registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The M.Arch. degree is accredited by the National Architectural Accrediting Board (NAAB) and, as such, meets the educational requirements for architectural registration. All students in the Architecture Department are eligible to enroll in the Architectural Experience Program (AXP), a key step toward licensure in most states within the United States, offered by the National Council of Architectural Registration Boards (NCARB).

**Non-Matriculated Student Policy:** Non-matriculated students must contact the Architecture Department for information. A maximum of 9 graduate credits can be taken at Temple University prior to applying to the program.

**Financing Opportunities:** The Architecture Department has a limited number of scholarships for graduate students. Students should also check the Tyler School of Art (http://tyler.temple.edu/#prospective) and Student Financial Services (http://sfs.temple.edu) websites for financial aid opportunities. Students should complete a FAFSA (http://www.fafsa.ed.gov) application to determine eligibility for student financial aid, work study employment within the Architecture Department, or other eligible on-campus jobs.

**Admission Requirements and Deadlines**

**Application Deadline:**

- **Fall:** January 6
- **Spring:** November 1

Applications are reviewed as they are received after the deadline. Students are normally admitted in the Fall term. In the instance when students are admitted in the Spring, they may have limited course offerings in the first term because course sequencing begins in the Fall. See the Tyler School of Art website for the most up-to-date application information.

**APPLY ONLINE to this graduate program.**

**Letters of Reference:**

**Number Required:** 3

**From Whom:** Letters of recommendation should be obtained from college/university faculty members and/or professionals in the field who are familiar with the applicant's academic and professional competence. The letters should be submitted with the application at https://apply.temple.edu/Tyler/ along with the statement of goals and resume.

**Coursework Required for Admission Consideration:**

The M.Arch. program has three tracks:

1. a +1 accelerated track,
2. a two-year 60-credit track, and
3. a three-year track, up to 90 credits.
The +1 accelerated track is open to qualified students in the Temple B.S. Arch. program. Admission into the two-year track is open only to students who have completed a pre-professional degree in Architecture, i.e., either the Temple B.S. in Architecture program or a program with course content equivalent to the current Temple University B.S. in Architecture. Admission into the three-year track is open to any student who has completed a bachelor's degree.

All applicants apply directly to the M.Arch. program, not to a specific curricular track. Admitted students are placed in the appropriate track based on a thorough review of all application materials.

**Bachelor’s Degree in Discipline/Related Discipline:** A pre-professional baccalaureate degree in Architecture (or equivalent) is required for the two-year Professional Track. A baccalaureate degree in any discipline is required for the three-year Intensive Design Track. Official transcripts from all universities/colleges attended, whether or not a degree was awarded, must be sent to Tyler School of Art, Graduate Admissions Office, 2001 N. 13th Street, Philadelphia, PA 19122-6016.

**Statement of Goals:** Approximately 500 to 1,000 words include your reason for pursuing a degree in Architecture; your interest in Temple's program in particular; and your aspirations and future career goals.

**Standardized Test Scores:**
- GRE: Required. Average scores are typically in the 50-65% range, particularly on the verbal section.
- TOEFL: 79 iBT or 550 PBT minimum
- IELTS: 6.5 minimum

**Resume:** Current resume required.

**Portfolio:** All applicants must submit a portfolio of their most important and representative design, creative, and written work. Portfolios from students with prior academic experience in Architecture should include architectural design work done in academic settings. Portfolios may also include work in the visual arts or in visual communication. In addition, work completed in practice may be included but should clearly articulate the applicant’s role in the project. Papers, research, or other materials (preferably dealing with the built environment) are invited as evidence of scholarly, academic, or creative work. Work chosen for inclusion in a portfolio should best represent the applicant’s knowledge, aptitudes, interests, creative ability, and experience relative to the discipline of Architecture. The portfolio should include approximately 20 images or other items.

Portfolios are to be uploaded at https://temple.slideroom.com, as instructed on the website. SlideRoom requires an additional fee for this service. Original work, slides, CD-ROMs, catalogs, photographs, books, and/or binders are not acceptable substitutes for the SlideRoom portfolio and will not be reviewed or returned.

**Transfer Credit:** The Architecture Admissions Committee recommends the awarding of graduate transfer credits on a case-by-case basis as applications are reviewed. The student may not receive graduate transfer credit for coursework taken as part of any other awarded graduate degree. The maximum number of graduate transfer credits a student may receive is 9.

### Program Requirements

**General Program Requirements:**

**Number of Credits Required:** 60 for the Professional Track; up to 90 for the Intensive Design Track.

\(^1\) ROME or TOKYO OPTION: M.Arch. students in the Professional Track can choose to study abroad at the Temple Rome or Temple Japan campuses in the Spring terms. Studio course credits count toward ARCH 8012. Architecture seminar course credits count toward Architecture elective requirements, and other coursework counts toward free elective credits in the program.

### Intensive Design Track

Up to 30 credits are taken in Year 1, with the actual number varying according to the amount of architecture pre-professional course content previously satisfied by the student. Students are required to keep a portfolio of coursework taken in Year 1 of the Intensive Design Track. Upon successful completion of Year 1, students undergo a portfolio review prior to entering the 2-year Professional Track. Courses for the Intensive Design Track include:

**Core Courses**

<table>

ARCH 5141 Architectural History 1: Ancient through Renaissance 3
ARCH 5142 Architectural History 2: Renaissance through 20th Century 3
ARCH 5296 Movements in Modern Architecture 3
ARCH 5596 Seminar in Architectural Theory 3

Total Credit Hours 42

1 Required of students who took fewer than 8 credits of foundation or architectural design studios as undergraduates.
2 Includes 6 credits of which may be taken in Years 2 and 3 as architecture electives.

Culminating Events:
Design Studio Project:
In the Intensive Design Track, students are required to take up to 18 credits of design studio and 6 credits of representation courses. Placement is assessed at the time of application and is based on the student’s portfolio and transcript.

In the Professional Track, students are required to complete four design studios or three design studios and a thesis.

Design Thesis:
Students can undertake an independent design thesis. This option is a two-term, two-course sequence: ARCH 9991 in the Fall, and ARCH 9996 in the Spring. The result is a pre-design position paper and design project analysis, culminating in a design thesis project presentation and written/graphic documentation of the work.

City and Regional Planning, M.S.

TYLER SCHOOL OF ART (http://tyler.temple.edu/#/prospective)
DIVISION OF ARCHITECTURE AND ENVIRONMENTAL DESIGN

About the Program

The M.S. in City and Regional Planning is the terminal degree for the planning profession. The primary purpose of the program is to develop skilled practitioners for the dynamic opportunities available in the government, non-profit, and private sectors. Students graduate with strengths in sustainability, environmental planning, community engagement, and advanced methods as well as a broad-based understanding and awareness of the physical and economic aspects of planning, sensitivity to the social and environmental impact of planning decisions, and a knowledge of governmental structures as they apply to planning.

The program’s strength in sustainability and environmental planning reflects a commitment to the late Ian McHarg’s notion of ecologically based planning and takes advantage of the fact that Dr. William Cohen, Professor of Practice, studied with Professor McHarg at the University of Pennsylvania. The concept of an ecologically based planning program involves placing a greater emphasis on the physical sciences than is found in most U.S. planning programs. The program’s emphasis also stems from its emergence from Temple University’s Center for Sustainable Communities.

Time Limit for Degree Completion: 5 years

Campus Locations: Main and Center City

Full-Time/Part-Time Status: The degree program is designed for full-time study, allowing students to complete the program in two years. Alternately, students are able to complete the program on a part-time basis.

Affiliation(s): The Department of Planning and Community Development is a member of the American Planning Association (APA) and Association of Collegiate Schools of Planning (ACSP).
Study Abroad: The department has a formal agreement with Beijing Forestry University, where study abroad is possible.

Accreditation: The M.S. program in City and Regional Planning is accredited by the Planning Accreditation Board (PAB), which accredits university programs in 77 North American universities leading to undergraduate and graduate degrees in planning. It currently accredits 72 master's and 16 bachelor's programs.

PAB's accreditation curriculum standards emphasize planning knowledge, planning skills, and values and ethics. The standards were revised in 2017 with input from the public and our sponsoring organizations: the American Planning Association (APA); the American Institute of Certified Planners (AICP), the professional planners' institute within the APA; and the Association of Collegiate Schools of Planning (ACSP).

The M.S. in City and Regional Planning was initially accredited in 2012 and re-accredited in 2016.

Areas of Specialization: Two optional concentrations are available to students in the M.S. in City and Regional Planning degree program:

- Sustainable Community Planning
- Transportation Planning

Graduate certificates in Sustainable Community Planning and Transportation Planning are available to non-matriculated students and students in other Temple University graduate programs, with the approval of their graduate advisor. For more information, see the certificate descriptions in the Graduate Bulletin or on the Department of Planning and Community Development website.

Job Prospects: A graduate degree in city planning is recognized by the profession as the terminal degree. Students graduating from the program easily find employment in the greater Philadelphia region, Commonwealth of Pennsylvania, and beyond. For the past several years, 100 percent of the program's graduates have found employment in planning or a related field within one year of graduation. Private, public, and non-profit employment opportunities in planning are strong for graduate degree holders based on current need and projected growth over the next decade.

Certification: Students graduating from the accredited M.S. in City and Regional Planning are eligible to sit for the certified planner exam offered by the American Institute of Certified Planners (AICP) within two years of graduation. AICP is the professional institute of the American Planning Association. It provides recognized leadership nationwide in the certification of professional planners. For details on the certified planner exam and eligibility requirements, visit https://www.planning.org/aicp/.

Non-Matriculated Student Policy: Non-matriculated students are permitted to take a maximum of 9 graduate credits at Temple University prior to applying to the program. Please contact the Department of Planning and Community Development for more details.

Financing Opportunities: The Department of Planning and Community Development has a limited number of scholarships for graduate students. Students should also check the Tyler School of Art and Student Financial Services websites for financial aid opportunities. Students should complete a FAFSA application to determine eligibility for student financial aid, work study employment within the department, or other eligible on-campus jobs.

Admission Requirements and Deadlines

Application Deadline:
Fall: January 6
Spring: November 1

Applications are reviewed as they are received up through the deadline. Late applications may be considered for admission. See the Tyler School of Art website for the most up-to-date application information.

APPLY ONLINE to this graduate program.

Letters of Reference:
Number Required: 3

From Whom: Letters of recommendation should be obtained from college/university faculty members, planning professionals, and others in a position to evaluate the applicant's past work and/or ability to do graduate work. The letters should be submitted with the application at https://apply.temple.edu/Tyler/, along with the statement of goals.

Bachelor's Degree in Discipline/Related Discipline: All applicants must hold a baccalaureate degree from an accredited college or university, but the bachelor's degree need not be in a related field of study. Official transcripts from all universities/colleges attended, whether or not a degree was awarded, must be sent to the Tyler School of Art, Graduate Admissions Office, 2001 N. 13th Street, Philadelphia, PA 19122-6016.

Statement of Goals: Approximately 500 to 1,000 words include your reason for pursuing a degree in City and Regional Planning; your interest in Temple's program in particular; and your future career goals.

Standardized Test Scores:
GRE/GMAT: Required. A waiver of this requirement may be requested if the applicant has at least four years of experience in the field; OR has an undergraduate cumulative grade point average of at least 3.25; OR a cumulative GPA of at least 3.25 in 9 credits of graduate work from an accredited institution completed prior to applying to the M.S. program; OR a graduate degree from an accredited institution in a related discipline.

TOEFL: 79 iBT or 550 PBT minimum

IELTS: 6.5 minimum

Transfer Credit: The City and Regional Planning Admissions Committee recommends the awarding of transfer credits on a case-by-case basis as applications are reviewed. The student may not receive transfer credit for coursework taken as part of any other awarded graduate degree. The maximum number of credits a student may transfer is 9.

Program Requirements

General Program Requirements:
Number of Credits Required to Earn the Degree: 45

Required Courses:

<table>

</tr>
<tr>
<td>CTRP 8755</td>
<td>Introduction to Emergency Management Planning</td>
</tr>
</tbody>
</table>

Total Credit Hours 12

1 Students may substitute one relevant 3-credit CTRP graduate course selected in consultation with a department advisor or chair as an elective.

### Transportation Planning

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CTRP 8655</td>
<td>Transportation Planning</td>
<td>3</td>
</tr>
</tbody>
</table>

**Electives**

Select three of the following:  

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>CTRP 8276</td>
<td>Regional Development</td>
</tr>
<tr>
<td>CTRP 8655</td>
<td>Integrated Transportation and Land-Use Planning: Context-Sensitive Design Solutions</td>
</tr>
<tr>
<td>CTRP 8657</td>
<td>Non-motorized Transportation Planning</td>
</tr>
</tbody>
</table>

Total Credit Hours 9

1 Students may substitute one relevant 3-credit CTRP graduate course selected in consultation with a department advisor or chair as an elective.

### Internship: A supervised 180-hour internship is required. The internship emphasizes the acquisition and application of practical skills in planning. Placements are made at public agencies, non-profit institutions, and private firms, with designated onsite and Planning and Community Development faculty supervisors. Internships may require interim reports and must culminate in a written report regarding the experience. Students have the option of registering for CTRP 9885 Internship in Planning for 3 elective credits. If the student has relevant professional experience, the internship requirement is waived and CTRP 9885 may not be taken for credit toward the degree.

### Culminating Events:

#### Capstone Course:

All students must complete CTRP 9889 Planning Studio (6 credits), which involves undertaking a planning project in cooperation with a local or regional client. Students synthesize the knowledge gained from previous courses in the development of an integrated approach that is appropriate to their project.

#### Thesis Option:

The master's thesis is substantial in length and follows a knowledge-enhancement model, based on planning theory, methodology, and history. Requirements are specified in the Graduate School’s Dissertation and Thesis Handbook, found at https://grad.temple.edu/resources/dissertation-thesis-handbook. Up to 6 elective credits may be earned for taking CTRP 9995 Thesis in Planning.

The student's Master's Committee is responsible for evaluating the thesis and its defense. No thesis should go to defense unless it is ready for public scrutiny. The committee evaluates the student’s ability to express in writing and orally her/his research question, methodological approach, primary findings, and implications. Committee members vote to pass or fail the thesis upon conclusion of the public defense. If the student must make revisions, those changes must be approved as arranged by the Master's Committee.

Landscape Architecture, M.L.Arch.

TYLER SCHOOL OF ART (http://tyler.temple.edu/#/prospective)
DIVISION OF ARCHITECTURE AND ENVIRONMENTAL DESIGN

About the Program
The Master of Landscape Architecture has an emphasis in ecological
landscape restoration. Program objectives are to educate students to
become capable practitioners with knowledge of a specialty area of
the discipline; to educate practitioners who are trained to think critically
and creatively about each ecological situation; and to develop a body
of knowledge through research, long-term monitoring of restored
landscapes, and comparison of methods upon which current and future
professionals can draw.

The American Society of Landscape Architects (ASLA) describes
landscape architecture as a profession encompassing “the analysis,
planning, design, management, and stewardship of the natural and built
environments.” Landscape architecture is a professional discipline that
is receiving wider recognition as an environmentally focused profession
whose mission is to promote environmental balance and human well-
being through sustainable design. Ecological landscape restoration, the
emphasis of this M.L.Arch. degree, has emerged as a critical dimension
of landscape architecture over the past few decades. This is in response
to the enormous negative impact that human activity has had on our
environment resulting in ecosystem degradation. Landscape restoration
increases local and regional biodiversity and mitigates potentially
dangerous consequences of degradation through projects such as
stream bank stabilization, created wetlands to help infiltrate storm water,
mine reclamation, industrial brown field remediation, and reforestation of
urban land. Understanding the ecological processes and natural history
that constitute a site is fundamental to the design process.

Time Limit for Degree Completion: 6 years

Campus Location: Ambler, with some courses offered at the Main and
Center City campuses

Full-Time/Part-Time Status: The degree program can be completed on
a full- or part-time basis.

Interdisciplinary Study: The program is interdisciplinary and allows
students to enroll in classes from allied disciplines. In addition to the
courses in Landscape Architecture, the program builds on the field
courses in Horticulture related to the woodland and riparian habitats at
the Ambler campus. The program can also draw from the repository of
local ecological landscape restoration examples and practitioners in the
Philadelphia region.

Affiliation(s): The Department is a member of the American Society
of Horticultural Science (ASHS), the American Society of Landscape
Architects (ASLA), the Council of Educators in Landscape Architecture
(CELA), and the Society for Ecological Restoration (SER).

Accreditation: The Department of Landscape Architecture and
Horticulture offers two accredited programs in Landscape Architecture.
The first professional Master of Landscape Architecture degree
(M.L.Arch.) and the undergraduate Bachelor of Science in Landscape
Architecture (B.S.) are both accredited by the Landscape Architectural
Accreditation Board (LAAB) of the American Society of Landscape
Architects (ASLA).

Areas of Specialization: The focus of the M.L.Arch. degree program
is ecological landscape restoration, which emphasizes understanding
of ecological processes and plant communities. This understanding is
applied in a sequence of design studios. The design application results
in connecting theory and scientific principles to creative application in the
natural setting. The program educates practitioners skilled at designing
beautiful landscapes that are also ecologically appropriate to their locale.

Job Prospects: Prepared with the knowledge to make informed and
creative environmental design decisions, graduates are highly marketable
and have the skills required of professional landscape architects,
including design, computer graphics, horticultural knowledge, technical
competence, and knowledge of restoration. While the U.S. Department
of Labor cited landscape architecture as a top growth profession through
2016, projecting a needed increase of 16%, organizations related to
the profession indicate that the number of graduates from professional
degree programs is insufficient to meet current or projected demand.
Temple University’s location in the tri-state region supports professional
opportunities for graduates. This area has a very high concentration of
prominent landscape architecture firms, public agencies, and ecological
restoration professionals.

Licensure: Graduation from an accredited program is a requirement for
taking the licensure exam and practice as a landscape architect.

Non-Matriculated Student Policy: A maximum of 9 graduate credits can
be taken at Temple University prior to applying to the program.

Financing Opportunities: Inquiries about funding should be directed to
the Department of Landscape Architecture and Horticulture.

Admission Requirements and Deadlines
Application Deadline:
Fall: January 6
Spring: November 1

Applications are reviewed as they are received up through the deadline.
Late applications may be considered for admission. See the Tyler School
of Art website for the most up-to-date application information.

APPLY ONLINE to this graduate program.

Letters of Reference:
Number Required: 3
From Whom: Letters of recommendation should be obtained from college/university faculty members, employers, and others who can evaluate the applicant's past work and/or ability to do graduate work. The letters should be submitted with the application at https://apply.temple.edu/Tyler/, along with the statement of goals.

Coursework Required for Admission Consideration: All applicants apply directly to the M.L.Arch. program, not to a specific curricular track. Admitted students are placed in the appropriate track based on a thorough review of all application materials.

For students who have an undergraduate degree in Landscape Architecture, this program is a 44-credit post-professional degree. The program is also open to students without a degree in Landscape Architecture, but students without the appropriate prerequisite coursework need a maximum of 26 additional credits.

Bachelor's Degree in Discipline/Related Discipline: All applicants must present credentials that are the equivalent of the appropriate baccalaureate degree at Temple University. Official transcripts from all universities/colleges attended, whether or not a degree was awarded, must be sent to the Tyler School of Art, Graduate Admissions Office, 2001 N. 13th Street, Philadelphia, PA 19122-6016.

Statement of Goals: Approximately 500 to 1,000 words include your reason for pursuing an advanced degree in Landscape Architecture; your interest in Temple's program in particular; and your aspirations and future career goals.

Standardized Test Scores:
GRE/GMAT: Required. A waiver of this requirement may be requested if the applicant has at least four years of experience in the field; OR has an undergraduate cumulative grade point average of at least 3.25; OR a cumulative GPA of at least 3.25 in 9 credits of graduate work from an accredited institution completed prior to applying to the M.S. program; OR a graduate degree from an accredited institution in a related discipline.

TOEFL: 79 iBT or 550 PBT minimum

IELTS: 6.5 minimum

Transfer Credit: The Landscape Architecture Admissions Committee recommends the awarding of transfer credits on a case-by-case basis as applications are reviewed. The student may not receive transfer credit for coursework taken as part of any other awarded graduate degree. The maximum number of transfer credits a student may receive is 9.

Program Requirements

General Program Requirements:
Number of Credits Required to Earn the Degree: 44 for students with an undergraduate degree in Landscape Architecture seeking a post-professional degree; 44-70 for students without an undergraduate degree in Landscape Architecture seeking a first professional degree

Required Courses:

### Post-Professional Degree (for students WITH an undergraduate degree in Landscape Architecture)

**Graduate Certificate: Sustainable Community Planning**

TYLER SCHOOL OF ART (http://tyler.temple.edu/#/prospective)
DIVISION OF ARCHITECTURE AND ENVIRONMENTAL DESIGN

**About the Certificate**

The graduate certificate in Sustainable Community Planning is available to non-matriculated students and students in other Temple University graduate programs, with the approval of their graduate advisor. The courses introduce students to the broad range of issues and topics relevant to planning for the sustainable development of our cities and regions. Elective courses provide the opportunity to deepen knowledge...
and training in specific areas of sustainability and environmental planning. Undertaking the graduate certificate in Sustainable Community Planning allows students to:

- understand the discourse of theory and practice of sustainable development at the local, regional, and global levels;
- develop indicators to monitor and evaluate the sustainability of site, community, and regional actions, plans, and designs;
- recognize models of sustainability and know how to use such models to inform their professional practice; and
- understand how to incorporate sustainability principles into planning practice to address the interrelationships between social, economic, and environmental factors.

This certificate meets the needs of public and private sector employees who work to improve the sustainability of neighborhoods, cities and regions and to address the adverse impacts of climate change without academic degrees in planning.

Campus Location: Main and Center City

Full-Time/Part-Time Status: The graduate certificate can be completed on a part-time basis.

Non-Matriculated Student Policy: To register for certificate courses as a non-matriculated student, please visit Tyler School of Art’s Non-Matriculating Students webpage found at https://tyler.temple.edu/non-matriculating-students.

Admission Requirements and Deadlines

Bachelor’s Degree in Discipline/Related Discipline: All applicants must present credentials that are the equivalent of the appropriate baccalaureate degree at Temple University.

Certificate Requirements

Number of Credits Required to Complete the Certificate: 12\(^1\), plus a prerequisite course in Environmental Planning\(^2\)

Total Credit Hours 12

\(^1\) Students matriculated in the M.S. in City and Regional Planning program may elect to take the certificate courses as a transcripted concentration within the M.S. degree. Other graduate students matriculated at Temple University may take certificate classes as electives for their program with the approval of their program advisor.

\(^2\) The prerequisite in Environmental Planning may be taken concurrently with the required courses for the certificate. Students complete this prerequisite by taking CTRP 2213 Environmental Planning (3 s.h.) or CTRP 8213 Environmental Planning (3 s.h.); by demonstrating that comparable undergraduate or graduate coursework has already been completed; or through self-study that achieves the stated course competencies of CTRP 2213 or CTRP 8213.

\(^3\) Students may substitute for an elective a relevant 3-credit CTRP graduate course selected in consultation with a department advisor or chair.

Graduate Certificate:
Transportation Planning

TYLER SCHOOL OF ART (http://tyler.temple.edu/#/prospective)
DIVISION OF ARCHITECTURE AND ENVIRONMENTAL DESIGN

About the Certificate

The graduate certificate in Transportation Planning is available to non-matriculated students and students in other Temple University graduate programs, with the approval of their graduate advisor. The courses introduce the broad range of issues and topics relevant to transportation planning and the specific relationships between transportation planning and land use planning. Through elective courses, the certificate also provides the opportunity for students to deepen knowledge and training in specific areas of transportation planning. Undertaking the graduate certificate in Transportation Planning allows students to develop:
• knowledge of the key contemporary transportation and travel behavior challenges facing transportation planners and engineers;
• critical thinking skills to address these challenges and analyze important debates in the field; and
• familiarity with and basic competence in transportation planning methodologies.

This certificate meets the needs of public and private sector employees who work in the field of transportation planning without academic degrees in transportation planning or transportation engineering.

**Campus Location:** Main and Center City

**Full-Time/Part-Time Status:** The graduate certificate can be completed on a part-time basis.

Center for the Performing and Cinematic Arts / Boyer College of Music and Dance

Since its founding as a college of music in 1962, the Boyer College of Music and Dance has grown in size and scope to become a comprehensive college representing academic and artistic excellence in music and dance. Originating as a single department of music education offering vocal instruction at Temple University in 1893, the College is now part of the Center for the Performing and Cinematic Arts at Temple University. Boyer College is located in close proximity to Philadelphia's historic cultural institutions, including the Kimmel Center for the Performing Arts, Opera Philadelphia, the Pennsylvania Ballet, Philadanco, the Philadelphia Museum of Art, and The Philadelphia Orchestra.

The Boyer College of Music and Dance is committed to nurturing talented students by promoting music and dance as art forms, as media for human expression, and as subjects of intellectual inquiry. Recognizing that all of the arts possess unique powers — to move the spirit, to excite the mind, to reveal the past, to celebrate the future, to instruct, to heal, to foster communication — the College aims to advance music and dance in their myriad, interrelated forms through creative and scholarly work, teaching, and service. Boyer College seeks to provide an inclusive educational community that honors the uniqueness of the individual, values diversity of perspective, and affirms music and dance as central to society and culture.

Students at Boyer College have the unique opportunity to interact with leading composers, conductors, educators, performers, and choreographers while experiencing a challenging and diverse academic curriculum. Graduates have gone on to rewarding careers as music and dance professionals. Many are in leadership positions and teaching at top colleges and universities throughout the country.

Among the many accomplishments of the Boyer College of Music and Dance are:

- Numerous Grammy nominations and awards.
- Selection of Dance MFA student choreography for the American College Dance Festival Association's biennial National College Dance Festival at the John F. Kennedy Center for the Performing Arts.
- Faculty honors that include Fulbright Scholarships; Guggenheim, National Endowment for the Arts at Temple University. Boyer College is located in close proximity to Philadelphia's historic cultural institutions, including the Kimmel Center for the Performing Arts, Opera Philadelphia, the Pennsylvania Ballet, Philadanco, the Philadelphia Museum of Art, and The Philadelphia Orchestra.

Cheryl L. Dileo, Professor, Department of Music Education and Music Therapy, Boyer College of Music and Dance; Ph.D., Louisiana State University.

Rollo A. Dilworth, Professor, Department of Music Education and Music Therapy, Boyer College of Music and Dance; D.M.A., Northwestern University.

Sherril Dodds, Professor, Department of Dance, Boyer College of Music and Dance; Ph.D., University of Surrey.

Edward Flanagan, Associate Professor, Department of Music Studies, Boyer College of Music and Dance; Ph.D., Temple University.

Cynthia J. Folio, Professor, Department of Music Studies, Boyer College of Music and Dance; Ph.D., Eastman School of Music.

Mark Franko, Professor, Department of Dance, Boyer College of Music and Dance; Ph.D., Columbia University.

Shana Goldin-Perschbacher, Assistant Professor, Department of Music Studies, Boyer College of Music and Dance; Ph.D., University of Virginia.

Matthew J. Greenbaum, Professor, Department of Music Studies, Boyer College of Music and Dance; Ph.D., City University of New York.

Jillian Harris, Associate Professor, Department of Dance, Boyer College of Music and Dance; M.F.A., New York University Tisch School of the Arts.

Laura E. Katz Rizzo, Assistant Professor, Department of Dance, Boyer College of Music and Dance; Ph.D., Temple University.

Michael Klein, Professor, Department of Music Studies, Boyer College of Music and Dance; Ph.D., State University of New York at Buffalo.

Jan L. Krzywicki, Professor, Department of Music Studies, Boyer College of Music and Dance; M.M., Philadelphia Musical Academy.

Edward D. Latham, Associate Professor, Department of Music Studies, Boyer College of Music and Dance; Ph.D., Yale University.

Kathryn Leemhuis, Assistant Professor, Department of Vocal Arts, Boyer College of Music and Dance; D.M.A., University of Cincinnati-Conservatory of Music.

Kun-Yang Lin, Professor, Department of Dance, Boyer College of Music and Dance; M.F.A., New York University Tisch School of the Arts.

Joyce Z. Lindorff, Professor, Department of Keyboard Studies, Boyer College of Music and Dance; D.M.A., The Juilliard School.

Wendy Magee, Professor, Department of Music Education and Music Therapy, Boyer College of Music and Dance; Ph.D., University of Sheffield.

Noriko Manabe, Associate Professor, Department of Music Studies, Boyer College of Music and Dance; Ph.D., Graduate Center, City University of New York.

Phillip R. O'Banion, Assistant Professor, Department of Instrumental Studies, Boyer College of Music and Dance; M.M., University of Colorado.

Richard D. Oatts, Professor, Department of Music Studies, Boyer College of Music and Dance.

Lambert T. Orkis, Professor, Department of Keyboard Studies, Boyer College of Music and Dance; M.M., Temple University.

Elizabeth C. Parker, Associate Professor, Department of Music Education and Music Therapy, Boyer College of Music and Dance; Ph.D., University of Nebraska-Lincoln.

Paul Rardin, Associate Professor, Department of Vocal Arts, Boyer College of Music and Dance; D.M.A., University of Michigan.

Alison M. Reynolds, Associate Professor, Department of Music Education and Music Therapy, Boyer College of Music and Dance; Ph.D., Temple University.

Eduard Schmieder, Professor, Department of Instrumental Studies, Boyer College of Music and Dance.
Choral Conducting, M.M.

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE (http://www.temple.edu/boyer)

About the Program

The Department of Vocal Arts offers a program of study leading to the Master of Music in Choral Conducting. Graduate majors in the department have the opportunity to conduct a number of resident ensembles, as well as present their own recitals with the Graduate Conductors Chorus.

Time Limit for Degree Completion: 6 years

Campus Location: Main

Full-Time/Part-Time Status: The degree program can be completed on a full- or part-time basis.

Interdisciplinary Study: With the approval of the major advisor, students may elect to take up to 6 graduate credits outside the field of music.

Accreditation: This degree program is accredited by the National Association of Schools of Music (NASM).

Areas of Specialization: The degree is intended to prepare students for successful careers in choral music by providing the highest level of training in the many skills required for the choral conductor, including technical, theoretical, analytical, historical, linguistic, keyboard, and vocal skills. The department prepares students to become teachers and conductors striving toward the highest possible artistic excellence.

Job Prospects: The program prepares musicians for either professional activity or doctoral study.

Non-Matriculated Student Policy: Non-matriculated students may enroll in selected courses in music with permission of the department chair and the Associate Dean.

Financing Opportunities: Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance, and/or direct service related to academic programs. Applicants must submit an assistantship/internship application by March 1 to obtain priority consideration for an award. Applications are available online at the Graduate Financial Aid (http://www.temple.edu/boyer/admissions/documents/gradassistantshipform.pdf) page of Boyer's website. Typically these awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

Admission Requirements and Deadlines

Application Deadline:

Fall: December 1

Applications are processed as they arrive up to the deadline date.

APPLY ONLINE to this graduate program.

Letters of Reference:

Number Required: 2

From Whom: Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents, and aptitude for graduate study.

Coursework Required for Admission Consideration: All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours.

Bachelor's Degree in Discipline/Related Discipline: A degree in music is expected.

Statement of Goals: Include your special interests within the discipline and expectations for the program.

Standardized Test Scores:

TOEFL: 79 iBT or 550 PBT minimum

Resume: Current resume required.

Transfer Credit: A student who wishes to transfer credit should speak with her/his academic advisor and obtain a "Request for Transfer of Graduate Credit" form, found in TUportal under the Tools tab within "University Forms." Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

Other: Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants,
specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This policy may preclude the admission of any student who meets the minimum requirements.

Total Credit Hours: 32

1. Select from Music, Music Education, Music Studies, or other graduate departments. Advisor approval required.

Additional Requirements:
Diagnostic Examinations:
All entering Master of Music students are required to take Diagnostic Examinations in Harmony, Counterpoint, Aural Skills, and Music History prior to the first term of graduate study. The purpose of these examinations is to ascertain adequate preparation for graduate study in these areas. Examinations in Harmony, Counterpoint, and Aural Skills may be taken once. The examination in Music History may be taken a second time.

Students who are unable to take the examinations at the designated time may do so using the online proctoring service, Examity® (https://examiy.com). Students are responsible for all fees.

Students who opt not to take any or all exams prior to the first semester of study are required to complete remedial coursework within the first academic year.

Depending on the examination results, students may be required to take one or more remedial courses. Remedial courses are graded on a "Credit / No Credit" basis, and the official university transcript will indicate "CR" (for "Credit," meaning that the deficiency has been satisfied) or "NC" (for "No Credit," meaning that the deficiency has not been satisfied). Students must have a "B-" or better average in any remedial course or section to earn the grade of "Credit" and to satisfy the requirement. Students who earn a grade of "NC" (that is, having a class average below "B-"") must retake that course or section until an average of "B-" or higher is achieved and a grade of "CR" is recorded on the official university transcript. Remedial courses do not count toward graduate degree requirements.

It is highly recommended that students complete all remediation coursework during their first academic year of study. An exception may be granted for part-time students. Master of Music students may neither schedule graduation recitals nor take final comprehensive master's examinations until all of the diagnostic examinations and any required remediation have been successfully completed.

A. Diagnostic Examinations in Music Theory, including Harmony, Counterpoint, and Aural Skills

Students may take each portion of the theory test only once. Any section not graded as passing necessitates enrollment in a remedial course(s) during the first term of study. Examiners stipulate which section(s) of remedial coursework are required. Theory remedial courses include:

<table>
<thead>
<tr>

<td>3</td>
</tr>
</tbody>
</table>

B. Diagnostic Examination in Music History

Students may take each of the five sections of the history test twice. After the second attempt, any section not graded as passing necessitates enrollment in a remedial course(s). Examiners stipulate which section(s) of remedial coursework are required.

The History remedial course is MUST 5005 Remedial Studies in Music History. Each of five sections are enrolled in for one credit and are subtitled according to the period covered in the coursework: Baroque, Classic, Medieval/Renaissance, Romantic, and Twentieth Century. Remediation can be extended over two terms.

C. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

• matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
• received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

Proficiencies in Voice, Piano, and Musicianship:
Proficiencies are evaluated by the department in the first term of graduate study.

Professional Development Policy:
In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give
impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

Performing Ensembles:

1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of academic terms. Students must arrange their schedules to accommodate this requirement.

2. Participation: Master's degree candidates in wind, brass, and percussion instruments must be available for ensemble assignments at the discretion of the department chair, including participation beyond curricular requirements.

3. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair, and the Associate Dean.

Independent Study Courses:
Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval is granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects is granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

Acceptable English:
All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

Graduate Private Lesson Policy:
Graduate students in non-performing curricula may take up to six credits of applied study toward the degree with the permission of the major advisor. Such non-required lessons may be taken only if the student can pass the normal graduate-level performing audition expected of performance majors. In this event, a fee of $200, not covered by tuition remission, is charged.

Alternately, a graduate student, regardless of major, with a demonstrable performing proficiency that may not meet the more rigorous requirements of a graduate-level performing audition, may, by audition, qualify to take two credits of applied study per term for graduate credit. These courses carry a fee of $400 plus tuition and may be applied to the non-performing curriculum for degree credit up to six credits with the approval of the major advisor. Tuition remission may not be used to cover the private lesson fee.

Incompletes:
All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

Culminating Events:
Comprehensive Examination:
All candidates for the Master of Music degree are required to take a comprehensive examination in the major area which is designed and given by the department in the final term of coursework. With this final comprehensive spoken examination, each student spends one hour with the entire choral faculty answering questions that are mostly from the major field but also often include other areas of music, art, history, theory, etc. Often, but not always, examples are played at the piano for historic placement and identification. The students prepare for the exam mostly through a thorough review of eight notebooks, four each from Choral Literature and Choral Conducting Seminar. The exam is scheduled by the department and graded by all of the department's graduate faculty.

Public Recitals:
Choral Conductors present two recitals in the second year of study, utilizing the Recital Chorus and the Graduate Conductors Chorus. One public recital is required in the Fall term (MUSC 8353) and one in the Spring term (MUSC 8354).

Graduation recitals are typically one hour in length, presented on-campus in either Rock Hall or Klein Recital Hall, and adjudicated by three full-time music faculty members. The student must show evidence through Temple University transcript records of having taken private lessons up to the time of the graduation recital.

Collaborative Piano and Chamber Music, M.M.

About the Program

The master's degree in Collaborative Piano and Chamber Music is designed to prepare pianists to play in small ensembles and to accompany soloists.

Time Limit for Degree Completion: 6 years

Job Prospects: The program prepares musicians for either professional activity or doctoral study.

Non-Matriculated Student Policy: Non-matriculated students may enroll in selected courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

Financing Opportunities: Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance, and/or direct service related to academic programs. Applicants must submit an assistantship/internship application by March 1 to obtain priority consideration for an award. Applications are available online at the Graduate Financial Aid (http://www.temple.edu/boyer/admissions/documents/gradassistantshipform.pdf) page of Boyer's website. Typically these awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

Admission Requirements and Deadlines

Application Deadline:

Fall: March 1
Spring: November 1

Applications are processed as they arrive. Late applications may be considered for admission.

APPLY ONLINE to this graduate program.

Letters of Reference:

Number Required: 2

From Whom: Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents, and aptitude for graduate study.

Coursework Required for Admission Consideration: All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours.

Bachelor's Degree in Discipline/Related Discipline: A degree in Music is expected.

Statement of Goals: Include your special interests within the discipline and expectations for the program.

Standardized Test Scores:

TOEFL: 75 iBT or 537 PBT minimum

Audition: See www.temple.edu/boyer for audition repertoire requirements.

Resume: Current resume required.

Transfer Credit: A student who wishes to transfer credit should speak with her/his academic advisor and complete a "Request for Transfer of Graduate Credit" form, found in TPortal under the Tools tab within "University Forms." Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

Other: Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This Policy may preclude the admission of any student who meets the minimum requirements.

B. Diagnostic Examination in Music History

Students may take each of the five sections of the history test twice. After the second attempt, any section not graded as passing necessitates enrollment in a remedial course(s). Examiners stipulate which section(s) of remedial coursework are required.

The History remedial course is MUST 5005 Remedial Studies in Music History. Each of five sections are enrolled in for one credit and are subtitled according to the period covered in the coursework: Baroque, Classic, Medieval/Renaissance, Romantic, and Twentieth Century. Remediation can be extended over two terms.

C. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
- received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

Professional Development Policy:
In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

Performing Ensembles:
1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of academic terms. Students must arrange their schedules to accommodate this requirement.

2. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair, and the Associate Dean.

**Independent Study Courses:**
Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students’ major advisor, and the Associate Dean. Approval will be granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects will be granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student’s curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

**Acceptable English:**
All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College’s statement on plagiarism and academic honesty.

**Graduate Private Lesson Policy:**
Weekly one-hour private lessons are provided for all matriculated master’s and doctoral performance majors in good standing, provided at least three additional credits of programatically required graduate-level study are taken simultaneously. A $250 per semester lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

Private applied lessons beyond the four-semester requirement currently in effect for graduate performance students may be extended with the permission of the jury, department chair, and the Associate Dean or Dean of the Boyer College of Music and Dance.

**Recital Extension:**
Students withdrawing from the recital requirement during the recital semester will receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each semester until the recital has been presented. This course will be offered on a “Credit/No Credit” basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course will be replaced by a letter grade and MUSC 5000 Recital Extension will be issued a grade of “CR.” Credit derived from Recital Extension will not be counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study will be the cost of 2 graduate credits plus a $400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.
2. Exceptions to Recital Extension:
   a. Students who perform their recitals during the first three weeks of the Spring semester are not required to register for Recital Extension that semester.
   b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall semester. However, if the student does not take Recital Extension during the Summer, s/he may not present the recital in the Fall semester, regardless of the date, without also registering for the Fall semester of Recital Extension.

3. Failure to Present Recital: The degree status of students who are unable to present a recital after one semester of Recital Extension will be reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, will determine whether or not the student may continue in the program. Inability to present the recital after one semester of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

**Incompletes:**
All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

**Culminating Events:**

**Comprehensive Final Project:**
All candidates for the Master of Music degree must submit a list of all repertoire studied with their studio teacher(s) while enrolled in the M.M. program. Students choose two stylistically contrasting pieces from their final recital program. (Students enrolled in programs without a recital requirement, such as Opera Coaching, choose two contrasting works studied with their assigned studio teacher.) Students choose to give either an oral presentation or submit a written document that addresses at least several of the following topics:

- Form and harmonic language of the piece
- Relationship to other keyboard works by the composer
- Aspects of the composer’s style
- Historical background of the work
- Performance practice considerations
- Specific technical problems and their solutions
- Other relevant information about the piece

The goal of the presentation or paper is to demonstrate cumulative knowledge and skills gained during the course of study at the master’s level. Courses taken in research, theory, history, pedagogy, and performance practice can inform the discussion of the particular works chosen by the student.

If the student selects the oral option, the presentation is scheduled during end-of-semester juries. At least two representatives from the graduate faculty in the Department of Keyboard Instruction adjudicate the oral presentation. The session should last approximately 20 minutes with some extra time for questions from the faculty members following the presentation. Students can perform small sections of the work if germane to their discussion. Lecture notes with cited sources for information should be submitted to the Department of Keyboard Instruction no later than ten days before juries.

The written document, if chosen, should be a research-quality paper of approximately 10 pages, double-spaced, and include appropriate references. This should be submitted to the Department of Keyboard Instruction no later than April 1 for a May graduation or November 15 for a January graduation. At least two graduate faculty members from the
Department of Keyboard Instruction read the paper and confer about the final decision. Students must follow the guidelines for academic honesty found in the Graduate Bulletin.

Each reader grades the project as either “pass” or “fail.” If the student fails, s/he is not allowed to graduate at the end of that semester. Another document may be submitted after suggestions for improvement by the Department of Keyboard Instruction faculty, or another oral presentation is arranged and graded as before. If the student fails a second time, s/he is dismissed from the degree program.

**Recital Accompaniment:**

Piano Accompanying/Chamber Music curriculum candidates must accompany one student recital in the first semester of study and must accompany two full senior or master's recitals in each of the following three semesters. In addition, performance of a full chamber music work is required each of the four semesters. Graduation recitals are typically one hour in length; presented on-campus in either Rock Hall or Klein Recital Hall; and adjudicated by three full-time music faculty members.

**Collaborative Piano and Opera Coaching, M.M.**

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE (http://www.temple.edu/boyer)

**About the Program**

The master's degree in Collaborative Piano and Opera Coaching is designed for pianists who wish to make accompanying and opera coaching the focus of their professional lives. Students learn about the many skills required of opera singers, including diction, foreign languages, vocal technique, stage movement, and acting. Additionally, students learn to negotiate the often unpianistic piano reductions that are part of this scene. Finally, students learn how to conduct rehearsals in a professional setting, and become aware of the special problems encountered by singers.

**Time Limit for Degree Completion:** 6 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Accreditation:** This degree program is accredited by the National Association of Schools of Music (NASM).

**Areas of Specialization:** Study focuses on performance of the major instrument and academic support areas in music.

**Job Prospects:** The program prepares musicians for either professional activity or doctoral study.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in selected courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

**Financing Opportunities:** Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance, and/or direct service related to academic programs. Applicants must submit an assistantship/internship application by March 1 to obtain priority consideration for an award. Applications are available online at the Graduate Financial Aid (http://www.temple.edu/boyer/admissions/documents/gradassistantshipform.pdf) page of Boyer's website. Typically these awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

**Admission Requirements and Deadlines**

Transfer Credit: A student who wishes to transfer credit should speak with her/his academic advisor and complete a "Request for Transfer of Graduate Credit" form, found in TUportal under the Tools tab within "University Forms." Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

Other: Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions requirements, Boyer College admission applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions.

To enter the programs, students must meet the following requirements:

- Meet the College's minimum academic standards: a minimum GPA of 3.0 (on a 4.0 scale) in all college courses, and a minimum GPA of 3.0 (on a 4.0 scale) in the major area of study.
- Submit a completed application, including required test scores, transcripts, and other supporting materials.
- Provide evidence of musical achievement, including audition results and/or performance evaluations.
- Submit a statement of purpose outlining your goals and aspirations in music education.
- Maintain a minimum GPA of 3.0 (on a 4.0 scale) in all coursework.

Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions requirements, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions. Depending on the examination results, students may be required to take one or more remedial courses. Remedial courses are graded on a "Credit / No Credit" basis, and the official university transcript will indicate "CR" (for "Credit," meaning that the deficiency has been satisfied) or "NC" (for "No Credit," meaning that the deficiency has not been satisfied). Students who earn a grade of "NC" (that is, having a class average below "B-" or section to earn the grade of "Credit" and to satisfy the requirement. Students who earn a grade of "NC" may be taken once. The examination in Music Theory may be taken a second time. Students who are unable to take the examinations at the designated time may do so using the online proctoring service, Examity® (https://examity.com). Students are responsible for all fees.

Students who opt not to take any or all exams prior to the first semester of study are required to complete remedial coursework within the first academic year.

Depending on the examination results, students may be required to take one or more remedial courses. Remedial courses are graded on a "Credit / No Credit" basis, and the official university transcript will indicate "CR" (for "Credit," meaning that the deficiency has been satisfied) or "NC" (for "No Credit," meaning that the deficiency has not been satisfied). Students must have a "B-" or better average in any remedial course or section to earn the grade of "Credit" and to satisfy the requirement. Students who earn a grade of "NC" (that is, having a class average below "B-" or higher is achieved and a grade of "CR" is recorded on the official university transcript. Remedial courses do not count toward graduate degree requirements.

It is highly recommended that students complete all remediation coursework during their first academic year of study. An exception may be granted for part-time students. Master of Music students may neither schedule graduation recitals nor take final comprehensive master's examinations until all of the diagnostic examinations and any required remediation have been successfully completed.

A. Diagnostic Examinations in Music Theory, including Harmony, Counterpoint, and Aural Skills

Students may take each portion of the theory test only once. Any section not graded as passing necessitates enrollment in a remedial course(s) during the first term of study. Examiners stipulate which section(s) of remedial coursework are required. Theory remedial courses include:

### Additional Requirements:

#### Diagnostic Examinations:

All entering Master of Music students are required to take Diagnostic Examinations in Harmony, Counterpoint, Aural Skills, and Music History prior to the first term of graduate study. The purpose of these examinations is to ascertain adequate preparation for graduate study in these areas. Examinations in Harmony, Counterpoint, and Aural Skills may be taken once. The examination in Music History may be taken a second time.

Students who are unable to take the examinations at the designated time may do so using the online proctoring service, Examity® (https://examity.com). Students are responsible for all fees.

Students who opt not to take any or all exams prior to the first semester of study are required to complete remedial coursework within the first academic year.

Depending on the examination results, students may be required to take one or more remedial courses. Remedial courses are graded on a "Credit / No Credit" basis, and the official university transcript will indicate "CR" (for "Credit," meaning that the deficiency has been satisfied) or "NC" (for "No Credit," meaning that the deficiency has not been satisfied). Students must have a "B-" or better average in any remedial course or section to earn the grade of "Credit" and to satisfy the requirement. Students who earn a grade of "NC" (that is, having a class average below "B-" or higher is achieved and a grade of "CR" is recorded on the official university transcript. Remedial courses do not count toward graduate degree requirements.

It is highly recommended that students complete all remediation coursework during their first academic year of study. An exception may be granted for part-time students. Master of Music students may neither schedule graduation recitals nor take final comprehensive master's examinations until all of the diagnostic examinations and any required remediation have been successfully completed.

<td>MUST 5001</td>
<td>Diatonic Harm. Review</td>
<td>1</td>
</tr>
<tr>
<td>MUST 5002</td>
<td>Chromatic Harm. Review</td>
<td>1</td>
</tr>
</tbody>
</table>
B. Diagnostic Examination in Music History

Students may take each of the five sections of the history test twice. After the second attempt, any section not graded as passing necessitates enrollment in a remedial course(s). Examiners stipulate which section(s) of remedial coursework are required.

The History remedial course is MUST 5005 Remedial Studies in Music History. Each of five sections are enrolled in for one credit and are subtitled according to the period covered in the coursework: Baroque, Classic, Medieval/Renaissance, Romantic, and Twentieth Century. Remediation can be extended over two terms.

C. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
- received grades of "B+" or better in every undergraduate course taken in each individual examination area to be waived.

Professional Development Policy:

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

Performing Ensembles:

1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.

2. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair, and the Associate Dean.

Independent Study Courses:

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval will be granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects will be granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

Acceptable English:

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

Graduate Private Lesson Policy:

Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A $250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

Private applied lessons beyond the four-term requirement currently in effect for graduate performance students may be extended with the permission of the jury, department chair, and the Associate Dean or Dean of the Boyer College of Music and Dance.

Recital Extension:

Students withdrawing from the recital requirement during the recital term will receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course will be offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course will be replaced by a letter grade and MUSC 5000 Recital Extension will be issued a grade of "CR." Credit derived from Recital Extension will not be counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study will be the cost of 2 graduate credits plus a $400 Recital Extension fee. Graduate assistantships and other forms of University sponsored financial aid do not cover the Recital Extension fee.

2. Exceptions to Recital Extension:
   a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
   b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, if the student does not take Recital Extension during the Summer, s/he may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.

3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension will be reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, will determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

Incompletes:

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

Culminating Events:
Comprehensive Final Project:

All candidates for the Master of Music degree must submit a list of all repertoire studied with their studio teacher(s) while enrolled in the M.M. program. Students choose two stylistically contrasting pieces from their final recital program. (Students enrolled in programs without a recital requirement, such as Opera Coaching, choose two contrasting works studied with their assigned studio teacher.) Students choose to give either an oral presentation or submit a written document that addresses at least several of the following topics:

- Form and harmonic language of the piece
- Historical background of the work
- Aspects of the composer’s style
- Relationship to other keyboard works by the composer
- Performance practice considerations
- Specific technical problems and their solutions
- Other relevant information about the piece

The goal of the presentation or paper is to demonstrate cumulative knowledge and skills gained during the course of study at the master’s level. Courses taken in research, theory, history, pedagogy, and performance practice can inform the discussion of the particular works chosen by the student.

If the student selects the oral option, the presentation is scheduled during end-of-term juries. At least two representatives from the graduate faculty in the Department of Keyboard Instruction adjudicate the oral presentation. The session should last approximately 20 minutes with some extra time for questions from the faculty members following the presentation. Students can perform small sections of the work if germane to their discussion. Lecture notes with cited sources for information should be submitted to the Department of Keyboard Instruction no later than ten days before juries.

The written document, if chosen, should be a research-quality paper of approximately 10 pages, double-spaced, and include appropriate references. This should be submitted to the Department of Keyboard Instruction no later than April 1 for a May graduation or November 15 for a January graduation. At least two graduate faculty members from the Department of Keyboard Instruction read the paper and confer about the final decision. Students must follow the guidelines for academic honesty found in the Graduate Bulletin.

Each reader grades the project as either “pass” or “fail.” If the student fails, s/he is not allowed to graduate at the end of that term. Another document may be submitted after suggestions for improvement by the Department of Keyboard Instruction faculty, or another oral presentation is arranged and graded as before. If the student fails a second time, s/he is dismissed from the degree program.

Recital Accompaniment:

Students must accompany one vocal recital in the first term and at least two in succeeding terms for a total of six required recital accompaniments. Students must also have participated in preparing singers for opera productions and, in some cases, conducted opera rehearsals. Graduation recitals are typically one hour in length; presented on-campus in either Rock Hall or Klein Recital Hall; and adjudicated by three full-time music faculty members.

Dance, M.A.

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE (http://www.temple.edu/boyer)

About the Program

The Dance Department offers programs of study leading to the Master of Arts, Master of Fine Arts, and Doctor of Philosophy degrees. All students are expected to develop a command of the discipline of dance, as a performing art and as both subject and medium of inquiry. The department’s mission places high value on the role of dance in a pluralistic, multicultural society.

The M.A. in Dance is a research-centered degree that allows students to follow and integrate strands in cultural, creative and educational studies of dance. Through coursework blending experiential and theoretical inquiry and an in-depth thesis project, the program prepares students for doctoral education in dance and professional development in research, writing, creative process, and pedagogy.

Time Limit for Degree Completion: 4 years

Campus Location: Main. All department courses are offered on Main Campus, but students may take out-of-department credits on another campus.
Full-Time/Part-Time Status: Students complete the degree program through classes offered before 4:30 p.m. The degree program can be completed on a full- or part-time basis.

Interdisciplinary Study: The program encourages interdisciplinary coursework, research, and interactions among faculty and students with interests in African American Studies, Anthropology, Education, History, Jewish Studies, Media Arts, Music, Philosophy, Sociology, Theater Arts, Women's Studies, and the like.

Accreditation: The M.A. in Dance is pending plan approval by the National Association of Schools of Dance (NASD).

Areas of Specialization: The M.A. in Dance is a research-centered degree that allows students to follow and integrate strands in cultural, creative, and educational studies of dance. Through coursework blending experiential and theoretical inquiry and an in-depth thesis project, the program prepares students for doctoral education in dance. It also provides master's level professional development in research, writing, the creative process, and pedagogy.

Job Prospects: Graduates perform and choreograph with companies throughout the world, teach at all levels of education, serve as arts administrators and policymakers for the arts, and publish extensively.

Non-Matriculated Student Policy: Non-matriculated students are able to take technique classes and some core coursework with permission of the instructor and the department chair. If accepted into the program, those courses (up to a maximum of 9 credits) may be applied toward the degree program.

Financing Opportunities: Teaching Assistantships (TAs), Research Assistantships (RAs), and Academic Internships (AIs) are available. Teaching responsibilities usually include teaching university general education courses. On occasion, TAs are assigned to teach B.F.A. Dance courses for which they are qualified. This award includes a monthly stipend, book allowance, and tuition remission. Assistantships are generally awarded for a minimum of one year. The TA/RA/AI application is part of the supplemental dance application for admission. Continuing students who have not held an assistantship also submit a written application in the term prior to commencement of the award.

Admission Requirements and Deadlines

Application Deadline:

Summer II: January 11

All department and university application materials must be received by the Dance Department. After acceptance at the department level, final review of all application materials is made by the Boyer College of Music and Dance.

A required supplemental application can be obtained at www.temple.edu/boyer/admissions/graduate-admissions/.

APPLY ONLINE to this graduate program.

Letters of Reference:
Number Required: 2

From Whom: Letters of recommendation should be obtained from qualified representatives of academic or professional communities in dance.

Coursework Required for Admission Consideration: Applicants should have an undergraduate GPA of 3.0, and an undergraduate degree in Dance or equivalent professional experience. Depending on the individual's professional goals, certain prerequisite courses may be assigned to fill in any gaps in preparation.

Bachelor's Degree in Discipline/Related Discipline: A baccalaureate degree is required.

Statement of Goals: In 3 to 5 typed pages, address how your experience and education have prepared you for advanced study in dance and how the degree will support your professional goals.

Standardized Test Scores:
TOEFL: 79 iBT or 550 PBT minimum

Resume: A current resume detailing experience in dance, art, education, scholarship, and/or public leadership is required.

Writing Sample: A recent scholarly or academic research paper must be submitted as a writing sample.

Transfer Credit: Graduate credits from an accredited institution may be transferred into the M.A. in Dance program. Transfer credits must be approved by the Graduate Coordinator, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

Total Credit Hours: 30

1 Although no credit is earned, attendance is mandatory at the Graduate Tutorial held every Tuesday evening.

Culminating Events:
Master's Thesis:
The M.A. thesis is a substantial research project developed over three terms, culminating in a written thesis of 20,000 words. During Spring term of the first year of full-time study, students carry out bibliographic research, develop an annotated bibliography, and create a thesis proposal in a mentored seminar setting. A thesis advisor, with whom the student works until the completion of the project, is then determined.
Prior to graduation, students make a formal presentation of their thesis research for dance faculty, students, and invited guests. Detailed guidelines for the M.A. thesis process and evaluation are found in the Graduate Handbook.

Dance, M.F.A.

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE (http://www.temple.edu/boyer)

About the Program

The Dance Department offers programs of study leading to the Master of Arts, Master of Fine Arts, and Doctor of Philosophy degrees. All students are expected to develop a command of the discipline of dance, as a performing art and as both subject and medium of inquiry. The department’s mission places high value on the role of dance in a pluralistic, multicultural society.

The M.F.A. in Dance develops choreographers and dance artists who are in command of their idiom as a basis for meaningful aesthetic investigation, embodied research, and critical inquiry. The program fosters skilled dance making; sensitivity to personal artistic qualities and sources; openness to interdisciplinary perspectives; and awareness of the social, political, and historical implications of dance. The M.F.A. seeks to align itself with the evolving aesthetics and pedagogies of professional dance practice, to introduce students to contemporary developments in the field of dance scholarship, and to prepare students to enter the competitive job market.

The emphasis of the M.F.A. in Dance is on providing resources that allow each student to take responsibility for their artistic development and vision. As choreographers, students immerse themselves in studying the craft and persuasion of their art form, study the historical and cultural dimensions of dance, experience a spectrum of valid approaches to issues of communication, and continuously challenge their own artistic viewpoints and directions. As performers, students are expected to engage themselves fully and with personal integrity in the creation, interpretation, and presentation of dance works; develop technically and artistically in order to fulfill the varying demands of dance as a performing art; and participate fully in the choreographic process. The M.F.A. in Dance also supports the vision of those students who aspire to work in higher education and other education and community contexts as artist-educators.

Time Limit for Degree Completion: 4 years

Campus Location: Main. All department courses are offered on Main Campus, but students may take out-of-department credits on another campus.

Full-Time/Part-Time Status: Students complete the degree program through classes offered before 4:30 p.m.

Interdisciplinary Study: The program encourages interdisciplinary coursework, research, and interactions among faculty and students with interests in African American Studies, Anthropology, Education, History, Jewish Studies, Media Arts, Music, Philosophy, Sociology, Theater Arts, Women's Studies, and the like.

Accreditation: The M.F.A. in Dance is fully accredited by the National Association of Schools of Dance (NASD).

Areas of Specialization: The M.F.A. faculty includes internationally known artists and scholars whose work represents a variety of contemporary approaches to choreography, performance, and theoretical inquiry in dance. The emphasis of the program is choreographic research. In addition, students have requirements in performance, production, dance education, and dance scholarship. An important objective of the M.F.A. program is that each student develop a personal aesthetic that manifests an understanding of her/his place in the world.

Job Prospects: Since the focus of the M.F.A. in Dance is choreography, most graduates continue as independent or affiliated choreographers after graduation. In addition, many teach in higher education or perform professionally.

Non-Matriculated Student Policy: Non-matriculated students are able to take technique classes and some core coursework with the permission of the instructor and the department chair. If accepted into the program, those courses (up to a maximum of 9 credits) may be applied toward the degree program.

Financing Opportunities: Teaching Assistantships (TAs), Research Assistantships (RAs), and Academic Internships (AIs) are available. Teaching responsibilities usually include teaching university general education courses. On occasion, TAs are assigned to teach B.F.A. Dance repertory, technique, or theory courses for which they are qualified. This award includes a monthly stipend, book allowance, and tuition remission. Assistantships are generally awarded for a maximum of two years. The TA/RA/AI application is part of the supplemental
dance application for admission. Continuing students who have not held an assistantship also submit a written application in the term prior to commencement of the award.

All M.F.A. applicants are considered for departmental nomination for a University fellowship. This university-wide scheme is highly competitive, and recipients are selected by the Graduate School.

Admission Requirements and Deadlines

Application Deadline:

Fall: January 11

All department and university application materials must be received by the Dance Department. After acceptance at the department level, final review of application materials is made by the Boyer College of Music and Dance.

A required supplemental application is obtained at www.temple.edu/boyer/admissions/graduate-admissions/.

APPLY ONLINE to this graduate program.

Letters of Reference:
Number Required: 2

From Whom: Letters of recommendation should be obtained from qualified representatives of academic or professional communities in dance.

Coursework Required for Admission Consideration: Applicants should have an undergraduate GPA of 3.0 and an undergraduate degree in Dance or equivalent professional experience. Depending on the applicant's professional goals, certain prerequisite courses may be assigned to fill in any gaps in preparation.

Bachelor's Degree in Discipline/Related Discipline: A baccalaureate degree is required.

Statement of Goals: In 1 to 2 pages, detail your focus and artistic vision in dance. The M.F.A. faculty reviews this document in relation to the audition, choreographic showing, and resume to determine your fit with the M.F.A. program and what the faculty can offer. Curiosity and openness are sought.

Standardized Test Scores:
TOEFL: 79 iBT or 550 PBT minimum

Resume: A resume detailing experience in dance, art, education, scholarship, and/or public leadership is required.

Transfer Credit: Graduate credits from an accredited institution may be transferred into the M.F.A. in Dance program. Transfer credits must be approved by the Graduate Coordinator, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 12.

Culminating Events:

Comprehensive Examination:
The comprehensive examination is designed to evaluate the student's general knowledge in four major areas that are not covered by required courses: dance history, dance in a cultural context, dance education, and dance science. An acceptable level would be equivalent to that acquired from taking a single course in each area covered by the exam.

The comprehensive examination consists of two parts. The short answer section gives students the opportunity to demonstrate knowledge in diverse areas and is taken under supervision, without access to reference materials. The essay section allows students to use any appropriate references and resources. These questions require critical thinking, analysis, and specificity. The essay section is completed over a period of days, and students may use any appropriate references as resources.

The comprehensive examination is taken before the first term of study and must be successfully completed before Master's Concert approval. Graduate Faculty appropriate to the M.F.A. degree write the questions. Evaluation of the examination is followed by advising, where needed, as to specific deficient areas and recommendations are made for courses within the graduate dance curriculum that address areas of concern.

The Master's Thesis Concert:
The Master's Concert is a seven-credit exercise developed over three terms, and culminating in a publicly produced presentation of choreographic work. The Master's Concert generally consists of one
major choreographic work designed to demonstrate the candidate’s highest achievement of artistry, craft, and thinking.

During the Spring term of the second year of full-time study, students identify a thesis advisor, conduct preliminary research, and prepare the thesis concert proposal. The proposal articulates the artistic and intellectual focus of the project, setting out the questions and challenges of the work that will be developed further in the final paper. After the culminating performance, the student submits a written thesis of 8,000 words that documents the choreographic research process and final product, but more crucially also explores the interaction of theory and practice that informs the work, presenting in-depth reflection on strengths, challenges, meanings, and projections for future work.

**Dance, Ph.D.**

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE (http://www.temple.edu/boyer)

**About the Program**

The Dance Department offers programs of study leading to the Master of Arts, Master of Fine Arts, and Doctor of Philosophy degrees. All students are expected to develop a command of the discipline of dance, as a performing art and as both subject and medium of inquiry. The department’s mission places high value on the role of dance in a pluralistic, multicultural society.

**Time Limit for Degree Completion:** 7 years

**Campus Location:** Main. All department courses are offered on Main Campus, but students may take out-of-department credits on another campus.

**Full-Time/Part-Time Status:** Students complete the degree program through classes offered before and after 4:30 p.m.

**Interdisciplinary Study:** The program encourages interdisciplinary coursework, research, and interactions among faculty and students with interests in African American Studies, Anthropology, Education, History, Jewish Studies, Media Arts, Music, Philosophy, Sociology, Theater Arts, Women’s Studies, and the like.

**Accreditation:** The Ph.D. in Dance is fully accredited by the National Association of Schools of Dance (NASD).

**Areas of Specialization:** Individual doctoral faculty members conduct research studies on African and African American aesthetics; dance as a phenomenon in its own right; dance reconstruction; dance teaching and learning across the life span; feminism and dance; performance theory and practice; philosophical, historical, and cultural perspectives of the body and dance, including issues of gender, race, and class; and more. Research expertise of doctoral faculty is in aesthetic, artistic, educational, ethnographic, historical, phenomenological, and sociological modes of inquiry in dance.

**Job Prospects:** Graduates perform and choreograph with companies throughout the world, teach at all levels of education, serve as arts administrators and policymakers for the arts, and publish extensively.

**Non-Matriculated Student Policy:** Non-matriculated students are able to take technique classes and some core coursework with the permission of the instructor and the department chair. If accepted into the program, those courses (up to a maximum of 9 credits) may be applied toward the degree program.

**Financing Opportunities:** Teaching Assistantships (TAs), Research Assistantships (RAs), and Academic Internships (AIs) are available. Teaching responsibilities usually include teaching university general education courses. On occasion, TAs are assigned to teach B.F.A. Dance repertory, technique, or theory courses for which they are qualified. This award includes a monthly stipend, book allowance, and tuition remission. Assistantships are generally awarded for a maximum of two years. The TA/RA/AI application is part of the supplemental dance application for admission. Continuing students who have not held an assistantship also submit a written application in the term prior to commencement of the award.

All Ph.D. applicants are considered for departmental nomination for a University fellowship. This university-wide scheme is highly competitive, and recipients are selected by the Graduate School.

**Admission Requirements and Deadlines**

**Application Deadline:**

**Fall:** January 11

All department and university application materials must be received by the Dance Department. After acceptance at the department level, final review of all application materials is made by the Boyer College of Music and Dance.
A required supplemental application can be obtained at www.temple.edu/boyer/admissions/doctoral-admissions/index.asp.

APPLY ONLINE to this graduate program.

Letters of Reference:
Number Required: 2

From Whom: Letters of recommendation should be obtained from qualified representatives of academic or professional communities in dance.

Coursework Required for Admission Consideration: Applicants should have an undergraduate GPA of 3.0; a graduate GPA of 3.4 or above; and transcripts that show a foundational knowledge of dance.

Master’s Degree in Discipline/Related Discipline: A master's degree in Dance, Dance Education, or a related field with substantial professional experience in dance, arts administration, teaching dance, or dance research is required.

Bachelor’s Degree in Discipline/Related Discipline: A baccalaureate degree is required, although it need not be in Dance.

Statement of Goals: Address your unique profile as a developing professional in the field of dance, as well as your ability to do original research. Reflect on why the Dance Department, i.e., the research foci of its doctoral faculty, its mission, and its resources, is well matched to the student's career and educational goals.

Standardized Test Scores:
GRE/MAT: Required. Scores should be at the 50th percentile or above, whether the GRE or MAT is taken.

TOEFL: 100 iBT or 600 PBT minimum. Any students admitted with a TOEFL score below the minimum must pass an English skills course during their first term at Temple University.

Graduate Interview Day: All applicants are expected to attend the Dance Department’s graduate interview day or to make other arrangements to complete interview day requirements. Subject to approval of the Graduate Coordinator, international applicants may be considered for admission by completing all graduate interview day requirements via video and Skype. The day includes a studio warm-up taught by a member of the faculty, presentation of research or applied practice, development of an on-site writing sample, and an interview with doctoral faculty.

On-Site Writing Activity: All applicants take part in an on-site writing activity. Results are considered in the admissions process. Remedial coursework may be required.

Resume: A resume that details experience in dance, art, education, scholarship, and/or public leadership is required.

Writing Sample: A recent scholarly or academic research paper must be submitted as a writing sample.

Advanced Standing: Students who enter the Ph.D. program in Dance may be considered for advanced standing, based on relevant coursework. The Dance Doctoral Faculty Committee, with approval of the Associate Dean, awards credits toward advanced standing on a case-by-case basis in the first year of full-time study. The maximum number of advanced standing credits awarded is 33.

### Culminating Events:

#### Qualifying Examination:

Students take a Qualifying Examination at the end of Fall term in Year 2. The examination covers three areas crucial to doctoral research. Questions are devised in consultation with specialist advisors. Details of the Qualifying Examination are published in the Graduate Handbook.

#### Preliminary Exam Projects:

Upon completion of all required coursework for the degree, students complete two Preliminary Exam Projects, which are submitted for review early in Fall term of Year 3. These include:

1. A position paper presented in view of the dissertation, which was drafted in DANC 9883 Dir Study in Dance Research and Writing Seminar in Spring term of Year 2.
2. A course proposal for higher education, which the student began work on in DANC 8867 Educational Inquiry in Dance in Spring term of Year 2.

Through DANC 9994 Preliminary Examination Preparation, the student demonstrates significant achievement of scholarly and professional competencies. The Preliminary Exam Projects must be reviewed and approved by a committee composed of at least three Dance doctoral faculty.

### Dissertation Proposal:

Through DANC 9998 Pre-Dissertation Research, the student prepares a dissertation proposal that evidences a strong body of work thus far and preparedness to complete the Dance Ph.D. program. A primary advisor and Doctoral Advisory Committee are established upon the student’s successful completion of the Preliminary Exam Projects. In consultation with the primary advisor, the student prepares a proposal, including an abstract that is reviewed and approved by Dance doctoral faculty. Once approved for defense, the student makes a formal oral presentation of
the proposal to the Doctoral Advisory Committee. Upon approval of the dissertation proposal, the student is elevated to candidacy in the Ph.D. program. The dissertation proposal is normally defended in Spring term of Year 3. Written guidelines for the dissertation proposal are published in the Graduate Handbook.

**Dissertation:**
The dissertation is a substantial piece of original and independent research making a significant contribution to new knowledge in dance and possibly related fields. Typically, students complete the dissertation and DANC 9999 Doctoral Dissertation in Year 4 or 5, although candidates may submit beyond Year 5 in consultation with their primary advisor. The original Doctoral Advisory Committee may be expanded with additional doctoral faculty from Temple University or other universities, or with doctoral-level experts who work outside a university setting. For purposes of the dissertation defense, the committee must include at least one additional doctoral faculty member who is not from the student’s program; so constituted, it becomes the Dissertation Examining Committee. At least one member of the Dissertation Examining Committee must be an "outside examiner," defined as one who has not read the dissertation in progress.

The primary advisor and student confer with the Dissertation Examining Committee to establish a date for oral defense of the dissertation. A majority of the members of the Dissertation Examining Committee must approve the written dissertation and oral defense; once passed, the student has 30 days to complete final revisions. Detailed guidelines for the dissertation process and examination are published in the Graduate Handbook.

**Instrumental Conducting: Wind-Band Emphasis, M.M.**

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE (http://www.temple.edu/boyer)

**About the Program**
The Instrumental Studies Department offers a program of study leading to the Master of Music in Instrumental Conducting: Wind-Band Emphasis. Students in the program have the opportunity to receive advanced instruction in technique, artistry, and scholarship while preparing for success as a conductor-educator in an academic or professional setting.

**Time Limit for Degree Completion:** 6 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Interdisciplinary Study:** With approval of the major advisor, students may elect to take up to 6 graduate credits outside the field of music.

**Accreditation:** This degree program is accredited by the National Association of Schools of Music (NASM).

**Areas of Specialization:** Students are trained to listen to the many events occurring simultaneously in ensembles; to learn how to conduct rehearsals; to appreciate how text can affect musical performance; to distinguish between the many different kinds of ensemble participation depending on the media; and to develop their pianistic skills in order to meet the demands of advanced chamber and accompanied works.

**Job Prospects:** The program prepares musicians for either professional activity or doctoral study.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in selected courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

**Financing Opportunities:** Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance, and/or direct service related to academic programs. Applicants must submit an assistantship/internship application by March 1 to obtain priority consideration for an award. Applications are available online at the Graduate Financial Aid (http://www.temple.edu/boyer/admissions/documents/gradassistantshipform.pdf) page of Boyer’s website. Typically these awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master’s students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.
Admission Requirements and Deadlines

Application Deadline:

Fall: December 1

Applications are processed as they arrive up to the deadline date.

APPLY ONLINE to this graduate program.

Letters of Reference:

Number Required: 3

From Whom: Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents, and aptitude for graduate study.

Coursework Required for Admission Consideration: All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours.

Bachelor's Degree in Discipline/Related Discipline: A degree in Music is expected.

Statement of Goals: 1,500 word maximum includes your special interests within the discipline and expectations for the program.

Standardized Test Scores:

TOEFL: 79 iBT or 550 PBT minimum

Prescreening Video: For the prescreening video, the applicant's face and torso must face the camera and include 15 to 20 minutes of rehearsal and 5 to 10 minutes of performance. The video is submitted via Acceptd (https://app.getacceptd.com/templeboyer).

Written Analysis: Each applicant must upload to Acceptd (https://app.getacceptd.com/templeboyer) a written score analysis of one of the following selections: Theme and Variations, Op. 43a by Arnold Schoenberg; Lincolnshire Posy by Percy Grainger; or Chester Overture for Band by William Schuman.

Resume: A professional resume is required. Instrumental teaching experience at the secondary level, community ensemble level, collegiate level, semi-professional level, or professionally is highly encouraged and is favorably viewed in the decision process.

Transfer Credit: A student who wishes to transfer credit should speak with her/his academic advisor and obtain a “Request for Transfer of Graduate Credit” form, found in TUportal under the Tools tab within “University Forms.” Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

Other: Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This Policy may preclude the admission of any student who meets the minimum requirements.

Total Credit Hours: 32

1 Select from Music, Music Education, Music Studies, or other graduate departments. Advisor approval required.

Language Examination: Candidates in Instrumental Conducting: Wind-Band Emphasis must demonstrate competency in foreign language dictions at the time of admission to the program. Where the transcript or pass-off examination does not reveal such competency, the appropriate deficiency course in diction skills must be taken prior to completion of the master's degree.

Additional Requirements:

Diagnostic Examinations:
All entering Master of Music students are required to take Diagnostic Examinations in Harmony, Counterpoint, Aural Skills, and Music History prior to the first term of graduate study. The purpose of these examinations is to ascertain adequate preparation for graduate study in these areas. Examinations in Harmony, Counterpoint, and Aural Skills may be taken once. The examination in Music History may be taken a second time.

Students who are unable to take the examinations at the designated time may do so using the online proctoring service, Examity® (https://examity.com). Students are responsible for all fees.

Students who opt not to take any or all exams prior to the first semester of study are required to complete remedial coursework within the first academic year.

Depending on the examination results, students may be required to take one or more remedial courses. Remedial courses are graded on a
“Credit / No Credit” basis, and the official university transcript will indicate
“CR” (for “Credit,” meaning that the deficiency has been satisfied) or
“NC” (for “No Credit,” meaning that the deficiency has not been satisfied).
Students must have a “B-” or better average in any remedial course
or section to earn the grade of “Credit” and to satisfy the requirement.
Students who earn a grade of “NC” (that is, having a class average
below “B-”) must retake that course or section until an average of “B-”
or higher is achieved and a grade of “CR” is recorded on the official
university transcript. Remedial courses do not count toward graduate
degree requirements.

It is highly recommended that students complete all remediation
coursework during their first academic year of study. An exception may
be granted for part-time students. Master of Music students may neither
schedule graduation recitals nor take final comprehensive master’s
examinations until all of the diagnostic examinations and any required
remediation have been successfully completed.

A. Diagnostic Examinations in Music Theory, including Harmony,
Counterpoint, and Aural Skills

Students may take each portion of the theory test only once. Any section
not graded as passing necessitates enrollment in a remedial course(s)
during the first term of study. Examiners stipulate which section(s) of
remedial coursework are required. Theory remedial courses include:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MUST 5001</td>
<td>Diatonic Harm. Review</td>

<td>MUST 5003</td>
<td>Counterpoint Review</td>
<td>1</td>
</tr>
<tr>
<td>MUST 5004</td>
<td>Grad Aural Theory Review</td>
<td>3</td>
</tr>
</tbody>
</table>

B. Diagnostic Examination in Music History

Students may take each of the five sections of the history test twice. After
the second attempt, any section not graded as passing necessitates
enrollment in a remedial course(s). Examiners stipulate which section(s)
of remedial coursework are required.

The History remedial course is MUST 5005 Remedial Studies in Music
History. Each of five sections is enrolled in for one credit and are
subtitled according to the period covered in the coursework: Baroque,
Classic, Medieval/Renaissance, Romantic, and Twentieth Century.
Remediation can be extended over two terms.

C. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived
only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of
  all undergraduate degree requirements; and
- received grades of “B-” or better in every undergraduate course taken
  in each individual examination area to be waived.

Proficiencies in Piano and Musicianship:
The department evaluates proficiencies in piano and musicianship in the
first term of graduate study.

Professional Development Policy:
In addition to taking the required subjects for their degrees, all students in
the Boyer College of Music and Dance are obligated to serve in a number
capacities in order to enrich their academic and musical expertise.

Boyer College of Music and Dance believes that such experiences give
impetus to successful professional careers. Among the duties that may
be required are conducting laboratory classes; tutoring; teaching private
lessons; coaching; participating in the distribution and inventory control of
Temple University-owned musical instruments and instructional materials;
participating in ensembles; accompanying; performing at admissions and
open house events; supervising performance classes; and engaging in
other academic activities.

Performing Ensembles:

1. Touring: All students in touring performing ensembles are required
to participate in all scheduled tours. These tours, usually one or two
weeks in length, often take place immediately after termination of
terms. Students must arrange their schedules to accommodate this
requirement.

2. Non-Credit Participation: With special permission, graduate students
for whom there is no ensemble requirement, or where previous
ensemble credits exceed the graduation requirement, may participate
in choral and instrumental ensembles without cost, with prior
permission from the ensemble director, the department chair, and the
Associate Dean.

Independent Study Courses:

Independent study courses provide a special opportunity for graduate
students to work in a highly individualized setting with one or more faculty
members. All such study must receive the approval of the faculty member
providing the instruction, the students' major advisor, and the Associate
Dean. Approval will be granted only after the student has presented a
detailed description of the intended independent study project. Approval
of independent study projects will be granted only for students whose
academic and musical record provides substantial support for the benefits
of this type of study. In no case may more than 20% of a graduate
student's curriculum be taken as independent study. Private lessons
beyond those required in the curriculum are not an appropriate form of
independent study.

Acceptable English:

All students, including those for whom English is not the native language,
are expected to present all written work in acceptable English. No double
standard exists to differentiate students on the basis of proficiency in the
use of the English language. Students are also responsible for becoming
familiar with the College's statement on plagiarism and academic
honesty.

Graduate Private Lesson Policy:

Graduate students in non-performing curricula may take up to six credits
of applied study toward the degree with the permission of the major
advisor. Such non-required lessons may be taken only if the student
can pass the normal graduate-level performing audition expected of
performance majors. In this event, a fee of $200, not covered by tuition
remission, is charged.

Alternately, a graduate student, regardless of major, with a demonstrable
performing proficiency that may not meet the more rigorous requirements
of a graduate-level performing audition, may, by audition, qualify to take
two credits of applied study per term for graduate credit. These courses
carry a fee of $400 plus tuition and may be applied to the non-performing
curriculum for degree credit up to six term hours with the approval of the
major advisor. Tuition remission may not be used to cover the private
lesson fee.

Incompletes:
All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

Recitals:
Students in Instrumental Conducting: Wind-Band Emphasis present two recitals during the two years of study with members of the Wind Symphony, Symphonic Band, Collegiate Band, and other instrumentalists and/or vocalists:

- One is a public chamber recital with a Keynote© presentation, for which the repertoire is selected, with approval, by the student. At least 50 minutes of music are presented on campus in either Rock Hall or Klein Recital Hall, with adjudication by three full-time music faculty members.

- The second is a comprehensive public large ensemble recital, which comprises small and large performances with the Wind Symphony, Symphonic Band, and Collegiate Band throughout the academic year/concert season. The repertoire is selected by the conductor of the ensemble. Performances are presented in Temple Performing Arts Center and adjudicated by two or three full-time music faculty members.

Students must show evidence through Temple University academic records of having taken private lessons up to the time of the concert performances, both chamber and large ensembles.

Program Notes:
Students in Instrumental Conducting: Wind-Band Emphasis must provide scholarly program notes for compositions performed at public performance recitals, including details about the composer, the historical context, analytical components, and inspiration. These are submitted to the Director of Bands four weeks prior to the performance date for review. The notes must be provided with the program at the public performance.

Keynote© or PowerPoint Presentation for Chamber Recital:
Students in Instrumental Conducting: Wind-Band Emphasis present a 30-minute Keynote© or PowerPoint presentation prior to the public concert. This presentation is presented one hour before the recital or one day prior to the public concert (location arranged by the student). The Keynote© or PowerPoint presentation includes salient and interesting features of the pieces and the program. The Keynote© or PowerPoint presentation is meant to supplement the concert experience for the audience and offer a platform for the student conductor to speak about the music, not to reiterate the printed program notes.

Portfolio:
Prior to taking the Comprehensive Examination, students in the Instrumental Conducting: Wind-Band Emphasis M.M. program must submit a portfolio. The portfolio is to include printed concert programs, recordings (audio and visual), resume, transcript, major projects and assignments completed during degree program, presentations, attendance at conferences and symposia, and any other documentation related to experiences in the program. The portfolio is to be submitted during the final term of study for review by the Director of Bands and Director of Athletic Bands.

Culminating Events:
Comprehensive Examination:
Taken in the final term of study, this three-part exam is:

1. tailored toward the student's coursework while in the program, and
2. standardized to cover a body of knowledge related to history and repertoire in relation to winds.

The Director of Bands mentors students, creates the exam, and administers the writing and listening portions of the exam. A small committee, including the Director of Bands, the Director of Athletic Bands, and one or two Conducting and/or Music Education (instrumental) faculty, is involved in the creation of the oral portion of the exam. The student is asked questions that are mostly from the major field but also include other areas of music, history, theory, and related topics. The department schedules the exam, and the committee grades it pass or fail.

Jazz Studies, M.M.
Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE (http://www.temple.edu/boyer)

About the Program
The master's degree in Jazz Studies consists of advanced training in Jazz Performance and support academic areas vital to the field. Studio and ensemble experiences are combined with rigorous coursework to provide comprehensive training in performance and scholarship. This broad and rigorous program is built on an ideal blend of performance and academic courses taught by an outstanding faculty. Intensive studio training and the proper blend of supportive academic coursework are designed to prompt students to enhance technical expertise while further honing a unique creative/artistic vision.

Time Limit for Degree Completion: 6 years

Full-Time/Part-Time Status: The degree program can be completed on a full- or part-time basis.
Interdisciplinary Study: With approval of the major advisor, students may elect to take up to 5 graduate credits outside the field of music.

Accreditation: This degree program has been submitted for Plan Approval by the National Association of Schools of Music (NASM).

Areas of Specialization: Study focuses on performance of the major instrument in both solo and ensemble settings combined with academic support areas in music.

Job Prospects: The program prepares musicians for either professional activity or doctoral study.

Non-Matriculated Student Policy: Non-matriculated students may enroll in selected courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

Financing Opportunities: Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance, and/or direct service related to academic programs. Applicants must submit an assistantship/internship application by March 1 to obtain priority consideration for an award. Applications are available online at the Graduate Financial Aid (http://www.temple.edu/boyer/admissions/documents/ gradassistantshipform.pdf) page of Boyer's website. Typically these awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

Admission Requirements and Deadlines

Application Deadline:

Fall: March 1
Spring: November 1

Applications are processed as they arrive. Late applications may be considered for admission.

APPLY ONLINE to this graduate program.

Letters of Reference:
Number Required: 2

From Whom: Letters of recommendation should be obtained from evaluators who can provide insight into an applicant's abilities, talents, and aptitude for graduate study.

Coursework Required for Admission Consideration: All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours.

Bachelor's Degree in Discipline/Related Discipline: A degree in Music is expected.

Statement of Goals: Include your special interests within the discipline and expectations for the program.

Standardized Test Scores:

Financial Aid: Bachelor's Degree in Discipline/Related Discipline: curriculum of 124 to 135 hours. Applications are available online at the Graduate Financial Aid page of Boyer's website. Standardized Test Scores:

Statement of Goals: The program prepares musicians for either professional activity or doctoral study.

TOEFL: 71 iBT or 525 PBT minimum

Audition: See www.temple.edu/boyer for audition repertoire requirements.

Resume: Current resume required.

Transfer Credit: A student who wishes to transfer credit should speak with her/his academic advisor and obtain a "Request for Transfer of Graduate Credit" form, found in TPortal under the Tools tab within "University Forms." Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

Other: Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This Policy may preclude the admission of any student who meets the minimum requirements.

</tbody>
</table>

Total Credit Hours 30

1 M.M. candidates must be available for ensemble assignments, which are determined by the department chair and may exceed curricular requirements.

2 Select from Music, Music Education, Music Studies, or other graduate departments. At least 3 credits must be in academic, non-performance coursework. Advisor approval required.

Additional Requirements:

All degree credits are to be earned at Temple University.

Diagnostic Examinations:

All entering Master of Music students in Jazz Studies are required to take Diagnostic Examinations in Jazz Theory and Jazz Styles and Analysis prior to the first term of graduate study. The purpose of these
examinations is to determine weaknesses in undergraduate preparation. Depending on the examination results, students may be required to take one or more remedial courses. In these instances, the remedial courses will be graded on a "Credit / No Credit" basis and the official university transcript will indicate "CR" (for "Credit," meaning that the deficiency has been satisfied) or "NC" (for "No Credit," meaning that the deficiency has not been satisfied). Students must have a "B-" or better average in any remedial course or section thereof to earn the grade of "Credit" and to satisfy the requirement. Students who earn a grade of "NC" (that is, having a class average below "B-") must retake that course or section until an average of "B-" or higher is achieved and a grade of "CR" is recorded on the official university transcript.

Remedial courses are offered for undergraduate credit only, and may not count toward graduate degree requirements. Students may take the test only once, and if they do not pass the test or any portion thereof, they must enroll in the remedial course(s) during their first term of study. Depending on which section(s) of the examination are failed, the examiners will stipulate which sections of remedial coursework the student must take. The courses are:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MUST 5105</td>
<td>Remedial Studies in Jazz History</td>
<td>1-3</td>
</tr>
<tr>
<td>MUST 5106</td>
<td>Remedial Studies in Jazz Theory</td>
<td>1-3</td>
</tr>
</tbody>
</table>

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who

1. matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
2. received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

Professional Development Policy:
In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

Performing Ensembles:
1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.
2. Participation: Master's degree candidates in Jazz Studies must be available for ensemble assignments at the discretion of the department chair, including participation beyond curricular requirements.
3. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair, and the Associate Dean.

Independent Study Courses:
Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval will be granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects will be granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

Acceptable English:
All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

Graduate Private Lesson Policy:
Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A $250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

Private applied lessons beyond the four-term requirement currently in effect for graduate performance students may be extended with the permission of the jury, department chair, and the Associate Dean or Dean of the Boyer College of Music and Dance.

Recital Extension:
Students withdrawing from the recital requirement during the recital term will receive an Incomplete and must register for extended study for at least three additional credits of programmatically required graduate-level study are taken simultaneously. A $250 per term lesson fee (subject to change without notice) is charged for all private lessons. Upon satisfactory completion of the recital, the Incomplete for the recital course will be replaced by a letter grade and MUSC 5000 Recital Extension will be issued a grade of "CR." Credit derived from Recital Extension will not be counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study will be the cost of 2 graduate credits plus a $500 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.
2. Exceptions to Recital Extension:
   a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
   b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, if the student does not take Recital Extension during the Summer, s/he may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.
3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension will be reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, will determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

Incompletes:
All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

Culminating Events:
Comprehensive Final Project:
Embedded in MUST 8184 Jazz Major (Recital), the final project is based on the total studio experience and the final recital, the program of which demonstrates completed research, composition, and arranging.

Public Recital:
Performance majors present a public recital as the culminating event for the master's degree [MUST 8184 Jazz Major (Recital)]. Graduation recitals are typically one hour in length; presented on-campus in either Rock Hall or Klein Recital Hall; and adjudicated by three full-time music faculty members. The student must show evidence through Temple University transcript records of having taken private lessons up to the time of the graduation recital. Students who wish to play a recital in the early Fall should plan to register for and complete the final term of lessons during the preceding Summer months.

A Recital Permission Form indicating the private teacher’s approval for performance of the graduation recital must be signed by the private teacher and submitted six weeks prior to the recital. (If the recital is in the first five weeks of the Spring term, the form must be submitted two weeks before the end of the Fall term.) If required by the private teacher, a Recital Permission Jury must be scheduled at least four weeks prior to the recital. If the form is not submitted or a required jury is not scheduled, the department reserves the right to cancel or postpone the recital.

Music, M.A.
Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE (http://www.temple.edu/boyer)

About the Program
The Master of Arts in Music program is designed for students who wish to prepare for entrance into a doctoral program in music. The program is also intended for performers with academic interests who envision teaching music composition, music theory, or musicology in the classroom. It is a music-generalist degree program, especially for students who are preparing to teach music composition, music history, or music theory as a secondary area in a college or university. The degree does not, however, supplant the M.M. degrees in Music Composition, Music History, or Music Theory, which examine only one area and are intended to prepare students for a more focused research-based Ph.D. program.

Time Limit for Degree Completion: 4 years

Campus Location: Main

Full-Time/Part-Time Status: The degree program can be completed on a full- or part-time basis.

Accreditation: Accreditation is being sought from the National Association of Schools of Music (NASM).

Areas of Specialization: Within the prescribed credits for the M.A. in Music, students can focus their studies on music composition, music theory, or musicology.

Job Prospects: The program prepares students for various careers related to music and for further academic training at the doctoral level.

Non-Matriculated Student Policy: With permission from the Dean's Office, individuals may be granted permission to enter the College as a non-matriculated student, taking up to 9 graduate credits (excluding private lessons) before applying for admission to a program.

Financing Opportunities: Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance, and/or direct service related to academic programs. Applicants must submit an assistantship/internship application by March 1 to obtain priority consideration for an award. Applications are available online at the Graduate Financial Aid (http://www.temple.edu/boyer/admissions/documents/gradassistantshipform.pdf) page of Boyer's website. Typically these awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral...
students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

**Free Electives**

15

**Total Credit Hours**

30

1. Students work with an advisor to select courses that align with their interests in music composition, music theory, musicology, or a cognate area such as performance.

**Language Examination:** To complete the degree, students must fulfill a foreign language requirement in French, German, Italian, Spanish, or another language with approval of the chair. This requirement may be fulfilled in any one of three ways:

1. The student successfully completed four semesters of a foreign language as an undergraduate.
2. The student passes a foreign language examination with the requisite language department.
3. The student takes four terms of a foreign language. Since language credits are at the undergraduate level, they do not count toward the M.A. degree, but they do fulfill the language requirement.

**Additional Requirements:**

All degree credits are to be earned at Temple University.

**Diagnostic Examinations:**

All entering master's students are required to take Diagnostic Examinations in Harmony, Counterpoint, Aural Skills, and Music History prior to the first term of graduate study. The purpose of these examinations is to ascertain adequate preparation for graduate study in these areas. Examinations in Harmony, Counterpoint, and Aural Skills may be taken once. The examination in Music History may be taken a second time.

Students who are unable to take the examinations at the designated time may do so using the online proctoring service, Examity® (https://examity.com). Students are responsible for all fees.

Students who opt not to take any or all exams prior to the first semester of study are required to complete remedial coursework within the first academic year.

Depending on the examination results, students may be required to take one or more remedial courses. Remedial courses are graded on a "Credit / No Credit" basis, and the official university transcript will indicate "CR" (for "Credit," meaning that the deficiency has been satisfied) or "NC" (for "No Credit," meaning that the deficiency has not been satisfied). Students must have a "B-" or better average in any remedial course or section to earn the grade of "Credit" and to satisfy the requirement. Students who earn a grade of "NC" (that is, having a class average below "B-") must retake that course or section until an average of "B-" or higher is achieved and a grade of "CR" is recorded on the official
university transcript. Remedial courses do not count toward graduate degree requirements.

It is highly recommended that students complete all remediation coursework during their first academic year of study. An exception may be granted for part-time students. Master's students may neither schedule graduation recitals nor take final comprehensive master's examinations until all of the diagnostic examinations and any required remediation have been successfully completed.

A. Diagnostic Examinations in Music Theory, including Harmony, Counterpoint, and Aural Skills

Students may take each portion of the theory test only once. Any section not graded as passing necessitates enrollment in a remedial course(s) during the first term of study. Examiners stipulate which section(s) of remedial coursework are required. Theory remedial courses include:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MUST 5001</td>
<td>Diatonic Harm. Review</td>
<td>1</td>
</tr>
<tr>
<td>MUST 5002</td>
<td>Chromatic Harm. Review</td>
<td>1</td>
</tr>
<tr>
<td>MUST 5003</td>
<td>Counterpoint Review</td>
<td>1</td>
</tr>
<tr>
<td>MUST 5004</td>
<td>Grad Aural Theory Review</td>
<td>3</td>
</tr>
</tbody>
</table>

B. Diagnostic Examination in Music History

Students may take each of the five sections of the history test twice. After the second attempt, any section not graded as passing necessitates enrollment in a remedial course(s). Examiners stipulate which section(s) of remedial coursework are required.

The History remedial course is MUST 5005 Remedial Studies in Music History. Each of five sections are enrolled in for one credit and are subtitled according to the period covered in the coursework: Baroque, Classic, Medieval/Renaissance, Romantic, and Twentieth Century. Remediation can be extended over two terms.

C. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
- received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

Piano Proficiency Examination:

Before the end of their course of study, students in the Music M.A. program must take a piano proficiency exam, consisting of the following elements:

1. A Bach chorale (prepared).
2. The exposition of a symphony from the 18th or 19th centuries (prepared).
3. The accompaniment of a song (German Lied or French Chanson; prepared).

Culminating Events:

Comprehensive Examination:

In their final term of study, students in the Music M.A. program take a three-hour comprehensive exam. Members of the department, appointed by the chair, devise the exam based on the coursework the student has taken for the degree.

Final Project:

The final project is an expanded version of a paper or music composition completed in a seminar. The result is intended to be suitable for use when applying to doctoral programs or to show an ability to teach in a particular area. Students submit a written paper in music theory or musicology OR one composition project to their advisor.

Music, M.S.

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE (http://www.temple.edu/boyer)

About the Program

The Master of Science in Music program is designed for graduate students who wish to broaden their experience in music and combine research and practice at the graduate level. This is a music-generalist degree program that allows students to experience graduate-level instruction that connects research to creative work and problem-solving in a field of practice, as well as expands students' major performing medium or allows them to explore performance media other than their undergraduate major. The degree does not, however, supplant the M.M. degrees in classical or jazz performance.
Time Limit for Degree Completion: 4 years

Campus Location: Main

Full-Time/Part-Time Status: The degree program can be completed on a full- or part-time basis.

Accreditation: Accreditation is being sought from the National Association of Schools of Music (NASM).

Areas of Specialization: Within the prescribed credits for the M.S. in Music, students can focus their studies on instrumental music, keyboards, or voice.

Job Prospects: The program prepares students for various careers related to music and for further academic training at the doctoral level.

Non-Matriculated Student Policy: With permission from the Dean's Office, individuals may be granted permission to enter the College as a non-matriculated student, taking up to 9 graduate credits (excluding private lessons) before applying for admission to a program.

Financing Opportunities: Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance, and/or direct service related to academic programs. Applicants must submit an assistantship/ internship application by March 1 to obtain priority consideration for an award. Applications are available online at the Graduate Financial Aid (http://www.temple.edu/boyer/admissions/documents/gradassistantshipform.pdf) page of Boyer's website. Typically these awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

Diagnostic Examinations:

All entering master’s students are required to take Diagnostic Examinations in Harmony, Counterpoint, Aural Skills, and Music History prior to the first term of graduate study. The purpose of these examinations is to ascertain adequate preparation for graduate study in these areas. Examinations in Harmony, Counterpoint, and Aural Skills may be taken once. The examination in Music History may be taken a second time.

Students who are unable to take the examinations at the designated time may do so using the online proctoring service, Examity® (https://examity.com). Students are responsible for all fees.

Students who opt not to take any or all exams prior to the first semester of study are required to complete remedial coursework within the first academic year.

Depending on the examination results, students may be required to take one or more remedial courses. Remedial courses are graded on a “Credit / No Credit” basis, and the official university transcript will indicate “CR” (for “Credit,” meaning that the deficiency has been satisfied) or “NC” (for “No Credit,” meaning that the deficiency has not been satisfied). Students must have a “B-” or better average in any remedial course or section to earn the grade of “Credit” and to satisfy the requirement. Students who earn a grade of “NC” (that is, having a class average below “B-”) must retake that course or section until an average of “B-” or higher is achieved and a grade of “CR” is recorded on the official university transcript. Remedial courses do not count toward graduate degree requirements.

It is highly recommended that students complete all remediation coursework during their first academic year of study. An exception may be granted for part-time students. Master’s students may neither schedule graduation recitals nor take final comprehensive master’s examinations until all of the diagnostic examinations and any required remediation have been successfully completed.

A. Diagnostic Examinations in Music Theory, including Harmony, Counterpoint, and Aural Skills

Students may take each portion of the theory test only once. Any section not graded as passing necessitates enrollment in a remedial course(s) during the first term of study. Examiners stipulate which section(s) of remedial coursework are required. Theory remedial courses include:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MUST 5001</td>
<td>Diatonic Harm. Review</td>
<td>1</td>
</tr>
<tr>
<td>MUST 5002</td>
<td>Chromatic Harm. Review</td>
<td>1</td>
</tr>
<tr>
<td>MUST 5003</td>
<td>Counterpoint Review</td>
<td>1</td>
</tr>
<tr>
<td>MUST 5004</td>
<td>Grad Aural Theory Review</td>
<td>3</td>
</tr>
</tbody>
</table>

B. Diagnostic Examination in Music History

Students may take each of the five sections of the history test twice. After the second attempt, any section not graded as passing necessitates enrollment in a remedial course(s). Examiners stipulate which section(s) of remedial coursework are required.

The History remedial course is MUST 5005 Remedial Studies in Music History. Each of five sections are enrolled in for one credit and are subtitled according to the period covered in the coursework: Baroque, Classic, Medieval/Renaissance, Romantic, and Twentieth Century. Remediation can be extended over two terms.

C. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
- received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

Culminating Events:

Final Project:

As a culminating event, students choose to complete an advisor-approved paper, make a presentation, or deliver a performance that connects research to practice. The paper or program verifying the presentation or performance is placed on file in the Associate Dean’s office prior to graduation.

Admissions:
Music, Ph.D.

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE (http://www.temple.edu/boyer)

About the Program

The Music Ph.D. program includes four concentrations: Composition, Music Studies, Music Theory, and Musicology. Each concentration includes a small core of required courses, allowing students to develop their remaining coursework with an advisor to focus on their particular scholarly or creative interests. The concentration in Music Studies allows students to combine disciplines (e.g., Music Theory/Composition or Musicology/Music Theory) in order to face the changes evident in the scholarly/creative fields in music departments throughout the world.

Time Limit for Degree Completion: 7 years

Campus Location: Main

Full-Time/Part-Time Status: The degree program can be completed on a full- or part-time basis.

Accreditation: The degree program is accredited by the National Association of Schools of Music (NASM).

Areas of Specialization: The Music Ph.D. program includes four concentrations: Composition, Music Studies, Music Theory, and Musicology.

Job Prospects: Graduates of the program typically find employment in professional music organizations throughout the world and in colleges and universities, among other employment venues in the music profession.

Non-Matriculated Student Policy: At the discretion of the department, an applicant may be permitted to enroll for up to 9 graduate credits as a non-matriculated student on a probationary basis, permitting her/him to attend classes and develop sufficient evidence of compositional talent beyond what is demonstrated at the time of application to qualify for full acceptance into the program.

Financing Opportunities: Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance, and/or direct service related to academic programs. Applicants must submit an assistantship/internship application by March 1 to obtain priority consideration for an award. Applications are available online at the Graduate Financial Aid (http://www.temple.edu/boyer/admissions/documents/gradassistantshipform.pdf) page of Boyer’s website. Typically these awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master’s students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

Admission Requirements and Deadlines

Application Deadline:

Fall: December 1

Decisions regarding admission are rendered after all required credentials have been submitted and the admissions application is complete.

APPLY ONLINE to this graduate program.

Letters of Reference:

Number Required: 2

From Whom: Letters of recommendation should be obtained from evaluators who can provide insight into the applicant’s abilities, talents, and aptitude for graduate study.

Coursework Required for Admission Consideration: All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours.

Master’s Degree in Discipline/Related Discipline: For each of the four concentrations, the following master’s degree is expected:

Composition
A degree in Music is expected; a degree in Composition is preferred.

Music Studies
A degree in Music is expected.

Music Theory
A degree in Music is expected; a degree in Music Theory is preferred.

Musicology
A degree in Music is expected; a degree in Musicology/Music History is preferred.

Bachelor’s Degree in Discipline/Related Discipline: For each of the four concentrations, the following baccalaureate degree is expected:

Composition
A degree in Music is expected; a degree in Composition is preferred.

Music Studies
A degree in Music is expected.

Music Theory
A degree in Music is expected; a degree in Music Theory is preferred.

Musicology
A degree in Music is expected; a degree in Musicology/Music History is preferred.

Statement of Goals: Include your special interests within the discipline and your expectations for the program.
Standardized Test Scores:
GRE/MAT: Required.

TOEFL: 100 iBT or 600 PBT minimum

Portfolio: For those undertaking the Composition concentration, a portfolio is required. Applicants must submit, via Acceptd (https://app.getacceptd.com/templeboyer), evidence of compositional activity. If an applicant has enrolled in MUST 8740 Seminar in Composition prior to submitting her/his application for formal admission to the program in Composition, the work accomplished there may serve to meet this entrance requirement, if satisfactory.

For the concentrations in Music Studies, Music Theory, and Musicology, a portfolio is not required.

Resume: Current resume required.

Scholarly Paper: For those undertaking the Composition concentration, applicants must submit, via Acceptd (https://app.getacceptd.com/templeboyer), one research paper that has no fewer than 12 pages.

For the concentrations in Music Studies, Music Theory, and Musicology, applicants must submit, via Acceptd (https://app.getacceptd.com/templeboyer), two research papers on contrasting topics. Each paper must be no fewer than 12 pages in length.

Advanced Standing: The Music, Ph.D. program consists of 42-52 discrete credits taken beyond the master's degree. At the time of admission, the entire master's degree serves as advanced standing credits. These credits are not counted toward the 42-52 required credits of the doctoral degree. However, students may transfer into the doctoral degree up to 12 graduate credits in coursework taken beyond the master's degree. Typically, this coursework is reviewed after admission to the Ph.D. degree and must be approved by the major advisor and the Associate Dean. The maximum number of advanced standing credits awarded is 30.

Other: The program provides the opportunity for advanced study in music that conforms to the very highest artistic and pedagogical ideals. For this reason, enrollment in the program is limited.

Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This Policy may preclude the admission of any student who meets the minimum requirements.

- MUST 9704 Doctoral Seminar in Music Studies: Music Composition
- MUST 9999 Dissertation/Monograph Research

**Electives**

Student selects no fewer than 15 credits in consultation with an advisor, and with approval of the Chair of Music Studies and the Associate Dean for Student Affairs.

Total Credit Hours: 42

**Language Examination:** Prior to the dissertation proposal, students are required to pass two foreign language exams, with preference among German, French, and Italian. Students may choose a different language if it relates to their dissertation research. The Chair of the Music Studies Department must approve a language exam outside of German, French, and Italian.

**Additional Requirements:**

All degrees credits are to be earned at Temple University.

**Written Entrance Examinations:**

All doctoral students must take written entrance exams prior to or during the first term of doctoral study. Candidates who fail the entrance examinations the first time may, upon application to the Associate Dean for Graduate Studies of the Boyer College of Music and Dance, be permitted to take the examinations a second time. If the examinations are failed a second time, remediation must occur. Students are advised by departmental faculty who develop a remediation plan according to the student's needs. A third opportunity is not allowed.

To continue registration in the doctoral program beyond the second term of study, all portions of the examinations must be passed or the appropriate review courses (or the equivalent, as determined by the examining department) must be in progress. Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date.

1. **Music History Exam:** A general examination covering the history of music is administered. Questions relative to forms, styles, and periods of music are included. It is expected that all examinees are acquainted with the standard literature of music.
2. **Harmony Exam:** This exam includes composition of a harmonic excerpt in advanced chromatic idiom and the creation of a bass line with figuration (figured bass) in Baroque style.
3. **Counterpoint Exam** (required only for the Composition and Music Theory concentrations): From a given motive, approximately 20 measures of imitative counterpoint in three parts are to be completed.
4. **Form and Analysis Exam:** A score is provided at the examination that requires analysis of specified passages.
5. **Composition Exam** (required only for the Composition concentration): This examination includes essay questions on stylistic analysis and historical context, the writing of a figured bass line, and the Piano Performance Examination.
6. **Writing Sample:** A 90-minute examination of the student's ability to write at the doctoral level is conducted. Examination topics are of a general nature.

**Composition Portfolio** (required only for the Composition concentration): Scores of completed compositions in various media must be submitted on or before the date of the Piano Performance Examination. Tapes of works in electronic media may also be submitted with or without graphic representation. All such submitted work of these designations should indicate the composer's abilities to use effectively both instrumental and vocal media, and, if appropriate, electronic media.

**Piano Performance Examination:**

Prior to the examination, the following should be prepared:

1. A twentieth-century work for piano of sufficient technical difficulty and expressive scope to demonstrate at least medium ability.
2. Score-reading a section of a nineteenth- or twentieth-century orchestral score.
   - In addition, the following will be given for sight-reading:
5. Realization of a figured bass.

If the applicant in Composition gives evidence of outstanding ability to work in computer synthesis of music and has an educational background to support this kind of musical composition rather than one oriented to a more traditional performing medium, dispensation of the performance requirement may be made by the department, based on the applicant's evidence of skills related to the above or to other specialized modes of musical composition. If admitted on these qualifications in lieu of performance ability, the applicant is required to undertake sufficient work at the piano to enable her/him to perform, as a minimum requirement, a prepared chorale harmonization by Bach and a relatively simple orchestral score, also prepared in advance.

**Recital** (required only for the Composition concentration): A recital of the student's music of chamber dimension is presented as a public event, with the performances the responsibility of the composer-candidate. A faculty committee selected from relevant performance and academic, as well as compositional, areas is asked to attend this recital and to participate in an oral critique of the recital as a whole with the composer-candidate. This is held at a designated time closely following
the recital as set by the department chair. This recital must take place prior to the preliminary examination.

With departmental permission, a student may request a waiver of the recital requirement by presenting scores and recordings of five compositions that have received professional performances. The request must be made in writing to the department chair and a committee convened to review the compositions with the candidate prior to the preliminary examination.

Continuous Registration:
Continuous registration of at least 3 s.h. must be maintained each term, with the exception of Summer, from the time of acceptance into the Ph.D. program in Music until the completion of all coursework.

Continuation in the Ph.D. Program:
Each course or seminar requires an end-of-term final grade based on papers presented, recitals prepared, and discussion and/or examinations taken during the course of the term. Each term of private study culminates in a performance examination or jury, except during terms in which the student has presented one of the required adjudicated recitals. Grades of less than "B-" cannot be counted toward the degree. If the student earns a grade of less than "B-" s/he may, with permission of the department chair and the Associate Dean, retake the term of study one additional time. Screening for continuance in the program after the first term of study is conducted at adjudicated recitals, end-of-the-term juries, and major examinations. This ensures that only the most qualified students continue beyond the early stages of the program.

Professional Development Policy:
In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

Performing Ensembles:
1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of academic terms. Students must arrange their schedules to accommodate this requirement.
2. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair, and the Associate Dean.

Independent Study Courses:
Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval will be granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects will be granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

Acceptable English:
All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

Written Preliminary Examination:
After the student completes coursework, the student and the student's academic advisor agree on a dissertation topic and choose a Doctoral Advisory Committee (DAC). The student presents a written description of the dissertation topic with an accompanying bibliography to the DAC for review. When the committee approves the description and bibliography, a date is set for the Written Preliminary Examination. The examination, composed by the DAC, should test the student's readiness to commence the dissertation. When the student completes the written exam, the DAC convenes an oral defense of the exam. If the defense of the preliminary exam is successful, the student presents a formal dissertation proposal. If the student fails the Written Preliminary Examination, the DAC schedules a second examination.

Oral Preliminary Examination:
One week after the completion of the Written Preliminary Examination, the student takes an Oral Preliminary Examination with the DAC.

Incompletes:
All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

Other:
Graduate assistantships and other forms of University-sponsored financial aid do not cover private lesson and recital extension fees.

Culminating Events:
Proposal:
Having completed the Written Preliminary Examination, the student’s proposal for the dissertation is also complete.

Dissertation:
For the Composition concentration, the dissertation consists of two parts:
1. An original composition of dimension approved by the advisor for full or chamber orchestra with or without soloists, or for voices and orchestra, or other approved media.
2. A short research paper suitable for publication.

Early in the term in which a defense of the dissertation is anticipated, the major advisor notifies the Associate Dean that it is time to appoint the Dissertation Examining Committee (DEC). The DEC consists of the DAC plus an "outside" reader, who is an additional graduate faculty member from Temple or another university, but not from the faculty of the student's home department.

Doctoral candidates must schedule a defense of the dissertation with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary.
This includes the "Announcement of Dissertation Defense" form, found in TUportal under the Tools tab within "University Forms," which must bear all appropriate signatures and be submitted to the Associate Dean.

Two weeks prior to the oral defense, the student submits individual copies of the abstract and the completed dissertation to the Associate Dean and each member of the DEC. The graduate secretary notifies the Graduate School and posts notices of the impending defense on bulletin boards located within the Boyer College of Music and Dance. All members of the DEC attend the oral defense and then vote to pass or fail the dissertation and its defense after the conclusion of the public presentation.

Changes in membership of a DAC or a DEC must be approved by the Associate Dean. The change also must be communicated to the Graduate School.

For those in the Music Studies, Music Theory, and Musicology concentrations, the completed dissertation demonstrates the capability to integrate coursework; identify a viable research topic; develop an appropriate research design; systematically gain evidence toward resolving the stated problem; and write, defend, and publicize the results in a professional manner. When the dissertation is complete and approved by the major advisor, the major advisor of the DAC asks the Associate Dean to appoint an "outside" reader, who is a graduate faculty member from Temple or another university, but not from the faculty of the student's home department. The DAC plus the outside reader comprise the Dissertation Examining Committee (DEC) for the oral defense. The DEC is formed early in the term in which a defense is anticipated.

One month prior to the requested defense date, the "Announcement of Dissertation Defense" form, found in TUportal under the Tools tab within "University Forms," must be submitted to the Associate Dean bearing all appropriate signatures. This form is available in the Main Office and on the Graduate School website. Two weeks prior to the oral defense, the student submits individual copies of the abstract and the completed dissertation to the Associate Dean and each member of the DEC. The graduate secretary notifies the Graduate School and posts notices of the impending defense on bulletin boards located within the Boyer College of Music and Dance. All members of the DEC attend the oral defense and vote to pass or fail the dissertation and its defense after the conclusion of the public presentation.

Changes in membership of a DAC or a DEC must be approved by the Associate Dean. The change also must be communicated to the Graduate School.

Music Composition, M.M.

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE (http://www.temple.edu/boyer)

About the Program

The Master of Music in Composition is a regimen of professional training spanning the gamut of traditional academic studies from counterpoint to experimental studies in subjects such as software synthesis. The master's program encourages the composer of demonstrated accomplishment to develop a personal voice through private study with at least two members of the Composition faculty.

Time Limit for Degree Completion: 6 years

Campus Location: Main

Full-Time/Part-Time Status: The degree program can be completed on a full- or part-time basis.

Accreditation: This degree program is accredited by the National Association of Schools of Music (NASM).

Job Prospects: The program prepares students for various careers related to music, as well as for further academic and musical training at the doctoral level.

Non-Matriculated Student Policy: With permission from the Dean's Office, individuals may be granted permission to enter the College as a non-matriculated student, taking up to 9 graduate credits (excluding private lessons) before applying for admission to a program.

Financing Opportunities: Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance, and/or direct service related to academic programs. Applicants must submit an assistantship/internship application by March 1 to obtain priority consideration for an award. Applications are available online at the Graduate

1 Select from Music, Music Education, Music Studies, or other graduate departments. Advisor approval required.

Language Examination: Reading knowledge of a foreign language is expected. If a deficiency exists, students may be required to take up to two terms of a foreign language.

Additional Requirements:

Diagnostic Examinations:

All entering Master of Music students are required to take Diagnostic Examinations in Harmony, Counterpoint, Aural Skills, and Music History prior to the first term of graduate study. The purpose of these examinations is to ascertain adequate preparation for graduate study in these areas. Examinations in Harmony, Counterpoint, and Aural Skills may be taken once. The examination in Music History may be taken a second time.

Students who opt not to take any or all exams prior to the first semester of study are required to complete remedial coursework within the first academic year.

Depending on the examination results, students may be required to take one or more remedial courses. Remedial courses are graded on a “Credit / No Credit” basis, and the official university transcript will indicate “CR” (for “Credit,” meaning that the deficiency has been satisfied) or “NC” (for “No Credit,” meaning that the deficiency has not been satisfied). Students must have a “B-” or better average in any remedial course or section to earn the grade of “Credit” and to satisfy the requirement.
Students who earn a grade of "NC" (that is, having a class average below "B-") must retake that course or section until an average of "B-" or higher is achieved and a grade of "CR" is recorded on the official university transcript. Remedial courses do not count toward graduate degree requirements.

It is highly recommended that students complete all remediation coursework during their first academic year of study. An exception may be granted for part-time students. Master of Music students may neither schedule graduation recitals nor take final comprehensive master's examinations until all of the diagnostic examinations and any required remediation have been successfully completed.

A. Diagnostic Examinations in Music Theory, including Harmony, Counterpoint, and Aural Skills

Students may take each portion of the theory test only once. Any section not graded as passing necessitates enrollment in a remedial course(s) during the first term of study. Examiners stipulate which section(s) of remedial coursework are required. Theory remedial courses include:

<table>
<thead>
<tr>

<td>MUST 5003</td>
<td>Counterpoint Review</td>
<td>1</td>
</tr>
<tr>
<td>MUST 5004</td>
<td>Grad Aural Theory Review</td>
<td>3</td>
</tr>
</tbody>
</table>

B. Diagnostic Examination in Music History

Students may take each of the five sections of the history test twice. After the second attempt, any section not graded as passing necessitates enrollment in a remedial course(s). Examiners stipulate which section(s) of remedial coursework are required.

The History remedial course is MUST 5005 Remedial Studies in Music History. Each of five sections are enrolled in for one credit and are subtitled according to the period covered in the coursework: Baroque, Classic, Medieval/Renaissance, Romantic, and Twentieth Century. Remediation can be extended over two terms.

C. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
- received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

Piano Examination:
Composition majors must pass a functional piano examination encompassing the following points:

1. Score Reading: Prepared in advance of the examination, the scores are to be brought to the examination. The exposition of the first movement of a symphony by Haydn or Mozart is recommended. Suggested scores are the 12 "London" symphonies by Haydn or one of the last six symphonies by Mozart. If the student wishes, s/he may play a more difficult score by a later composer.
2. Sight-reading a Bach chorale.
3. Realization of a figured bass.

Professional Development Policy:
In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

Independent Study Courses:
Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval will be granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects will be granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

Acceptable English:
All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

Participation in Ensembles:
With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair, and the Associate Dean.

Incompletes:
All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

Culminating Events:
Comprehensive Examination:
Upon completion of a minimum of 30 credits of graduate study and with the approval of the major advisor, the student may request permission from the Associate Dean of the Boyer College of Music and Dance to take the written qualifying examination. This request must be made in writing at least one month before the scheduled date of the examination. If desired, the student may take this examination during the final term of graduate study. The master's qualifying examination is offered once each term.

The Music Composition Division requires a five-hour written examination that includes the composition of a fugal exposition on a subject provided; the composition of a figured bass; the reduction, analysis, and identification of a passage from a provided orchestral work; and two essays about the history and practice of composition. In addition, the division administers a one-hour oral examination consisting of
discussion and identification of various orchestral scores. Scheduled by Assistant Dean David Brown, the exam is graded by two members of the department’s graduate faculty.

**Portfolio:**
Students are required to submit a portfolio of their work completed during the time they participated in the Master of Music program.

## Music Education, M.M.

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE (http://www.temple.edu/boyer)

**About the Program**
The Master of Music in Music Education degree offers opportunities for advanced studies on broad-based principles and practices in Music Education, as well as theories of learning and teaching, and provides an introduction to research methodology.

**Time Limit for Degree Completion:** 6 years

**Campus Location:** Main. Also offered fully online for students currently residing in Alaska, Arizona, California, Colorado, Hawaii, Idaho, Illinois, Maine, Montana, Nebraska, New Hampshire, New Jersey, North Carolina, Ohio, Oklahoma, Pennsylvania, South Dakota, Texas, Vermont, Virginia, Wisconsin, and Wyoming. Whether enrolling in the in-class or the online program, students must already hold teacher certification in at least one state.

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Accreditation:** The Music Education programs at Boyer College of Music and Dance are fully accredited by the National Association of Schools of Music (NASM), the Pennsylvania Department of Education, and the National Council for Accreditation of Teacher Education (NCATE).

**Areas of Specialization:** The M.M. in Music Education provides opportunities for advanced study through specialization in either music education practice or music education research. This program of study is designed for students intending to pursue a doctoral degree in Music Education; those seeking permanent certification in Pennsylvania; or those who view the degree as terminal.

**Job Prospects:** Students typically find employment in educational systems and also within the music industry. The program also is recommended for those who plan to pursue a doctoral degree in Music Education.

**Non-Matriculated Student Policy:** With permission from the Dean’s Office, individuals may be granted permission to enter the College as a non-matriculated student, taking up to 9 graduate credits (excluding private lessons) before applying for admission to a program.

**Financing Opportunities:** Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance, and/or direct service related to academic programs. Applicants must submit an assistantship/internship application by March 1 to obtain priority consideration for an award. Applications are available online at the Graduate Financial Aid (http://www.temple.edu/boyer/admissions/documents/gradassistantshipform.pdf) page of Boyer’s website. Typically these awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master’s students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

**Admission Requirements and Deadlines**

**Application Deadline:**
- **Fall:** February 1
- **Spring:** November 15

Decisions regarding admission are rendered after all required credentials have been submitted and the admissions application is complete.

**APPLY ONLINE to this graduate program.**

**Letters of Reference:**

**Number Required:** 2

**From Whom:** Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents, and aptitude for graduate study. Applicants who received a bachelor’s degree from the Boyer College of Music and Dance within the previous 12 months are exempt from this requirement.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate
Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours.

**Bachelor’s Degree in Discipline/Related Discipline:** A degree in Music Education is required.

**Statement of Goals:** Provide a written account of your accomplishments to date, your goals and expectations for the program, your goals for beyond the program, and your special interests in the discipline.

**Standardized Test Scores:**
TOEFL: 90 iBT or 575 PBT minimum

**Resume:** Your current resume must be submitted in paper form with other supporting application materials and forwarded electronically to the department chair.

**Academic and Musical Profile (AMP):** The Academic and Musical Profile (AMP) consists of two parts:

1. **Performance:** Applicants must submit a digital video of representative instruction episodes that adequately demonstrate both teaching skills and musicianship. The tape should be no more than 15 minutes in duration and may include any type of music teaching. Applicants should include a brief written narrative explaining the contents of the video.

2. **Written:** This examination is completed by the applicant during the on-campus interview visit. The applicant has 90 minutes to demonstrate writing skills and general knowledge about music education. The exam is scored by Music Education faculty. Results are considered in the admissions decision. Additional coursework may be required to remediate inadequacies.

**Teaching Certification:** Applicants must be certified to teach in at least one state in the United States. A copy of the teaching certificate must be submitted.

**Transfer Credit:** A student who wishes to transfer credit should speak with her/his academic advisor and obtain a “Request for Transfer of Graduate Credit” form, found in TuPortal under the Tools tab within “University Forms.” Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College’s Optimum Enrollment Policy. This Policy may preclude the admission of any student who meets the minimum requirements.

Applicants are encouraged, but not required, to submit any additional information that will help the faculty making admissions decisions. Additional items may include, but are not limited to, digital recordings of compositions or arrangements, recordings of performance groups, lesson or rehearsal plans, curriculum development material, and recital performance recordings.

**Program Requirements**

**General Program Requirements:**

**Number of Credits Required beyond the Baccalaureate:** 30

**Required Courses:**

**Electives**
- Additional Music Education Courses: 6
- Coursework in Supporting Areas: 2

**Capstone Course**
- MUED 9995 Master's Final Project: 3
  or MUED 9996 Master's Thesis Music Education: 3

**Total Credit Hours:** 30

1. All M.M. coursework stresses the acquisition of advanced knowledge of the theory of teaching and learning, as well as principles of and practices in Music Education.

2. “Supporting areas” include, for example, ethnomusicology, music history, and music theory.

**Additional Requirements:**

All degree credits are to be earned at Temple University.

**Diagnostic Examinations:**

All entering Master of Music students are required to take Diagnostic Examinations in Harmony, Counterpoint, Aural Skills, and Music History prior to the first term of graduate study. The purpose of these examinations is to ascertain adequate preparation for graduate study in these areas. Examinations in Harmony, Counterpoint, and Aural Skills may be taken once. The examination in Music History may be taken a second time.

Students who are unable to take the examinations at the designated time may do so using the online proctoring service, Examity® (https://examity.com). Students are responsible for all fees.

Students who opt not to take any or all exams prior to the first semester of study are required to complete remedial coursework within the first academic year.

Depending on the examination results, students may be required to take one or more remedial courses. Remedial courses are graded on a “Credit / No Credit” basis, and the official university transcript will indicate “CR” (for “Credit,” meaning that the deficiency has been satisfied) or “NC” (for “No Credit,” meaning that the deficiency has not been satisfied). Students must have a “B-” or better average in any remedial course or section to earn the grade of “Credit” and to satisfy the requirement. Students who earn a grade of “NC” (that is, having a class average below “B-”) must retake that course or section until an average of “B-” or higher is achieved and a grade of “CR” is recorded on the official
utilizes. Remedial courses do not count toward graduate degree requirements.

It is highly recommended that students complete all remediation coursework during their first academic year of study. An exception may be granted for part-time students. Master of Music students may neither schedule graduation recitals nor take final comprehensive master's examinations until all of the diagnostic examinations and any required remediation have been successfully completed.

A. Diagnostic Examinations in Music Theory, including Harmony, Counterpoint, and Aural Skills

Students may take each portion of the theory test only once. Any section not graded as passing necessitates enrollment in a remedial course(s) during the first term of study. Examiners stipulate which section(s) of remedial coursework are required. Theory remedial courses include:

<table>

B. Diagnostic Examination in Music History

Students may take each of the five sections of the history test twice. After the second attempt, any section not graded as passing necessitates enrollment in a remedial course(s). Examiners stipulate which section(s) of remedial coursework are required.

The History remedial course is MUST 5005 Remedial Studies in Music History. Each of five sections are enrolled in for one credit and are subtitled according to the period covered in the coursework: Baroque, Classic, Medieval/Renaissance, Romantic, and Twentieth Century. Remediation can be extended over two terms.

C. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

• matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
• received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

Professional Development Policy:

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

Independent Study Courses:

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval will be granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects will be granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

Acceptable English:

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

Applied Study:

1. Graduate students in non-performing curricula may take up to 6 credits of applied study toward the degree with the permission of the major advisor, department chair, and the chair of vocal or instrumental studies. Such non-required lessons may be taken only if the student can pass the normal graduate-level performing audition expected of performance majors. In this event, a fee of $200, not covered by tuition remission, is charged.

2. Regardless of major, graduate students with a demonstrable performing proficiency that may not meet the more rigorous requirements of a graduate-level audition may, by audition, qualify to take 2 credits of applied study per term for graduate credit. These courses carry a fee of $400 plus tuition and may be applied to the non-performing curriculum for degree credit. Up to 6 credits may be taken with the approval of the major advisor.

3. Graduate assistantships and other forms of University-sponsored financial aid do not cover private lesson or Recital Extension fees.

Incompletes:

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

Culminating Events:

Comprehensive Oral Examination:

Students in the Music Education M.M. program must take a comprehensive oral examination as part of the capstone course. The choice of capstone course must be declared no later than the second term of study following discussion with the academic advisor:

• MUED 9995 Master's Final Project: The comprehensive oral examination is part of the oral defense of the final project. It is scheduled individually during finals week. The student is asked to apply coursework materials to concepts covered in the final written project. The Defense Examining Committee presides and evaluates.

• MUED 9996 Master's Thesis Music Education: The comprehensive oral examination is part of the oral defense of the thesis. The student is asked to apply coursework materials to concepts covered therein. The Defense Examining Committee presides and evaluates.

Music Education, Ph.D.
Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE (http://www.temple.edu/boyer)

About the Program
The Ph.D. program in Music Education stresses the development of university teaching skills and research experience. It prepares music educators with advanced skills in quantitative or qualitative research methods to effectively translate research findings into music education practice and develops a cadre of music education professors who can assume leadership roles in the music education profession. Students are offered advanced study through specialization in music education practice and research, focusing on skills development and accountability for a diverse student population in a rapidly changing educational terrain. The program provides a home for those with traditional and non-traditional backgrounds. Its breadth and flexibility allow outstanding opportunities for differences in expertise and focus. The curriculum is overseen by the academic advisor in concert with the departmental Ph.D. advisory committee.

Time Limit for Degree Completion: 7 years

Full-Time/Part-Time Status: The degree program can be completed on a full- or part-time basis.

Interdisciplinary Study: Interdisciplinary study is encouraged.

Accreditation: The Music Education program at the Boyer College of Music and Dance is fully accredited by the National Association of Schools of Music (NASM), the Pennsylvania Department of Education, and the National Council for Accreditation of Teacher Education.

Areas of Specialization: Students enrolled in the Ph.D. program in Music Education identify an area of scholarly focus while at Temple. Examples include, but are not limited to, arts education, choral education, composition, conducting, dance and movement, early childhood music education, educational administration, educational policy studies, elementary music education, general music education, instrumental education, kinesiology, music history, music theory, psychology, secondary music education, sociology, technology, and urban education.

Job Prospects: Graduates of the program typically find employment in colleges and universities, public and private educational systems, and other venues in the music industry, or as independent researchers.

Non-Matriculated Student Policy: Non-matriculated students may enroll in selected courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

Financing Opportunities: Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance, and/or direct service related to academic programs. Applicants must submit an assistantship/internship application by March 1 to obtain priority consideration for an award. Applications are available online at the Graduate Financial Aid (http://www.temple.edu/boyer/admissions/documents/gradassistantshipform.pdf) page of Boyer's website. Typically these awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

Admission Requirements and Deadlines

Application Deadline:
Fall: February 1
Spring: September 15

Decisions regarding admission are rendered after all required credentials have been submitted and the admissions application is complete.

APPLY ONLINE to this graduate program.

Letters of Reference:
Number Required: 2

From Whom: Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents, and aptitude for graduate study. Applicants who received a degree from
the Boyer College of Music and Dance within the previous 12 months are exempt from this requirement.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours. Doctoral candidates must hold the Master of Music degree (or the equivalent) in the field of specialization from an accredited institution. Applicants accepted with deficiencies will find the deficiencies noted in the letter of admission. Deficiencies must be addressed prior to completion of the degree.

**Master’s Degree in Discipline/Related Discipline:** A degree in Music is expected. At least one degree, whether bachelor's or master's, must be in Music Education.

**Bachelor’s Degree in Discipline/Related Discipline:** A degree in Music is required.

**Statement of Goals:** Provide a written account of your accomplishments to date, your goals and expectations for the program, your goals for beyond the program, and your special interests in the discipline.

**Standardized Test Scores:**

- **TOEFL:** 100 iBT or 600 PBT minimum
- **GRE/MAT:** Required.

**Interview:** After the complete admissions application has been received by Temple University, applicants should contact the department at 215-204-8310 to arrange a campus visit and schedule an interview.

**Resume:** Your current resume must be submitted in paper form with other supporting application materials and forwarded electronically to the department chair.

**Writing Sample:** Applicants submit a paper that was written while completing the master’s degree. This paper should demonstrate the applicant’s scholarship and writing ability.

**Academic and Musical Profile (AMP):** The Academic and Musical Profile (AMP) consists of two parts:

1. **Performance:** Applicants must submit a digital video of representative instruction episodes that adequately demonstrate both teaching skills and musicianship. The recording should be no more than 15 minutes in duration and may include any type of music teaching. Applicants should include a brief written narrative explaining the contents of the video. The digital video is submitted via Acceptd (https://app.getacceptd.com/templeboyer).

2. **Written:** This examination is completed by the applicant during the on-campus interview visit. The applicant has 90 minutes to demonstrate writing skills and general knowledge about music education, including contemporary theories, practices, problems, and trends. The exam is scored by Music Education faculty. Results are considered in the admissions decision. Additional coursework may be required to remediate inadequacies.

**Teaching Certification:** Applicants must be certified to teach in at least one state in the United States. A minimum of three years’ successful elementary or secondary teaching experience is required. A copy of the teaching certificate must be submitted.

**Advanced Standing:** The Ph.D. program in Music Education consists of 60 discrete credits taken beyond the master’s degree. At the time of admission, the entire master’s degree serves as advanced standing credits. These credits are not counted toward the 60 required credits of the doctoral degree. However, students may transfer into the doctoral degree up to 12 additional graduate credits in coursework taken beyond the master’s degree. Typically, this coursework is reviewed after admission to the Ph.D. degree and must be approved by the major advisor, the department chair, and the Associate Dean. The maximum number of advanced standing credits awarded is 32.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This Policy may preclude the admission of any student who meets the minimum requirements.

**Electives**

- **Music Education**

- **Music Supportive Areas**

- **Cognate Area**

**Total Credit Hours:** 60

---

1 Electives in Music Education are taken in the Major Area, advised by the academic advisor. These courses are taken in Music Education and research skills development (educational psychology, statistics, etc.). A course of study is developed depending on the candidate’s prior experiences and professional goals.

2 Electives in Music Supportive Areas are designed to reinforce musical foundations and musicianship. They include conducting, ethnomusicology, literature, music history, music theory, and performance.
After the candidate has been accepted into the program but prior to the first term of study, the candidate declares a cognate area in concert with the academic advisor. The candidate and faculty advisor then develop a general course of study appropriate to the cognate area. The course of study becomes the curriculum that guides the student and faculty advisor throughout the degree program. During the first year of study, students may opt to modify the course of study and/or cognate area in consultation with the advisor. Following the first year of study, the cognate area and general course of study become binding.

Additional Requirements:

All degree credits are to be earned at Temple University.

Written Entrance Examinations:

All doctoral students must take written entrance exams prior to or during the first term of doctoral study. Candidates who fail the entrance examinations the first time may, upon application to the Associate Dean for Graduate Studies of the Boyer College of Music and Dance, be permitted to take the examinations a second time. A third opportunity is not allowed. If the examinations are failed a second time, remediation must occur. Students are advised by departmental faculty who develop a remediation plan according to the student's needs.

To continue registration in the doctoral program beyond the second term of study, all portions of the examinations must be passed or the appropriate review courses (or the equivalent, as determined by the examining department) must be in progress. Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date.

1. Music History Exam: A general examination covering the history of music is administered. Questions relative to forms, styles, and periods of music are included. It is expected that all examinees are acquainted with the standard literature of music.

2. Harmony Exam: This exam involves completion of a harmonic excerpt in advanced chromatic idiom and the creation of a bass line with figuration (figured bass) in Baroque style.

3. Counterpoint Exam: From a given motive, approximately 20 measures of imitative counterpoint in three parts are to be completed.

4. Form and Analysis Exam: A score is provided at the examination that requires analysis of specified passages.

Continuous Registration:

Continuous registration of at least 3 s.h. must be maintained each term, with the exception of Summer, from the time of acceptance into the Ph.D. program in Music Education until the completion of all coursework.

Continuation in the Ph.D. Program:

Each course or seminar requires an end-of-term final grade based on papers prepared, recitals presented, discussion, and/or examinations taken during the course of the term. Each term of private study culminates in a performance examination or jury, except during terms in which the student has presented one of the required adjudicated recitals. Screening for continuance in the program after the first term of study is conducted at adjudicated recitals, end-of-the-term juries, and major examinations. This ensures that only the most qualified students continue beyond the early stages of the program.

For all doctoral programs, only grades from "A" to "B-" can be applied toward degree requirements. Grades of less than "B-" cannot be counted toward the degree. If the student earns a grade of less than "B-," s/he may, with permission of the department chair and the Associate Dean, retake the term of study one additional time. The same applies to recitals.

Professional Development Policy:

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

Independent Study Courses:

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval will be granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects will be granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

Acceptable English:

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

Written Preliminary Examinations:

The written preliminary examinations may be taken during the final term of coursework, but no later than in the term after completion of coursework. They are administered several times each calendar year, and span two consecutive days of six hours of examination each day. They should be taken no later than the end of the fifth year. Subject areas are in the major field, as well as in the minor field areas (typically Music History and Music Theory). The written preliminary examinations in Music Education require the student to demonstrate knowledge and the ability to transfer concepts and ideas. The focus is on assessment methods; current issues in Music Education; foundations (psychological, sociological, historical, philosophical); music perception and cognition; musicianship and aesthetic development; research interpretation; research methods; and teaching methods.

Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date. Students are then notified in writing of the specific dates and administration times of the preliminary examinations for which they have been scheduled. A study guide for the Music Education Preliminary Examinations is available in the Music Education Office. Students are advised to prepare written answers to the questions in the study guide.
Faculty members within the student's major and minor subject areas are involved in preparing the examination questions. At least three graduate faculty members independently read and score each section of the written preliminary examinations. Students typically are graded "Pass" or "Fail" based on a consensus of the examination readers.

**Oral Preliminary Examinations:**
For those students who pass the written preliminary examinations, no oral preliminary examination is required. (This refers only to the oral preliminary examination and does not refer in any way to the oral defense of the dissertation/monograph.)

If a student fails one or more portions of the written preliminary examination, an oral examination is administered by the major advisor and a minimum of two additional faculty members. In the case of failure in one subject area, two members of that department are asked by the student's major advisor to participate with the major advisor in the examination. In the case of failure in more than one subject area, at least one faculty member from each of the departments in which the failure occurred is asked by the student's major advisor to participate in the examination.

The examination is to be a formal oral examination rather than an informal meeting with graduate faculty from departments in which the examination revealed that the student needs further work. This does not preclude such informal meetings, however, in preparation for the oral examination. Upon passing the oral examination, the student, as advised by the examining committee, is permitted to schedule a second and final attempt at the failed portions of the written examination.

**Paper Project:**
While a student is matriculated, completion of at least one pre-dissertation sole-authored article suitable for publication in a refereed journal is required. The paper project must demonstrate the ability to synthesize information and processes of research and go significantly beyond any course assignment. It may not duplicate any previous papers completed by the student outside of the degree program. The work on this paper may begin at any time during coursework and must meet current professional standards for publication. The student works with the academic advisor on planning the paper project as soon as the student matriculates in the program. The academic advisor and department chair must approve all project plans.

**Residency:**
A one-year residency of two contiguous (Fall and Spring) terms is required for Ph.D. candidates. During the residency, internship requirements are met. The residency provides candidates with the opportunity to work closely with a faculty mentor and allows focused time for work toward degree completion with faculty guidance. Candidates with previous University teaching experience may apply for a residency waiver.

**Incomplete:**
All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

**Other:**
Graduate assistantships and other forms of University-sponsored financial aid do not cover private lesson and recital extension fees.

**Culminating Events:**
**Proposal:**
Students enroll in MUED 9998 Pre-Dissertation Research and work with the major advisor to prepare a proposal. With the knowledge of the major advisor, the student may consult other faculty members. When the major advisor approves the dissertation proposal, an oral defense of the dissertation proposal is scheduled with all Music Education faculty members present. Faculty members must receive a hard copy of the dissertation proposal no fewer than two weeks before the scheduled defense.

After a dissertation proposal has been developed by the student and approved by the major advisor and Music Education faculty at the oral defense, the student prepares a final copy for approval. At the same time, the student identifies the members of the Doctoral Advisory Committee (DAC) in consultation with the major advisor. The major advisor then provides the names of the DAC members to the Associate Dean for consideration. The DAC is appointed officially by the Graduate School.

The DAC consists of no fewer than three persons: the student's major advisor, a second person from the department, and a third person from outside the department. Each member of the DAC must sign the final proposal. When all DAC members have signed the title page, the student copies the final proposal and delivers, within 30 days, one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School.

After all coursework is completed, preliminary examinations have been passed, and the dissertation proposal has been accepted by the Music Education faculty, the candidate should register for MUED 9999 Doctoral Dissertation each Fall and Spring term until the dissertation has been successfully defended. Doctoral candidates are required to register for a minimum of 6 credit hours of MUED 9999 during their program as a whole, but must register for a minimum of 1 such credit each term while working on the dissertation.

**Dissertation:**
The completed dissertation demonstrates the capability to integrate coursework; identify a viable research topic; develop an appropriate research design; systematically gain evidence toward resolving the stated problem; and write, defend, and publicize the results in a professional manner. When the dissertation is complete and approved by the major advisor, the major advisor of the DAC asks the Associate Dean to appoint an outside reader, who is a graduate faculty member from Temple or another university, but not from the faculty of the student's home department. The DAC plus the outside reader comprise the Dissertation Examining Committee (DEC) for the oral defense. The DEC is formed early in the term in which a defense is anticipated.

One month prior to the requested defense date, the "Announcement of Oral Defense" form, found in TUportal under the Tools tab within "University Forms," must be submitted to the Associate Dean bearing all appropriate signatures. Two weeks prior to the oral defense, the student submits individual copies of the abstract and the completed dissertation to the Associate Dean and each member of the DEC. The graduate secretary notifies the Graduate School and posts notices of the impending defense on bulletin boards located within the Boyer College of Music and Dance. All members of the DEC attend the oral defense and vote to pass or fail the dissertation and its defense after the conclusion of the public presentation.

Changes in membership of a DAC or a DEC must be approved by the Associate Dean. The change also must be communicated to the Graduate School.

Music History, M.M.

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE (http://www.temple.edu/boyer)

About the Program

The Master of Music in Music History is intended for those who wish to expand their knowledge of historical styles, genres, composers, periods, music literature, and analytical techniques. The program is especially recommended for those who want to pursue a doctoral degree in musicology.

Time Limit for Degree Completion: 6 years

Campus Location: Main

Full-Time/Part-Time Status: The degree program can be completed on a full- or part-time basis.

Accreditation: This degree program is accredited by the National Association of Schools of Music (NASM).

Areas of Specialization: Within the prescribed credits for the M.M. in Music History, students can focus their studies on traditional Western-oriented music history topics spanning antiquity through the twentieth century.

Job Prospects: The program prepares students for various careers related to music, and for further academic and musical training at the doctoral level.

Non-Matriculated Student Policy: With permission from the Dean's Office, individuals may be granted permission to enter the College as a non-matriculated student, taking up to 9 graduate credits (excluding private lessons) before applying for admission to a program.

Financing Opportunities: Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance, and/or direct service related to academic programs. Applicants must submit an assistantship/ internship application by March 1 to obtain priority consideration for an award. Applications are available online at the Graduate Financial Aid (http://www.temple.edu/boyer/admissions/documents/gradassistantshipform.pdf) page of Boyer's website. Typically these awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

Admission Requirements and Deadlines

Application Deadline:
Fall: March 1
Spring: November 1

Decisions regarding admission are rendered after receipt of all required credentials. Late applications may be considered for admission.

APPLY ONLINE to this graduate program.

Letters of Reference:
Number Required: 2

From Whom: Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents, and aptitude for graduate study.

Coursework Required for Admission Consideration: All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours.

Bachelor's Degree in Discipline/Related Discipline: A degree in Music is expected.

Statement of Goals: Include your special interests within the discipline and expectations for the program.

Standardized Test Scores:
TOEFL: 79 iBT or 550 PBT minimum

Resume: Current resume required.

Writing Sample: An applicant must submit with the application for admission an undergraduate-level paper demonstrating her/his ability to do musical analysis and/or report research.
Transfer Credit: A student who wishes to transfer credit should speak with her/his academic advisor and obtain a "Request for Transfer of Graduate Credit" form, found in TUportal under the Tools tab within "University Forms." Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

Other: Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College’s Optimum Enrollment Policy. This Policy may preclude the admission of any student who meets the minimum requirements.

1 Select from Music, Music Education, Music Studies, and other graduate departments. Up to 6 credits in applied music study are permitted. Advisor approval required.

Language Examination: Reading knowledge of a foreign language is expected. If a deficiency exists, students may be required to take up to four terms of a foreign language.

Additional Requirements:

All degree credits are to be earned at Temple University.

Diagnostic Examinations:

All entering Master of Music students are required to take Diagnostic Examinations in Harmony, Counterpoint, Aural Skills, and Music History prior to the first term of graduate study. The purpose of these examinations is to ascertain adequate preparation for graduate study in these areas. Examinations in Harmony, Counterpoint, and Aural Skills may be taken once. The examination in Music History may be taken a second time.

Students who are unable to take the examinations at the designated time may do so using the online proctoring service, Examity® (https://examity.com). Students are responsible for all fees.

Students who opt not to take any or all exams prior to the first semester of study are required to complete remedial coursework within the first academic year.

Depending on the examination results, students may be required to take one or more remedial courses. Remedial courses are graded on a “Credit / No Credit” basis, and the official university transcript will indicate “CR” (for "Credit," meaning that the deficiency has been satisfied) or “NC” (for "No Credit," meaning that the deficiency has not been satisfied). Students must have a “B-” or better average in any remedial course or section to earn the grade of “Credit” and to satisfy the requirement. Students who earn a grade of “NC” (that is, having a class average below “B-”) must retake that course or section until an average of “B-” or higher is achieved and a grade of "CR" is recorded on the official university transcript. Remedial courses do not count toward graduate degree requirements.

It is highly recommended that students complete all remediation coursework during their first academic year of study. An exception may be granted for part-time students. Master of Music students may neither schedule graduation recitals nor take final comprehensive master’s examinations until all of the diagnostic examinations and any required remediation have been successfully completed.

A. Diagnostic Examinations in Music Theory, including Harmony, Counterpoint, and Aural Skills

Students may take each portion of the theory test only once. Any section not graded as passing necessitates enrollment in a remedial course(s) during the first term of study. Examiners stipulate which section(s) of remedial coursework are required. Theory remedial courses include:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MUST 5001</td>
<td>Diatonic Harm. Review</td>
<td>1</td>
</tr>
<tr>
<td>MUST 5002</td>
<td>Chromatic Harm. Review</td>
<td>1</td>
</tr>
<tr>
<td>MUST 5003</td>
<td>Counterpoint</td>
<td>1</td>
</tr>
<tr>
<td>MUST 5004</td>
<td>Grad Aural Theory Review</td>
<td>3</td>
</tr>
</tbody>
</table>

B. Diagnostic Examination in Music History

Students may take each of the five sections of the history test twice. After the second attempt, any section not graded as passing necessitates enrollment in a remedial course(s). Examiners stipulate which section(s) of remedial coursework are required.

The History remedial course is MUST 5005 Remedial Studies in Music History. Each of five sections are enrolled in for one credit and are subtitled according to the period covered in the coursework: Baroque, Classic, Medieval/Renaissance, Romantic, and Twentieth Century. Remediation can be extended over two terms.

C. Conditions for Exemption from Diagnostic Examinations

Students who earn a grade of "NC" (for "No Credit," meaning that the deficiency has not been satisfied) are not eligible for exemption. If a deficiency exists, students are required to complete remedial coursework within the first academic year.
The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
- received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

**Independent Study Courses:**
Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval will be granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects will be granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

**Acceptable English:**
All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

**Applied Music Study:**
1. Graduate students in non-performing curricula may take up to 6 credits of applied study toward the degree with the permission of the major advisor. Such non-required lessons may be taken only if the student can pass the normal graduate-level performing audition expected of performance majors. In this event, a fee of $200, not covered by tuition remission, is charged.
2. Regardless of major, graduate students with a demonstrable performing proficiency that may not meet the more rigorous requirements of a graduate-level audition may, by audition, qualify to take 2 credits of applied study per term for graduate credit. These courses carry a fee of $400 plus tuition and may be applied to the non-performing curriculum for degree credit. Up to 6 credits may be taken with the approval of the major advisor.
3. Graduate assistantships and other forms of University-sponsored financial aid do not cover private lesson or Recital Extension fees.

**Incompletes:**
All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

**Culminating Events:**

**Comprehensive Examination:**
Upon completion of a minimum of 30 credits of graduate study and with the approval of the major advisor, the student may request permission from the Associate Dean of the Boyer College of Music and Dance to take the written qualifying examination. This request must be made in writing at least one month before the scheduled date of the examination. If desired, the student may take this examination during the final term of graduate study. The master's qualifying examination is offered once each term.

The three-hour written examination in Music History covers topics from the Middle Ages to the present, bibliographic resources, and performance practice. More penetrating questions are included in subject areas that the student has covered in formal situations. Musical scores are included for analysis and discussion. Scheduled by Assistant Dean David Brown, the exam is graded by two members of the department's graduate faculty.

**Final Written Project:**
Music History majors write a final written project (MUST 9995 Final Project) — not a thesis — that is 50-75 pages in length. The project provides an opportunity to utilize and demonstrate the skills acquired in historical, stylistic, and analytical research, and also provides a vehicle needed for those interested in applying for doctoral studies. No defense of the final written project is scheduled. The major advisor evaluates and grades the final written project.

Music Performance/Bassoon, M.M.

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE (http://www.temple.edu/boyer)

About the Program
The master's degree in Bassoon Performance develops expertise beyond baccalaureate-level achievement. Students specialize in the study of the major instrument and take courses outside the major area that support advanced musical and academic development. The Department of Instrumental Studies provides the potential professional performer and/or teacher with the finest instrumental training within the context of a comprehensive university. Students study privately with professional artist-teachers and enjoy opportunities for performance in numerous large and chamber music ensembles.

Time Limit for Degree Completion: 6 years

Campus Location: Main

Full-Time/Part-Time Status: The degree program can be completed on a full- or part-time basis.

Interdisciplinary Study: With approval of the major advisor, students may elect to take up to 6 graduate credits outside the field of music.

Accreditation: This degree program is accredited by the National Association of Schools of Music (NASM).

Areas of Specialization: Study focuses on performance of the major instrument, the solo and ensemble literature of the instrument, and academic support areas in music.

Job Prospects: The program prepares musicians for either professional activity or doctoral study.

Non-Matriculated Student Policy: Non-matriculated students may enroll in selected courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

Financing Opportunities: Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance, and/or direct service related to academic programs. Applicants must submit an assistantship/internship application by March 1 to obtain priority consideration for an award. Applications are available online at the Graduate Financial Aid (http://www.temple.edu/boyer/admissions/documents/gradassistantshipform.pdf) page of Boyer's website. Typically these awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

Admission Requirements and Deadlines

Application Deadline:
Fall: March 1
Spring: November 1

Applications are processed as they arrive. Late applications may be considered for admission.

APPLY ONLINE to this graduate program.

Letters of Reference:
Number Required: 2

From Whom: Letters of recommendation should be obtained from evaluators who can provide insight into an applicant's abilities, talents, and aptitude for graduate study.

Coursework Required for Admission Consideration: All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours.

Bachelor's Degree in Discipline/Related Discipline: A degree in Music is expected.

Statement of Goals: Include your special interests within the discipline and expectations for the program.

Standardized Test Scores:
TOEFL: 75 iBT or 537 PBT minimum

Audition: See www.temple.edu/boyer for audition repertoire requirements.

Resume: Current resume required.

Transfer Credit: A student who wishes to transfer credit should speak with her/his academic advisor and obtain a "Request for Transfer of Graduate Credit" form, found in TPortal under the Tools tab within "University Forms." Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

Other: Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any
one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College’s Optimum Enrollment Policy. This Policy may preclude the admission of any student who meets the minimum requirements.

Additional Requirements:

All degree credits are to be earned at Temple University.

**Diagnostic Examinations:**

All entering Master of Music students are required to take Diagnostic Examinations in Harmony, Counterpoint, Aural Skills, and Music History prior to the first term of graduate study. The purpose of these examinations is to ascertain adequate preparation for graduate study in these areas. Examinations in Harmony, Counterpoint, and Aural Skills may be taken once. The examination in Music History may be taken a second time.

Students who are unable to take the examinations at the designated time may do so using the online proctoring service, Examity® (https://examity.com). Students are responsible for all fees.

Students who opt not to take any or all exams prior to the first semester of study are required to complete remedial coursework within the first academic year.

Depending on the examination results, students may be required to take one or more remedial courses. Remedial courses are graded on a “Credit / No Credit” basis, and the official university transcript will indicate “CR” (for “Credit,” meaning that the deficiency has been satisfied) or “NC” (for “No Credit,” meaning that the deficiency has not been satisfied). Students must have a “B-” or better average in any remedial course or section to earn the grade of “Credit” and to satisfy the requirement. Students who earn a grade of “NC” (that is, having a class average below “B-”) must retake that course or section until an average of “B-” or higher is achieved and a grade of “CR” is recorded on the official university transcript. Remedial courses do not count toward graduate degree requirements.

It is highly recommended that students complete all remediation coursework during their first academic year of study. An exception may be granted for part-time students. Master of Music students may neither schedule graduation recitals nor take final comprehensive master’s examinations until all of the diagnostic examinations and any required remediation have been successfully completed.

A. Diagnostic Examinations in Music Theory, including Harmony, Counterpoint, and Aural Skills

Students may take each portion of the theory test only once. Any section not graded as passing necessitates enrollment in a remedial course(s) during the first term of study. Examiners stipulate which section(s) of remedial coursework are required. Theory remedial courses include:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MUST 5001</td>
<td>Diatonic Harm. Review</td>
<td>1</td>
</tr>
<tr>
<td>MUST 5002</td>
<td>Chromatic Harm. Review</td>
<td>1</td>
</tr>
<tr>
<td>MUST 5003</td>
<td>Counterpoint Review</td>
<td>1</td>
</tr>
<tr>
<td>MUST 5004</td>
<td>Grad Aural Theory Review</td>
<td>3</td>
</tr>
</tbody>
</table>

B. Diagnostic Examination in Music History

Students may take each of the five sections of the history test twice. After the second attempt, any section not graded as passing necessitates enrollment in a remedial course(s). Examiners stipulate which section(s) of remedial coursework are required.

The History remedial course is MUST 5005 Remedial Studies in Music History. Each of five sections are enrolled in for one credit and are subtitled according to the period covered in the coursework: Baroque, Classic, Medieval/Renaissance, Romantic, and Twentieth Century. Remediation can be extended over two terms.

C. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
- received grades of “B-” or better in every undergraduate course taken in each individual examination area to be waived.

**Professional Development Policy:**
In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

Performing Ensembles:

1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.

2. Participation: Master's degree candidates in wind, brass, and percussion instruments must be available for ensemble assignments at the discretion of the department chair, including participation beyond curricular requirements.

3. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair, and the Associate Dean.

Independent Study Courses:

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval will be granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects will be granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

Acceptable English:

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

Graduate Private Lesson Policy:

Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programatically required graduate-level study are taken simultaneously. A $250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

Private applied lessons beyond the four-term requirement currently in effect for graduate performance students may be extended with the permission of the jury, department chair, and the Associate Dean or Dean of the Boyer College of Music and Dance.

Recital Extension:

Students withdrawing from the recital requirement during the recital term will receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course will be offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course will be replaced by a letter grade and MUSC 5000 Recital Extension will be issued a grade of "CR." Credit derived from Recital Extension will not be counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study will be the cost of 2 graduate credits plus a $400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.

2. Exceptions to Recital Extension:
   a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
   b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, if the student does not take Recital Extension during the Summer, s/he may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.

3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension will be reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, will determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

Incompletes:

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

Culminating Events:

Comprehensive Final Project:

Students must maintain a list of all literature, including solos, etudes, and excerpts, performed each term in lessons, using a printed form provided by the department. During the final term of study, students are required to submit a three-part written project. Part 1 includes lists of music studied/performed in all four terms of lessons; the lists must be signed by the studio teacher. Part 2 includes program notes or excerpts, performed each term in lessons, using a printed form sponsored financial aid do not cover the Recital Extension fee.

1. A discussion of a third piece from the submitted lists or one movement of a multi-movement piece from the lists: The length of the piece or movement being discussed should be no less than 8-10 minutes. This discussion must form a paper of no less than 2,000 words. Topics may include (but are not limited to) historical perspectives, performance and performance practice issues, instrumental technical issues, the importance or role of the piece in the literature for the student's instrument, etc. This discussion must
be presented as a formal paper with supporting information, including resources, charts, and the like.

OR

2. A theoretical analysis of one of the listed pieces or one movement of a multi-movement piece from the lists: The length of the piece or movement being analyzed should be no less than 8-10 minutes. This analysis should address form, basic harmonic events, large-scale phrasing, performance practice issues, etc., as outlined in a rubric provided by the department.

The written project must be submitted to the Department of Instrumental Studies no later than November 1 for an anticipated December graduation or April 1 for an anticipated May graduation. Documents are distributed among the departmental faculty for review and a grade of either “pass” or “fail.” A passing grade from a majority (and no fewer than two) of the department’s graduate faculty members is required. Students who do not pass are told what needs to be fixed (content, grammar, etc.) and, using whatever resources they have (e.g., the University’s Writing Center), prepare and submit a revision that receives a passing grade. In order for a student to graduate on schedule, any revision that is required must receive a passing grade before the deadline by which names must be submitted for graduation.

Public Recital:
Performance majors present a public recital as the culminating event for the master’s degree (MUSC 8984). Graduation recitals are typically one hour in length; presented on-campus in either Rock Hall or Klein Recital Hall; and adjudicated by two full-time music faculty members. The student must show evidence through Temple University transcript records of having taken private lessons up to the time of the graduation recital. Students who wish to play a recital in the early Fall should plan to register for and complete the final term of lessons during the preceding Summer months.

A Recital Permission Form indicating the private teacher’s approval for performance of the graduation recital must be signed by the private teacher and submitted six weeks prior to the recital. (If the recital is in the first five weeks of the Spring term, the form must be submitted two weeks before the end of the Fall term.) If required by the private teacher, a Recital Permission Jury must be scheduled at least four weeks prior to the recital. If the form is not submitted or a required jury is not scheduled, the recital. If the form is not submitted or a required jury is not scheduled, the department reserves the right to cancel or postpone the recital.

Music Performance/Cello, M.M.

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE (http://www.temple.edu/boyer)

About the Program

The master's degree in Cello Performance develops expertise beyond baccalaureate-level achievement. Students specialize in the study of the major instrument and take courses outside the major area that support advanced musical and academic development. The Department of Instrumental Studies provides the potential professional performer and/or teacher with the finest instrumental training within the context of a comprehensive university. Students study privately with professional artist-teachers and enjoy opportunities for performance in numerous large and chamber music ensembles.

Time Limit for Degree Completion: 6 years

Campus Location: Main

Full-Time/Part-Time Status: The degree program can be completed on a full- or part-time basis.

Interdisciplinary Study: With approval of the major advisor, students may elect to take up to 6 graduate credits outside the field of music.

Accreditation: This degree program is accredited by the National Association of Schools of Music (NASM).

Areas of Specialization: Study focuses on performance of the major instrument, the solo and ensemble literature of the instrument, and academic support areas in music.

Job Prospects: The program prepares musicians for either professional activity or doctoral study.

Non-Matriculated Student Policy: Non-matriculated students may enroll in selected courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

Financing Opportunities: Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance, and/or direct service related
to academic programs. Applicants must submit an assistantship/ internship application by March 1 to obtain priority consideration for an award. Applications are available online at the Graduate Financial Aid (http://www.temple.edu/boyer/admissions/documents/ gradassistanshipform.pdf) page of Boyer's website. Typically these awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

**Admission Requirements and Deadlines**

**Application Deadline:**

- **Fall:** March 1
- **Spring:** November 1

Applications are processed as they arrive. Late applications may be considered for admission.

**APPLY ONLINE to this graduate program.**

**Letters of Reference:**

- **Number Required:** 2

  - **From Whom:** Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents, and aptitude for graduate study.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours.

**Bachelor's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Statement of Goals:** Include your special interests within the discipline and expectations for the program.

**Standardized Test Scores:**

- **TOEFL:** 75 iBT or 537 PBT minimum
- **Audition:** See www.temple.edu/boyer for audition repertoire requirements.
- **Resume:** Current resume required.

**Transfer Credit:** A student who wishes to transfer credit should speak with her/his academic advisor and obtain a "Request for Transfer of Graduate Credit" form, found in TUportal under the Tools tab within "University Forms." Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

1. M.M. candidates must be available for ensemble assignments, which are determined by the department chair and may exceed curricular requirements.

2. Select from Music, Music Education, Music Studies, or other graduate departments. At least 3 credits must be in academic, non-performance coursework. Advisor approval required.

**Additional Requirements:**

All degree credits are to be earned at Temple University.

**Diagnostic Examinations:**

All entering Master of Music students are required to take Diagnostic Examinations in Harmony, Counterpoint, Aural Skills, and Music History prior to the first term of graduate study. The purpose of these examinations is to ascertain adequate preparation for graduate study in these areas. Examinations in Harmony, Counterpoint, and Aural Skills may be taken once. The examination in Music History may be taken a second time.

Students who are unable to take the examinations at the designated time may do so using the online proctoring service, Examity® (https://examity.com). Students are responsible for all fees.

Students who opt not to take any or all exams prior to the first semester of study are required to complete remedial coursework within the first academic year.

Depending on the examination results, students may be required to take one or more remedial courses. Remedial courses are graded on a "Credit / No Credit" basis, and the official university transcript will indicate "CR" (for "Credit," meaning that the deficiency has been satisfied) or "NC" (for "No Credit," meaning that the deficiency has not been satisfied). Students must have a "B-" or better average in any remedial course or section to earn the grade of "Credit" and to satisfy the requirement.
Students who earn a grade of "NC" (that is, having a class average below "B-") must retake that course or section until an average of "B-" or higher is achieved and a grade of "CR" is recorded on the official university transcript. Remedial courses do not count toward graduate degree requirements.

It is highly recommended that students complete all remediation coursework during their first academic year of study. An exception may be granted for part-time students. Master of Music students may neither schedule graduation recitals nor take final comprehensive master's examinations until all of the diagnostic examinations and any required remediation have been successfully completed.

A. Diagnostic Examinations in Music Theory, including Harmony, Counterpoint, and Aural Skills

Students may take each portion of the theory test only once. Any section not graded as passing necessitates enrollment in a remedial course(s) during the first term of study. Examiners stipulate which section(s) of remedial coursework are required. Theory remedial courses include:

<table>

</tbody>
</table>

B. Diagnostic Examination in Music History

Students may take each of the five sections of the history test twice. After the second attempt, any section not graded as passing necessitates enrollment in a remedial course(s). Examiners stipulate which section(s) of remedial coursework are required.

The History remedial course is MUST 5005 Remedial Studies in Music History. Each of five sections are enrolled in for one credit and are subitled according to the period covered in the coursework: Baroque, Classic, Medieval/Renaissance, Romantic, and Twentieth Century. Remediation can be extended over two terms.

C. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
- received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

Professional Development Policy:

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

Performing Ensembles:

1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.
2. Participation: Master's degree candidates in wind, brass, and percussion instruments must be available for ensemble assignments at the discretion of the department chair, including participation beyond curricular requirements.
3. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair, and the Associate Dean.

University Orchestra:

At the master's degree level, all bowed string majors must perform in the University Orchestra each term they receive lessons.

Independent Study Courses:

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval will be granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects will be granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

Acceptable English:

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

Graduate Private Lesson Policy:

Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A $250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

Private applied lessons beyond the four-term requirement currently in effect for graduate performance students may be extended with the permission of the jury, department chair, and the Associate Dean or Dean of the Boyer College of Music and Dance.

Recital Extension:

Students withdrawing from the recital requirement during the recital term will receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course will be offered on a "Credit/No Credit" basis only. Upon
satisfactory completion of the recital, the Incomplete for the recital course will be replaced by a letter grade and MUSC 5000 Recital Extension will be issued a grade of "CR." Credit derived from Recital Extension will not be counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study will be the cost of 2 graduate credits plus a $400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.

2. Exceptions to Recital Extension:
   a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
   b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, if the student does not take Recital Extension during the Summer, s/he may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.

3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension will be reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, will determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

Incompletes:
All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

Culminating Events:
Comprehensive Final Project:
Students must maintain a list of all literature, including solos, etudes, and excerpts, performed each term in lessons, using a printed form provided by the department. During the final term of study, students are required to submit a three-part written project. Part 1 includes lists of music studied/perform in all four terms of lessons; the lists must be signed by the studio teacher. Part 2 includes program notes or background information for any two of the pieces listed in Part 1. The notes should be approximately 500 words each and must contain at least three recognized references, such as Baker’s and New Grove. Any online resource must be documented and recognized as appropriate and authoritative. Part 3 is to consist of one of the following:

1. A discussion of a third piece from the submitted lists or one movement of a multi-movement piece from the lists: The length of the piece or movement being discussed should be no less than 8-10 minutes. This discussion must form a paper of no less than 2,000 words. Topics may include (but are not limited to) historical perspectives, performance and performance practice issues, instrumental technical issues, the importance or role of the piece in the literature for the student’s instrument, etc. This discussion must be presented as a formal paper with supporting information, including resources, charts, and the like.
   OR
2. A theoretical analysis of one of the listed pieces or one movement of a multi-movement piece from the lists: The length of the piece or movement being analyzed should be no less than 8-10 minutes. This analysis should address form, basic harmonic events, large-scale phrasing, performance practice issues, etc., as outlined in a rubric provided by the department.

The written project must be submitted to the Department of Instrumental Studies no later than November 1 for an anticipated December graduation or April 1 for an anticipated May graduation. Documents are distributed among the departmental faculty for review and a grade of either “pass” or “fail.” A passing grade from a majority (and no fewer than two) of the department’s graduate faculty members is required. Students who do not pass are told what needs to be fixed (content, grammar, etc.) and, using whatever resources they have (e.g., the University’s Writing Center), prepare and submit a revision that receives a passing grade. In order for a student to graduate on schedule, any revision that is required must receive a passing grade before the deadline by which names must be submitted for graduation.

Public Recital:
Performance majors present a public recital as the culminating event for the master’s degree (MUSC 8984). Graduation recitals are typically one hour in length; presented on-campus in either Rock Hall or Klein Recital Hall; and adjudicated by two full-time music faculty members. The student must show evidence through Temple University transcript records of having taken private lessons up to the time of the graduation recital. Students who wish to play a recital in the early Fall should plan to register for and complete the final term of lessons during the preceding Summer months.

A Recital Permission Form indicating the private teacher’s approval for performance of the graduation recital must be signed by the private teacher and submitted six weeks prior to the recital. (If the recital is in the first five weeks of the Spring term, the form must be submitted two weeks before the end of the Fall term.) If required by the private teacher, a Recital Permission Jury must be scheduled at least four weeks prior to the recital. If the form is not submitted or a required jury is not scheduled, the department reserves the right to cancel or postpone the recital.

Admission Requirements and Deadlines

Application Deadline:

Fall: March 1
Spring: November 1

Applications are processed as they arrive. Late applications may be considered for admission.

APPLY ONLINE to this graduate program.

Letters of Reference:
Number Required: 2

From Whom: Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents, and aptitude for graduate study.

Coursework Required for Admission Consideration: All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours.

Bachelor's Degree in Discipline/Related Discipline: A degree in Music is expected.

Statement of Goals: Include your special interests within the discipline and expectations for the program.

Standardized Test Scores:
TOEFL: 75 iBT or 537 PBT minimum

Audition: See www.temple.edu/boyer for audition repertoire requirements.

Resume: Current resume required.

Transfer Credit: A student who wishes to transfer credit should speak with her/his academic advisor and obtain a "Request for Transfer of Graduate Credit" form, found in TPortal under the Tools tab within "University Forms." Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

Other: Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This Policy may preclude the admission of any student who meets the minimum requirements.

Electives ² 2 8

Total Credit Hours 30

¹ M.M. candidates must be available for ensemble assignments, which are determined by the department chair and may exceed curricular requirements.

² Select from Music, Music Education, Music Studies, or other graduate departments. At least 3 credits must be in academic, non-performance coursework. Advisor approval required.

Additional Requirements:

All degree credits are to be earned at Temple University.

Diagnostic Examinations:

All entering Master of Music students are required to take Diagnostic Examinations in Harmony, Counterpoint, Aural Skills, and Music History prior to the first term of graduate study. The purpose of these examinations is to ascertain adequate preparation for graduate study in these areas. Examinations in Harmony, Counterpoint, and Aural Skills may be taken once. The examination in Music History may be taken a second time.

Students who are unable to take the examinations at the designated time may do so using the online proctoring service, Examity® (https://examity.com). Students are responsible for all fees.

Students who opt not to take any or all exams prior to the first semester of study are required to complete remedial coursework within the first academic year.

Depending on the examination results, students may be required to take one or more remedial courses. Remedial courses are graded on a "Credit / No Credit" basis, and the official university transcript will indicate "CR" (for "Credit," meaning that the deficiency has been satisfied) or "NC" (for "No Credit," meaning that the deficiency has not been satisfied). Students must have a "B-" or better average in any remedial course or section to earn the grade of "Credit" and to satisfy the requirement. Students who earn a grade of "NC" (that is, having a class average below "B-") must retake that course or section until an average of "B-" or higher is achieved and a grade of "CR" is recorded on the official university transcript. Remedial courses do not count toward graduate degree requirements.

It is highly recommended that students complete all remediation coursework during their first academic year of study. An exception may be granted for part-time students. Master of Music students may neither schedule graduation recitals nor take final comprehensive master's examinations until all of the diagnostic examinations and any required remediation have been successfully completed.

A. Diagnostic Examinations in Music Theory, including Harmony, Counterpoint, and Aural Skills

Students may take each portion of the theory test only once. Any section not graded as passing necessitates enrollment in a remedial course(s) during the first term of study. Examiners stipulate which section(s) of remedial coursework are required. Theory remedial courses include:

<table>
<thead>
<tr>

<tr>
<td>MUST 5004</td>
<td>Grad Aural Theory Review</td>
<td>3</td>
</tr>
</tbody>
</table>

B. Diagnostic Examination in Music History

Students may take each of the five sections of the history test twice. After the second attempt, any section not graded as passing necessitates enrollment in a remedial course(s). Examiners stipulate which section(s) of remedial coursework are required.

The History remedial course is MUST 5005 Remedial Studies in Music History. Each of five sections are enrolled in for one credit and are subtitled according to the period covered in the coursework: Baroque, Classic, Medieval/Renaissance, Romantic, and Twentieth Century. Remediation can be extended over two terms.

C. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

• matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
• received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

Professional Development Policy:

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and
Performing Ensembles:

1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.

2. Participation: Master's degree candidates in wind, brass, and percussion instruments must be available for ensemble assignments at the discretion of the department chair, including participation beyond curricular requirements.

3. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair, and the Associate Dean.

Independent Study Courses:
Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval will be granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects will be granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

Acceptable English:
All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

Graduate Private Lesson Policy:
Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A $250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

Private applied lessons beyond the four-term requirement currently in effect for graduate performance students may be extended with the permission of the jury, department chair, and the Associate Dean or Dean of the Boyer College of Music and Dance.

Recital Extension:
Students withdrawing from the recital requirement during the recital term will receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course will be offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course will be replaced by a letter grade and MUSC 5000 Recital Extension will be issued a grade of "CR." Credit derived from Recital Extension will not be counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study will be the cost of 2 graduate credits plus a $400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.

2. Exceptions to Recital Extension:
   a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
   b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, if the student does not take Recital Extension during the Summer, s/he may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.

3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension will be reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, will determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

Incompletes:
All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

Culminating Events:
Comprehensive Final Project:
Students must maintain a list of all literature, including solos, etudes, and excerpts, performed each term in lessons, using a printed form provided by the department. During the final term of study, students are required to submit a three-part written project. Part 1 includes lists of music studied/perform ed in all four terms of lessons; the lists must be signed by the studio teacher. Part 2 includes program notes or background information for any two of the pieces listed in Part 1. The notes should be approximately 500 words each and must contain at least three recognized references, such as Baker’s and New Grove. Any online resource must be documented and recognized as appropriate and authoritative. Part 3 is to consist of one of the following:

1. A discussion of a third piece from the submitted lists or one movement of a multi-movement piece from the lists: The length of the piece or movement being discussed should be no less than 8-10 minutes. This discussion must form a paper of no less than 2,000 words. Topics may include (but are not limited to) historical perspectives, performance and performance practice issues, instrumental technical issues, the importance or role of the piece in the literature for the student’s instrument, etc. This discussion must be presented as a formal paper with supporting information, including resources, charts, and the like. OR

2. A theoretical analysis of one of the listed pieces or one movement of a multi-movement piece from the lists: The length of the piece or movement being analyzed should be no less than 8-10 minutes. This analysis should address form, basic harmonic events, large-scale
Performance major present a public recital as the culminating event for the master's degree (MUSC 8984). Graduation recitals are typically one hour in length; presented on-campus in either Rock Hall or Klein Recital Hall; and adjudicated by two full-time music faculty members. The student must show evidence through Temple University transcript records of having taken private lessons up to the time of the graduation recital. Students who wish to play a recital in the early Fall should plan to register for and complete the final term of lessons during the preceding Summer months.

A Recital Permission Form indicating the private teacher's approval for performance of the graduation recital must be signed by the private teacher and submitted six weeks prior to the recital. (If the recital is in the first five weeks of the Spring term, the form must be submitted two weeks before the end of the Fall term.) If required by the private teacher, a Recital Permission Jury must be scheduled at least four weeks prior to the recital. If the form is not submitted or a required jury is not scheduled, the department reserves the right to cancel or postpone the recital.

A written project must be submitted to the Department of Instrumental Studies no later than November 1 for an anticipated December graduation or April 1 for an anticipated May graduation. Documents are distributed among the departmental faculty for review and a grade of either "pass" or "fail." A passing grade from a majority (and no fewer than two) of the department's graduate faculty members is required. Students who do not pass are told what needs to be fixed (content, grammar, etc.) and, using whatever resources they have (e.g., the University's Writing Center), prepare and submit a revision that receives a passing grade. In order for a student to graduate on schedule, any revision that is required must receive a passing grade before the deadline by which names must be submitted for graduation.

### Music Performance/Classical Guitar, M.M.

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE (http://www.temple.edu/boyer)

### About the Program

The master's degree in Classical Guitar Performance develops expertise beyond baccalaureate-level achievement. Students specialize in the study of the major instrument and take courses outside the major area that support advanced musical and academic development. The Department of Instrumental Studies provides the potential professional performer and/or teacher with the finest instrumental training within the context of a comprehensive university. Students study privately with professional artist-teachers and enjoy opportunities for performance in numerous large and chamber music ensembles.

**Time Limit for Degree Completion:** 6 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree can be completed on a full- or part-time basis.

**Interdisciplinary Study:** With approval of the major advisor, students may elect to take up to 6 graduate credits outside the field of music.

**Accreditation:** This degree program is accredited by the National Association of Schools of Music (NASM).

**Areas of Specialization:** Study focuses on performance of the major instrument, the solo and ensemble literature of the instrument, and academic support areas in music.

**Job Prospects:** The program prepares musicians for either professional activity or doctoral study.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in selected courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

**Financing Opportunities:** Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance, and/or direct service related to academic programs. Applicants must submit an assistantship/internship application by March 1 to obtain priority consideration for an award. Applications are available online at the Graduate Financial Aid (http://www.temple.edu/boyer/admissions/documents/gradassistantshipform.pdf) page of Boyer's website. Typically these awards are made only in the Fall term for up to two terms: Fall and
Admission Requirements and Deadlines

**Application Deadline:**

Fall: March 1  
Spring: November 1

Applications are processed as they arrive. Late applications may be considered for admission.

**APPLY ONLINE to this graduate program.**

**Letters of Reference:**

Number Required: 2

From Whom: Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents, and aptitude for graduate study.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours.

**Bachelor's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Statement of Goals:** Include your special interests within the discipline and expectations for the program.

**Standardized Test Scores:**

TOEFL: 75 iBT or 537 PBT minimum

**Audition:** See www.temple.edu/boyer for audition repertoire requirements.

**Resume:** Current resume required.

**Transfer Credit:** A student who wishes to transfer credit should speak with her/his academic advisor and obtain a “Request for Transfer of Graduate Credit” form, found in TUportal under the Tools tab within “University Forms.” Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This Policy may preclude the admission of any student who meets the minimum requirements.

B. Diagnostic Examination in Music History

Students may take each of the five sections of the history test twice. After the second attempt, any section not graded as passing necessitates enrollment in a remedial course(s) during the first term of study. Examiners stipulate which section(s) of remedial coursework are required. Theory remedial courses include:

The History remedial course is MUST 5005 Remedial Studies in Music History. Each of five sections are enrolled in for one credit and are subtitled according to the period covered in the coursework: Baroque, Classic, Medieval/Renaissance, Romantic, and Twentieth Century. Remediation can be extended over two terms.

C. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
- received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

Professional Development Policy:

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

Performing Ensembles:

1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.

2. Participation: Master's degree candidates in wind, brass, and percussion instruments must be available for ensemble assignments at the discretion of the department chair, including participation beyond curricular requirements.

3. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair, and the Associate Dean.

Independent Study Courses:

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval will be granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects will be granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

Acceptable English:

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double major standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

Graduate Private Lesson Policy:

Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programatically required graduate-level study are taken simultaneously. A $250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

Private applied lessons beyond the four-term requirement currently in effect for graduate performance students may be extended with the permission of the jury, department chair, and the Associate Dean or Dean of the Boyer College of Music and Dance.

Recital Extension:

Students withdrawing from the recital requirement during the recital term will receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course will be offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course
will be replaced by a letter grade and MUSC 5000 Recital Extension will be issued a grade of "CR." Credit derived from Recital Extension will not be counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study will be the cost of 2 graduate credits plus a $400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.

2. Exceptions to Recital Extension:
   a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
   b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, if the student does not take Recital Extension during the Summer, s/he may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.

3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension will be reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, will determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

Incomplete:
All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

Culminating Events:
Comprehensive Final Project:
Students must maintain a list of all literature, including solos, etudes, and excerpts, performed each term in lessons, using a printed form provided by the department. During the final term of study, students are required to submit a three-part written project. Part 1 includes lists of music studied/perform in all four terms of lessons; the lists must be signed by the studio teacher. Part 2 includes program notes or background information for any two of the pieces listed in Part 1. The notes should be approximately 500 words each and must contain at least three recognized references, such as Baker's and New Grove. Any online resource must be documented and recognized as appropriate and authoritative. Part 3 is to consist of one of the following:

1. A discussion of a third piece from the submitted lists or one movement of a multi-movement piece from the lists: The length of the piece or movement being discussed should be no less than 8-10 minutes. This discussion must form a paper of no less than 2,000 words. Topics may include (but are not limited to) historical perspectives, performance and performance practice issues, instrumental technical issues, the importance or role of the piece in the literature for the student's instrument, etc. This discussion must be presented as a formal paper with supporting information, including resources, charts, and the like.

OR

2. A theoretical analysis of one of the listed pieces or one movement of a multi-movement piece from the lists: The length of the piece or movement being analyzed should be no less than 8-10 minutes. This analysis should address form, basic harmonic events, large-scale phrasing, performance practice issues, etc., as outlined in a rubric provided by the department.

The written project must be submitted to the Department of Instrumental Studies no later than November 1 for an anticipated December graduation or April 1 for an anticipated May graduation. Documents are distributed among the departmental faculty for review and a grade of either "pass" or "fail." A passing grade from a majority (and no fewer than two) of the department’s graduate faculty members is required. Students who do not pass are told what needs to be fixed (content, grammar, etc.) and, using whatever resources they have (e.g., the University's Writing Center), prepare and submit a revision that receives a passing grade. In order for a student to graduate on schedule, any revision that is required must receive a passing grade before the deadline by which names must be submitted for graduation.

Public Recital:
Performance majors present a public recital as the culminating event for the master's degree (MUSC 8984). Graduation recitals are typically one hour in length; presented on-campus in either Rock Hall or Klein Recital Hall; and adjudicated by two full-time music faculty members. The student must show evidence through Temple University transcript records of having taken private lessons up to the time of the graduation recital. Students who wish to play a recital in the early Fall should plan to register for and complete the final term of lessons during the preceding Summer months.

A Recital Permission Form indicating the private teacher's approval for performance of the graduation recital must be signed by the private teacher and submitted six weeks prior to the recital. (If the recital is in the first five weeks of the Spring term, the form must be submitted two weeks before the end of the Fall term.) If required by the private teacher, a Recital Permission Jury must be scheduled at least four weeks prior to the recital. If the form is not submitted or a required jury is not scheduled, the department reserves the right to cancel or postpone the recital.

Program Coordinator:
About the Program

The master's degree in Double Bass Performance develops expertise beyond baccalaureate-level achievement. Students specialize in the study of the major instrument and take courses outside the major area that support advanced musical and academic development. The Department of Instrumental Studies provides the potential professional performer and/or teacher with the finest instrumental training within the context of a comprehensive university. Students study privately with professional artist-teachers and enjoy opportunities for performance in numerous large and chamber music ensembles.

Time Limit for Degree Completion: 6 years

Campus Location: Main

Full-Time/Part-Time Status: The degree program can be completed on a full- or part-time basis.

Interdisciplinary Study: With approval of the major advisor, students may elect to take up to 6 graduate credits outside the field of music.

Accreditation: This degree program is accredited by the National Association of Schools of Music (NASM).

Areas of Specialization: Study focuses on performance of the major instrument, the solo and ensemble literature of the instrument, and academic support areas in music.

Job Prospects: The program prepares musicians for either professional activity or doctoral study.

Non-Matriculated Student Policy: Non-matriculated students may enroll in selected courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

Financing Opportunities: Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance, and/or direct service related to academic programs. Applicants must submit an assistantship/internship application by March 1 to obtain priority consideration for an award. Applications are available online at the Graduate Financial Aid (http://www.temple.edu/boyer/admissions/documents/gradassistantshipform.pdf) page of Boyer's website. Typically these awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

Admission Requirements and Deadlines

Application Deadline:

Fall: March 1
Spring: November 1

Applications are processed as they arrive. Late applications may be considered for admission.

APPLY ONLINE to this graduate program.

Letters of Reference:

Number Required: 2

From Whom: Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents, and aptitude for graduate study.

Coursework Required for Admission Consideration: All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours.

Bachelor's Degree in Discipline/Related Discipline: A degree in Music is expected.

Statement of Goals: Include your special interests within the discipline and expectations for the program.

Standardized Test Scores:

TOEFL: 75 iBT or 537 PBT minimum

Audition: See www.temple.edu/boyer for audition repertoire requirements.

Resume: Current resume required.

Transfer Credit: A student who wishes to transfer credit should speak with her/his academic advisor and obtain a "Request for Transfer of Graduate Credit" form, found in TUportal under the Tools tab within "University Forms." Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

Other: Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This Policy may preclude the admission of any student who meets the minimum requirements.
### Program Requirements

#### General Program Requirements:
*Number of Didactic Credits Required Beyond the Baccalaureate: 32*

**Required Courses:**

<table>
<thead>

1. M.M. candidates must be available for ensemble assignments, which are determined by the department chair and may exceed curricular requirements.

2. Select from Music, Music Education, Music Studies, or other graduate departments. At least 3 credits must be in academic, non-performance coursework. No more than 2 additional credits of MUSC 8555 Orchestral Repertoire can be taken as an elective. Advisor approval required.

#### Additional Requirements:

All degree credits are to be earned at Temple University.

**Diagnostic Examinations:**

All entering Master of Music students are required to take Diagnostic Examinations in Harmony, Counterpoint, Aural Skills, and Music History prior to the first term of graduate study. The purpose of these examinations is to ascertain adequate preparation for graduate study in these areas. Examinations in Harmony, Counterpoint, and Aural Skills may be taken once. The examination in Music History may be taken a second time.

Students who are unable to take the examinations at the designated time may do so using the online proctoring service, Examity® (https://examity.com). Students are responsible for all fees.

Students who opt not to take any or all exams prior to the first semester of study are required to complete remedial coursework within the first academic year.

Depending on the examination results, students may be required to take one or more remedial courses. Remedial courses are graded on a "Credit / No Credit" basis, and the official university transcript will indicate "CR" (for "Credit," meaning that the deficiency has been satisfied) or "NC" (for "No Credit," meaning that the deficiency has not been satisfied). Students must have a "B-" or better average in any remedial course or section to earn the grade of "Credit" and to satisfy the requirement. Students who earn a grade of "NC" (that is, having a class average below "B-") must retake that course or section until an average of "B-" or higher is achieved and a grade of "CR" is recorded on the official university transcript. Remedial courses do not count toward graduate degree requirements.

It is highly recommended that students complete all remediation coursework during their first academic year of study. An exception may be granted for part-time students. Master of Music students may neither schedule graduation recitals nor take final comprehensive master's examinations until all of the diagnostic examinations and any required remediation have been successfully completed.

A. **Diagnostic Examinations in Music Theory, including Harmony, Counterpoint, and Aural Skills**

Students may take each portion of the theory test only once. Any section not graded as passing necessitates enrollment in a remedial course(s) during the first term of study. Examiners stipulate which section(s) of remedial coursework are required. Theory remedial courses include:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MUST 5001</td>
<td>Diatonic Harm. Review</td>
<td>1</td>
</tr>
<tr>
<td>MUST 5002</td>
<td>Chromatic Harm. Review</td>
<td>1</td>
</tr>
<tr>
<td>MUST 5003</td>
<td>Counterpoint Review</td>
<td>1</td>
</tr>
<tr>
<td>MUST 5004</td>
<td>Grad Aural Theory Review</td>
<td>3</td>
</tr>
</tbody>
</table>

B. **Diagnostic Examination in Music History**

Students may take each of the five sections of the history test twice. After the second attempt, any section not graded as passing necessitates enrollment in a remedial course(s). Examiners stipulate which section(s) of remedial coursework are required.

The History remedial course is MUST 5005 Remedial Studies in Music History. Each of five sections are enrolled in for one credit and are subtitled according to the period covered in the coursework: Baroque, Classic, Medieval/Renaissance, Romantic, and Twentieth Century. Remediation can be extended over two terms.

C. **Conditions for Exemption from Diagnostic Examinations**

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
- received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

**Professional Development Policy:**

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

**Performing Ensembles:**
1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.

2. Participation: Master’s degree candidates in wind, brass, and percussion instruments must be available for ensemble assignments at the discretion of the department chair, including participation beyond curricular requirements.

3. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair, and the Associate Dean.

University Orchestra:

At the master’s degree level, all bowed string majors must perform in the University Orchestra each term they receive lessons.

Independent Study Courses:

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students’ major advisor, and the Associate Dean. Approval will be granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects will be granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student’s curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

Acceptable English:

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College’s statement on plagiarism and academic honesty.

Graduate Private Lesson Policy:

Weekly one-hour private lessons are provided for all matriculated master’s and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A $250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

Private applied lessons beyond the four-term requirement currently in effect for graduate performance studies may be extended with the permission of the jury, department chair, and the Associate Dean or Dean of the Boyer College of Music and Dance.

Recital Extension:

Students withdrawing from the recital requirement during the recital term will receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course will be offered on a “Credit/No Credit” basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course will be replaced by a letter grade and MUSC 5000 Recital Extension will be issued a grade of “CR.” Credit derived from Recital Extension will not be counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study will be the cost of 2 graduate credits plus a $400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.

2. Exceptions to Recital Extension:
   a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
   b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, if the student does not take Recital Extension during the Summer, s/he may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.

3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension will be reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, will determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

Incomplete:

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

Culminating Events:

Comprehensive Final Project:

Students must maintain a list of all literature, including solos, etudes, and excerpts, performed each term in lessons, using a printed form provided by the department. During the final term of study, students are required to submit a three-part written project. Part 1 includes lists of music studied/ performed in all four terms of lessons; the lists must be signed by the studio teacher. Part 2 includes program notes or background information for any two of the pieces listed in Part 1. The notes should be approximately 500 words each and must contain at least three recognized references, such as Baker’s and New Grove. Any online resource must be documented and recognized as appropriate and authoritative. Part 3 is to consist of one of the following:

1. A discussion of a third piece from the submitted lists or one movement of a multi-movement piece from the lists: The length of the piece or movement being discussed should be no less than 8-10 minutes. This discussion must form a paper of no less than 2,000 words. Topics may include (but are not limited to) historical perspectives, performance and performance practice issues, instrumental technical issues, the importance or role of the piece in the literature for the student’s instrument, etc. This discussion must be presented as a formal paper with supporting information, including resources, charts, and the like.

OR

2. A theoretical analysis of one of the listed pieces or one movement of a multi-movement piece from the lists: The length of the piece or movement being analyzed should be no less than 8-10 minutes. This analysis should address form, basic harmonic events, large-scale phrasing, performance practice issues, etc., as outlined in a rubric provided by the department.
The written project must be submitted to the Department of Instrumental Studies no later than November 1 for an anticipated December graduation or April 1 for an anticipated May graduation. Documents are distributed among the departmental faculty for review and a grade of either "pass" or "fail." A passing grade from a majority (and no fewer than two) of the department's graduate faculty members is required. Students who do not pass are told what needs to be fixed (content, grammar, etc.) and, using whatever resources they have (e.g., the University's Writing Center), prepare and submit a revision that receives a passing grade. In order for a student to graduate on schedule, any revision that is required must receive a passing grade before the deadline by which names must be submitted for graduation.

Public Recital:
Performance majors present a public recital as the culminating event for the master's degree (MUSC 8984). Graduation recitals are typically one hour in length; presented on-campus in either Rock Hall or Klein Recital Hall; and adjudicated by two full-time music faculty members. The student must show evidence through Temple University transcript records of having taken private lessons up to the time of the graduation recital. Students who wish to play a recital in the early Fall should plan to register for and complete the final term of lessons during the preceding Summer months.

A Recital Permission Form indicating the private teacher's approval for performance of the graduation recital must be signed by the private teacher and submitted six weeks prior to the recital. (If the recital is in the first five weeks of the Spring term, the form must be submitted two weeks before the end of the Fall term.) If required by the private teacher, a Recital Permission Jury must be scheduled at least four weeks prior to the recital. If the form is not submitted or a required jury is not scheduled, the department reserves the right to cancel or postpone the recital.

B. Diagnostic Examination in Music History

Students may take each of the five sections of the history test twice. After the second attempt, any section not graded as passing necessitates enrollment in a remedial course(s). Examiners stipulate which section(s) of remedial coursework are required.

The History remedial course is MUST 5005 Remedial Studies in Music History. Each of five sections is enrolled in for one credit and are subtitled according to the period covered in the coursework: Baroque, Classic, Medieval/Renaissance, Romantic, and Twentieth Century. Remediation can be extended over two terms.

C. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
- received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

Professional Development Policy:

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give students a broader perspective and provide them with opportunities to develop skills that are not part of their formal academic curriculum.

Performing Ensembles:

1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after or during the recital term. Students must arrange their schedules to accommodate this requirement.

2. Participation: Master's degree candidates in wind, brass, and percussion instruments must be available for ensemble assignments at the discretion of the department chair, including participation beyond curricular requirements.

3. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair, and the Associate Dean.

Independent Study Courses:

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval will be granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects will be granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

Acceptable English:

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

Graduate Private Lesson Policy:

Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programatically required graduate-level study are taken simultaneously. A $250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

Private applied lessons beyond the four-term requirement currently in effect for graduate performance students may be extended with the permission of the jury, department chair, and the Associate Dean or Dean of the Boyer College of Music and Dance.

Recital Extension:

Students withdrawing from the recital requirement during the recital term will receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course will be offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course would be changed to "Credit."
will be replaced by a letter grade and MUSC 5000 Recital Extension will be issued a grade of "CR." Credit derived from Recital Extension will not be counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study will be the cost of 2 graduate credits plus a $400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.

2. Exceptions to Recital Extension:
   a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
   b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, if the student does not take Recital Extension during the Summer, s/he may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.

3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension will be reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, will determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

Incompletes:
All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

Culminating Events:
Comprehensive Final Project:
Students must maintain a list of all literature, including solos, etudes, and excerpts, performed each term in lessons, using a printed form provided by the department. During the final term of study, students are required to submit a three-part written project. Part 1 includes lists of music studied/performing in all four terms of lessons; the lists must be signed by the studio teacher. Part 2 includes program notes or background information for any two of the pieces listed in Part 1. The notes should be approximately 500 words each and must contain at least three recognized references, such as Baker's and New Grove. Any online resource must be documented and recognized as appropriate and authoritative. Part 3 is to consist of one of the following:

1. A discussion of a third piece from the submitted lists or one movement of a multi-movement piece from the lists: The length of the piece or movement being discussed should be no less than 8-10 minutes. This discussion must form a paper of no less than 2,000 words. Topics may include (but are not limited to) historical perspectives, performance and performance practice issues, instrumental technical issues, the importance or role of the piece in the literature for the student's instrument, etc. This discussion must be presented as a formal paper with supporting information, including resources, charts, and the like.

OR

2. A theoretical analysis of one of the listed pieces or one movement of a multi-movement piece from the lists: The length of the piece or movement being analyzed should be no less than 8-10 minutes. This analysis should address form, basic harmonic events, large-scale phrasing, performance practice issues, etc., as outlined in a rubric provided by the department.

The written project must be submitted to the Department of Instrumental Studies no later than November 1 for an anticipated December graduation or April 1 for an anticipated May graduation. Documents are distributed among the departmental faculty for review and a grade of either "pass" or "fail." A passing grade from a majority (and no fewer than two) of the department's graduate faculty members is required. Students who do not pass are told what needs to be fixed (content, grammar, etc.) and, using whatever resources they have (e.g., the University's Writing Center), prepare and submit a revision that receives a passing grade. In order for a student to graduate on schedule, any revision that is required must receive a passing grade before the deadline by which names must be submitted for graduation.

Public Recital:
Performance majors present a public recital as the culminating event for the master's degree (MUSC 8984). Graduation recitals are typically one hour in length; presented on-campus in either Rock Hall or Klein Recital Hall; and adjudicated by three full-time music faculty members. The student must show evidence through Temple University transcript records of having taken private lessons up to the time of the graduation recital. Students who wish to play a recital in the early Fall should plan to register for and complete the final term of lessons during the preceding Summer months.

A Recital Permission Form indicating the private teacher's approval for performance of the graduation recital must be signed by the private teacher and submitted six weeks prior to the recital. (If the recital is in the first five weeks of the Spring term, the form must be submitted two weeks before the end of the Fall term.) If required by the private teacher, a Recital Permission Jury must be scheduled at least four weeks prior to the recital. If the form is not submitted or a required jury is not scheduled, the department reserves the right to cancel or postpone the recital.

Program Coordinator:
About the Program

The master's degree in Flute Performance develops expertise beyond baccalaureate-level achievement. Students specialize in the study of the major instrument and take courses outside the major area that support advanced musical and academic development. The Department of Instrumental Studies provides the potential professional performer and/or teacher with the finest instrumental training within the context of a comprehensive university. Students study privately with professional artist-teachers and enjoy opportunities for performance in numerous large and chamber music ensembles.

Time Limit for Degree Completion: 6 years

Accreditation: This degree program is accredited by the National Association of Schools of Music (NASM).

Areas of Specialization: Study focuses on performance of the major instrument, the solo and ensemble literature of the instrument, and academic support areas in music.

Job Prospects: The program prepares musicians for either professional activity or doctoral study.

Non-Matriculated Student Policy: Non-matriculated students may enroll in selected courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

Financing Opportunities: Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance, and/or direct service related to academic programs. Applicants must submit an assistantship/internship application by March 1 to obtain priority consideration for an award. Applications are available online at the Graduate Financial Aid (http://www.temple.edu/boyer/admissions/documents/gradassistantshipform.pdf) page of Boyer's website. Typically these awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

Admission Requirements and Deadlines

Application Deadline:

Fall: March 1
Spring: November 1

Applications are processed as they arrive. Late applications may be considered for admission.

APPLY ONLINE to this graduate program.

Letters of Reference:
Number Required: 2

From Whom: Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents, and aptitude for graduate study.

Coursework Required for Admission Consideration: All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours.

Bachelor's Degree in Discipline/Related Discipline: A degree in Music is expected.

Statement of Goals: Include your special interests within the discipline and expectations for the program.

Standardized Test Scores:
TOEFL: 75 iBT or 537 PBT minimum

Audition: See www.temple.edu/boyer for audition repertoire requirements.

Resume: Current resume required.

Transfer Credit: A student who wishes to transfer credit should speak with her/his academic advisor and obtain a "Request for Transfer of Graduate Credit" form, found in TUportal under the Tools tab within “University Forms.” Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

Other: Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College’s Optimum Enrollment Policy. This Policy may preclude the admission of any student who meets the minimum requirements.

Total Credit Hours: 30

¹ M.M. candidates must be available for ensemble assignments, which are determined by the department chair and may exceed curricular requirements.
² Select from Music, Music Education, Music Studies, or other graduate departments. At least 3 credits must be in academic, non-performance coursework. Advisor approval required.

Additional Requirements:

All degree credits are to be earned at Temple University.

Diagnostic Examinations:

All entering Master of Music students are required to take Diagnostic Examinations in Harmony, Counterpoint, Aural Skills, and Music History prior to the first term of graduate study. The purpose of these examinations is to ascertain adequate preparation for graduate study in these areas. Examinations in Harmony, Counterpoint, and Aural Skills may be taken once. The examination in Music History may be taken a second time.

Students who are unable to take the examinations at the designated time may do so using the online proctoring service, Examity® (https://examity.com). Students are responsible for all fees.

Students who opt not to take any or all exams prior to the first semester of study are required to complete remedial coursework within the first academic year.

Depending on the examination results, students may be required to take one or more remedial courses. Remedial courses are graded on a "Credit / No Credit" basis, and the official university transcript will indicate "CR" (for "Credit," meaning that the deficiency has been satisfied) or "NC" (for "No Credit," meaning that the deficiency has not been satisfied). Students must have a "B-" or better average in any remedial course or section to earn the grade of "Credit" and to satisfy the requirement. Students who earn a grade of "NC" (that is, having a class average below "B-") must retake that course or section until an average of "B-" or higher is achieved and a grade of "CR" is recorded on the official university transcript. Remedial courses do not count toward graduate degree requirements.

It is highly recommended that students complete all remediation coursework during their first academic year of study. An exception may be granted for part-time students. Master of Music students may neither schedule graduation recitals nor take final comprehensive master's examinations until all of the diagnostic examinations and any required remediation have been successfully completed.

A. Diagnostic Examinations in Music Theory, including Harmony, Counterpoint, and Aural Skills

Students may take each portion of the theory test only once. Any section not graded as passing necessitates enrollment in a remedial course(s) during the first term of study. Examiners stipulate which section(s) of remedial coursework are required. Theory remedial courses include:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MUST 5001</td>
<td>Diatonic Harm. Review</td>
<td>1</td>
</tr>
<tr>
<td>MUST 5002</td>
<td>Chromatic Harm. Review</td>
<td>1</td>
</tr>
<tr>
<td>MUST 5003</td>
<td>Counterpoint Review</td>
<td>1</td>
</tr>
<tr>
<td>MUST 5004</td>
<td>Grad Aural Theory Review</td>
<td>3</td>
</tr>
</tbody>
</table>

B. Diagnostic Examination in Music History

Students may take each of the five sections of the history test twice. After the second attempt, any section not graded as passing necessitates enrollment in a remedial course(s). Examiners stipulate which section(s) of remedial coursework are required.

The History remedial course is MUST 5005 Remedial Studies in Music History. Each of five sections are enrolled in for one credit and are subtitled according to the period covered in the coursework: Baroque, Classic, Medieval/Renaissance, Romantic, and Twentieth Century. Remediation can be extended over two terms.

C. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
- received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

Professional Development Policy:

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and
open house events; supervising performance classes; and engaging in other academic activities.

**Performing Ensembles:**

1. **Touring:** All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.

2. **Participation:** Master’s degree candidates in wind, brass, and percussion instruments must be available for ensemble assignments at the discretion of the department chair, including participation beyond curricular requirements.

3. **Non-Credit Participation:** With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair, and the Associate Dean.

**Independent Study Courses:**

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students’ major advisor, and the Associate Dean. Approval will be granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects will be granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student’s curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

**Acceptable English:**

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College’s statement on plagiarism and academic honesty.

**Graduate Private Lesson Policy:**

Weekly one-hour private lessons are provided for all matriculated master’s and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A $250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

Private applied lessons beyond the four-term requirement currently in effect for graduate performance students may be extended with the permission of the jury, department chair, and the Associate Dean or Dean of the Boyer College of Music and Dance.

**Recital Extension:**

Students withdrawing from the recital requirement during the recital term will receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course will be offered on a “Credit/No Credit” basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course will be replaced by a letter grade and MUSC 5000 Recital Extension will be issued a grade of “CR.” Credit derived from Recital Extension will not be counted toward degree requirements.

1. **Recital Extension Fees:** Tuition for these additional terms of private study will be the cost of 2 graduate credits plus a $400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.

2. **Exceptions to Recital Extension:**
   a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
   b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, if the student does not take Recital Extension during the Summer, s/he may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.

3. **Failure to Present Recital:** The degree status of students who are unable to present a recital after one term of Recital Extension will be reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, will determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

**Incompletes:**

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

**Culminating Events:**

**Comprehensive Final Project:**

Students must maintain a list of all literature, including solos, etudes, and excerpts, performed each term in lessons, using a printed form provided by the department. During the final term of study, students are required to submit a three-part written project. Part 1 includes lists of music studied/Performed in all four terms of lessons; the lists must be signed by the studio teacher. Part 2 includes program notes or background information for any two of the pieces listed in Part 1. The notes should be approximately 500 words each and must contain at least three recognized references, such as Baker’s and New Grove. Any online resource must be documented and recognized as appropriate and authoritative. Part 3 is to consist of one of the following:

1. A discussion of a third piece from the submitted lists or one movement of a multi-movement piece from the lists: The length of the piece or movement being discussed should be no less than 8-10 minutes. This discussion must form a paper of no less than 2,000 words. Topics may include (but are not limited to) historical perspectives, performance and performance practice issues, instrumental technical issues, the importance or role of the piece in the literature for the student’s instrument, etc. This discussion must be presented as a formal paper with supporting information, including resources, charts, and the like.

   OR

2. A theoretical analysis of one of the listed pieces or one movement of a multi-movement piece from the lists: The length of the piece or movement being analyzed should be no less than 8-10 minutes. This analysis should address form, basic harmonic events, large-scale
...phrasing, performance practice issues, etc., as outlined in a rubric provided by the department.

The written project must be submitted to the Department of Instrumental Studies no later than November 1 for an anticipated December graduation or April 1 for an anticipated May graduation. Documents are distributed among the departmental faculty for review and a grade of either “pass” or “fail.” A passing grade from a majority (and no fewer than two) of the department’s graduate faculty members is required. Students who do not pass are told what needs to be fixed (content, grammar, etc.) and, using whatever resources they have (e.g., the University’s Writing Center), prepare and submit a revision that receives a passing grade. In order for a student to graduate on schedule, any revision that is required must receive a passing grade before the deadline by which names must be submitted for graduation.

Public Recital:
Performance majors present a public recital as the culminating event for the master’s degree (MUSC 8984). Graduation recitals are typically one hour in length; presented on-campus in either Rock Hall or Klein Recital Hall; and adjudicated by two full-time music faculty members. The student must show evidence through Temple University transcript records of having taken private lessons up to the time of the graduation recital. Students who wish to play a recital in the early Fall should plan to register for and complete the final term of lessons during the preceding Summer months.

A Recital Permission Form indicating the private teacher’s approval for performance of the graduation recital must be signed by the private teacher and submitted six weeks prior to the recital. (If the recital is in the first five weeks of the Spring term, the form must be submitted two weeks before the end of the Fall term.) If required by the private teacher, a Recital Permission Jury must be scheduled at least four weeks prior to the recital. If the form is not submitted or a required jury is not scheduled, a Recital Permission Jury must be scheduled at least four weeks prior to the recital. If required by the private teacher, the recital. If the form is not submitted or a required jury is not scheduled, the department reserves the right to cancel or postpone the recital.

Music Performance/French Horn, M.M.
Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE (http://www.temple.edu/boyer)

About the Program
The master’s degree in French Horn Performance develops expertise beyond baccalaureate-level achievement. Students specialize in the study of the major instrument and take courses outside the major area that support advanced musical and academic development. The Department of Instrumental Studies provides the potential professional performer and/or teacher with the finest instrumental training within the context of a comprehensive university. Students study privately with professional artist-teachers and enjoy opportunities for performance in numerous large and chamber music ensembles.

Time Limit for Degree Completion: 6 years

Campus Location: Main

Full-Time/Part-Time Status: The degree program can be completed on a full- or part-time basis.

Interdisciplinary Study: With approval of the major advisor, students may elect to take up to 6 graduate credits outside the field of music.

Accreditation: This degree program is accredited by the National Association of Schools of Music (NASM).

Areas of Specialization: Study focuses on performance of the major instrument, the solo and ensemble literature of the instrument, and academic support areas in music.

Job Prospects: The program prepares musicians for either professional activity or doctoral study.

Non-Matriculated Student Policy: Non-matriculated students may enroll in selected courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

Financing Opportunities: Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance, and/or direct service related to academic programs. Applicants must submit an assistantship/internship application by March 1 to obtain priority consideration for an award. Applications are available online at the Graduate Financial Aid (http://www.temple.edu/boyer/admissions/documents/gradassistantshipform.pdf) page of Boyer’s website. Typically these awards are made only in the Fall term for up to two terms: Fall and...
Admission Requirements and Deadlines

Application Deadline:

Fall: March 1
Spring: November 1

Applications are processed as they arrive. Late applications may be considered for admission.

APPLY ONLINE to this graduate program.

Letters of Reference:
Number Required: 2

From Whom: Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents, and aptitude for graduate study.

Coursework Required for Admission Consideration: All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours.

Bachelor's Degree in Discipline/Related Discipline: A degree in Music is expected.

Statement of Goals: Include your special interests within the discipline and expectations for the program.

Standardized Test Scores:
TOEFL: 75 iBT or 537 PBT minimum

Audition: See www.temple.edu/boyer for audition repertoire requirements

Resume: Current resume required.

Transfer Credit: A student who wishes to transfer credit should speak with her/his academic advisor and obtain a “Request for Transfer of Graduate Credit” form, found in TUportal under the Tools tab within “University Forms.” Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

Other: Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College’s Optimum Enrollment Policy. This Policy may preclude the admission of any student who meets the minimum requirements.

1 M.M. candidates must be available for ensemble assignments, which are determined by the department chair and may exceed curricular requirements.

2 Select from Music, Music Education, Music Studies, or other graduate departments. At least 3 credits must be in academic, non-performance coursework. Advisor approval required.

Additional Requirements:

All degree credits are to be earned at Temple University.

Diagnostic Examinations:
All entering Master of Music students are required to take Diagnostic Examinations in Harmony, Counterpoint, Aural Skills, and Music History prior to the first term of graduate study. The purpose of these examinations is to ascertain adequate preparation for graduate study in these areas. Examinations in Harmony, Counterpoint, and Aural Skills may be taken once. The examination in Music History may be taken a second time.

Students who are unable to take the examinations at the designated time may do so using the online proctoring service, Examity® (https://examity.com). Students are responsible for all fees.

Students who opt not to take any or all exams prior to the first semester of study are required to complete remedial coursework within the first academic year.

Depending on the examination results, students may be required to take one or more remedial courses. Remedial courses are graded on a "Credit / No Credit" basis, and the official university transcript will indicate "CR" (for "Credit," meaning that the deficiency has been satisfied) or
“NC” (for “No Credit,” meaning that the deficiency has not been satisfied). Students must have a “B-” or better average in any remedial course or section to earn the grade of “Credit” and to satisfy the requirement. Students who earn a grade of “NC” (that is, having a class average below “B-”) must retake that course or section until an average of “B-” or higher is achieved and a grade of “CR” is recorded on the official university transcript. Remedial courses do not count toward graduate degree requirements.

It is highly recommended that students complete all remediation coursework during their first academic year of study. An exception may be granted for part-time students. Master of Music students may neither schedule graduation recitals nor take final comprehensive master's examinations until all of the diagnostic examinations and any required remediation have been successfully completed.

A. Diagnostic Examinations in Music Theory, including Harmony, Counterpoint, and Aural Skills

Students may take each portion of the theory test only once. Any section not graded as passing necessitates enrollment in a remedial course(s) during the first term of study. Examiners stipulate which section(s) of remedial coursework are required. Theory remedial courses include:

B. Diagnostic Examination in Music History

Students may take each of the five sections of the history test twice. After the second attempt, any section not graded as passing necessitates enrollment in a remedial course(s). Examiners stipulate which section(s) of remedial coursework are required.

The History remedial course is MUST 5005 Remedial Studies in Music History. Each of five sections are enrolled in for one credit and are subtitled according to the period covered in the coursework: Baroque, Classic, Medieval/Renaissance, Romantic, and Twentieth Century. Remediation can be extended over two terms.

C. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
- received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

Professional Development Policy:

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

Performing Ensembles:

1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.

2. Participation: Master's degree candidates in wind, brass, and percussion instruments must be available for ensemble assignments at the discretion of the department chair, including participation beyond curricular requirements.

3. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair, and the Associate Dean.

Independent Study Courses:

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval will be granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects will be granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

Acceptable English:

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

Graduate Private Lesson Policy:

Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A $250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

Private applied lessons beyond the four-term requirement currently in effect for graduate performance students may be extended with the permission of the jury, department chair, and the Associate Dean or Dean of the Boyer College of Music and Dance.

Recital Extension:

Students withdrawing from the recital requirement during the recital term will receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course will be offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course...
Incompletes:
All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

Culminating Events:

Comprehensive Final Project:
Students must maintain a list of all literature, including solos, etudes, and excerpts, performed each term in lessons, using a printed form provided by the department. During the final term of study, students are required to submit a three-part written project. Part 1 includes lists of music studied/performing in all four terms of lessons; the lists must be signed by the studio teacher. Part 2 includes program notes or background information for any two of the pieces listed in Part 1. The notes should be approximately 500 words each and must contain at least three recognized references, such as Baker's and New Grove. Any online resource must be documented and recognized as appropriate and authoritative. Part 3 is to consist of one of the following:

1. A discussion of a third piece from the submitted lists or one movement of a multi-movement piece from the lists: The length of the piece or movement being discussed should be no less than 8-10 minutes. This discussion must form a paper of no less than 2,000 words. Topics may include (but are not limited to) historical perspectives, performance and performance practice issues, instrumental technical issues, the importance or role of the piece in the literature for the student’s instrument, etc. This discussion must be presented as a formal paper with supporting information, including resources, charts, and the like.

OR

2. A theoretical analysis of one of the listed pieces or one movement of a multi-movement piece from the lists: The length of the piece or movement being analyzed should be no less than 8-10 minutes. This analysis should address form, basic harmonic events, large-scale phrasing, performance practice issues, etc., as outlined in a rubric provided by the department.

The written project must be submitted to the Department of Instrumental Studies no later than November 1 for an anticipated December graduation or April 1 for an anticipated May graduation. Documents are distributed among the departmental faculty for review and a grade of either “pass” or “fail.” A passing grade from a majority (and no fewer than two) of the department’s graduate faculty members is required. Students who do not pass are told what needs to be fixed (content, grammar, etc.) and, using whatever resources they have (e.g., the University’s Writing Center), prepare and submit a revision that receives a passing grade. In order for a student to graduate on schedule, any revision that is required must receive a passing grade before the deadline by which names must be submitted for graduation.

Public Recital:
Performance majors present a public recital as the culminating event for the master’s degree (MUSC 8984). Graduation recitals are typically one hour in length; presented on-campus in either Rock Hall or Klein Recital Hall; and adjudicated by two full-time music faculty members. The student must show evidence through Temple University transcript records of having taken private lessons up to the time of the graduation recital. Students who wish to play a recital in the early Fall should plan to register for and complete the final term of lessons during the preceding Summer months.

A Recital Permission Form indicating the private teacher’s approval for performance of the graduation recital must be signed by the private teacher and submitted six weeks prior to the recital. (If the recital is in the first five weeks of the Spring term, the form must be submitted two weeks before the end of the Fall term.) If required by the private teacher, a Recital Permission Jury must be scheduled at least four weeks prior to the recital. If the form is not submitted or a required jury is not scheduled, the department reserves the right to cancel or postpone the recital.

Program Coordinator:
Music Performance/Harp, M.M.

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE (http://www.temple.edu/boyer)

About the Program

The master's degree in Harp Performance develops expertise beyond baccalaureate-level achievement. Students specialize in the study of the major instrument and take courses outside the major area that support advanced musical and academic development. The Department of Instrumental Studies provides the potential professional performer and/or teacher with the finest instrumental training within the context of a comprehensive university. Students study privately with professional artist-teachers and enjoy opportunities for performance in numerous large and chamber music ensembles.

Time Limit for Degree Completion: 6 years

Campus Location: Main

Full-Time/Part-Time Status: The degree program can be completed on a full- or part-time basis.

Interdisciplinary Study: With approval of the major advisor, students may elect to take up to 6 graduate credits outside the field of music.

Accreditation: This degree program is accredited by the National Association of Schools of Music (NASM).

Areas of Specialization: Study focuses on performance of the major instrument, the solo and ensemble literature of the instrument, and academic support areas in music.

Job Prospects: The program prepares musicians for either professional activity or doctoral study.

Non-Matriculated Student Policy: Non-matriculated students may enroll in selected courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

Financing Opportunities: Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance, and/or direct service related to academic programs. Applicants must submit an assistantship/ internship application by March 1 to obtain priority consideration for an award. Applications are available online at the Graduate Financial Aid (http://www.temple.edu/boyer/admissions/documents/gradassistantshipform.pdf) page of Boyer's website. Typically these awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

Admission Requirements and Deadlines

Application Deadline:

Fall: March 1
Spring: November 1

Applications are processed as they arrive. Late applications may be considered for admission.

APPLY ONLINE to this graduate program.

Letters of Reference:

Number Required: 2

From Whom: Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents, and aptitude for graduate study.

Coursework Required for Admission Consideration: All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours.

Bachelor's Degree in Discipline/Related Discipline: A degree in Music is expected.

Statement of Goals: Include your special interests within the discipline and expectations for the program.

Standardized Test Scores:

TOEFL: 75 iBT or 537 PBT minimum

Audition: See www.temple.edu/boyer for audition repertoire requirements.

Resume: Current resume required.

Transfer Credit: A student who wishes to transfer credit should speak with her/his academic advisor and obtain a "Request for Transfer of Graduate Credit" form, found in TPortal under the Tools tab within "University Forms." Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

Other: Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This Policy may preclude the admission of any student who meets the minimum requirements.

Electives 2 8

Total Credit Hours 30

1. M.M. candidates must be available for ensemble assignments, which are determined by the department chair and may exceed curricular requirements.

2. Select from Music, Music Education, Music Studies, or other graduate departments. At least 3 credits must be in academic, non-performance coursework. Advisor approval required.

Additional Requirements:

All degree credits are to be earned at Temple University.

Diagnostic Examinations:

All entering Master of Music students are required to take Diagnostic Examinations in Harmony, Counterpoint, Aural Skills, and Music History prior to the first term of graduate study. The purpose of these examinations is to ascertain adequate preparation for graduate study in these areas. Examinations in Harmony, Counterpoint, and Aural Skills may be taken once. The examination in Music History may be taken a second time.

Students who are unable to take the examinations at the designated time may do so using the online proctoring service, Examity® (https://examity.com). Students are responsible for all fees.

Students who opt not to take any or all exams prior to the first semester of study are required to complete remedial coursework within the first academic year.

Depending on the examination results, students may be required to take one or more remedial courses. Remedial courses are graded on a “Credit / No Credit” basis, and the official university transcript will indicate “CR” (for “Credit,” meaning that the deficiency has been satisfied) or “NC” (for “No Credit,” meaning that the deficiency has not been satisfied). Students must have a “B-” or better average in any remedial course or section to earn the grade of “Credit” and to satisfy the requirement. Students who earn a grade of “NC” (that is, having a class average below “B-”) must retake that course or section until an average of “B-” or higher is achieved and a grade of “CR” is recorded on the official university transcript. Remedial courses do not count toward graduate degree requirements.

It is highly recommended that students complete all remediation coursework during their first academic year of study. An exception may be granted for part-time students. Master of Music students may neither schedule graduation recitals nor take final comprehensive master’s examinations until all of the diagnostic examinations and any required remediation have been successfully completed.

A. Diagnostic Examinations in Music Theory, including Harmony, Counterpoint, and Aural Skills

Students may take each portion of the theory test only once. Any section not graded as passing necessitates enrollment in a remedial course(s) during the first term of study. Examiners stipulate which section(s) of remedial coursework are required. Theory remedial courses include:

<table>

</tr>
</tbody>
</table>

B. Diagnostic Examination in Music History

Students may take each of the five sections of the history test twice. After the second attempt, any section not graded as passing necessitates enrollment in a remedial course(s). Examiners stipulate which section(s) of remedial coursework are required.

The History remedial course is MUST 5005 Remedial Studies in Music History. Each of five sections are enrolled in for one credit and are subtitled according to the period covered in the coursework: Baroque, Classic, Medieval/Renaissance, Romantic, and Twentieth Century. Remediation can be extended over two terms.

C. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
- received grades of “B-” or better in every undergraduate course taken in each individual examination area to be waived.

Professional Development Policy:

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and
open house events; supervising performance classes; and engaging in other academic activities.

Performing Ensembles:

1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.
2. Participation: Master's degree candidates in wind, brass, and percussion instruments must be available for ensemble assignments at the discretion of the department chair, including participation beyond curricular requirements.
3. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair, and the Associate Dean.

University Orchestra:
At the master's degree level, all bowed string majors must perform in the University Orchestra each term they receive lessons.

Independent Study Courses:
Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval will be granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects will be granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

Acceptable English:
All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

Graduate Private Lesson Policy:
Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A $250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

Private applied lessons beyond the four-term requirement currently in effect for graduate performance students may be extended with the permission of the jury, department chair, and the Associate Dean or Dean of the Boyer College of Music and Dance.

Recital Extension:
Students withdrawing from the recital requirement during the recital term will receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course will be offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course will be replaced by a letter grade and MUSC 5000 Recital Extension will be issued a grade of "CR." Credit derived from Recital Extension will not be counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study will be the cost of 2 graduate credits plus a $400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.
2. Exceptions to Recital Extension:
a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, if the student does not take Recital Extension during the Summer, s/he may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.
3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension will be reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, will determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

Incompletes:
All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

Culminating Events:
Comprehensive Final Project:
Students must maintain a list of all literature, including solos, etudes, and excerpts, performed each term in lessons, using a printed form provided by the department. During the final term of study, students are required to submit a three-part written project. Part 1 includes lists of music studied/performed in all four terms of lessons; the lists must be signed by the studio teacher. Part 2 includes program notes or background information for any two of the pieces listed in Part 1. The notes should be approximately 500 words each and must contain at least three recognized references, such as Baker's and New Grove. Any online resource must be documented and recognized as appropriate and authoritative. Part 3 is to consist of one of the following:

1. A discussion of a third piece from the submitted lists or one movement of a multi-movement piece from the lists: The length of the piece or movement being discussed should be no less than 8-10 minutes. This discussion must form a paper of no less than 2,000 words. Topics may include (but are not limited to) historical perspectives, performance and performance practice issues, instrumental technical issues, the importance or role of the piece in the literature for the student’s instrument, etc. This discussion must be presented as a formal paper with supporting information, including resources, charts, and the like. OR
2. A theoretical analysis of one of the listed pieces or one movement of a multi-movement piece from the lists: The length of the piece or movement being analyzed should be no less than 8-10 minutes. This
analysis should address form, basic harmonic events, large-scale phrasing, performance practice issues, etc., as outlined in a rubric provided by the department.

The written project must be submitted to the Department of Instrumental Studies no later than November 1 for an anticipated December graduation or April 1 for an anticipated May graduation. Documents are distributed among the departmental faculty for review and a grade of either “pass” or “fail.” A passing grade from a majority (and no fewer than two) of the department’s graduate faculty members is required. Students who do not pass are told what needs to be fixed (content, grammar, etc.) and, using whatever resources they have (e.g., the University’s Writing Center), prepare and submit a revision that receives a passing grade. In order for a student to graduate on schedule, any revision that is required must receive a passing grade before the deadline by which names must be submitted for graduation.

Public Recital:
Performance majors present a public recital as the culminating event for the master’s degree (MUSC 8984). Graduation recitals are typically one hour in length; presented on-campus in either Rock Hall or Klein Recital Hall; and adjudicated by three full-time music faculty members. The student must show evidence through Temple University transcript records of having taken private lessons up to the time of the graduation recital. Students who wish to play a recital in the early Fall should plan to register for and complete the final term of lessons during the preceding Summer months.

A Recital Permission Form indicating the private teacher’s approval for performance of the graduation recital must be signed by the private teacher and submitted at least four weeks prior to the recital. (If the recital is in the first five weeks of the Spring term, the form must be submitted two weeks before the end of the Fall term.) If required by the private teacher, a Recital Permission Jury must be scheduled at least four weeks prior to the recital. If the form is not submitted or a required jury is not scheduled, the department reserves the right to cancel or postpone the recital.

Total Credit Hours: 30

¹ M.M. candidates must be available for ensemble assignments, which are determined by the department chair and may exceed curricular requirements.

² Select from Music, Music Education, Music Studies, or other graduate departments. At least 3 credits must be in academic, non-performance coursework. Advisor approval required.

Additional Requirements:

All degree credits are to be earned at Temple University.

**Diagnostic Examinations**:  
All entering Master of Music students are required to take Diagnostic Examinations in Harmony, Counterpoint, Aural Skills, and Music History prior to the first term of graduate study. The purpose of these examinations is to ascertain adequate preparation for graduate study in these areas. Examinations in Harmony, Counterpoint, and Aural Skills may be taken once. The examination in Music History may be taken a second time.

Students who are unable to take the examinations at the designated time may do so using the online proctoring service, Examity® (https://examity.com). Students are responsible for all fees.

Students who opt not to take any or all exams prior to the first semester of study are required to complete remedial coursework within the first academic year.

Depending on the examination results, students may be required to take one or more remedial courses. Remedial courses are graded on a “Credit / No Credit” basis. The official university transcript will indicate “CR” (for “Credit,” meaning that the deficiency has been satisfied) or “NC” (for “No Credit,” meaning that the deficiency has not been satisfied). Students must have a “B-” or better average in any remedial course or section to earn the grade of “Credit” and to satisfy the requirement. Students who earn a grade of “NC” (that is, having a class average
below "B-" must retake that course or section until an average of "B-" or higher is achieved and a grade of "CR" is recorded on the official university transcript. Remedial courses do not count toward graduate degree requirements.

It is highly recommended that students complete all remediation coursework during their first academic year of study. An exception may be granted for part-time students. Master of Music students may neither schedule graduation recitals nor take final comprehensive master's examinations until all of the diagnostic examinations and any required remediation have been successfully completed.

A. Diagnostic Examinations in Music Theory, including Harmony, Counterpoint, and Aural Skills

Students may take each portion of the theory test only once. Any section not graded as passing necessitates enrollment in a remedial course(s) during the first term of study. Examiners stipulate which section(s) of remedial coursework are required. Theory remedial courses include:

<table>
<thead>
<tr>

<tr>
<td>MUST 5004</td>
<td>Grad Aural Theory Review</td>
<td>3</td>
</tr>
</tbody>
</table>

B. Diagnostic Examination in Music History

Students may take each of the five sections of the history test twice. After the second attempt, any section not graded as passing necessitates enrollment in a remedial course(s). Examiners stipulate which section(s) of remedial coursework are required.

The History remedial course is MUST 5005 Remedial Studies in Music History. Each of five sections are enrolled in for one credit and are subtitled according to the period covered in the coursework: Baroque, Classic, Medieval/Renaissance, Romantic, and Twentieth Century. Remediation can be extended over two terms.

C. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
- received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

Professional Development Policy:

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

Performing Ensembles:

1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.

2. Participation: Master's degree candidates in wind, brass, and percussion instruments must be available for ensemble assignments at the discretion of the department chair, including participation beyond curricular requirements.

3. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair, and the Associate Dean.

Independent Study Courses:

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval will be granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects will be granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

Acceptable English:

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

Graduate Private Lesson Policy:

Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A $250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

Private applied lessons beyond the four-term requirement currently in effect for graduate performance students may be extended with the permission of the jury, department chair, and the Associate Dean or Dean of the Boyer College of Music and Dance.

Recital Extension:

Students withdrawing from the recital requirement during the recital term will receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course will be offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course will be replaced by a letter grade and MUSC 5000 Recital Extension will
be issued a grade of "CR." Credit derived from Recital Extension will not be counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study will be the cost of 2 graduate credits plus a $400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.

2. Exceptions to Recital Extension:
   a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
   b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, if the student does not take Recital Extension during the Summer, s/he may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.

3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension will be reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, will determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

Incompletes:
All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

Culminating Events:
Comprehensive Final Project:
All candidates for the Master of Music degree must submit a list of all repertoire studied with their studio teacher(s) while enrolled in the M.M. program. Students choose two stylistically contrasting pieces from their final recital program. (Students enrolled in programs without a recital requirement, such as Opera Coaching, choose two contrasting works studied with their assigned studio teacher.) Students choose to give either an oral presentation or submit a written document that addresses at least several of the following topics:

- Form and harmonic language of the piece
- Historical background of the work
- Aspects of the composer's style
- Relationship to other keyboard works by the composer
- Performance practice considerations
- Specific technical problems and their solutions
- Other relevant information about the piece

The goal of the presentation or paper is to demonstrate cumulative knowledge and skills gained during the course of study at the master's level. Courses taken in research, theory, history, pedagogy, and performance practice can inform the discussion of the particular works chosen by the student.

If the student selects the oral option, the presentation is scheduled during end-of-term juries. At least two representatives from the graduate faculty in the Department of Keyboard Instruction adjudicate the oral presentation. The session should last approximately 20 minutes with some extra time for questions from the faculty members following the presentation. Students can perform small sections of the work if germane to their discussion. Lecture notes with cited sources for information should be submitted to the Department of Keyboard Instruction no later than ten days before juries.

The written document, if chosen, should be a research-quality paper of approximately 10 pages, double-spaced, and include appropriate references. This should be submitted to the Department of Keyboard Instruction no later than April 1 for a May graduation or November 15 for a January graduation. At least two graduate faculty members from the Department of Keyboard Instruction read the paper and confer about the final decision. Students must follow the guidelines for academic honesty found in the Graduate Bulletin.

Each reader grades the project as either "pass" or "fail." If the student fails, s/he is not allowed to graduate at the end of that term. Another document may be submitted after suggestions for improvement by the Department of Keyboard Instruction faculty, or another oral presentation is arranged and graded as before. If the student fails a second time, s/he is dismissed from the degree program.

Public Recital:
Performance majors present a public recital as the culminating event for the master's degree (MUSC 8984). Graduation recitals are typically one hour in length; presented on-campus in either Rock Hall or Klein Recital Hall; and adjudicated by three full-time music faculty members. The student must show evidence through Temple University transcript records of having taken private lessons up to the time of the graduation recital. Students who wish to play a recital in the early Fall should plan to register for and complete the final term of lessons during the preceding Summer months.

A recital approval jury must be formed to demonstrate the student's ability to perform the degree recital successfully. Normally, this occurs at the preceding term's jury. If, by departmental approval, this jury does not occur, then a jury must be scheduled at least four weeks prior to the recital. If the jury is not successfully completed by that time, the department reserves the right to cancel the recital date. Further details are available from the department chair.

About the Program

The master's degree in Oboe Performance develops expertise beyond baccalaureate-level achievement. Students specialize in the study of the major instrument and take courses outside the major area that support advanced musical and academic development. The Department of Instrumental Studies provides the potential professional performer and/or teacher with the finest instrumental training within the context of a comprehensive university. Students study privately with professional artist-teachers and enjoy opportunities for performance in numerous large and chamber music ensembles.

Time Limit for Degree Completion: 6 years

Campus Location: Main

Full-Time/Part-Time Status: The degree program can be completed on a full- or part-time basis.

Interdisciplinary Study: With approval of the major advisor, students may elect to take up to 6 graduate credits outside the field of music.

Accreditation: This degree program is accredited by the National Association of Schools of Music (NASM).

Areas of Specialization: Study focuses on performance of the major instrument, the solo and ensemble literature of the instrument, and academic support areas in music.

Job Prospects: The program prepares musicians for either professional activity or doctoral study.

Non-Matriculated Student Policy: Non-matriculated students may enroll in selected courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

Financing Opportunities: Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance, and/or direct service related to academic programs. Applicants must submit an assistantship/internship application by March 1 to obtain priority consideration for an award. Applications are available online at the Graduate Financial Aid (http://www.temple.edu/boyer/admissions/documents/gradassistantshipform.pdf) page of Boyer's website. Typically these awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

Admission Requirements and Deadlines

Application Deadline:

Fall: March 1
Spring: November 1

Applications are processed as they arrive. Late applications may be considered for admission.

APPLY ONLINE to this graduate program.

Letters of Reference:

Number Required: 2

From Whom: Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents, and aptitude for graduate study.

Coursework Required for Admission Consideration: All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours.

Bachelor's Degree in Discipline/Related Discipline: A degree in Music is expected.

Statement of Goals: Include your special interests within the discipline and expectations for the program.

Standardized Test Scores:

TOEFL: 75 iBT or 537 PBT minimum

Audition: See www.temple.edu/boyer for audition repertoire requirements.

Resume: Current resume required.

Transfer Credit: A student who wishes to transfer credit should speak with her/his academic advisor and obtain a "Request for Transfer of Graduate Credit" form, found in TPortal under the Tools tab within "University Forms." Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

Other: Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment
Policy. This Policy may preclude the admission of any student who meets the minimum requirements.

B. Diagnostic Examination in Music History

Students may take each of the five sections of the history test twice. After the second attempt, any section not graded as passing necessitates enrollment in a remedial course(s). Examiners stipulate which section(s) of remedial coursework are required.

The History remedial course is MUST 5005 Remedial Studies in Music History. Each of five sections are enrolled in for one credit and are subtitled according to the period covered in the coursework: Baroque, Classic, Medieval/Renaissance, Romantic, and Twentieth Century. Remediation can be extended over two terms.

C. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
- received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

**Professional Development Policy:**

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of
Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

**Performing Ensembles:**

1. **Touring:** All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.

2. **Participation:** Master’s degree candidates in wind, brass, and percussion instruments must be available for ensemble assignments at the discretion of the department chair, including participation beyond curricular requirements.

3. **Non-Credit Participation:** With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair, and the Associate Dean.

**Independent Study Courses:**

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students’ major advisor, and the Associate Dean. Approval will be granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects will be granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student’s curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

**Acceptable English:**

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College’s statement on plagiarism and academic honesty.

**Graduate Private Lesson Policy:**

Weekly one-hour private lessons are provided for all matriculated master’s and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A $250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

Private applied lessons beyond the four-term requirement currently in effect for graduate performance students may be extended with the permission of the jury, department chair, and the Associate Dean or Dean of the Boyer College of Music and Dance.

**Recital Extension:**

Students withdrawing from the recital requirement during the recital term will receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented.

This course will be offered on a “Credit/No Credit” basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course will be replaced by a letter grade and MUSC 5000 Recital Extension will be issued a grade of “CR.” Credit derived from Recital Extension will not be counted toward degree requirements.

1. **Recital Extension Fees:** Tuition for these additional terms of private study will be the cost of 2 graduate credits plus a $400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.

2. **Exceptions to Recital Extension:**

   a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.

   b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, if the student does not take Recital Extension during the Summer, s/he may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.

3. **Failure to Present Recital:** The degree status of students who are unable to present a recital after one term of Recital Extension will be reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, will determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

**Incompletes:**

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

**Culminating Events:**

**Comprehensive Final Project:**

Students must maintain a list of all literature, including solos, etudes, and excerpts, performed each term in lessons, using a printed form provided by the department. During the final term of study, students are required to submit a three-part written project. Part 1 includes lists of music studied/performèd in all four terms of lessons; the lists must be signed by the studio teacher. Part 2 includes program notes or background information for any two of the pieces listed in Part 1. The notes should be approximately 500 words each and must contain at least three recognized references, such as Baker’s and New Grove. Any online resource must be documented and recognized as appropriate and authoritative. Part 3 is to consist of one of the following:

1. A discussion of a third piece from the submitted lists or one movement of a multi-movement piece from the lists: The length of the piece or movement being discussed should be no less than 8-10 minutes. This discussion must form a paper of no less than 2,000 words. Topics may include (but are not limited to) historical perspectives, performance and performance practice issues, instrumental technical issues, the importance or role of the piece in the literature for the student’s instrument, etc. This discussion must be presented as a formal paper with supporting information, including resources, charts, and the like.

OR

2. A theoretical analysis of one of the listed pieces or one movement of a multi-movement piece from the lists: The length of the piece or movement being analyzed should be no less than 8-10 minutes. This analysis should address form, basic harmonic events, large-scale
Performance majors present a public recital as the culminating event for the master's degree (MUSC 8984). Graduation recitals are typically one hour in length; presented on-campus in either Rock Hall or Klein Recital Hall; and adjudicated by three full-time music faculty members. The student must show evidence through Temple University transcript records of having taken private lessons up to the time of the graduation recital. Students who wish to play a recital in the early Fall should plan to register for and complete the final term of lessons during the preceding Summer months.

A Recital Permission Form indicating the private teacher's approval for performance of the graduation recital must be signed by the private teacher and submitted six weeks prior to the recital. (If the recital is in the first five weeks of the Spring term, the form must be submitted two weeks before the end of the Fall term.) If required by the private teacher, a Recital Permission Jury must be scheduled at least four weeks prior to the recital. If the form is not submitted or a required jury is not scheduled, the department reserves the right to cancel or postpone the recital.

The written project must be submitted to the Department of Instrumental Studies no later than November 1 for an anticipated December graduation or April 1 for an anticipated May graduation. Documents are distributed among the departmental faculty for review and a grade of either "pass" or "fail." A passing grade from a majority (and no fewer than two) of the department's graduate faculty members is required. Students who do not pass are told what needs to be fixed (content, grammar, etc.) and, using whatever resources they have (e.g., the University's Writing Center), prepare and submit a revision that receives a passing grade. In order for a student to graduate on schedule, any revision that is required must receive a passing grade before the deadline by which names must be submitted for graduation.

Phrasing, performance practice issues, etc., as outlined in a rubric provided by the department.

Coursework Required for Admission Consideration: All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours.

Bachelor's Degree in Discipline/Related Discipline: A degree in Music is expected.

Statement of Goals: Include your special interests within the discipline and expectations for the program.

Standardized Test Scores:
TOEFL: 75 iBT or 537 PBT minimum

Audition: See www.temple.edu/boyer for audition repertoire requirements.

Resume: Current resume required.

Transfer Credit: A student who wishes to transfer credit should speak with her/his academic advisor and obtain a "Request for Transfer of Graduate Credit" form, found in TUportal under the Tools tab within "University Forms." Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

Other: Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This Policy may preclude the admission of any student who meets the minimum requirements.

Program Requirements

General Program Requirements:
Number of Didactic Credits Required Beyond the Baccalaureate: 30

Required Courses:

- MUST 8743 Seminar in Stylistic Analysis
- MUST 8744 Seminar in Stylistic Analysis
- MUST 8745 Seminar in Stylistic Analysis
- MUST 8746 Seminar in Stylistic Analysis
- MUST 8747 Aesthetics of Music
- MUST 8748 Seminar in Post-Tonal Theory
- MUST 8749 Current Topics in Musicology and Theory

Electives ²

Recommended courses include:

- MUSC 8551 Percussion History, Development and Performance Practices
- MUSC 8552 Percussion Pedagogy
- MUSC 8554 Orchestral Repertoire: Percussion

Total Credit Hours 30

¹ M.M. candidates must be available for ensemble assignments, which are determined by the department chair and may exceed curricular requirements.

² Select from Music, Music Education, Music Studies, or other graduate departments. At least 3 credits must be in academic, non-performance coursework. Advisor approval required.

Additional Requirements:

All degree credits are to be earned at Temple University.

Diagnostic Examinations:
All entering Master of Music students are required to take Diagnostic Examinations in Harmony, Counterpoint, Aural Skills, and Music History prior to the first term of graduate study. The purpose of these examinations is to ascertain adequate preparation for graduate study in these areas. Examinations in Harmony, Counterpoint, and Aural Skills may be taken once. The examination in Music History may be taken a second time.

Students who are unable to take the examinations at the designated time may do so using the online proctoring service, Examity® (https://examity.com). Students are responsible for all fees.
Students who opt not to take any or all exams prior to the first semester of study are required to complete remedial coursework within the first academic year.

Depending on the examination results, students may be required to take one or more remedial courses. Remedial courses are graded on a "Credit / No Credit" basis, and the official university transcript will indicate "CR" (for "Credit," meaning that the deficiency has been satisfied) or "NC" (for "No Credit," meaning that the deficiency has not been satisfied). Students must have a "B-" or better average in any remedial course or section to earn the grade of "Credit" and to satisfy the requirement. Students who earn a grade of "NC" (that is, having a class average below "B-") must retake that course or section until an average of "B-" or higher is achieved and a grade of "CR" is recorded on the official university transcript. Remedial courses do not count toward graduate degree requirements.

It is highly recommended that students complete all remediation coursework during their first academic year of study. An exception may be granted for part-time students. Master of Music students may neither schedule graduation recitals nor take final comprehensive master's examinations until all of the diagnostic examinations and any required remediation have been successfully completed.

A. Diagnostic Examinations in Music Theory, including Harmony, Counterpoint, and Aural Skills

Students may take each portion of the theory test only once. Any section not graded as passing necessitates enrollment in a remedial course(s) during the first term of study. Examiners stipulate which section(s) of remedial coursework are required. Theory remedial courses include:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MUST 5001</td>
<td>Diatonic Harm. Review</td>
<td>1</td>
</tr>
<tr>
<td>MUST 5002</td>
<td>Chromatic Harm. Review</td>
<td>1</td>
</tr>
<tr>
<td>MUST 5003</td>
<td>Counterpoint Review</td>
<td>1</td>
</tr>
<tr>
<td>MUST 5004</td>
<td>Grad Aural Theory Review</td>
<td>3</td>
</tr>
</tbody>
</table>

B. Diagnostic Examination in Music History

Students may take each of the five sections of the history test twice. After the second attempt, any section not graded as passing necessitates enrollment in a remedial course(s). Examiners stipulate which section(s) of remedial coursework are required.

The History remedial course is MUST 5005 Remedial Studies in Music History. Each of five sections are enrolled in for one credit and are subtitled according to the period covered in the coursework: Baroque, Classic, Medieval/Renaissance, Romantic, and Twentieth Century. Remediation can be extended over two terms.

C. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
- received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

Professional Development Policy:

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

Performing Ensembles:

1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.

2. Participation: Master's degree candidates in wind, brass, and percussion instruments must be available for ensemble assignments at the discretion of the department chair, including participation beyond curricular requirements.

3. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair, and the Associate Dean.

Independent Study Courses:

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval will be granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects will be granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

Acceptable English:

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

Graduate Private Lesson Policy:

Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A $250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

Private applied lessons beyond the four-term requirement currently in effect for graduate performance students may be extended with the
permission of the jury, department chair, and the Associate Dean or Dean of the Boyer College of Music and Dance.

Recital Extension:
Students withdrawing from the recital requirement during the recital term will receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course will be offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course will be replaced by a letter grade and MUSC 5000 Recital Extension will be issued a grade of "CR." Credit derived from Recital Extension will not be counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study will be the cost of 2 graduate credits plus a $400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.

2. Exceptions to Recital Extension:
   a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
   b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, if the student does not take Recital Extension during the Summer, s/he may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.

3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension will be reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, will determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

Incompletes:
All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

Culminating Events:
Comprehensive Final Project:
Students must maintain a list of all literature, including solos, etudes, and excerpts, performed each term in lessons, using a printed form provided by the department. During the final term of study, students are required to submit a three-part written project. Part 1 includes lists of music studied/Performed in all four terms of lessons; the lists must be signed by the studio teacher. Part 2 includes program notes or background information for any two of the pieces listed in Part 1. The notes should be approximately 500 words each and must contain at least three recognized references, such as Baker’s and New Grove. Any online resource must be documented and recognized as appropriate and authoritative. Part 3 is to consist of one of the following:

1. A discussion of a third piece from the submitted lists or one movement of a multi-movement piece from the lists: The length of the piece or movement being discussed should be no less than 8-10 minutes. This discussion must form a paper of no less than 2,000 words. Topics may include (but are not limited to) historical perspectives, performance and performance practice issues, instrumental technical issues, the importance or role of the piece in the literature for the student’s instrument, etc. This discussion must be presented as a formal paper with supporting information, including resources, charts, and the like.

OR

2. A theoretical analysis of one of the listed pieces or one movement of a multi-movement piece from the lists: The length of the piece or movement being analyzed should be no less than 8-10 minutes. This analysis should address form, basic harmonic events, large-scale phrasing, performance practice issues, etc., as outlined in a rubric provided by the department.

The written project must be submitted to the Department of Instrumental Studies no later than November 1 for an anticipated December graduation or April 1 for an anticipated May graduation. Documents are distributed among the departmental faculty for review and a grade of either “pass” or “fail.” A passing grade from a majority (and no fewer than two) of the department’s graduate faculty members is required. Students who do not pass are told what needs to be fixed (content, grammar, etc.) and, using whatever resources they have (e.g., the University’s Writing Center), prepare and submit a revision that receives a passing grade. In order for a student to graduate on schedule, any revision that is required must receive a passing grade before the deadline by which names must be submitted for graduation.

Public Recital:
Performance majors present a public recital as the culminating event for the master’s degree (MUSC 8984). Graduation recitals are typically one hour in length; presented on-campus in either Rock Hall or Klein Recital Hall; and adjudicated by three full-time music faculty members. The student must show evidence through Temple University transcript records of having taken private lessons up to the time of the graduation recital. Students who wish to play a recital in the early Fall should plan to register for and complete the final term of lessons during the preceding Summer months.

A Recital Permission Form indicating the private teacher’s approval for performance of the graduation recital must be signed by the private teacher and submitted six weeks prior to the recital. (If the recital is in the first five weeks of the Spring term, the form must be submitted two weeks before the end of the Fall term.) If required by the private teacher, a Recital Permission Jury must be scheduled at least four weeks prior to the recital. If the form is not submitted or a required jury is not scheduled, the department reserves the right to cancel or postpone the recital.

Music Performance/Piano, M.M.

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE (http://www.temple.edu/boyer)

About the Program

The master's degree in Piano Performance develops expertise beyond baccalaureate-level achievement. Students specialize in the study of the major instrument and take courses outside the major area that support advanced musical and academic development. The Department of Keyboard Instruction provides the potential professional performer and/or teacher with the finest instrumental training within the context of a comprehensive university. Students study privately with professional artist-teachers and enjoy opportunities for performance in solo recitals, as well as in large and chamber music ensembles.

Time Limit for Degree Completion: 6 years

Campus Location: Main

Full-Time/Part-Time Status: The degree program can be completed on a full- or part-time basis.

Interdisciplinary Study: With approval of the major advisor, students may elect to take up to 6 graduate credits outside the field of music.

Accreditation: This degree program is accredited by the National Association of Schools of Music (NASM).

Areas of Specialization: Study focuses on performance of the major instrument, the solo and ensemble literature of the instrument, and academic support areas in music.

Job Prospects: The program prepares musicians for either professional activity or doctoral study.

Non-Matriculated Student Policy: Non-matriculated students may enroll in selected courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

Financing Opportunities: Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance, and/or direct service related to academic programs. Applicants must submit an assistantship/internship application by March 1 to obtain priority consideration for an award. Applications are available online at the Graduate Financial Aid (http://www.temple.edu/boyer/admissions/documents/gradassistantshipform.pdf) page of Boyer's website. Typically these awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

Admission Requirements and Deadlines

Application Deadline:

Fall: March 1
Spring: November 1

Applications are processed as they arrive. Late applications may be considered for admission.

APPLY ONLINE to this graduate program.

Letters of Reference:

Number Required: 2

From Whom: Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents, and aptitude for graduate study.

Coursework Required for Admission Consideration: All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours.

Bachelor's Degree in Discipline/Related Discipline: A degree in Music is expected.

Statement of Goals: Include your special interests within the discipline and expectations for the program.

Standardized Test Scores:

TOEFL: 75 iBT or 537 PBT minimum

Audition: See www.temple.edu/boyer for audition repertoire requirements.

Resume: Current resume required.

Transfer Credit: A student who wishes to transfer credit should speak with her/his academic advisor and obtain a "Request for Transfer of Graduate Credit" form, found in TUportal under the Tools tab within "University Forms." Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

Other: Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of...
success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College’s Optimum Enrollment Policy. This Policy may preclude the admission of any student who meets the minimum requirements.

Total Credit Hours 30

1. M.M. candidates must be available for ensemble assignments, which are determined by the department chair and may exceed curricular requirements.

2. Select from Music, Music Education, Music Studies, or other graduate departments. Advisor approval required.

**Additional Requirements:**

All degree credits are to be earned at Temple University.

**Diagnostic Examinations:**

All entering Master of Music students are required to take Diagnostic Examinations in Harmony, Counterpoint, Aural Skills, and Music History prior to the first term of graduate study. The purpose of these examinations is to ascertain adequate preparation for graduate study in these areas. Examinations in Harmony, Counterpoint, and Aural Skills may be taken once. The examination in Music History may be taken a second time.

Students who are unable to take the examinations at the designated time may do so using the online proctoring service, Examity® (https://examity.com). Students are responsible for all fees.

Students who opt not to take any or all exams prior to the first semester of study are required to complete remedial coursework within the first academic year.

Depending on the examination results, students may be required to take one or more remedial courses. Remedial courses are graded on a “Credit / No Credit” basis, and the official university transcript will indicate “CR” (for “Credit,” meaning that the deficiency has been satisfied) or “NC” (for “No Credit,” meaning that the deficiency has not been satisfied). Students must have a “B-” or better average in any remedial course or section to earn the grade of “Credit” and to satisfy the requirement. Students who earn a grade of “NC” (that is, having a class average below “B-”) must retake that course or section until an average of “B-” or higher is achieved and a grade of “CR” is recorded on the official university transcript. Remedial courses do not count toward graduate degree requirements.

It is highly recommended that students complete all remediation coursework during their first academic year of study. An exception may be granted for part-time students. Master of Music students may neither schedule graduation recitals nor take final comprehensive master’s examinations until all of the diagnostic examinations and any required remediation have been successfully completed.

A. Diagnostic Examinations in Music Theory, including Harmony, Counterpoint, and Aural Skills

Students may take each portion of the theory test only once. Any section not graded as passing necessitates enrollment in a remedial course(s) during the first term of study. Examiners stipulate which section(s) of remedial coursework are required. Theory remedial courses include:

<table>
<thead>
<tr>

<td>3</td>
</tr>
</tbody>
</table>

B. Diagnostic Examination in Music History

Students may take each of the five sections of the history test twice. After the second attempt, any section not graded as passing necessitates enrollment in a remedial course(s). Examiners stipulate which section(s) of remedial coursework are required.

The History remedial course is MUST 5005 Remedial Studies in Music History. Each of five sections are enrolled in for one credit and are subtitled according to the period covered in the coursework: Baroque, Classic, Medieval/Renaissance, Romantic, and Twentieth Century. Remediation can be extended over two terms.

C. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
- received grades of “B-” or better in every undergraduate course taken in each individual examination area to be waived.

**Professional Development Policy:**

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and
open house events; supervising performance classes; and engaging in other academic activities.

**Performing Ensembles:**

1. **Touring:** All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.

2. **Participation:** Master’s degree candidates in wind, brass, and percussion instruments must be available for ensemble assignments at the discretion of the department chair, including participation beyond curricular requirements.

3. **Non-Credit Participation:** With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair, and the Associate Dean.

**Independent Study Courses:**

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students’ major advisor, and the Associate Dean. Approval will be granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects will be granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

**Acceptable English:**

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College’s statement on plagiarism and academic honesty.

**Graduate Private Lesson Policy:**

Weekly one-hour private lessons are provided for all matriculated master’s and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A $250 per academic term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

Private applied lessons beyond the four-term requirement currently in effect for graduate performance students may be extended with the permission of the jury, department chair, and the Associate Dean of the Boyer College of Music and Dance.

**Recital Extension:**

Students withdrawing from the recital requirement during the recital term will receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course will be offered on a “Credit/No Credit” basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course will be replaced by a letter grade and MUSC 5000 Recital Extension will be issued a grade of “CR.” Credit derived from Recital Extension will not be counted toward degree requirements.

1. **Recital Extension Fees:** Tuition for these additional terms of private study will be the cost of 2 graduate credits plus a $400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.

2. **Exceptions to Recital Extension:**
   a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
   b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, if the student does not take Recital Extension during the Summer, s/he may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.

3. **Failure to Present Recital:** The degree status of students who are unable to present a recital after one term of Recital Extension will be reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, will determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

**Incompletes:**

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

**Culminating Events:**

**Comprehensive Final Project:**

All candidates for the Master of Music degree must submit a list of all repertoire studied with their studio teacher(s) while enrolled in the M.M. program. Students choose two stylistically contrasting pieces from their final recital program. (Students enrolled in programs without a recital requirement, such as Opera Coaching, choose two contrasting works studied with their assigned studio teacher.) Students choose to give either an oral presentation or submit a written document that addresses at least several of the following topics:

- Form and harmonic language of the piece
- Historical background of the work
- Aspects of the composer’s style
- Relationship to other keyboard works by the composer
- Performance practice considerations
- Specific technical problems and their solutions
- Other relevant information about the piece

The goal of the presentation or paper is to demonstrate cumulative knowledge and skills gained during the course of study at the master’s level. Courses taken in research, theory, history, pedagogy, and performance practice can inform the discussion of the particular works chosen by the student.

If the student selects the oral option, the presentation is scheduled during end-of-term juries. At least two representatives from the graduate faculty in the Department of Keyboard Instruction adjudicate the oral presentation. The session should last approximately 20 minutes with some extra time for questions from the faculty members following the presentation. Students can perform small sections of the work if germane.
Music Performance/Saxophone, M.M.

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE (http://www.temple.edu/boyer)

About the Program

The master's degree in Saxophone Performance develops expertise beyond baccalaureate-level achievement. Students specialize in the study of the major instrument and take courses outside the major area that support advanced musical and academic development. The Department of Instrumental Studies provides the potential professional performer and/or teacher with the finest instrumental training within the context of a comprehensive university. Students study privately with professional artist-teachers and enjoy opportunities for performance in numerous large and chamber music ensembles.

Time Limit for Degree Completion: 6 years

Campus Location: Main

Full-Time/Part-Time Status: The degree program can be completed on a full- or part-time basis.

Interdisciplinary Study: With approval of the major advisor, students may elect to take up to 6 graduate credits outside the field of music.

Accreditation: This degree program is accredited by the National Association of Schools of Music (NASM).

Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance, and/or direct service related to academic programs. Applicants must submit an assistantship/internship application by March 1 to obtain priority consideration for an award. Applications are available online at the Graduate

Admission Requirements and Deadlines

Application Deadline:

Fall: March 1
Spring: November 1

Applications are processed as they arrive. Late applications may be considered for admission.

APPLY ONLINE to this graduate program.

Letters of Reference:
Number Required: 2

From Whom: Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents, and aptitude for graduate study.

Courses Required for Admission Consideration: All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours.

Bachelor's Degree in Discipline/Related Discipline: A degree in Music is expected.

Statement of Goals: Include your special interests within the discipline and expectations for the program.

Standardized Test Scores:
TOEFL: 75 iBT or 537 PBT minimum

Audition: See www.temple.edu/boyer for audition repertoire requirements.

Resume: Current resume required.

Transfer Credit: A student who wishes to transfer credit should speak with her/his academic advisor and obtain a "Request for Transfer of Graduate Credit" form, found in T'Portal under the Tools tab within "University Forms." Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

Other: Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., audits, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This Policy may preclude the admission of any student who meets the minimum requirements.

Electives ² 8

Total Credit Hours 30

¹ M.M. candidates must be available for ensemble assignments, which are determined by the department chair and may exceed curricular requirements.

² Select from Music, Music Education, Music Studies, or other graduate departments. At least 3 credits must be in academic, non-performance coursework. Advisor approval required.

Additional Requirements:

All degree credits are to be earned at Temple University.

Diagnostic Examinations:
All entering Master of Music students are required to take Diagnostic Examinations in Harmony, Counterpoint, Aural Skills, and Music History prior to the first term of graduate study. The purpose of these examinations is to ascertain adequate preparation for graduate study in these areas. Examinations in Harmony, Counterpoint, and Aural Skills may be taken once. The examination in Music History may be taken a second time.

Students who are unable to take the examinations at the designated time may do so using the online proctoring service, Examlity® (https://examity.com). Students are responsible for all fees.

Students who opt not to take any or all exams prior to the first semester of study are required to complete remedial coursework within the first academic year.

Depending on the examination results, students may be required to take one or more remedial courses. Remedial courses are graded on a
"Credit / No Credit" basis, and the official university transcript will indicate "CR" (for "Credit," meaning that the deficiency has been satisfied) or "NC" (for "No Credit," meaning that the deficiency has not been satisfied). Students must have a "B-" or better average in any remedial course or section to earn the grade of "Credit" and to satisfy the requirement. Students who earn a grade of "NC" (that is, having a class average below "B-"") must retake that course or section until an average of "B-" or higher is achieved and a grade of "CR" is recorded on the official university transcript. Remedial courses do not count toward graduate degree requirements.

It is highly recommended that students complete all remediation coursework during their first academic year of study. An exception may be granted for part-time students. Master of Music students may neither schedule graduation recitals nor take final comprehensive master's examinations until all of the diagnostic examinations and any required remediation have been successfully completed.

A. Diagnostic Examinations in Music Theory, including Harmony, Counterpoint, and Aural Skills

Students may take each portion of the theory test only once. Any section not graded as passing necessitates enrollment in a remedial course during the first term of study. Examiners stipulate which section(s) of remedial coursework are required. Theory remedial courses include:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MUST 5001</td>
<td>Diatonic Harm. Review</td>
<td>1</td>

<td>Chromatic Harm. Review</td>
<td>1</td>
</tr>
<tr>
<td>MUST 5003</td>
<td>Counterpoint Review</td>
<td>1</td>
</tr>
<tr>
<td>MUST 5004</td>
<td>Grad Aural Theory Review</td>
<td>3</td>
</tr>
</tbody>
</table>

B. Diagnostic Examination in Music History

Students may take each of the five sections of the history test twice. After the second attempt, any section not graded as passing necessitates enrollment in a remedial course(s) during the first term of study. Examiners stipulate which section(s) of remedial coursework are required.

The History remedial course is MUST 5005 Remedial Studies in Music History. Each of five sections are enrolled in for one credit and are subtitled according to the period covered in the coursework: Baroque, Classic, Medieval/Renaissance, Romantic, and Twentieth Century. Remediation can be extended over two terms.

C. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
- received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

Professional Development Policy:

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

Performing Ensembles:

1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.

2. Participation: Master's degree candidates in wind, brass, and percussion instruments must be available for ensemble assignments at the discretion of the department chair, including participation beyond curricular requirements.

3. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair, and the Associate Dean.

Independent Study Courses:

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval will be granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects will be granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

Acceptable English:

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

Graduate Private Lesson Policy:

Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programatically required graduate-level study are taken simultaneously. A $250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

Private applied lessons beyond the four-term requirement currently in effect for graduate performance students may be extended with the permission of the jury, department chair, and the Associate Dean or Dean of the Boyer College of Music and Dance.

Recital Extension:

Students withdrawing from the recital requirement during the recital term will receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented.
This course will be offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course will be replaced by a letter grade and MUSC 5000 Recital Extension will be issued a grade of "CR." Credit derived from Recital Extension will not be counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study will be the cost of 2 graduate credits plus a $400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.

2. Exceptions to Recital Extension:
   a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
   b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, if the student does not take Recital Extension during the Summer, s/he may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.

3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension will be reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, will determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

Incompletes:
All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

Culminating Events:
Comprehensive Final Project:
Students must maintain a list of all literature, including solos, etudes, and excerpts, performed each term in lessons, using a printed form provided by the department. During the final term of study, students are required to submit a three-part written project. Part 1 includes lists of music studied/performing in all terms of lessons, the lists must be signed by the studio teacher. Part 2 includes program notes or background information for any two of the pieces listed in Part 1. The notes should be approximately 500 words each and must contain at least three recognized references, such as Baker's and New Grove. Any online resource must be documented and recognized as appropriate and authoritative. Part 3 is to consist of one of the following:

1. A discussion of a third piece from the submitted lists or one movement of a multi-movement piece from the lists: The length of the piece or movement being discussed should be no less than 8-10 minutes. This discussion must form a paper of no less than 2,000 words. Topics may include (but are not limited to) historical perspectives, performance and performance practice issues, instrumental technical issues, the importance or role of the piece in the literature for the student's instrument, etc. This discussion must be presented as a formal paper with supporting information, including resources, charts, and the like.

   OR

2. A theoretical analysis of one of the listed pieces or one movement of a multi-movement piece from the lists: The length of the piece or movement being analyzed should be no less than 8-10 minutes. This analysis should address form, basic harmonic events, large-scale phrasing, performance practice issues, etc., as outlined in a rubric provided by the department.

The written project must be submitted to the Department of Instrumental Studies no later than November 1 for an anticipated December graduation or April 1 for an anticipated May graduation. Documents are distributed among the departmental faculty for review and a grade of either "pass" or "fail." A passing grade from a majority (and no fewer than two) of the department's graduate faculty members is required. Students who do not pass are told what needs to be fixed (content, grammar, etc.) and, using whatever resources they have (e.g., the University's Writing Center), prepare and submit a revision that receives a passing grade. In order for a student to graduate on schedule, any revision that is required must receive a passing grade before the deadline by which names must be submitted for graduation.

Public Recital:
Performance majors present a public recital as the culminating event for the master's degree (MUSC 8984). Graduation recitals are typically one hour in length; presented on-campus in either Rock Hall or Klein Recital Hall; and adjudicated by two full-time music faculty members. The student must show evidence through Temple University transcript records of having taken private lessons up to the time of the graduation recital. Students who wish to play a recital in the early Fall should plan to register for and complete the final term of lessons during the preceding Summer months.

A Recital Permission Form indicating the private teacher's approval for performance of the graduation recital must be signed by the private teacher and submitted six weeks prior to the recital. (If the recital is in the first five weeks of the Spring term, the form must be submitted two weeks before the end of the Fall term.) If required by the private teacher, a Recital Permission Jury must be scheduled at least four weeks prior to the recital. If the form is not submitted or a required jury is not scheduled, the department reserves the right to cancel or postpone the recital.

Program Coordinator:
Music Performance/Trombone, M.M.

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE (http://www.temple.edu/boyer)

About the Program

The master's degree in Trombone Performance develops expertise beyond baccalaureate-level achievement. Students specialize in the study of the major instrument and take courses outside the major area that support advanced musical and academic development. The Department of Instrumental Studies provides the potential professional performer and/or teacher with the finest instrumental training within the context of a comprehensive university. Students study privately with professional artist-teachers and enjoy opportunities for performance in numerous large and chamber music ensembles.

Time Limit for Degree Completion: 6 years

Campus Location: Main

Full-Time/Part-Time Status: The degree program can be completed on a full- or part-time basis.

Interdisciplinary Study: With approval of the major advisor, students may elect to take up to 6 graduate credits outside the field of music.

Accreditation: The degree program is accredited by the National Association of Schools of Music (NASM).

Areas of Specialization: Study focuses on performance of the major instrument, the solo and ensemble literature of the instrument, and academic support areas in music.

Job Prospects: The program prepares musicians for either professional activity or doctoral study.

Non-Matriculated Student Policy: Non-matriculated students may enroll in selected courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

Financing Opportunities: Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance, and/or direct service related to academic programs. Applicants must submit an assistantship/internship application by March 1 to obtain priority consideration for an award. Applications are available online at the Graduate Financial Aid (http://www.temple.edu/boyer/admissions/documents/gradassistantshipform.pdf) page of Boyer’s website. Typically these awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master’s students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

Admission Requirements and Deadlines

Application Deadline:

Fall: March 1
Spring: November 1

Applications are processed as they arrive. Late applications may be considered for admission.

APPLY ONLINE to this graduate program.

B. Diagnostic Examination in Music History

Students may take each of the five sections of the history test twice. After the second attempt, any section not graded as passing necessitates enrollment in a remedial course(s). Examiners stipulate which section(s) of remedial coursework are required.

The History remedial course is MUST 5005 Remedial Studies in Music History. Each of five sections are enrolled in for one credit and are subtitled according to the period covered in the coursework: Baroque, Classic, Medieval/Renaissance, Romantic, and Twentieth Century. Remediation can be extended over two terms.

C. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
- received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

Professional Development Policy:

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and
open house events; supervising performance classes; and engaging in other academic activities.

Performing Ensembles:

1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.
2. Participation: Master's degree candidates in wind, brass, and percussion instruments must be available for ensemble assignments at the discretion of the department chair, including participation beyond curricular requirements.
3. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair, and the Associate Dean.

Independent Study Courses:
Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval will be granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects will be granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

Acceptable English:
All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

Graduate Private Lesson Policy:
Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programatically required graduate-level study are taken simultaneously. A $250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

Private applied lessons beyond the four-term requirement currently in effect for graduate performance students may be extended with the permission of the jury, department chair, and the Associate Dean or Dean of the Boyer College of Music and Dance.

Recital Extension:
Students withdrawing from the recital requirement during the recital term will receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course will be offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course will be replaced by a letter grade and MUSC 5000 Recital Extension will be issued a grade of "CR." Credit derived from Recital Extension will not be counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study will be the cost of 2 graduate credits plus a $400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.
2. Exceptions to Recital Extension:
   a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
   b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, if the student does not take Recital Extension during the Summer, s/he may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.
3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension will be reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, will determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

Incompletes:
All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

Culminating Events:
Comprehensive Final Project:
Students must maintain a list of all literature, including solos, etudes, and excerpts, performed each term in lessons, using a printed form provided by the department. During the final term of study, students are required to submit a three-part written project. Part 1 includes lists of music studied/performed in all four terms of lessons; the lists must be signed by the studio teacher. Part 2 includes program notes or background information for any two of the pieces listed in Part 1. The notes should be approximately 500 words each and must contain at least three recognized references, such as Baker's and New Grove. Any online resource must be documented and recognized as appropriate and authoritative. Part 3 is to consist of one of the following:

1. A discussion of a third piece from the submitted lists or one movement of a multi-movement piece from the lists: The length of the piece or movement being discussed should be no less than 8-10 minutes. This discussion must form a paper of no less than 2,000 words. Topics may include (but are not limited to) historical perspectives, performance and performance practice issues, instrumental technical issues, the importance or role of the piece in the literature for the student's instrument, etc. This discussion must be presented as a formal paper with supporting information, including resources, charts, and the like. OR
2. A theoretical analysis of one of the listed pieces or one movement of a multi-movement piece from the lists: The length of the piece or movement being analyzed should be no less than 8-10 minutes. This analysis should address form, basic harmonic events, large-scale
Public Recital:
Performance majors present a public recital as the culminating event for the master's degree (MUSC 8984). Graduation recitals are typically one hour in length; presented on-campus in either Rock Hall or Klein Recital Hall; and adjudicated by two full-time music faculty members. The student must show evidence through Temple University transcript records of having taken private lessons up to the time of the graduation recital. Students who wish to play a recital in the early Fall should plan to register for and complete the final term of lessons during the preceding Summer months.

A Recital Permission Form indicating the private teacher's approval for performance of the graduation recital must be signed by the private teacher and submitted six weeks prior to the recital. (If the recital is in the first five weeks of the Spring term, the form must be submitted two weeks before the end of the Fall term.) If required by the private teacher, a Recital Permission Jury must be scheduled at least four weeks prior to the recital. If the form is not submitted or a required jury is not scheduled, the department reserves the right to cancel or postpone the recital.

Music Performance/Trumpet, M.M.
Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE (http://www.temple.edu/boyer)

About the Program
The master's degree in Trumpet Performance develops expertise beyond baccalaureate-level achievement. Students specialize in the study of the major instrument and take courses outside the major area that support advanced musical and academic development. The Department of Instrumental Studies provides the potential professional performer and/or teacher with the finest instrumental training within the context of a comprehensive university. Students study privately with professional artist-teachers and enjoy opportunities for performance in numerous large and chamber music ensembles.

Time Limit for Degree Completion: 6 years

Campus Location: Main

Full-Time/Part-Time Status: The degree program can be completed on a full- or part-time basis.

Interdisciplinary Study: With approval of the major advisor, students may elect to take up to 6 graduate credits outside the field of music.

Accreditation: This degree program is accredited by the National Association of Schools of Music (NASM).

Areas of Specialization: Study focuses on performance of the major instrument, the solo and ensemble literature of the instrument, and academic support areas in music.

Job Prospects: The program prepares musicians for either professional activity or doctoral study.

Non-Matriculated Student Policy: Non-matriculated students may enroll in selected courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

Financing Opportunities: Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance, and/or direct service related to academic programs. Applicants must submit an assistantship/internship application by March 1 to obtain priority consideration for an award. Applications are available online at the Graduate Financial Aid (http://www.temple.edu/boyer/admissions/documents/gradassistantshipform.pdf) page of Boyer's website. Typically these awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral

Phrasing, performance practice issues, etc., as outlined in a rubric provided by the department.

The written project must be submitted to the Department of Instrumental Studies no later than November 1 for an anticipated December graduation or April 1 for an anticipated May graduation. Documents are distributed among the departmental faculty for review and a grade of either “pass” or “fail.” A passing grade from a majority (and no fewer than two) of the department’s graduate faculty members is required. Students who do not pass are told what needs to be fixed (content, grammar, etc.) and, using whatever resources they have (e.g., the University's Writing Center), prepare and submit a revision that receives a passing grade. In order for a student to graduate on schedule, any revision that is required must receive a passing grade before the deadline by which names must be submitted for graduation.
students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

**Admission Requirements and Deadlines**

**Application Deadline:**

*Fall:* March 1  
*Spring:* November 1

Applications are processed as they arrive. Late applications may be considered for admission.

**APPLY ONLINE to this graduate program.**

**Letters of Reference:**  
**Number Required:** 2

**From Whom:** Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents, and aptitude for graduate study.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours.

**Bachelor's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Statement of Goals:** Include your special interests within the discipline and expectations for the program.

**Standardized Test Scores:**  
**TOEFL:** 75 iBT or 537 PBT minimum

**Audition:** See www.temple.edu/boyer for audition repertoire requirements.

**Resume:** Current resume required.

**Transfer Credit:** A student who wishes to transfer credit should speak with her/his academic advisor and obtain a “Request for Transfer of Graduate Credit” form, found in TUportal under the Tools tab within “University Forms.” Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College’s Optimum Enrollment Policy. This Policy may preclude the admission of any student who meets the minimum requirements.

**Total Credit Hours:** 30

\(^1\) M.M. candidates must be available for ensemble assignments, which are determined by the department chair and may exceed curricular requirements.

\(^2\) Select from Music, Music Education, Music Studies, or other graduate departments. At least 3 credits must be in academic, non-performance coursework. Advisor approval required.

**Additional Requirements:**

All degree credits are to be earned at Temple University.

**Diagnostic Examinations:**

All entering Master of Music students are required to take Diagnostic Examinations in Harmony, Counterpoint, Aural Skills, and Music History prior to the first term of graduate study. The purpose of these examinations is to ascertain adequate preparation for graduate study in these areas. Examinations in Harmony, Counterpoint, and Aural Skills may be taken once. The examination in Music History may be taken a second time.

Students who are unable to take the examinations at the designated time may do so using the online proctoring service, Examity® (https://examity.com). Students are responsible for all fees.

Students who opt not to take any or all exams prior to the first semester of study are required to complete remedial coursework within the first academic year.

Depending on the examination results, students may be required to take one or more remedial courses. Remedial courses are graded on a "Credit / No Credit" basis, and the official university transcript will indicate "CR" (for "Credit," meaning that the deficiency has been satisfied) or...
"NC" (for "No Credit," meaning that the deficiency has not been satisfied). Students must have a "B-" or better average in any remedial course or section to earn the grade of "Credit" and to satisfy the requirement. Students who earn a grade of "NC" (that is, having a class average below "B-") must retake that course or section until an average of "B-" or higher is achieved and a grade of "CR" is recorded on the official university transcript. Remedial courses do not count toward graduate degree requirements.

It is highly recommended that students complete all remediation coursework during their first academic year of study. An exception may be granted for part-time students. Master of Music students may neither schedule graduation recitals nor take final comprehensive master's examinations until all of the diagnostic examinations and any required remediation have been successfully completed.

A. Diagnostic Examinations in Music Theory, including Harmony, Counterpoint, and Aural Skills

Students may take each portion of the theory test only once. Any section not graded as passing necessitates enrollment in a remedial course(s) during the first term of study. Examiners stipulate which section(s) of remedial coursework are required. Theory remedial courses include:

<table>
<thead>
<tr>
<th>Code</th>

<td>Counterpoint Review</td>
<td>1</td>
</tr>
<tr>
<td>MUST 5004</td>
<td>Grad Aural Theory Review</td>
<td>3</td>
</tr>
</tbody>
</table>

B. Diagnostic Examination in Music History

Students may take each of the five sections of the history test twice. After the second attempt, any section not graded as passing necessitates enrollment in a remedial course(s). Examiners stipulate which section(s) of remedial coursework are required.

The History remedial course is MUST 5005 Remedial Studies in Music History. Each of five sections are enrolled in for one credit and are subdivided according to the period covered in the coursework: Baroque, Classic, Medieval/Renaissance, Romantic, and Twentieth Century. Remediation can be extended over two terms.

C. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
- received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

Professional Development Policy:

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

Performing Ensembles:

1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.

2. Participation: Master's degree candidates in wind, brass, and percussion instruments must be available for ensemble assignments at the discretion of the department chair, including participation beyond curricular requirements.

3. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair, and the Associate Dean.

Independent Study Courses:

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval will be granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects will be granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

Acceptable English:

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

Graduate Private Lesson Policy:

Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A $250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

Private applied lessons beyond the four-term requirement currently in effect for graduate performance students may be extended with the permission of the jury, department chair, and the Associate Dean or Dean of the Boyer College of Music and Dance.

Recital Extension:

Students withdrawing from the recital requirement during the recital term will receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course will be offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course
will be replaced by a letter grade and MUSC 5000 Recital Extension will be issued a grade of "CR." Credit derived from Recital Extension will not be counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study will be the cost of 2 graduate credits plus a $400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.

2. Exceptions to Recital Extension:
   a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
   b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, if the student does not take Recital Extension during the Summer, s/he may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.

3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension will be reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, will determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

Incompletes:
All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

Culminating Events:
Comprehensive Final Project:
Students must maintain a list of all literature, including solos, etudes, and excerpts, performed each term in the program, using a printed form provided by the department. During the final term of study, students are required to submit a three-part written project. Part 1 includes lists of music studied/performed in all four terms of lessons; the lists must be signed by the studio teacher. Part 2 includes program notes or background information for any two of the pieces listed in Part 1. The notes should be approximately 500 words each and must contain at least three recognized references, such as Baker's and New Grove. Any online resource must be documented and recognized as appropriate and authoritative. Part 3 is to consist of one of the following:

1. A discussion of a third piece from the submitted lists or one movement of a multi-movement piece from the lists: The length of the piece or movement being discussed should be no less than 8-10 minutes. This discussion must form a paper of no less than 2,000 words. Topics may include (but are not limited to) historical perspectives, performance and performance practice issues, instrumental technical issues, the importance or role of the piece in the literature for the student's instrument, etc. This discussion must be presented as a formal paper with supporting information, including resources, charts, and the like.

OR

2. A theoretical analysis of one of the listed pieces or one movement of a multi-movement piece from the lists: The length of the piece or movement being analyzed should be no less than 8-10 minutes. This analysis should address form, basic harmonic events, large-scale phrasing, performance practice issues, etc., as outlined in a rubric provided by the department.

The written project must be submitted to the Department of Instrumental Studies no later than November 1 for an anticipated December graduation or April 1 for an anticipated May graduation. Documents are distributed among the departmental faculty for review and a grade of either "pass" or "fail." A passing grade from a majority (and no fewer than two) of the department's graduate faculty members is required. Students who do not pass are told what needs to be fixed (content, grammar, etc.) and, using whatever resources they have (e.g., the University's Writing Center), prepare and submit a revision that receives a passing grade. In order for a student to graduate on schedule, any revision that is required must receive a passing grade before the deadline by which names must be submitted for graduation.

Public Recital:
Performance majors present a public recital as the culminating event for the master's degree (MUSC 8984). Graduation recitals are typically one hour in length; presented on-campus in either Rock Hall or Klein Recital Hall; and adjudicated by three full-time music faculty members. The student must show evidence through Temple University transcript records of having taken private lessons up to the time of the graduation recital. Students who wish to play a recital in the early Fall should plan to register for and complete the final term of lessons during the preceding Summer months.

A Recital Permission Form indicating the private teacher's approval for performance of the graduation recital must be signed by the private teacher and submitted six weeks prior to the recital. (If the recital is in the first five weeks of the Spring term, the form must be submitted two weeks before the end of the Fall term.) If required by the private teacher, a Recital Permission Jury must be scheduled at least four weeks prior to the recital. The form is not submitted or a required jury is not scheduled, the department reserves the right to cancel or postpone the recital.

B. Diagnostic Examination in Music History

Students may take each of the five sections of the history test twice. After the second attempt, any section not graded as passing necessitates enrollment in a remedial course(s). Examiners stipulate which section(s) of remedial coursework are required.

The History remedial course is MUST 5005 Remedial Studies in Music History. Each of five sections are enrolled in for one credit and are subtitled according to the period covered in the coursework: Baroque, Classic, Medieval/Renaissance, Romantic, and Twentieth Century. Remediation can be extended over two terms.

C. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
- received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

Professional Development Policy:

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and
open house events; supervising performance classes; and engaging in other academic activities.

Performing Ensembles:

1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.

2. Participation: Master's degree candidates in wind, brass, and percussion instruments must be available for ensemble assignments at the discretion of the department chair, including participation beyond curricular requirements.

3. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair, and the Associate Dean.

Independent Study Courses:

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval will be granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects will be granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

Acceptable English:

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

Graduate Private Lesson Policy:

Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programatically required graduate-level study are taken simultaneously. A $250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

Private applied lessons beyond the four-term requirement currently in effect for graduate performance students may be extended with the permission of the jury, department chair, and the Associate Dean or Dean of the Boyer College of Music and Dance.

Recital Extension:

Students withdrawing from the recital requirement during the recital term will receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course will be offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course will be replaced by a letter grade and MUSC 5000 Recital Extension will be issued a grade of "CR." Credit derived from Recital Extension will not be counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study will be the cost of 2 graduate credits plus a $400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.

2. Exceptions to Recital Extension:
   a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
   b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, if the student does not take Recital Extension during the Summer, s/he may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.

3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension will be reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, will determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

Incompletes:

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

Culminating Events:

Comprehensive Final Project:

Students must maintain a list of all literature, including solos, etudes, and excerpts, performed each term in lessons, using a printed form provided by the department. During the final term of study, students are required to submit a three-part written project. Part 1 includes lists of music studied/performd in all four terms of lessons; the lists must be signed by the studio teacher. Part 2 includes program notes or background information for any two of the pieces listed in Part 1. The notes should be approximately 500 words each and must contain at least three recognized references, such as Baker's and New Grove. Any online resource must be documented and recognized as appropriate and authoritative. Part 3 is to consist of one of the following:

1. A discussion of a third piece from the submitted lists or one movement of a multi-movement piece from the lists: The length of the piece or movement being discussed should be no less than 8-10 minutes. This discussion must form a paper of no less than 2,000 words. Topics may include (but are not limited to) historical perspectives, performance and performance practice issues, instrumental technical issues, the importance or role of the piece in the literature for the student's instrument, etc. This discussion must be presented as a formal paper with supporting information, including resources, charts, and the like.

OR

2. A theoretical analysis of one of the listed pieces or one movement of a multi-movement piece from the lists: The length of the piece or movement being analyzed should be no less than 8-10 minutes. This analysis should address form, basic harmonic events, large-scale
phrasing, performance practice issues, etc., as outlined in a rubric provided by the department.

The written project must be submitted to the Department of Instrumental Studies no later than November 1 for an anticipated December graduation or April 1 for an anticipated May graduation. Documents are distributed among the departmental faculty for review and a grade of either “pass” or “fail.” A passing grade from a majority (and no fewer than two) of the department’s graduate faculty members is required. Students who do not pass are told what needs to be fixed (content, grammar, etc.) and, using whatever resources they have (e.g., the University’s Writing Center), prepare and submit a revision that receives a passing grade. In order for a student to graduate on schedule, any revision that is required must receive a passing grade before the deadline by which names must be submitted for graduation.

Public Recital:
Performance majors present a public recital as the culminating event for the master’s degree (MUSC 8984). Graduation recitals are typically one hour in length; presented on-campus in either Rock Hall or Klein Recital Hall; and adjudicated by three full-time music faculty members. The student must show evidence through Temple University transcript records of having taken private lessons up to the time of the graduation recital. Students who wish to play a recital in the early Fall should plan to register for and complete the final term of lessons during the preceding Summer months.

A Recital Permission Form indicating the private teacher’s approval for performance of the graduation recital must be signed by the private teacher and submitted six weeks prior to the recital. (If the recital is in the first five weeks of the Spring term, the form must be submitted two weeks before the end of the Fall term.) If required by the private teacher, a Recital Permission Jury must be scheduled at least four weeks prior to the recital. If the form is not submitted or a required jury is not scheduled, the department reserves the right to cancel or postpone the recital.

Music Performance/Viola, M.M.

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE (http://www.temple.edu/boyer)

About the Program

The master's degree in Viola Performance develops expertise beyond baccalaureate-level achievement. Students specialize in the study of the major instrument and take courses outside the major area that support advanced musical and academic development. The Department of Instrumental Studies provides the potential professional performer and/or teacher with the finest instrumental training within the context of a comprehensive university. Students study privately with professional artist-teachers and enjoy opportunities for performance in numerous large and chamber music ensembles.

Time Limit for Degree Completion: 6 years

Campus Location: Main

Full-Time/Part-Time Status: The degree program can be completed on a full- or part-time basis.

Interdisciplinary Study: With approval of the major advisor, students may elect to take up to 6 graduate credits outside the field of music.

Accreditation: This degree program is accredited by the National Association of Schools of Music (NASM).

Areas of Specialization: Study focuses on performance of the major instrument, the solo and ensemble literature of the instrument, and academic support areas in music.

Job Prospects: The program prepares musicians for either professional activity or doctoral study.

Non-Matriculated Student Policy: Non-matriculated students may enroll in selected courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

Financing Opportunities: Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance, and/or direct service related to academic programs. Applicants must submit an assistantship/internship application by March 1 to obtain priority consideration for an award. Applications are available online at the Graduate Financial Aid (http://www.temple.edu/boyer/admissions/documents/gradassistantshipform.pdf) page of Boyer's website. Typically these awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral...
students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

**Admission Requirements and Deadlines**

**Application Deadline:**

*Fall:* March 1  
*Spring:* November 1

Applications are processed as they arrive. Late applications may be considered for admission.

**APPLY ONLINE to this graduate program.**

**Letters of Reference:**  
**Number Required:** 2

*From Whom:* Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents, and aptitude for graduate study.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours.

**Bachelor’s Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Statement of Goals:** Include your special interests within the discipline and expectations for the program.

**Standardized Test Scores:**  
TOEFL: 75 iBT or 537 PBT minimum

**Audition:** See [www.temple.edu/boyer for audition repertoire requirements.](https://www.temple.edu/boyer)

**Resume:** Current resume required.

**Transfer Credit:** A student who wishes to transfer credit should speak with her/his academic advisor and obtain a “Request for Transfer of Graduate Credit” form, found in TUportal under the Tools tab within “University Forms.” Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This Policy may preclude the admission of any student who meets the minimum requirements.

**Total Credit Hours** 32

1. M.M. candidates must be available for ensemble assignments, which are determined by the department chair and may exceed curricular requirements.

2. Select from Music, Music Education, Music Studies, or other graduate departments. At least 3 credits must be in academic, non-performance coursework. No more than 2 credits of MUSC 8555 Orchestral Repertoire can be taken as an elective. Advisor approval required.

**Additional Requirements:**

All degree credits are to be earned at Temple University.

**Diagnostic Examinations:**  
All entering Master of Music students are required to take Diagnostic Examinations in Harmony, Counterpoint, Aural Skills, and Music History prior to the first term of graduate study. The purpose of these examinations is to ascertain adequate preparation for graduate study in these areas. Examinations in Harmony, Counterpoint, and Aural Skills may be taken once. The examination in Music History may be taken a second time.

Students who are unable to take the examinations at the designated time may do so using the online proctoring service, Examity® ([https://examity.com](https://examity.com)). Students are responsible for all fees.

Students who opt not to take any or all exams prior to the first semester of study are required to complete remedial coursework within the first academic year.

Depending on the examination results, students may be required to take one or more remedial courses. Remedial courses are graded on a "Credit / No Credit" basis, and the official university transcript will indicate "CR" (for "Credit," meaning that the deficiency has been satisfied) or "NC" (for "No Credit," meaning that the deficiency has not been satisfied). Students must have a "B-" or better average in any remedial course or section to earn the grade of "Credit" and to satisfy the requirement. Students who earn a grade of "NC" (that is, having a class average below "B-") must retake that course or section until an average of "B-" or higher is achieved and a grade of "CR" is recorded on the official
university transcript. Remedial courses do not count toward graduate degree requirements.

It is highly recommended that students complete all remediation coursework during their first academic year of study. An exception may be granted for part-time students. Master of Music students may neither schedule graduation recitals nor take final comprehensive master's examinations until all of the diagnostic examinations and any required remediation have been successfully completed.

A. Diagnostic Examinations in Music Theory, including Harmony, Counterpoint, and Aural Skills

Students may take each portion of the theory test only once. Any section not graded as passing necessitates enrollment in a remedial course(s) during the first term of study. Examiners stipulate which section(s) of remedial coursework are required. Theory remedial courses include:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MUST 5001</td>
<td>Diatonic Harm. Review</td>
<td>1</td>
</tr>
<tr>
<td>MUST 5002</td>
<td>Chromatic Harm. Review</td>
<td>1</td>
</tr>
<tr>
<td>MUST 5003</td>
<td>Counterpoint Review</td>
<td>1</td>
</tr>
<tr>
<td>MUST 5004</td>
<td>Grad Aural Theory Review</td>
<td>3</td>
</tr>
</tbody>
</table>

B. Diagnostic Examination in Music History

Students may take each of the five sections of the history test twice. After the second attempt, any section not graded as passing necessitates enrollment in a remedial course(s). Examiners stipulate which section(s) of remedial coursework are required.

The History remedial course is MUST 5005 Remedial Studies in Music History. Each of five sections are enrolled in for one credit and are subtitled according to the period covered in the coursework: Baroque, Classic, Medieval/Renaissance, Romantic, and Twentieth Century. Remediation can be extended over two terms.

C. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
- received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

**Professional Development Policy:**

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

**Performing Ensembles:**

1. **Touring:** All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.

2. **Participation:** Master's degree candidates in wind, brass, and percussion instruments must be available for ensemble assignments at the discretion of the department chair, including participation beyond curricular requirements.

3. **Non-Credit Participation:** With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair, and the Associate Dean.

**University Orchestra:**

At the master's degree level, all bowed string majors must perform in the University Orchestra each term they receive lessons.

**Independent Study Courses:**

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval will be granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects will be granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

**Acceptable English:**

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

**Graduate Private Lesson Policy:**

Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programatically required graduate-level study are taken simultaneously. A $250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

Private applied lessons beyond the four-term requirement currently in effect for graduate performance students may be extended with the permission of the jury, department chair, and the Associate Dean or Dean of the Boyer College of Music and Dance.

**Recital Extension:**

Students withdrawing from the recital requirement during the recital term will receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course will be offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course will be replaced by a letter grade and MUSC 5000 Recital Extension will
be issued a grade of “CR.” Credit derived from Recital Extension will not be counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study will be the cost of 2 graduate credits plus a $400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.

2. Exceptions to Recital Extension:
   a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
   b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, if the student does not take Recital Extension during the Summer, she may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.

3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension will be reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, will determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

Incompletes:
All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

Culminating Events:
Comprehensive Final Project:
Students must maintain a list of all literature, including solos, etudes, and excerpts, performed each term in lessons, using a printed form provided by the department. During the final term of study, students are required to submit a three-part written project. Part 1 includes lists of music studied/performe in all four terms of lessons; the lists must be signed by the studio teacher. Part 2 includes program notes or background information for any two of the pieces listed in Part 1. The notes should be approximately 500 words each and must contain at least three recognized references, such as Baker’s and New Grove. Any online resource must be documented and recognized as appropriate and authoritative. Part 3 is to consist of one of the following:

1. A discussion of a third piece from the submitted lists or one movement of a multi-movement piece from the lists: The length of the piece or movement being discussed should be no less than 8-10 minutes. This discussion must form a paper of no less than 2,000 words. Topics may include (but are not limited to) historical perspectives, performance and performance practice issues, instrumental technical issues, the importance or role of the piece in the literature for the student’s instrument, etc. This discussion must be presented as a formal paper with supporting information, including resources, charts, and the like. OR

2. A theoretical analysis of one of the listed pieces or one movement of a multi-movement piece from the lists: The length of the piece or movement being analyzed should be no less than 8-10 minutes. This analysis should address form, basic harmonic events, large-scale phrasing, performance practice issues, etc., as outlined in a rubric provided by the department.

The written project must be submitted to the Department of Instrumental Studies no later than November 1 for an anticipated December graduation or April 1 for an anticipated May graduation. Documents are distributed among the departmental faculty for review and a grade of either “pass” or “fail.” A passing grade from a majority (and no fewer than two) of the department’s graduate faculty members is required. Students who do not pass are told what needs to be fixed (content, grammar, etc.) and, using whatever resources they have (e.g., the University’s Writing Center), prepare and submit a revision that receives a passing grade. In order for a student to graduate on schedule, any revision that is required must receive a passing grade before the deadline by which names must be submitted for graduation.

Public Recital:
Performance majors present a public recital as the culminating event for the master’s degree (MUSC 8984). Graduation recitals are typically one hour in length; presented on-campus in either Rock Hall or Klein Recital Hall; and adjudicated by three full-time music faculty members. The student must show evidence through Temple University transcript records of having taken private lessons up to the time of the graduation recital. Students who wish to play a recital in the early Fall should plan to register for and complete the final term of lessons during the preceding Summer months.

A Recital Permission Form indicating the private teacher’s approval for performance of the graduation recital must be signed by the private teacher and submitted six weeks prior to the recital. (If the recital is in the first five weeks of the Spring term, the form must be submitted two weeks before the end of the Fall term.) If required by the private teacher, a Recital Permission Jury must be scheduled at least four weeks prior to the recital. If the form is not submitted or a required jury is not scheduled, the department reserves the right to cancel or postpone the recital.

Total Credit Hours: 32

¹ M.M. candidates must be available for ensemble assignments, which are determined by the department chair and may exceed curricular requirements.

² Select from Music, Music Education, Music Studies, or other graduate departments. At least 3 credits must be in academic, non-performance coursework. No more than 2 credits of MUSC 8555 Orchestral Repertoire can be taken as an elective. Advisor approval required.

Additional Requirements:

All degree credits are to be earned at Temple University.

Diagnostic Examinations:

All entering Master of Music students are required to take Diagnostic Examinations in Harmony, Counterpoint, Aural Skills, and Music History prior to the first term of graduate study. The purpose of these examinations is to ascertain adequate preparation for graduate study in these areas. Examinations in Harmony, Counterpoint, and Aural Skills may be taken once. The examination in Music History may be taken a second time.

Students who are unable to take the examinations at the designated time may do so using the online proctoring service, Examity® (https://examity.com). Students are responsible for all fees.

Students who opt not to take any or all exams prior to the first semester of study are required to complete remedial coursework within the first academic year.

Depending on the examination results, students may be required to take one or more remedial courses. Remedial courses are graded on a "Credit / No Credit" basis, and the official university transcript will indicate "CR" (for "Credit," meaning that the deficiency has been satisfied) or "NC" (for "No Credit," meaning that the deficiency has not been satisfied). Students must have a "B-" or better average in any remedial course or section to earn the grade of "Credit" and to satisfy the requirement. Students who earn a grade of "NC" (that is, having a class average below "B-") must retake that course or section until an average of "B-" or higher is achieved and a grade of "CR" is recorded on the official university transcript. Remedial courses do not count toward graduate degree requirements.

It is highly recommended that students complete all remediation coursework during their first academic year of study. An exception may be granted for part-time students. Master of Music students may neither schedule graduation recitals nor take final comprehensive master’s examinations until all of the diagnostic examinations and any required remediation have been successfully completed.

A. Diagnostic Examinations in Music Theory, including Harmony, Counterpoint, and Aural Skills

Students may take each portion of the theory test only once. Any section not graded as passing necessitates enrollment in a remedial course(s) during the first term of study. Examiners stipulate which section(s) of remedial coursework are required. Theory remedial courses include:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MUST 5001</td>
<td>Diatonic Harm. Review</td>
<td>1</td>

<td>1</td>
</tr>
<tr>
<td>MUST 5003</td>
<td>Counterpoint Review</td>
<td>1</td>
</tr>
<tr>
<td>MUST 5004</td>
<td>Grad Aural Theory Review</td>
<td>3</td>
</tr>
</tbody>
</table>

B. Diagnostic Examination in Music History

Students may take each of the five sections of the history test twice. After the second attempt, any section not graded as passing necessitates enrollment in a remedial course(s). Examiners stipulate which section(s) of remedial coursework are required.

The History remedial course is MUST 5005 Remedial Studies in Music History. Each of five sections are enrolled in for one credit and are subtitled according to the period covered in the coursework: Baroque, Classic, Medieval/Renaissance, Romantic, and Twentieth Century. Remediation can be extended over two terms.

C. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
- received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

Professional Development Policy:

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

Performing Ensembles:
1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.

2. Participation: Master’s degree candidates in wind, brass, and percussion instruments must be available for ensemble assignments at the discretion of the department chair, including participation beyond curricular requirements.

3. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair, and the Associate Dean.

University Orchestra:
At the master's degree level, all bowed string majors must perform in the University Orchestra each term they receive lessons.

Independent Study Courses:
Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students’ major advisor, and the Associate Dean. Approval will be granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects will be granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student’s curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

Acceptable English:
All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College’s statement on plagiarism and academic honesty.

Graduate Private Lesson Policy:
Weekly one-hour private lessons are provided for all matriculated master’s and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A $250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

Private applied lessons beyond the four-term requirement currently in effect for graduate performance students may be extended with the permission of the jury, department chair, and the Associate Dean or Dean of the Boyer College of Music and Dance.

Recital Extension:
Students withdrawing from the recital requirement during the recital term will receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course will be offered on a “Credit/No Credit” basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course will be replaced by a letter grade and MUSC 5000 Recital Extension will be issued a grade of “CR.” Credit derived from Recital Extension will not be counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study will be the cost of 2 graduate credits plus a $400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.

2. Exceptions to Recital Extension:
   a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
   b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, if the student does not take Recital Extension during the Summer, s/he may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.

3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension will be reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, will determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

Incompletes:
All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

Culminating Events:
Comprehensive Final Project:
Students must maintain a list of all literature, including solos, etudes, and excerpts, performed each term in lessons, using a printed form provided by the department. During the final term of study, students are required to submit a three-part written project. Part 1 includes lists of music studied/performèd in all four terms of lessons; the lists must be signed by the studio teacher. Part 2 includes program notes or background information for any two of the pieces listed in Part 1. The notes should be approximately 500 words each and must contain at least three recognized references, such as Baker’s and New Grove. Any online resource must be documented and recognized as appropriate and authoritative. Part 3 is to consist of one of the following:

1. A discussion of a third piece from the submitted lists or one movement of a multi-movement piece from the lists: The length of the piece or movement being discussed should be no less than 8-10 minutes. This discussion must form a paper of no less than 2,000 words. Topics may include (but are not limited to) historical perspectives, performance and performance practice issues, instrumental technical issues, the importance or role of the piece in the literature for the student’s instrument, etc. This discussion must be presented as a formal paper with supporting information, including resources, charts, and the like.
   OR

2. A theoretical analysis of one of the listed pieces or one movement of a multi-movement piece from the lists: The length of the piece or movement being analyzed should be no less than 8-10 minutes. This analysis should address form, basic harmonic events, large-scale phrasing, performance practice issues, etc., as outlined in a rubric provided by the department.
The written project must be submitted to the Department of Instrumental Studies no later than November 1 for an anticipated December graduation or April 1 for an anticipated May graduation. Documents are distributed among the departmental faculty for review and a grade of either “pass” or “fail.” A passing grade from a majority (and no fewer than two) of the department’s graduate faculty members is required. Students who do not pass are told what needs to be fixed (content, grammar, etc.) and, using whatever resources they have (e.g., the University’s Writing Center), prepare and submit a revision that receives a passing grade. In order for a student to graduate on schedule, any revision that is required must receive a passing grade before the deadline by which names must be submitted for graduation.

Public Recital:
Performance majors present a public recital as the culminating event for the master’s degree (MUSC 8984). Graduation recitals are typically one hour in length; presented on-campus in either Rock Hall or Klein Recital Hall; and adjudicated by three full-time music faculty members. The student must show evidence through Temple University transcript records of having taken private lessons up to the time of the graduation recital. Students who wish to play a recital in the early Fall should plan to register for and complete the final term of lessons during the preceding Summer months.

A Recital Permission Form indicating the private teacher’s approval for performance of the graduation recital must be signed by the private teacher and submitted six weeks prior to the recital. (If the recital is in the first five weeks of the Spring term, the form must be submitted two weeks before the end of the Fall term.) If required by the private teacher, a Recital Permission Jury must be scheduled at least four weeks prior to the recital. If the form is not submitted or a required jury is not scheduled, the department reserves the right to cancel or postpone the recital.

Music Performance/Voice, M.M.

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE (http://www.temple.edu/boyer)

About the Program
The master’s degree in Voice Performance prepares singers for multifaceted careers as well-rounded performers on concert and operatic stages and/or as teachers of voice. The ultimate goal of the program is to produce singing artists capable of competing successfully in the professional world of music.

Time Limit for Degree Completion: 6 years

Campus Location: Main

Full-Time/Part-Time Status: The degree program can be completed on a full- or part-time basis.

Accreditation: This degree program is accredited by the National Association of Schools of Music (NASM).

Areas of Specialization: The program offers a systematic approach to vocal technique; specialized studies in vocal literature; the refinement of language and diction skills; the development of acting techniques; the continued refinement of musical and theoretical skills; advanced study in musical style and performance practice; and the provision of recital, operatic, and concert performance opportunities designed to emulate a professional environment.

Job Prospects: The program prepares musicians for either professional activity or doctoral study.

Non-Matriculated Student Policy: Non-matriculated students may enroll in selected courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

Financing Opportunities: Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance, and/or direct service related to academic programs. Applicants must submit an assistantship/internship application by March 1 to obtain priority consideration for an award. Applications are available online at the Graduate Financial Aid (http://www.temple.edu/boyer/admissions/documents/gradassistantshipform.pdf) page of Boyer’s website. Typically these awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master’s students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.
Admission Requirements and Deadlines

Application Deadline:

Fall: March 1
Spring: November 1

Applications are processed as they arrive. Late applications may be considered for admission.

APPLY ONLINE to this graduate program.

Letters of Reference:
Number Required: 2

From Whom: Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents, and aptitude for graduate study.

Coursework Required for Admission Consideration: All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours.

Bachelor's Degree in Discipline/Related Discipline: A degree in Music is expected.

Statement of Goals: Include your special interests within the discipline and expectations for the program.

Standardized Test Scores:
TOEFL: 75 iBT or 537 PBT minimum

Audition: See www.temple.edu/boyer for audition repertoire requirements.

Resume: Current resume required.

Transfer Credit: A student who wishes to transfer credit should speak with her/his academic advisor and obtain a "Request for Transfer of Graduate Credit" form, found in TUPortal under the Tools tab within "University Forms." Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

Other: Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This Policy may preclude the admission of any student who meets the minimum requirements.

Total Credit Hours 30

1 Select from Music, Music Education, Music Studies, or other graduate departments. At least 3 credits must be in academic, non-performance coursework. No more than 2 credits of MUSC 8215 Vocal Coaching can be taken as an elective. Advisor approval required.

Language Examination: Candidates in the Voice Performance program must present undergraduate coursework in French, German, and Italian languages (or pass a translating and speaking examination at Temple) at the time of admission. Where the transcript or pass-off examination does not reveal such study, the appropriate deficiency course(s) must be taken prior to completion of the master's degree.

Additional Requirements:

All degree credits are to be earned at Temple University.

Diagnostic Examinations:
All entering Master of Music students are required to take Diagnostic Examinations in Harmony, Counterpoint, Aural Skills, and Music History prior to the first term of graduate study. The purpose of these examinations is to ascertain adequate preparation for graduate study in these areas. Examinations in Harmony, Counterpoint, and Aural Skills may be taken once. The examination in Music History may be taken a second time.

Students who are unable to take the examinations at the designated time may do so using the online proctoring service, Examity® (https://examity.com). Students are responsible for all fees.
Students who opt not to take any or all exams prior to the first semester of study are required to complete remedial coursework within the first academic year.

Depending on the examination results, students may be required to take one or more remedial courses. Remedial courses are graded on a "Credit / No Credit" basis, and the official university transcript will indicate "CR" (for "Credit," meaning that the deficiency has been satisfied) or "NC" (for "No Credit," meaning that the deficiency has not been satisfied). Students must have a "B-" or better average in any remedial course or section to earn the grade of "Credit" and to satisfy the requirement. Students who earn a grade of "NC" (that is, having a class average below "B-") must retake that course or section until an average of "B-" or higher is achieved and a grade of "CR" is recorded on the official university transcript. Remedial courses do not count toward graduate degree requirements.

It is highly recommended that students complete all remediation coursework during their first academic year of study. An exception may be granted for part-time students. Master of Music students may neither schedule graduation recitals nor take final comprehensive master's examinations until all of the diagnostic examinations and any required remediation have been successfully completed.

A. Diagnostic Examinations in Music Theory, including Harmony, Counterpoint, and Aural Skills

Students may take each portion of the theory test only once. Any section not graded as passing necessitates enrollment in a remedial course(s) during the first term of study. Examiners stipulate which section(s) of remedial coursework are required. Theory remedial courses include:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>

<tr>
<td>MUST 5003</td>
<td>Counterpoint Review</td>
<td>1</td>
</tr>
<tr>
<td>MUST 5004</td>
<td>Grad Aural Theory Review</td>
<td>3</td>
</tr>
</tbody>
</table>

B. Diagnostic Examination in Music History

Students may take each of the five sections of the history test twice. After the second attempt, any section not graded as passing necessitates enrollment in a remedial course(s). Examiners stipulate which section(s) of remedial coursework are required.

The History remedial course is MUST 5005 Remedial Studies in Music History. Each of five sections is enrolled in for one credit and are subtitled according to the period covered in the coursework: Baroque, Classic, Medieval/Renaissance, Romantic, and Twentieth Century. Remediation can be extended over two terms.

C. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
- received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

In addition to the written diagnostic examinations required upon entrance to the program, Voice majors take a functional piano examination encompassing the following points:

1. Playing a prepared accompaniment (music can be used).
2. Sight-reading a simple accompaniment.
3. Improvising an accompaniment to a simple melody.

Professional Development Policy:

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

Performing Ensembles:

1. Touring: All students in touring ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.
2. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair, and the Associate Dean.

Independent Study Courses:

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval will be granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects will be granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

Acceptable English:

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College’s statement on plagiarism and academic honesty.

Graduate Private Lesson Policy:

Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A $250 per term lesson fee (subject
to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

Private applied lessons beyond the four-term requirement currently in effect for graduate performance students may be extended with the permission of the jury, department chair, and the Associate Dean or Dean of the Boyer College of Music and Dance.

Recital Extension:
Students withdrawing from the recital requirement during the recital term will receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course will be offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course will be replaced by a letter grade and MUSC 5000 Recital Extension will be issued a grade of "CR." Credit derived from Recital Extension will not be counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study will be the cost of 2 graduate credits plus a $400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.

2. Exceptions to Recital Extension:
   a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
   b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, if the student does not take Recital Extension during the Summer, s/he may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.

3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension will be reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, will determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

Incompletes:
All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

Culminating Events:
Comprehensive Examination:
The Voice and Opera program requires a one-hour comprehensive examination in music literature and theory. A list of 100 musical works of the standard literature from the Middle Ages through the 20th century is made available to the student when admitted to the College. This examination should be taken in the penultimate term of study. The list is intended as an aid to preparation for the examination.

The examination is in three parts: identification of specific selections from a list of 100 works, identification of a "mystery" selection, and score analysis. Two graduate faculty members grade the examination.

Students must pass all three sections. A score of 70% or better must be achieved in the identification section, and a "pass" or "weak pass" must be achieved in the "mystery" selection and the score analysis section.

The examination is administered approximately ten times each year. Students notify the Assistant Dean no later than one week prior to the requested examination administration date. For examination dates, see the Graduate Music Examination Schedule (http://www.temple.edu/boyer/admissions/graduate-admissions/gradmusicexamschedule.asp).

Public Recital:
Performance majors present a public recital as the culminating event for the master's degree (MUSC 8284). Graduation recitals are typically one hour in length; presented on-campus in either Rock Hall or Klein Recital Hall and adjudicated by three full-time music faculty members. The student must show evidence through Temple University transcript records of having taken private lessons up to the time of the graduation recital. Students who wish to play a recital in the early Fall should plan to register for and complete the final term of lessons during the preceding Summer months.

Music Performance/Bassoon, D.M.A.

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE (http://www.temple.edu/boyer)

About the Program
The objective of the D.M.A. program in Bassoon Performance is to foster growth and development of the highest and most sophisticated
expression of musical interpretation through performance under the guidance of a very highly specialized faculty.

**Time Limit for Degree Completion:** 7 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Accreditation:** This degree program is accredited by the National Association of Schools of Music (NASM).

**Areas of Specialization:** Diverse areas of study are included to ensure the broadest possible cultivation and expansion of students' talents.

**Job Prospects:** Graduates of the program typically find employment in professional music ensembles throughout the world, in colleges and universities, and in private teaching studios, among other employment venues.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in selected courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

**Financing Opportunities:** Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance, and/or direct service related to academic programs. Applicants must submit an assistantship/internship application by March 1 to obtain priority consideration for an award. Applications are available online at the Graduate Financial Aid (http://www.temple.edu/boyer/admissions/documents/gradassistantshipform.pdf) page of Boyer's website. Typically these awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

**Admission Requirements and Deadlines**

**Application Deadline:**

*Fall: November 15*

*APPLY ONLINE to this graduate program.*

**Letters of Reference:**

*Number Required: 2*

*From Whom:* Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents, and aptitude for graduate study.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours. Doctoral candidates must hold the Master of Music degree (or the equivalent) in the field of specialization from an accredited institution. Applicants accepted with deficiencies will find the deficiencies noted in the letter of admission. Deficiencies must be addressed prior to completion of the degree.

**Master's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Bachelor's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Statement of Goals:** Include your special interests within the discipline and expectations for the program.

**Standardized Test Scores:**

*TOEFL: 100 iBT or 600 PBT minimum*

**Prescreening Video and Audition:** Applicants submit a prescreening video via Acceptd (https://app.getacceptd.com/templeboyer). This recording may contain representative movements of the audition material, with the majority of the material having been recorded within the last 12 months. Video recordings of accompanied works must have piano or orchestral accompaniment.

If preliminary approval is granted, an in-person live audition is arranged. Audition repertoire requirements include:

- A concerto, sonata, or solo piece from the Classical, Romantic, or Impressionistic period.
- A concerto, sonata, or solo piece from the 20th Century.
- Excerpts from the standard orchestral repertoire.

All works, except sonatas, should be memorized. Applicants must arrange for an accompanist for the live audition.

Note that video recordings alone are not acceptable for admission, except in the case of students living outside the United States. In this case, applicants must submit a video recording of complete works.

**Scholarly Paper:** Applicants must upload a scholarly paper to Acceptd (https://app.getacceptd.com/templeboyer).

**Interview:** Applicants are interviewed by the department chair and Associate Dean at the time of the live audition.

**Resume:** Current resume required.

**Writing Examination:** An on-site Writing Examination is required as part of the doctoral admissions process. Remedial coursework may be required.

**Advanced Standing:** The D.M.A. program in Music Performance consists of 55 discrete credits taken beyond the master's degree. At the time of admission, the entire master's degree serves as advanced standing credits. These credits are not counted toward the 55 required credits of the doctoral degree. However, students may transfer into the doctoral program up to 12 additional graduate credits in coursework taken beyond the master's degree. Typically, this coursework is reviewed after admission to the D.M.A. degree and must be approved by the major advisor and the Associate Dean. The maximum number of advanced standing credits awarded is 30.

**Additional Requirements:** Applicants must:

1. Include with the application a repertoire list indicating works previously studied. The list should indicate which of the works were performed publicly and, if possible, when and where they were performed.
2. Show transcript evidence at the master’s level in the area of bibliographical resources in music. If no transcript evidence is available, students must take MUST 8701 Research in Music in addition to the 6 required credits within the History/Theory area.

Other: Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College’s Optimum Enrollment Policy. This Policy may preclude the admission of any student who meets the minimum requirements.

Electives

- Music History ... 3
- Advanced Music ... 3

Minor Area in Music \(^1\) 12

Total Credit Hours 54

\(^1\) Select from courses at the level of MUSC 8404 or higher.

Recitals:

1. Solo public recital by the conclusion of the fourth term of lessons (MUSC 9534)
2. Solo public recital (MUSC 9184) or Chamber Music Recital (MUSC 9884)
3. Lecture Recital (MUSC 9684) or Performance with Orchestra (MUSC 9784)
4. Final Doctoral Recital (MUSC 9984)

Additional Requirements:

All degree credits are to be earned at Temple University.

Written Entrance Examinations:

All doctoral students must take written entrance exams prior to or during the first term of doctoral study. Candidates who fail the entrance examinations the first time may, upon application to the Associate Dean for Graduate Studies of the Boyer College of Music and Dance, be permitted to take the examinations a second time. A third opportunity is not allowed.

To continue registration in the doctoral program beyond the second term of study, all portions of the examinations must be passed or the appropriate review courses (or the equivalent, as determined by the examining department) must be in progress. Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date.

1. Music History Exam: A general examination covering the history of music is administered. Questions relative to forms, styles, and periods of music are included. It is expected that all examinees are acquainted with the standard literature of music.
2. Harmony Exam: This exam involves completion of a harmonic excerpt in advanced chromatic idiom and the creation of a bass line with figuration (figured bass) in Baroque style.
3. Counterpoint Exam: From a given motive, approximately 20 measures of imitative counterpoint in three parts are to be completed.
4. Form and Analysis Exam: A score is provided at the examination that requires analysis of specified passages.
5. Literature and Pedagogy Exam: This examination focuses on the literature and pedagogy of the instrument of specialization.
6. Writing Sample: A 90-minute examination of the student’s ability to write at the doctoral level is conducted. Examination topics are of a general nature.

Diagnostic Recital:

A diagnostic recital is required and must be performed before a faculty jury at the conclusion of the first term of study. The candidate must contact her/his advisor to arrange the jury. The recital consists of a full program, approximately 45 minutes in length, and may include the performance (with music) of a new composition that is presented to the applicant for study 48 hours in advance of the jury. An analysis of repertoire and technical needs results.

Continuous Registration:

Continuous registration of at least 3 credits must be maintained each term, with the exception of Summer, from the time of acceptance into the D.M.A. program in Music Performance until the completion of all coursework.

Continuation in the D.M.A. Program:
Each course or seminar requires an end-of-term final grade based on papers prepared, recitals presented, discussion, and/or examinations taken during the course of the term. Each term of private study culminates in a performance examination or jury, except during terms in which the student has presented one of the required adjudicated recitals. Screening for continuance in the program after the first term of study is conducted at adjudicated recitals, end-of-the-term juries, and major examinations. This ensures that only the most qualified students continue beyond the early stages of the program.

For all doctoral programs, only grades from "A" to "B-" can be applied toward degree requirements. Grades of less than "B-" cannot be counted toward the degree. If the student earns a grade of less than "B-" s/he may, with permission of the department chair and the Associate Dean, retake the term of study one additional time. The same applies to recitals.

**Professional Development Policy:**

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

**Performing Ensembles:**

1. **Touring:** All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.
2. **Non-Credit Participation:** With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair, and the Associate Dean.

**Independent Study Courses:**

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval will be granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects will be granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

**Acceptable English:**

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

**Graduate Private Lesson Policy:**

Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A $250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

The four terms of private lessons must be taken consecutively, with the exception of summers. Any deviation from this must have the approval of the advisor, department chair, and the Associate Dean of the Boyer College of Music and Dance. Graduate assistantships and other forms of University-sponsored financial aid do not cover private lesson and recital extension fees.

**Written Preliminary Examinations:**

The written preliminary examinations may be taken during the final term of coursework, but no later than in the term after completion of coursework. They are administered several times each calendar year, and span two consecutive days of six hours of examination each day. Written and performance examinations should be taken no later than the end of the fifth year to allow for the successful completion of the Final Recital and the writing of the monograph. Preliminary examinations must be successfully completed before formal work on the monograph may be undertaken and before the Final Recital may be presented.

Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date. Students are then notified in writing of the specific dates and administration times of the preliminary examinations for which they have been scheduled.

The examinations consist of questions relating to the major and minor areas and to musical style; require the student to comment articulately on the style and historical significance of musical compositions; and entail the student discussing and defending the principles of performance on the basis of which s/he would undertake to perform any composition in her/his major area. The questions are prepared by faculty members within the student's major and minor subject areas. At least two graduate faculty members read each section of the written preliminary examinations. Students typically are graded "Pass" or "Fail" based on a consensus of the examination readers.

**Oral Preliminary Examinations:**

For those students who pass the written preliminary examinations, no oral preliminary examination is required. (This refers only to the oral preliminary examination and does not refer in any way to the oral defense of the dissertation/monograph.)

If a student fails one or more portions of the written preliminary examination, an oral examination is administered by the major advisor and a minimum of two additional faculty members. In the case of failure in one subject area, two members of that department are asked by the student's major advisor to participate with the major advisor in the examination. In the case of failure in more than one subject area, at least one faculty member from each of the departments in which the failure occurred is asked by the student's major advisor to participate in the examination.

The examination is to be a formal oral examination rather than an informal meeting with graduate faculty from departments in which the
examination revealed that the student needs further work. This does not preclude such informal meetings, however, in preparation for the oral examination. Upon passing the oral examination, the student, as advised by the examining committee, is permitted to schedule a second and final attempt at the failed portions of the written examination.

**Final Recital and Monograph Proposal:**
After the successful completion of the written preliminary examinations, MUSC 9984 DMA Final Recital and written monograph are undertaken in consultation with the major advisor, the department chair, and the Doctoral Advisory Committee (DAC). The DAC shall be appointed by the Associate Dean to adjudicate the Final Recital and to guide the student in writing both the monograph proposal and the final document itself. When the student, in consultation with the major advisor and department chair, has identified a tentative advisory committee, the chair gives those names to the Associate Dean for consideration. The Associate Dean appoints the DAC. The DAC consists of no fewer than three persons: two faculty members from within the department, and a third person from outside the department. Members of the DAC serve as the adjudicators of the Final Recital.

After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers within 30 days one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School. Students register for MUSC 9998 during the writing of the monograph proposal and MUSC 9999 after the proposal has been officially approved. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 Monograph Research during their program as a whole and must register for a minimum of 1 such credit each term.

**Recital Extension:**
Students withdrawing from the recital requirement during the recital term will receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course will be offered on a “Credit/No Credit” basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course will be replaced by a letter grade and MUSC 5000 Recital Extension will not be counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study will be the cost of 2 graduate credits plus a $400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.

2. Exceptions to Recital Extension:
   a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
   b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, if the student does not take Recital Extension during the Summer, s/he may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.

3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension will be reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, will determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

**Final Oral Examination:**
When the monograph is complete, the major advisor of the Doctoral Advisory Committee (DAC) asks the Associate Dean to appoint an outside reader. The DAC plus the outside reader constitute the Dissertation Examining Committee (DEC) for the monograph defense. Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary.

Doctoral candidates must submit a defense copy of the monograph to members of the DEC and the Associate Dean at least two weeks prior to the defense. Students should register for MUSC 9999 Monograph Research (1-6 credits) each term, Fall and Spring, until the final project has been successfully defended. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 during their program as a whole, but must register for a minimum of one such credit each term.

**Incompletes:**
All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

**Culminating Events:**

**Final Recital:**
Students may present the DMA Final Recital (MUSC 9994) after the preliminary examination has been completed and the DAC has been appointed.

**Proposal:**
After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School.

**Monograph:** Early in the term in which a defense of the monograph is anticipated, the major advisor notifies the Associate Dean that it is time to appoint the Dissertation Examining Committee (DEC). The DEC consists of the DAC plus an “outside” reader, who is an additional graduate faculty member from Temple or another university, but not from the faculty of the student’s home department.

Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary. This includes the “Announcement of Oral Defense” form, which must bear all appropriate signatures and be submitted to the Associate Dean.

Two weeks prior to the oral defense, the student submits individual copies of the abstract and the completed dissertation/monograph to the Associate Dean and each member of the DEC. The graduate secretary notifies the Graduate School and posts notices of the impending defense on bulletin boards located within the Boyer College of Music and Dance. All members of the DEC attend the oral defense and then vote to pass
or fail the monograph and its defense after the conclusion of the public presentation.

Changes in membership of a DAC or a DEC must be approved by the Associate Dean. The change also must be communicated to the Graduate School.

Music Performance/Cello, D.M.A.

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE (http://www.temple.edu/boyer)

About the Program

The objective of the D.M.A. program in Cello Performance is to foster growth and development of the highest and most sophisticated expression of musical interpretation through performance under the guidance of a very highly specialized faculty.

Time Limit for Degree Completion: 7 years

Campus Location: Main

Full-Time/Part-Time Status: The degree program can be completed on a full- or part-time basis.

Accreditation: The degree program is accredited by the National Association of Schools of Music (NASM).

Areas of Specialization: Diverse areas of study are included to ensure the broadest possible cultivation and expansion of students' talents.

Job Prospects: Graduates of the program typically find employment in professional music ensembles throughout the world, in colleges and universities, and in private teaching studios, among other employment venues.

Non-Matriculated Student Policy: Non-matriculated students may enroll in selected courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

Financing Opportunities: Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance, and/or direct service related to academic programs. Applicants must submit an assistantship/internship application by March 1 to obtain priority consideration for an award. Applications are available online at the Graduate Financial Aid (http://www.temple.edu/boyer/admissions/documents/gradassistantshipform.pdf) page of Boyer's website. Typically these awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

Admission Requirements and Deadlines

Application Deadline:
Fall: November 15

APPLY ONLINE to this graduate program.

Letters of Reference:
Number Required: 2

From Whom: Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents, and aptitude for graduate study.

Coursework Required for Admission Consideration: All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours. Doctoral candidates must hold the Master of Music degree (or the equivalent) in the field of specialization from an accredited institution. Applicants accepted with deficiencies will find the deficiencies noted in the letter of admission. Deficiencies must be addressed prior to completion of the degree.

Master's Degree in Discipline/Related Discipline: A degree in Music is expected.

Bachelor's Degree in Discipline/Related Discipline: A degree in Music is expected.

Statement of Goals: Include your special interests within the discipline and expectations for the program.

Standardized Test Scores:
TOEFL: 100 iBT or 600 PBT minimum
Prescreening Video and Audition: Applicants submit a prescreening video via Acceptd (https://app.getacceptd.com/templeboyer). This recording may contain representative movements of the audition material, with the majority of the material having been recorded within the last 12 months. Video recordings of accompanied works must have piano or orchestral accompaniment.

If preliminary approval is granted, an in-person live audition is arranged. Audition repertoire requirements include:

- A Bach unaccompanied suite (complete).
- A major concerto such as Dvorak, Haydn, Lalo, Schumann, Shostakovich, or Tchaikovsky’s Variations on a Rococo Theme.
- A sonata of contrasting period/style from the concerto, i.e., Classical period if the concerto is Romantic or Romantic period if the concerto is Classical.
- A virtuoso composition such as At the Fountain, Elfentanz, or Weber’s Adagio and Rondo.

Note that video recordings alone are not acceptable for admission, except in the case of students living outside the United States. In this case, applicants must submit a video recording of complete works.

Interview: Applicants are interviewed by the department chair and Associate Dean at the time of the live audition.

Resume: Current resume required.

Writing Examination: An on-site Writing Examination is required as part of the doctoral admissions process. Remedial coursework may be required.

Advanced Standing: The D.M.A. program in Music Performance consists of 55 discrete credits taken beyond the master’s degree. At the time of admission, the entire master’s degree serves as advanced standing credits. These credits are not counted toward the 55 required credits of the doctoral degree. However, students may transfer into the doctoral program up to 12 additional graduate credits in coursework taken beyond the master’s degree. Typically, this coursework is reviewed after admission to the D.M.A. degree and must be approved by the major advisor and the Associate Dean. The maximum number of advanced standing credits awarded is 32.

Additional Requirements: Applicants must:

1. Include with the application a repertoire list indicating works previously studied. The list should indicate which of the works were performed publicly and, if possible, where and when they were performed.
2. Show transcript evidence at the master’s level in the area of bibliographical resources in music. If no transcript evidence is available, students must take MUST 8701 Research in Music in addition to the 6 required credits within the History/Theory area.

Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date.

1. Music History Exam: A general examination covering the history of music is administered. Questions relative to forms, styles, and periods of music are included. It is expected that all examinees are acquainted with the standard literature of music.
2. Harmony Exam: This exam involves completion of a harmonic excerpt in advanced chromatic idiom and the creation of a bass line with figuration (figured bass) in Baroque style.
3. Counterpoint Exam: From a given motive, approximately 20 measures of imitative counterpoint in three parts are to be completed.
4. Form and Analysis Exam: A score is provided at the examination that requires analysis of specified passages.
5. Literature and Pedagogy Exam: This examination focuses on the literature and pedagogy of the instrument of specialization.
6. Writing Sample: A 90-minute examination of the student’s ability to write at the doctoral level is conducted. Examination topics are of a general nature.

Diagnostic Recital:
A diagnostic recital is required and must be performed before a faculty jury at the conclusion of the first term of study. The candidate must contact her/his advisor to arrange the jury. The recital consists of a full program, approximately 45 minutes in length, and may include the performance (with music) of a new composition that is presented to the applicant for study 48 hours in advance of the jury. An analysis of repertoire and technical needs results.

Continuous Registration:
Continuous registration of at least 3 credits must be maintained each term, with the exception of Summer, from the time of acceptance into the D.M.A. program in Music Performance until the completion of all coursework.

Continuation in the D.M.A. Program:
Each course or seminar requires an end-of-term final grade based on papers prepared, recitals presented, discussion, and/or examinations taken during the course of the term. Each term of private study culminates in a performance examination or jury, except during terms in which the student has presented one of the required adjudicated recitals. Screening for continuance in the program after the first term of study is conducted at adjudicated recitals, end-of-the-term juries, and major examinations. This ensures that only the most qualified students continue beyond the early stages of the program.

For all doctoral programs, only grades from “A” to “B-” can be applied toward degree requirements. Grades of less than “B-” cannot be counted toward the degree. If the student earns a grade of less than “B-,” s/he may, with permission of the department chair and the Associate Dean, retake the term of study one additional time. The same applies to recitals.

Professional Development Policy:
In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

Performing Ensembles:
1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.
2. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair, and the Associate Dean.

Independent Study Courses:
Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students’ major advisor, and the Associate Dean. Approval will be granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects will be granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student’s curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

Acceptable English:
All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College’s statement on plagiarism and academic honesty.

Graduate Private Lesson Policy:
Weekly one-hour private lessons are provided for all matriculated master’s and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A $250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

The four terms of private lessons must be taken consecutively, with the exception of summers. Any deviation from this must have the approval of the advisor, department chair, and the Associate Dean of the Boyer
College of Music and Dance. Graduate assistantships and other forms of University-sponsored financial aid do not cover private lesson and recital extension fees.

Written Preliminary Examinations:
The written preliminary examinations may be taken during the final term of coursework, but no later than in the term after completion of coursework. They are administered several times each calendar year, and span two consecutive days of six hours of examination each day. Written and performance examinations should be taken no later than the end of the fifth year to allow for the successful completion of the Final Recital and the writing of the monograph. Preliminary examinations must be successfully completed before formal work on the monograph may be undertaken and before the Final Recital may be presented.

Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date. Students are then notified in writing of the specific dates and administration times of the preliminary examinations for which they have been scheduled.

The examinations consist of questions relating to the major and minor areas and to musical style; require the student to comment articulately on the style and historical significance of musical compositions; and entail the student discussing and defending the principles of performance on the basis of which he/she would undertake to perform any composition in her/his major area. The questions are prepared by faculty members within the student’s major and minor subject areas. At least two graduate faculty members read each section of the written preliminary examinations. Students typically are graded “Pass” or “Fail” based on a consensus of the examination readers.

Oral Preliminary Examinations:
For those students who pass the written preliminary examinations, no oral preliminary examination is required. (This refers only to the oral preliminary examination and does not refer in any way to the oral defense of the dissertation/monograph.)

If a student fails one or more portions of the written preliminary examination, an oral examination is administered by the major advisor and a minimum of two additional faculty members. In the case of failure in one subject area, two members of that department are asked by the student’s major advisor to participate with the major advisor in the examination. In the case of failure in more than one subject area, at least one faculty member from each of the departments in which the failure occurred is asked by the student’s major advisor to participate in the examination.

The examination is to be a formal oral examination rather than an informal meeting with graduate faculty from departments in which the examination revealed that the student needs further work. This does not preclude such informal meetings, however, in preparation for the oral examination. Upon passing the oral examination, the student, as advised by the examining committee, is permitted to schedule a second and final attempt at the failed portions of the written examination.

Final Recital and Monograph Proposal:
After the successful completion of the written preliminary examinations, MUSC 9984 DMA Final Recital and written monograph are undertaken in consultation with the major advisor, the department chair, and the Doctoral Advisory Committee (DAC). The DAC shall be appointed by the Associate Dean to adjudicate the Final Recital and to guide the student in writing both the monograph proposal and the final document itself. When the student, in consultation with the major advisor and department chair, has identified a tentative advisory committee, the chair gives those names to the Associate Dean for consideration. The Associate Dean appoints the DAC. The DAC consists of no fewer than three persons: two faculty members from within the department, and a third person from outside the department. Members of the DAC serve as the adjudicators of the Final Recital.

After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers within 30 days one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School. Students register for MUSC 9998 during the writing of the monograph proposal and MUSC 9999 after the proposal has been officially approved. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 Monograph Research during their program as a whole and must register for a minimum of 1 such credit each term.

Recital Extension:
Students withdrawing from the recital requirement during the recital term will receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course will be offered on a “Credit/No Credit” basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course will be replaced by a letter grade and MUSC 5000 Recital Extension will be issued a grade of “CR.” Credit derived from Recital Extension will not be counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study will be the cost of 2 graduate credits plus a $400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.

2. Exceptions to Recital Extension:
   a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
   b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, if the student does not take Recital Extension during the Summer, s/he may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.

3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension will be reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, will determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

Final Oral Examination:
When the monograph is complete, the major advisor of the Doctoral Advisory Committee (DAC) asks the Associate Dean to appoint an outside reader. The DAC plus the outside reader constitute the Dissertation Examining Committee (DEC) for the monograph defense. Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary.
Doctoral candidates must submit a defense copy of the monograph to members of the DEC and the Associate Dean at least two weeks prior to the defense. Students should register for MUSC 9999 Monograph Research (1-6 credits) each term, Fall and Spring, until the final project has been successfully defended. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 during their program as a whole, but must register for a minimum of one such credit each term.

Incompletes:
All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

Culminating Events:
Final Recital:
Students may present the DMA Final Recital (MUSC 9984) after the preliminary examination has been completed and the DAC has been appointed.

Proposal:
After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School within 30 days.

Monograph:
Early in the term in which a defense of the monograph is anticipated, the major advisor notifies the Associate Dean that it is time to appoint the Dissertation Examining Committee (DEC). The DEC consists of the DAC plus an "outside" reader, who is an additional graduate faculty member from Temple or another university, but not from the faculty of the student's home department.

Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary. This includes the "Announcement of Oral Defense" form, which must bear all appropriate signatures and be submitted to the Associate Dean.

Two weeks prior to the oral defense, the student submits individual copies of the abstract and the completed dissertation/monograph to the Associate Dean and each member of the DEC. The graduate secretary notifies the Graduate School and posts notices of the impending defense on bulletin boards located within the Boyer College of Music and Dance. All members of the DEC attend the oral defense and then vote to pass or fail the monograph and its defense after the conclusion of the public presentation.

Changes in membership of a DAC or a DEC must be approved by the Associate Dean. The change also must be communicated to the Graduate School.

Music Performance/Clarinet, D.M.A.

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE (http://www.temple.edu/boyer)

About the Program
The objective of the D.M.A. program in Clarinet Performance is to foster growth and development of the highest and most sophisticated expression of musical interpretation through performance under the guidance of a very highly specialized faculty.

Time Limit for Degree Completion: 7 years

Campus Location: Main

Full-Time/Part-Time Status: The degree program can be completed on a full- or part-time basis.

Accreditation: The degree program is accredited by the National Association of Schools of Music (NASM).

Areas of Specialization: Diverse areas of study are included to ensure the broadest possible cultivation and expansion of students' talents.

Job Prospects: Graduates of the program typically find employment in professional music ensembles throughout the world, in colleges and universities, and in private teaching studios, among other employment venues.

Non-Matriculated Student Policy: Non-matriculated students may enroll in selected courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

Financing Opportunities: Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition
remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance, and/or direct service related to academic programs. Applicants must submit an assistantship/internship application by March 1 to obtain priority consideration for an award. Applications are available online at the Graduate Financial Aid (http://www.temple.edu/boyer/admissions/documents/gradassistantshipform.pdf) page of Boyer's website. Typically these awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

**Admission Requirements and Deadlines**

**Application Deadline:**

*Fall: November 15*

APPLY ONLINE to this graduate program.

**Letters of Reference:**

*Number Required: 2*

*From Whom:* Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents, and aptitude for graduate study.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours. Doctoral candidates must hold the Master of Music degree (or the equivalent) in the field of specialization from an accredited institution. Applicants accepted with deficiencies will find the deficiencies noted in the letter of admission. Deficiencies must be addressed prior to completion of the degree.

**Master's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Bachelor's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Statement of Goals:** Include your special interests within the discipline and expectations for the program.

**Standardized Test Scores:**

*TOEFL: 100 iBT or 600 PBT minimum*

**Prescreening Video and Audition:** Applicants submit a prescreening video via Acceptd (https://app.getacceptd.com/templeboyer). This recording may contain representative movements of the audition material, with the majority of the material having been recorded within the last 12 months. Video recordings of accompanied works must have piano or orchestral accompaniment.

If preliminary approval is granted, an in-person live audition is arranged. Audition repertoire requirements include:

- A concerto, sonata, or solo piece from the Classical, Romantic, or Impressionistic period.
- A concerto, sonata, or solo piece from the 20th Century.
- Excerpts from the standard orchestral repertoire.

All works, except sonatas, should be memorized. Applicants must arrange for an accompanist for the live audition.

Note that video recordings alone are not acceptable for admission, except in the case of students living outside the United States. In this case, applicants must submit a video recording of complete works.

**Scholarly Paper:** Applicants must upload a scholarly paper to Acceptd (https://app.getacceptd.com/templeboyer).

**Interview:** Applicants are interviewed by the department chair and Associate Dean at the time of the live audition.

**Resume:** Current resume required.

**Writing Examination:** An on-site Writing Examination is required as part of the doctoral admissions process. Remedial coursework may be required.

**Advanced Standing:** The D.M.A. program in Music Performance consists of 55 discrete credits taken beyond the master's degree. At the time of admission, the entire master's degree serves as advanced standing credits. These credits are not counted toward the 55 required credits of the doctoral degree. However, students may transfer into the doctoral program up to 12 additional graduate credits in coursework taken beyond the master's degree. Typically, this coursework is reviewed after admission to the D.M.A. degree and must be approved by the major advisor and the Associate Dean. The maximum number of advanced standing credits awarded is 30.

**Additional Requirements:** Applicants must:

1. Include with the application a repertoire list indicating works previously studied. The list should indicate which of the works were performed publicly and, if possible, where and when they were performed.

2. Show transcript evidence at the master's level in the area of bibliographical resources in music. If no transcript evidence is available, students must take MUST 8701 Research in Music in addition to the 6 required credits within the History/Theory area.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This Policy may preclude the admission of any student who meets the minimum requirements.

**Program Requirements**

**General Program Requirements:**

*Number of Didactic Credits Required Beyond the Master's: 54*

Minor Area in Music 1

Total Credit Hours 54

1 Select from courses at the level of MUSC 8404 or higher.

Recitals:

1. Solo public recital by the conclusion of the fourth term of lessons (MUSC 9534)
2. Solo public recital (MUSC 9184) or Chamber Music Recital (MUSC 9884)
3. Lecture Recital (MUSC 9684) or Performance with Orchestra (MUSC 9784)
4. Final Doctoral Recital (MUSC 9984)

Additional Requirements:

All degree credits are to be earned at Temple University.

Written Entrance Examinations:

All doctoral students must take written entrance exams prior to or during the first term of doctoral study. Candidates who fail the entrance examinations the first time may, upon application to the Associate Dean for Graduate Studies of the Boyer College of Music and Dance, be permitted to take the examinations a second time. A third opportunity is not allowed.

To continue registration in the doctoral program beyond the second term of study, all portions of the examinations must be passed or the appropriate review courses (or the equivalent, as determined by the examining department) must be in progress. Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date.

1. Music History Exam: A general examination covering the history of music is administered. Questions relative to forms, styles, and periods of music are included. It is expected that all examinees are acquainted with the standard literature of music.
2. Harmony Exam: This exam involves completion of a harmonic excerpt in advanced chromatic idiom and the creation of a bass line with figuration (figured bass) in Baroque style.
3. Counterpoint Exam: From a given motive, approximately 20 measures of imitative counterpoint in three parts are to be completed.
4. Form and Analysis Exam: A score is provided at the examination that requires analysis of specified passages.
5. Literature and Pedagogy Exam: This examination focuses on the literature and pedagogy of the instrument of specialization.
6. Writing Sample: A 90-minute examination of the student's ability to write at the doctoral level is conducted. Examination topics are of a general nature.

Diagnostic Recital:

A diagnostic recital is required and must be performed before a faculty jury at the conclusion of the first term of study. The candidate must contact her/his advisor to arrange the jury. The recital consists of a full program, approximately 45 minutes in length, and may include the performance (with music) of a new composition that is presented to the applicant for study 48 hours in advance of the jury. An analysis of repertoire and technical needs results.

Continuous Registration:

Continuous registration of at least 3 credits must be maintained each term, with the exception of Summer, from the time of acceptance into the D.M.A. program in Music Performance until the completion of all coursework.

Continuation in the D.M.A. Program:

Each course or seminar requires an end-of-term final grade based on papers prepared, recitals presented, discussion, and/or examinations taken during the course of the term. Each term of private study culminates in a performance examination or jury, except during terms in which the student has presented one of the required adjudicated recitals. Screening for continuance in the program after the first term of study is conducted adjudicated recitals, end-of-the-term juries, and major examinations. This ensures that only the most qualified students continue beyond the early stages of the program.

For all doctoral programs, only grades from “A” to “B-” can be applied toward degree requirements. Grades of less than “B-” cannot be counted toward the degree. If the student earns a grade of less than “B-,” s/he may, with permission of the department chair and the Associate Dean, retake the term of study one additional time. The same applies to recitals.

Professional Development Policy:

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and
open house events; supervising performance classes; and engaging in other academic activities.

Performing Ensembles:

1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.

2. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair, and the Associate Dean.

Independent Study Courses:
Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval will be granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects will be granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

Acceptable English:
All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

Graduate Private Lesson Policy:
Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A $250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

The four terms of private lessons must be taken consecutively, with the exception of summers. Any deviation from this must have the approval of the advisor, department chair, and the Associate Dean of the Boyer College of Music and Dance. Graduate assistantships and other forms of University-sponsored financial aid do not cover private lesson and recital extension fees.

Written Preliminary Examinations:
The written preliminary examinations may be taken during the final term of coursework, but no later than in the term after completion of coursework. They are administered several times each calendar year, and span two consecutive days of six hours of examination each day. Written and performance examinations should be taken no later than the end of the fifth year to allow for the successful completion of the Final Recital and the writing of the monograph. Preliminary examinations must be successfully completed before formal work on the monograph may be undertaken and before the Final Recital may be presented.

Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date. Students are then notified in writing of the specific dates and administration times of the preliminary examinations for which they have been scheduled.

The examinations consist of questions relating to the major and minor areas and to musical style; require the student to comment articulately on the style and historical significance of musical compositions; and entail the student discussing and defending the principles of performance on the basis of which s/he would undertake to perform any composition in her/his major area. The questions are prepared by faculty members within the student's major and minor subject areas. At least two graduate faculty members read each section of the written preliminary examinations. Students typically are graded "Pass" or "Fail" based on a consensus of the examination readers.

Oral Preliminary Examinations:
For those students who pass the written preliminary examinations, no oral preliminary examination is required. (This refers only to the oral preliminary examination and does not refer in any way to the oral defense of the dissertation/monograph.)

If a student fails one or more portions of the written preliminary examination, an oral examination is administered by the major advisor and a minimum of two additional faculty members. In the case of failure in one subject area, two members of that department are asked by the student's major advisor to participate with the major advisor in the examination. In the case of failure in more than one subject area, at least one faculty member from each of the departments in which the failure occurred is asked by the student's major advisor to participate in the examination.

The examination is to be a formal oral examination rather than an informal meeting with graduate faculty from departments in which the examination revealed that the student needs further work. This does not preclude such informal meetings, however, in preparation for the oral examination. Upon passing the oral examination, the student, as advised by the examining committee, is permitted to schedule a second and final attempt at the failed portions of the written examination.

Final Recital and Monograph Proposal:
After the successful completion of the written preliminary examinations, MUSC 9984 DMA Final Recital and written monograph are undertaken in consultation with the major advisor, the department chair, and the Doctoral Advisory Committee (DAC). The DAC shall be appointed by the Associate Dean to adjudicate the Final Recital and to guide the student in writing both the monograph proposal and the final document itself. When the student, in consultation with the major advisor and department chair, has identified a tentative advisory committee, the chair gives those names to the Associate Dean for consideration. The Associate Dean appoints the DAC. The DAC consists of no fewer than three persons: two faculty members from within the department, and a third person from outside the department. Members of the DAC serve as the adjudicators of the Final Recital.

After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers within 30 days one copy to each member of the DAC,
the department chair, the Associate Dean, and the Graduate School. Students register for MUSC 9984 during the writing of the monograph proposal and MUSC 9999 after the proposal has been officially approved. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 Monograph Research during their program as a whole and must register for a minimum of 1 such credit each term.

Recital Extension:
Students withdrawing from the recital requirement during the recital term will receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course will be offered on a “Credit/No Credit” basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course will be replaced by a letter grade and MUSC 5000 Recital Extension will be issued a grade of “CR.” Credit derived from Recital Extension will not be counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study will be the cost of 2 graduate credits plus a $400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.

2. Exceptions to Recital Extension:
   a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
   b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, if the student does not take Recital Extension during the Summer, s/he may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.

3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension will be reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, will determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

Final Oral Examination:
When the monograph is complete, the major advisor of the Doctoral Advisory Committee (DAC) asks the Associate Dean to appoint an outside reader. The DAC plus the outside reader constitute the Dissertation Examining Committee (DEC) for the monograph defense. Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary. Doctoral candidates must submit a defense copy of the monograph to members of the DEC and the Associate Dean at least two weeks prior to the defense. Students should register for MUSC 9999 Monograph Research (1-6 credits) each term, Fall and Spring, until the final project has been successfully defended. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 during their program as a whole, but must register for a minimum of one such credit each term.

Incompletes:
All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

Culminating Events:
Final Recital:
Students may present the DMA Final Recital (MUSC 9984) after the preliminary examination has been completed and the DAC has been appointed.

Proposal:
After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School within 30 days.

Monograph:
Early in the term in which a defense of the monograph is anticipated, the major advisor notifies the Associate Dean that it is time to appoint the Dissertation Examining Committee (DEC). The DEC consists of the DAC plus an “outside” reader, who is an additional graduate faculty member from Temple or another university, but not from the faculty of the student’s home department.

Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary. This includes the “Announcement of Oral Defense” form, which must bear all appropriate signatures and be submitted to the Associate Dean.

Two weeks prior to the oral defense, the student submits individual copies of the abstract and the completed dissertation/monograph to the Associate Dean and each member of the DEC. The graduate secretary notifies the Graduate School and posts notices of the impending defense on bulletin boards located within the Boyer College of Music and Dance. All members of the DEC attend the oral defense and then vote to pass or fail the monograph and its defense after the conclusion of the public presentation.

Changes in membership of a DAC or a DEC must be approved by the Associate Dean. The change also must be communicated to the Graduate School.

Admissions:
Music Performance/Double Bass, D.M.A.

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE (http://www.temple.edu/boyer)

About the Program

The objective of the D.M.A. program in Double Bass Performance is to foster growth and development of the highest and most sophisticated expression of musical interpretation through performance under the guidance of a very highly specialized faculty.

Time Limit for Degree Completion: 7 years

Campus Location: Main

Full-Time/Part-Time Status: The degree program can be completed on a full- or part-time basis.

Accreditation: The degree program is accredited by the National Association of Schools of Music (NASM).

Areas of Specialization: Diverse areas of study are included to ensure the broadest possible cultivation and expansion of students’ talents.

Job Prospects: Graduates of the program typically find employment in professional music ensembles throughout the world, in colleges and universities, and in private teaching studios, among other employment venues.

Non-Matriculated Student Policy: Non-matriculated students may enroll in selected courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

Financing Opportunities: Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance, and/or direct service related to academic programs. Applicants must submit an assistantship/ internship application by March 1 to obtain priority consideration for an award. Applications are available online at the Graduate Financial Aid (http://www.temple.edu/boyer/admissions/documents/gradassistantshipform.pdf) page of Boyer’s website. Typically these awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master’s students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

Admission Requirements and Deadlines

Application Deadline:

Fall: November 15

APPLY ONLINE to this graduate program.

Letters of Reference:

Number Required: 2

From Whom: Letters of recommendation should be obtained from evaluators who can provide insight into the applicant’s abilities, talents, and aptitude for graduate study.

Coursework Required for Admission Consideration: All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours. Doctoral candidates must hold the Master of Music degree (or the equivalent) in the field of specialization from an accredited institution. Applicants accepted with deficiencies will find the deficiencies noted in the letter of admission. Deficiencies must be addressed prior to completion of the degree.

Master’s Degree in Discipline/Related Discipline: A degree in Music is expected.

Bachelor’s Degree in Discipline/Related Discipline: A degree in Music is expected.

Statement of Goals: Include your special interests within the discipline and expectations for the program.

Standardized Test Scores:

TOEFL: 100 iBT or 600 PBT minimum

Prescreening Video and Audition: Applicants submit a prescreening video via Acceptd (https://app.getacceptd.com/templeboyer). This recording may contain representative movements of the audition material, with the majority of the material having been recorded within the last 12 months. Video recordings of accompanied works must have piano or orchestral accompaniment.

If preliminary approval is granted, an in-person live audition is arranged. Audition repertoire requirements include:

- Two contrasting movements from a Bach unaccompanied suite.
- A major concerto such as Bottesini, Capuzzi, Dittersdorf, or Koussevitzky.
- A sonata or similar work of contrasting period/style from the concerto, i.e., Classical or 20th Century if the concerto is Romantic, or Romantic or Classical if the concerto is 20th Century.
- A virtuoso composition such as Bottesini, Paganini, Simandl, or the like.

Note that video recordings alone are not acceptable for admission, except in the case of students living outside the United States. In this case, applicants must submit a video recording of complete works.

Interview: Applicants are interviewed by the department chair and Associate Dean at the time of the live audition.

Resume: Current resume required.

Writing Examination: An on-site Writing Examination is required as part of the doctoral admissions process. Remedial coursework may be required.

Advanced Standing: The D.M.A. program in Music Performance consists of 55 discrete credits taken beyond the master's degree. At the time of admission, the entire master's degree serves as advanced standing credits. These credits are not counted toward the 55 required credits of the doctoral degree. However, students may transfer into the doctoral program up to 12 additional graduate credits in coursework taken beyond the master's degree. Typically, this coursework is reviewed after admission to the D.M.A. degree and must be approved by the major advisor and the Associate Dean. The maximum number of advanced standing credits awarded is 32.

Additional Requirements: Applicants must:
1. Include with the application a repertoire list indicating works previously studied. The list should indicate which of the works were performed publicly and, if possible, where and when they were performed.
2. Show transcript evidence at the master's level in the area of bibliographical resources in music. If no transcript evidence is available, students must take MUST 8701 Research in Music in addition to the 6 required credits within the History/Theory area.

Other: Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions criteria required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This Policy may preclude the admission of any student who meets the minimum requirements.

Elective in Music History 3
Minor Area in Music 1 12
Total Credit Hours 55

1 Select from courses at the level of MUSC 8404 or higher.

Recitals:
1. Solo public recital by the conclusion of the fourth term of lessons (MUSC 9184)
2. Chamber Music Recital (MUSC 9384) or Lecture Recital (MUSC 9684)
3. Performance with Orchestra (MUSC 9784)
4. Final Doctoral Recital (MUSC 9984)

Additional Requirements:
All degree credits are to be earned at Temple University.

Written Entrance Examinations:
All doctoral students must take written entrance exams prior to or during the first term of doctoral study. Candidates who fail the entrance examinations the first time may, upon application to the Associate Dean for Graduate Studies of the Boyer College of Music and Dance, be permitted to take the examinations a second time. A third opportunity is not allowed.

To continue registration in the doctoral program beyond the second term of study, all portions of the examinations must be passed or the appropriate review courses (or the equivalent, as determined by the examining department) must be in progress. Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date.

1. Music History Exam: A general examination covering the history of music is administered. Questions relative to forms, styles, and periods of music are included. It is expected that all examinees are acquainted with the standard literature of music.
2. Harmony Exam: This exam involves completion of a harmonic excerpt in advanced chromatic idiom and the creation of a bass line with figuration (figured bass) in Baroque style.
3. Counterpoint Exam: From a given motive, approximately 20 measures of imitative counterpoint in three parts are to be completed.
4. Form and Analysis Exam: A score is provided at the examination that requires analysis of specified passages.
5. Literature and Pedagogy Exam: This examination focuses on the literature and pedagogy of the instrument of specialization.
6. Writing Sample: A 90-minute examination of the student's ability to write at the doctoral level is conducted. Examination topics are of a general nature.

Diagnostic Recital:
A diagnostic recital is required and must be performed before a faculty jury at the conclusion of the first term of study. The candidate must contact her/his advisor to arrange the jury. The recital consists of a full program, approximately 45 minutes in length, and may include the performance (with music) of a new composition that is presented to the applicant for study 48 hours in advance of the jury. An analysis of repertoire and technical needs results.

Continuous Registration:
Continuous registration of at least 3 credits must be maintained each term, with the exception of Summer, from the time of acceptance into the D.M.A. program in Music Performance until the completion of all coursework.

Continuation in the D.M.A. Program:
Each course or seminar requires an end-of-term final grade based on papers prepared, recitals presented, discussion, and/or examinations taken during the course of the term. Each term of private study culminates in a performance examination or jury, except during terms in which the student has presented one of the required adjudicated recitals. Screening for continuance in the program after the first term of study is conducted at adjudicated recitals, end-of-the-term juries, and major examinations. This ensures that only the most qualified students continue beyond the early stages of the program.

For all doctoral programs, only grades from “A” to “B-” can be applied toward degree requirements. Grades of less than “B-” cannot be counted toward the degree. If the student earns a grade of less than “B-,” s/he may, with permission of the department chair and the Associate Dean, retake the term of study one additional time. The same applies to recitals.

Professional Development Policy:
In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

Performing Ensembles:
1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.
2. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair, and the Associate Dean.

Independent Study Courses:
Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval will be granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects will be granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

Acceptable English:
All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

Graduate Private Lesson Policy:
Weekly one-hour private lessons are provided for all matriculated master’s and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A $250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

The four terms of private lessons must be taken consecutively, with the exception of summers. Any deviation from this must have the approval of the advisor, department chair, and the Associate Dean of the Boyer College of Music and Dance. Graduate assistantships and other forms of University-sponsored financial aid do not cover private lesson and recital extension fees.

Written Preliminary Examinations:
The written preliminary examinations may be taken during the final term of coursework, but no later than in the term after completion of coursework. They are administered several times each calendar year, and span two consecutive days of six hours of examination each day. Written and performance examinations should be taken no later than the end of the fifth year to allow for the successful completion of the Final Recital and the writing of the monograph. Preliminary examinations must be successfully completed before formal work on the monograph may be undertaken and before the Final Recital may be presented.

Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date. Students are then notified in writing of the specific dates and administration times of the preliminary examinations for which they have been scheduled.

The examinations consist of questions relating to the major and minor areas and to musical style; require the student to comment articulately on the style and historical significance of musical compositions; and entail the student discussing and defending the principles of performance on the basis of which s/he would undertake to perform any composition in her/his major area. The questions are prepared by faculty members.
within the student’s major and minor subject areas. At least two graduate faculty members read each section of the written preliminary examinations. Students typically are graded “Pass” or “Fail” based on a consensus of the examination readers.

Oral Preliminary Examinations:
For those students who pass the written preliminary examinations, no oral preliminary examination is required. (This refers only to the oral preliminary examination and does not refer in any way to the oral defense of the dissertation/monograph.)

If a student fails one or more portions of the written preliminary examination, an oral examination is administered by the major advisor and a minimum of two additional faculty members. In the case of failure in one subject area, two members of that department are asked by the student’s major advisor to participate with the major advisor in the examination. In the case of failure in more than one subject area, at least one faculty member from each of the departments in which the failure occurred is asked by the student’s major advisor to participate in the examination.

The examination is to be a formal oral examination rather than an informal meeting with graduate faculty from departments in which the examination revealed that the student needs further work. This does not preclude such informal meetings, however, in preparation for the oral examination. Upon passing the oral examination, the student, as advised by the examining committee, is permitted to schedule a second and final attempt at the failed portions of the written examination.

Final Recital and Monograph Proposal:
After the successful completion of the written preliminary examinations, MUSC 9984 DMA Final Recital and written monograph are undertaken in consultation with the major advisor, the department chair, and the Doctoral Advisory Committee (DAC). The DAC shall be appointed by the Associate Dean to adjudicate the Final Recital and to guide the student in writing both the monograph proposal and the final document itself. When the student, in consultation with the major advisor and department chair, has identified a tentative advisory committee, the chair gives those names to the Associate Dean for consideration. The Associate Dean appoints the DAC. The DAC consists of no fewer than three persons: two faculty members from within the department, and a third person from outside the department. Members of the DAC serve as the adjudicators of the Final Recital.

After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers within 30 days one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School. Students register for MUSC 9998 during the writing of the monograph proposal and MUSC 9999 after the proposal has been officially approved. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 Monograph Research during their program as a whole and must register for a minimum of 1 such credit each term.

Recital Extension:
Students withdrawing from the recital requirement during the recital term will receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course will be offered on a “Credit/No Credit” basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course will be replaced by a letter grade and MUSC 5000 Recital Extension will be issued a grade of “CR.” Credit derived from Recital Extension will not be counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study will be the cost of 2 graduate credits plus a $400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.

2. Exceptions to Recital Extension:
   a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
   b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, if the student does not take Recital Extension during the Summer, s/he may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.

3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension will be reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, will determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

Final Oral Examination:
When the monograph is complete, the major advisor of the Doctoral Advisory Committee (DAC) asks the Associate Dean to appoint an outside reader. The DAC plus the outside reader constitute the Dissertation Examining Committee (DEC) for the monograph defense. Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary.

Doctoral candidates must submit a defense copy of the monograph to members of the DEC and the Associate Dean at least two weeks prior to the defense. Students should register for MUSC 9999 Monograph Research (1-6 credits) each term, Fall and Spring, until the final project has been successfully defended. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 during their program as a whole, but must register for a minimum of one such credit each term.

Incompletes:
All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

Culminating Events:
Final Recital:
Students may present the DMA Final Recital (MUSC 9984) after the preliminary examination has been completed and the DAC has been appointed.

Proposal:
After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School within 30 days.
Monograph:
Early in the term in which a defense of the monograph is anticipated, the major advisor notifies the Associate Dean that it is time to appoint the Dissertation Examining Committee (DEC). The DEC consists of the DAC plus an “outside” reader, who is an additional graduate faculty member from Temple or another university, but not from the faculty of the student’s home department.

Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary. This includes the “Announcement of Oral Defense” form, which must bear all appropriate signatures and be submitted to the Associate Dean.

Two weeks prior to the oral defense, the student submits individual copies of the abstract and the completed dissertation/monograph to the Associate Dean and each member of the DEC. The graduate secretary notifies the Graduate School and posts notices of the impending defense on bulletin boards located within the Boyer College of Music and Dance. All members of the DEC attend the oral defense and then vote to pass or fail the monograph and its defense after the conclusion of the public presentation.

Changes in membership of a DAC or a DEC must be approved by the Associate Dean. The change also must be communicated to the Graduate School.

- Excerpts from the standard orchestral repertoire.

All works, except sonatas, should be memorized.

Note that video recordings alone are not acceptable for admission, except in the case of students living outside the United States. In this case, applicants must submit a video recording of complete works.

Interview: Applicants are interviewed by the department chair and Associate Dean at the time of the live audition.

Resume: Current resume required.

Writing Examination: An on-site Writing Examination is required as part of the doctoral admissions process. Remedial coursework may be required.

Advanced Standing: The D.M.A. program in Music Performance consists of 55 discrete credits taken beyond the master's degree. At the time of admission, the entire master's degree serves as advanced standing credits. These credits are not counted toward the 55 required credits of the doctoral degree. However, students may transfer into the doctoral program up to 12 additional graduate credits in coursework taken beyond the master's degree. Typically, this coursework is reviewed after admission to the D.M.A. degree and must be approved by the major advisor and the Associate Dean. The maximum number of advanced standing credits awarded is 30.

Additional Requirements: Applicants must:

1. Include with the application a repertoire list indicating works previously studied. The list should indicate which of the works were performed publicly and, if possible, where and when they were performed.
2. Show transcript evidence at the master's level in the area of bibliographical resources in music. If no transcript evidence is available, students must take MUST 8701 Research in Music in addition to the 6 required credits within the History/Theory area.

Other: Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This Policy may preclude the admission of any student who meets the minimum requirements.

Electives
### Recitals:

1. Solo public recital by the conclusion of the fourth term of lessons (MUSC 9534)
2. Solo public recital (MUSC 9184) or Chamber Music Recital (MUSC 9884)
3. Lecture Recital (MUSC 9684) or Performance with Orchestra (MUSC 9784)
4. Final Doctoral Recital (MUSC 9984)

### Additional Requirements:

All degree credits are to be earned at Temple University.

#### Written Entrance Examinations:

All doctoral students must take written entrance exams prior to or during the first term of doctoral study. Candidates who fail the entrance examinations the first time may, upon application to the Associate Dean for Graduate Studies of the Boyer College of Music and Dance, be permitted to take the examinations a second time. A third opportunity is not allowed.

To continue registration in the doctoral program beyond the second term of study, all portions of the examinations must be passed or the appropriate review courses (or the equivalent, as determined by the examining department) must be in progress. Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date.

1. **Music History Exam:** A general examination covering the history of music is administered. Questions relative to forms, styles, and periods of music are included. It is expected that all examinees are acquainted with the standard literature of music.
2. **Harmony Exam:** This exam involves completion of a harmonic excerpt in advanced chromatic idiom and the creation of a bass line with figuration (figured bass) in Baroque style.
3. **Counterpoint Exam:** From a given motive, approximately 20 measures of imitative counterpoint in three parts are to be completed.
4. **Form and Analysis Exam:** A score is provided at the examination that requires analysis of specified passages.
5. **Literature and Pedagogy Exam:** This examination focuses on the literature and pedagogy of the instrument of specialization.
6. **Writing Sample:** A 90-minute examination of the student's ability to write at the doctoral level is conducted. Examination topics are of a general nature.

#### Diagnostic Recital:

A diagnostic recital is required and must be performed before a faculty jury at the conclusion of the first term of study. The candidate must contact her/his advisor to arrange the jury. The recital consists of a full program, approximately 45 minutes in length, and may include the performance (with music) of a new composition that is presented to the applicant for study 48 hours in advance of the jury. An analysis of repertoire and technical needs results.

#### Continuous Registration:

Continuous registration of at least 3 credits must be maintained each term, with the exception of Summer, from the time of acceptance into the D.M.A. program in Music Performance until the completion of all coursework.

#### Continuation in the D.M.A. Program:

Each course or seminar requires an end-of-term final grade based on papers prepared, recitals presented, discussion, and/or examinations taken during the course of the term. Each term of private study culminates in a performance examination or jury, except during terms in which the student has presented one of the required adjudicated recitals. Screening for continuance in the program after the first term of study is conducted at adjudicated recitals, end-of-the-term juries, and major examinations. This ensures that only the most qualified students continue beyond the early stages of the program.

For all doctoral programs, only grades from "A" to "B-" can be applied toward degree requirements. Grades of less than "B-" cannot be counted toward the degree. If the student earns a grade of less than "B-", s/he may, with permission of the department chair and the Associate Dean, retake the term of study one additional time. The same applies to recitals.

#### Professional Development Policy:

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

#### Performing Ensembles:

1. **Touring:** All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.
2. **Non-Credit Participation:** With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair, and the Associate Dean.

#### Independent Study Courses:

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval will be granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects will be granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate

\[\text{Total Credit Hours} = 54\]
student’s curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

Acceptable English:
All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College’s statement on plagiarism and academic honesty.

Graduate Private Lesson Policy:
Weekly one-hour private lessons are provided for all matriculated master’s and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A $250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

The four terms of private lessons must be taken consecutively, with the exception of summers. Any deviation from this must have the approval of the advisor, department chair, and the Associate Dean of the Boyer College of Music and Dance. Graduate assistantships and other forms of University-sponsored financial aid do not cover private lesson and recital extension fees.

Written Preliminary Examinations:
The written preliminary examinations may be taken during the final term of coursework, but no later than in the term after completion of coursework. They are administered several times each calendar year, and span two consecutive days of six hours of examination each day. Written and performance examinations should be taken no later than the end of the fifth year to allow for the successful completion of the Final Recital and the writing of the monograph. Preliminary examinations must be successfully completed before formal work on the monograph may be undertaken and before the Final Recital may be presented.

Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date. Students are then notified in writing of the specific dates and administration times of the preliminary examinations for which they have been scheduled.

The examinations consist of questions relating to the major and minor areas and to musical style; require the student to comment articulately on the style and historical significance of musical compositions; and entail the student discussing and defending the principles of performance on the basis of which s/he would undertake to perform any composition in her/his major area. The questions are prepared by faculty members within the student’s major and minor subject areas. At least two graduate faculty members read each section of the written preliminary examinations. Students typically are graded “Pass” or “Fail” based on a consensus of the examination readers.

Oral Preliminary Examinations:
For those students who pass the written preliminary examinations, no oral preliminary examination is required. (This refers only to the oral preliminary examination and does not refer in any way to the oral defense of the dissertation/monograph.)

If a student fails one or more portions of the written preliminary examination, an oral examination is administered by the major advisor and a minimum of two additional faculty members. In the case of failure in one subject area, two members of that department are asked by the student’s major advisor to participate with the major advisor in the examination. In the case of failure in more than one subject area, at least one faculty member from each of the departments in which the failure occurred is asked by the student’s major advisor to participate in the examination.

The examination is to be a formal oral examination rather than an informal meeting with graduate faculty from departments in which the examination revealed that the student needs further work. This does not preclude such informal meetings, however, in preparation for the oral examination. Upon passing the oral examination, the student, as advised by the examining committee, is permitted to schedule a second and final attempt at the failed portions of the written examination.

Final Recital and Monograph Proposal:
After the successful completion of the written preliminary examinations, MUSC 9984 DMA Final Recital and written monograph are undertaken in consultation with the major advisor, the department chair, and the Doctoral Advisory Committee (DAC). The DAC shall be appointed by the Associate Dean to adjudicate the Final Recital and to guide the student in writing both the monograph proposal and the final document itself. When the student, in consultation with the major advisor and department chair, has identified a tentative advisory committee, the chair gives those names to the Associate Dean for consideration. The Associate Dean appoints the DAC. The DAC consists of no fewer than three persons: two faculty members from within the department, and a third person from outside the department. Members of the DAC serve as the adjudicators of the Final Recital.

After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers within 30 days one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School. Students register for MUSC 9998 during the writing of the monograph proposal and MUSC 9999 after the proposal has been officially approved. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 Monograph Research during their program as a whole and must register for a minimum of 1 such credit each term.

Recital Extension:
Students withdrawing from the recital requirement during the recital term will receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course will be offered on a “Credit/No Credit” basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course will be replaced by a letter grade and MUSC 5000 Recital Extension will be issued a grade of “CR.” Credit derived from Recital Extension will not be counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study will be the cost of 2 graduate credits plus a $400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.
2. Exceptions to Recital Extension:
   a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
   b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall
term. However, if the student does not take Recital Extension during the Summer, s/he may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.

3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension will be reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, will determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

**Final Oral Examination:**
When the monograph is complete, the major advisor of the Doctoral Advisory Committee (DAC) asks the Associate Dean to appoint an outside reader. The DAC plus the outside reader constitute the Dissertation Examining Committee (DEC) for the monograph defense. Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary.

Doctoral candidates must submit a defense copy of the monograph to the Associate Dean at least two weeks prior to the oral defense. The change also must be communicated to the Graduate School. The change also must be communicated to the Graduate School.

Changes in membership of a DAC or a DEC must be approved by the Associate Dean. The change also must be communicated to the Graduate School.

**Music Performance/Flute, D.M.A.**

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE (http://www.temple.edu/boyer)

**About the Program**

The objective of the D.M.A. program in Flute Performance is to foster growth and development of the highest and most sophisticated expression of musical interpretation through performance under the guidance of a very highly specialized faculty.

**Time Limit for Degree Completion:** 7 years
Accreditation: The degree program is accredited by the National Association of Schools of Music (NASM).

Areas of Specialization: Diverse areas of study are included to ensure the broadest possible cultivation and expansion of students’ talents.

Job Prospects: Graduates of the program typically find employment in professional music ensembles throughout the world, in colleges and universities, and in private teaching studios, among other employment venues.

Non-Matriculated Student Policy: Non-matriculated students may enroll in selected courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

Financial Aid: Applications are available online at the Graduate Financial Aid (http://www.temple.edu/boyer/admissions/documents/gradassistantshipform.pdf) page of Boyer's website. Typically these awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

**Admission Requirements and Deadlines**

**Application Deadline:**

- **Fall:** November 15

  APPLY ONLINE to this graduate program.

**Letters of Reference:**

- **Number Required:** 2

  - **From Whom:** Letters of recommendation should be obtained from evaluators who can provide insight into the applicant’s abilities, talents, and aptitude for graduate study.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours. Doctoral candidates must hold the Master of Music degree (or the equivalent) in the field of specialization from an accredited institution. Applicants accepted with deficiencies will find the deficiencies noted in the letter of admission. Deficiencies must be addressed prior to completion of the degree.

**Master's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Bachelor's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Statement of Goals:** Include your special interests within the discipline and expectations for the program.

**Standardized Test Scores:**

- **TOEFL:** 100 iBT or 600 PBT minimum

**Prescreening Video and Audition:** Applicants submit a prescreening video via Acceptd (https://app.getacceptd.com/templeboyer). This recording may contain representative movements of the audition material, with the majority of the material having been recorded within the last 12 months. Video recordings of accompanied works must have piano or orchestral accompaniment.

If preliminary approval is granted, an in-person live audition is arranged. Audition repertoire requirements include:

- A concerto, sonata, or solo piece from the Classical, Romantic, or Impressionistic period.
- A concerto, sonata, or solo piece from the 20th Century.
- Excerpts from the standard orchestral repertoire.

All works, except sonatas, should be memorized. Applicants must arrange for an accompanist for the live audition.

Note that video recordings alone are not acceptable for admission, except in the case of students living outside the United States. In this case, applicants must submit a video recording of complete works.

**Scholarly Paper:** Applicants must upload a scholarly paper to Acceptd (https://app.getacceptd.com/templeboyer).

**Interview:** Applicants are interviewed by the department chair and Associate Dean at the time of the live audition.

**Resume:** Current resume required.

**Writing Examination:** An on-site Writing Examination is required as part of the doctoral admissions process. Remedial coursework may be required.

**Advanced Standing:** The D.M.A. program in Music Performance consists of 55 discrete credits taken beyond the master's degree. At the time of admission, the entire master's degree serves as advanced standing credits. These credits are not counted toward the 55 required credits of the doctoral degree. However, students may transfer into the doctoral program up to 12 additional graduate credits in coursework taken beyond the master's degree. Typically, this coursework is reviewed after admission to the D.M.A. degree and must be approved by the major advisor and the Associate Dean. The maximum number of advanced standing credits awarded is 30.

**Additional Requirements:** Applicants must:

1. Include with the application a repertoire list indicating works previously studied. The list should indicate which of the works were performed publicly and, if possible, where and when they were performed.
2. Show transcript evidence at the master's level in the area of bibliographical resources in music. If no transcript evidence is available, students must take MUST 8701 Research in Music in addition to the 6 required credits within the History/Theory area.
Other: Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College’s Optimum Enrollment Policy. This Policy may preclude the admission of any student who meets the minimum requirements.

1 Select from courses at the level of MUSC 8404 or higher.

Recitals:

1. Solo public recital by the conclusion of the fourth term of lessons (MUSC 9534)
2. Solo public recital (MUSC 9184) or Chamber Music Recital (MUSC 9884)
3. Lecture Recital (MUSC 9684) or Performance with Orchestra (MUSC 9784)
4. Final Doctoral Recital (MUSC 9984)

Additional Requirements:

All degree credits are to be earned at Temple University.

Written Entrance Examinations:

All doctoral students must take written entrance exams prior to or during the first term of doctoral study. Candidates who fail the entrance examinations the first time may, upon application to the Associate Dean for Graduate Studies of the Boyer College of Music and Dance, be permitted to take the examinations a second time. A third opportunity is not allowed.

To continue registration in the doctoral program beyond the second term of study, all portions of the examinations must be passed or the appropriate review courses (or the equivalent, as determined by the examining department) must be in progress. Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date.

Diagnostic Recital:

A diagnostic recital is required and must be performed before a faculty jury at the conclusion of the first term of study. The candidate must contact her/his advisor to arrange the jury. The recital consists of a full program, approximately 45 minutes in length, and may include the performance (with music) of a new composition that is presented to the applicant for study 48 hours in advance of the jury. An analysis of repertoire and technical needs results.

Continuous Registration:

Continuous registration of at least 3 credits must be maintained each term, with the exception of Summer, from the time of acceptance into the D.M.A. program in Music Performance until the completion of all coursework.

Continuation in the D.M.A. Program:

Each course or seminar requires an end-of-term final grade based on papers prepared, recitals presented, discussion, and/or examinations taken during the course of the term. Each term of private study culminates in a performance examination or jury, except during terms in which the student has presented one of the required adjudicated recitals. Screening for continuance in the program after the first term of study
is conducted at adjudicated recitals, end-of-the-term juries, and major examinations. This ensures that only the most qualified students continue beyond the early stages of the program.

For all doctoral programs, only grades from "A" to "B-" can be applied toward degree requirements. Grades of less than "B-" cannot be counted toward the degree. If the student earns a grade of less than "B-" s/he may, with permission of the department chair and the Associate Dean, retake the term of study one additional time. The same applies to recitals.

Professional Development Policy:
In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

Performing Ensembles:
1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.

2. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair, and the Associate Dean.

Independent Study Courses:
Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval will be granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects will be granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

Acceptable English:
All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

Graduate Private Lesson Policy:
Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A $250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

The four terms of private lessons must be taken consecutively, with the exception of summers. Any deviation from this must have the approval of the advisor, department chair, and the Associate Dean of the Boyer College of Music and Dance. The written preliminary examinations may be taken during the final term of coursework, but no later than in the term after completion of coursework. They are administered several times each calendar year, and span two consecutive days of six hours of examination each day. Written and performance examinations should be taken no later than the end of the fifth year to allow for the successful completion of the Final Recital and the writing of the monograph. Preliminary examinations must be successfully completed before formal work on the monograph may be undertaken and before the Final Recital may be presented.

Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date. Students are then notified in writing of the specific dates and administration times of the preliminary examinations for which they have been scheduled.

The examinations consist of questions relating to the major and minor areas and to musical style; require the student to comment articulately on the style and historical significance of musical compositions; and entail the student discussing and defending the principles of performance on the basis of which s/he would undertake to perform any composition in her/his major area. The questions are prepared by faculty members within the student's major and minor subject areas. At least two graduate faculty members read each section of the written preliminary examinations. Students typically are graded "Pass" or "Fail" based on a consensus of the examination readers.

Oral Preliminary Examinations:
For those students who pass the written preliminary examinations, no oral preliminary examination is required. (This refers only to the oral preliminary examination and does not refer in any way to the oral defense of the dissertation/monograph.)

If a student fails one or more portions of the written preliminary examination, an oral examination is administered by the major advisor and a minimum of two additional faculty members. In the case of failure in one subject area, two members of that department are asked by the student's major advisor to participate with the major advisor in the examination. In the case of failure in more than one subject area, at least one faculty member from each of the departments in which the failure occurred is asked by the student's major advisor to participate in the examination.

The examination is to be a formal oral examination rather than an informal meeting with graduate faculty from departments in which the examination revealed that the student needs further work. This does not preclude such informal meetings, however, in preparation for the oral examination. Upon passing the oral examination, the student, as advised by the examining committee, is permitted to schedule a second and final attempt at the failed portions of the written examination.

Final Recital and Monograph Proposal:
After the successful completion of the written preliminary examinations, MUSC 9984 DMA Final Recital and written monograph are undertaken in consultation with the major advisor, the department chair, and the Doctoral Advisory Committee (DAC). The DAC shall be appointed by the Associate Dean to adjudicate the Final Recital and to guide the student in writing both the monograph proposal and the final document itself.

When the student, in consultation with the major advisor and department chair, has identified a tentative advisory committee, the chair gives those names to the Associate Dean for consideration. The Associate Dean appoints the DAC. The DAC consists of no fewer than three persons: two faculty members from within the department, and a third person from outside the department. Members of the DAC serve as the adjudicators of the Final Recital.

After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers within 30 days one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School.

Students register for MUSC 9998 during the writing of the monograph proposal and MUSC 9999 after the proposal has been officially approved. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 Monograph Research during their program as a whole and must register for a minimum of 1 such credit each term.

Recital Extension:

Students withdrawing from the recital requirement during the recital term will receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course will be offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course will be replaced by a letter grade and MUSC 5000 Recital Extension will be issued a grade of "CR." Credit derived from Recital Extension will not be counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study will be the cost of 2 graduate credits plus a $400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.

2. Exceptions to Recital Extension:
   a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
   b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, if the student does not take Recital Extension during the Summer, s/he may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.

3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension will be reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, will determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

When the monograph is complete, the major advisor of the Doctoral Advisory Committee (DAC) asks the Associate Dean to appoint an outside reader. The DAC plus the outside reader constitute the Dissertation Examining Committee (DEC) for the monograph defense. Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary.

Doctoral candidates must submit a defense copy of the monograph to members of the DEC and the Associate Dean at least two weeks prior to the defense. Students should register for MUSC 9999 Monograph Research (1-6 credits) each term, Fall and Spring, until the final project has been successfully defended. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 during their program as a whole, but must register for a minimum of one such credit each term.

Incompletes:

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

Culminating Events:

Final Recital:

Students may present the DMA Final Recital (MUSC 9984) after the preliminary examination has been completed and the DAC has been appointed.

Proposal:

After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School.

Monograph:

Early in the term in which a defense of the monograph is anticipated, the major advisor notifies the Associate Dean that it is time to appoint the Dissertation Examining Committee (DEC). The DEC consists of the DAC plus an "outside" reader, who is an additional graduate faculty member from Temple or another university, but not from the faculty of the student's home department.

Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary. This includes the "Announcement of Oral Defense" form, which must bear all appropriate signatures and be submitted to the Associate Dean.

Two weeks prior to the oral defense, the student submits individual copies of the abstract and the completed dissertation/monograph to the Associate Dean and each member of the DEC. The graduate secretary notifies the Graduate School and posts notices of the impending defense on bulletin boards located within the Boyer College of Music and Dance. All members of the DEC attend the oral defense and then vote to pass or fail the monograph and its defense after the conclusion of the public presentation.

Changes in membership of a DAC or a DEC must be approved by the Associate Dean. The change also must be communicated to the Graduate School.

Music Performance/French Horn, D.M.A.
Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE (http://www.temple.edu/boyer)

About the Program
The objective of the D.M.A. program in French Horn Performance is to foster growth and development of the highest and most sophisticated expression of musical interpretation through performance under the guidance of a very highly specialized faculty.

Time Limit for Degree Completion: 7 years

Campus Location: Main

Full-Time/Part-Time Status: The degree program can be completed on a full- or part-time basis.

Accreditation: The degree program is accredited by the National Association of Schools of Music (NASM).

Areas of Specialization: Diverse areas of study are included to ensure the broadest possible cultivation and expansion of students' talents.

Job Prospects: Graduates of the program typically find employment in professional music ensembles throughout the world, in colleges and universities, and in private teaching studios, among other employment venues.

Non-Matriculated Student Policy: Non-matriculated students may enroll in selected courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

Financing Opportunities: Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance, and/or direct service related to academic programs. Applicants must submit an assistantship/internship application by March 1 to obtain priority consideration for an award. Applications are available online at the Graduate Financial Aid (http://www.temple.edu/boyer/admissions/documents/gradassistantshipform.pdf) page of Boyer's website. Typically these awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

Admission Requirements and Deadlines

Application Deadline:
Fall: November 15

APPLY ONLINE to this graduate program.

Letters of Reference:
Number Required: 2
From Whom: Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents, and aptitude for graduate study.

Coursework Required for Admission Consideration: All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours. Doctoral candidates must hold the Master of Music degree (or the equivalent) in the field of specialization from an accredited institution. Applicants accepted with deficiencies will find the deficiencies noted in the letter of admission. Deficiencies must be addressed prior to completion of the degree.

Master's Degree in Discipline/Related Discipline: A degree in Music is expected.

Bachelor's Degree in Discipline/Related Discipline: A degree in Music is expected.

Statement of Goals: Include your special interests within the discipline and expectations for the program.

Standardized Test Scores:
TOEFL: 100 iBT or 600 PBT minimum

Prescreening Video and Audition: Applicants submit a prescreening video via Acceptd (https://app.getacceptd.com/templeboyer). This recording may contain representative movements of the audition material, with the majority of the material having been recorded within the last 12
months. Video recordings of accompanied works must have piano or orchestral accompaniment.

If preliminary approval is granted, an in-person live audition is arranged. Audition repertoire requirements include:

- A concerto, sonata, or solo piece from the Classical, Romantic, or Impressionistic period.
- A concerto, sonata, or solo piece from the 20th Century.
- Excerpts from the standard orchestral repertoire.

All works, except sonatas, should be memorized.

Note that video recordings alone are not acceptable for admission, except in the case of students living outside the United States. In this case, applicants must submit a video recording of complete works.

Interview: Applicants are interviewed by the department chair and Associate Dean at the time of the live audition.

Resume: Current resume required.

Writing Examination: An on-site Writing Examination is required as part of the doctoral admissions process. Remedial coursework may be required.

Advanced Standing: The D.M.A. program in Music Performance consists of 55 discrete credits taken beyond the master's degree. At the time of admission, the entire master's degree serves as advanced standing credits. These credits are not counted toward the 55 required credits of the doctoral degree. However, students may transfer into the doctoral program up to 12 additional graduate credits in coursework taken beyond the master's degree. Typically, this coursework is reviewed after admission to the D.M.A. degree and must be approved by the major advisor and the Associate Dean. The maximum number of advanced standing credits awarded is 30.

Additional Requirements: Applicants must:

1. Include with the application a repertoire list indicating works previously studied. The list should indicate which of the works were performed publicly and, if possible, where and when they were performed.

2. Show transcript evidence at the master's level in the area of bibliographical resources in music. If no transcript evidence is available, students must take MUST 8701 Research in Music in addition to the 6 required credits within the History/Theory area.

Other: Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This Policy may preclude the admission of any student who meets the minimum requirements.

**Recitals:**

1. Solo public recital by the conclusion of the fourth term of lessons (MUSC 9534)
2. Solo public recital (MUSC 9184) or Chamber Music Recital (MUSC 9884)
3. Lecture Recital (MUSC 9684) or Performance with Orchestra (MUSC 9784)
4. Final Doctoral Recital (MUSC 9984)

**Additional Requirements:**

All degree credits are to be earned at Temple University.

Written Entrance Examinations:

All doctoral students must take written entrance exams prior to or during the first term of doctoral study. Candidates who fail the entrance examinations the first time may, upon application to the Associate Dean for Graduate Studies of the Boyer College of Music and Dance, be
permitted to take the examinations a second time. A third opportunity is not allowed.

To continue registration in the doctoral program beyond the second term of study, all portions of the examinations must be passed or the appropriate review courses (or the equivalent, as determined by the examining department) must be in progress. Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date.

1. Music History Exam: A general examination covering the history of music is administered. Questions relative to forms, styles, and periods of music are included. It is expected that all examinees are acquainted with the standard literature of music.

2. Harmony Exam: This exam involves completion of a harmonic excerpt in advanced chromatic idiom and the creation of a bass line with figuration (figured bass) in Baroque style.

3. Counterpoint Exam: From a given motive, approximately 20 measures of imitative counterpoint in three parts are to be completed.

4. Form and Analysis Exam: A score is provided at the examination that requires analysis of specified passages.

5. Literature and Pedagogy Exam: This examination focuses on the literature and pedagogy of the instrument of specialization.

6. Writing Sample: A 90-minute examination of the student’s ability to write at the doctoral level is conducted. Examination topics are of a general nature.

Diagnostic Recital:
A diagnostic recital is required and must be performed before a faculty jury at the conclusion of the first term of study. The candidate must contact her/his advisor to arrange the jury. The recital consists of a full program, approximately 45 minutes in length, and may include the performance (with music) of a new composition that is presented to the applicant for study 48 hours in advance of the jury. An analysis of repertoire and technical needs results.

Continuous Registration:
Continuous registration of at least 3 credits must be maintained each term, with the exception of Summer, from the time of acceptance into the D.M.A. program in Music Performance until the completion of all coursework.

Continuation in the D.M.A. Program:
Each course or seminar requires an end-of-term final grade based on papers prepared, recitals presented, discussion, and/or examinations taken during the course of the term. Each term of private study culminates in a performance examination or jury, except during terms in which the student has presented one of the required adjudicated recitals. Screening for continuance in the program after the first term of study is conducted at adjudicated recitals, end-of-the-term juries, and major examinations. This ensures that only the most qualified students continue beyond the early stages of the program.

For all doctoral programs, only grades from “A” to “B-” can be applied toward degree requirements. Grades of less than “B-” cannot be counted toward the degree. If the student earns a grade of less than “B-,” s/he may, with permission of the department chair and the Associate Dean, retake the term of study one additional time. The same applies to recitals.

Professional Development Policy:
In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

Performing Ensembles:

1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.

2. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair, and the Associate Dean.

Independent Study Courses:
Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval will be granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects will be granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

Acceptable English:
All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College’s statement on plagiarism and academic honesty.

Graduate Private Lesson Policy:
Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A $250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

The four terms of private lessons must be taken consecutively, with the exception of summers. Any deviation from this must have the approval of the advisor, department chair, and the Associate Dean of the Boyer College of Music and Dance. Graduate assistantships and other forms of University-sponsored financial aid do not cover private lesson and recital extension fees.

Written Preliminary Examinations:
The written preliminary examinations may be taken during the final term of coursework, but no later than in the term after completion of coursework. They are administered several times each calendar year, and span two consecutive days of six hours of examination each day. Written and performance examinations should be taken no later than the end of the fifth year to allow for the successful completion of the Final Recital and the writing of the monograph. Preliminary examinations must be successfully completed before formal work on the monograph may be undertaken and before the Final Recital may be presented.

Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date. Students are then notified in writing of the specific dates and administration times of the preliminary examinations for which they have been scheduled.

The examinations consist of questions relating to the major and minor areas and to musical style; require the student to comment articulately on the style and historical significance of musical compositions; and entail the student discussing and defending the principles of performance on the basis of which s/he would undertake to perform any composition in her/his major area. The questions are prepared by faculty members within the student's major and minor subject areas. At least two graduate faculty members read each section of the written preliminary examinations. Students typically are graded "Pass" or "Fail" based on a consensus of the examination readers.

**Oral Preliminary Examinations:**
For those students who pass the written preliminary examinations, no oral preliminary examination is required. (This refers only to the oral preliminary examination and does not refer in any way to the oral defense of the dissertation/monograph.)

If a student fails one or more portions of the written preliminary examination, an oral examination is administered by the major advisor and a minimum of two additional faculty members. In the case of failure in one subject area, two members of that department are asked by the student's major advisor to participate with the major advisor in the examination. In the case of failure in more than one subject area, at least one faculty member from each of the departments in which the failure occurred is asked by the student's major advisor to participate in the examination.

The examination is to be a formal oral examination rather than an informal meeting with graduate faculty from departments in which the examination revealed that the student needs further work. This does not preclude such informal meetings, however, in preparation for the oral examination. Upon passing the oral examination, the student, as advised by the examining committee, is permitted to schedule a second and final attempt at the failed portions of the written examination.

**Final Recital and Monograph Proposal:**
After the successful completion of the written preliminary examinations, MUSC 9984 DMA Final Recital and written monograph are undertaken in consultation with the major advisor, the department chair, and the Doctoral Advisory Committee (DAC). The DAC shall be appointed by the Associate Dean to adjudicate the Final Recital and to guide the student in writing both the monograph proposal and the final document itself. When the student, in consultation with the major advisor and department chair, has identified a tentative advisory committee, the chair gives those names to the Associate Dean for consideration. The Associate Dean appoints the DAC. The DAC consists of no fewer than three persons: two faculty members from within the department, and a third person from outside the department. Members of the DAC serve as the adjudicators of the Final Recital.

After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers within 30 days one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School. Students register for MUSC 9998 during the writing of the monograph proposal and MUSC 9999 after the proposal has been officially approved. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 Monograph Research during their program as a whole and must register for a minimum of 1 such credit each term.

**Recital Extension:**
Students withdrawing from the recital requirement during the recital term will receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course will be offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course will be replaced by a letter grade and MUSC 5000 Recital Extension will be issued a grade of "CR." Credit derived from Recital Extension will not be counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study will be the cost of 2 graduate credits plus a $400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.

2. Exceptions to Recital Extension:
   a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
   b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, if the student does not take Recital Extension during the Summer, s/he may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.

3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension will be reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, will determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

**Final Oral Examination:**
When the monograph is complete, the major advisor of the Doctoral Advisory Committee (DAC) asks the Associate Dean to appoint an outside reader. The DAC plus the outside reader constitute the Dissertation Examining Committee (DEC) for the monograph defense. Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary.

Doctoral candidates must submit a defense copy of the monograph to members of the DEC and the Associate Dean at least two weeks prior to the defense. Students should register for MUSC 9999 Monograph Research (1-6 credits) each term, Fall and Spring, until the final project has been successfully defended. Doctoral candidates are required to
register for a minimum of 6 credit hours of MUSC 9999 during their program as a whole, but must register for a minimum of one such credit each term.

Incompletes:
All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

Culminating Events:
Final Recital:
Students may present the DMA Final Recital (MUSC 9984) after the preliminary examination has been completed and the DAC has been appointed.

Proposal:
After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School within 30 days.

Monograph:
Early in the term in which a defense of the monograph is anticipated, the major advisor notifies the Associate Dean that it is time to appoint the Dissertation Examining Committee (DEC). The DEC consists of the DAC plus an "outside" reader, who is an additional graduate faculty member from Temple or another university, but not from the faculty of the student's home department.

Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary. This includes the "Announcement of Oral Defense" form, which must bear all appropriate signatures and be submitted to the Associate Dean.

Two weeks prior to the oral defense, the student submits individual copies of the abstract and the completed dissertation/monograph to the Associate Dean and each member of the DEC. The graduate secretary notifies the Graduate School and posts notices of the impending defense on bulletin boards located within the Boyer College of Music and Dance. All members of the DEC attend the oral defense and then vote to pass or fail the monograph and its defense after the conclusion of the public presentation.

Changes in membership of a DAC or a DEC must be approved by the Associate Dean. The change also must be communicated to the Graduate School.

Music Performance/Harp, D.M.A.
Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE (http://www.temple.edu/boyer)

About the Program
The objective of the D.M.A. program in Harp Performance is to foster growth and development of the highest and most sophisticated expression of musical interpretation through performance under the guidance of a very highly specialized faculty.

Time Limit for Degree Completion: 7 years

Campus Location: Main

Full-Time/Part-Time Status: The degree program can be completed on a full- or part-time basis.

Accreditation: The degree program is accredited by the National Association of Schools of Music (NASM).

Areas of Specialization: Diverse areas of study are included to ensure the broadest possible cultivation and expansion of students' talents.

Job Prospects: Graduates of this program typically find employment in professional music ensembles throughout the world, in colleges and universities, and in private teaching studios, among other employment venues.

Non-Matriculated Student Policy: Non-matriculated students may enroll in selected courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

Financing Opportunities: Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance, and/or direct service related to academic programs. Applicants must submit an assistantship/internship application by March 1 to obtain priority consideration
for an award. Applications are available online at the Graduate Financial Aid (http://www.temple.edu/boyer/admissions/documents/gradassistantshipform.pdf) page of Boyer's website. Typically these awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

Admission Requirements and Deadlines

Application Deadline:

Fall: November 15

APPLY ONLINE to this graduate program.

Letters of Reference:

Number Required: 2

From Whom: Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents, and aptitude for graduate study.

Coursework Required for Admission Consideration: All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours. Doctoral candidates must hold the Master of Music degree (or the equivalent) in the field of specialization from an accredited institution. Applicants accepted with deficiencies will find the deficiencies noted in the letter of admission. Deficiencies must be addressed prior to completion of the degree.

Master's Degree in Discipline/Related Discipline: A degree in Music is expected.

Bachelor's Degree in Discipline/Related Discipline: A degree in Music is expected.

Statement of Goals: Include your special interests within the discipline and expectations for the program.

Standardized Test Scores:

TOEFL: 100 iBT or 600 PBT minimum

Prescreening Video and Audition: Applicants submit a prescreening video via Acceptd (https://app.getacceptd.com/templeboyer). This recording may contain representative movements of the audition material, with the majority of the material having been recorded within the last 12 months. Video recordings of accompanied works must have piano or orchestral accompaniment.

If preliminary approval is granted, an in-person live audition is arranged. Audition repertoire requirements include:

- A sonata or solo from the Baroque period, e.g., Sonata in G Major by C.P.E. Bach.
- A major concerto, e.g., Harp Concerto by Ginastera, or Danse Sacrée et Danse Profane by Debussy.
- A sonata or major solo from the Romantic or Impressionist period, e.g., Britten's Suite for Harp in C Major, Op. 83 or Tournier's Sonatine, Op. 30.
- A representative 20th-Century work, preferably written after 1950.
- Four orchestral excerpts and/or cadenzas.

Note that video recordings alone are not acceptable for admission, except in the case of students living outside the United States. In this case, applicants must submit a video recording of complete works.

Interview: Applicants are interviewed by the department chair and Associate Dean at the time of the live audition.

Resume: Current resume required.

Writing Examination: An on-site Writing Examination is required as part of the doctoral admissions process. Remedial coursework may be required.

Advanced Standing: The D.M.A. program in Music Performance consists of 55 discrete credits taken beyond the master's degree. At the time of admission, the entire master's degree serves as advanced standing credits. These credits are not counted toward the 55 required credits of the doctoral degree. However, students may transfer into the doctoral program up to 12 additional graduate credits in coursework taken beyond the master's degree. Typically, this coursework is reviewed after admission to the D.M.A. degree and must be approved by the major advisor and the Associate Dean. The maximum number of advanced standing credits awarded is 32.

Additional Requirements: Applicants must:

1. Include with the application a repertoire list indicating works previously studied. The list should indicate which of the works were performed publicly and, if possible, where and when they were performed.
2. Show transcript evidence at the master's level in the area of bibliographical resources in music. If no transcript evidence is available, students must take MUST 8701 Research in Music in addition to the 6 required credits within the History/Theory area.

Other: Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This Policy may preclude the admission of any student who meets the minimum requirements.

Schools, Colleges, and Divisions
Screening for continuance in the program after the first term of study culminates in a performance examination or jury, except during terms in which the student has presented one of the required adjudicated recitals. Screening for continuance in the program after the first term of study is conducted at adjudicated recitals, end-of-the-term juries, and major examinations. This ensures that only the most qualified students continue beyond the early stages of the program.

Each course or seminar requires an end-of-term final grade based on papers prepared, recitals presented, discussion, and/or examinations taken during the course of the term. Each term of private study culminates in a performance examination or jury, except during terms in which the student has presented one of the required adjudicated recitals. Screening for continuance in the program after the first term of study is conducted at adjudicated recitals, end-of-the-term juries, and major examinations. This ensures that only the most qualified students continue beyond the early stages of the program.

For all doctoral programs, only grades from "A" to "B-" can be applied toward degree requirements. Grades of less than "B-" cannot be counted toward the degree. If the student earns a grade of less than "B-" he or she may, with permission of the department chair and the Associate Dean, retake the term of study one additional time. The same applies to recitals.

Professional Development Policy:
In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

Elective in Music History: 3
Minor Area in Music: 12

Total Credit Hours: 55

1 Select from courses at the level of MUSC 8404 or higher.
1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.

2. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair, and the Associate Dean.

Independent Study Courses:
Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval will be granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects will be granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

Acceptable English:
All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

Graduate Private Lesson Policy:
Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A $250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

The four terms of private lessons must be taken consecutively, with the exception of summers. Any deviation from this must have the approval of the advisor, department chair, and the Associate Dean of the Boyer College of Music and Dance. Graduate assistantships and other forms of University-sponsored financial aid do not cover private lesson and recital extension fees.

Written Preliminary Examinations:
The written preliminary examinations may be taken during the final term of coursework, but no later than in the term after completion of coursework. They are administered several times each calendar year, and span two consecutive days of six hours of examination each day. Written and performance examinations should be taken no later than the end of the fifth year to allow for the successful completion of the Final Recital and the writing of the monograph. Preliminary examinations must be successfully completed before formal work on the monograph may be undertaken and before the Final Recital may be presented.

Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date. Students are then notified in writing of the specific dates and administration times of the preliminary examinations for which they have been scheduled.

The examinations consist of questions relating to the major and minor areas and to musical style; require the student to comment articulately on the style and historical significance of musical compositions; and entail the student discussing and defending the principles of performance on the basis of which s/he would undertake to perform any composition in her/his major area. The questions are prepared by faculty members within the student's major and minor subject areas. At least two graduate faculty members read each section of the written preliminary examinations. Students typically are graded "Pass" or "Fail" based on a consensus of the examination readers.

Oral Preliminary Examinations:
For those students who pass the written preliminary examinations, no oral preliminary examination is required. (This refers only to the oral preliminary examination and does not refer in any way to the oral defense of the dissertation/monograph.)

If a student fails one or more portions of the written preliminary examination, an oral examination is administered by the major advisor and a minimum of two additional faculty members. In the case of failure in one subject area, two members of that department are asked by the student's major advisor to participate with the major advisor in the examination. In the case of failure in more than one subject area, at least one faculty member from each of the departments in which the failure occurred is asked by the student's major advisor to participate in the examination.

The examination is to be a formal oral examination rather than an informal meeting with graduate faculty from departments in which the examination revealed that the student needs further work. This does not preclude such informal meetings, however, in preparation for the oral examination. Upon passing the oral examination, the student, as advised by the examining committee, is permitted to schedule a second and final attempt at the failed portions of the written examination.

Final Recital and Monograph Proposal:
After the successful completion of the written preliminary examinations, MUSC 9984 DMA Final Recital and written monograph are undertaken in consultation with the major advisor, the department chair, and the Doctoral Advisory Committee (DAC). The DAC shall be appointed by the Associate Dean to adjudicate the Final Recital and to guide the student in writing both the monograph proposal and the final document itself. When the student, in consultation with the major advisor and department chair, has identified a tentative advisory committee, the chair gives those names to the Associate Dean for consideration. The Associate Dean appoints the DAC. The DAC consists of no fewer than three persons: two faculty members from within the department, and a third person from outside the department. Members of the DAC serve as the adjudicators of the Final Recital.

After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers within 30 days one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School. Students register for MUSC 9998 during the writing of the monograph proposal and MUSC 9999 after the proposal has been officially approved. Doctoral candidates are required to register for a minimum of 6 credit
hours of MUSC 9999 Monograph Research during their program as a whole and must register for a minimum of 1 such credit each term.

Recital Extension:
Students withdrawing from the recital requirement during the recital term will receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course will be offered on a “Credit/No Credit” basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course will be replaced by a letter grade and MUSC 5000 Recital Extension will be issued a grade of "CR." Credit derived from Recital Extension will not be counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study will be the cost of 2 graduate credits plus a $400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.

2. Exceptions to Recital Extension:
   a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
   b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, if the student does not take Recital Extension during the Summer, s/he may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.

3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension will be reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, will determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

Final Oral Examination:
When the monograph is complete, the major advisor of the Doctoral Advisory Committee (DAC) asks the Associate Dean to appoint an outside reader. The DAC plus the outside reader constitute the Dissertation Examining Committee (DEC) for the monograph defense. Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary.

Doctoral candidates must submit a defense copy of the monograph to members of the DEC and the Associate Dean at least two weeks prior to the defense. Students should register for MUSC 9999 Monograph Research (1-6 credits) each term, Fall and Spring, until the final project has been successfully defended. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 during their program as a whole, but must register for a minimum of one such credit each term.

Incompletes:
All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

Culminating Events:
Final Recital:
Students may present the DMA Final Recital (MUSC 9984) after the preliminary examination has been completed and the DAC has been appointed.

Proposal:
After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School within 30 days.

Monograph:
Early in the term in which a defense of the monograph is anticipated, the major advisor notifies the Associate Dean that it is time to appoint the Dissertation Examining Committee (DEC). The DEC consists of the DAC plus an "outside" reader, who is an additional graduate faculty member from Temple or another university, but not from the faculty of the student's home department.

Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary. This includes the "Announcement of Oral Defense" form, which must bear all appropriate signatures and be submitted to the Associate Dean.

Two weeks prior to the oral defense, the student submits individual copies of the abstract and the completed dissertation/monograph to the Associate Dean and each member of the DEC. The graduate secretary notifies the Graduate School and posts notices of the impending defense on bulletin boards located within the Boyer College of Music and Dance. All members of the DEC attend the oral defense and then vote to pass or fail the monograph and its defense after the conclusion of the public presentation.

Changes in membership of a DAC or a DEC must be approved by the Associate Dean. The change also must be communicated to the Graduate School.

Music Performance/Historical Keyboard, D.M.A.

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE (http://www.temple.edu/boyer)

About the Program

The objective of the D.M.A. program in Historical Keyboard Performance is to foster growth and development of the highest and most sophisticated expression of musical interpretation through performance. Under the guidance of a highly specialized faculty, students are expected to achieve the most advanced level of professional knowledge, training, and experience in the performance of solo and ensemble music on historical keyboard instruments. Studies will encompass repertoire from approximately the year 1500 up through the present.

Time Limit for Degree Completion: 7 years

Campus Location: Main

Full-Time/Part-Time Status: The degree program can be completed on a full- or part-time basis.

Accreditation: The degree program has been submitted for Plan Approval by the National Association of Schools of Music (NASM).

Areas of Specialization: To thoroughly prepare for future professional performance opportunities, students learn technique and figured bass, as well as gain a working knowledge of tuning and maintenance assistance. In keeping with the historical basis of the study, 17th- and 18th-century performance practice are emphasized in all course and studio work to ensure the cultivation and expansion of students' talents.

Job Prospects: Graduates of the program will be qualified to find employment in professional music ensembles throughout the world, in colleges and universities, in private teaching studios, and as professional accompanists and coaches, among other employment venues.

Non-Matriculated Student Policy: Non-matriculated students may enroll in selected courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

Financing Opportunities: Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance, and/or direct service related to academic programs. Applicants must submit an assistantship/internship application by March 1 to obtain priority consideration for an award. Applications are available online at the Graduate Financial Aid (http://www.temple.edu/boyer/admissions/documents/gradassistantshipform.pdf) page of Boyer's website. Typically these awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

Electives

Total Credit Hours: 54

1 Select from graduate courses in Music Studies (at least 6 credits), Performance Practice, Ensemble, Independent Study, or Special Topics. Advisor permission required.

Recitals:

1. Solo public recital, no later than completion of MUSC 9434, with advisor approval
2. Chamber Music Recital (MUSC 9384)
3. Lecture Recital (MUSC 9684)
4. Performance with Orchestra (MUSC 9784)
5. Final Doctoral Recital (MUSC 9984)

Additional Requirements:

All degree credits are to be earned at Temple University.

Written Entrance Examinations:

All doctoral students must take written entrance exams prior to or during the first term of doctoral study. Candidates who fail the entrance examinations the first time may, upon application to the Associate Dean for Graduate Studies of the Boyer College of Music and Dance, be permitted to take the examinations a second time. A third opportunity is not allowed.

To continue registration in the doctoral program beyond the second term of study, all portions of the examinations must be passed or the appropriate review courses (or the equivalent, as determined by the examining department) must be in progress. Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date.

1. Music History Exam: A general examination covering the history of music is administered. Questions relative to forms, styles, and

Boyer College of Music and Dance believes that such experiences give
the Boyer College of Music and Dance are obligated to serve in a number

In addition to taking the required subjects for their degrees, all students in
the D.M.A. program in Music Performance until the completion of all
coursework.

Continuation in the D.M.A. Program:
Each course or seminar requires an end-of-term final grade based on
papers prepared, recitals presented, discussion, and/or examinations
taken during the course of the term. Each term of private study
culminates in a performance examination or jury, except during terms in
which the student has presented one of the required adjudicated recitals.
Screening for continuance in the program after the first term of study
is conducted at adjudicated recitals, end-of-term juries, and major
examinations. This ensures that only the most qualified students continue
beyond the early stages of the program.

For all doctoral programs, only grades from "A" to "B-" can be applied
toward degree requirements. Grades of less than "B-" cannot be counted
toward the degree. If the student earns a grade of less than "B-," s/he
may, with permission of the department chair and the Associate Dean,
retake the term of study one additional time. The same applies to recitals.

Professional Development Policy:
In addition to taking the required subjects for their degrees, all students in
the Boyer College of Music and Dance are obligated to serve in a number
of capacities in order to enrich their academic and musical expertise.
Boyer College of Music and Dance believes that such experiences give
impetus to successful professional careers. Among the duties that may
be required are conducting laboratory classes; tutoring; teaching private
lessons; coaching; participating in the distribution and inventory control of
Temple University-owned musical instruments and instructional materials;
participating in ensembles; accompanying; performing at admissions and
open house events; supervising performance classes; and engaging in
other academic activities.

Performing Ensembles:

1. Touring: All students in touring performing ensembles are required
to participate in all scheduled tours. These tours, usually one or two
weeks in length, often take place immediately after termination of
terms. Students must arrange their schedules to accommodate this
requirement.

2. Non-Credit Participation: With special permission, graduate students
for whom there is no ensemble requirement, or where previous
ensemble credits exceed the graduation requirement, may participate
in choral and instrumental ensembles without cost, with prior
permission from the ensemble director, the department chair, and the
Associate Dean.

Independent Study Courses:
Independent study courses provide a special opportunity for graduate
students to work in a highly individualized setting with one or more faculty
members. All such study must receive the approval of the faculty member
providing the instruction, the students’ major advisor, and the Associate
Dean. Approval will be granted only after the student has presented a
detailed description of the intended independent study project. Approval
of independent study projects will be granted only for students whose
academic and musical record provides substantial support for the benefits
of this type of study. In no case may more than 20% of a graduate
student's curriculum be taken as independent study. Private lessons
beyond those required in the curriculum are not an appropriate form of
independent study.

Acceptable English:
All students, including those for whom English is not the native language,
are expected to present all written work in acceptable English. No double
standard exists to differentiate students on the basis of proficiency in the
use of the English language. Students are also responsible for becoming
familiar with the College’s statement on plagiarism and academic
honesty.

Graduate Private Lesson Policy:
Weekly one-hour private lessons are provided for all matriculated
master’s and doctoral performance majors in good standing, provided
at least three additional credits of programmatically required graduate-
level study are taken simultaneously. A $250 per term lesson fee (subject
to change without notice) is charged for all private lessons. Tuition
remission may not be used to cover the private lesson fee.

The four terms of private lessons must be taken consecutively, with the
exception of summers. Any deviation from this must have the approval
of the advisor, department chair, and the Associate Dean of the Boyer
College of Music and Dance. Graduate assistantships and other forms of
University-sponsored financial aid do not cover private lesson and recital
extension fees.

Written Preliminary Examinations:
The written preliminary examinations may be taken during the final
term of coursework, but no later than in the term after completion of
coursework. They are administered several times each calendar year,
and span two consecutive days of six hours of examination each day.
Written and performance examinations should be taken no later than the
end of the fifth year to allow for the successful completion of the Final
Recital and the writing of the monograph. Preliminary examinations must
be successfully completed before formal work on the monograph may be
undertaken and before the Final Recital may be presented.

Students planning to take the written examinations should request a list
of dates from the graduate secretary and submit a written request to the
Associate Dean one month prior to the administration date. Students are
then notified in writing of the specific dates and administration times of the preliminary examinations for which they have been scheduled.

The examinations consist of questions relating to the major and minor areas and to musical style; require the student to comment articulately on the style and historical significance of musical compositions; and entail the student discussing and defending the principles of performance on the basis of which s/he would undertake to perform any composition in her/his major area. The questions are prepared by faculty members within the student's major and minor subject areas. At least two graduate faculty members read each section of the written preliminary examinations. Students typically are graded "Pass" or "Fail" based on a consensus of the examination readers.

**Oral Preliminary Examinations:**

For those students who pass the written preliminary examinations, no oral preliminary examination is required. (This refers only to the oral examination and does not refer in any way to the oral defense of the dissertation/monograph.)

If a student fails one or more portions of the written preliminary examination, an oral examination is administered by the major advisor and a minimum of two additional faculty members. In the case of failure in one subject area, two members of that department are asked by the student's major advisor to participate with the major advisor in the examination. In the case of failure in more than one subject area, at least one faculty member from each of the departments in which the failure occurred is asked by the student's major advisor to participate in the examination.

The examination is to be a formal oral examination rather than an informal meeting with graduate faculty from departments in which the examination revealed that the student needs further work. This does not preclude such informal meetings, however, in preparation for the oral examination. Upon passing the oral examination, the student, as advised by the examining committee, is permitted to schedule a second and final attempt at the failed portions of the written examination.

**Final Recital and Monograph Proposal:**

After the successful completion of the written preliminary examinations, MUSC 9984 DMA Final Recital and written monograph are undertaken in consultation with the major advisor, the department chair, and the Doctoral Advisory Committee (DAC). The DAC shall be appointed by the Associate Dean to adjudicate the Final Recital and to guide the student in writing both the monograph proposal and the final document itself. When the student, in consultation with the major advisor and department chair, has identified a tentative advisory committee, the chair gives those names to the Associate Dean for consideration. The Associate Dean appoints the DAC. The DAC consists of no fewer than three persons: two faculty members from within the department, and a third person from outside the department. Members of the DAC serve as the adjudicators of the Final Recital.

After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers within 30 days one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School. Students register for MUSC 9998 during the writing of the monograph proposal and MUSC 9999 after the proposal has been officially approved. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 Monograph Research during their program as a whole and must register for a minimum of 1 such credit each term.

**Recital Extension:**

Students withdrawing from the recital requirement during the recital term will receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course will be offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course will be replaced by a letter grade and MUSC 5000 Recital Extension will be issued a grade of "CR." Credit derived from Recital Extension will not be counted toward degree requirements.

1. **Recital Extension Fees:** Tuition for these additional terms of private study will be the cost of 2 graduate credits plus a $400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.

2. **Exceptions to Recital Extension:**
   a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.

3. **Failure to Present Recital:** The degree status of students who are unable to present a recital after one term of Recital Extension will be reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, will determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

**Final Oral Examination:**

When the monograph is complete, the major advisor of the Doctoral Advisory Committee (DAC) asks the Associate Dean to appoint an outside reader. The DAC plus the outside reader constitute the Dissertation Examining Committee (DEC) for the monograph defense. Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date.Forms to schedule the defense are available from the graduate secretary.

Doctoral candidates must submit a defense copy of the monograph to members of the DEC and the Associate Dean at least two weeks prior to the defense. Students should register for MUSC 9999 Monograph Research (1-6 credits) each term, Fall and Spring, until the final project has been successfully defended. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 during their program as a whole, but must register for a minimum of one such credit each term.

**Incomplete:**

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

**Culminating Events:**

- **Final Recital:**
Students may present the DMA Final Recital (MUSC 9984) after the preliminary examination has been completed and the DAC has been appointed.

Proposal:
After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School within 30 days.

Monograph:
Early in the term in which a defense of the monograph is anticipated, the major advisor notifies the Associate Dean that it is time to appoint the Dissertation Examining Committee (DEC). The DEC consists of the DAC plus an “outside” reader, who is an additional graduate faculty member from Temple or another university, but not from the faculty of the student's home department.

Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary. This includes the “Announcement of Oral Defense” form, which must bear all appropriate signatures and be submitted to the Associate Dean.

Two weeks prior to the oral defense, the student submits individual copies of the abstract and the completed dissertation/monograph to the Associate Dean and each member of the DEC. The graduate secretary notifies the Graduate School and posts notices of the impending defense on bulletin boards located within the Boyer College of Music and Dance. All members of the DEC attend the oral defense and then vote to pass or fail the monograph and its defense after the conclusion of the public presentation.

Changes in membership of a DAC or a DEC must be approved by the Associate Dean. The change also must be communicated to the Graduate School.

Music Performance/Oboe, D.M.A.

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE (http://www.temple.edu/boyer)

About the Program

The objective of the D.M.A. program in Oboe Performance is to foster growth and development of the highest and most sophisticated expression of musical interpretation through performance under the guidance of a very highly specialized faculty.

Time Limit for Degree Completion: 7 years

Campus Location: Main

Full-Time/Part-Time Status: The degree program can be completed on a full- or part-time basis.

Accreditation: The degree program is accredited by the National Association of Schools of Music (NASM).

Areas of Specialization: Diverse areas of study are included to ensure the broadest possible cultivation and expansion of students’ talents.

Job Prospects: Graduates of the program typically find employment in professional music ensembles throughout the world, in colleges and universities, and in private teaching studios, among other employment venues.

Non-Matriculated Student Policy: Non-matriculated students may enroll in selected courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

Financing Opportunities: Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance, and/or direct service related to academic programs. Applicants must submit an assistantship/internship application by March 1 to obtain priority consideration for an award. Applications are available online at the Graduate Financial Aid (http://www.temple.edu/boyer/admissions/documents/gradassistantshipform.pdf) page of Boyer’s website. Typically these awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.
Admission Requirements and Deadlines

Application Deadline:

Fall: November 15

APPLY ONLINE to this graduate program.

Letters of Reference:
Number Required: 2

From Whom: Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents, and aptitude for graduate study.

Coursework Required for Admission Consideration: All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours. Doctoral candidates must hold the Master of Music degree (or the equivalent) in the field of specialization from an accredited institution. Applicants accepted with deficiencies will find the deficiencies noted in the letter of admission. Deficiencies must be addressed prior to completion of the degree.

Master's Degree in Discipline/Related Discipline: A degree in Music is expected.

Bachelor's Degree in Discipline/Related Discipline: A degree in Music is expected.

Statement of Goals: Include your special interests within the discipline and expectations for the program.

Standardized Test Scores:
TOEFL: 100 iBT or 600 PBT minimum

Prescreening Video and Audition: Applicants submit a prescreening video via Acceptd (https://app.getacceptd.com/templeboyer). This recording may contain representative movements of the audition material, with the majority of the material having been recorded within the last 12 months. Video recordings of accompanied works must have piano or orchestral accompaniment.

If preliminary approval is granted, an in-person live audition is arranged. Audition repertoire requirements include:

- A concerto, sonata, or solo piece from the Classical, Romantic, or Impressionistic period.
- A concerto, sonata, or solo piece from the 20th Century.
- Excerpts from the standard orchestral repertoire.

All works, except sonatas, should be memorized. Applicants must arrange for an accompanist for the live audition.

Note that video recordings alone are not acceptable for admission, except in the case of students living outside the United States. In this case, applicants must submit a video recording of complete works.

Interview: Applicants are interviewed by the department chair and Associate Dean at the time of the live audition.

Resume: Current resume required.

Writing Examination: An on-site Writing Examination is required as part of the doctoral admissions process. Remedial coursework may be required.

Advanced Standing: The D.M.A. program in Music Performance consists of 55 discrete credits taken beyond the master's degree. At the time of admission, the entire master's degree serves as advanced standing credits. These credits are not counted toward the 55 required credits of the doctoral degree. However, students may transfer into the doctoral program up to 12 additional graduate credits in coursework taken beyond the master's degree. Typically, this coursework is reviewed after admission to the D.M.A. degree and must be approved by the major advisor and the Associate Dean. The maximum number of advanced standing credits awarded is 30.

Additional Requirements: Applicants must:

1. Include with the application a repertoire list indicating works previously studied. The list should indicate which of the works were performed publicly and, if possible, where and when they were performed.
2. Show transcript evidence at the master's level in the area of bibliographical resources in music. If no transcript evidence is available, students must take MUST 8701 Research in Music in addition to the 6 required credits within the History/Theory area.

Other: Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This Policy may preclude the admission of any student who meets the minimum requirements.

6. Writing Sample: A 90-minute examination of the student's ability to write at the doctoral level is conducted. Examination topics are of a general nature.

**Diagnostic Recital:**
A diagnostic recital is required and must be performed before a faculty jury at the conclusion of the first term of study. The candidate must contact her/his advisor to arrange the jury. The recital consists of a full program, approximately 45 minutes in length, and may include the performance (with music) of a new composition that is presented to the applicant for study 48 hours in advance of the jury. An analysis of repertoire and technical needs results.

**Continuous Registration:**
Continuous registration of at least 3 credits must be maintained each term, with the exception of Summer, from the time of acceptance into the D.M.A. program in Music Performance until the completion of all coursework.

**Continuation in the D.M.A. Program:**
Each course or seminar requires an end-of-term final grade based on papers prepared, recitals presented, discussion, and/or examinations taken during the course of the term. Each term of private study culminates in a performance examination or jury, except during terms in which the student has presented one of the required adjudicated recitals. Screening for continuance in the program after the first term of study is conducted at adjudicated recitals, end-of-the-term juries, and major examinations. This ensures that only the most qualified students continue beyond the early stages of the program.

For all doctoral programs, only grades from "A" to "B-" can be applied toward degree requirements. Grades of less than "B-" cannot be counted toward the degree. If the student earns a grade of less than "B-," s/he may, with permission of the department chair and the Associate Dean, retake the term of study one additional time. The same applies to recitals.

**Professional Development Policy:**
In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

**Performing Ensembles:**

1. **Touring:** All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.

2. **Non-Credit Participation:** With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair, and the Associate Dean.

**Independent Study Courses:**
Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval will be granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects will be granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

Acceptable English:
All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

Graduate Private Lesson Policy:
Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A $250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

The four terms of private lessons must be taken consecutively, with the exception of summers. Any deviation from this must have the approval of the advisor, department chair, and the Associate Dean of the Boyer College of Music and Dance. Graduate assistantships and other forms of University-sponsored financial aid do not cover private lesson and recital extension fees.

Written Preliminary Examinations:
The written preliminary examinations may be taken during the final term of coursework, but no later than in the term after completion of coursework. They are administered several times each calendar year, and span two consecutive days of six hours of examination each day. Written and performance examinations should be taken no later than the end of the fifth year to allow for the successful completion of the Final Recital and the writing of the monograph. Preliminary examinations must be successfully completed before formal work on the monograph may be undertaken and before the Final Recital may be presented.

Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date. Students are then notified in writing of the specific dates and administration times of the preliminary examinations for which they have been scheduled.

The examinations consist of questions relating to the major and minor areas and to musical style; require the student to comment articulately on the style and historical significance of musical compositions; and entail the student discussing and defending the principles of performance on the basis of which s/he would undertake to perform any composition in her/his major area. The questions are prepared by faculty members within the student's major and minor subject areas. At least two graduate faculty members read each section of the written preliminary examinations. Students typically are graded "Pass" or "Fail" based on a consensus of the examination readers.

Oral Preliminary Examinations:
For those students who pass the written preliminary examinations, no oral preliminary examination is required. (This refers only to the oral preliminary examination and does not refer in any way to the oral defense of the dissertation/monograph.)

If a student fails one or more portions of the written preliminary examination, an oral examination is administered by the major advisor and a minimum of two additional faculty members. In the case of failure in one subject area, two members of that department are asked by the student's major advisor to participate with the major advisor in the examination. In the case of failure in more than one subject area, at least one faculty member from each of the departments in which the failure occurred is asked by the student's major advisor to participate in the examination.

The examination is to be a formal oral examination rather than an informal meeting with graduate faculty from departments in which the examination revealed that the student needs further work. This does not preclude such informal meetings, however, in preparation for the oral examination. Upon passing the oral examination, the student, as advised by the examining committee, is permitted to schedule a second and final attempt at the failed portions of the written examination.

Final Recital and Monograph Proposal:
After the successful completion of the written preliminary examinations, MUSC 9984 DMA Final Recital and written monograph are undertaken in consultation with the major advisor, the department chair, and the Doctoral Advisory Committee (DAC). The DAC shall be appointed by the Associate Dean to adjudicate the Final Recital and to guide the student in writing both the monograph proposal and the final document itself. When the student, in consultation with the major advisor and department chair, has identified a tentative advisory committee, the chair gives those names to the Associate Dean for consideration. The Associate Dean appoints the DAC. The DAC consists of no fewer than three persons: two faculty members from within the department, and a third person from outside the department. Members of the DAC serve as the adjudicators of the Final Recital.

After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers within 30 days one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School. Students register for MUSC 9998 during the writing of the monograph proposal and MUSC 9999 after the proposal has been officially approved. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 Monograph Research during their program as a whole and must register for a minimum of 1 such credit each term.

Recital Extension:
Students withdrawing from the recital requirement during the recital term will receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course will be offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course will be replaced by a letter grade and MUSC 5000 Recital Extension will be issued a grade of "CR." Credit derived from Recital Extension will not be counted toward degree requirements.
1. Recital Extension Fees: Tuition for these additional terms of private study will be the cost of 2 graduate credits plus a $400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.

2. Exceptions to Recital Extension:
   a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
   b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, if the student does not take Recital Extension during the Summer, s/he may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.

3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension will be reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, will determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

Final Oral Examination:
When the monograph is complete, the major advisor of the Doctoral Advisory Committee (DAC) asks the Associate Dean to appoint an outside reader. The DAC plus the outside reader constitute the Dissertation Examining Committee (DEC) for the monograph defense. Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary.

Doctoral candidates must submit a defense copy of the monograph to the Associate Dean, and the Graduate School within 30 days. Two weeks prior to the oral defense, the student submits individual copies of the abstract and the completed dissertation/monograph to the Associate Dean and each member of the DEC. The graduate secretary notifies the Graduate School and posts notices of the impending defense on bulletin boards located within the Boyer College of Music and Dance. All members of the DEC attend the oral defense and then vote to pass or fail the monograph and its defense after the conclusion of the public presentation.

Changes in membership of a DAC or a DEC must be approved by the Associate Dean. The change also must be communicated to the Graduate School.

Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

Admission Requirements and Deadlines

Application Deadline:

Fall: November 15

APPLY ONLINE to this graduate program.

Letters of Reference:

Number Required: 2

From Whom: Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents, and aptitude for graduate study.

Coursework Required for Admission Consideration: All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours. Doctoral candidates must hold the Master of Music degree (or the equivalent) in the field of specialization from an accredited institution. Applicants accepted with deficiencies will find the deficiencies noted in the letter of admission. Deficiencies must be addressed prior to completion of the degree.

Master's Degree in Discipline/Related Discipline: A degree in Music is expected.

Bachelor's Degree in Discipline/Related Discipline: A degree in Music is expected.

Statement of Goals: Include your special interests within the discipline and expectations for the program.

Standardized Test Scores:

TOEFL: 100 iBT or 600 PBT minimum

Prescreening Video and Audition: Applicants submit a prescreening video via Acceptd (https://app.getacceptd.com/templeboyer). This recording may contain representative movements of the audition material, with the majority of the material having been recorded within the last 12 months. Video recordings of accompanied works must have piano or orchestral accompaniment.

If preliminary approval is granted, an in-person live audition is arranged.

All works, except sonatas, should be memorized. Applicants must arrange for an accompanist for the live audition.

Interview: Applicants are interviewed by the department chair and Associate Dean at the time of the live audition.

Resume: Current resume required.

Writing Examination: An on-site Writing Examination is required as part of the doctoral admissions process. Remedial coursework may be required.

Advanced Standing: The D.M.A. program in Music Performance consists of 55 discrete credits taken beyond the master's degree. At the time of admission, the entire master's degree serves as advanced standing credits. These credits are not counted toward the 55 required credits of the doctoral degree. However, students may transfer into the doctoral program up to 12 additional graduate credits in coursework taken beyond the master's degree. Typically, this coursework is reviewed after admission to the D.M.A. degree and must be approved by the major advisor and the Associate Dean. The maximum number of advanced standing credits awarded is 30.

Additional Requirements: Applicants must:

1. Include with the application a repertoire list indicating works previously studied. The list should indicate which of the works were performed publicly and, if possible, where and when they were performed.
2. Show transcript evidence at the master’s level in the area of bibliographical resources in music. If no transcript evidence is available, students must take MUST 8701 Research in Music in addition to the 6 required credits within the History/Theory area.

Other: Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College’s Optimum Enrollment Policy. This Policy may preclude the admission of any student who meets the minimum requirements.

1 Select from courses at the level of MUSC 8404 or higher.

Recitals:

1. Solo public recital by the conclusion of the fourth term of lessons (MUSC 9534)
2. Solo public recital (MUSC 9184) or Chamber Music Recital (MUSC 9884)
3. Lecture Recital (MUSC 9684) or Performance with Orchestra (MUSC 9784)
4. Final Doctoral Recital (MUSC 9984)

Additional Requirements:

All degree credits are to be earned at Temple University.

Written Entrance Examinations:

All doctoral students must take written entrance exams prior to or during the first term of doctoral study. Candidates who fail the entrance examinations the first time may, upon application to the Associate Dean for Graduate Studies of the Boyer College of Music and Dance, be permitted to take the examinations a second time. A third opportunity is not allowed.

To continue registration in the doctoral program beyond the second term of study, all portions of the examinations must be passed or the appropriate review courses (or the equivalent, as determined by the examining department) must be in progress. Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date.

1. Music History Exam: A general examination covering the history of music is administered. Questions relative to forms, styles, and periods of music are included. It is expected that all examinees are acquainted with the standard literature of music.
2. Harmony Exam: This exam involves completion of a harmonic excerpt in advanced chromatic idiom and the creation of a bass line with figuration (figured bass) in Baroque style.
3. Counterpoint Exam: From a given motive, approximately 20 measures of imitative counterpoint in three parts are to be completed.
4. Form and Analysis Exam: A score is provided at the examination that requires analysis of specified passages.
5. Literature and Pedagogy Exam: This examination focuses on the literature and pedagogy of the instrument of specialization.
6. Writing Sample: A 90-minute examination of the student’s ability to write at the doctoral level is conducted. Examination topics are of a general nature.

Diagnostic Recital:

A diagnostic recital is required and must be performed before a faculty jury at the conclusion of the first term of study. The candidate must contact her/his advisor to arrange the jury. The recital consists of a full program, approximately 45 minutes in length, and may include the performance (with music) of a new composition that is presented to the applicant for study 48 hours in advance of the jury. An analysis of repertoire and technical needs results.

Continuous Registration:

Continuous registration of at least 3 credits must be maintained each term, with the exception of Summer, from the time of acceptance into the D.M.A. program in Music Performance until the completion of all coursework.

Continuation in the D.M.A. Program:
Each course or seminar requires an end-of-term final grade based on papers prepared, recitals presented, discussion, and/or examinations taken during the course of the term. Each term of private study culminates in a performance examination or jury, except during terms in which the student has presented one of the required adjudicated recitals. Screening for continuance in the program after the first term of study is conducted at adjudicated recitals, end-of-the-term juries, and major examinations. This ensures that only the most qualified students continue beyond the early stages of the program.

For all doctoral programs, only grades from "A" to "B-" can be applied toward degree requirements. Grades of less than "B-" cannot be counted toward the degree. If the student earns a grade of less than "B-" s/he may, with permission of the department chair and the Associate Dean, retake the term of study one additional time. The same applies to recitals.

Professional Development Policy:
In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

Performing Ensembles:
1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.
2. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair, and the Associate Dean.

Independent Study Courses:
Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval will be granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects will be granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

Acceptable English:
All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

Graduate Private Lesson Policy:
Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A $250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

The four terms of private lessons must be taken consecutively, with the exception of summers. Any deviation from this must have the approval of the advisor, department chair, and the Associate Dean of the Boyer College of Music and Dance. Graduate assistantships and other forms of University-sponsored financial aid do not cover private lesson and recital extension fees.

Written Preliminary Examinations:
The written preliminary examinations may be taken during the final term of coursework, but no later than in the term after completion of coursework. They are administered several times each calendar year, and span two consecutive days of six hours of examination each day. Written and performance examinations should be taken no later than the end of the fifth year to allow for the successful completion of the Final Recital and the writing of the monograph. Preliminary examinations must be successfully completed before formal work on the monograph may be undertaken and before the Final Recital may be presented.

Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date. Students are then notified in writing of the specific dates and administration times of the preliminary examinations for which they have been scheduled.

The examinations consist of questions relating to the major and minor areas and to musical style; require the student to comment articulately on the style and historical significance of musical compositions; and entail the student discussing and defending the principles of performance on the basis of which s/he would undertake to perform any composition in her/his major area. The questions are prepared by faculty members within the student's major and minor subject areas. At least two graduate faculty members read each section of the written preliminary examinations. Students typically are graded "Pass" or "Fail" based on a consensus of the examination readers.

Oral Preliminary Examinations:
For those students who pass the written preliminary examinations, no oral preliminary examination is required. (This refers only to the oral preliminary examination and does not refer in any way to the oral defense of the dissertation/monograph.)

If a student fails one or more portions of the written preliminary examination, an oral examination is administered by the major advisor and a minimum of two additional faculty members. In the case of failure in one subject area, two members of that department are asked by the student's major advisor to participate with the major advisor in the examination. In the case of failure in more than one subject area, at least one faculty member from each of the departments in which the failure occurred is asked by the student's major advisor to participate in the examination.

The examination is to be a formal oral examination rather than an informal meeting with graduate faculty from departments in which the
examination revealed that the student needs further work. This does not preclude such informal meetings, however, in preparation for the oral examination. Upon passing the oral examination, the student, as advised by the examining committee, is permitted to schedule a second and final attempt at the failed portions of the written examination.

Final Recital and Monograph Proposal:
After the successful completion of the written preliminary examinations, MUSC 9984 DMA Final Recital and written monograph are undertaken in consultation with the major advisor, the department chair, and the Doctoral Advisory Committee (DAC). The DAC shall be appointed by the Associate Dean to adjudicate the Final Recital and to guide the student in writing both the monograph proposal and the final document itself. When the student, in consultation with the major advisor and department chair, has identified a tentative advisory committee, the chair gives those names to the Associate Dean for consideration. The Associate Dean appoints the DAC. The DAC consists of no fewer than three persons: two faculty members from within the department, and a third person from outside the department. Members of the DAC serve as the adjudicators of the Final Recital.

After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers within 30 days one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School. Students register for MUSC 9998 during the writing of the monograph proposal and MUSC 9999 after the proposal has been officially approved. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 Monograph Research during their program as a whole and must register for a minimum of 1 such credit each term.

Recital Extension:
Students withdrawing from the recital requirement during the recital term will receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course will be offered on a “Credit/No Credit” basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course will be replaced by a letter grade and MUSC 5000 Recital Extension will be issued a grade of “CR.” Credit derived from Recital Extension will not be counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study will be the cost of 2 graduate credits plus a $400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.

2. Exceptions to Recital Extension:
   a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
   b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, if the student does not take Recital Extension during the Summer, s/he may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.

3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension will be reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, will determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

Final Oral Examination:
When the monograph is complete, the major advisor of the Doctoral Advisory Committee (DAC) asks the Associate Dean to appoint an outside reader. The DAC plus the outside reader constitute the Dissertation Examining Committee (DEC) for the monograph defense. Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary.

Doctoral candidates must submit a defense copy of the monograph to members of the DEC and the Associate Dean at least two weeks prior to the defense. Students should register for MUSC 9999 Monograph Research (1-6 credits) each term, Fall and Spring, until the final project has been successfully defended. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 during their program as a whole, but must register for a minimum of one such credit each term.

Incompletes:
All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

Culminating Events:
Final Recital:
Students may present the DMA Final Recital (MUSC 9994) after the preliminary examination has been completed and the DAC has been appointed.

Proposal:
After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School. Students register for MUSC 9999 Monograph Research (1-6 credits) each term, Fall and Spring, until the final project has been successfully defended. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 during their program as a whole.

Monograph:
Early in the term in which a defense of the monograph is anticipated, the major advisor notifies the Associate Dean that it is time to appoint the Dissertation Examining Committee (DEC). The DEC consists of the DAC plus an “outside” reader, who is an additional graduate faculty member from Temple or another university, but not from the faculty of the student’s home department.

Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary. This includes the “Announcement of Oral Defense” form, which must bear all appropriate signatures and be submitted to the Associate Dean.

Two weeks prior to the oral defense, the student submits individual copies of the abstract and the completed dissertation/monograph to the Associate Dean and each member of the DEC. The graduate secretary notifies the Graduate School and posts notices of the impending defense on bulletin boards located within the Boyer College of Music and Dance. All members of the DEC attend the oral defense and then vote to pass or fail the monograph and its defense after the conclusion of the public presentation.
Changes in membership of a DAC or a DEC must be approved by the Associate Dean. The change also must be communicated to the Graduate School.

Music Performance/Piano, D.M.A.

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE (http://www.temple.edu/boyer)

About the Program

The objective of the D.M.A. program in Piano Performance is to foster growth and development of the highest and most sophisticated expression of musical interpretation through performance under the guidance of a very highly specialized faculty.

Time Limit for Degree Completion: 7 years

Campus Location: Main

Full-Time/Part-Time Status: The degree program can be completed on a full- or part-time basis.

Accreditation: The degree program is accredited by the National Association of Schools of Music (NASM).

Areas of Specialization: Diverse areas of study are included to ensure the broadest possible cultivation and expansion of students’ talents.

Job Prospects: Graduates of the program typically find employment in professional music ensembles throughout the world, in colleges and universities, in private teaching studios, and as professional accompanists and coaches, among other employment venues.

Non-Matriculated Student Policy: Non-matriculated students may enroll in selected courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

Financing Opportunities: Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance, and/or direct service related to academic programs. Applicants must submit an assistantship/internship application by March 1 to obtain priority consideration for an award. Applications are available online at the Graduate Financial Aid (http://www.temple.edu/boyer/admissions/documents/gradassistantshipform.pdf) page of Boyer's website. Typically these awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

Admission Requirements and Deadlines

Application Deadline:
Fall: November 15

APPLY ONLINE to this graduate program.

Letters of Reference:
Number Required: 2

From Whom: Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents, and aptitude for graduate study.

Coursework Required for Admission Consideration: All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours. Doctoral candidates must hold the Master of Music degree (or the equivalent) in the field of specialization from an accredited institution. Applicants accepted with deficiencies will find the deficiencies noted in the letter of admission. Deficiencies must be addressed prior to completion of the degree.

Master's Degree in Discipline/Related Discipline: A degree in Music is expected.

Bachelor's Degree in Discipline/Related Discipline: A degree in Music is expected.

Statement of Goals: Include your special interests within the discipline and expectations for the program.

Standardized Test Scores:
TOEFL: 100 iBT or 600 PBT minimum

recording may contain representative movements of the audition material, with the majority of the material having been recorded within the last 12 months. Video recordings of accompanied works must have piano or orchestral accompaniment.

If preliminary approval is granted, an in-person live audition is arranged. Audition repertoire requirements include:

- A major work from each of the Baroque, Classical, Romantic, and Impressionistic periods.
- A representative 20th-Century work, e.g., Barber, Bartok, Copland, Hindemith, Prokofiev, and the like.

All works should be memorized.

Note that video recordings alone are not acceptable for admission, except in the case of students living outside the United States. In this case, applicants must submit a video recording of complete works.

**Scholarly Paper:** Applicants must upload a scholarly paper to Acceptd (https://app.getacceptd.com/templeboyer).

**Interview:** Applicants are interviewed by the department chair and Associate Dean at the time of the live audition.

**Resume:** Current resume required.

**Writing Examination:** An on-site Writing Examination is required as part of the doctoral admissions process. Remedial coursework may be required.

**Advanced Standing:** The D.M.A. program in Music Performance consists of 54 discrete credits taken beyond the master's degree. At the time of admission, the entire master's degree serves as advanced standing credits. These credits are not counted toward the 54 required credits of the doctoral degree. However, students may transfer into the doctoral program up to 12 additional graduate credits in coursework taken beyond the master's degree. Typically, this coursework is reviewed after admission to the D.M.A. degree and must be approved by the major advisor and the Associate Dean. The maximum number of advanced standing credits awarded is 30.

**Additional Requirements:**

1. Include with the application a repertoire list indicating works previously studied. The list should indicate which of the works were performed publicly and, if possible, where and when they were performed.

2. Show transcript evidence at the master's level in the area of bibliographical resources in music. If no transcript evidence is available, students must take MUST 8701 Research in Music in addition to the 6 required credits within the History/Theory area.

3. Show transcript evidence at the master's level in the area of performance practices. If no transcript evidence can be presented, students must take up to 6 credits of MUSC 8477 Baroque Keyboard Performance Practice and/or MUSC 8478 Classical Keyboard Performance Practice.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This Policy may preclude the admission of any student who meets the minimum requirements.

A diagnostic recital is required and must be performed before a faculty jury at the conclusion of the first term of study. The candidate must contact her/his advisor to arrange the jury. The recital consists of a full program, approximately 45 minutes in length, and may include the performance (with music) of a new composition that is presented to the applicant for study 48 hours in advance of the jury. An analysis of repertoire and technical needs results.

**Continuous Registration:**
Continuous registration of at least 3 credits must be maintained each term, with the exception of Summer, from the time of acceptance into the D.M.A. program in Music Performance until the completion of all coursework.

**Continuation in the D.M.A. Program:**
Each course or seminar requires an end-of-term final grade based on papers prepared, recitals presented, discussion, and/or examinations taken during the course of the term. Each term of private study culminates in a performance examination or jury, except during terms in which the student has presented one of the required adjudicated recitals. Screening for continuance in the program after the first term of study is conducted at adjudicated recitals, end-of-the-term juries, and major examinations. This ensures that only the most qualified students continue beyond the early stages of the program.

For all doctoral programs, only grades from “A” to “B-” can be applied toward degree requirements. Grades of less than “B-” cannot be counted toward the degree. If the student earns a grade of less than “B-” s/he may, with permission of the department chair and the Associate Dean, retake the term of study one additional time. The same applies to recitals.

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

**Performing Ensembles:**

1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.
2. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair, and the Associate Dean.

**Independent Study Courses:**
Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval will be granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects will be granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

**Acceptable English:**
All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

**Graduate Private Lesson Policy:**
Weekly one-hour private lessons are provided for all matriculated master’s and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A $250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

The four terms of private lessons must be taken consecutively, with the exception of summers. Any deviation from this must have the approval of the advisor, department chair, and the Associate Dean of the Boyer College of Music and Dance. Graduate assistantships and other forms of University-sponsored financial aid do not cover private lesson and recital extension fees.
Written Preliminary Examinations:
The written preliminary examinations may be taken during the final
term of coursework, but no later than in the term after completion of
coursework. They are administered several times each calendar year,
and span two consecutive days of six hours of examination each day.
Written and performance examinations should be taken no later than the
end of the fifth year to allow for the successful completion of the Final
Recital and the writing of the monograph. Preliminary examinations must
be successfully completed before formal work on the monograph may be
undertaken and before the Final Recital may be presented.

Students planning to take the written examinations should request a list
of dates from the graduate secretary and submit a written request to the
Associate Dean one month prior to the administration date. Students are
then notified in writing of the specific dates and administration times of
the preliminary examinations for which they have been scheduled.

The examinations consist of questions relating to the major and minor
areas and to musical style; require the student to comment articulately on
the style and historical significance of musical compositions; and entail
the student discussing and defending the principles of performance on
the basis of which s/he would undertake to perform any composition
in her/his major area. The questions are prepared by faculty members
within the student's major and minor subject areas. At least two
graduate faculty members read each section of the written preliminary
examinations. Students typically are graded "Pass" or "Fail" based on a
consensus of the examination readers.

Oral Preliminary Examinations:
For those students who pass the written preliminary examinations, no
oral preliminary examination is required. (This refers only to the oral
preliminary examination and does not refer in any way to the oral defense
of the dissertation/monograph.)

If a student fails one or more portions of the written preliminary
examination, an oral examination is administered by the major advisor
and a minimum of two additional faculty members. In the case of failure
in one subject area, two members of that department are asked by
the student's major advisor to participate with the major advisor in the
examination. In the case of failure in more than one subject area, at least
one faculty member from each of the departments in which the failure
occurred is asked by the student's major advisor to participate in the
examination.

The examination is to be a formal oral examination rather than an
informal meeting with graduate faculty from departments in which the
examination revealed that the student needs further work. This does not
preclude such informal meetings, however, in preparation for the oral
examination. Upon passing the oral examination, the student, as advised
by the examining committee, is permitted to schedule a second and final
attempt at the failed portions of the written examination.

Final Recital and Monograph Proposal:
After the successful completion of the written preliminary examinations,
MUSC 9984 DMA Final Recital and written monograph are undertaken
in consultation with the major advisor, the department chair, and the
Doctoral Advisory Committee (DAC). The DAC shall be appointed by the
Associate Dean to adjudicate the Final Recital and to guide the student
in writing both the monograph proposal and the final document itself.
When the student, in consultation with the major advisor and department
chair, has identified a tentative advisory committee, the chair gives those
names to the Associate Dean for consideration. The Associate Dean
appoints the DAC. The DAC consists of no fewer than three persons:
two faculty members from within the department, and a third person from
outside the department. Members of the DAC serve as the adjudicators
of the Final Recital.

After a proposal for the monograph has been developed by the student in
consultation with the DAC, the student prepares a final copy for approval.
Each member of the DAC must sign the final proposal. Once all DAC
members have signed the title page, the student copies the final proposal
and delivers within 30 days one copy to each member of the DAC,
the department chair, the Associate Dean, and the Graduate School.
Students register for MUSC 9998 during the writing of the monograph
proposal and MUSC 9999 after the proposal has been officially approved.
Doctoral candidates are required to register for a minimum of 6 credit
hours of MUSC 9999 Monograph Research during their program as a
whole and must register for a minimum of 1 such credit each term.

Recital Extension:
Students withdrawing from the recital requirement during the recital
term will receive an Incomplete and must register for extended study for
non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital
Extension must be taken each term until the recital has been presented.
This course will be offered on a "Credit/No Credit" basis only. Upon
satisfactory completion of the recital, the Incomplete for the recital course
will be replaced by a letter grade and MUSC 5000 Recital Extension will be
issued a grade of "CR." Credit derived from Recital Extension will not
be counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private
study will be the cost of 2 graduate credits plus a $400 Recital
Extension fee. Graduate assistantships and other forms of University-
sponsored financial aid do not cover the Recital Extension fee.

2. Exceptions to Recital Extension:
   a. Students who perform their recitals during the first three weeks of
      the Spring term are not required to register for Recital Extension
      that term.
   b. Students who register for Recital Extension during the Summer
      may perform their recitals during the first three weeks of the Fall
      term. However, if the student does not take Recital Extension
      during the Summer, s/he may not present the recital in the Fall
      term, regardless of the date, without also registering for the Fall
      term of Recital Extension.

3. Failure to Present Recital: The degree status of students who are
unable to present a recital after one term of Recital Extension will
be reviewed by the Associate Dean and the major advisor, who, in
consultation with the major teacher and department, will determine
whether or not the student may continue in the program. Inability
to present the recital after one term of Recital Extension may be
grounds for dismissal from the degree program for failing to maintain
reasonable academic progress.

Final Oral Examination:
When the monograph is complete, the major advisor of the Doctoral
Advisory Committee (DAC) asks the Associate Dean to appoint
an outside reader. The DAC plus the outside reader constitute the
Dissertation Examining Committee (DEC) for the monograph defense.
Doctoral candidates must schedule a defense of the monograph with the
Associate Dean at least one month before the requested defense date.
Forms to schedule the defense are available from the graduate secretary.

Doctoral candidates must submit a defense copy of the monograph to
members of the DEC and the Associate Dean at least two weeks prior
to the defense. Students should register for MUSC 9999 Monograph
Research (1-6 credits) each term, Fall and Spring, until the final project
has been successfully defended. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 during their program as a whole, but must register for a minimum of one such credit each term.

Incomplete:
All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

Culminating Events:
Final Recital:
Students may present the DMA Final Recital (MUSC 9984) after the preliminary examination has been completed and the DAC has been appointed.

Proposal:
After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School within 30 days.

Monograph:
Early in the term in which a defense of the monograph is anticipated, the major advisor notifies the Associate Dean that it is time to appoint the Dissertation Examining Committee (DEC). The DEC consists of the DAC plus an "outside" reader, who is an additional graduate faculty member from Temple or another university, but not from the faculty of the student's home department.

Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary. This includes the "Announcement of Oral Defense" form, which must bear all appropriate signatures and be submitted to the Associate Dean.

Two weeks prior to the oral defense, the student submits individual copies of the abstract and the completed dissertation/monograph to the Associate Dean and each member of the DEC. The graduate secretary notifies the Graduate School and posts notices of the impending defense on bulletin boards located within the Boyer College of Music and Dance. All members of the DEC attend the oral defense and then vote to pass or fail the monograph and its defense after the conclusion of the public presentation.

Changes in membership of a DAC or a DEC must be approved by the Associate Dean. The change also must be communicated to the Graduate School.

Music Performance/Trombone, D.M.A.

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE (http://www.temple.edu/boyer)

About the Program
The objective of the D.M.A. program in Trombone Performance is to foster growth and development of the highest and most sophisticated expression of musical interpretation through performance under the guidance of a very highly specialized faculty.

Time Limit for Degree Completion: 7 years

Campus Location: Main

Full-Time/Part-Time Status: The degree program can be completed on a full- or part-time basis.

Accreditation: The degree program is accredited by the National Association of Schools of Music (NASM).

Areas of Specialization: Diverse areas of study are included to ensure the broadest possible cultivation and expansion of students' talents.

Job Prospects: Graduates of the program typically find employment in professional music ensembles throughout the world, in colleges and universities, and in private teaching studios, among other employment venues.

Non-Matriculated Student Policy: Non-matriculated students may enroll in selected courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

Financing Opportunities: Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom
assistance, research, artistic performance, and/or direct service related to academic programs. Applicants must submit an assistantship/internship application by March 1 to obtain priority consideration for an award. Applications are available online at the Graduate Financial Aid (http://www.temple.edu/boyer/admissions/documents/gradassistantshipform.pdf) page of Boyer's website. Typically these awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

**Admission Requirements and Deadlines**

**Application Deadline:**

*Fall: November 15*

*APPLY ONLINE to this graduate program.*

**Letters of Reference:**

*Number Required: 2*

*From Whom: Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents, and aptitude for graduate study.*

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours. Doctoral candidates must hold the Master of Music degree (or the equivalent) in the field of specialization from an accredited institution. Applicants accepted with deficiencies will find the deficiencies noted in the letter of admission. Deficiencies must be addressed prior to completion of the degree.

**Master's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Bachelor's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Statement of Goals:** Include your special interests within the discipline and expectations for the program.

**Standardized Test Scores:**

*TOEFL: 100 iBT or 600 PBT minimum*

**Prescreening Video and Audition:** Applicants submit a prescreening video via Acceptd (https://app.getacceptd.com/templeboyer). This recording may contain representative movements of the audition material, with the majority of the material having been recorded within the last 12 months. Video recordings of accompanied works must have piano or orchestral accompaniment.

If preliminary approval is granted, an in-person live audition is arranged. Audition repertoire requirements include:

- A concerto, sonata, or solo piece from the Classical, Romantic, or Impressionistic period.
- A concerto, sonata, or solo piece from the 20th Century.
- Excerpts from the standard orchestral repertoire.

All works, except sonatas, should be memorized.

Note that video recordings alone are not acceptable for admission, except in the case of students living outside the United States. In this case, applicants must submit a video recording of complete works.

**Scholarly Paper:** Applicants must upload a scholarly paper to Acceptd (https://app.getacceptd.com/templeboyer).

**Interview:** Applicants are interviewed by the department chair and Associate Dean at the time of the live audition.

**Resume:** Current resume required.

**Writing Examination:** An on-site Writing Examination is required as part of the doctoral admissions process. Remedial coursework may be required.

**Advanced Standing:** The D.M.A. program in Music Performance consists of 55 discrete credits taken beyond the master's degree. At the time of admission, the entire master's degree serves as advanced standing credits. These credits are not counted toward the 55 required credits of the doctoral degree. However, students may transfer into the doctoral program up to 12 additional graduate credits in coursework taken beyond the master's degree. Typically, this coursework is reviewed after admission to the D.M.A. degree and must be approved by the major advisor and the Associate Dean. The maximum number of advanced standing credits awarded is 30.

**Additional Requirements:** Applicants must:

1. Include with the application a repertoire list indicating works previously studied. The list should indicate which of the works were performed publicly and, if possible, where and when they were performed.
2. Show transcript evidence at the master's level in the area of bibliographical resources in music. If no transcript evidence is available, students must take MUST 8701 Research in Music in addition to the 6 required credits within the History/Theory area.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This Policy may preclude the admission of any student who meets the minimum requirements.

**Program Requirements**

**General Program Requirements:**

*Number of Didactic Credits Required Beyond the Master's: 54*

Recitals:  
1. Solo public recital by the conclusion of the fourth term of lessons (MUSC 9534)  
2. Solo public recital (MUSC 9184) or Chamber Music Recital (MUSC 9884)  
3. Lecture Recital (MUSC 9684) or Performance with Orchestra (MUSC 9784)  
4. Final Doctoral Recital (MUSC 9984)  

Additional Requirements:  
All degree credits are to be earned at Temple University.  

Written Entrance Examinations:  
All doctoral students must take written entrance exams prior to or during the first term of doctoral study. Candidates who fail the entrance examinations the first time may, upon application to the Associate Dean for Graduate Studies of the Boyer College of Music and Dance, be permitted to take the examinations a second time. A third opportunity is not allowed.  

To continue registration in the doctoral program beyond the second term of study, all portions of the examinations must be passed or the appropriate review courses (or the equivalent, as determined by the examining department) must be in progress. Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date.  

1. Music History Exam: A general examination covering the history of music is administered. Questions relative to forms, styles, and periods of music are included. It is expected that all examinees are acquainted with the standard literature of music.  
2. Harmony Exam: This exam involves completion of a harmonic excerpt in advanced chromatic idiom and the creation of a bass line with figuration (figured bass) in Baroque style.  
3. Counterpoint Exam: From a given motive, approximately 20 measures of imitative counterpoint in three parts are to be completed.  
4. Form and Analysis Exam: A score is provided at the examination that requires analysis of specified passages.  
5. Literature and Pedagogy Exam: This examination focuses on the literature and pedagogy of the instrument of specialization.  
6. Writing Sample: A 90-minute examination of the student’s ability to write at the doctoral level is conducted. Examination topics are of a general nature.  

Diagnostic Recital:  
A diagnostic recital is required and must be performed before a faculty jury at the conclusion of the first term of study. The candidate must contact her/his advisor to arrange the jury. The recital consists of a full program, approximately 45 minutes in length, and may include the performance (with music) of a new composition that is presented to the applicant for study 48 hours in advance of the jury. An analysis of repertoire and technical needs results.  

Continuous Registration:  
Continuous registration of at least 3 credits must be maintained each term, with the exception of Summer, from the time of acceptance into the D.M.A. program in Music Performance until the completion of all coursework.  

Continuation in the D.M.A. Program:  
Each course or seminar requires an end-of-term final grade based on papers prepared, recitals presented, discussion, and/or examinations taken during the course of the term. Each term of private study culminates in a performance examination or jury, except during terms in which the student has presented one of the required adjudicated recitals. Screening for continuance in the program after the first term of study is conducted at adjudicated recitals, end-of-the-term juries, and major examinations. This ensures that only the most qualified students continue beyond the early stages of the program.  

For all doctoral programs, only grades from “A” to “B-” can be applied toward degree requirements. Grades of less than “B-” cannot be counted toward the degree. If the student earns a grade of less than “B-,” s/he may, with permission of the department chair and the Associate Dean, retake the term of study one additional time. The same applies to recitals.  

Professional Development Policy:  
In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.  

Performing Ensembles:
1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.

2. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair, and the Associate Dean.

**Independent Study Courses:**

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students’ major advisor, and the Associate Dean. Approval will be granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects will be granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student’s curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

**Acceptable English:**

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College’s statement on plagiarism and academic honesty.

**Graduate Private Lesson Policy:**

Weekly one-hour private lessons are provided for all matriculated master’s and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A $250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

The four terms of private lessons must be taken consecutively, with the exception of summers. Any deviation from this must have the approval of the advisor, department chair, and the Associate Dean of the Boyer College of Music and Dance. Graduate assistantships and other forms of University-sponsored financial aid do not cover private lesson and recital extension fees.

**Written Preliminary Examinations:**

The written preliminary examinations may be taken during the final term of coursework, but no later than in the term after completion of coursework. They are administered several times each calendar year, and span two consecutive days of six hours of examination each day. Written and performance examinations should be taken no later than the end of the fifth year to allow for the successful completion of the Final Recital and the writing of the monograph. Preliminary examinations must be successfully completed before formal work on the monograph may be undertaken and before the Final Recital may be presented.

Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date. Students are then notified in writing of the specific dates and administration times of the preliminary examinations for which they have been scheduled.

The examinations consist of questions relating to the major and minor areas and to musical style; require the student to comment articulately on the style and historical significance of musical compositions; and entail the student discussing and defending the principles of performance on the basis of which s/he would undertake to perform any composition in her/his major area. The questions are prepared by faculty members within the student’s major and minor subject areas. At least two graduate faculty members read each section of the written preliminary examinations. Students typically are graded "Pass" or "Fail" based on a consensus of the examination readers.

**Oral Preliminary Examinations:**

For those students who pass the written preliminary examinations, no oral preliminary examination is required. (This refers only to the oral preliminary examination and does not refer in any way to the oral defense of the dissertation/monograph.)

If a student fails one or more portions of the written preliminary examination, an oral examination is administered by the major advisor and a minimum of two additional faculty members. In the case of failure in one subject area, two members of that department are asked by the student’s major advisor to participate with the major advisor in the examination. In the case of failure in more than one subject area, at least one faculty member from each of the departments in which the failure occurred is asked by the student’s major advisor to participate in the examination.

The examination is to be a formal oral examination rather than an informal meeting with graduate faculty from departments in which the examination revealed that the student needs further work. This does not preclude such informal meetings, however, in preparation for the oral examination. Upon passing the oral examination, the student, as advised by the examining committee, is permitted to schedule a second and final attempt at the failed portions of the written examination.

**Final Recital and Monograph Proposal:**

After the successful completion of the written preliminary examinations, MUSC 9984 DMA Final Recital and written monograph are undertaken in consultation with the major advisor, the department chair, and the Doctoral Advisory Committee (DAC). The DAC shall be appointed by the Associate Dean to adjudicate the Final Recital and to guide the student in writing both the monograph proposal and the final document itself. When the student, in consultation with the major advisor and department chair, has identified a tentative advisory committee, the chair gives those names to the Associate Dean for consideration. The Associate Dean appoints the DAC. The DAC consists of no fewer than three persons: two faculty members from within the department, and a third person from outside the department. Members of the DAC serve as the adjudicators of the Final Recital.

After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers within 30 days one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School. Students register for MUSC 9998 during the writing of the monograph proposal and MUSC 9999 after the proposal has been officially approved. Doctoral candidates are required to register for a minimum of 6 credit
hours of MUSC 9999 Monograph Research during their program as a whole and must register for a minimum of 1 such credit each term.

Recital Extension:
Students withdrawing from the recital requirement during the recital term will receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course will be offered on a “Credit/No Credit” basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course will be replaced by a letter grade and MUSC 5000 Recital Extension will be issued a grade of “CR.” Credit derived from Recital Extension will not be counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study will be the cost of 2 graduate credits plus a $400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.

2. Exceptions to Recital Extension:
   a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
   b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, if the student does not take Recital Extension during the Summer, s/he may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.

3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension will be reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, will determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

Final Oral Examination:
When the monograph is complete, the major advisor of the Doctoral Advisory Committee (DAC) asks the Associate Dean to appoint an outside reader. The DAC plus the outside reader constitute the Dissertation Examining Committee (DEC) for the monograph defense. Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary.

Doctoral candidates must submit a defense copy of the monograph to members of the DEC and the Associate Dean at least two weeks prior to the defense. Students should register for MUSC 9999 Monograph Research (1-6 credits) each term, Fall and Spring, until the final project has been successfully defended. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 during their program as a whole, but must register for a minimum of one such credit each term.

Incompletes:
All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

Culminating Events:
Final Recital:

Students may present the DMA Final Recital (MUSC 9984) after the preliminary examination has been completed and the DAC has been appointed.

Proposal:
After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School within 30 days.

Monograph:
Early in the term in which a defense of the monograph is anticipated, the major advisor notifies the Associate Dean that it is time to appoint the Dissertation Examining Committee (DEC). The DEC consists of the DAC plus an “outside” reader, who is an additional graduate faculty member from Temple or another university, but not from the faculty of the student’s home department.

Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary. This includes the “Announcement of Oral Defense” form, which must bear all appropriate signatures and be submitted to the Associate Dean.

Two weeks prior to the oral defense, the student submits individual copies of the abstract and the completed dissertation/monograph to the Associate Dean and each member of the DEC. The graduate secretary notifies the Graduate School and posts notices of the impending defense on bulletin boards located within the Boyer College of Music and Dance. All members of the DEC attend the oral defense and then vote to pass or fail the monograph and its defense after the conclusion of the public presentation.

Changes in membership of a DAC or a DEC must be approved by the Associate Dean. The change also must be communicated to the Graduate School.

Music Performance/Trumpet, D.M.A.

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE (http://www.temple.edu/boyer)

About the Program

The objective of the D.M.A. program in Trumpet Performance is to foster growth and development of the highest and most sophisticated expression of musical interpretation through performance under the guidance of a very highly specialized faculty.

Time Limit for Degree Completion: 7 years

Campus Location: Main

Full-Time/Part-Time Status: The degree program can be completed on a full- or part-time basis.

Accreditation: The degree program is accredited by the National Association of Schools of Music (NASM).

Areas of Specialization: Diverse areas of study are included to ensure the broadest possible cultivation and expansion of students' talents.

Job Prospects: Graduates of the program typically find employment in professional music ensembles throughout the world, in colleges and universities, and in private teaching studios, among other employment venues.

Non-Matriculated Student Policy: Non-matriculated students may enroll in selected courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

Financing Opportunities: Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance, and/or direct service related to academic programs. Applicants must submit an assistantship/ internship application by March 1 to obtain priority consideration for an award. Applications are available online at the Graduate Financial Aid (http://www.temple.edu/boyer/admissions/documents/gradassistantshipform.pdf) page of Boyer's website. Typically these awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

Admission Requirements and Deadlines

Application Deadline:

Fall: November 15

APPLY ONLINE to this graduate program.

Letters of Reference:

Number Required: 2

From Whom: Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents, and aptitude for graduate study.

Coursework Required for Admission Consideration: All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours. Doctoral candidates must hold the Master of Music degree (or the equivalent) in the field of specialization from an accredited institution. Applicants accepted with deficiencies will find the deficiencies noted in the letter of admission. Deficiencies must be addressed prior to completion of the degree.

Master's Degree in Discipline/Related Discipline: A degree in Music is expected.

Bachelor's Degree in Discipline/Related Discipline: A degree in Music is expected.

Statement of Goals: Include your special interests within the discipline and expectations for the program.

Standardized Test Scores:

TOEFL: 100 iBT or 600 PBT minimum

Prescreening Video and Audition: Applicants submit a prescreening video via Acceptd (https://app.getacceptd.com/templeboyer). This recording may contain representative movements of the audition material, with the majority of the material having been recorded within the last 12 months. Video recordings of accompanied works must have piano or orchestral accompaniment.

If preliminary approval is granted, an in-person live audition is arranged. Audition repertoire requirements include:

- A concerto, sonata, or solo piece from the Classical, Romantic, or Impressionistic period.
- A concerto, sonata, or solo piece from the 20th Century.
- Excerpts from the standard orchestral repertoire.

All works, except sonatas, should be memorized.

Note that video recordings alone are not acceptable for admission, except in the case of students living outside the United States. In this case, applicants must submit a video recording of complete works.

Interview: Applicants are interviewed by the department chair and Associate Dean at the time of the live audition.
Resume: Current resume required.

Writing Examination: An on-site Writing Examination is required as part of the doctoral admissions process. Remedial coursework may be required.

Advanced Standing: The D.M.A. program in Music Performance consists of 55 discrete credits taken beyond the master's degree. At the time of admission, the entire master's degree serves as advanced standing credits. These credits are not counted toward the 55 required credits of the doctoral degree. However, students may transfer into the doctoral program up to 12 additional graduate credits in coursework taken beyond the master's degree. Typically, this coursework is reviewed after admission to the D.M.A. degree and must be approved by the major advisor and the Associate Dean. The maximum number of advanced standing credits awarded is 30.

Additional Requirements: Applicants must:

1. Include with the application a repertoire list indicating works previously studied. The list should indicate which of the works were performed publicly and, if possible, where and when they were performed.

2. Show transcript evidence at the master's level in the area of bibliographical resources in music. If no transcript evidence is available, students must take MUST 8701 Research in Music in addition to the 6 required credits within the History/Theory area.

Other: Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This Policy may preclude the admission of any student who meets the minimum requirements.

Total Credit Hours 54

1. Select from courses at the level of MUSC 8404 or higher.

Recitals:

1. Solo public recital by the conclusion of the fourth term of lessons (MUSC 9534)
2. Solo public recital (MUSC 9184) or Chamber Music Recital (MUSC 9884)
3. Lecture Recital (MUSC 9684) or Performance with Orchestra (MUSC 9784)
4. Final Doctoral Recital (MUSC 9984)

Additional Requirements:

All degree credits are to be earned at Temple University.

Written Entrance Examinations:

All doctoral students must take written entrance exams prior to or during the first term of doctoral study. Candidates who fail the entrance examinations the first time may, upon application to the Associate Dean for Graduate Studies of the Boyer College of Music and Dance, be permitted to take the examinations a second time. A third opportunity is not allowed.

To continue registration in the doctoral program beyond the second term of study, all portions of the examinations must be passed or the appropriate review courses (or the equivalent, as determined by the examining department) must be in progress. Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date.

1. Music History Exam: A general examination covering the history of music is administered. Questions relative to forms, styles, and periods of music are included. It is expected that all examinees are acquainted with the standard literature of music.
2. Harmony Exam: This exam involves completion of a harmonic excerpt in advanced chromatic idiom and the creation of a bass line with figuration (figured bass) in Baroque style.
3. Counterpoint Exam: From a given motive, approximately 20 measures of imitative counterpoint in three parts are to be completed.
4. Form and Analysis Exam: A score is provided at the examination that requires analysis of specified passages.

All degree credits are to be earned at Temple University.
5. Literature and Pedagogy Exam: This examination focuses on the literature and pedagogy of the instrument of specialization.

6. Writing Sample: A 90-minute examination of the student's ability to write at the doctoral level is conducted. Examination topics are of a general nature.

**Diagnostic Recital:**
A diagnostic recital is required and must be performed before a faculty jury at the conclusion of the first term of study. The candidate must contact her/his advisor to arrange the jury. The recital consists of a full program, approximately 45 minutes in length, and may include the performance (with music) of a new composition that is presented to the applicant for study 48 hours in advance of the jury. An analysis of repertoire and technical needs results.

**Continuous Registration:**
Continuous registration of at least 3 credits must be maintained each term, with the exception of Summer, from the time of acceptance into the D.M.A. program in Music Performance until the completion of all coursework.

**Continuation in the D.M.A. Program:**
Each course or seminar requires an end-of-term final grade based on papers prepared, recitals presented, discussion, and/or examinations taken during the course of the term. Each term of private study culminates in a performance examination or jury, except during terms in which the student has presented one of the required adjudicated recitals. Screening for continuance in the program after the first term of study is conducted at adjudicated recitals, end-of-term juries, and major examinations. This ensures that only the most qualified students continue beyond the early stages of the program.

For all doctoral programs, only grades from "A" to "B-" can be applied toward degree requirements. Grades of less than "B-" cannot be counted toward the degree. If the student earns a grade of less than "B-" s/he may, with permission of the department chair and the Associate Dean, retake the term of study one additional time. The same applies to recitals.

**Professional Development Policy:**
In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

**Performing Ensembles:**

1. **Touring:** All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.

2. **Non-Credit Participation:** With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair, and the Associate Dean.

**Independent Study Courses:**
Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval will be granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects will be granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

**Acceptable English:**
All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

**Graduate Private Lesson Policy:**
Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A $250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

The four terms of private lessons must be taken consecutively, with the exception of summers. Any deviation from this must have the approval of the advisor, department chair, and the Associate Dean of the Boyer College of Music and Dance. Graduate assistantships and other forms of University-sponsored financial aid do not cover private lesson and recital extension fees.

**Written Preliminary Examinations:**
The written preliminary examinations may be taken during the final term of coursework, but no later than the term after completion of coursework. They are administered several times each calendar year, and span two consecutive days of six hours of examination each day. Written and performance examinations should be taken no later than the end of the fifth year to allow for the successful completion of the Final Recital and the writing of the monograph. Preliminary examinations must be successfully completed before formal work on the monograph may be undertaken and before the Final Recital may be presented.

Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date. Students are then notified in writing of the specific dates and administration times of the preliminary examinations for which they have been scheduled.

The examinations consist of questions relating to the major and minor areas and to musical style; require the student to comment articulately on the style and historical significance of musical compositions; and entail the student discussing and defending the principles of performance on the basis of which s/he would undertake to perform any composition in her/his major area. The questions are prepared by faculty members within the student's major and minor subject areas. At least two
graduate faculty members read each section of the written preliminary examinations. Students typically are graded "Pass" or "Fail" based on a consensus of the examination readers.

**Oral Preliminary Examinations:**

For those students who pass the written preliminary examinations, no oral preliminary examination is required. (This refers only to the oral preliminary examination and does not refer in any way to the oral defense of the dissertation/monograph.)

If a student fails one or more portions of the written preliminary examination, an oral examination is administered by the major advisor and a minimum of two additional faculty members. In the case of failure in one subject area, two members of that department are asked by the student's major advisor to participate with the major advisor in the examination. In the case of failure in more than one subject area, at least one faculty member from each of the departments in which the failure occurred is asked by the student's major advisor to participate in the examination.

The examination is to be a formal oral examination rather than an informal meeting with graduate faculty from departments in which the examination revealed that the student needs further work. This does not preclude such informal meetings, however, in preparation for the oral examination. Upon passing the oral examination, the student, as advised by the examining committee, is permitted to schedule a second and final attempt at the failed portions of the written examination.

**Final Recital and Monograph Proposal:**

After the successful completion of the written preliminary examinations, MUSC 9984 DMA Final Recital and written monograph are undertaken in consultation with the major advisor, the department chair, and the Doctoral Advisory Committee (DAC). The DAC shall be appointed by the Associate Dean to adjudicate the Final Recital and to guide the student in writing both the monograph proposal and the final document itself. When the student, in consultation with the major advisor and department chair, has identified a tentative advisory committee, the chair gives those names to the Associate Dean for consideration. The Associate Dean appoints the DAC. The DAC consists of no fewer than three persons: two faculty members from within the department, and a third person from outside the department. Members of the DAC serve as the adjudicators of the Final Recital.

After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers within 30 days one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School. Students register for MUSC 9998 during their program as a whole and must register for a minimum of 1 such credit each term.

**Recital Extension:**

Students withdrawing from the recital requirement during the recital term will receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course will be offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course will be replaced by a letter grade and MUSC 5000 Recital Extension will be issued a grade of "CR." Credit derived from Recital Extension will not be counted toward degree requirements.

1. **Recital Extension Fees:** Tuition for these additional terms of private study will be the cost of 2 graduate credits plus a $400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.

2. **Exceptions to Recital Extension:**
   a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
   b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, if the student does not take Recital Extension during the Summer, s/he may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.

3. **Failure to Present Recital:** The degree status of students who are unable to present a recital after one term of Recital Extension will be reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, will determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

**Final Oral Examination:**

When the monograph is complete, the major advisor of the Doctoral Advisory Committee (DAC) asks the Associate Dean to appoint an outside reader. The DAC plus the outside reader constitute the Dissertation Examining Committee (DEC) for the monograph defense. Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary.

Doctoral candidates must submit a defense copy of the monograph to members of the DEC and the Associate Dean at least two weeks prior to the defense. Students should register for MUSC 9999 Monograph Research (1-6 credits) each term, Fall and Spring, until the final project has been successfully defended. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 during their program as a whole, but must register for a minimum of one such credit each term.

**Incompletes:**

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

**Culminating Events:**

**Final Recital:**

Students may present the DMA Final Recital (MUSC 9984) after the preliminary examination has been completed and the DAC has been appointed.

**Proposal:**

After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School within 30 days.

**Monograph:**
Early in the term in which a defense of the monograph is anticipated, the major advisor notifies the Associate Dean that it is time to appoint the Dissertation Examining Committee (DEC). The DEC consists of the DAC plus an "outside" reader, who is an additional graduate faculty member from Temple or another university, but not from the faculty of the student's home department.

Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary. This includes the "Announcement of Oral Defense" form, which must bear all appropriate signatures and be submitted to the Associate Dean.

Two weeks prior to the oral defense, the student submits individual copies of the abstract and the completed dissertation/monograph to the Associate Dean and each member of the DEC. The graduate secretary notifies the Graduate School and posts notices of the impending defense on bulletin boards located within the Boyer College of Music and Dance. All members of the DEC attend the oral defense and then vote to pass or fail the monograph and its defense after the conclusion of the public presentation.

Changes in membership of a DAC or a DEC must be approved by the Associate Dean. The change also must be communicated to the Graduate School.

Standardized Test Scores:
TOEFL: 100 iBT or 600 PBT minimum

Prescreening Video and Audition: Applicants submit a prescreening video via Acceptd (https://app.getacceptd.com/templeboyer). This recording may contain representative movements of the audition material, with the majority of the material having been recorded within the last 12 months. Video recordings of accompanied works must have piano or orchestral accompaniment.

If preliminary approval is granted, an in-person live audition is arranged. Audition repertoire requirements include:

- A concerto, sonata, or solo piece from the Classical, Romantic, or Impressionistic period.
- A concerto, sonata, or solo piece from the 20th Century.
- Excerpts from the standard orchestral repertoire.

All works, except sonatas, should be memorized. Applicants must arrange for an accompanist for the live audition.

Note that video recordings alone are not acceptable for admission, except in the case of students living outside the United States. In this case, applicants must submit a video recording of complete works.

Interview: Applicants are interviewed by the department chair and Associate Dean at the time of the live audition.

Resume: Current resume required.

Writing Examination: An on-site Writing Examination is required as part of the doctoral admissions process. Remedial coursework may be required.

Advanced Standing: The D.M.A. program in Music Performance consists of 55 discrete credits taken beyond the master’s degree. At the time of admission, the entire master’s degree serves as advanced standing credits. These credits are not counted toward the 55 required credits of the doctoral degree. However, students may transfer into the doctoral program up to 12 additional graduate credits in coursework taken beyond the master’s degree. Typically, this coursework is reviewed after admission to the D.M.A. degree and must be approved by the major advisor and the Associate Dean. The maximum number of advanced standing credits awarded is 30.

Additional Requirements: Applicants must:

1. Include with the application a repertoire list indicating works previously studied. The list should indicate which of the works were performed publicly and, if possible, where and when they were performed.
2. Show transcript evidence at the master’s level in the area of bibliographical resources in music. If no transcript evidence is available, students must take MUST 8701 Research in Music in addition to the 6 required credits within the History/Theory area.

Other: Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College’s Optimum Enrollment Policy. This Policy may preclude the admission of any student who meets the minimum requirements.

1 Select from courses at the level of MUSC 8404 or higher.

Recitals:

1. Solo public recital by the conclusion of the fourth term of lessons (MUSC 9534)
2. Solo public recital (MUSC 9184) or Chamber Music Recital (MUSC 9884)
3. Lecture Recital (MUSC 9684) or Performance with Orchestra (MUSC 9784)
4. Final Doctoral Recital (MUSC 9984)

Additional Requirements:

All degree credits are to be earned at Temple University.

Written Entrance Examinations:

All doctoral students must take written entrance exams prior to or during the first term of doctoral study. Candidates who fail the entrance examinations the first time may, upon application to the Associate Dean for Graduate Studies of the Boyer College of Music and Dance, be permitted to take the examinations a second time. A third opportunity is not allowed.

To continue registration in the doctoral program beyond the second term of study, all portions of the examinations must be passed or the appropriate review courses (or the equivalent, as determined by the examining department) must be in progress. Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date.

1. Music History Exam: A general examination covering the history of music is administered. Questions relative to forms, styles, and periods of music are included. It is expected that all examinees are acquainted with the standard literature of music.
2. Harmony Exam: This exam involves completion of a harmonic excerpt in advanced chromatic idiom and the creation of a bass line with figuration (figured bass) in Baroque style.
3. Counterpoint Exam: From a given motive, approximately 20 measures of imitative counterpoint in three parts are to be completed.
4. Form and Analysis Exam: A score is provided at the examination that requires analysis of specified passages.
5. Literature and Pedagogy Exam: This examination focuses on the literature and pedagogy of the instrument of specialization.
6. Writing Sample: A 90-minute examination of the student's ability to write at the doctoral level is conducted. Examination topics are of a general nature.

Diagnostic Recital:

A diagnostic recital is required and must be performed before a faculty jury at the conclusion of the first term of study. The candidate must contact her/his advisor to arrange the jury. The recital consists of a full program, approximately 45 minutes in length, and may include the performance (with music) of a new composition that is presented to the applicant for study 48 hours in advance of the jury. An analysis of repertoire and technical needs results.

Continuous Registration:

Continuous registration of at least 3 credits must be maintained each term, with the exception of Summer, from the time of acceptance into the D.M.A. program in Music Performance until the completion of all coursework.

Continuation in the D.M.A. Program:

Each course or seminar requires an end-of-term final grade based on papers prepared, recitals presented, discussion, and/or examinations taken during the course of the term. Each term of private study culminates in a performance examination or jury, except during terms in which the student has presented one of the required adjudicated recitals. Screening for continuance in the program after the first term of study is conducted at adjudicated recitals, end-of-the-term juries, and major examinations. This ensures that only the most qualified students continue beyond the early stages of the program.

For all doctoral programs, only grades from "A" to "B-" can be applied toward degree requirements. Grades of less than "B-" cannot be counted toward the degree. If the student earns a grade of less than "B-", s/he may, with permission of the department chair and the Associate Dean, retake the term of study one additional time. The same applies to recitals.

Professional Development Policy:

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

Performing Ensembles:

1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.
2. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair, and the Associate Dean.

Independent Study Courses:

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval will be granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects will be granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate
student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

Acceptable English:
All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

Graduate Private Lesson Policy:
Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A $250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

The four terms of private lessons must be taken consecutively, with the exception of summers. Any deviation from this must have the approval of the advisor, department chair, and the Associate Dean of the Boyer College of Music and Dance. Graduate assistantships and other forms of University-sponsored financial aid do not cover private lesson and recital extension fees.

Written Preliminary Examinations:
The written preliminary examinations may be taken during the final term of coursework, but no later than in the term after completion of coursework. They are administered several times each calendar year, and span two consecutive days of six hours of examination each day. Written and performance examinations should be taken no later than the end of the fifth year to allow for the successful completion of the Final Recital and the writing of the monograph. Preliminary examinations must be successfully completed before formal work on the monograph may be undertaken and before the Final Recital may be presented.

Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date. Students are then notified in writing of the specific dates and administration times of the preliminary examinations for which they have been scheduled.

The examinations consist of questions relating to the major and minor areas and to musical style; require the student to comment articulately on the style and historical significance of musical compositions; and entail the student discussing and defending the principles of performance on the basis of which s/he would undertake to perform any composition in her/his major area. The questions are prepared by faculty members within the student’s major and minor subject areas. At least two graduate faculty members read each section of the written preliminary examinations. Students typically are graded “Pass” or “Fail” based on a consensus of the examination readers.

Oral Preliminary Examinations:
For those students who pass the written preliminary examinations, no oral preliminary examination is required. (This refers only to the oral preliminary examination and does not refer in any way to the oral defense of the dissertation/monograph.)

If a student fails one or more portions of the written preliminary examination, an oral examination is administered by the major advisor and a minimum of two additional faculty members. In the case of failure in one subject area, two members of that department are asked by the student’s major advisor to participate with the major advisor in the examination. In the case of failure in more than one subject area, at least one faculty member from each of the departments in which the failure occurred is asked by the student’s major advisor to participate in the examination.

The examination is to be a formal oral examination rather than an informal meeting with graduate faculty from departments in which the examination revealed that the student needs further work. This does not preclude such informal meetings, however, in preparation for the oral examination. Upon passing the oral examination, the student, as advised by the examining committee, is permitted to schedule a second and final attempt at the failed portions of the written examination.

Final Recital and Monograph Proposal:
After the successful completion of the written preliminary examinations, MUSC 9984 DMA Final Recital and written monograph are undertaken in consultation with the major advisor, the department chair, and the Doctoral Advisory Committee (DAC). The DAC shall be appointed by the Associate Dean to adjudicate the Final Recital and to guide the student in writing both the monograph proposal and the final document itself. When the student, in consultation with the major advisor and department chair, has identified a tentative advisory committee, the chair gives those names to the Associate Dean for consideration. The Associate Dean appoints the DAC. The DAC consists of no fewer than three persons: two faculty members from within the department, and a third person from outside the department. Members of the DAC serve as the adjudicators of the Final Recital.

After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers within 30 days one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School. Students register for MUSC 9998 during the writing of the monograph proposal and MUSC 9999 after the proposal has been officially approved. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 Monograph Research during their program as a whole and must register for a minimum of 1 such credit each term.

Recital Extension:
Students withdrawing from the recital requirement during the recital term will receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course will be offered on a “Credit/No Credit” basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course will be replaced by a letter grade and MUSC 5000 Recital Extension will be issued a grade of “CR.” Credit derived from Recital Extension will not be counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study will be the cost of 2 graduate credits plus a $400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.

2. Exceptions to Recital Extension:
   a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
   b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term.
term. However, if the student does not take Recital Extension during the Summer, s/he may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.

3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension will be reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, will determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

**Final Oral Examination:**
When the monograph is complete, the major advisor of the Doctoral Advisory Committee (DAC) asks the Associate Dean to appoint an outside reader. The DAC plus the outside reader constitute the Dissertation Examining Committee (DEC) for the monograph defense. Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary.

Doctoral candidates must submit a defense copy of the monograph to the DAC plus an “outside” reader, who is an additional graduate faculty member from Temple or another university, but not from the faculty of the student’s home department.

Incompletes:
All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

**Culminating Events:**

**Final Recital:**
Students may present the DMA Final Recital (MUSC 9984) after the preliminary examination has been completed and the DAC has been appointed.

**Proposal:**
After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School within 30 days.

**Monograph:**
Early in the term in which a defense of the monograph is anticipated, the major advisor notifies the Associate Dean that it is time to appoint the Dissertation Examining Committee (DEC). The DEC consists of the DAC plus an “outside” reader, who is an additional graduate faculty member from Temple or another university, but not from the faculty of the student’s home department.

Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary. This includes the “Announcement of Oral Defense” form, which must bear all appropriate signatures and be submitted to the Associate Dean.

Two weeks prior to the oral defense, the student submits individual copies of the abstract and the completed dissertation/monograph to the Associate Dean and each member of the DEC. The graduate secretary notifies the Graduate School and posts notices of the impending defense on bulletin boards located within the Boyer College of Music and Dance. All members of the DEC attend the oral defense and then vote to pass or fail the monograph and its defense after the conclusion of the public presentation.

Changes in membership of a DAC or a DEC must be approved by the Associate Dean. The change also must be communicated to the Graduate School.

**Music Performance/Viola, D.M.A.**

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE (http://www.temple.edu/boyer)

**About the Program**
The objective of the D.M.A. program in Viola Performance is to foster growth and development of the highest and most sophisticated expression of musical interpretation through performance under the guidance of a very highly specialized faculty.

**Time Limit for Degree Completion:** 7 years
Campus Location: Main

Full-Time/Part-Time Status: The degree program can be completed on a full- or part-time basis.

Accreditation: The degree program is accredited by the National Association of Schools of Music (NASM).

Areas of Specialization: Diverse areas of study are included to ensure the broadest possible cultivation and expansion of students’ talents.

Job Prospects: Graduates of the program typically find employment in professional music ensembles throughout the world, in colleges and universities, and in private teaching studios, among other employment venues.

Non-Matriculated Student Policy: Non-matriculated students may enroll in selected courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

Financing Opportunities: Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance, and/or direct service related to academic programs. Applicants must submit an assistantship/internship application by March 1 to obtain priority consideration for an award. Applications are available online at the Graduate Financial Aid (http://www.temple.edu/boyer/admissions/documents/gradassistantshipform.pdf) page of Boyer’s website. Typically these awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master’s students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

Admission Requirements and Deadlines

Application Deadline:

Fall: November 15

APPLY ONLINE to this graduate program.

Letters of Reference:

Number Required: 2

From Whom: Letters of recommendation should be obtained from evaluators who can provide insight into the applicant’s abilities, talents, and aptitude for graduate study.

Coursework Required for Admission Consideration: All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours. Doctoral candidates must hold the Master of Music degree (or the equivalent) in the field of specialization from an accredited institution. Applicants accepted with deficiencies will find the deficiencies noted in the letter of admission. Deficiencies must be addressed prior to completion of the degree.

Bachelor’s Degree in Discipline/Related Discipline: A degree in Music is expected.

Statement of Goals: Include your special interests within the discipline and expectations for the program.

Standardized Test Scores:

TOEFL: 100 iBT or 600 PBT minimum

Prescreening Video and Audition: Applicants submit a prescreening video via Acceptd (https://app.getacceptd.com/templeboyer). This recording may contain representative movements of the audition material, with the majority of the material having been recorded within the last 12 months. Video recordings of accompanied works must have piano or orchestral accompaniment.

If preliminary approval is granted, an in-person live audition is arranged. Audition repertoire requirements include:

- Two contrasting movements from a Bach unaccompanied suite.
- A major concerto such as Bartok, Hindemith, Hoffmeister, Stamitz, or Walton.
- A sonata or similar work of contrasting period/style from the concerto, i.e., Classical or 20th Century if the concerto is Romantic, or Romantic or Classical if the concerto is 20th Century.
- A virtuoso composition such as Allegro di molto from Haydn’s Divertimento in D Major, Hummel, Paganini, or Rolla.

Note that video recordings alone are not acceptable for admission, except in the case of students living outside the United States. In this case, applicants must submit a video recording of complete works.

Interview: Applicants are interviewed by the department chair and Associate Dean at the time of the live audition.

Resume: Current resume required.

Writing Examination: An on-site Writing Examination is required as part of the doctoral admissions process. Remedial coursework may be required.

Advanced Standing: The D.M.A. program in Music Performance consists of 55 discrete credits taken beyond the master’s degree. At the time of admission, the entire master’s degree serves as advanced standing credits. These credits are not counted toward the 55 required credits of the doctoral degree. However, students may transfer into the doctoral program up to 12 additional graduate credits in coursework taken beyond the master’s degree. Typically, this coursework is reviewed after admission to the D.M.A. degree and must be approved by the major advisor and the Associate Dean. The maximum number of advanced standing credits awarded is 32.

Additional Requirements: Applicants must:

1. Include with the application a repertoire list indicating works previously studied. The list should indicate which of the works were performed publicly and, if possible, where and when they were performed.
2. Show transcript evidence at the master’s level in the area of bibliographical resources in music. If no transcript evidence is
available, students must take MUST 8701 Research in Music in addition to the 6 required credits within the History/Theory area.

Other: Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College’s Optimum Enrollment Policy. This Policy may preclude the admission of any student who meets the minimum requirements.

Approval will be granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects will be granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

Acceptable English:
All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College’s statement on plagiarism and academic honesty.

Graduate Private Lesson Policy:
Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A $250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

The four terms of private lessons must be taken consecutively, with the exception of summers. Any deviation from this must have the approval of the advisor, department chair, and the Associate Dean of the Boyer College of Music and Dance. Graduate assistantships and other forms of University-sponsored financial aid do not cover private lesson and recital extension fees.

Written Preliminary Examinations:
The written preliminary examinations may be taken during the final term of coursework, but no later than in the term after completion of coursework. They are administered several times each calendar year, and span two consecutive days of six hours of examination each day. Written and performance examinations should be taken no later than the end of the fifth year to allow for the successful completion of the Final Recital and the writing of the monograph. Preliminary examinations must be successfully completed before formal work on the monograph may be undertaken and before the Final Recital may be presented.

Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date. Students are then notified in writing of the specific dates and administration times of the preliminary examinations for which they have been scheduled.

The examinations consist of questions relating to the major and minor areas and to musical style; require the student to comment articularly on the style and historical significance of musical compositions; and entail the student discussing and defending the principles of performance on the basis of which s/he would undertake to perform any composition in her/his major area. The questions are prepared by faculty members within the student’s major and minor subject areas. At least two graduate faculty members read each section of the written preliminary examinations. Students typically are graded “Pass” or “Fail” based on a consensus of the examination readers.

Oral Preliminary Examinations:
For those students who pass the written preliminary examinations, no oral preliminary examination is required. (This refers only to the oral preliminary examination and does not refer in any way to the oral defense of the dissertation/monograph.)

If a student fails one or more portions of the written preliminary examination, an oral examination is administered by the major advisor and a minimum of two additional faculty members. In the case of failure in one subject area, two members of that department are asked by the student's major advisor to participate in the major advisor in the examination. In the case of failure in more than one subject area, at least one faculty member from each of the departments in which the failure occurred is asked by the student's major advisor to participate in the examination.

The examination is to be a formal oral examination rather than an informal meeting with graduate faculty from departments in which the examination revealed that the student needs further work. This does not preclude such informal meetings, however, in preparation for the oral examination. Upon passing the oral examination, the student, as advised
by the examining committee, is permitted to schedule a second and final attempt at the failed portions of the written examination.

Final Recital and Monograph Proposal:
After the successful completion of the written preliminary examinations, MUSC 9984 DMA Final Recital and written monograph are undertaken in consultation with the major advisor, the department chair, and the Doctoral Advisory Committee (DAC). The DAC shall be appointed by the Associate Dean to adjudicate the Final Recital and to guide the student in writing both the monograph proposal and the final document itself. When the student, in consultation with the major advisor and department chair, has identified a tentative advisory committee, the chair gives those names to the Associate Dean for consideration. The Associate Dean appoints the DAC. The DAC consists of no fewer than three persons: two faculty members from within the department, and a third person from outside the department. Members of the DAC serve as the adjudicators of the Final Recital.

After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers it within 30 days to each member of the DAC, the department chair, the Associate Dean, and the Graduate School. Students register for MUSC 9998 during the writing of the monograph proposal and MUSC 9999 after the proposal has been officially approved. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 Monograph Research during their program as a whole and must register for a minimum of 1 such credit each term.

Recital Extension:
Students withdrawing from the recital requirement during the recital term will receive an Incomplete for the recital courses (MUSC 5000 Recital Extension 2 credits). Recital Extension must be taken each term until the recital has been presented. This course will be offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course will be replaced by a letter grade and MUSC 5000 Recital Extension will be issued a grade of "CR." Credit derived from Recital Extension will not be counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study will be the cost of 2 graduate credits plus a $400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.

2. Exceptions to Recital Extension:
   a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
   b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, if the student does not take Recital Extension during the Summer, s/he may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.

3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension will be reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, will determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

Final Oral Examination:
When the monograph is complete, the major advisor of the Doctoral Advisory Committee (DAC) asks the Associate Dean to appoint an outside reader. The DAC plus the outside reader constitute the Dissertation Examining Committee (DEC) for the monograph defense. Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary. Doctoral candidates must submit a defense copy of the monograph to members of the DEC and the Associate Dean at least two weeks prior to the defense. Students should register for MUSC 9999 Monograph Research (1-6 credits) each term, Fall and Spring, until the final project has been successfully defended. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 during their program as a whole, but must register for a minimum of one such credit each term.

Incompletes:
All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

Culminating Events:
Final Recital:
Students may present the DMA Final Recital (MUSC 9984) after the preliminary examination has been completed and the DAC has been appointed.

Proposal:
After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School within 30 days.

Monograph:
Early in the term in which a defense of the monograph is anticipated, the major advisor notifies the Associate Dean that it is time to appoint the Dissertation Examining Committee (DEC). The DEC consists of the DAC plus an "outside" reader, who is an additional graduate faculty member from Temple or another university, but not from the faculty of the student's home department.

Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary. This includes the "Announcement of Oral Defense" form, which must bear all appropriate signatures and be submitted to the Associate Dean.

Two weeks prior to the oral defense, the student submits individual copies of the abstract and the completed dissertation/monograph to the Associate Dean and each member of the DEC. The graduate secretary notifies the Graduate School and posts notices of the impending defense on bulletin boards located within the Boyer College of Music and Dance. All members of the DEC attend the oral defense and then vote to pass or fail the monograph and its defense after the conclusion of the public presentation.
Changes in membership of a DAC or a DEC must be approved by the Associate Dean. The change also must be communicated to the Graduate School.

**Music Performance/Violin, D.M.A.**

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE (http://www.temple.edu/boyer)

**About the Program**

The objective of the D.M.A. program in Violin Performance is to foster growth and development of the highest and most sophisticated expression of musical interpretation through performance under the guidance of a very highly specialized faculty.

**Time Limit for Degree Completion:** 7 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Accreditation:** The degree program is accredited by the National Association of Schools of Music (NASM).

**Areas of Specialization:** Diverse areas of study are included to ensure the broadest possible cultivation and expansion of students' talents.

**Job Prospects:** Graduates of the program typically find employment in professional music ensembles throughout the world, in colleges and universities, and in private teaching studios, among other employment venues.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in selected courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

**Financing Opportunities:** Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance, and/or direct service related to academic programs. Applicants must submit an assistantship/internship application by March 1 to obtain priority consideration for an award. Applications are available online at the Graduate Financial Aid (http://www.temple.edu/boyer/admissions/documents/gradassistantshipform.pdf) page of Boyer's website. Typically these awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

**Admission Requirements and Deadlines**

**Application Deadline:**
Fall: November 15

APPLY ONLINE to this graduate program.

**Letters of Reference:**
*Number Required: 2*

**From Whom:** Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents, and aptitude for graduate study.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours. Doctoral candidates must hold the Master of Music degree (or the equivalent) in the field of specialization from an accredited institution. Applicants accepted with deficiencies will find the deficiencies noted in the letter of admission. Deficiencies must be addressed prior to completion of the degree.

**Master's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Bachelor's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Statement of Goals:** Include your special interests within the discipline and expectations for the program.

**Standardized Test Scores:**
*TOEFL: 100 iBT or 600 PBT minimum*

**Prescreening Video and Audition:** Applicants submit a prescreening video via Acceptd (https://app.getacceptd.com/templeboyer).
recording may contain representative movements of the audition material, with the majority of the material having been recorded within the last 12 months. Video recordings of accompanied works must have piano or orchestral accompaniment.

If preliminary approval is granted, an in-person live audition is arranged. Audition repertoire requirements include:

- Two contrasting movements from a Bach unaccompanied sonata or partita. (A chaconne is acceptable on its own.)
- One of the following: Mozart's Violin Concerto No. 3 in G major, K. 216; Violin Concerto No. 4 in D major, K. 218; or Violin Concerto No. 5 in A major, K. 219.
- One major concerto such as Bartok, Beethoven, Brahms, Bruch, Mendelssohn, Mozart, Prokofiev, Shostakovich, Sibelius, or Tchaikovsky.
- One sonata of contrasting period/style from the concerto, i.e., Classical period if the concerto is Romantic or Romantic if the concerto is Classical.
- One virtuoso composition such as Paganini, Sarasate, Wieniawski, and the like.

Note that video recordings alone are not acceptable for admission, except in the case of students living outside the United States. In this case, applicants must submit a video recording of complete works.

Interview: Applicants are interviewed by the department chair and Associate Dean at the time of the live audition.

Resume: Current resume required.

Writing Examination: An on-site Writing Examination is required as part of the doctoral admissions process. Remedial coursework may be required.

Advanced Standing: The D.M.A. program in Music Performance consists of 55 discrete credits taken beyond the master's degree. At the time of admission, the entire master's degree serves as advanced standing credits. These credits are not counted toward the 55 required credits of the doctoral degree. However, students may transfer into the doctoral program up to 12 additional graduate credits in coursework taken beyond the master's degree. Typically, this coursework is reviewed after admission to the D.M.A. degree and must be approved by the major advisor and the Associate Dean. The maximum number of advanced standing credits awarded is 32.

Additional Requirements: Applicants must:

1. Include with the application a repertoire list indicating works previously studied. The list should indicate which of the works were performed publicly and, if possible, where and when they were performed.
2. Show transcript evidence at the master's level in the area of bibliographical resources in music. If no transcript evidence is available, students must take MUST 8701 Research in Music in addition to the 6 required credits within the History/Theory area.

Other: Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This Policy may preclude the admission of any student who meets the minimum requirements.

1. Select from courses at the level of MUSC 8404 or higher.

Recitals:

1. Solo public recital by the conclusion of the fourth term of lessons (MUSC 9184)
2. Chamber Music Recital (MUSC 9384) or Lecture Recital (MUSC 9684)
3. Performance with Orchestra (MUSC 9784)
4. Final Doctoral Recital (MUSC 9984)
Additional Requirements:

All degree credits are to be earned at Temple University.

Written Entrance Examinations:
All doctoral students must take written entrance exams prior to or during the first term of doctoral study. Candidates who fail the entrance examinations the first time may, upon application to the Associate Dean for Graduate Studies of the Boyer College of Music and Dance, be permitted to take the examinations a second time. A third opportunity is not allowed.

To continue registration in the doctoral program beyond the second term of study, all portions of the examinations must be passed or the appropriate review courses (or the equivalent, as determined by the examining department) must be in progress. Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date.

1. Music History Exam: A general examination covering the history of music is administered. Questions relative to forms, styles, and periods of music are included. It is expected that all examinees are acquainted with the standard literature of music.
2. Harmony Exam: This exam involves completion of a harmonic excerpt in advanced chromatic idiom and the creation of a bass line with figuration (figured bass) in Baroque style.
3. Counterpoint Exam: From a given motive, approximately 20 measures of imitative counterpoint in three parts are to be completed.
4. Form and Analysis Exam: A score is provided at the examination that requires analysis of specified passages.
5. Literature and Pedagogy Exam: This examination focuses on the literature and pedagogy of the instrument of specialization.
6. Writing Sample: A 90-minute examination of the student's ability to write at the doctoral level is conducted. Examination topics are of a general nature.

Diagnostic Recital:
A diagnostic recital is required and must be performed before a faculty jury at the conclusion of the first term of study. The candidate must contact her/his advisor to arrange the jury. The recital consists of a full program, approximately 45 minutes in length, and may include the performance (with music) of a new composition that is presented to the applicant for study 48 hours in advance of the recital. An analysis of repertoire and technical needs results.

Continuous Registration:
Continuous registration of at least 3 credits must be maintained each term, with the exception of Summer, from the time of acceptance into the D.M.A. program in Music Performance until the completion of all coursework.

Continuation in the D.M.A. Program:
Each course or seminar requires an end-of-term final grade based on papers prepared, recitals presented, discussion, and/or examinations taken during the course of the term. Each term of private study culminates in a performance examination or jury, except during terms in which the student has presented one of the required adjudicated recitals. Screening for continuance in the program after the first term of study is conducted at adjudicated recitals, end-of-the-term juries, and major examinations. This ensures that only the most qualified students continue beyond the early stages of the program.

For all doctoral programs, only grades from "A" to "B-" can be applied toward degree requirements. Grades of less than "B-" cannot be counted toward the degree. If the student earns a grade of less than "B-," s/he may, with permission of the department chair and the Associate Dean, retake the term of study one additional time. The same applies to recitals.

Professional Development Policy:
In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

Performing Ensembles:

1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.
2. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair, and the Associate Dean.

Independent Study Courses:
Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval will be granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects will be granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

Acceptable English:
All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

Graduate Private Lesson Policy:
Weekly one-hour private lessons are provided for all matriculated master’s and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A $250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.
The four terms of private lessons must be taken consecutively, with the exception of summers. Any deviation from this must have the approval of the advisor, department chair, and the Associate Dean of the Boyer College of Music and Dance. Graduate assistantships and other forms of University-sponsored financial aid do not cover private lesson and recital extension fees.

Written Preliminary Examinations:
The written preliminary examinations may be taken during the final term of coursework, but no later than in the term after completion of coursework. They are administered several times each calendar year, and span two consecutive days of six hours of examination each day. Written and performance examinations should be taken no later than the end of the fifth year to allow for the successful completion of the Final Recital and the writing of the monograph. Preliminary examinations must be successfully completed before formal work on the monograph may be undertaken and before the Final Recital may be presented.

Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date. Students are then notified in writing of the specific dates and administration times of the preliminary examinations for which they have been scheduled.

The examinations consist of questions relating to the major and minor areas and to musical style; require the student to comment articulately on the style and historical significance of musical compositions; and entailed the student discussing and defending the principles of performance on the basis of which s/he would undertake to perform any composition in her/his major area. The questions are prepared by faculty members within the student's major and minor subject areas. At least two graduate faculty members read each section of the written preliminary examinations. Students typically are graded "Pass" or "Fail" based on a consensus of the examination readers.

Oral Preliminary Examinations:
For those students who pass the written preliminary examinations, no oral preliminary examination is required. (This refers only to the oral preliminary examination and does not refer in any way to the oral defense of the dissertation/monograph.)

If a student fails one or more portions of the written preliminary examination, an oral examination is administered by the major advisor and a minimum of two additional faculty members. In the case of failure in one subject area, two members of that department are asked by the student's major advisor to participate with the major advisor in the examination. In the case of failure in more than one subject area, at least one faculty member from each of the departments in which the failure occurred is asked by the student's major advisor to participate in the examination.

The examination is to be a formal oral examination rather than an informal meeting with graduate faculty from departments in which the examination revealed that the student needs further work. This does not preclude such informal meetings, however, in preparation for the oral examination. Upon passing the oral examination, the student, as advised by the examining committee, is permitted to schedule a second and final attempt at the failed portions of the written examination.

Final Recital and Monograph Proposal:
After the successful completion of the written preliminary examinations, MUSC 9994 DMA Final Recital and written monograph are undertaken in consultation with the major advisor, the department chair, and the Doctoral Advisory Committee (DAC). The DAC shall be appointed by the Associate Dean to adjudicate the Final Recital and to guide the student in writing both the monograph proposal and the final document itself. When the student, in consultation with the major advisor and department chair, has identified a tentative advisory committee, the chair gives those names to the Associate Dean for consideration. The Associate Dean appoints the DAC. The DAC consists of no fewer than three persons: two faculty members from within the department, and a third person from outside the department. Members of the DAC serve as the adjudicators of the Final Recital.

After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers within 30 days one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School. Students register for MUSC 9998 during the writing of the monograph proposal and MUSC 9999 after the proposal has been officially approved. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 Monograph Research during their program as a whole and must register for a minimum of 1 such credit each term.

Recital Extension:
Students withdrawing from the recital requirement during the recital term will receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course will be offered on a "Credit/No Credit" basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course will be replaced by a letter grade and MUSC 5000 Recital Extension will be issued a grade of "CR." Credit derived from Recital Extension will not be counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study will be the cost of 2 graduate credits plus a $400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.

2. Exceptions to Recital Extension:
   a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
   b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, if the student does not take Recital Extension during the Summer, s/he may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.

3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension will be reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, will determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

Final Oral Examination:
When the monograph is complete, the major advisor of the Doctoral Advisory Committee (DAC) asks the Associate Dean to appoint an outside reader. The DAC plus the outside reader constitute the Dissertation Examining Committee (DEC) for the monograph defense. Doctoral candidates must schedule a defense of the monograph with the
Doctoral candidates must submit a defense copy of the monograph to members of the DEC and the Associate Dean at least two weeks prior to the defense. Students should register for MUSC 9999 Monograph Research (1-6 credits) each term. Fall and Spring, until the final project has been successfully defended. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 during their program as a whole, but must register for a minimum of one such credit each term.

Incompletes:
All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

Final Recital:
Students may present the DMA Final Recital (MUSC 9984) after the preliminary examination has been completed and the DAC has been appointed.

Proposal:
After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School within 30 days.

Monograph:
Early in the term in which a defense of the monograph is anticipated, the major advisor notifies the Associate Dean that it is time to appoint the Dissertation Examining Committee (DEC). The DEC consists of the DAC plus an "outside" reader, who is an additional graduate faculty member from Temple or another university, but not from the faculty of the student's home department.

Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary.

Changes in membership of a DAC or a DEC must be approved by the Associate Dean. The change also must be communicated to the Graduate School.

Contacts
Department Web Address:
http://www.temple.edu/boyer/academicprograms/instrumental-studies/
Non-Matriculated Student Policy: Non-matriculated students may enroll in selected courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

Financing Opportunities: Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance, and/or direct service related to academic programs. Applicants must submit an assistantship/ internship application by March 1 to obtain priority consideration for an award. Applications are available online at the Graduate Financial Aid (http://www.temple.edu/boyer/admissions/documents/ gradassistantshipform.pdf) page of Boyer’s website. Typically these awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master’s students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

Admission Requirements and Deadlines

Application Deadline:

Fall: November 15

APPLY ONLINE to this graduate program.

Letters of Reference:

Number Required: 2

From Whom: Letters of recommendation should be obtained from evaluators who can provide insight into an applicant’s abilities, talents, and aptitude for graduate study.

Coursework Required for Admission Consideration: All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours. Doctoral candidates must hold the Master of Music degree (or the equivalent) in the field of specialization from an accredited institution. Applicants accepted with deficiencies will find the deficiencies noted in the letter of admission. Deficiencies must be addressed prior to completion of the degree.

Master’s Degree in Discipline/Related Discipline: A degree in Music is expected.

Bachelor’s Degree in Discipline/Related Discipline: A degree in Music is expected.

Statement of Goals: Include your special interests within the discipline and expectations for the program.

Standardized Test Scores:

TOEFL: 100 iBT or 600 PBT minimum

Prescreening Video and Audition: Applicants submit a prescreening video via Acceptd (https://app.getacceptd.com/templeboyer). This recording may contain representative movements of the audition material, with the majority of the material having been recorded within the last 12 months. Video recordings of accompanied works must have piano or orchestral accompaniment.

If preliminary approval is granted, an in-person live audition is arranged. Audition repertoire requirements include:

- One recitative and aria from an opera.
- One recitative and aria from an oratorio.
- Four songs or arias selected one each from among the Baroque, Classical, Romantic, Impressionistic, or Contemporary periods. Each selection also must be in a different language (English, German, French, or Italian).

All selections should be memorized.

Note that video recordings alone are not acceptable for admission, except in the case of students living outside the United States. In this case, applicants must submit a video recording of complete works.

Interview: Applicants are interviewed by the department chair and Associate Dean at the time of the live audition.

Resume: Current resume required.

Writing Examination: An on-site Writing Examination is required as part of the doctoral admissions process. Remedial coursework may be required.

Advanced Standing: The D.M.A. program in Music Performance consists of 55 discrete credits taken beyond the master’s degree. At the time of admission, the entire master’s degree serves as advanced standing credits. These credits are not counted toward the 55 required credits of the doctoral degree. However, students may transfer into the doctoral program up to 12 additional graduate credits in coursework taken beyond the master’s degree. Typically, this coursework is reviewed after admission to the D.M.A. degree and must be approved by the major advisor and the Associate Dean. The maximum number of advanced standing credits awarded is 30.

Additional Requirements: Applicants must:

1. Include with the application a repertoire list indicating works previously studied. The list should indicate which of the works were performed publicly and, if possible, where and when they were performed.
2. Show transcript evidence at the master’s level in the area of bibliographical resources in music. If no transcript evidence is available, students must take MUST 8701 Research in Music in addition to the 6 required credits within the History/Theory area.

Other: Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College’s Optimum Enrollment
Policy. This Policy may preclude the admission of any student who meets the minimum requirements.

Elective in Music History | 3
Minor Area in Music 1 | 12

Total Credit Hours 55

1 Select from courses at the level of MUSC 8404 or higher.

Recitals:

1. Solo public recital, no later than completion of MUSC 9234
2. Lecture Recital (MUSC 9684)
3. Performance with Orchestra (MUSC 9784) or Major Opera Role (MUSC 9884)
4. Final Doctoral Recital (MUSC 9984)

Language Examination: Candidates in the Voice Performance program are expected to successfully complete a translation examination, specified by the Department of Vocal Arts, in one foreign language: either French, German, Italian, or other national language with department permission. The examination must be completed before the preliminary examinations may be taken.

Additional Requirements:

All degree credits are to be earned at Temple University.

Written Entrance Examinations:
All doctoral students must take written entrance exams prior to or during the first term of doctoral study. Candidates who fail the entrance examinations the first time may, upon application to the Associate Dean for Graduate Studies of the Boyer College of Music and Dance, be permitted to take the examinations a second time. A third opportunity is not allowed.

To continue registration in the doctoral program beyond the second term of study, all portions of the examinations must be passed or the appropriate review courses (or the equivalent, as determined by the examining department) must be in progress. Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date.

1. Music History Exam: A general examination covering the history of music is administered. Questions relative to forms, styles, and periods of music are included. It is expected that all examinees are acquainted with the standard literature of music.
2. Harmony Exam: This exam involves completion of a harmonic excerpt in advanced chromatic idiom and the creation of a bass line with figuration (figured bass) in Baroque style.
3. Counterpoint Exam: From a given motive, approximately 20 measures of imitative counterpoint in three parts are to be completed.
4. Form and Analysis Exam: A score is provided at the examination that requires analysis of specified passages.
5. Literature and Pedagogy Exam: This examination focuses on the literature and pedagogy of the instrument of specialization.
6. Writing Sample: A 90-minute examination of the student's ability to write at the doctoral level is conducted. Examination topics are of a general nature.

Diagnostic Recital:
A diagnostic recital is required and must be performed before a faculty jury at the conclusion of the first term of study. The candidate must contact her/his advisor to arrange the jury. The recital consists of a full program, approximately 25-30 minutes in length, and may include the performance (with music) of a new composition that is presented to the applicant for study 48 hours in advance of the jury. An analysis of repertoire and technical needs results.

Continuous Registration:
Continuous registration of at least 3 credits must be maintained each term, with the exception of Summer, from the time of acceptance into the D.M.A. program in Music Performance until the completion of all coursework.

Continuation in the D.M.A. Program:
Each course or seminar requires an end-of-term final grade based on papers prepared, recitals presented, discussion, and/or examinations taken during the course of the term. Each term of private study culminates in a performance examination or jury, except during terms in which the student has presented one of the required adjudicated recitals. Screening for continuance in the program after the first term of study is conducted at adjudicated recitals, end-of-the-term juries, and major
examinations. This ensures that only the most qualified students continue beyond the early stages of the program.

For all doctoral programs, only grades from “A” to “B-" can be applied toward degree requirements. Grades of less than “B-” cannot be counted toward the degree. If the student earns a grade of less than “B-,” s/he may, with permission of the department chair and the Associate Dean, retake the term of study one additional time. The same applies to recitals.

Professional Development Policy:
In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

Performing Ensembles:
1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.

2. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair, and the Associate Dean.

Independent Study Courses:
Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students’ major advisor, and the Associate Dean. Approval will be granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects will be granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student’s curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

Acceptable English:
All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College’s statement on plagiarism and academic honesty.

Graduate Private Lesson Policy:
Weekly one-hour private lessons are provided for all matriculated master’s and doctoral performance majors in good standing, provided at least three additional credits of programatically required graduate-level study are taken simultaneously. A $250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

The four terms of private lessons must be taken consecutively, with the exception of summers. Any deviation from this must have the approval of the advisor, department chair, and the Associate Dean of the Boyer College of Music and Dance. Graduate assistantships and other forms of University-sponsored financial aid do not cover private lesson and recital extension fees.

Written Preliminary Examinations:
The written preliminary examinations may be taken during the final term of coursework, but no later than in the term after completion of coursework. They are administered several times each calendar year, and span two consecutive days of six hours of examination each day. Written and performance examinations should be taken no later than the end of the fifth year to allow for the successful completion of the Final Recital and the writing of the monograph. Preliminary examinations must be successfully completed before formal work on the monograph may be undertaken and before the Final Recital may be presented.

Students planning to take the written examinations should request a list of dates from the graduate secretary and submit a written request to the Associate Dean one month prior to the administration date. Students are then notified in writing of the specific dates and administration times of the preliminary examinations for which they have been scheduled.

The examinations consist of questions relating to the major and minor areas and to musical style; require the student to comment articulately on the style and historical significance of musical compositions; and entail the student discussing and defending the principles of performance on the basis of which s/he would undertake to perform any composition in her/his major area. The questions are prepared by faculty members within the student’s major and minor subject areas. At least two graduate faculty members read each section of the written preliminary examinations. Students typically are graded “Pass” or “Fail” based on a consensus of the examination readers.

Oral Preliminary Examinations:
For those students who pass the written preliminary examinations, no oral preliminary examination is required. (This refers only to the oral preliminary examination and does not refer in any way to the oral defense of the dissertation/monograph.)

If a student fails one or more portions of the written preliminary examination, an oral examination is administered by the major advisor and a minimum of two additional faculty members. In the case of failure in one subject area, two members of that department are asked by the student’s major advisor to participate with the major advisor in the examination. In the case of failure in more than one subject area, at least one faculty member from each of the departments in which the failure occurred is asked by the student’s major advisor to participate in the examination.

The examination is to be a formal oral examination rather than an informal meeting with graduate faculty from departments in which the examination revealed that the student needs further work. This does not preclude such informal meetings, however, in preparation for the oral examination. Upon passing the oral examination, the student, as advised by the examining committee, is permitted to schedule a second and final attempt at the failed portions of the written examination.

Final Recital and Monograph Proposal:
After the successful completion of the written preliminary examinations, MUSC 9984 DMA Final Recital and written monograph are undertaken in consultation with the major advisor, the department chair, and the Doctoral Advisory Committee (DAC). The DAC shall be appointed by the Associate Dean to adjudicate the Final Recital and to guide the student in writing both the monograph proposal and the final document itself. When the student, in consultation with the major advisor and department chair, has identified a tentative advisory committee, the chair gives those names to the Associate Dean for consideration. The Associate Dean appoints the DAC. The DAC consists of no fewer than three persons: two faculty members from within the department, and a third person from outside the department. Members of the DAC serve as the adjudicators of the Final Recital.

After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers within 30 days one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School. Students register for MUSC 9998 during the writing of the monograph proposal and MUSC 9999 after the proposal has been officially approved. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 Monograph Research during their program as a whole and must register for a minimum of 1 such credit each term.

**Recital Extension:**

Students withdrawing from the recital requirement during the recital term will receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course will be offered on a “Credit/No Credit” basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course will be replaced by a letter grade and MUSC 5000 Recital Extension will be issued a grade of “CR.” Credit derived from Recital Extension will not be counted toward degree requirements.

1. **Recital Extension Fees:** Tuition for these additional terms of private study will be the cost of 2 graduate credits plus a $400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.

2. **Exceptions to Recital Extension:**
   a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
   b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, if the student does not take Recital Extension during the Summer, s/he may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.

3. **Failure to Present Recital:** The degree status of students who are unable to present a recital after one term of Recital Extension will be reviewed by the Associate Dean and the major advisor. Who, in consultation with the major teacher and department, will determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

When the monograph is complete, the major advisor of the Doctoral Advisory Committee (DAC) asks the Associate Dean to appoint an outside reader. The DAC plus the outside reader constitute the Dissertation Examining Committee (DEC) for the monograph defense. Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary.

Doctoral candidates must submit a defense copy of the monograph to members of the DEC and the Associate Dean at least two weeks prior to the defense. Students who register for MUSC 9999 Monograph Research (1-6 credits) each term, Fall and Spring, until the final project has been successfully defended. Doctoral candidates are required to register for a minimum of 6 credit hours of MUSC 9999 during their program as a whole, but may register for a minimum of one such credit term.

**Incompletes:**

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

**Culminating Events:**

**Final Recital:**

Students may present the DMA Final Recital (MUSC 9984) after the preliminary examination has been completed and the DAC has been appointed.

**Proposal:**

After a proposal for the monograph has been developed by the student in consultation with the DAC, the student prepares a final copy for approval. Each member of the DAC must sign the final proposal. Once all DAC members have signed the title page, the student copies the final proposal and delivers within 30 days one copy to each member of the DAC, the department chair, the Associate Dean, and the Graduate School.

**Monograph:**

Early in the term in which a defense of the monograph is anticipated, the major advisor notifies the Associate Dean that it is time to appoint the Dissertation Examining Committee (DEC). The DEC consists of the DAC plus an "outside" reader, who is an additional graduate faculty member from Temple or another university, but not from the faculty of the student's home department.

Doctoral candidates must schedule a defense of the monograph with the Associate Dean at least one month before the requested defense date. Forms to schedule the defense are available from the graduate secretary. This includes the "Announcement of Oral Defense" form, which must bear all appropriate signatures and be submitted to the Associate Dean.

Two weeks prior to the oral defense, the student submits individual copies of the abstract and the completed dissertation/monograph to the Associate Dean and each member of the DEC. The graduate secretary notifies the Graduate School and posts notices of the impending defense on bulletin boards located within the Boyer College of Music and Dance. All members of the DEC attend the oral defense and then vote to pass or fail the monograph and its defense after the conclusion of the public presentation.

Changes in membership of a DAC or a DEC must be approved by the Associate Dean. The change also must be communicated to the Graduate School.

---

**Final Oral Examination:**

Music Technology, M.S.

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE (http://www.temple.edu/boyer)

About the Program

Over the past several decades, music technology has become a major factor in virtually every area of the music industry. Music technology fuses musical skill and technological knowledge that enables one trained in these areas to create works and/or pursue employment or graduate education in an extremely wide variety of areas. Some of these include music composition, editing and publishing, equipment installation, performance, production, recording and editing, software and hardware development, and systems design, as well as numerous audio fields such as the recording and editing of concerts, events, films and television, and games, among others.

The Master of Science in Music Technology program offers students holding a bachelor’s degree in music or its equivalent an opportunity to further advance their experience and understanding of music technology research and practice at the graduate level. Students prepare for professional work, as well as for the possibility of entrance into a doctoral program, through specialized research, creative work, and practical experience in the field.

Time Limit for Degree Completion: 6 years

Campus Location: Main

Full-Time/Part-Time Status: The degree program can be completed on a full- or part-time basis.

Accreditation: Plan Approval Accreditation has been granted by the National Association of Schools of Music (NASM).

Areas of Specialization: The program offers advanced study in music and music technology whereby students are encouraged to develop diverse abilities in the field, while allowing them also to focus on an area of expertise of their interest.

Job Prospects: Students are prepared for employment in numerous facets of the music industry, higher education teaching in music technology, or pursuit of further graduate education in music and/or technology. The U.S. Bureau of Labor Statistics Occupational Outlook Handbook shows continued strong demand for positions in the computer and computer music industry.

Non-Matriculated Student Policy: With permission from the Dean's Office, individuals may be granted permission to enter the College as a non-matriculated student, taking up to 9 graduate credits (excluding private lessons) before applying for admission to a program.

Financing Opportunities: Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance, and/or direct service related to academic programs. Applicants must submit an assistantship/internship application by March 1 to obtain priority consideration for an award. Applications are available online at the Graduate Financial Aid (http://www.temple.edu/boyer/admissions/documents/gradassistantshipform.pdf) page of Boyer's website. Typically these awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

Admission Requirements and Deadlines

The M.S. in Music Technology will first be offered in Fall 2019.

Application Deadline:

Fall: February 1

Decisions regarding admission are rendered after receipt of all required credentials. Late applications may be considered for admission.

APPLY ONLINE to this graduate program.

Letters of Reference:

Number Required: 2

From Whom: Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents, and aptitude for graduate study.

Coursework Required for Admission Consideration: All applicants must present credentials that are the equivalent of the appropriate
Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours.

**Bachelor’s Degree in Discipline/Related Discipline:** Entry to the program is contingent on completion of an undergraduate degree in music or its equivalent. Those not holding a bachelor’s degree in music who are admitted to the M.S. degree in Music Technology are assigned additional undergraduate deficiency coursework at the time of admission to bring the student to the level of holding an equivalent degree in music. Coursework is determined based on a thorough review of the undergraduate transcript and through Diagnostic Examinations required of all entering students seeking a master’s degree. Typically, applicants have an overall undergraduate GPA of at least 3.33 (B+).

**Statement of Goals:** Include your special interests within the discipline and expectations for the program.

**Standardized Test Scores:**
- TOEFL: 79 iBT or 550 PBT minimum

**Resume:** Current resume required.

**Entrance Exam:** No audition is required for entry to the Music Technology M.S. program; however, admitted students are required to take the master’s Diagnostic Examinations prior to the first term of study. See the Program Requirements tab for details.

**Portfolio:** Applicants must demonstrate proficiency in music technology through submission of an entrance portfolio.

**Writing Sample:** A separate written document explaining the development and creation of the portfolio must be submitted.

**Transfer Credit:** A student who wishes to transfer credit should speak with her/his academic advisor and obtain a “Request for Transfer of Graduate Credit” form, found in TUportal under the Tools tab within “University Forms.” Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College’s Optimum Enrollment Policy. This Policy may preclude the admission of any student who meets the minimum requirements.

1. This elective can be selected from among the graduate courses offered in Music or the various graduate courses available through other departments at Temple University.

**Language Examination:** A language examination is not required for the M.S. in Music Technology.

**Additional Requirements:**

**Diagnostic Examinations:**
All entering master’s students are required to take Diagnostic Examinations in Harmony, Counterpoint, Aural Skills, and Music History prior to the first term of graduate study. The purpose of these examinations is to ascertain adequate preparation for graduate study in these areas. Examinations in Harmony, Counterpoint, and Aural Skills may be taken once. The examination in Music History may be taken a second time.

Students who are unable to take the examinations at the designated time may do so using the online proctoring service, Examity® (https://examity.com). Students are responsible for all fees.

Students who opt not to take any or all exams prior to the first semester of study are required to complete remedial coursework within the first academic year.

Depending on the examination results, students may be required to take one or more remedial courses. Remedial courses are graded on a “Credit / No Credit” basis, and the official university transcript will indicate “CR” (for “Credit,” meaning that the deficiency has been satisfied) or “NC” (for “No Credit,” meaning that the deficiency has not been satisfied).
Students must have a "B-" or better average in any remedial course or section to earn the grade of "Credit" and to satisfy the requirement. Students who earn a grade of "NC" (that is, having a class average below "B-") must retake that course or section until an average of "B-" or higher is achieved and a grade of "CR" is recorded on the official university transcript. Remedial courses do not count toward graduate degree requirements.

It is highly recommended that students complete all remediation coursework during their first academic year of study. An exception may be granted for part-time students. Master's students may neither schedule graduation recitals nor take final comprehensive master's examinations until all of the diagnostic examinations and any required remediation have been successfully completed.

A. Diagnostic Examinations in Music Theory, including Harmony, Counterpoint, and Aural Skills

Students may take each portion of the theory test only once. Any section not graded as passing necessitates enrollment in a remedial course(s) during the first term of study. Examiners stipulate which section(s) of remedial coursework are required. Theory remedial courses include:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MUST 5001</td>
<td>Diatonic Harm. Review</td>
<td>1</td>

</tr>
<tr>
<td>MUST 5003</td>
<td>Counterpoint Review</td>
<td>1</td>
</tr>
<tr>
<td>MUST 5004</td>
<td>Grad Aural Theory Review</td>
<td>3</td>
</tr>
</tbody>
</table>

B. Diagnostic Examination in Music History

Students may take each of the five sections of the history test twice. After the second attempt, any section not graded as passing necessitates enrollment in a remedial course(s). Examiners stipulate which section(s) of remedial coursework are required.

The History remedial course is MUST 5005 Remedial Studies in Music History. Each of five sections are enrolled in for one credit and are subtitled according to the period covered in the coursework: Baroque, Classic, Medieval/Renaissance, Romantic, and Twentieth Century. Remediation can be extended over two terms.

C. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
- received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

Culminating Events: Evidence of student learning is assessed through a combination of course-embedded assessments and projects, written examinations, and a capstone final project that demonstrates the application of integrated music technology.

Music Theory, M.M.

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE (http://www.temple.edu/boyer)

About the Program

The Master of Music in Music Theory provides a comprehensive collection of courses designed to develop skills in the areas of music theory research, music analysis, and musical composition.

Time Limit for Degree Completion: 6 years

Campus Location: Main

Full-Time/Part-Time Status: The degree program can be completed on a full- or part-time basis.

Accreditation: This degree program is accredited by the National Association of Schools of Music (NASM).

Areas of Specialization: The master's program in Music Theory is organized into a series of small seminars, with an emphasis on developing strong analytical skills and the application of music theory in the academic environment. The program's primary purpose is to prepare majors for further academic studies at the doctoral level.

Job Prospects: The program prepares students for various careers related to music, and for further academic and musical training at the doctoral level.

Non-Matriculated Student Policy: With permission from the Dean's Office, individuals may be granted permission to enter the College as
a non-matriculated student, taking up to 9 graduate credits (excluding private lessons) before applying for admission to a program.

Financing Opportunities: Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance, and or direct service related to academic programs. Applicants must submit an assistantship/ internship application by March 1 to obtain priority consideration for an award. Applications are available online at the Graduate Financial Aid (http://www.temple.edu/boyer/admissions/documents/ gradassistantshipform.pdf) page of Boyer's website. Typically these awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

Admission Requirements and Deadlines
Application Deadline:
Fall: January 7
Spring: November 1

Decisions regarding admission are rendered after receipt of all required credentials. Late applications may be considered for admission.

APPLY ONLINE to this graduate program.

Letters of Reference:
Number Required: 2

From Whom: Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents, and aptitude for graduate study.

Coursework Required for Admission Consideration: All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours.

Bachelor's Degree in Discipline/Related Discipline: A degree in Music is expected.

Statement of Goals: Include your special interests within the discipline and expectations for the program.

Standardized Test Scores:
TOEFL: 79 iBT or 550 PBT minimum
Resume: Current resume required.

Writing Sample: An applicant must submit with the application for admission an undergraduate-level paper demonstrating her/his ability to do musical analysis and/or report research. The applicant must submit an assignment of:

• A compositional nature, such as counterpoint, a figured bass, a harmonized melody, an original composition, or the like; and
• An analytical nature, such as a formal analysis, a harmonic analysis, a pitch-class set analysis, or the like.

Transfer Credit: A student who wishes to transfer credit should speak with her/his academic advisor and obtain a "Request for Transfer of Graduate Credit" form, found in TUportal under the Tools tab within "University Forms." Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

Other: Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This Policy may preclude the admission of any student who meets the minimum requirements.

1 Select from Music, Music Education, Music Studies, and other graduate departments, depending on the research interests of the student. One graduate course in Music History is strongly recommended. Advisor approval required.

Language Examination: Students must pass an exam in a foreign language. French and German are strongly recommended, but a different language is possible with approval of the division coordinator. The exam is waived for students who had 2 years of a foreign language as an undergraduate, or for students who reached the final term of a foreign language as an undergraduate.

Additional Requirements:

All degree credits are to be earned at Temple University.

Diagnostic Examinations:
All entering Master of Music students are required to take Diagnostic Examinations in Harmony, Counterpoint, Aural Skills, and Music History prior to the first term of graduate study. The purpose of these examinations is to ascertain adequate preparation for graduate study in these areas. Examinations in Harmony, Counterpoint, and Aural Skills may be taken once. The examination in Music History may be taken a second time.

Students who are unable to take the examinations at the designated time may do so using the online proctoring service, Examity® (https://examity.com). Students are responsible for all fees.

Students who opt not to take any or all exams prior to the first semester of study are required to complete remedial coursework within the first academic year.

Depending on the examination results, students may be required to take one or more remedial courses. Remedial courses are graded on a "Credit / No Credit" basis, and the official university transcript will indicate "CR" (for "Credit," meaning that the deficiency has been satisfied) or "NC" (for "No Credit," meaning that the deficiency has not been satisfied). Students must have a "B-" or better average in any remedial course or section to earn the grade of "Credit" and to satisfy the requirement. Students who earn a grade of "NC" (that is, having a class average below "B-") must retake that course or section until an average of "B-" or higher is achieved and a grade of "CR" is recorded on the official university transcript. Remedial courses do not count toward graduate degree requirements.

It is highly recommended that students complete all remediation coursework during their first academic year of study. An exception may be granted for part-time students. Master of Music students may neither schedule graduation recitals nor take final comprehensive master's examinations until all of the diagnostic examinations and any required remediation have been successfully completed.

A. Diagnostic Examinations in Music Theory, including Harmony, Counterpoint, and Aural Skills

Students may take each portion of the theory test only once. Any section not graded as passing necessitates enrollment in a remedial course(s) during the first term of study. Examiners stipulate which section(s) of remedial coursework are required. Theory remedial courses include:

B. Diagnostic Examination in Music History

Students may take each of the five sections of the history test twice. After the second attempt, any section not graded as passing necessitates enrollment in a remedial course(s). Examiners stipulate which section(s) of remedial coursework are required.

The History remedial course is MUST 5005 Remedial Studies in Music History. Each of five sections are enrolled in for one credit and are subtitled according to the period covered in the coursework: Baroque, Classic, Medieval/Renaissance, Romantic, and Twentieth Century. Remediation can be extended over two terms.

C. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
- received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

Keyboard Examination:

This exam is scheduled by the student with a member of the Music Theory faculty. Although it can be scheduled at any time, the student is strongly encouraged to complete the exam in the first year of study. Students prepare the following:

1. Score reading of the exposition of the first movement of an 18th-century symphony.
2. A simple lied accompaniment.
3. A Bach chorale.
4. A figured bass.

Professional Development Policy:

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

Independent Study Courses:

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval will be granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects will be granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

Acceptable English:

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

Applied Music Study:

1. Graduate students in non-performing curricula may take up to 6 credits of applied study toward the degree with the permission of the major advisor. Such non-required lessons may be taken only if the student can pass the normal graduate-level performing audition
expected of performance majors. In this event, a fee of $200, not covered by tuition remission, is charged.

2. Regardless of major, graduate students with a demonstrable performing proficiency that may not meet the more rigorous requirements of a graduate-level audition may, by audition, qualify to take 2 credits of applied study per term for graduate credit. These courses carry a fee of $400 plus tuition and may be applied to the non-performing curriculum for degree credit. Up to 6 credits may be taken with the approval of the major advisor.

3. Graduate assistantships and other forms of University-sponsored financial aid do not cover private lesson or Recital Extension fees.

Incomplete:
All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

Culminating Events:
Comprehensive Examination:
This three-hour written examination includes two lists: one of terms to identify, and the second of music theorists to describe and explain. The examination also requires short essay answers about current theory and an analysis of a work provided. Students should contact the Associate Dean of the Boyer College of Music and Dance in writing at least one month before the scheduled date of the examination. This exam is generally given in the first week of April. Scheduled by Assistant Dean David Brown, the exam is graded by two members of the department’s graduate faculty.

Final Written Project:
Music Theory majors write a final written project (MUST 9996 Final Written Project: Music Theory) -- not a thesis -- that is 30-40 pages in length. Students choose an advisor, who approves the topic of the project in Music Theory. Students are strongly encouraged to begin their final project no later than the beginning of the second year of study and complete the project in their final term of study. The completed final project must be approved by the advisor and a second reader, generally a faculty member in Music Studies.

Music Therapy, M.M.T.

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE (http://www.temple.edu/boyer)

About the Program
The M.M.T. degree program in Music Therapy is designed to provide professional music therapists with advanced clinical training, supported by studies in research, theory, and ethics. The curriculum focuses on two areas: Music Medicine and Music Psychotherapy. A broad range of clinical populations, orientations, practices, and research paradigms is presented, and opportunities for self-directed learning are provided through independent study projects. Emphasis is given to integrating professional and personal development through self-experiences in Music Therapy. The program in Music Therapy is led by four world-renowned music therapists.

Time Limit for Degree Completion: 6 years

Campus Location: Main, although students may fulfill some credits at TUCC and through online classes.

Full-Time/Part-Time Status: The degree program can be completed on a full- or part-time basis.

Accreditation: The degree program is accredited by the National Association of Schools of Music (NASM) and approved by the American Music Therapy Association (AMTA).

Areas of Specialization: The M.M.T. in Music Therapy provides two tracks of advanced study, with a variety of course offerings in each track:

• The Music Psychotherapy Track provides didactic and experiential training in how music and the client-therapist relationship are used to facilitate mind-body communication and health.
• The Music Medicine Track provides didactic and experiential training in how music and the client-therapist relationship are used to promote emotional and interpersonal growth.

Coursework is designed to give students in-depth knowledge of creative, receptive, recreative, and verbal methods of Music Therapy; the ability to utilize and integrate these methods within medical and psychotherapeutic settings and with a broad range of clientele; the ability to apply theory and research to practice; and an understanding of ethical issues in practice and research. In order to relate theory, research, and practice, all courses involve extensive readings along with experiential training in their clinical applications. Additional requirements are a final project and courses on both quantitative and qualitative approaches to research. The experiential components of the program are designed to sensitize students to the effects of their own personality on the client, the music, and the therapy process, while also identifying ethical issues indigenous to music therapy.
practice. Various theoretical orientations are presented for medical and psychotherapeutic areas of practice.

**Job Prospects:** Graduates typically find employment in a variety of areas, including community mental health agencies, day care facilities, educational institutions, general and psychiatric hospitals, nursing homes, rehabilitation centers, and in private practice. Graduates may combine clinical work with research in the above areas of practice. The program also provides preparation for doctoral study in Music Therapy and related disciplines.

**Licensure:** Students may opt to take additional coursework that may meet licensure requirements in one or more states.

**Non-Matriculated Student Policy:** Professionals who wish to enroll in specific courses for continuing education may take courses with departmental approval. The Graduate School permits up to 9 credits of graduate coursework taken at Temple University as a non-matriculated student to be applied to a graduate degree.

**Financing Opportunities:** Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance, and/or direct service related to academic programs. Applicants must submit an assistantship/internship application (http://www.temple.edu/boyer/admissions/documents/gradassistantshipform.pdf) by March 1 to obtain priority consideration for an award. Typically these awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

**Admission Requirements and Deadlines**

**Application Deadline:**

*Fall:* February 1

Applications are processed as they arrive up to the deadline date.

*APPLY ONLINE to this graduate program.*

**Letters of Reference:**

*Number Required: 2*

*From Whom:* Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents, and aptitude for graduate study.

**Coursework Required for Admission Consideration:** Three admission options are open to those seeking the M.M.T. degree:

1. Master of Music Therapy, which is the option available to an applicant who has completed a bachelor's degree in Music Therapy and is certified to practice Music Therapy. Applicants for the M.M.T. degree are expected to demonstrate the musicianship, self-awareness, and interpersonal skills needed for in-depth clinical work.

2. Music Therapy/Combined Master's Equivalency Program, which is the option available to an applicant who has a bachelor's degree in Music, but is not certified in Music Therapy and must complete Music Therapy core courses. This program integrates core courses in Music Therapy required for entry-level certification with the master's program.

3. Bachelor of Music in Music Therapy, which is the option available to an applicant who holds an undergraduate degree outside of Music or who does not have at least 60 undergraduate credits in Music or its equivalent. The bachelor's degree must be earned prior to applying for the M.M.T.

In addition, the Master of Music Therapy – Licensed Professional Counselor (LPC) Program is available to both M.M.T. students and Master's Equivalency students who want to complete the additional coursework needed to satisfy the Pennsylvania requirements for licensure.

**Bachelor's Degree in Discipline/Related Discipline:** A baccalaureate degree in Music Therapy, Music Education, Music History, Music Performance, or Music Theory is required.

**Statement of Goals:** Include your special interests within the discipline and expectations for the program.

**Standardized Test Scores:**

*TOEFL: 100 IBT or 600 PBT minimum*

**Audition:** Applicants must submit a video-recorded audition consisting of two pieces in different styles in the applicant's major performance medium (with accompanist when needed) and three standard or popular songs sung and played by the applicant on piano and/or guitar from American children, geriatric, adult, or adolescent repertoire.

More information on the audition procedure can be found by visiting www.temple.edu/boyer.

**Resume:** Current resume required.

**Transfer Credit:** A student who wishes to transfer credit should speak with her/his academic advisor and download and complete a "Request for Transfer of Graduate Credit" form, found in TUportal under the Tools tab within “University Forms.” Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College’s Optimum Enrollment Policy. This policy may preclude the admission of any student who meets the minimum requirements.

**Program Requirements**

**General Program Requirements:**

*Number of Didactic Credits Required Beyond the Baccalaureate:* 36 for the M.M.T.; 63 for the Music Therapy/Combined Master's Equivalency Program; 12 to add the Licensed Professional Counselor option.

Total Credit Hours 12

**Additional Requirements:**

**Diagnostic Examination:**

The Diagnostic Examination in Voice, Piano, and Guitar is required for all students entering the master’s degree program in Music Therapy. The examination covers two broad areas of competence:

1. the ability to sing and play a large repertoire of songs from the standard, popular, traditional, folk, rock, or country literature; and
2. the ability to sight-sing and sight-harmonize songs from a fake book.

For the examination, students bring a list of at least 12 songs that they are prepared to sing and play. The examiners then select one or more songs to be sung and played on the piano, and one or more to be sung and played on the guitar. In the next portion of the examination, students are asked to sight-sing and sight-harmonize tunes from a fake book, using piano and guitar as accompaniments.

If a student has not studied voice, piano, and/or guitar, or if the student is not prepared to play popular music or use a fake book, s/he may waive any or all portions of the examination and opt to take the appropriate remedial course(s). This is not unusual. Most students entering the program need instruction or practice in one or more of these areas. Students are therefore encouraged to view this as merely a placement examination. Depending on each student’s background and competence, as demonstrated on the examination, students may be placed in the following remedial courses for 1 credit each:

Independent Study Courses:
Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students’ major advisor, and the Associate Dean. Approval is granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects is granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student’s curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

Acceptable English:
All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College’s statement on plagiarism and academic honesty.

Applied Music Study:

1. Graduate students in non-performing curricula may take up to 6 credits of applied study toward the degree with the permission of the major advisor. Such non-required lessons may be taken only if the student can pass the normal graduate-level performing audition expected of performance majors. In this event, a fee of $200, not covered by tuition remission, is charged.

2. Regardless of major, graduate students with a demonstrable performing proficiency that may not meet the more rigorous requirements of a graduate-level audition may, by audition, qualify to take 2 credits of applied study per term for graduate credit. These courses carry a fee of $400 plus tuition and may be applied to the non-performing curriculum for degree credit. Up to 6 credits may be taken with the approval of the major advisor.

3. Graduate assistantships and other forms of University-sponsored financial aid do not cover private lesson or Recital Extension fees.

Incompletes:
All incomplete grades must be fulfilled within one year.

Culminating Events:
Comprehensive Examination:
Upon completion of the final projects and with permission of the Program Coordinator, the student may request permission to take the written qualifying examination. Students should contact the Program Coordinator regarding administration dates of the comprehensive examination.

The written qualifying examination in Music Therapy does not limit its scope to the coursework taken at Boyer College of Music and Dance. Instead, the student is expected to study comprehensively in preparation for this examination. The written qualifying examination in Music Therapy covers:

1. Basic methods and techniques of Music Therapy.
3. Various client populations.
4. Various theoretical approaches to individual and group therapy.
5. Existing research literature and research approaches.
6. Professional ethics.

Final Project:
As part of the Music Therapy curriculum, students undertake a final project that encompasses a pilot research study.

Music Therapy, Ph.D.
Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE (http://www.temple.edu/boyer)

About the Program
The Ph.D. program at Temple University is a true Ph.D. in Music Therapy. Rather than having music therapy as a minor or elective track within another field, or as merely the main topic for the dissertation, the program has Music Therapy as the major area of study with its own core curriculum of advanced Music Therapy courses, supported by studies in research, music, and related health disciplines. The goal is to prepare skilled and experienced clinicians to become competent scholars who will make significant contributions to research and theory in the field. It prepares individuals to conduct research and develop theory, with opportunities to study both quantitative and qualitative research paradigms. It also allows for the development of expertise and skill in college-teaching and clinical supervision. The program has undergone extensive review and has been granted plan approval by the National Association of Schools of Music (NASM). It is the first of its kind in the United States. The program in Music Therapy is led by four world-renowned music therapists.

Time Limit for Degree Completion: 7 years

Campus Location: Main, Center City

Full-Time/Part-Time Status: The degree program on a full- or part-time basis.

Accreditation: The program is accredited by the National Association of Schools of Music (NASM).

Areas of Specialization: The Ph.D. program in Music Therapy offers the opportunity for further development of clinical expertise in two advanced areas of practice: Music Medicine and Music Psychotherapy. The program allows for the acquisition of expertise in an area of specialization within the two areas of practice (e.g., a particular client population, methodology, or research paradigm).

Job Prospects: Graduates typically find employment as professors in colleges and universities, and as practitioners, supervisors, or researchers in a variety of health care settings.

Licensure: Students may opt to take additional coursework that may meet licensure requirements in one or more states.

Non-Matriculated Student Policy: The core doctoral courses are not open to non-matriculated students.

Financing Opportunities: Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance, and/or direct service related to academic programs. Applicants must submit an assistantship/internship application by March 1 to obtain priority consideration for an award. Applications are available online at the Graduate Financial Aid (http://www.temple.edu/boyer/admissions/documents/gradassistantshipform.pdf) page of Boyer’s website. Typically these awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

Admission Requirements and Deadlines
Application Deadline:
Fall: February 1

Applications are processed as they arrive up to the deadline date.

APPLY ONLINE to this graduate program.

Letters of Reference:
Number Required: 2

From Whom: Letters of recommendation should be obtained from academic advisors, professors, or professional supervisors who can provide insight into the applicant's abilities, talents, and aptitude for graduate study.

Coursework Required for Admission Consideration: Applicants who have not completed the following courses before matriculation must complete them while a doctoral student:

Master's Final Project

1-3

Master's Degree in Related Discipline: A master's degree in Music, Music Education, Music Therapy, Creative Arts Therapy, Health Studies, or Psychology is required.

Bachelor's Degree in Discipline/Related Discipline: A baccalaureate degree in any music-related field is required.

Statement of Goals: Include your professional goals, which must be clearly articulated, feasible, relevant to the needs of the profession, and appropriate to the program at Temple.

Standardized Test Scores:

TOEFL: 100 iBT or 600 PBT minimum

Prescreening Video and Audition: Applicants submit a prescreening video via Acceptd (https://app.getacceptd.com/templeboyer). This recording may contain representative movements of the audition material, with the majority of the material having been recorded within the last 12 months. Video recordings of accompanied works must have piano or orchestral accompaniment.

If preliminary approval is granted, an in-person live audition is arranged. Audition repertoire requirements include:

• Two major works in a major performance medium.
• Two standard or popular songs sung with own piano accompaniment.
• Two standard or popular songs sung with own guitar accompaniment.
• Sight-sing and sight-harmonize tunes from a fake book, using both piano and guitar for accompaniment, and sight-read simple piano pieces.

Note that video recordings alone are not acceptable for admission, except in the case of students living outside the United States. In this case, applicants must submit a video recording of complete works.

Writing Sample: A clinical, theoretical, or research paper in Music Therapy must be uploaded to Acceptd (https://app.getacceptd.com/templeboyer).

Interview: After all application materials have been received, an interview is scheduled with the applicant by the Program Coordinator. (Please allow at least three weeks after submission.) The interview may occur at the time of the in-person audition or may be scheduled after the applicant submits a recorded audition.

Resume: Current resume required.

Writing Examination: An on-site Writing Examination is required as part of the doctoral admissions process. Remedial coursework may be required.

Test Waiver: A completed M.M.T. degree from Temple may warrant a waiver.

Advanced Standing: Advanced standing is awarded upon admission, after review of transcripts by the Doctoral Coordinator. Students may transfer into the doctoral program up to 12 additional graduate credits in coursework taken beyond the master's degree. Typically, this coursework is undertaken after admission and must be approved by the major advisor and the Associate Dean. The maximum number of advanced standing credits awarded is 36.

Additional Requirements: The successful applicant must:

1. Hold professional certification in Music Therapy.
2. Have at least five years of full-time clinical experience as a professional music therapist (or its equivalent).
3. Have earned a master's degree in Music Therapy or related area or satisfactorily completed 18 graduate credits in Music.

Other: Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This Policy may preclude the admission of any student who meets the minimum requirements.

Advisors approval required.

Additional Requirements:

All degree credits are to be earned at Temple University.

Grading:

For doctoral degrees, only grades of "B-" and higher may be counted toward degree requirements.

Tuition and Fee Payments:

All tuition and fees must be paid according to the deadlines given by the Bursar's Office at the time of registration. This means that all payments must be received prior to the first day of the term in which the course is
evaluate one's own learning. It has two components: scholarly projects to disciplinary and professional issues; and ability to synthesize and contextualize one's own work within the field; ability to project solutions from paradigms; ability to integrate theory, research, and practice; ability to do so is very costly—in time, effort, and money.

Professional Development Policy:
In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

Acceptable English:
All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College’s statement on plagiarism and academic honesty.

Applied Music Study:
1. Graduate students in non-performing curricula may take up to 6 credits of applied study toward the degree with the permission of the major advisor. Such non-required lessons may be taken only if the student can pass the normal graduate-level performing audition expected of performance majors. In this event, a fee of $200, not covered by tuition remission, is charged.
2. Regardless of major, graduate students with a demonstrable performing proficiency that may not meet the more rigorous requirements of a graduate-level audition may, by audition, qualify to take 2 credits of applied study per term for graduate credit. These courses carry a fee of $400 plus tuition and may be applied to the non-performing curriculum for degree credit. Up to 6 credits may be taken with the approval of the major advisor.
3. Graduate assistantships and other forms of University-sponsored financial aid do not cover private lesson or Recital Extension fees.

Incompletes:
All incomplete grades must be fulfilled by the first day of the month in which the student expects to graduate.

Culminating Events:
Preliminary Examination:
The preliminary examination is designed to test the student’s knowledge of the literature; research competence in both quantitative and qualitative paradigms; ability to integrate theory, research, and practice; ability to contextualize one’s own work within the field; ability to project solutions to disciplinary and professional issues; and ability to synthesize and evaluate one’s own learning. It has two components: scholarly projects and the oral defense.

1. Scholarly projects originate from specific assignments given in required doctoral courses and, depending on the project, may be completed with additional faculty supervision through other elective courses (e.g., research apprenticeship). Ultimately, the project must go significantly beyond any course assignment, and it may not duplicate any previous projects completed by the student outside of the degree program. At least three Music Therapy faculty independently grade each preliminary examination project using a 5-point rating scale. A passing average grade for each question is 3.

2. The oral defense covers any of the topics addressed in the written projects. The oral examiners are the same Music Therapy faculty members who scored the scholarly projects. Upon completion of the oral defense, the examining committee determines whether the student passed or failed. If any portion is failed, the committee specifies in writing whether permission is granted to retake various portions of the examination, and the conditions under which such permission is granted. Students are given only one opportunity to retake the examination or portion thereof. Students should contact the Doctoral Coordinator of the Music Therapy Ph.D. program for more details regarding the nature of the examination questions.

Upon completion of 30 credits, the student requests permission from the Doctoral Coordinator to take the examination. Upon consultation with the Music Therapy faculty, the Doctoral Coordinator schedules the exam. The oral part can be scheduled three weeks after the student submits the written part.

Proposal:
The proposal must include the student’s background and experience with the research topic; an articulate and comprehensive review of the literature; a clear statement of the research problem and questions to be answered; and a proposed methodology. Upon approval of a Doctoral Advisory Committee, the student works with the major advisor to prepare the proposal. In the process, the student consults other members of the committee. Each member of the Doctoral Advisory Committee must approve and sign the final proposal. Once all members have signed the title page, the student copies the final proposal and delivers within 30 days one copy to each member of the Doctoral Advisory Committee, the department chair, the Associate Dean, and the Graduate School. The dissertation proposal must be approved before the student may register for MUED 9999 Doctoral Dissertation.

Dissertation:
The purpose of the dissertation is to contribute new knowledge or insight to any aspect of Music Therapy. The dissertation is overseen by the Doctoral Advisory Committee, which consists of at least three members, two from the department and one from outside the department. The committee works together to guide the student toward completion of dissertation research, with the chair coordinating these efforts. In addition to the Doctoral Advisory Committee, one or two graduate faculty may serve as examiners for the defense. These examiners are expected to read and evaluate the student’s dissertation and, with the Doctoral Advisory Committee, determine whether it is acceptable, needs revision, or is unacceptable. The dissertation must meet the various expectations of quality from each member of the Doctoral Advisory Committee. A major criterion shall be whether the student has demonstrated scholastic excellence in carrying out the research project as proposed.

The Doctoral Advisory Committee determines when the dissertation is ready for defense. Upon obtaining approval to defend, the major advisor asks the Associate Dean to assign outside readers. The advisor makes all the necessary arrangements for scheduling the defense. The “Announcement of Oral Defense” form bearing signatures of all of the Dissertation Examining Committee members must be submitted to the Associate Dean at least one month prior to the requested defense date.
Upon receiving approval to defend, the Associate Dean announces the dissertation defense to the academic community.

To make a change in a committee, the student petitions the Doctoral Coordinator of the program or the Associate Dean. Upon appropriate consultation with all parties pertinent to the petition, the Associate Dean makes the final determination. The change also must be communicated to the Graduate School.

**Opera, M.M.**

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE (http://www.temple.edu/boyer)

**About the Program**

The Master of Music in Opera is designed to prepare qualified performers for professional careers as singer-actors on both national and international operatic stages. The faculty only admits singers who demonstrate outstanding potential for the operatic stage, both vocally and dramatically, and strives to provide as thorough a graduate training as is possible within a two-year framework. The ultimate goal is to produce singing artists capable of competing successfully in the professional world of opera.

**Time Limit for Degree Completion:** 6 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Interdisciplinary Study:** With the approval of the major advisor, students may elect to take up to 6 graduate credits outside the field of music.

**Accreditation:** This degree program is accredited by the National Association of Schools of Music (NASM).

**Areas of Specialization:** The program prepares students through a systematic approach to vocal technique, specialized studies in operatic literature, the refinement of language and diction skills, the development of acting techniques, the continued refinement of musical and theoretical skills, advanced study in musical style and performance practice, and the provision of operatic performance opportunities designed to emulate a professional environment.

**Job Prospects:** Graduates work throughout the world performing in opera houses, singing as soloists, and teaching in colleges and universities as well as in private studios.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in selected courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

**Financing Opportunities:** Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance, and/or direct service related to academic programs. Applicants must submit an assistantship/internship application by March 1 to obtain priority consideration for an award. Applications are available online at the Graduate Financial Aid (http://www.temple.edu/boyer/admissions/documents/gradassistantshipform.pdf) page of Boyer's website. Typically these awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

**Admission Requirements and Deadlines**

**Application Deadline:**

*Fall: February 1; December 15 international*

*Spring: September 15; August 1 international*

Applications are processed as they arrive up to the deadline date.

APPLY ONLINE to this graduate program.

**Letters of Reference:**

*Number Required: 2*

*From Whom:* Letters of recommendation should be obtained from evaluators who can provide insight into an applicant's abilities, talents, and aptitude for graduate study.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate
Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours.

**Bachelor's Degree in Discipline/Related Discipline:** A degree in Music is expected.

**Statement of Goals:** Include your special interests within the discipline and expectations for the program.

**Standardized Test Scores:**
- TOEFL: 75 iBT or 537 PBT minimum

**Audition:** See www.temple.edu/boyer for audition repertoire requirements.

**Resume:** Current resume required.

**Transfer Credit:** A student who wishes to transfer credit should speak with her/his academic advisor and obtain a “Request for Transfer of Graduate Credit” form, found in TUportal under the Tools tab within “University Forms.” Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This Policy may preclude the admission of any student who meets the minimum requirements.

#### Electives

| Credit Hours | 4 |

A maximum of one term of vocal coaching may be taken.

**Language Examination:** Candidates in Opera must present undergraduate coursework in French, German, and Italian languages (or pass a translating and speaking examination at Temple) at the time of admission to the program. Where the transcript or pass-off examination does not reveal such study, the appropriate deficiency course(s) must be taken prior to completion of the master's degree.

### Additional Requirements:

**Diagnostic Examinations:**
- All entering Master of Music students are required to take Diagnostic Examinations in Harmony, Counterpoint, Aural Skills, and Music History prior to the first term of graduate study. The purpose of these examinations is to ascertain adequate preparation for graduate study in these areas. Examinations in Harmony, Counterpoint, and Aural Skills may be taken once. The examination in Music History may be taken a second time.

Students who are unable to take the examinations at the designated time may do so using the online proctoring service, Examity® (https://examity.com). Students are responsible for all fees.

Students who opt not to take any or all exams prior to the first semester of study are required to complete remedial coursework within the first academic year.

Depending on the examination results, students may be required to take one or more remedial courses. Remedial courses are graded on a “Credit / No Credit” basis, and the official university transcript will indicate “CR” (for “Credit,” meaning that the deficiency has been satisfied) or “NC” (for “No Credit,” meaning that the deficiency has not been satisfied). Students must have a “B-” or better average in any remedial course or section to earn the grade of “Credit” and to satisfy the requirement. Students who earn a grade of “NC” (that is, having a class average below “B-”) must retake that course or section until an average of “B-” or higher is achieved and a grade of “CR” is recorded on the official university transcript. Remedial courses do not count toward graduate degree requirements.

It is highly recommended that students complete all remediation coursework during their first academic year of study. An exception may be granted for part-time students. Master of Music students may neither schedule graduation recitals nor take final comprehensive master’s examinations until all of the diagnostic examinations and any required remediation have been successfully completed.

### A. Diagnostic Examinations in Music Theory, including Harmony, Counterpoint, and Aural Skills

Students may take each portion of the theory test only once. Any section not graded as passing necessitates enrollment in a remedial course(s) during the first term of study. Examiners stipulate which section(s) of remedial coursework are required. Theory remedial courses include:

<table>

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval will be granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects will be granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

Acceptable English:
All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

Graduate Private Lesson Policy:
Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A $250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

Private applied lessons beyond the four-term requirement currently in effect for graduate performance students may be extended with the permission of the jury, department chair, and the Associate Dean or Dean of the Boyer College of Music and Dance.

Incompletes:
All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

Culminating Events:

Comprehensive Examination:
The Voice and Opera program requires a one-hour comprehensive examination in music literature and theory. When admitted to the College, a list of 100 musical works of the standard literature from the Middle Ages through the 20th century is made available to the student as an aid to prepare for the examination. This examination should be taken in the penultimate term of study.

The examination is in three parts: identification of specific selections from a list of 100 works, identification of a "mystery" selection, and score analysis. Two graduate faculty members grade the examination. Students must pass all three sections. A score of 70% or better must be achieved in the identification section, and a "pass" or "weak pass" must be achieved in the "mystery" selection and the score analysis section.

The examination is administered approximately ten times each year. Students notify the Assistant Dean no later than one week prior to the requested examination administration date. For examination dates, see the Graduate Music Examination Schedule (http://www.temple.edu/boyer/admissions/graduate-admissions/gradmusicexamschedule.asp).

Adjudicated Roles:
Opera majors must have accumulated at least two major adjudicated roles or one major and two minor adjudicated roles in addition to opera theater assignments. Fully-staged opera productions with orchestra are
typically presented each term. Opera roles are adjudicated by three full-time music faculty members.

Piano Pedagogy, M.M.

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE (http://www.temple.edu/boyer)

About the Program

The master's degree in Piano Pedagogy expands the resources, skills, and insights of pianists who wish to be teachers, either in a private studio or at an institution, and who—in addition to having a comprehensive knowledge about teaching children and adults at an elementary level—are equipped to teach intermediate and early advanced students.

Time Limit for Degree Completion: 6 years

Campus Location: Main

Full-Time/Part-Time Status: The degree program can be completed on a full- or part-time basis.

Accreditation: This degree program is accredited by the National Association of Schools of Music (NASM).

Areas of Specialization: While private lessons and ensemble participation are required each term, a major concentration of the curriculum is the study and practice of the teaching of the piano. Included in this concentration are coursework and fieldwork through the College's preparatory division.

Job Prospects: The program prepares musicians for teaching careers, professional activity, or doctoral study.

Non-Matriculated Student Policy: Non-matriculated students may enroll in selected courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

Financing Opportunities: Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance, and/or direct service related to academic programs. Applicants must submit an assistantship/internship application by March 1 to obtain priority consideration for an award. Applications are available online at the Graduate Financial Aid (http://www.temple.edu/boyer/admissions/documents/gradassistantshipform.pdf) page of Boyer's website. Typically these awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master's students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

Admission Requirements and Deadlines

Application Deadline:

Fall: March 1
Spring: November 1

Applications are processed as they arrive. Late applications may be considered for admission.

APPLY ONLINE to this graduate program.

Letters of Reference:

Number Required: 2

From Whom: Letters of recommendation should be obtained from evaluators who can provide insight into the applicant's abilities, talents, and aptitude for graduate study.

Coursework Required for Admission Consideration: All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours.

Bachelor's Degree in Discipline/Related Discipline: A degree in Music is expected.

Statement of Goals: Include your special interests within the discipline and expectations for the program.

Standardized Test Scores:

TOEFL: 79 iBT or 550 PBT minimum

Audition: See www.temple.edu/boyer for audition repertoire requirements.
Resume: Current resume required.

Transfer Credit: A student who wishes to transfer credit should speak with her/his academic advisor and obtain a “Request for Transfer of Graduate Credit” form, found in TUPortal under the Tools tab within “University Forms.” Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

Other: Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College’s Optimum Enrollment Policy. This Policy may preclude the admission of any student who meets the minimum requirements.

Program Requirements

General Program Requirements:
Number of Didactic Credits Required Beyond the Baccalaureate: 30

Students who are unable to take the examinations at the designated time may do so using the online proctoring service, Examiity® (https://examiity.com). Students are responsible for all fees.

Students who opt not to take any or all exams prior to the first semester of study are required to complete remedial coursework within the first academic year.

Depending on the examination results, students may be required to take one or more remedial courses. Remedial courses are graded on a “Credit / No Credit” basis, and the official university transcript will indicate “CP” (for “Credit,” meaning that the deficiency has been satisfied) or “NC” (for “No Credit,” meaning that the deficiency has not been satisfied). Students must have a “B-” or better average in any remedial course or section to earn the grade of “Credit” and to satisfy the requirement. Students who earn a grade of “NC” (that is, having a class average below “B-”) must retake that course or section until an average of “B-” or higher is achieved and a grade of “CR” is recorded on the official university transcript. Remedial courses do not count toward graduate degree requirements.

It is highly recommended that students complete all remediation coursework during their first academic year of study. An exception may be granted for part-time students. Master of Music students may neither schedule graduation recitals nor take final comprehensive master’s examinations until all of the diagnostic examinations and any required remediation have been successfully completed.

A. Diagnostic Examinations in Music Theory, including Harmony, Counterpoint, and Aural Skills

Students may take each portion of the theory test only once. Any section not graded as passing necessitates enrollment in a remedial course(s) during the first term of study. Examiners stipulate which section(s) of remedial coursework are required. Theory remedial courses include:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>MUST 5001</td>
<td>Diatonic Harm. Review</td>
<td>1</td>
</tr>

<td>MUST 5003</td>
<td>Counterpoint Review</td>
<td>1</td>
</tr>
<tr>
<td>MUST 5004</td>
<td>Grad Aural Theory Review</td>
<td>3</td>
</tr>
</tbody>
</table>

B. Diagnostic Examination in Music History

Students may take each of the five sections of the history test twice. After the second attempt, any section not graded as passing necessitates enrollment in a remedial course(s). Examiners stipulate which section(s) of remedial coursework are required.

The History remedial course is MUST 5005 Remedial Studies in Music History. Each of five sections are enrolled in for one credit and are subtitled according to the period covered in the coursework: Baroque, Classic, Medieval/Renaissance, Romantic, and Twentieth Century. Remediation can be extended over two terms.

C. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and

[1] Select from Music, Music Education, Music Studies, or other graduate departments. Advisor approval required.
• received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

Professional Development Policy:
In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

Performing Ensembles:
1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of academic terms. Students must arrange their schedules to accommodate this requirement.
2. Participation: Master’s degree candidates in wind, brass, and percussion instruments must be available for ensemble assignments at the discretion of the department chair, including participation beyond curricular requirements.
3. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair, and the Associate Dean.

Independent Study Courses:
Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students’ major advisor, and the Associate Dean. Approval will be granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects will be granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student’s curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

Acceptable English:
All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College’s statement on plagiarism and academic honesty.

Graduate Private Lesson Policy:
Weekly one-hour private lessons are provided for all matriculated master’s and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A $250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

Private applied lessons beyond the four-term requirement currently in effect for graduate performance students may be extended with the permission of the jury, department chair, and the Associate Dean or Dean of the Boyer College of Music and Dance.

Recital Extension:
Students withdrawing from the recital requirement during the recital term will receive an Incomplete and must register for extended study for non-degree credit (MUSC 5000 Recital Extension for 2 credits). Recital Extension must be taken each term until the recital has been presented. This course will be offered on a “Credit/No Credit” basis only. Upon satisfactory completion of the recital, the Incomplete for the recital course will be replaced by a letter grade and MUSC 5000 Recital Extension will be issued a grade of “CR.” Credit derived from Recital Extension will not be counted toward degree requirements.

1. Recital Extension Fees: Tuition for these additional terms of private study will be the cost of 2 graduate credits plus a $400 Recital Extension fee. Graduate assistantships and other forms of University-sponsored financial aid do not cover the Recital Extension fee.
2. Exceptions to Recital Extension:
   a. Students who perform their recitals during the first three weeks of the Spring term are not required to register for Recital Extension that term.
   b. Students who register for Recital Extension during the Summer may perform their recitals during the first three weeks of the Fall term. However, if the student does not take Recital Extension during the Summer, s/he may not present the recital in the Fall term, regardless of the date, without also registering for the Fall term of Recital Extension.
3. Failure to Present Recital: The degree status of students who are unable to present a recital after one term of Recital Extension will be reviewed by the Associate Dean and the major advisor, who, in consultation with the major teacher and department, will determine whether or not the student may continue in the program. Inability to present the recital after one term of Recital Extension may be grounds for dismissal from the degree program for failing to maintain reasonable academic progress.

Incomplete:
All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

Culminating Events:
Comprehensive Final Project:
All candidates for the Master of Music degree must submit a list of all repertoire studied with their studio teacher(s) while enrolled in the M.M. program. Students choose two stylistically contrasting pieces from their final recital program. (Students enrolled in programs without a recital requirement, such as Opera Coaching, choose two contrasting works studied with their assigned studio teacher.) Students choose to give either an oral presentation or submit a written document that addresses at least several of the following topics:

• Form and harmonic language of the piece
• Historical background of the work
• Aspects of the composer’s style
• Relationship to other keyboard works by the composer
• Performance practice considerations
• Specific technical problems and their solutions
• Other relevant information about the piece

The goal of the presentation or paper is to demonstrate cumulative knowledge and skills gained during the course of study at the master’s level. Courses taken in research, theory, history, pedagogy, and performance practice can inform the discussion of the particular works chosen by the student.

If the student selects the oral option, the presentation is scheduled during end-of-term juries. At least two representatives from the graduate faculty in the Department of Keyboard Instruction adjudicate the oral presentation. The session should last approximately 20 minutes with some extra time for questions from the faculty members following the presentation. Students can perform small sections of the work if germane to their discussion. Lecture notes with cited sources for information should be submitted to the Department of Keyboard Instruction no later than ten days before juries.

The written document, if chosen, should be a research-quality paper of approximately 10 pages, double-spaced, and include appropriate references. This should be submitted to the Department of Keyboard Instruction no later than April 1 for a May graduation or November 15 for a January graduation. At least two graduate faculty members from the Department of Keyboard Instruction read the paper and confer about the final decision. Students must follow the guidelines for academic honesty found in the Graduate Bulletin.

Each reader grades the project as either “pass” or “fail.” If the student fails, s/he is not allowed to graduate at the end of that term. Another document may be submitted after suggestions for improvement by the Department of Keyboard Studies faculty, or another oral presentation is arranged and graded as before. If the student fails a second time, s/he is dismissed from the degree program.

Public Recital:
Performance majors present a public recital as the culminating event for the master’s degree (MUSC 8984). Graduation recitals are typically one hour in length; presented on-campus in either Rock Hall or Klein Recital Hall; and adjudicated by three full-time music faculty members. The student must show evidence through Temple University transcript records of having taken private lessons up to the time of the graduation recital. Students who wish to play a recital in the early Fall should plan to register for and complete the final term of lessons during the preceding Summer months. A recital approval jury must be formed to demonstrate the student’s ability to perform the degree recital successfully. Normally, this occurs at the preceding term’s jury. If, by departmental approval, this jury does not occur, then a jury must be scheduled at least four weeks prior to the recital. If the jury is not successfully completed by that time, the department reserves the right to cancel the recital date. Further details are available from the department chair.

Total Credit Hours: 33

1 Select from Music, Music Education, Music Studies, or other graduate departments. Performance practice courses recommended. Advisor approval required.

**Performance:** All bowed string pedagogy majors at the master’s degree level must perform in the university orchestra each term they receive lessons.

**Additional Requirements:**

**Diagnostic Entrance Examinations:**

All entering Master of Music students are required to take Diagnostic Examinations in Harmony, Counterpoint, Aural Skills, and Music History prior to the first term of graduate study. The purpose of these examinations is to ascertain adequate preparation for graduate study in these areas. Examinations in Harmony, Counterpoint, and Aural Skills may be taken once. The examination in Music History may be taken a second time.

Students who are unable to take the examinations at the designated time may do so using the online proctoring service, Examity® (https://examity.com). Students are responsible for all fees.

Students who opt not to take any or all exams prior to the first semester of study are required to complete remedial coursework within the first academic year.

Depending on the examination results, students may be required to take one or more remedial courses. Remedial courses are graded on a “Credit / No Credit” basis, and the official university transcript will indicate “CR” (for “Credit,” meaning that the deficiency has been satisfied) or “NC” (for “No Credit,” meaning that the deficiency has not been satisfied).
Students must have a "B-" or better average in any remedial course or section to earn the grade of "Credit" and to satisfy the requirement. Students who earn a grade of "NC" (that is, having a class average below "B-") must retake that course or section until an average of "B-" or higher is achieved and a grade of "CR" is recorded on the official university transcript. Remedial courses do not count toward graduate degree requirements.

It is highly recommended that students complete all remediation coursework during their first academic year of study. An exception may be granted for part-time students. Master of Music students may neither schedule graduation recitals nor take final comprehensive master's examinations until all of the diagnostic examinations and any required remediation have been successfully completed.

A. Diagnostic Examinations in Music Theory, including Harmony, Counterpoint, and Aural Skills

Students may take each portion of the theory test only once. Any section not graded as passing necessitates enrollment in a remedial course(s) during the first term of study. Examiners stipulate which section(s) of remedial coursework are required. Theory remedial courses include:

B. Diagnostic Examination in Music History

Students may take each of the five sections of the history test twice. After the second attempt, any section not graded as passing necessitates enrollment in a remedial course(s). Examiners stipulate which section(s) of remedial coursework are required.

The History remedial course is MUST 5005 Remedial Studies in Music History. Each of five sections are enrolled in for one credit and are subtitled according to the period covered in the coursework: Baroque, Classic, Medieval/Renaissance, Romantic, and Twentieth Century. Remediation can be extended over two terms.

C. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
- received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

Professional Development Policy:

In addition to taking the required subjects for their degrees, all students in the Boyer College of Music and Dance are obligated to serve in a number of capacities in order to enrich their academic and musical expertise. Boyer College of Music and Dance believes that such experiences give impetus to successful professional careers. Among the duties that may be required are conducting laboratory classes; tutoring; teaching private lessons; coaching; participating in the distribution and inventory control of Temple University-owned musical instruments and instructional materials; participating in ensembles; accompanying; performing at admissions and open house events; supervising performance classes; and engaging in other academic activities.

Performing Ensembles:

1. Touring: All students in touring performing ensembles are required to participate in all scheduled tours. These tours, usually one or two weeks in length, often take place immediately after termination of terms. Students must arrange their schedules to accommodate this requirement.

2. Participation: Master's degree candidates in wind, brass, and percussion instruments must be available for ensemble assignments at the discretion of the department chair, including participation beyond curricular requirements.

3. Non-Credit Participation: With special permission, graduate students for whom there is no ensemble requirement, or where previous ensemble credits exceed the graduation requirement, may participate in choral and instrumental ensembles without cost, with prior permission from the ensemble director, the department chair, and the Associate Dean.

Independent Study Courses:

Independent study courses provide a special opportunity for graduate students to work in a highly individualized setting with one or more faculty members. All such study must receive the approval of the faculty member providing the instruction, the students' major advisor, and the Associate Dean. Approval will be granted only after the student has presented a detailed description of the intended independent study project. Approval of independent study projects will be granted only for students whose academic and musical record provides substantial support for the benefits of this type of study. In no case may more than 20% of a graduate student's curriculum be taken as independent study. Private lessons beyond those required in the curriculum are not an appropriate form of independent study.

Acceptable English:

All students, including those for whom English is not the native language, are expected to present all written work in acceptable English. No double standard exists to differentiate students on the basis of proficiency in the use of the English language. Students are also responsible for becoming familiar with the College's statement on plagiarism and academic honesty.

Graduate Private Lesson Policy:

Weekly one-hour private lessons are provided for all matriculated master's and doctoral performance majors in good standing, provided at least three additional credits of programmatically required graduate-level study are taken simultaneously. A $250 per term lesson fee (subject to change without notice) is charged for all private lessons. Tuition remission may not be used to cover the private lesson fee.

Private applied lessons beyond the four-term requirement currently in effect for graduate performance students may be extended with the permission of the jury, department chair, and the Associate Dean or Dean of the Boyer College of Music and Dance.

Incompletes:

All incomplete grades and keyboard proficiencies must be fulfilled by the first day of the month in which the student expects to graduate.

Culminating Events:

Final Pedagogy Project:

The final pedagogy project is based on a subject determined with the major advisor, and may take the form of a lecture/recital, teaching
demonstration, research paper, article, or method book. Faculty members in the Department of Instrumental Studies grade the final project.

**Vocal Arts, M.M.**

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE (http://www.temple.edu/boyer)

**About the Program**

The interdisciplinary Master of Music in Vocal Arts is designed for graduate students who want to continue their education and practice in the disciplines of solo and choral singing in preparation for careers in community music, education, or performance. The degree offers an opportunity to broaden the scope of graduate vocal education beyond the classical studio experience. Students complete a core of private voice lessons and choral ensembles, and may select electives in choral studies, music education, musical theater, and voice/ear training studies.

In contrast to the Master of Music in Voice Performance, which is a focused program that serves students whose career goal is to become a professional classical voice performer, the Vocal Arts M.M. allows students to broaden their vocal training to choral music, conducting, music education, or musical theater. The Vocal Arts M.M. program allows students to balance the rigor of classical voice training with the freedom to select an area of focus in another genre.

**Time Limit for Degree Completion:** 4 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Accreditation:** Accreditation is being sought from the National Association of Schools of Music (NASM).

**Areas of Specialization:** Within the prescribed credits for the M.M. in Vocal Arts, students can focus their studies on choral music, conducting, music education, or musical theater.

**Job Prospects:** The program prepares students for various careers related to the vocal arts and for further academic training at the doctoral level.

**Non-Matriculated Student Policy:** Non-matriculated students may enroll in selected courses in music with permission, but may not take applied lessons until they have been fully admitted and matriculated.

**Financing Opportunities:** Boyer College of Music and Dance offers a number of assistantships and academic internships to matriculated graduate students. Full awards carry a cash stipend plus full tuition remission for the Fall and Spring terms. Partial awards also are available in values of 1/4 or 1/2 of a full award. Duties for assistantships and internships vary, but typically include teaching, tutoring, classroom assistance, research, artistic performance, and/or direct service related to academic programs. Applicants must submit an assistantship/internship application by March 1 to obtain priority consideration for an award. Applications are available online at the Graduate Financial Aid (http://www.temple.edu/boyer/admissions/documents/gradassistantshipform.pdf) page of Boyer’s website. Typically these awards are made only in the Fall term for up to two terms: Fall and Spring. Awards may be renewed on an annual basis (typically up to one additional year for master’s students and up to three years for doctoral students) based on departmental needs as well as satisfactory academic and musical progress by the recipient.

**Admission Requirements and Deadlines**

**Application Deadline:**

- **Fall:** March 1  
- **Spring:** November 1

Applications are processed as they arrive up to the deadline date.

**APPLY ONLINE to this graduate program.**

**Letters of Reference:**

**Number Required:** 2

**From Whom:** Letters of recommendation should be obtained from evaluators who can provide insight into an applicant’s abilities, talents, and aptitude for graduate study.

**Coursework Required for Admission Consideration:** All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours.

**Bachelor’s Degree in Discipline/Related Discipline:** A degree in Music is expected.
**Statement of Goals:** Include your special interests within the discipline and expectations for the program.

**Standardized Test Scores:**
TOEFL: 75 iBT or 537 PBT minimum

**Audition:** Applicants must successfully pass a voice audition.

**Resume:** Current resume required.

**Transfer Credit:** A student who wishes to transfer credit should speak with her/his academic advisor and obtain a "Request for Transfer of Graduate Credit" form, found in TUportal under the Tools tab within “University Forms.” Transfer credits must be approved by the advisor, the department chair, and the Associate Dean. The maximum number of credits a student may transfer is 6.

**Other:** Due to the large number of applications for admission and the competitive nature of its music programs, the College admits only a portion of its applicants. In addition to the general admissions credentials required of all Temple University graduate applicants, specialized admission criteria (i.e., auditions, portfolios, interviews, recommendations, departmental term papers, and standardized examinations) are very heavily weighted in admission decisions of the Boyer College of Music and Dance. Graduate applicants may be rejected for admission for failing to obtain the required level of proficiency in any one area of the specialized admission criteria regardless of the level of success in meeting the Temple University general admission criteria. In addition to the level of success demonstrated in the above-mentioned criteria, a final admission factor is the College's Optimum Enrollment Policy. This Policy may preclude the admission of any student who meets the minimum requirements.

## Program Requirements

**General Program Requirements:**
*Number of Credits Required Beyond the Baccalaureate: 30*

### Required Courses:

**Total Credit Hours:** 30

**Language Examination:** To complete the degree, students must fulfill a foreign language requirement in French, German, Italian, Spanish, or another language with approval of the chair. This requirement may be fulfilled in any one of three ways:

1. The student successfully completed three terms of a foreign language (one term each of French, German, or Italian) as an undergraduate.
2. The student passes a foreign language examination with the requisite language department.
3. The student completes three terms of a foreign language (one term each of French, German, or Italian). Since language credits are at the undergraduate level, they do not count toward the M.M. degree, but they do fulfill the language requirement.

### Additional Requirements:

All degree requirements are to be earned at Temple University.

**Diagnostic Examinations:**

All entering Master of Music students are required to take Diagnostic Examinations in Harmony, Counterpoint, Aural Skills, and Music History prior to the first term of graduate study. The purpose of these examinations is to ascertain adequate preparation for graduate study in these areas. Examinations in Harmony, Counterpoint, and Aural Skills may be taken once. The examination in Music History may be taken a second time.

Students who are unable to take the examinations at the designated time may do so using the online proctoring service, Examity® (https://examity.com). Students are responsible for all fees.

Students who opt not to take any or all exams prior to the first semester of study are required to complete remedial coursework within the first academic year.

Depending on the examination results, students may be required to take one or more remedial courses. Remedial courses are graded on a "Credit / No Credit" basis, and the official university transcript will indicate "CR" (for "Credit," meaning that the deficiency has been satisfied) or "NC" (for "No Credit," meaning that the deficiency has not been satisfied). Students must have a "B-" or better average in any remedial course or section to earn the grade of "Credit" and to satisfy the requirement. Students who earn a grade of "NC" (that is, having a class average below "B-") must retake that course or section until an average of "B-" or higher is achieved and a grade of "CR" is recorded on the official university transcript. Remedial courses do not count toward graduate degree requirements.

It is highly recommended that students complete all remediation coursework during their first academic year of study. An exception may be granted for part-time students. Master of Music students may neither schedule graduation recitals nor take final comprehensive master's examinations until all of the diagnostic examinations and any required remediation have been successfully completed.

A. **Diagnostic Examinations in Music Theory,** including Harmony, Counterpoint, and Aural Skills

Students may take each portion of the theory test only once. Any section not graded as passing necessitates enrollment in a remedial course(s) during the first term of study. Examiners stipulate which section(s) of remedial coursework are required. Theory remedial courses include:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MUST 5001</td>
<td>Diatonic Harm. Review</td>
<td>1</td>
</tr>
<tr>
<td>MUST 5002</td>
<td>Chromatic Harm. Review</td>
<td>1</td>
</tr>
<tr>
<td>MUST 5003</td>
<td>Counterpoint Review</td>
<td>1</td>
</tr>
</tbody>
</table>
B. Diagnostic Examination in Music History

Students may take each of the five sections of the history test twice. After the second attempt, any section not graded as passing necessitates enrollment in a remedial course(s). Examiners stipulate which section(s) of remedial coursework are required.

The History remedial course is MUST 5005 Remedial Studies in Music History. Each of five sections are enrolled in for one credit and are subtitled according to the period covered in the coursework: Baroque, Classic, Medieval/Renaissance, Romantic, and Twentieth Century. Remediation can be extended over two terms.

C. Conditions for Exemption from Diagnostic Examinations

The requirement to take the Diagnostic Examination in any area is waived only for graduates of the Boyer College of Music and Dance who:

- matriculate and enroll in the term immediately following completion of all undergraduate degree requirements; and
- received grades of "B-" or better in every undergraduate course taken in each individual examination area to be waived.

Culminating Events:

Comprehensive Examination:
Students complete a one-hour comprehensive examination in music literature and music theory. The examination is in three parts:

- identification of specific selections from a list of 100 works,
- identification of a "mystery" selection, and
- score analysis.

Two graduate faculty members grade the examination.

Final Project:
The supervised final project reflects the student’s areas of study, culminating in a unique one-hour public performance, at least half of which must be the candidate’s solo performance. The interdisciplinary nature of the degree affords several project options for the final project performance, including choral conducting, lecture recital, thesis, or vocal recital that could include both classical and contemporary commercial music repertoire.

Graduate Certificate: Professional Studies

Center for the Performing and Cinematic Arts / BOYER COLLEGE OF MUSIC AND DANCE (http://www.temple.edu/boyer)

About the Certificate

The post-master's certificate program in Professional Studies is rooted in the conservatory tradition with a strong emphasis on advanced performance study. It offers a year of comprehensive study and intensive training in major performance areas. Students choose from 12 instruments, including brass, cello, classical guitar, double bass, historical keyboard instruments, opera, percussion, piano, viola, violin, voice, and woodwinds.

Time Limit for Degree Completion: 2 years

Campus Location: Main

Full-Time/Part-Time Status: The certificate program is completed on a full-time basis.

Accreditation: The degree programs of Boyer College of Music and Dance are accredited by the National Association of Schools of Music (NASM).

Areas of Specialization: The Professional Studies post-master’s certificate is offered in the following instruments:

- Brass
- Cello
- Classical Guitar
- Double Bass
- Historical Keyboard Instruments
- Opera
- Percussion
- Piano
- Viola
- Violin
- Voice
- Woodwinds
Job Prospects: The certificate program prepares musicians who are already performing at the post-master's level with specialized preparation for the professional world.

Non-Matriculated Student Policy: Students admitted to the certificate program are classified as non-matriculated graduate students by the University, since the program does not lead to a degree. No portion of the Professional Studies curriculum can be completed by credit transfer from another institution. Additionally, credit earned in Professional Studies cannot be transferred to another Boyer College program.

Admission Requirements and Deadlines

Application Deadline:

Fall and Spring: Admission is on a rolling basis. Interested students should contact music@temple.edu for permission to enroll in coursework.

Coursework Required for Admission Consideration: All applicants must present credentials that are the equivalent of the appropriate Bachelor of Music degree at Temple University, which is based on a curriculum of 124 to 135 hours. To enroll in the post-master's certificate program, candidates must hold the Master of Music degree (or the equivalent) in the field of specialization from an accredited institution.

Master's Degree in Discipline/Related Discipline: A degree in Music is expected.

Bachelor's Degree in Discipline/Related Discipline: A degree in Music is expected.

Admissions:
James Short
Center for the Performing and Cinematic Arts / School of Theater, Film and Media Arts

The School of Theater, Film and Media Arts brings the Department of Theater and the Department of Film and Media Arts under the umbrella of the Center for the Performing and Cinematic Arts.

Theater

Located on the northern edge of the Avenue of the Arts and just moments away from the heart of Philadelphia’s thriving theater community, the Department of Theater has established itself as one of the finest theater training programs in the nation. Many of our alumni are thriving as actors, directors, playwrights, designers, and technicians. They are working artists with credits on stage, television, and film here in Philadelphia; in major entertainment industry centers like New York City and Los Angeles; and professional theater companies all across the country and internationally.

The Professional Training Program in Theater at Temple University, which awards the Master of Fine Arts (M.F.A.), has distinguished itself as one of the foremost theater training and performance institutions in the nation, and as an important contributor to the Philadelphia theater landscape. Our M.F.A. actors, directors, designers, playwrights, and technicians collaborate with professional faculty, staff, and guest artists to train and produce exciting contemporary theater, encompassing a broad range of genres and styles, including classics, new plays, and musicals, for a diverse campus and public audience. Our faculty is comprised of a collaborative team of experienced, celebrated working professionals and distinguished scholars from the theater world, who, as both teachers and mentors, generously share their consummate artistry, seasoned expertise, and great passion for practicing the craft of theater.

Film and Media Arts

The Master of Fine Arts (M.F.A.) program in Film and Media Arts (FMA) is the country’s foremost program in alternative film, video, and new media. FMA is internationally recognized as a center for filmmaking that is socially engaged, activist, diverse, interdisciplinary, and international. With approximately 40 graduate students from diverse communities and countries, the program is large enough to offer intellectual stimulation through a wide range of courses, yet small enough to afford individual attention, maximum access to equipment, and creative control over one’s own projects.

The M.F.A. in FMA is viewed as a creative laboratory for producing works of social significance and artistic merit. We are committed to advancing methods that articulate alternative voices, including those of women; people of color; and others who have been economically, politically, or artistically disenfranchised. We look for students with strong creative ideas, experiences, and critical depth, no matter their background. FMA students come from all over the world, including through programs like Fulbright. Situated in Philadelphia’s thriving arts scene, diverse communities, and institutions, the program additionally offers students wide-ranging opportunities for collaborations and audiences.

The M.F.A. is a terminal degree comparable to a doctoral degree, with the notable exception that the Temple program stresses a creative synthesis of both production and theory, requiring comprehensive exams and a final creative project instead of a dissertation. Students work with faculty who are international leaders in their fields with awards from Fulbright, Guggenheim, Jerome, NEA, NEH, Pew, and Rockefeller as well as major film, art, and publication credits. Through the M.F.A. at FMA, filmmakers, videomakers, screenwriters, and media artists challenge the current practices of Hollywood, commercial television, and global media. With a combination of academic and professional training, the degree qualifies graduates to teach on the university level.

The M.F.A. program at Temple is one of the most recognized graduate programs in the country in terms of national and international film and video awards. Temple graduate students have received nationally competitive:

- University Film and Video Association production grants,
- National Endowment for the Arts media fellowships, and
- Eastman Kodak Scholarships, the nation’s most competitive scholarship in cinematography.

Temple graduate students have also received major recognition at:

- American Film Institute FEST, Ann Arbor Film Festival, Asian American International Film Festival, Chicago International Film Festival, the Dore Schary Awards, New York Film Festival, Philadelphia Film Festival, San Francisco International Film Festival, and Sundance Film Festival, as well as

Major professional recognition for student projects includes:

- Hollywood’s coveted Academy Nicholl Fellowship in Screenwriting,
- Several Oscar nominations, and
- Awards from both the Academy of Motion Picture Arts and Sciences and the Academy of Television Arts and Sciences.

In addition, Temple M.F.A. productions have been picked up for distribution by such prestigious organizations as:

- Coe Film Associates
- Direct Cinema Limited
- Museum of Modern Art
- New Day Films
- Women Make Movies

and for national and international broadcasts in the United States, Asia, Australia, Canada, and Europe.

Learn more about the Doctor of Philosophy in Documentary Arts and Visual Research (https://www.temple.edu/academics/degree-programs/documentary-arts-and-visual-research-phd-ca-davr-phd).

About the Program

The Ph.D. program in Documentary Arts and Visual Research is designed for students who have developed a professional level of technological artistry in sound and image production through the completion of an M.F.A. degree and who want to apply their skills to develop visual research projects or to reflect critically on traditional and digital forms of cinema through scholarship and technological analysis. The Ph.D. program offers M.F.A. graduates the opportunity to use their creative education to take on the intellectual challenge of our technological age: the expression of ideas, once communicated entirely by written means but now through multiple forms of media.

In the Ph.D. program, students explore research questions based in field-based research, critical analysis, and/or history of nonfictional forms in film, media arts, and emerging technologies. The intertwining relationships of theory and practice are at the heart of this interdisciplinary program. Students enter with both a professional mastery production in cinema and media arts or a related field as well
as strong scholarly skills. Thus, they can create groundbreaking work that moves fluidly between creative and critical approaches to images and the stories they tell. Doctoral projects may draw from multiple disciplines and research methods in the arts, humanities, and sciences. The projects may take many forms, such as those of critical, digital, and visual research in the humanities, interactive and emergent forms of writing, and cross-disciplinary visual ethnography.

Learning outcomes include the ability to:

- Apply advanced visualization technologies and creative methods in the pursuit of original scholarly research;
- Expand critical research from both theoretical and applied perspectives;
- Pursue scholarly careers in a vital and emerging technological field; and
- Work with research teams that are engaged in digital scholarship and visualization in such diverse fields as anthropology, geography, and media studies.

Time Limit for Degree Completion: 3 years

Campus Location: Main

Full-Time/Part-Time Status: The degree program is expected to be completed on a full-time basis.

Interdisciplinary Study: The program requires students to take one appropriate interdisciplinary elective from inside or outside of the department.

Ranking: Temple’s Film and Media Arts graduate programs are ranked among the top 10 film/video programs nationally and within the top three programs offered by public institutions.

Areas of Specialization: Dr. Roderick Coover, Program Director, has been a pioneer of visual research, interactive documentary cinema, and visual ethnography since the 1990s. Dr. Paul Swann’s scholarship focuses on documentary film history, the international culture trade, and media in the city. Dr. Nora Alter publishes books and other critical works on essay films, German nonfiction cinema, and other related topics. Dr. Chris Cagle publishes books and essays on documentary theory and practice.

Additionally, many of the program's practice-oriented faculty, including Professors Warren Bass, Peter D’Agostino, Sarah Drury, LeAnn Ericksen, Michael Kuitemeyer, David Parry, Eran Preis, Jeff Rush, and Rea Tajiri, make documentary works or works integrating documentary praxis. Students also have opportunities to work with faculty in related departments both within the Center for the Performing and Cinematic Arts and beyond.

Job Prospects: Graduates are prepared for advanced career opportunities in academia, research-based documentary production, cultural institutions/foundations, research institutions, arts curating, emerging media technologies and industries, and critical writing wherein both interdisciplinary and applied perspectives are invaluable.

Non-Matriculated Student Policy: Coursework is limited to those matriculating in the Ph.D. program.

Financing Opportunities: Contact the department directly for more information.

---

**Admission Requirements and Deadlines**

**Application Deadline:**

*Fall: December 15*

Applications are evaluated together after the deadline has passed. Late applications may be considered for admission.

APPLY ONLINE to this graduate program.

**Letters of Reference:**

*Number Required: 3*

*From Whom: Letters of recommendation should be obtained from college/university faculty familiar with the applicant's academic competency and/or professionals working in film, media arts, and documentary forms, or other closely related fields.*

**Coursework Required for Admission Consideration:** Students who earned their M.F.A. at a university other than Temple should contact the Ph.D. Program Director, Dr. Roderick Coover, at roderick.coover@temple.edu to ensure that their graduate work prepares them for the Ph.D. degree.

**Master's Degree in Discipline/Related Discipline:** All applicants must have earned a Master of Fine Arts degree in film or media arts or be in the final year of their M.F.A. program. The Ph.D. program is designed for students seeking to integrate production and theory who have finished their M.F.A. degree by the end of the summer before the Ph.D. program begins.

**Bachelor's Degree in Discipline/Related Discipline:** All applicants must present credentials that are the equivalent of the appropriate baccalaureate degree at Temple University.

**Applicants educated in China should heed the following information:** Documents certified by the China Academic Degrees and Graduate Education Development Center (CDGDC) (https://www.chinadegrees.cn) or the China Higher Education Student Information and Career Center (CHESICC) (https://www.chsi.com.cn) are required for a full credential evaluation. Photocopies of transcripts, degree certificates, and diploma certificates are not considered official and are not acceptable substitutes for the official documentation. The admissions committee for the Ph.D. program will review your materials to determine your admissions status provided the required documentation is submitted in support of your application.

**Statement of Goals:** In approximately 500 words, describe your primary goals and areas of interest for your doctoral studies, as well as your long-term professional aims and relevant biographical information.

**Standardized Test Scores:**

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master’s degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 100
- IELTS Academic: 7.0
- PTE Academic: 68

**Portfolio:** Applicants must submit a portfolio, which should include film, video, media arts, visual art, creative writing, photography, or other media...
related to their proposed doctoral goals. The applicant's role in each work must be clearly indicated.

**Resume:** Current resume required.

**Writing Sample:** Submission of a scholarly writing sample related to the applicant's doctoral goals is also required.

**Advanced Standing:** The Ph.D. in Documentary Arts and Visual Research program consists of 37 discrete credits taken beyond the M.F.A. degree. At the time of admission, the entire M.F.A. degree serves as advanced standing credits. These credits are not counted toward the 37 required credits of the doctoral degree. However, students may transfer into the doctoral degree up to 6 graduate credits in coursework taken beyond the M.F.A. degree. Typically, this coursework is reviewed after admission to the Ph.D. degree and must be approved by the Film and Media Arts committee.

## Program Requirements

**General Program Requirements:**

1. **Number of Credits Required Beyond the M.F.A.:** 37
2. **Required Courses:**

**Culminating Events:**

1. **Proposal:**
   Students develop their dissertation proposal through individual tutorials and group workshops. The dissertation proposal is due no later than March 30.

2. **Dissertation:**
   Students work with their dissertation advisor to complete the dissertation. Doctoral dissertation projects are to employ the latest visualization technologies.

   Early in the term in which a defense of the dissertation is anticipated, the major advisor notifies the Associate Dean that it is time to appoint the Dissertation Examining Committee (DEC). The DEC consists of the Doctoral Advisory Committee (DAC) plus an "outside" reader, who is an additional graduate faculty member from Temple or another university, but not from the faculty of the student's home department.

   Doctoral candidates must schedule a defense of the dissertation with the Associate Dean at least one month before the requested defense date. The "Announcement of Dissertation Defense" form, found in TUportal under the Tools tab within “University Forms,” must bear all appropriate signatures and be submitted to the Associate Dean.

   Two weeks prior to the oral defense, the student submits individual copies of the abstract and the completed dissertation to the Associate...
Dean and each member of the DEC. The graduate secretary notifies the Graduate School and posts notices of the impending defense on bulletin boards located within the School of Theater, Film and Media Arts. All members of the DEC attend the oral defense and then vote to pass or fail the dissertation and its defense after the conclusion of the public presentation.

Film and Media Arts, M.F.A.

Center for the Performing and Cinematic Arts / SCHOOL OF THEATER, FILM AND MEDIA ARTS (https://tfma.temple.edu)

Learn more about the Master of Fine Arts in Film and Media Arts (https://www.temple.edu/academics/degree-programs/film-and-media-arts-mfa-ca-fma-mfa).

About the Program

The M.F.A. program in Film and Media Arts is designed to prepare socially aware, artistically innovative candidates for professional careers in film, video, or digital media. The program is characterized by an openness to all forms of media expression, with an emphasis on independent film and video arising out of both an artistic and social consciousness, taught under the supervision of recognized scholars and professionals in the field. Special attention is paid to the contemporary documentary, the independent narrative, video art and installation, and emerging forms and technologies.

Time Limit for Degree Completion: 5 years

Campus Location: Main

Full-Time/Part-Time Status: Students complete the degree program through classes offered before 4:30 p.m.

Interdisciplinary Study: Although graduate students in the Film and Media Arts (FMA) program are expected to complete most of their coursework in the FMA Department, they are encouraged to explore relevant courses in other departments.

Affiliation(s): The FMA program is associated with the University Film and Video Association, an international organization of university and industry professionals working in the field of media production.

Study Abroad: FMA courses are offered at Temple’s satellite campuses in Rome, London, and Tokyo where graduate students may choose to complete courses.

Ranking: The M.F.A. in Film and Media Arts is ranked among the top 10 film/video programs nationally and is one of the top three programs offered by public institutions.

Areas of Specialization: Faculty members specialize and offer coursework in:

• Directing
• Media history
• Media studies
• Narrative and non-narrative scriptwriting
• New media
• Producing
• Production
• Post-production

Job Prospects: The FMA graduate program produces media makers who pursue careers in academia and in the communications and production industries. Many graduates choose to work independently, creating original narrative and documentary films and videos or new media projects.

Non-Matriculated Student Policy: Non-matriculated students may take up to 9 credit hours of study within the department at the discretion of individual instructors.

Financing Opportunities: Applicants to the M.F.A. program in Film and Media Arts are eligible and nominated for Teaching Assistantship and Fellowship awards during the application process. Most students accepted into the program receive some form of funding, which can be applied to the full 54-credit program at the rate of up to 13 credits per term. The awards include:

• Four-Term Teaching Assistantship – FMA departmental awards provide 50% tuition support and a stipend for either terms 1-4 or terms 2-5.
• Three-Term Special Achievement Award – FMA departmental Teaching Assistantships provide 100% tuition support and a stipend for the student’s third, fourth, and fifth terms.
Admission Requirements and Deadlines

Application Deadline:

Fall: February 1; December 1 international

Applications are evaluated together after the deadline has passed. Late applications may be considered for admission. To ensure funding consideration, however, applicants must submit an application and all supporting materials by January 4.

APPLY ONLINE to this graduate program.

Letters of Reference:

Number Required: 3

From Whom: Letters of recommendation should be obtained from college/university faculty familiar with the applicant's academic competency and/or professionals in the fields of Communication or Media Production.

Bachelor's Degree in Discipline/Related Discipline: All applicants must present credentials that are the equivalent of the appropriate baccalaureate degree at Temple University.

Applications educated in China should review the information found on the Graduate School website regarding the submission of education documents to Temple University. See https://grad.temple.edu/admissions/international-applicants/before-you-apply. The admissions committee for the Film and Media Arts M.F.A. program will review your materials to determine your admissions status provided the required documentation is submitted in support of your application.

Statement of Goals: Approximately 1,000 to 1,500 words should explain your personal interests, your educational aims, and your professional goals, along with relevant biographical information.

Standardized Test Scores:

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL IBT: 100
- IELTS Academic: 7.0
- PTE Academic: 68

Portfolio: A portfolio is submitted as evidence of creative potential. This usually includes a completed film or videotape accompanied by a cover sheet to explain the applicant's role in the project, including production date, running time, relevant credits, and the conditions and constraints under which it was produced. Other exceptional creative work in writing, art, music, still photography, computer arts, criticism, or research scholarship might be appropriate. Such work also may be used to supplement a film or video exhibit.

Resume: Current resume required.

Transfer Credit: The Film and Media Arts M.F.A. program accepts graduate credits completed in coursework related to the program. Acceptance of transfer credits is determined solely by the FMA committee. The maximum number of credits a student may transfer is 11.

</tr>
</tbody>
</table>

Total Credit Hours 54

1 Within the balance of the course of study for the degree, students choose coursework aligned with their interests. These customized courses must include 1 credit of thesis development with the chair of the student's thesis committee. After completion of the comprehensive examination, the student may also take up to 6 hours of thesis credits with her/his thesis committee chair.

Culminating Events:

Faculty Reviews:

Student work is evaluated by the FMA faculty near the end of the first year in a closed individual session in the First Year Reviews. Each student is asked to present her/his completed work and work in progress, along with an artistic statement that indicates future direction. Students are required to present their work again at the end of the second year in the Second Year Reviews. This is a community-wide event attended by FMA faculty, other M.F.A. students, and undergraduate students. Student participation in the First and Second Year Reviews is mandatory.

Comprehensive Examination:

The intent of the comprehensive examination is to offer the student an opportunity for creative synthesis of information and experience from coursework and beyond. Particularly, it is meant to encourage a strong theoretical, critical, and historical grounding for all creative production work. Each examination is tailored to the student's individual program. However, the questions are not restricted to courses taken by the student but are aimed at incorporating the entire field of study and practice.
The examination questions focus on major aspects of aesthetics, criticism, history, and media theory, and also may include issues of economics, institutions, management, media ethics, law, pedagogy, policy, regulations, social effects, and/or technology.

Typically, students take the comprehensive examination after completing 38 hours of coursework. The M.F.A. candidate forms a committee of three FMA faculty members and works with the committee to design four essay questions or subject areas that collectively represent a comprehensive breadth of study. A date for the exam is determined, and the candidate must complete approximately 10 pages of writing for each question.

The candidate submits a copy of the examination to each committee member. The committee reads the examination within two weeks and meets to evaluate the results. The committee members vote pass/fail on each individual question. Candidates may be asked to orally defend a questionable submission and/or rewrite one or more of the questions.

Final Project:
The student selects a thesis chair and forms a thesis committee comprised of three members. All may be FMA faculty or two may be FMA faculty and one from the outside. The student then proposes an M.F.A. final project. The project is evaluated on the basis of originality and creativity, treatment and style, professional competence, and significance of the work. In most cases, the project takes the form of a complete sound, film, or video production; a feature film script; or a completed work in an alternative media form, including computer-generated media, interactive media, installations, or newly emerging technologies.

The M.F.A. project committee evaluates project proposals individually for rigor, scope, length, and other specific criteria prior to the start of production. The committee then meets regularly with the candidate to provide ongoing critique/feedback. Upon completion of the M.F.A. project, the committee publicizes and holds a public screening of the project.

mediaXarts: Cinema for New Technologies and Environments, M.A.
Center for the Performing and Cinematic Arts / SCHOOL OF THEATER, FILM AND MEDIA ARTS (https://tfma.temple.edu)

About the Program
The one-year, 30-credit master's program in mediaXarts: Cinema for New Technologies and Environments prepares students for professions in the creative design industries, interaction design for public organizations, and emergent cinematic art forms, including interactive cinema, projection design, media installation, user experience design, design for mobile media, net art, and social media. The mediaXarts M.A. program interfaces with the full range of Media Arts B.F.A., M.A., and M.F.A. curricula at Temple University, which are among the leading programs for interdisciplinary, alternative, and emerging media arts. The mediaXarts program trains artists who seek to challenge cinematic and arts conventions through narrative, non-narrative, and hybrid forms, including interactive installation, projection design for performance and architecture, mobile media app design, digital animation, game design, interactive fabrication, and new media studies. The curriculum engages the exciting interdisciplinary contexts of Temple's Center for the Performing and Cinematic Arts and Philadelphia's thriving arts scene.

Time Limit for Degree Completion: 3 years

Campus Location: Main

Full-Time/Part-Time Status: Students complete the degree program through classes offered at convenient times of the day and evening.

Interdisciplinary Study: The degree program allows media artists to:

- Engage in interdisciplinary art practices through collaborations across cinematic fields, theater, fine arts, humanities, the sciences, and visual research within Boyer College of Music and Dance and the School of Theater, Film and Media Arts in the Center for the Performing and Cinematic Arts, Tyler School of Art, and other programs within the University;
- Bridge analog and digital forms, from optical-printing and hand-painted film to projection design, mobile media, interactive cinema, physical computing, analog/digital animation, and installation arts; and
• Develop collaboration skills across the fields of media production, digital media arts, performing arts, and fine arts through curricular programs in the Center for the Performing and Cinematic Arts. With permission, students may also take courses at the Tyler School of Art.

Affiliations: Media artists work with Film and Media Arts faculty, who are leading artists making works for museums, public spaces, interactive cinema, mobile media, gallery installation, performance, projection, and the Web. mediaXarts students also work within Philadelphia’s vibrant art scene and local communities as well as through national and international networks.

Study Abroad: Media artists have opportunities for study-away experiences in Los Angeles, Tokyo, and Venice. Study-away experiences have to be balanced with the degree requirements of the program.

Ranking: Temple’s Film and Media Arts graduate programs are ranked among the top 10 film/video programs nationally and within the top three programs offered by public institutions.

Areas of Specialization: The faculty are international leaders with awards from Fulbright, Guggenheim, NEH, NEA, Pew, and Rockefeller, as well as major film, art, and publication credits. Faculty members specialize and offer coursework in:

• Digital Animation (2D and 3D)
• Digital Ethnography and New Documentary Forms
• Game, App, and Interactive Design
• Installation and Multi-Platform Design
• Media Production and Post-Production
• Physical Computing
• Projection Design for Theater, Performance, and Architecture
• Writing for Media

Job Prospects: Media artists go on to careers across the creative industries, culture, and education. For example, the M.F.A. program in Film and Media Arts has produced more Princess Grace and Eastman Scholar Award winners than any other school in recent decades.

Non-Matriculated Student Policy: Non-matriculated students may take up to 9 credits within the department at the discretion of individual instructors.

Financing Opportunities: Contact the department directly for more information.

Admission Requirements and Deadlines

Musical Theater Collaboration, M.F.A.

Center for the Performing and Cinematic Arts / SCHOOL OF THEATER, FILM AND MEDIA ARTS (https://tfma.temple.edu)

Learn more about the Master of Fine Arts in Musical Theater Collaboration (https://www.temple.edu/academics/degree-programs/musical-theater-collaboration-mfa-ca-mtc-mfa).

About the Program

The George Abbott Master of Fine Arts in Musical Theater Collaboration is designed to prepare candidates for careers in the musical theater industry as collaborating creative team members and as independent artists engaged in the creation of new musical theater works for the commercial and non-profit sectors, as well as educational programs.

The program emphasizes intensive graduate-level craft-based training that includes abundant studio, workshop, and production experience opportunities. Rather than the usual isolated pedagogical separation of the various craft and artistic disciplines within the field, the program places primary emphasis on the inherent collaborative nature of this most integrated of performing art forms.

The innovative degree in Musical Theater Collaboration is the only M.F.A. graduate training program in the nation designed to collectively train, mentor, and develop new composers, lyricists, directors, choreographers, playwrights, and book writers together as a cohort in a comprehensive collaborative program. The broad scope of the program includes a comprehensive overview and history of the field, a deep understanding of the aesthetics of the form, as well as the business side of the industry.

The program seeks to mirror the actual field-based creative process of generating new musical theater works, teaching fundamental craft skills and collaboration skills within a world of access to the necessary mentoring and talent resources vital to the process of creating a new musical.

The three-year curriculum includes:

- A focus primarily on building creative collaboration skills in concert with studies based in students' respective disciplinary areas of emphasis in Year 1.
- A continuation of disciplinary studies and division of the cohort into groups of collaboration teams focused on the creation of new music theater thesis pieces in Year 2.
- Year 3 is the thesis year, with a focus on bringing thesis projects to fruition such that they culminate in a fully realized workshop production. Further, they are presented in New York City in a subsequent industry showcase of excerpts of students' work for the consideration of an invited roster of field and industry professionals.

Time Limit for Degree Completion: 3 years

Campus Location: Main

Full-Time/Part-Time Status: Students complete the degree program as part of a cohort on a full-time basis.

Interdisciplinary Study: The program is interdisciplinary in nature, given that composers and composer/lyricists, directors and director/choreographers, and playwrights and book writers learn and create together.

Accreditation: The Theater Department is accredited by the National Association of Schools of Theatre (NAST).

Areas of Specialization: Within the cohort, students concentrate in one of three areas:

- Composer and Composer/Lyricist (C/CL)
• Director and Director/Choreographer (D/DC)
• Playwright and Book Writer (P/BW)

Job Prospects: The program prepares candidates for careers in the musical theater industry or academy as collaborating creative team members and as independent artists engaged in the creation of new musical theater works.

Non-Matriculated Student Policy: Coursework may not be taken on a non-matriculated basis.

Financing Opportunities: Lab, studio, and classroom teaching opportunities are available for Teaching Assistants. Duties include assisting in grading papers for survey and literature classes. Assistantships carry a stipend and full tuition remission. Academic Internships are also available in production work, including rehearsal and performance of plays for the theater season.

Admission Requirements and Deadlines

Application Deadline:

Fall: March 1, 2021

** APPLICATIONS will next be accepted for FALL 2021 ADMISSION **

Applications are accepted from applicants through the University/Resident Theatre Association (URTA) audition/interview process as well as local auditions in Philadelphia. Auditions are held every three years (e.g., 2021, 2024, 2027). We visit all three sites: New York City, Chicago, and San Francisco. We also recruit through the Stage Directors and Choreographers Society (SDC) and with several prominent musical theater development companies such as the National Alliance for Musical Theatre (NAMT). After candidates have auditioned and been interviewed, those accepted are notified by letter on or before April 15. Late applications may be considered for admission.

APPLY ONLINE to this graduate program.

Letters of Reference:

Number Required: 3

From Whom: Letters of recommendation should be obtained from college/university professors and/or professionals in the field who are familiar with the applicant's work.

Coursework Required for Admission Consideration: Applicants must have completed a bachelor's degree or equivalent and ideally have professional experience in their discipline.

Bachelor’s Degree in Discipline/Related Discipline: All applicants must present credentials that are the equivalent of the baccalaureate degree at Temple University.

Statement of Goals: Introduce yourself in approximately 500 words by relaying your relevant experience, values, and areas of interest. Proper essay form should be used, but it may be in a personal style.

Standardized Test Scores: No standardized test is used for admission to the M.F.A. in Musical Theater Collaboration program.

Interview: Interviews are generally conducted in March and April through URTA, with audition sites in New York, Chicago, and San Francisco, as well as locally on the Temple University campus. Applicants called back for an interview are required to bring transcripts, a headshot, and a resume.

Resume: Current resume required.

Other Requirements:

• Composer and Composer/Lyricist (C/CL): Via Acceptd (https://getacceptd.com), submit samples of creative work, portfolio, reviews, and/or website.
• Director and Director/Choreographer (D/DC): Via Acceptd (https://getacceptd.com), submit a reel of creative work, production photos, reviews, and/or website.
• Playwright and Book Writer (P/BW): Submit a writing sample that is either one full-length manuscript or two one-act scripts.

Program Requirements

General Program Requirements:

Number of Credits Required Beyond the Baccalaureate: 60

Required Courses:

In Year 1, foundation coursework is taken. In Year 2, thesis project teams are formed and collaboration begins. In Year 3, the thesis projects are completed, presented, and showcased for industry.

All students enrolled in a cohort of the Musical Theater Collaboration M.F.A. program take the following core courses together:

1 Students in the Composer and Composer/Lyricist (C/CL) and in the Playwright and Book Writer (P/BW) concentrations take this course together.

2 Students in the Director and Director/Choreographer (D/DC) and in the Playwright and Book Writer (P/BW) concentrations take this course together.

**Culminating Events:**

**Thesis Project:**
The cohort creates a complete new musical culminating in a fully rehearsed workshop production. It is written by M.F.A. candidate composers and composer/lyricists, as well as playwrights and book writers, and directed by M.F.A. candidate directors and director/choreographers.

**Showcase:**
An industry showcase of students' selected work is presented in New York City to an invited roster of industry and field professionals. Funded in part by the George and Joy Abbott Center for Musical Theater at Temple University, the showcase consists of a short concert-style presentation featuring selected performed excerpts from the candidates' body of original work.

Musical Theater Studies, M.A.

Center for the Performing and Cinematic Arts / SCHOOL OF THEATER, FILM AND MEDIA ARTS (https://tfma.temple.edu)

Learn more about the Master of Arts in Musical Theater Studies (https://www.temple.edu/academics/degree-programs/musical-theater-studies-ma-ca-mtst-ma).

About the Program

The Master of Arts in Musical Theater Studies is designed for graduate students to continue their education and practice in the disciplines of acting, music, and dance/movement in preparation for careers in education, performance, production, or direction. The Center for the Performing and Cinematic Arts, comprised of constituent faculty and programs within the Department of Theater in collaboration with sister faculty and programs in the Boyer College of Music and Dance, is ideally suited to offer such a progressive degree opportunity. Both faculties are professionally experienced in Musical Theater as performers, directors, designers, musicians, and administrators, all notable and proven teachers with enviable records of success both professionally and academically.

Historically, students wanting to pursue a graduate musical theater degree in the United States had to choose between a Master of Fine Arts and a Master of Music, given that master’s degree programs in musical theater were rare. Today, Temple University’s M.A. in Musical Theater Studies is the only M.A. in Musical Theater Studies with a curriculum that combines classroom study with practical training in musical theater performance, including acting, directing, choreographing, and educating equally in all areas of musical theater production and performance. The curriculum reflects current institutional trends supporting interdisciplinary study in the performing arts, as well as the efficiency of a 30-hour, one-year program.

Time Limit for Degree Completion: 3 years

Campus Location: Main

Full-Time/Part-Time Status: Students complete the degree program through classes offered at convenient times of the day and evening.

Interdisciplinary Study: By its very nature, the program is interdisciplinary. The curriculum interweaves study in acting, music, and dance.

Accreditation: The Theater Department is accredited by the National Association of Schools of Theatre (NAST).

Job Prospects: The degree serves as a bridge for further specialization in the area of musical theater for students coming from the various genres of music, theater, and dance who want seek more advanced graduate education. Skills acquired in teaching and producing musicals in primary and secondary education could lead to immediate employment. The skills and expertise acquired would also apply to educational positions and outreach programs affiliated with professional theaters.

Non-Matriculated Student Policy: Non-matriculated students may take up to 9 credits within the department at the discretion of individual instructors.

Admission Requirements and Deadlines

Application Deadline: Fall: February 1

Applications are evaluated together after the deadline has passed. Late applications may be considered for admission.

APPLY ONLINE to this graduate program.

Letters of Reference:

Number Required: 3

From Whom: Letters of recommendation should be obtained from college/university faculty familiar with the applicant’s academic competency and/or from professionals in the fields of Theater, Music, or Dance.

Bachelor’s Degree in Discipline/Related Discipline: All applicants must present credentials that are the equivalent of the appropriate baccalaureate degree at Temple University.

Statement of Goals: In approximately 500 words, explain your personal interests, your educational aims, and your professional goals, along with relevant biographical information.

Standardized Test Scores:

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master’s degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 100
- IELTS Academic: 7.0
- PTE Academic: 68

Resume: Current resume required.

Transfer Credit: The M.A. program in Musical Theater Studies accepts graduate credits completed in coursework relevant to the program. Acceptance of transfer credits is determined solely by the Musical Theater committee. The maximum number of credits a student may transfer is 3.

Theater/Acting, M.F.A.

Center for the Performing and Cinematic Arts / SCHOOL OF THEATER, FILM AND MEDIA ARTS (https://tfma.temple.edu)

Learn more about the Master of Fine Arts in Theater/Acting (https://www.temple.edu/academics/degree-programs/theater-acting-mfa-ca-thac-mfa).

About the Program

The M.F.A. program in Theater/Acting provides holistic actor training modeled after the conservatory approach. We are interested in actors with professional resumes who are willing to commit to a three-year regimen of study and performance. A twofold objective guides the graduate Acting program: assist professional actors in breaking through patterns or habits that have been holding back artistic growth; and develop a method for training that enables actors to effectively articulate the process to the student.

Time Limit for Degree Completion: 3 years

Campus Location: Main

Full-Time/Part-Time Status: Students complete the degree program through classes offered before and after 4:30 p.m.

Interdisciplinary Study: Students are able to take some coursework with graduate students in Film and Media Arts and may participate, on a voluntary basis, in independent films directed by graduate and undergraduate directors in Film and Media Arts.

Affiliation(s): Temple theater students have the opportunity to intern with many of the numerous professional theaters in Philadelphia, including the Arden Theatre, the Philadelphia Theatre Company, the Walnut Street Theater, and the Wilma Theater.

Ranking: The Theater Department's M.F.A. program was rated 13th for graduate theater programs in 2012 by U.S. News & World Report.

Accreditation: The Theater Department is accredited by the National Association of Schools of Theatre (NAST).

Areas of Specialization: The actor is offered a well-rounded acting curriculum in addition to pedagogical training in teaching in higher education.

Job Prospects: The program is primarily focused on training working mid-career professionals in the theater industry. Many of our graduates are working in television, film, regional theater, off-Broadway, and Broadway and as instructors and professors in higher education.

Non-Matriculated Student Policy: Coursework may not be taken on a non-matriculated basis.

Financing Opportunities: Lab, studio, and classroom teaching opportunities are available for Teaching Assistants. Duties include
assisting in grading papers for survey and literature classes. Assistantships carry a stipend and full tuition remission. Academic Internships are also available in production work, including rehearsal and performance of plays for the theater season.

Theater/Design, M.F.A.

Center for the Performing and Cinematic Arts / SCHOOL OF THEATER, FILM AND MEDIA ARTS (https://tfma.temple.edu)

About the Program

The Theater/Design M.F.A. program offers a professional training curriculum wherein M.F.A. designers and technicians collaborate with professional faculty, staff, and guest artists to stage exciting contemporary theater for diverse audiences. We are looking for aspiring designers who will pursue the intent of the play wherever it leads them, into any period or style, into any emotion or state of mind, and whose knowledge and skills are so various that they bring a rich theatricality to the worlds they create. The Design program for Theater combines intensive classroom work with full-scale productions to create well-rounded designers and technicians. Our graduates find work in many aspects of theater, including regional theater, educational theater, and the entertainment industry.

Time Limit for Degree Completion: 3 years

Campus Location: Main

Full-Time/Part-Time Status: Students complete the degree program through classes offered before and after 4:30 p.m.

Interdisciplinary Study: Design students are encouraged to explore other fields of study, such as art history, cinematography, and photography, as their fields of study allow.

Affiliation(s): The Theater Department has informal affiliations with Freedom Theatre, The Lighting Practice, and the Philadelphia Theatre Company. With special permission from their advisors, students have the opportunity to intern at these and other professional theaters and production companies in the greater Philadelphia area. The Theater Department is a member of the Association for Theatre in Higher Education (ATHE), National Association of Schools of Theatre (NAST), University/Resident Theatre Association (URTA), and the United States Institute for Theatre Technology (USITT).

Ranking: The Theater Department's M.F.A. program was rated 13th for graduate theater programs in 2012 by U.S. News & World Report.

Accreditation: The Theater Department is accredited by the National Association of Schools of Theatre (NAST).

Areas of Specialization: Each student, in consultation with the faculty, develops her/his own program of study based on individual interests and talent. Full-time faculty members are available for mentoring. Students may specialize in one or more of the following areas:

• Costume Design
• Lighting Design
• Scenic Design

Job Prospects: The program is primarily focused on training students for careers in the theater industry. Graduates of the Theater/Design program find employment in regional theater, higher education, and the entertainment industries.

Non-Matriculated Student Policy: Along with all university approvals, non-matriculated students are required to get written approval by the instructor for each class they wish to take.

Financing Opportunities: Assistantships carry a stipend for working 20 hours per week in the shop of a student's respective design discipline and full-tuition remission. Lab, studio, and classroom teaching opportunities are available.

Admission Requirements and Deadlines

Application Deadline:

Fall: February 1

Applications are processed on a semi-rolling basis throughout the Spring.

APPLY ONLINE to this graduate program.

Letters of Reference:

Number Required: 3

From Whom: Letters of recommendation should be obtained from college/university professors and professionals in the field who are familiar with the applicant's work.

Bachelor's Degree in Discipline/Related Discipline: All applicants must present credentials that are the equivalent of the appropriate baccalaureate degree at Temple University.

Standardized Test Scores:

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

• TOEFL iBT: 79
• IELTS Academic: 6.5
• PTE Academic: 53

Portfolio: A portfolio is required of all applicants. The portfolio should contain examples of work, ranging from design projects, classroom exercises, and fine art to realized designs. The portfolio should include the complete process for at least one show, including script analysis, concept statement, research materials, sketches, renderings, models, appropriate paperwork, and production photography (if applicable).
Interview: An interview is required of all applicants, and a campus visit is highly recommended. An interview can be held on campus or during the University/Resident Theatre Association (URTA) National Unified Interviews in Chicago at the end of January of the preceding academic year. Candidates are not required to interview through the URTA process, but are strongly encouraged to do so. Please see the URTA website, found at http://www.urta.com/, for more information. The deadline for participation in the URTA interview process is the middle of November of the preceding academic year.

Resume: Current resume required.

</table>

Additional Requirements:
As a component of the three-year M.F.A. degree program, all Theater/Design candidates actively participate in design and production work in the Theater Department’s main stage season. This work is an extension of what is presented in the classroom and becomes the experiential component to the degree program. Coursework and production work are equally balanced throughout the academic year, both philosophically and pedagogically.

All Design students must participate in a portfolio review and faculty evaluation at the end of each semester.

Culminating Events:
Thesis:
The master’s thesis is typically a realized and produced production executed by the Theater Department as part of its main stage season. The underlying premise is to create and produce a professional design within a professional production. Along with gathering all research and creating all designs, drafts, renderings, models, and appropriate paperwork for the design, fulfilling a written thesis component completes the degree process. The thesis production and document are defended before a faculty committee and then digitally published through Temple University.

In some cases, where appropriate, a “paper” thesis may be assigned. In this case, the candidate completes all the same research, designs, drafts, renderings, models, and a written document defending the design and the process, but the design will neither be realized nor produced.

Theater/Directing, M.F.A.

Center for the Performing and Cinematic Arts / SCHOOL OF THEATER, FILM AND MEDIA ARTS (https://tfma.temple.edu)

About the Program
The focus of the M.F.A. program in Theater/Directing is to develop the directing student as a visionary creative communicator and artistic leader. Directing students are trained to be fully capable of illuminating a text through the exploration of character in collaboration with the writer, actors, and design/production team and of delivering a compelling and unified theatrical storytelling event to the audience.

Time Limit for Degree Completion: 3 years

Campus Location: Main

Full-Time/Part-Time Status: Full-time study is required.

Interdisciplinary Study: Students can take coursework in film with graduate students in Film and Media Arts.

Affiliation(s): Temple theater students have the opportunity to intern with many of the numerous professional theaters in Philadelphia, including the Arden Theatre Company, the Lantern Theater Company, the Philadelphia Theatre Company, the Prince Music Theater, and The Wilma Theater.

Ranking: The Theater Department's M.F.A. program was rated 13th for graduate theater programs in 2012 by U.S. News & World Report.

Accreditation: The Theater Department is accredited by the National Association of Schools of Theatre (NAST) and is a founding member of the University/Resident Theatre Association (URTA).

Areas of Specialization: The goal of the program is to develop the director as a master "storyteller." Students focus on learning, through the study of craft-based pedagogy, about the director's primary commitment to the illumination of text for an audience through the work of the actor; through design, staging, thematic, and theatrical interpretation; and through artistic/team collaboration and leadership.

Job Prospects: The program is primarily focused on training students for careers in professional theater.

Non-Matriculated Student Policy: Coursework may not be taken on a non-matriculated basis.

Financing Opportunities: Based on the number of assistantships allocated to the program, three-year Teaching Assistantships are awarded to students upon acceptance into the program. The award provides both a stipend and tuition remission (either full or half). Fellowships are occasionally awarded to exceptionally qualified, eligible students.

Admission Requirements and Deadlines
Application Deadline:

Fall: January 15, 2021

* * APPLICATIONS will next be accepted for FALL 2021 ADMISSION * *

The M.F.A. Directing program recruits applicants through the National Unified Auditions and Interviews (NUAIs) conducted by University/Resident Theatre Association (URTA) in New York and Chicago. We currently recruit a minimum of two candidates every three years. The next class will be admitted for Fall 2021. Those interested in our program are strongly encouraged to apply at http://urta.com/ when appropriate. Applications are thoroughly screened, and top candidates are invited to interview at one of the URTA audition sites or at Temple University. After all candidates have been interviewed, those accepted are notified by letter by April 15. Candidates unable to interview as part of the NUAIs should adhere to the criteria listed below.

All candidates must also complete the formal Temple University Graduate School application. APPLY ONLINE to this graduate program.

Letters of Reference:
Number Required: 3

From Whom: Letters of recommendation should be obtained from college/university professors and professionals in the field who are familiar with the applicant's work.

Coursework Required for Admission Consideration: Coursework in Theater, typically completed as part of an undergraduate major in Theater, is required.

Bachelor's Degree in Discipline/Related Discipline: The B.A. in Theater or B.F.A. degree in Acting, Design, or Directing is preferred.

Statement of Goals: Introduce yourself in approximately 500 words by relaying your relevant experience, values, and areas of interest. Proper essay form should be used, but it may be in a personal style.

Standardized Test Scores:
Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 79
- IELTS Academic: 6.5
- PTE Academic: 53

Interview: The applicant meets with appropriate faculty, either through URTA at audition sites in New York and Chicago or on Temple University's Main Campus.

Resume: Current resume required.

Other: In addition to a baccalaureate degree, applicants must have a body of professional or semi-professional experience in Directing.

Additional Requirements:

First Year:
Students direct scenes plus a one-act play in the studio theater and serve as assistant to the director of a main stage show.

Second Year:

Scene work continues. Students also direct two unsupported projects in the studio theater.

Third Year:
Students direct a thesis production. This is a fully supported production that is part of the main stage season. During the alternate term, an opportunity may exist for an internship to assist or direct in one of the professional theaters in the Philadelphia area. This choice requires faculty approval. An additional option is an unsupported project to allow the student to explore personal interest or career objectives in theater.

Practical Application (in addition to coursework):
First Year/Fall Term: Practical focus is on the short scene (5-10 minutes). Three scenes are presented to the department with a focus primarily on contemporary realism.

First Year/Spring Term: Continued practical focus is on directing scenes from acknowledged 20th-century classics.

Second Year/Fall Term: Practical focus is on Shakespeare, culminating in the presentation of a Shakespeare scene project.

Second Year/Spring Term: Practical focus is on scene work from a variety of non-realistic genres and styles, including the study of comedy.

Second Year: Potential opportunity exists to direct a minimally supported full-length production during one of the terms.

Third Year/Fall Term: Practical focus is on new work, including self-created ensemble-based work.

Third Year/Spring Term: Practical focus is on the serial television project as well as musical theater.

Culminating Events:

Thesis:
One fully supported thesis project is produced in the main season during the third year. This is accompanied by a detailed, comprehensive written thesis, which includes an account of the research and script analysis that preceded the rehearsal process, a director's rehearsal log, and the student's evaluation of the production. The student meets with appropriate faculty after the production has closed for discussion and evaluation of both the process and the production. Faculty members look systematically at all aspects of the theater production and evaluate the student in terms of what was attempted and what was achieved. Theatrical concept, unity of design and stylistic approach, the visual and aural components of storytelling, and ensemble work of the actors are evaluated from the point of view of directing, acting, and design.

**Theater/Playwriting, M.F.A.**

Center for the Performing and Cinematic Arts / SCHOOL OF THEATER, FILM AND MEDIA ARTS (https://tfma.temple.edu)

**About the Program**

The Theater/Playwriting M.F.A. program is dedicated to developing the unique voice of each writer and equipping her/him with skills necessary to sustain a life as an artist. Core coursework provides rigorous training with attention to craft in a range of forms. Additional courses emphasize the collaborative nature of theater-making and provide an environment for creating a network of fellow artists from across disciplines. The curriculum is designed to allow writers to explore areas of interest both within the School of Theater, Film and Media Arts, and outside of it, including research in areas such as African American Studies, Anthropology, Art History, Music, or Women's Studies in augmentation of a particular project or idea. Class sizes are small, with individualized instruction as a priority.

Our interest is in training playwrights for artistic success in both current and potential future landscapes. We seek students who are motivated by a desire for passionate self-expression and a sense of social purpose. The program sits within the context of our highly regarded acting, design, and directing programs and the vibrant, diverse theater community of Philadelphia.

**Time Limit for Degree Completion:** 5 years

**Campus Location:** Main, Center City

**Full-Time/Part-Time Status:** Students are required to complete the degree program through classes offered before and after 4:30 p.m.

**Interdisciplinary Study:** Research areas are encouraged. Previous areas of interest have included African American Studies, Anthropology, Film, Mass Media, New Media, and Women's Studies. Permission to enroll in particular courses is determined by the department involved.

**Affiliation(s):** Contacts are maintained with professional theaters with new play programs.

**Study Abroad:** No formal relationships exist, but study abroad programs in the School of Media and Communication are available. London and Dublin programs include theater visits and can include courses or internships.

**Ranking:** The Theater Department's M.F.A. program was rated 13th for graduate theater programs in 2012 by U.S. News & World Report.

**Accreditation:** The Theater Department is accredited by the National Association of Schools of Theatre (NAST).

**Areas of Specialization:** Areas of specialization can be developed through graduate study in any of the research areas. Particularly relevant are courses in film or television writing.

**Job Prospects:** The program is primarily focused on training our students for careers in the theater industry.

**Non-Matriculated Student Policy:** Along with all university approvals, non-matriculated students are required to get written approval by the instructor for each class they wish to take.

**Financing Opportunities:** Assistantships, including tuition remission and a stipend, may be available for exceptional candidates.

**Admission Requirements and Deadlines**

**Application Deadline:**  
*Fall:* January 15  
APPLY ONLINE to this graduate program.

**Letters of Reference:**  
*Number Required:* 3

*From whom:* Letters of recommendation should be obtained from college/university professors and/or professionals in the field who are familiar with their work.

**Coursework Required for Admission Consideration:** Particular coursework is not required, but evidence of playwriting experience and commitment to theater writing are required.

**Bachelor's Degree in Discipline/Related Discipline:** All applicants must present credentials that are the equivalent of the appropriate baccalaureate degree at Temple University.

**Statement of Goals:** Introduce yourself in approximately 500 words by relaying your relevant experience, values, and areas of interest. Proper essay form should be used, but it may be in a personal style.

**Standardized Test Scores:** Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- **TOEFL iBT:** 79
- **IELTS Academic:** 6.5
- **PTE Academic:** 53
Interview: The applicant meets with the Head of Playwriting.

Resume: Current resume required.

Writing Sample: One full-length script or two one-acts are required for admission consideration.

Graduate Certificate: Documentary Arts and Ethnographic Research

Center for the Performing and Cinematic Arts / SCHOOL OF THEATER, FILM AND MEDIA ARTS (https://tfma.temple.edu)

Learn more about the graduate certificate in Documentary Arts and Ethnographic Research (https://www.temple.edu/academics/degree-programs/documentary-arts-and-ethnographic-research-certificate-graduate-ca-daer-grad).

About the Certificate

The graduate certificate in Documentary Arts and Ethnographic Research is a 12-credit interdisciplinary program that involves faculty and courses in the Center of the Arts, the College of Liberal Arts, and the School of Media and Communication. The certificate builds on Temple's strong international reputation in documentary film and visual anthropology. It is ideally suited for students who plan to incorporate visual studies, ethnographic methods, and documentary practices into their artistic and scholarly projects. The certificate program offers students the opportunity to develop marketable applied expertise in practices that bridge the arts, humanities, and social sciences.

The philosophy behind the certificate program is to promote a broad and critical use of diverse media tools in the study and representation of culture(s). Program topics include the theories, methods, aesthetics, and ethics of documentary research and visual representation; the relationships between artistic, humanistic, and scientific visual research methods; the collaborative use of visual media in indigenous, diaspora, and non-Western communities; the critical understanding of the use of new media in documentary contexts, such as mobile media; and the political economy that shapes how images are made, distributed, and used worldwide. Students in the program develop skills to:

- create cultural, cross-cultural, and interdisciplinary documentary projects through film, digital technologies, and representational media;
- integrate visual and cross-cultural materials through innovative uses of technologies;
- incorporate cultural aesthetics, research ethics, cross-cultural research, and the use of documentary arts and media tools in their teaching careers; and
- work on collaborative projects involving multiple countries and contexts that can include scholarly research, international government and nongovernmental research, participation in cross-disciplinary projects on contemporary issues, and media activism.
Time Limit for Certificate Completion: 3 years

Campus Location: Main

Full-Time/Part-Time Status: The graduate certificate can be completed on a part-time basis.

Non-Matriculated Student Policy: The certificate program is open only to students enrolled in M.F.A. and Ph.D. programs at Temple University.

Admission Requirements and Deadlines

Application Deadline:

Fall: February 21
Spring: October 21

Letters of Reference:
Number Required: 1

From Whom: A letter of support must be written by the applicant student's advisor.

Bachelor's Degree in Discipline/Related Discipline: Applicants must hold a baccalaureate degree — and must be currently enrolled in an M.F.A. or Ph.D. program at Temple University.

Statement of Goals: Describe your reasons for pursuing the certificate in Documentary Arts and Ethnographic Research in 250 words.

Interview: Qualifying applicant students are invited for an interview with a member of the Certificate Steering Committee.

Other: Applicant students must provide certification that they are currently enrolled in good standing, maintaining a minimum GPA of 3.5 in their M.F.A. or Ph.D. program at Temple University.

Fox School of Business and Management

Since its establishment in 1918, the Fox School of Business and Management at Temple University has built a distinguished tradition of preparing business leaders, professionals, and entrepreneurs for successful careers. Today, it is the largest, most comprehensive business school in the greater Philadelphia region — and among the largest in the world.

Accredited by the Association to Advance Collegiate Schools of Business (AACSB International), the Fox School offers graduate degree programs on campuses throughout the region and around the world. The Fox School is thoroughly committed to providing student-centered education and professional development relevant to today’s digital, global economy. That commitment is reflected in:

- Integration of technology into the curriculum and classroom.
- Encouragement of entrepreneurship and innovation in business and education.
- The school’s global presence and perspective.
- Strategic alliances with regional and international business communities, particularly within the region’s dominant and growth industries in financial services, healthcare, information technology, pharmaceuticals/biotechnology, and tourism and hospitality.

Supporting and enriching the academic programs are research and outreach institutes and centers, including the Advanta Center for Research in Financial Institutions, Center for Healthcare Research and Management, Center for International Business Education and Research, Innovation and Entrepreneurship Institute, Institute for Business and Information Technology, Institute of Global Management Studies, and Small Business Development Center.

With the construction of Alter Hall, an $80 million, state-of-the-art facility, the Fox School embarked on a new era of learning. More than a space with just classrooms and offices, Alter Hall is where students, faculty, and alumni connect and collaborate. Every design element, every piece of technology, and every decision regarding the building was made with the themes of connection and collaboration in mind.

Mark E. Gershon, Professor, Department of Marketing and Supply Chain Management, Fox School of Business and Management; Ph.D., University of Arizona.

Jing Gong, Assistant Professor, Department of Management Information Systems, Fox School of Business and Management; Ph.D., Carnegie Mellon University.

Elizabeth A. Gordon, Associate Professor, Department of Accounting, Fox School of Business and Management; Ph.D., Columbia University.
Martin Grace, Professor, Department of Risk, Insurance and Healthcare Management, Fox School of Business and Management; Ph.D., University of Florida.

Terry Ann Halbert, Professor, Department of Legal Studies in Business, Fox School of Business and Management; J.D., Rutgers University.

Xu Han, Assistant Professor, Department of Statistical Science, Fox School of Business and Management; Ph.D., University of Pennsylvania.

Crystal M. Harold, Associate Professor, Department of Human Resource Management, Fox School of Business and Management; Ph.D., George Mason University.

Richard M. Heiberger, Professor Emeritus, Department of Statistical Science, Fox School of Business and Management; Ph.D., Harvard University.

Arthur Hochner, Associate Professor Emeritus, Department of Human Resource Management, Fox School of Business and Management; Ph.D., Harvard University.

Samuel D. Hodge Jr., Professor, Department of Legal Studies in Business, Fox School of Business and Management; J.D., Temple University.

Brian C. Holtz, Associate Professor, Department of Human Resource Management, Fox School of Business and Management; Ph.D., George Mason University.

Alan J. Izenman, Professor, Department of Statistical Science, Fox School of Business and Management; Ph.D., University of California Berkeley.

Jaehwuen Jung, Assistant Professor, Department of Management Information Systems, Fox School of Business and Management; Ph.D., University of Minnesota.

Vishesh Karwa, Assistant Professor, Department of Statistical Science, Fox School of Business and Management; Ph.D., The Pennsylvania State University.

You Jin Kim, Assistant Professor, Department of Human Resource Management, Fox School of Business and Management; Ph.D., Michigan State University.

Masaaki (Mike) Kotabe, Professor, Department of Strategic Management, Fox School of Business and Management; Ph.D., Michigan State University.

Jayannathan Krishnan, Professor, Department of Accounting, Fox School of Business and Management; Ph.D., The Ohio State University.

Jayanthi Krishnan, Associate Professor, Department of Accounting, Fox School of Business and Management; Ph.D., The Ohio State University.

Subodha Kumar, Professor, Department of Marketing and Supply Chain Management, Fox School of Business and Management; Ph.D., University of Texas at Dallas.

James M. Lammendola, Assistant Professor (Practice), Department of Legal Studies in Business, Fox School of Business and Management; J.D., University of Tulsa College of Law.

Kuang-Yao Lee, Assistant Professor, Department of Statistical Science, Fox School of Business and Management; Ph.D., The Pennsylvania State University.

Yan Li, Associate Professor, Department of Finance, Fox School of Business and Management; Ph.D., Cornell University.

Xueming Luo, Professor, Department of Marketing and Supply Chain Management, Fox School of Business and Management; Ph.D., Louisiana Tech University.

Munir Y. Mandviwalla, Associate Professor, Department of Management Information Systems, Fox School of Business and Management; Ph.D., Claremont Graduate University.

Connie Xiangdong Mao, Associate Professor, Department of Finance, Fox School of Business and Management; Ph.D., Cornell University.

John A. McClendon, Associate Professor, Department of Human Resource Management, Fox School of Business and Management; Ph.D., University of South Carolina.

Thorsten P. Moenig, Assistant Professor, Department of Risk, Insurance and Healthcare Management, Fox School of Business and Management; Ph.D., Georgia State University.

Maureen (Mimi) Morrin, Professor, Department of Marketing and Supply Chain Management, Fox School of Business and Management; Ph.D., New York University.

Shreeram R. Mudambi, Professor, Department of Strategic Management, Fox School of Business and Management; Ph.D., Cornell University.

Subhadeep Mukhopadhyay, Assistant Professor, Department of Statistical Science, Fox School of Business and Management; Ph.D., Texas A and M University.

Lalitha Naveen, Associate Professor, Department of Finance, Fox School of Business and Management; Ph.D., Arizona State University.

In-Sue Oh, Professor, Department of Human Resource Management, Fox School of Business and Management; Ph.D., University of Iowa.

Min-Seok Pang, Assistant Professor, Department of Management Information Systems, Fox School of Business and Management; Ph.D., University of Michigan.

Arvind Parkhe, Professor, Department of Strategic Management, Fox School of Business and Management; Ph.D., Temple University.

Paul Pavlou, Professor, Department of Management Information Systems, Fox School of Business and Management; Ph.D., University of Southern California.

Eric G. Press, Professor, Department of Accounting, Fox School of Business and Management; Ph.D., University of Oregon.

Shaojun Qin, Assistant Professor, Department of Marketing and Supply Chain Management, Fox School of Business and Management; Ph.D., University of Minnesota.

Crystal Reeck, Assistant Professor, Department of Marketing and Supply Chain Management, Fox School of Business and Management; Ph.D., Duke University.
Accountancy, M.Acc.

FOX SCHOOL OF BUSINESS AND MANAGEMENT (http://www.fox.temple.edu)

About the Program

The Master of Accountancy program is designed for students who seek the CPA designation and a career in either public or private accounting. The M.Acc. curriculum builds on accounting undergraduate work and is focused on advanced-level accounting and related topics. Time to study and sit for the CPA exam is incorporated into the program’s schedule, providing a practical timeline to pass all four parts of the CPA exam during the program. M.Acc. faculty and coaches work with students one-on-one to help identify the career opportunity that is right for each.
individual from among our close-knit recruiting partnerships with Big Four, national, and regional public accounting firms.

**Time Limit for Degree Completion:** 5 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** Full-time study is required.

**Affiliation(s):** Research interests of the Fox School of Business and Management faculty are supported by numerous centers and institutes throughout Temple University.

**Accreditation:** All Fox School of Business and Management graduate programs are accredited by the Association to Advance Collegiate Schools of Business (AACSB International).

**Job Prospects:** Graduates are typically hired by public or private accounting firms. The program has a 96% job placement rate overall, with 50% of graduates placed in Big Four accounting firms.

**Non-Matriculated Student Policy:** Students who would like to pursue a Master of Accountancy degree who were not accounting majors while undergraduates may take six required prerequisite courses as a non-matriculated student, if approved by the Director of the M.Acc. program. The six courses are as follows:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCT 2101</td>
<td>Financial Accounting</td>
<td>3</td>
</tr>
<tr>
<td>ACCT 2521</td>
<td>Cost Accounting</td>
<td>3</td>
</tr>
<tr>
<td>ACCT 3511</td>
<td>Intermediate Accounting I</td>
<td>3</td>
</tr>
<tr>
<td>ACCT 3512</td>
<td>Intermediate Accounting II</td>
<td>3</td>
</tr>
<tr>
<td>ACCT 3531</td>
<td>Federal Taxes on Income</td>
<td>3</td>
</tr>
<tr>
<td>ACCT 3596</td>
<td>Auditing</td>
<td>3</td>
</tr>
</tbody>
</table>

**Financing Opportunities:** Citizens and permanent residents of the United States are considered domestic students and are typically eligible for federal student loans as well as alternative loans through private lenders. The Fox School grants 5% tuition scholarships to alumni who are admitted to the program. The program also offers merit- and need-based scholarships to eligible admitted students. Students are further encouraged to pursue scholarship funds from organizations to which they belong, such as athletic organizations, clubs, employers, ethnic groups, fraternal organizations, religious organizations, rotary clubs, unions, veteran groups, and the like.

**Admission Requirements and Deadlines**

**Application Deadline:**

**Fall:**

- December 15 – Early Decision Deadline
- March 1 – Scholarship Deadline and International Deadline
- June 30 – Final Deadline

Applications are reviewed as they are received and can sometimes be considered after the deadline.

APPLY ONLINE (http://fox.force.com/SiteLogin) to this Fox graduate program at http://fox.force.com/SiteLogin.

**Letters of Reference:**

**Number Required:** 2

**From Whom:** Professional references from an immediate supervisor, current or past, are preferred. Academic references are acceptable.

**Coursework Required for Admission Consideration:** Applicants must have completed the following prerequisite undergraduate accounting courses (or equivalent) with a grade of “B-” or better prior to starting the M.Acc. program: ACCT 2101 Financial Accounting, ACCT 2521 Cost Accounting, ACCT 3511 Intermediate Accounting I, ACCT 3512 Intermediate Accounting II, ACCT 3531 Federal Taxes on Income, and ACCT 3596 Auditing. Applicants may apply to the program while working on satisfying the prerequisite courses. Final acceptance is contingent upon completion of the prerequisites with a “B-” or better in each course.

**Bachelor’s Degree in Discipline/Related Discipline:** A baccalaureate degree is required.

**Statement of Goals:** This essay discusses your professional plans and goals. It should address the following questions:

- What past experiences prepared or motivated you to pursue the M.Acc. degree?
- How would you expect to change over the course of the program?
- What personal and professional values and skills do you hope to acquire beyond the academic content?
- How will obtaining the M.Acc. help you achieve your career goals?

**Standardized Test Scores:**

GMAT/GRE: Required. GMAT or GRE scores are expected to be at or above the 70th percentile.

For applicants whose native language is not English, the TOEFL, IELTS, or PTE Academic exam is required:

- TOEFL: 100 iBT or 600 PBT minimum
- IELTS: 7.5
- PTE Academic: 72 minimum

**Resume:** Current resume required.

**Transfer Credit:** Transfer credit is not accepted.

**Program Requirements**

**General Program Requirements:**

**Number of Credits Required Beyond the Baccalaureate:** 30

**Accounting, M.S.**

FOX SCHOOL OF BUSINESS AND MANAGEMENT (http://www.fox.temple.edu)

**About the Program**

Currently offered as an international partner program and open only to students affiliated with the international partner institution.

**Actuarial Science, M.S.**

FOX SCHOOL OF BUSINESS AND MANAGEMENT (http://www.fox.temple.edu)

**About the Program**

The Fox School of Business and Management has a longstanding tradition of preparing our students with the power to lead within the world of business. Actuaries specialize in the evaluation of insurance and financial risks and distinguish themselves through a combination of analytical skills, business acumen, and professionalism. Temple’s Actuarial Science M.S. program prepares students for a successful career in the field through its rigorous coursework and outstanding opportunities for professional development. Our curriculum covers multiple professional actuarial exams and can be tailored to students’ interests and background. We are recognized as a Center of Actuarial Excellence (CAE) by the Society of Actuaries.

**Time Limit for Degree Completion:** 5 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis.

**Affiliation(s):** Research is supported by Fox School of Business and Management’s Advanta Center for Research in Financial Institutions, Center for Healthcare Research and Management, Innovation and Entrepreneurship Institute, and Institute of Global Management Studies. Research interests of the Fox School faculty are also supported by numerous centers and institutes throughout Temple University.

**Accreditation:** All Fox School of Business and Management graduate programs are accredited by the Association to Advance Collegiate Schools of Business (AACSB International).

**Job Prospects:** Actuaries hold positions of responsibility with consulting firms, government insurance programs, government regulatory organizations, insurance companies, and investment banks.

**Non-Matriculated Student Policy:** Students with an undergraduate GPA of 3.0 or higher may be allowed to take classes under non-matriculated status. Non-matriculated students may take a maximum of 9 credits. Any additional courses require the student to be matriculated in a program.

**Financing Opportunities:** Citizens and permanent residents of the United States are considered domestic students and are typically eligible for federal student loans as well as alternative loans through private lenders. The Fox School grants 5% tuition scholarships to alumni who are admitted to the program. The program also offers merit- and need-based scholarships to eligible admitted students. Business Administration, M.B.A.
FOX SCHOOL OF BUSINESS AND MANAGEMENT (http://www.fox.temple.edu)

About the Program
The Fox School of Business and Management at Temple University has redefined graduate business education through the development of the Fox M.B.A. The program prepares individuals to assume leadership roles in corporations, government, and non-governmental organizations that require business management skills. The hallmarks of the Fox School's commitment to graduating dynamic qualified and skilled students are its focus on four fundamental principles: integrated curriculum, real-world learning, personalized service, and value.

The Fox M.B.A. is available in three options:

• The Global M.B.A. is a full-time, two-year cohort program. It is designed for professionals with at least two years of work experience who seek career mobility and enhancement.
• The Part-Time M.B.A. provides management education to working professionals on a part-time basis. It can be completed on an accelerated basis in two years or as a more flexible option in three to four years. It is designed for working professionals who want to advance within their organization or to change careers.
• The Online M.B.A. is delivered online, with only one week-long opening residency required. Professionals seeking the rigor and respect of a traditional M.B.A. with the flexibility of online learning can complete the program in 20 months.

Time Limit for Degree Completion: 6 years

Campus Location: Center City, Conshohocken, Main, Online

Full-Time/Part-Time Status: The Global M.B.A. is completed on a full-time basis with a cohort. Part-Time M.B.A. students typically take 8 credits or less per academic term, but may accelerate their degree completion by taking 9 credits per term. For the Online M.B.A., classes are delivered one class at a time over a four- to six-week period.

Interdisciplinary Study: Students seeking an M.B.A. in a particular discipline may choose to complete electives from another business academic area.

Affiliation(s): Research is supported by Fox School of Business and Management's Advanta Center for Research in Financial Institutions, Center for Healthcare Research and Management, Innovation and Entrepreneurship Institute, and Institute of Global Management Studies. Research interests of the Fox School faculty are also supported by numerous centers and institutes throughout Temple University.

Accreditation: All Fox School of Business and Management graduate programs are accredited by the Association to Advance Collegiate Schools of Business (AACSB International).

In addition, the Fox School's Health Sector Management concentration within the M.B.A. has been continuously accredited by the Commission on Accreditation of Healthcare Management Education (CAHME) (http://www.cahme.org) since 1970. Fox School is a member of the Association of University Programs in Health Administration (AUPHA) (http://www.aupha.org).

Areas of Specialization: Students work with an academic advisor regarding concentration requirements. Twelve credits of upper-level elective coursework within the discipline are required to complete a concentration. These electives may be combined to complete any one of the concentrations below:

- Business Analytics
- Business Management
- Corporate Compliance, Governance and Regulatory Policy
- Enterprise Risk Management
- Entrepreneurship
- Financial Management
- Health Sector Management
- Human Resource Management
- Information Technology Management (not currently accepting applications)
- Innovation Management
- International Management
- Management Consulting
- Marketing Management
- Sport Business
- Strategic Management
- Supply Chain Management
- Travel and Tourism

Job Prospects: Graduates of the Fox School of Business and Management obtain jobs in a variety of industries, such as computer/information technology, consulting, consumer products and services, energy/utilities, financial services/banking, government, healthcare, industrial products and services, manufacturing, pharmaceuticals, telecommunications, and tourism/transportation.

Non-Matriculated Student Policy: Students with an undergraduate GPA of 3.0 or higher may be allowed to take classes on a non-matriculated basis. Non-matriculated students can take a maximum of 9 credits. Any additional courses require the student to be matriculated in a program. For more information and an application, visit https://www.fox.temple.edu/graduate-certificates/pre-mba-courses/.
Financing Opportunities: The Fox School of Business and Management has a limited number of scholarships for students with high academic grades and test scores. Scholarships are offered at the time of acceptance into the Fox School.

The Fox School has a limited number of graduate externships for assignments in academic and administrative departments. Work assignments are generally administrative in nature and may include word and data processing. An extern provides up to 20 hours of service per week. Students are required to submit applications directly to the department in which they wish to be appointed.

Admission Requirements and Deadlines

Application Deadline:

Full-time Global M.B.A. applicants are admitted Fall term only. Applicants for the Part-Time M.B.A. are admitted in the Fall and Spring terms. Applications for the Online M.B.A. are accepted for the Fall, Spring, and Summer terms.

Global M.B.A. Fall Admission Only:

• December 15 – Early Decision Deadline
• March 1 – Scholarship Deadline and International Deadline
• June 30 – Final Deadline

Part-Time M.B.A. Fall Admission:

• December 15 – Early Decision Deadline
• March 1 – Scholarship Deadline and International Deadline
• June 30 – Final Deadline

Part-Time M.B.A. Spring Admission:

• June 30 – Scholarship Deadline and International Deadline
• November 1 – Final Deadline

Online M.B.A. Fall Admission:

• December 15 – Early Decision Deadline
• March 1 – Scholarship Deadline and International Deadline
• June 30 – Final Deadline

Online M.B.A. Spring Admission:

• June 30 – Scholarship Deadline and International Deadline
• November 1 – Final Deadline

Online M.B.A. Summer Admission:

• February 15 – Scholarship Deadline
• March 31 – Final Deadline

Applications are reviewed as they are received and can sometimes be considered after the deadline. International students who miss the March 1 deadline for the Global M.B.A. are required to submit to Temple University an evaluation of their transcript(s) by an approved educational evaluation firm.

Apply Online (http://fox.force.com/SiteLogin) to this Fox graduate program at http://fox.force.com/SiteLogin.

Letters of Reference:

Number Required: 2
From Whom: Professional references from an immediate supervisor, current or past, are preferred. Academic references are acceptable.

Coursework Required for Admission Consideration: No specific courses are required for admission, but two years of work experience are highly recommended.

Bachelor’s Degree in Discipline/Related Discipline: A baccalaureate degree, not necessarily in a business discipline, is required.

Statement of Goals: Two essays are required, one each on:

• Leadership: Please describe an incident from your personal experiences that typifies your definition of leadership. Specifically address ethics, diversity, collaboration, and motivation.
• Goals: Describe how you would expect to change over the course of the program. What personal and professional values and skills do you hope to acquire beyond academic content? How will obtaining the degree help you achieve your career goals?

Standardized Test Scores:

GMAT: Required. Applicants to the M.B.A. program should ideally have attained a total GMAT score of 600 or higher. Applicants with GMAT scores below 550 are encouraged to retake the examination. Note that GRE scores are also accepted. Candidates interested in a standardized test score waiver should work directly with the Fox School’s admissions team.

TOEFL: 100 iBT, with a score of at least 25 in the Speak section, or 600 PBT minimum

Resume: Current resume required.

Transfer Credit: Upper-level graduate credits from an AACSB-accredited graduate business program, but not previously applied to a conferred degree, may be transferred into the M.B.A. program. The credits must be part of the required degree program at Temple University. To be transferred, the grade must be a “B” or better. Admitted students may request a waiver application at the time of admission. Waiver requests are reviewed as they are received by the Waiver Committee. The maximum number of credits a student may transfer is 9.

Program Requirements

General Program Requirements:

Number of Credits Required Beyond the Baccalaureate: 54 for the Global M.B.A. and 48 for the Part-Time and Online M.B.A.s

Required Courses:

The core course requirements for each of the three delivery options for the M.B.A. are delineated in the course grids below:

Global M.B.A.

Business Elective(s) 3

Total Credit Hours 12

1 5000-level business courses that are not required core M.B.A. coursework may be selected as business electives. Students may choose elective courses from the following disciplines: Accounting (ACCT), Business Administration (BA), Finance (FIN), Healthcare Management (HCM), Human Resource Management (HRM), International Business Administration (IB), Legal Studies (LGLS), Management Information Systems (MIS), Management Science/Operations Management (MSOM), Marketing (MKTG), Risk Management and Insurance (RMI), Strategic Management (SGM), and Supply Chain Management (SCM). Business electives from outside the Fox School must be preapproved by the student’s program director.

Internship: A summer internship or equivalent summer experience is required for full-time Global M.B.A. students. No internship is required for Part-Time or Online M.B.A. students.

Additional Requirements:

For Global, Part-Time, and Online M.B.A. Students:
Candidates in the Global, Part-Time, and Online M.B.A. programs are required to complete two quantitative exams as part of the program.

Before being registered for first-semester courses, students must complete a baseline quantitative exam. The baseline exam is an assessment to evaluate a student’s knowledge of core business concepts in Accounting, Finance, and Statistics prior to taking any M.B.A. coursework. The score is not counted toward a grade in any class and, therefore, is not factored into a student’s GPA.

Upon completion of all core coursework but prior to being registered for the capstone course, students are required to take a comprehensive M.B.A. quantitative exam again, similar to the baseline exam. This pre-capstone (end of program) exam is used to ensure that a student’s quantitative skills are ready for the Enterprise Management Consulting capstone. Students must pass the exam with a score of 70% for capstone registration. Multiple attempts to pass the comprehensive end-of-program quantitative exam are permitted, and remedial problems will be available for practice. The exam is an open-book, open-note exam that is timed and proctored. It is not counted toward a grade in any class and, therefore, is not factored into a student’s GPA.

For Full-time Global M.B.A. Students:
MBA Essentials is a required month-long program for all full-time Global M.B.A. students and is completed before their first Fall term. Beginning in early August, the program includes the coursework, leadership and team-building activities, fundamental business-topic refresher workshops, and other special events. Participation is mandatory for all matriculating full-time students.

Full-time Global M.B.A. candidates are required to fully participate in all co-curricular requirements, speaker series, and special events.

For Part-Time and Online M.B.A. Students:
Part-Time M.B.A. candidates and Online M.B.A. candidates are required to complete three academic professional development and three influential communication workshops. Workshops are delivered through a variety of modalities to meet the demands of the busy working professional. Workshops change each academic term based on market and employer demands. Examples of academic workshops include, but are not limited to, “Big Data,” “Data Visualization,” “Design Inquiry,” and “Making the Most of Infographics.” Examples of professional development workshops include, but are not limited to, “Communicating to the Point,” “Creating and Delivering High-Impact Presentations,” “Great on the Job,” “Lunch/Coffee with Leaders,” and “Personal Branding.” Program administration tracks student completion as students are not be permitted to register for their capstone course unless all professional development requirements have been met.

For Online M.B.A. Students:
Online M.B.A. candidates are required to participate in a one-week on-campus residency. Residency includes networking, professional development, and the first course of the program.

For Students in the Health Sector Management concentration:
For the Health Sector Management concentration only, Management Grand Rounds (MGRs) are required. MGRs allows graduate students in healthcare management to observe both healthcare administrators and clinicians in the healthcare environment. The hosting institution, in collaboration with the faculty, usually sets an agenda for the visit. MGR sites are selected to represent the breadth and depth of healthcare providers, payers, suppliers, and consultants. The MGR constitutes an excellent opportunity to develop leadership skills related to relationship building/network development communication, information seeking/management, and personal self-development.

Business Administration/
Accounting, Ph.D.

FOX SCHOOL OF BUSINESS AND MANAGEMENT (http://www.fox.temple.edu)

About the Program

The Ph.D. in Business Administration program, with a concentration in Accounting, prepares individuals for advanced research and scholarship. The primary emphasis of the program is to prepare future faculty members for successful academic careers, although many of our alumni are employed in government, industry, and consulting.

Time Limit for Degree Completion: 7 years

Campus Location: Main

Full-Time/Part-Time Status: Students complete the degree program through classes offered before 4:30 p.m.

Accreditation: All Fox School of Business and Management graduate programs are accredited by the Association to Advance Collegiate Schools of Business (AACSB International).

Job Prospects: The program is primarily dedicated to producing well-trained researchers who will work in academic positions.

Non-Matriculated Student Policy: Non-matriculated students are not permitted to take doctoral courses.

Financing Opportunities: Typically, all Ph.D. students receive financial assistantship in the form of full tuition remission and a stipend in return for offering services as a Research Assistant (RA) or Teaching Assistant (TA). Level of support is based on the concentration, the applicant’s qualifications, and competitive considerations. Students can also receive remuneration for conference travel, publications, and academic achievement.

Admission Requirements and Deadlines

Application Deadline:

Fall: December 15 for Fellowship consideration, rolling thereafter

APPLY ONLINE (http://fox.force.com/SiteLogin) to this Fox graduate program at http://fox.force.com/SiteLogin.

Letters of Reference:

Number Required: 2

From Whom: Letters of recommendation should be obtained from evaluators, typically college/university faculty or an immediate work supervisor, who can provide insight into your abilities and talents, as well as comment on your aptitude for graduate study.

Bachelor’s Degree in Discipline/Related Discipline: All applicants must present credentials that are the equivalent of the appropriate baccalaureate degree at Temple University.

Statement of Goals: Approximately 500 to 1,000 words include your specific interest in Temple’s program; your research goals; your future career goals; and your academic and research achievements.

Standardized Test Scores:

GMAT/GRE: Required. GMAT scores are preferred; in some cases, GRE scores may be substituted. In general, scores above the 90th percentile are expected on each portion of the exam.

TOEFL: 100 iBT or 600 PBT minimum

Resume: Current resume required.

Program Requirements

General Program Requirements:

Number of Credits Required to Earn the Degree: 54

Culminating Events: A committed student can complete a Ph.D. in Accounting in five years:

- Complete coursework in Accounting, Economics, Finance, and Statistics in the first two and a half years.
- Take the competency exam in Economics and Statistics at the end of the first year.
- Present two research papers, typically in collaboration with one or more faculty, in the second and third years, later extending research presentations to national and international conferences.
- Take the Accounting Ph.D. comprehensive exam at the end of the third year.
- Work on dissertation; revise and submit research papers to journals; and develop teaching skills during the fourth and fifth years.

The Finance Ph.D. program is a specialization within the Ph.D. program in Business Administration. The Finance program prepares students for careers in teaching and research.

Time Limit for Degree Completion: 7 years
Campus Location: Main

Full-Time/Part-Time Status: Students complete the degree program through classes offered before 4:30 p.m.

Affiliation(s): Research is supported by Fox School of Business and Management's Advanta Center for Research in Financial Institutions, Center for Healthcare Research and Management, Innovation and Entrepreneurship Institute, and Institute of Global Management Studies.

Research interests of the Fox School faculty are also supported by numerous centers and institutes throughout Temple University.

Accreditation: All Fox School of Business and Management graduate programs are accredited by the Association to Advance Collegiate Schools of Business (AACSB International).

Job Prospects: The program is primarily dedicated to producing well-trained researchers who will work in academic positions.

Licensure: The program prepares graduates for licensure in the field of finance.

Non-Matriculated Student Policy: Non-matriculated students are not permitted to take doctoral courses.

Financing Opportunities: Typically, all Ph.D. students receive financial assistantship in the form of full tuition remission and a stipend in return for offering services as a Research Assistant (RA) or Teaching Assistant (TA). Level of support is based on the concentration, the applicant's qualifications, and competitive considerations. Students can also receive remuneration for conference travel, publications, and academic achievement.

Admission Requirements and Deadlines
Application Deadline:
Fall: December 15 for Fellowship consideration, rolling thereafter
APPLY ONLINE (http://fox.force.com/SiteLogin) to this Fox graduate program at http://fox.force.com/SiteLogin.

Letters of Reference:
Number Required: 2
From Whom: Letters of recommendation should be obtained from evaluators, typically college/university faculty or an immediate work supervisor, who can provide insight into your abilities and talents, as well as comment on your aptitude for graduate study.

Coursework Required for Admission Consideration: A year of college-level calculus is a prerequisite for the Ph.D. program in Finance.

Master's Degree in Discipline/Related Discipline: A degree in business, economics, or a related area is expected. An alternative is an equivalent research and teaching background.

Bachelor's Degree in Discipline/Related Discipline: All applicants must present credentials that are the equivalent of the appropriate baccalaureate degree at Temple University.

Statement of Goals: Approximately 500 to 1,000 words include your specific interest in Temple's program; your research goals; your future career goals; and your academic and research achievements.

Standardized Test Scores:
GMAT/GRE: Required. GMAT scores are preferred; in some cases, GRE scores may be substituted. In general, scores above the 90th percentile are expected on each portion of the exam.

TOEFL: 100 iBT or 600 PBT minimum
Resume: Current resume required.

Additional Requirements:
Statistics Competency Examination:
An assessment of proficiency in statistical theory and methodology is made at the end of the first year in the program. Students who fail the Statistics competency exam on the first attempt must sit for reexamination prior to the Fall term of their second year. A second failure results in dismissal from the program. No third attempt is permitted.

Culminating Events:
Research Paper and Presentation Requirements:
Ph.D. students in Finance are required to complete a first-year research proposal by the end of September in the second year. They must also complete a research paper in their second year. The deadline for presentation of papers at the Finance Department’s internal seminar is Fall of the third year. After each presentation, a committee of Finance faculty evaluate whether the student has completed the paper and presentation requirement with satisfaction.

Comprehensive Examination:
Ph.D. students in Finance are required to pass a comprehensive exam in February of the third year. The exam is designed to test whether the student has a comprehensive and integrative understanding of the theories, methodologies, and empirical findings in the field of finance. It primarily focuses on the knowledge gained in the concentration seminars and theory courses, although other pertinent materials may also be included in the comprehensive exam.

Culminating Events: Students are expected to complete formal coursework within four academic terms. They then spend the remainder of the program working toward the successful completion of:

- A research paper that is presented at a national or regional conference by the end of the fifth term in the program
- A preliminary examination in Statistics
- A comprehensive paper requirement
- An oral dissertation proposal defense
- A final dissertation defense

About the Program

Businesses in today’s globally competitive and rapidly changing technological environment are increasingly resorting to multidisciplinary approaches to problem solving. The Fox School of Business and Management is leading a growing trend in business schools toward interdisciplinary research with its Interdisciplinary Study (IDS) concentration within Business Administration. Outstanding students seeking in-depth preparation spanning multiple functional areas of business or who have expectations for breadth beyond the established programs of study may be interested in the IDS concentration. The faculty members within the IDS program are internationally recognized as stemming from multiple backgrounds in Accounting, Finance, International Business, Information Systems, Marketing, Neuroscience, Statistics, and Strategic Management.

Because students in the IDS concentration orient themselves between departments, student identification of a primary mentor is of paramount importance. The mentor’s role is to ensure desirable student development as measured by paper presentations at top conferences, publication in relevant academic journals, and, ultimately, placement in research universities. Students from the IDS concentration typically seek mentorship from the most prestigious researchers in the Fox School, and, accordingly, are typically of the highest caliber among our accepted applicant pool.

Time Limit for Degree Completion: 7 years

Campus Location: Main

Full-Time/Part-Time Status: Students complete the degree program through classes offered before 4:30 p.m.

Accreditation: All Fox School of Business and Management graduate programs are accredited by the Association to Advance Collegiate Schools of Business (AACSB International).

Areas of Specialization: Two specializations are offered: Behavioral and Quantitative.

Job Prospects: The program is primarily dedicated to producing well-trained researchers who will work in academic positions.

Non-Matriculated Student Policy: Non-matriculated students are not permitted to take doctoral courses.

Financing Opportunities: Assistantships are the centerpiece of the program’s mentorship philosophy. An assistantship requires 20 hours of service per week, which can include teaching and supervised research. A stipend and tuition remission are provided.

Admission Requirements and Deadlines

Application Deadline:

Fall: January 15

Applications for the Ph.D. program are all processed together after the deadline.

Total Credit Hours 54

Culminating Events:

Preliminary Examination:

The purpose of the preliminary examination is to demonstrate critical and interpretive knowledge of current research. The subject areas are determined, in advance, by the faculty of the department. The preliminary exam should be completed no more than one term after the student
completes the coursework component of the program. Students who are preparing to write their preliminary examinations should confirm a time and date with their departmental advisor.

The members of the student's department write the questions for the preliminary exam. The student must answer every question on the examination in order to be evaluated by the Department Committee. The evaluators look for a breadth and depth of understanding of specific research areas; a critical application of that knowledge to specific phenomena; and an ability to write technical prose. Each member votes to pass or fail the student. In order to pass, a majority of the committee members must agree that the exam has been satisfactorily completed.

Proposal:
The dissertation proposal demonstrates the student's knowledge of and ability to conduct the proposed research. The proposal should consist of the following:

1. the context and background surrounding a particular research problem;
2. an exhaustive survey and review of literature related to the problem; and
3. a detailed methodological plan for investigating the problem.

The proposal should be completed and approved no more than one year after completing coursework. Upon approval, a timeline for completing the investigation and writing process is established.

Dissertation:
The doctoral dissertation is an original empirical study that makes a significant contribution to the field. It should expand the existing knowledge and demonstrate the student's knowledge of both research methods and a mastery of her/his primary area of interest. Dissertations should be rigorously investigated; uphold the ethics and standard of the field; demonstrate an understanding of the relationship between the primary area of interest and the broader field of business; and be prepared for publication in an academic journal.

The Doctoral Advisory Committee is formed to oversee the student's doctoral research and is comprised of at least three Graduate Faculty members. Two members, including the Chair, must be from the student's department. The Chair is responsible for overseeing and guiding the student's progress, coordinating the responses of the committee members, and informing the student of her/his academic progress.

The Dissertation Examining Committee evaluates the student's dissertation and oral defense, including the student's ability to express verbally her/his research question, methodological approach, primary findings, and implications. The Dissertation Examining Committee votes to pass or fail the dissertation and the defense at the conclusion of the public presentation. This committee is comprised of the Doctoral Advisory Committee and at least one additional faculty member from outside the department.

If any member decides to withdraw from the committee, the student shall notify the Chair of the Dissertation Examining Committee and the Ph.D./BA Program Director. The student is responsible for finding a replacement, in consultation with the Chair. Inability to find a replacement shall constitute evidence that the student is unable to complete the dissertation. In such a case, the student may petition the Ph.D./BA Program Director for a review. Once review of the facts and circumstances is completed, the Director will rule on the student's progress. If the Director rules that the student is not capable of completing the dissertation, s/he will be dismissed from the program. This decision may be appealed to the Senior Associate Dean. If dismissed, the student may appeal to the Graduate School.

Students who are preparing to defend their dissertation should confirm a time and date with their Dissertation Examining Committee and register with the Graduate Secretary at least 15 days before the defense is to be scheduled. The Graduate Secretary arranges the time, date, and room within two working days, and forwards to the student the appropriate forms. After the Graduate Secretary has arranged the time, date, and room for the defense, the student must send to the Graduate School a completed "Announcement of Dissertation Defense" form, found in TUPortal under the Tools tab within "University Forms," at least 10 days before the defense. The department posts flyers announcing the defense, and the Graduate School announces the defense on its website.

Business Administration/Management Information Systems, Ph.D.

FOX SCHOOL OF BUSINESS AND MANAGEMENT (http://www.fox.temple.edu)

About the Program

The Ph.D. in Business Administration program, with a concentration in Management Information Systems (MIS), prepares the student for advanced research and scholarship. The primary emphasis of our program is to prepare future faculty members for successful academic careers, although many of our alumni are employed in government, industry, and consulting.

Time Limit for Degree Completion: 7 years

Campus Location: Main

Full-Time/Part-Time Status: Students complete the degree program through classes offered before 4:30 p.m.

Accreditation: All Fox School of Business and Management graduate programs are accredited by the Association to Advance Collegiate Schools of Business (AACSB International).

Areas of Specialization: The primary focus of the MIS faculty is on research in the following areas of E-Business and E-Commerce:

- Computer Support of Communication, Collaboration, and Group Learning
- Data Warehousing and Visualization
- Innovation and Diffusion and Electronic Scholarship
- IS Development and Use
- IS Strategy, Planning, and Sourcing
- Theoretical and Methodological Foundations of IS Research
- Virtual Communities and Knowledge Management

Job Prospects: The program prepares individuals for academic and corporate research careers.

Non-Matriculated Student Policy: Non-matriculated students are not permitted to take doctoral courses.

Financing Opportunities: Typically, all Ph.D. students receive financial assistantship in the form of full tuition remission and a stipend in return for offering services as a Research Assistant (RA) or Teaching Assistant (TA). Level of support is based on the concentration, the applicant’s qualifications, and competitive considerations. Students can also receive remuneration for conference travel, publications, and academic achievement.

Admission Requirements and Deadlines

Letters of Reference:
Number Required: 2

From Whom: Letters of recommendation should be obtained from college/university faculty members familiar with the applicant's academic competence.

Master’s Degree in Discipline/Related Discipline: A master's degree in Management Information Systems or Computer Science is required. An alternative is the completion of specific prerequisite courses.

Bachelor’s Degree in Discipline/Related Discipline: All applicants must present credentials that are the equivalent of the appropriate baccalaureate degree at Temple University.
Statement of Goals: Approximately 500 to 1,000 words include your specific interest in Temple’s program; your reasons and motivation for applying for a Ph.D. program in Business Administration; your future career goals; and your academic and research achievements.

Standardized Test Scores:
GMAT/GRE: Required. In general, scores above the 90th percentile are expected on each portion of the exam.

TOEFL: 100 iBT or 600 PBT minimum

Resume: Current resume required.

Total Credit Hours 54

1 Among the recommended electives are BA 9001 Organizations and Management Theory, BA 9104 Game Theory, and BA 9205 Information Economics.

Culminating Events: Students are expected to complete formal coursework within four academic terms. Additional benchmarks include:

• Take the qualifying exam in Statistics after the first year.
• Prepare the first-year research proposal by the end of the first-year’s Summer term.
• Complete the second-year paper requirement by the end of the second year’s Summer term.

• Take the MIS preliminary exam by the end of the second year's Summer term. The purpose of the exam is to demonstrate critical and interpretive knowledge of current research in subject areas determined, in advance, by department faculty.

• Write and defend the dissertation proposal, which demonstrates the student’s knowledge of and ability to conduct the proposed research. The proposal should consist of:
  a. the context and background surrounding a particular research problem;
  b. an exhaustive survey and review of literature related to the problem; and
  c. a detailed methodological plan for investigating the problem.

• Write and defend the final dissertation, which is an original empirical study that makes a significant contribution to the field. It should expand the existing knowledge and demonstrate the student’s knowledge of both research methods and a mastery of her/his primary area of interest. Dissertations should:
  a. be rigorously investigated;
  b. uphold the ethics and standard of the field;
  c. demonstrate an understanding of the relationship between the primary area of interest and the broader field of business; and
  d. be prepared for publication in an academic journal.

Business Administration/Marketing, Ph.D.

FOX SCHOOL OF BUSINESS AND MANAGEMENT (http://www.fox.temple.edu)
About the Program

The Ph.D. in Business Administration program, with a concentration in Marketing, prepares individuals for advanced research and scholarship. The primary emphasis of the program is to prepare future faculty members for successful academic careers, although many of our alumni are employed in government, industry, and consulting.

Time Limit for Degree Completion: 7 years

Campus Location: Main

Full-Time/Part-Time Status: Students complete the degree program through classes offered before 4:30 p.m.

Accreditation: All Fox School of Business and Management graduate programs are accredited by the Association to Advance Collegiate Schools of Business (AACSB International).

Job Prospects: The program is primarily dedicated to producing well-trained researchers who will work in academic positions.

Non-Matriculated Student Policy: Non-matriculated students are not permitted to take doctoral courses.

Financing Opportunities: Typically, all Ph.D. students receive financial assistantship in the form of full tuition remission and a stipend in return for offering services as a Research Assistant (RA) or Teaching Assistant (TA). Level of support is based on the concentration, the applicant's qualifications, and competitive considerations. Students can also receive remuneration for conference travel, publications, and academic achievement.

Admission Requirements and Deadlines

Application Deadline:

Fall: January 15

Applications for the Ph.D. program are all processed together after the deadline.

APPLY ONLINE (http://fox.force.com/SiteLogin) to this Fox graduate program at http://fox.force.com/SiteLogin.

Letters of Reference:

Number Required: 2

From Whom: Letters of recommendation should be obtained from evaluators, typically college/university faculty or an immediate work supervisor, who can provide insight into your abilities and talents, as well as comment on your aptitude for graduate study.

Bachelor's Degree in Discipline/Related Discipline: All applicants must present credentials that are the equivalent of the appropriate baccalaureate degree at Temple University.

Statement of Goals: Approximately 500 to 1,000 words include your specific interest in Temple's program; your research goals; your future career goals; and your academic and research achievements.

Standardized Test Scores:

GMAT/GRE: Required. GMAT scores are preferred; in some cases, GRE scores may be substituted. In general, scores above the 90th percentile are expected on each portion of the exam.

TOEFL: 105 iBT or 620 PBT minimum

Resume: Current resume required.

Additional Requirements:

A screening examination is required after completion of the first year of coursework. In addition, two research papers are required:

- The first research paper is written at the end of the first year of study. The objective is to demonstrate progress in developing research capabilities. The student is expected to show initiative in proposing a research idea and developing a research approach. In May, students present a preliminary version of the paper; receive faculty feedback; and then formally submit and present the paper in the Fall term of the second year.
- The second research paper is prepared following completion of the second year of study. The objective is to demonstrate research capability. This paper may be based on the first-year research paper and includes:
  
  a. research motivation,
  b. literature review,
  c. conceptual model with research hypotheses,
  d. description of methodology, including operationalization of variables and research design,
  e. analysis,
  f. discussion of results, and
  g. specific contributions and implications for theory and practice.

In May of the second year, students present a preliminary version of the research paper; receive faculty feedback; and then formally submit and present the paper at the beginning of the Fall term of the third year. The second-year research paper, which should be publishable in a high-quality academic journal, must be successfully passed before the student can take the comprehensive exam.

Culminating Events:
Comprehensive Examination:

The purpose of the comprehensive examination is to demonstrate critical and interpretive knowledge of current research. The subject areas are determined, in advance, by the faculty of the department. The comprehensive exam should be completed no more than one term after the student completes the coursework component of the program. Students who are preparing to write their comprehensive examination should confirm a time and date with their departmental advisor.

The members of the student's department write the questions for the comprehensive exam. The student must answer every question on the examination in order to be evaluated by the Department Committee. The evaluators look for a breadth and depth of understanding of specific research areas; a critical application of that knowledge to specific phenomena; and an ability to write technical prose. Each member votes to pass or fail the student. In order to pass, a majority of the committee members must agree that the exam has been satisfactorily completed.

Proposal:
The dissertation proposal demonstrates the student’s knowledge of and ability to conduct the proposed research. The proposal should consist of the following:

1. the context and background surrounding a particular research problem;
2. an exhaustive survey and review of literature related to the problem; and
3. a detailed methodological plan for investigating the problem.

The proposal should be completed and approved no more than one year after completing coursework. Upon approval, a timeline for completing the investigation and writing process is established.

Dissertation:
The doctoral dissertation is an original empirical study that makes a significant contribution to the field. It should expand the existing knowledge and demonstrate the student’s knowledge of both research methods and a mastery of her/his primary area of interest. Dissertations should be rigorously investigated; uphold the ethics and standard of the field; demonstrate an understanding of the relationship between the primary area of interest and the broader field of business; and be prepared for publication in an academic journal.

The Doctoral Advisory Committee is formed to oversee the student's doctoral research and is comprised of at least three Graduate Faculty members. Two members, including the Chair, must be from the student's department. The Chair is responsible for overseeing and guiding the student's progress, coordinating the responses of the committee members, and informing the student of her/his academic progress.

The Dissertation Examining Committee evaluates the student's dissertation and oral defense, including the student's ability to express verbally her/his research question, methodological approach, primary findings, and implications. The Dissertation Examining Committee votes to pass or fail the dissertation and the defense at the conclusion of the public presentation. This committee is comprised of the Doctoral Advisory Committee and at least one additional faculty member from outside the department.

If any member decides to withdraw from the committee, the student shall notify the Chair of the Dissertation Examining Committee and the Ph.D./BA Program Director. The student is responsible for finding a replacement, in consultation with the Chair. Inability to find a replacement shall constitute evidence that the student is unable to complete the dissertation. In such a case, the student may petition the Ph.D./BA Program Director for a review. Once review of the facts and circumstances is completed, the Director will rule on the student's progress. If the Director rules that the student is not capable of completing the dissertation, s/he will be dismissed from the program. This decision may be appealed to the Senior Associate Dean. If dismissed, the student may appeal to the Graduate School.

Students who are preparing to defend their dissertation should confirm a time and date with their Dissertation Examining Committee and register with the Graduate Secretary at least 15 days before the defense is to be scheduled. The Graduate Secretary arranges the time, date, and room within two working days, and forwards to the student the appropriate forms. After the Graduate Secretary has arranged the time, date, and room for the defense, the student must send to the Graduate School a completed “Announcement of Dissertation Defense” form, found in TUportal under the Tools tab within “University Forms,” at least 10 days before the defense. The department posts flyers announcing the defense, and the Graduate School announces the defense on its website.

Students who are preparing to write their preliminary examinations should confirm a time and date with their departmental advisor.

The members of the student's department write the questions for the preliminary exam. The student must answer every question on the examination in order to be evaluated by the Department Committee. The evaluators look for a breadth and depth of understanding of specific research areas; a critical application of that knowledge to specific phenomena; and an ability to write technical prose. Each member votes to pass or fail the student. In order to pass, a majority of the committee members must agree that the exam has been satisfactorily completed.

Proposal:
The dissertation proposal demonstrates the student's knowledge of and ability to conduct the proposed research. The proposal should consist of the following:

1. the context and background surrounding a particular research problem;
2. an exhaustive survey and review of literature related to the problem; and
3. a detailed methodological plan for investigating the problem.

The proposal should be completed and approved no more than one year after completing coursework. Upon approval, a timeline for completing the investigation and writing process is established.

Dissertation:
The doctoral dissertation is an original empirical study that makes a significant contribution to the field. It should expand the existing knowledge and demonstrate the student's knowledge of both research methods and a mastery of her/his primary area of interest. Dissertations should be rigorously investigated; uphold the ethics and standard of the field; demonstrate an understanding of the relationship between the primary area of interest and the broader field of business; and be prepared for publication in an academic journal.

The Doctoral Advisory Committee is formed to oversee the student's doctoral research and is comprised of at least three Graduate Faculty members. Two members, including the Chair, must be from the student's department. The Chair is responsible for overseeing and guiding the student's progress, coordinating the responses of the committee members, and informing the student of her/his academic progress.

The Dissertation Examining Committee evaluates the student's dissertation and oral defense, including the student's ability to express verbally her/his research question, methodological approach, primary findings, and implications. The Dissertation Examining Committee votes to pass or fail the dissertation and the defense at the conclusion of the public presentation. This committee is comprised of the Doctoral Advisory Committee and at least one additional faculty member from outside the department.

If any member decides to withdraw from the committee, the student shall notify the Chair of the Dissertation Examining Committee and the Ph.D./BA Program Director. The student is responsible for finding a replacement, in consultation with the Chair. Inability to find a replacement shall constitute evidence that the student is unable to complete the dissertation. In such a case, the student may petition the Ph.D./BA Program Director for a review. Once review of the facts and circumstances is completed, the Director will rule on the student's progress. If the Director rules that the student is not capable of completing the dissertation, s/he will be dismissed from the program. This decision may be appealed to the Senior Associate Dean. If dismissed, the student may appeal to the Graduate School.

Students who are preparing to defend their dissertation should confirm a time and date with their Dissertation Examining Committee and register with the Graduate Secretary at least 15 days before the defense is to be scheduled. The Graduate Secretary arranges the time, date, and room within two working days, and forwards to the student the appropriate forms. After the Graduate Secretary has arranged the time, date, and room for the defense, the student must send to the Graduate School a completed "Announcement of Dissertation Defense" form, found in TUPortal under the Tools tab within "University Forms," at least 10 days before the defense. The department posts flyers announcing the defense, and the Graduate School announces the defense on its website.

Business Administration/
Strategic Management, Ph.D.

FOX SCHOOL OF BUSINESS AND MANAGEMENT (http://www.fox.temple.edu)

About the Program

The Ph.D. in Business Administration program, with a concentration in Strategic Management, engages the student in advanced research and
scholarship. The primary emphasis of the program is to prepare future faculty members for successful academic careers, although many of our alumni are employed in government, industry, and consulting.

Time Limit for Degree Completion: 7 years

Campus Location: Main

Full-Time/Part-Time Status: Students complete the degree program through classes offered before 4:30 p.m.

Accreditation: All Fox School of Business and Management graduate programs are accredited by the Association to Advance Collegiate Schools of Business (AACSB International).

Job Prospects: The program is primarily dedicated to producing well-trained researchers who will work in academic positions.

Non-Matriculated Student Policy: Non-matriculated students are not permitted to take doctoral courses.

Financing Opportunities: Assistantships are the centerpiece of the program’s mentorship philosophy. An assistantship requires 20 hours of service per week, which can include teaching and supervised research. A stipend and tuition remission are provided.

Admission Requirements and Deadlines

Application Deadline:

Fall: January 15

Applications for the Ph.D. program are all processed together after the deadline.

APPLY ONLINE (http://fox.force.com/SiteLogin) to this Fox graduate program at http://fox.force.com/SiteLogin.

Letters of Reference:

Number Required: 2

From Whom: Letters of recommendation should be obtained from college/university faculty members familiar with the applicant’s academic competence.

Master’s Degree in Discipline/Related Discipline: A master’s degree in a business discipline is required.

Bachelor’s Degree in Discipline/Related Discipline: All applicants must present credentials that are the equivalent of the appropriate baccalaureate degree at Temple University.

Statement of Goals: Approximately 500 to 1,000 words include your specific interest in Temple’s program; your research goals; your future career goals; and your academic and research achievements.

Standardized Test Scores:

GRE/GMAT: Required. In general, scores above the 90th percentile are expected on each portion of the exam.

TOEFL: 100 iBT or 600 PBT minimum

Resume: Current resume required.

Total Credit Hours: 54

Additional Requirements:

Statistics Competency Examination:

An assessment of proficiency in statistical theory and methodology is made at the end of the first year in the program. Students who fail the Statistics competency exam on the first attempt must sit for reexamination prior to the Fall term of their second year. A second failure results in dismissal from the program. No third attempt is permitted.

Teaching Experience:

The student must earn at least one term’s experience teaching.

Culminating Events:

Preliminary Examination:

The purpose of the preliminary examination is to demonstrate critical and interpretive knowledge of current research. The subject areas are determined, in advance, by the faculty of the department. The preliminary exam should be completed no more than one term after the student completes the coursework component of the program. Students who are preparing to write their preliminary examinations should confirm a time and date with their departmental advisor.
The members of the student's department write the questions for the preliminary exam. The student must answer every question on the examination in order to be evaluated by the Department Committee. The evaluators look for a breadth and depth of understanding of specific research areas; a critical application of that knowledge to specific phenomena; and an ability to write technical prose. Each member votes to pass or fail the student. In order to pass, a majority of the committee members must agree that the exam has been satisfactorily completed.

Proposal:
The dissertation proposal demonstrates the student's knowledge of and ability to conduct the proposed research. The proposal should consist of the following:

1. the context and background surrounding a particular research problem;
2. an exhaustive survey and review of literature related to the problem; and
3. a detailed methodological plan for investigating the problem.

The proposal should be completed and approved no more than one year after completing coursework. Upon approval, a timeline for completing the investigation and writing process is established.

Dissertation:
The doctoral dissertation is an original empirical study that makes a significant contribution to the field. It should expand the existing knowledge and demonstrate the student's knowledge of both research methods and a mastery of her/his primary area of interest. Dissertations should be rigorously investigated; uphold the ethics and standard of the field; demonstrate an understanding of the relationship between the primary area of interest and the broader field of business; and be prepared for publication in an academic journal.

The Doctoral Advisory Committee is formed to oversee the student's doctoral research and is comprised of at least three Graduate Faculty members. Two members, including the Chair, must be from the student's department. The Chair is responsible for overseeing and guiding the student's progress, coordinating the responses of the committee members, and informing the student of her/his academic progress.

The Dissertation Examining Committee evaluates the student's dissertation and oral defense, including the student's ability to express verbally her/his research question, methodological approach, primary findings, and implications. The Dissertation Examining Committee votes to pass or fail the dissertation and the defense at the conclusion of the public presentation. This committee is comprised of the Doctoral Advisory Committee and at least one additional faculty member from outside the department.

If any member decides to withdraw from the committee, the student shall notify the Chair of the Dissertation Examining Committee and the Ph.D./BA Program Director. The student is responsible for finding a replacement, in consultation with the Chair. Inability to find a replacement shall constitute evidence that the student is unable to complete the dissertation. In such a case, the student may petition the Ph.D./BA Program Director for a review. Once review of the facts and circumstances is completed, the Director will rule on the student's progress. Business Administration/Tourism and Sport, Ph.D.

FOX SCHOOL OF BUSINESS AND MANAGEMENT (http://www.fox.temple.edu)

About the Program
The Ph.D. in Business Administration program, with a concentration in Tourism and Sport, prepares individuals for advanced research and scholarship. The primary emphasis of the program is to prepare future
faculty members for successful academic careers, although many of our alumni are employed in government, industry, and consulting.

**Time Limit for Degree Completion:** 7 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** Students complete the degree program through classes offered before 4:30 p.m.

**Affiliation(s):** The Tourism and Sport faculty are conducting research for the following agencies: Commonwealth of Pennsylvania, Greater Philadelphia Tourism Marketing Corporation, Greater Reading (PA) Convention and Visitors Bureau, Office of Travel and Tourism Industries, and Special Olympics of North America.

**Accreditation:** All Fox School of Business and Management graduate programs are accredited by the Association to Advance Collegiate Schools of Business (AACSB International).

**Areas of Specialization:** The primary focus of the Tourism and Sport faculty is on empirical research in corporate social responsibility, information technology, participant sports, and tourism destination marketing. In particular, Tourism and Sport faculty have received significant research funding to perform studies on travel and tourism patterns, as well as travel decisions based on website design. The faculty’s varied research interests are conducive to multiple management disciplines within the tourism and sport industries.

**Job Prospects:** The program is primarily dedicated to producing well-trained researchers who will work in academic positions.

**Non-Matriculated Student Policy:** Non-matriculated students are not permitted to take doctoral courses.

**Financing Opportunities:** Assistantships are the centerpiece of the program’s mentorship philosophy. An assistantship requires 20 hours of service per week, which can include teaching and supervised research. A stipend and tuition remission are provided.

## Admission Requirements and Deadlines

**Application Deadline:**

*Fall:* January 15

Applications for the Ph.D. program are all processed together after the deadline.

APPLY ONLINE (http://fox.force.com/SiteLogin) to this Fox graduate program at http://fox.force.com/SiteLogin.

**Letters of Reference:**

*Number Required:* 2

*From Whom:* Letters of recommendation should be obtained from college/university faculty members familiar with the applicant’s academic competence.

**Master’s Degree in Discipline/Related Discipline:** A master’s degree in a business or tourism/sport discipline is required.

**Bachelor’s Degree in Discipline/Related Discipline:** All applicants must present credentials that are the equivalent of the appropriate baccalaureate degree at Temple University.

**Statement of Goals:** Approximately 500 to 1,000 words include your specific interest in Temple’s program; your research goals; your future career goals; and your academic and research achievements.

**Standardized Test Scores:**

*GMAT/GRE: Required. A minimum score does not ensure admission to the program.*

For applicants whose native language is not English, the TOEFL, IELTS, or PTE Academic exam is required:

*TOEFL: 100 iBT or 600 PBT minimum
IELTS Academic: 6.5 minimum
PTE Academic: 53 minimum*

**Interview:** The interview requirement can be fulfilled either in person or via telephone. Interviews are scheduled for those students who meet all other admission standards.

**Resume:** Current resume required.

Students who fail the preliminary examination on the first attempt are permitted to sit for reexamination no later than six months after being notified of the failure. A member of the Preliminary Examination Committee provides feedback by identifying areas of failure and suggestions for remediation. A second failure results in dismissal from the University. No third attempt is allowed.

**Proposal:**
The dissertation proposal demonstrates the student's knowledge of and ability to conduct the proposed research. The proposal should consist of the following:

1. the context and background surrounding a particular research problem;
2. an exhaustive survey and review of literature related to the problem; and
3. a detailed methodological plan for investigating the problem.

The proposal should be completed and approved no more than one year after completing coursework. Upon approval, a timeline for completing the investigation and writing process is established.

**Dissertation:**
The doctoral dissertation is an original empirical study that makes a significant contribution to the field. It should expand the existing knowledge and demonstrate the student's knowledge of both research methods and a mastery of her/his primary area of interest. Dissertations should be rigorously investigated; uphold the ethics and standard of the field; demonstrate an understanding of the relationship between the primary area of interest and the broader field of business; and be prepared for publication in an academic journal.

The Doctoral Advisory Committee is formed to oversee the student's doctoral research and is comprised of at least three Graduate Faculty members. Two members, including the Chair, must be from the student's department. The Chair is responsible for overseeing and guiding the student's progress, coordinating the responses of the committee members, and informing the student of her/his academic progress.

The Dissertations Examining Committee evaluates the student's dissertation and oral defense, including the student's ability to express verbally her/his research question, methodological approach, primary findings, and implications. The Dissertations Examining Committee votes to pass or fail the dissertation and the defense at the conclusion of the public presentation. This committee is comprised of the Doctoral Advisory Committee and at least one additional faculty member from outside the department.

If any member decides to withdraw from the committee, the student shall notify the Chair of the Dissertations Examining Committee and the Ph.D./BA Program Director. The student is responsible for finding a replacement, in consultation with the Chair. Inability to find a replacement shall constitute evidence that the student is unable to complete the dissertation. In such a case, the student may petition the Ph.D./BA Program Director for a review. Once review of the facts and circumstances is completed, the Director will rule on the student's progress. If the Director rules that the student is not capable of completing the dissertation, s/he will be dismissed from the program. This decision may be appealed to the Senior Associate Dean. If dismissed, the student may appeal to the Graduate School.

Students who are preparing to defend their dissertation should confirm a time and date with their Dissertations Examining Committee and register with the Graduate Secretary at least 15 days before the defense is to be
scheduled. The Graduate Secretary arranges the time, date, and room within two working days, and forwards to the student the appropriate forms. After the Graduate Secretary has arranged the time, date, and room for the defense, the student must send to the Graduate School a completed “Announcement of Dissertation Defense” form, found in Tuportal under the Tools tab within “University Forms,” at least 10 days before the defense. The department posts flyers announcing the defense, and the Graduate School announces the defense on its website.

Business Administration Executive Program, M.B.A.

FOX SCHOOL OF BUSINESS AND MANAGEMENT (http://www.fox.temple.edu)

About the Program

The Fox School of Business and Management offers M.B.A. programs that help develop a solid understanding of business models created by the synergistic forces of globalization, entrepreneurship, and information technology. Our approach to graduate education helps develop practical expertise through case analyses, presentations, interaction with business practitioners, and team projects. The Fox School prepares students to step immediately into key management roles in highly specialized fields. The Fox School of Business and Management is the region’s second largest business graduate school with more than 1,300 students studying in 16 areas of concentration, including the region’s second oldest Executive M.B.A. program.

Time Limit for Degree Completion: 6 years

Campus Location: Hub Commerce Square and online

Full-Time/Part-Time Status: Executive M.B.A. students are considered full-time students.

Affiliation(s): Research is supported by Fox School of Business and Management's Advanta Center for Research in Financial Institutions, Center for Healthcare Research and Management, Innovation and Entrepreneurship Institute, and Institute of Global Management Studies. Research interests of the Fox School faculty are also supported by numerous centers and institutes throughout Temple University.

Study Abroad: A required international trip is arranged for the students of the E.M.B.A. program.

Accreditation: All Fox School of Business and Management graduate programs are accredited by the Association to Advance Collegiate Schools of Business (AACSB International).

Areas of Specialization: The Executive M.B.A. program is designed to mirror a real work environment with students assigned to teams. E.M.B.A. students work extensively in these teams to prepare assignments and presentations. Support is given by the faculty on how to manage a successful team environment.

Job Prospects: Graduates of the Fox School of Business and Management obtain jobs in computer/information technology; consulting; consumer products and services; energy/utilities; financial services/banking; government; healthcare; industrial products and services; manufacturing; pharmaceuticals; telecommunications; and tourism/transportation.

Non-Matriculated Student Policy: The Executive M.B.A. program is a cohort program, and courses may not be taken on a non-matriculated basis.

Financing Opportunities: Executive M.B.A. students at the Fox School of Business and Management may be considered for merit-based scholarships. No additional forms, application essays, or recommendations are required.

The Fox School’s Executive M.B.A. Corporate Partner Scholarship Program enables its corporate partners, as identified at http://www.fox.temple.edu/industry-and-recruiters/partner-with-fox/, to continue offering educational opportunities to employees amid budgetary constraints. The program provides scholarship opportunities for students when more than one employee from the same company attends the Fox E.M.B.A. program in a given year.

Admission Requirements and Deadlines

Application Deadline:

Fall:
- December 15 – Early Decision Deadline
- March 1 – Scholarship Deadline and International Deadline
- June 30 – Final Deadline

Applications are reviewed as they are received and can sometimes be considered after the deadline.
Application Online (http://fox.force.com/SiteLogin) to this Fox graduate program at http://fox.force.com/SiteLogin.

Letters of Reference:  
Number Required: 2  
From Whom: Professional references from an immediate supervisor, current or past, are preferred. Academic references are acceptable.

Coursework Required for Admission Consideration: Although no specific courses are required for admission consideration, applicants to the Executive M.B.A. program are expected to have approximately 10 years of experience, with 5-7 years of managerial experience.

Bachelor's Degree in Discipline/Related Discipline: A bachelor's degree, not necessarily in a business discipline, is required.

Statement of Goals: Two essays are required, one each on:

- Leadership: Please describe an incident from your personal experiences that typifies your definition of leadership. Specifically address ethics, diversity, collaboration, and motivation.
- Goals: Describe how you would expect to change over the course of the program. What personal and professional values and skills do you hope to acquire beyond academic content? How will obtaining the degree help you achieve your career goals?

An optional statement can also be submitted.

Standardized Test Scores:  
GMAT: Required. Official scores must be reported from a GMAT test taken within the last five years.

TOEFL: 79 iBT or 550 PBT minimum

Test Waivers: The GMAT may be waived for applicants who hold a J.D., M.D., or other doctoral degree. For the Executive M.B.A. program, GMAT scores may also be waived based on prior academics and/or technical and professional experience.

Interview: Admissions interviews are conducted by invitation only, after submission and initial review of applications.

Resume: Current resume required.

Other: Students must submit a corporate sponsorship agreement.

Program Requirements

General Program Requirements:  
Number of Credits Required Beyond the Baccalaureate: 48, all of which must be completed at Temple University

Business Administration Executive Program, D.B.A.

FOX SCHOOL OF BUSINESS AND MANAGEMENT (http://www.fox.temple.edu)
**About the Program**

The Executive D.B.A. is a three-year, part-time program that prepares senior managers and executives to rigorously discover, describe, study, and solve practical problems faced every day. Individuals are prepared to approach problems as evidence-based managers by using the tools and techniques of applied business research on issues relevant in the industry.

**Time Limit for Degree Completion:** 7 years

**Campus Location:** Three 3-day residencies are required in each of the first four academic terms. Residency coursework may be delivered at the residency location, and other coursework delivered via web conferencing tools.

**Full-Time/Part-Time Status:** The program is designed for part-time study.

**Affiliation(s):** Research is supported by Fox School of Business and Management's Advanta Center for Research in Financial Institutions, Center for Healthcare Research and Management, Innovation and Entrepreneurship Institute, and Institute of Global Management Studies. Research interests of the Fox School faculty are also supported by numerous centers and institutes throughout Temple University.

**Accreditation:** All Fox School of Business and Management graduate programs are accredited by the Association to Advance Collegiate Schools of Business (AACSB International).

**Job Prospects:** The program prepares graduates for corporate careers.

**Non-Matriculated Student Policy:** All participants in the Executive D.B.A. must be matriculated.

**Financing Opportunities:** Students are responsible for the total cost of the program. Tuition includes books, lodging, and most meals during the required residencies. Students are responsible for travel to and from the on-campus residences.

**Admission Requirements and Deadlines**

**Application Deadline:**

*Fall:* June 30

Applications are processed as they are received throughout the year.

APPLY ONLINE (http://fox.force.com/SiteLogin) to this Fox graduate program at http://fox.force.com/SiteLogin.

**Letters of Reference:**

*Number Required: 2*

*From Whom:* Letters of recommendation should be obtained from individuals familiar with the applicant's demonstrated leadership, academic potential, and critical thinking skills.

**Master's Degree in Discipline/Related Discipline:** Applicants should have at least 12 years of management experience, with at least 7 years at the senior management or executive level. They should hold an M.B.A. or other relevant business-focused master's degree. Exceptional candidates with a bachelor's degree and substantial managerial experience are also considered.

| Bachelor's Degree in Discipline/Related Discipline: All applicants must present credentials that are the equivalent of the appropriate baccalaureate degree at Temple University. |
| Statement of Goals: Describe your goals and motivations for pursuing the Executive D.B.A. degree, as well as detail your area of research interest. |
| Standardized Test Scores: No standardized tests are required for admission, but scores may be submitted if the applicant desires. |
| Admissions Essay: A personal statement describing your plan to balance the program's time commitments of about 15 hours per week with your work schedule and other demands is required. |
| Interview: Candidates may be interviewed after submission of the application. If an interview is scheduled, on-site interviews are strongly recommended so that applicants can visit Temple University and Fox School of Business and Management to tour the facilities and meet the Executive D.B.A. faculty. Interviews may also be conducted via video conference. |
| Resume: A current resume that highlights professional experience and education is required. |

**Program Requirements**

**General Program Requirements:**

*Number of Credits Required to Earn the Degree: 54*

BA 9999  Dissertation Research (Dissertation Defense)  6

Term Credit Hours  6

Total Credit Hours:  54

Culminating Events:
Proposal:
The doctoral dissertation is an original investigation that makes a significant contribution to the field. It should expand the existing body of knowledge and demonstrate the student's own knowledge of both research methods and a mastery of her/his primary area of interest. In consultation with the committee chair, the proposal should include a statement of the general research problem and motivation for the research, the questions or hypotheses to be investigated, the relevance of the problem to business theory and practice, a review of relevant literature, an outline of the dissertation, a detailed description of the methodology to be used, and expected contributions and practical implications. Executive D.B.A. students should defend their dissertation proposal defense in the Fall of their third year.

Dissertation:
The Dissertation Examining Committee evaluates the student's dissertation and oral defense, including the student's ability to express verbally her/his research question, methodological approach, primary findings, and implications. The Dissertation Examining Committee votes to pass, conditionally pass, or fail the dissertation and the defense at the conclusion of the public presentation based on whether the requirements laid out in the dissertation proposal and agreed upon by the committee and the student have been successfully met.

Executive D.B.A. students should defend their dissertation in the Spring of their third year. Students who are preparing to defend their dissertation should confirm a time and date with their Dissertation Examining Committee and register with the Graduate Secretary at least 15 days before the defense is to be scheduled. After the Graduate Secretary has arranged the time, date, and room for the defense, the student must send to the Graduate School a completed “Announcement of Dissertation Defense” form, found in TUportal under the Tools tab within “University Forms,” at least 10 days before the defense. The department publicly announces the defense, and the Graduate School announces the defense on its website.

Business Analytics, M.S.
FOX SCHOOL OF BUSINESS AND MANAGEMENT (http://www.fox.temple.edu)

About the Program
The M.S. in Business Analytics is designed to enable graduates to use data and models to recognize opportunities and improve organizational decision making. Data-driven decision making has been shown to have large positive effects on outcomes of interest to organizations of all types. This degree leverages the ever-increasing importance of data as a strategic asset to organizations, with students enhancing their analytic toolkit with a holistic view of how to improve decision making through analytics. The M.S. in Business Analytics is designed to allow students to acquire advanced skills and techniques that can be applied to discipline-specific and more general business problems. Graduates are prepared to meet the growing demand for talent in the areas of managing, analyzing, predicting, and discovering insights from the complex data available to modern corporations.

Time Limit for Degree Completion: 5 years

Campus Location: Center City, Online
Full-Time/Part-Time Status: The degree program can be completed on a full- or part-time basis.

Affiliation(s): Research is supported by Fox School of Business and Management's Center for Data Analytics, Center for Data Science, Center for Statistical Analysis, and numerous grants from government and industry.

Accreditation: All Fox School of Business and Management graduate programs are accredited by the Association to Advance Collegiate Schools of Business (AACSB International).

Job Prospects: Graduates are hired into various positions, such as:
  - Big Data Analytics Specialist
  - Data Analyst
  - Data Scientist
  - Management Analyst/Consultant
  - Manager of Services or Manufacturing Operations
  - Market Research Analyst
  - Project Manager
  - Research Analyst
  - Supply Chain Manager

Non-Matriculated Student Policy: Students with an undergraduate GPA of 3.25 or higher may be allowed to take classes under non-matriculated status. Non-matriculated students may take a maximum of 9 credits. Any additional courses require the student to be matriculated in a program, to pursue the certificate, or to enroll in the 4+1 program.

Financing Opportunities: Citizens and permanent residents of the United States are considered domestic students and are typically eligible for federal student loans as well as alternative loans through private lenders. The Fox School grants 5% tuition scholarships to alumni who are admitted to the program. Scholarship funds are limited and available based on merit.

Employment opportunities on campus are limited. Many students find opportunities for work off campus. Note that international students must follow visa requirements.

Admission Requirements and Deadlines

Application Deadline:

Fall:
  - December 15 – Early Decision Deadline
  - March 1 – Scholarship Deadline and International Deadline
  - June 30 – Final Deadline

Applications are reviewed as they are received and can sometimes be considered after the deadline.

APPLY ONLINE (http://fox.force.com/SiteLogin) to this Fox graduate program at http://fox.force.com/SiteLogin.

Letters of Reference:
Number Required: 2

From Whom: Professional references from an immediate supervisor, current or past, are preferred. Academic references are acceptable.

Bachelor's Degree in Discipline/Related Discipline: A baccalaureate degree is required.

Statement of Goals: Describe your future goals in specific terms and how the M.S. will assist you in achieving those goals.

Standardized Test Scores:
GRE/GMAT: Required. Scores for the GRE typically fall within the following percentile ranges: 50 to 99 Verbal; 80 to 99 Quantitative.

For applicants whose native language is not English, the TOEFL, IELTS, or PTE Academic exam is required:

TOEFL: 100 iBT or 600 PBT minimum
IELTS: 7.5
PTE Academic: 72 minimum

Resume: Current resume required.

Transfer Credit: Upper-level graduate credits from an AACSB-accredited graduate business program, but not previously applied to a conferred degree, may be transferred into the M.S. program. The credits must be part of the required degree program at Temple University. To be transferred, the grade must be a "B" or better. The Admissions Committee makes recommendations for transferring credits to the department chair. The maximum number of credits a student may transfer is 6.

Capstone Course

BA 5651  Business Analytics Capstone  3

Total Credit Hours  30

1  BA 5687 may be waived based on prior academic or professional preparation. Consult with the Program Director.
2  Alternately, the student may select as an elective any graduate-level course that does not substantially duplicate the required courses above. Permission from the Program Director is required.
3  If the student selects MKTG 5613 Customer Data Analytics 1 (1.5 s.h.) as an elective, s/he must also take MKTG 5614 Customer Data Analytics 2 (1.5 s.h.) to complete the 3-credit course experience.
4  If the student selects MKTG 5617 Market Research 1: Foundations of Marketing Research (1.5 s.h.) as an elective, s/he must also take MKTG 5618 Market Research 2: Marketing Intelligence (1.5 s.h.) to complete the 3-credit course experience.

Culminating Events:

Capstone Course:

All students in the Business Analytics M.S. program participate in a capstone experience that is designed to integrate "real world" problems into the curriculum. In general, a sponsoring corporation provides a problem and real data, and students divide into teams to work on the problem. At the end of the term, the top several groups as judged by professors present to the program’s advisory board and other corporate judges.

Corporate Compliance and Ethics, M.S.

FOX SCHOOL OF BUSINESS AND MANAGEMENT (http://www.fox.temple.edu)

About the Program

This program is not accepting applications for the 2018-2019 academic year.

Decision Neuroscience, Ph.D.

FOX SCHOOL OF BUSINESS AND MANAGEMENT (http://www.fox.temple.edu)

About the Program

The field of decision neuroscience provides new insights into the mechanisms that underlie a wide range of economic and social phenomena, from risky choice and consumer behavior to altruism and cooperation. It is also a primary example of truly interdisciplinary research, with people from such diverse fields as business administration, economics, engineering, neuroscience, philosophy, physics, and psychology working together to advance knowledge of mechanisms underlying decision making and decision preferences.

The interdisciplinary Ph.D. program in Decision Neuroscience at the Fox School of Business and Management is a collaborative effort with the Department of Psychology in the College of Liberal Arts. Through the efforts of its Center for Neural Decision Making (CNDM), Fox School has been at the forefront of the field of decision neuroscience over the past six years. Similarly, Temple University's Psychology Department has long been a leader in brain and cognitive science research.

Students enrolled in the program gain a thorough understanding of the intellectual issues in the rapidly growing field of decision neuroscience and its subfields of neuroeconomics and neuromarketing. The program has the unique vision of integrating scientific findings with everyday real-world problems. It is designed for students who want to work at the intersection of neuroscience and business.

Time Limit for Degree Completion: 7 years

Campus Location: Main

Full-Time/Part-Time Status: Full-time study is required.

Interdisciplinary Study: The program is inherently interdisciplinary.

Affiliation(s): Research is supported by Fox School of Business and Management's Advanta Center for Research in Financial Institutions, Center for Healthcare Research and Management, Innovation and Entrepreneurship Institute, and Institute of Global Management Studies. Research interests of the Fox School faculty are also supported by numerous centers and institutes throughout Temple University.

Accreditation: All Fox School of Business and Management graduate programs are accredited by the Association to Advance Collegiate Schools of Business (AACSB International).
Job Prospects: Graduates of the program are prepared to seek tenure-track appointments either in business schools or psychology departments, depending on their approach to the program’s curriculum.

Non-Matriculated Student Policy: Non-matriculated students are not permitted to take doctoral courses.

Financing Opportunities: Typically, all Ph.D. students receive financial assistantship in the form of full tuition remission and a stipend in return for offering services as a Research Assistant (RA) or Teaching Assistant (TA). Level of support is based on the concentration, the applicant’s qualifications, and competitive considerations. Students can also receive remuneration for conference travel, publications, and academic achievement.

Admission Requirements and Deadlines

Application Deadline:

Fall: January 15

Applications for the Ph.D. program are all processed together after the deadline.

APPLY ONLINE (http://fox.force.com/SiteLogin) to this Fox graduate program at http://fox.force.com/SiteLogin.

Letters of Reference:

Number Required: 2

From Whom: Letters of recommendation should be obtained from evaluators, typically college/university faculty or an immediate work supervisor, who can provide insight into your abilities and talents, as well as comment on your aptitude for graduate study.

Master’s Degree in Discipline/Related Discipline: A master’s degree is not required.

Bachelor’s Degree in Discipline/Related Discipline: All applicants must present credentials that are the equivalent of the appropriate baccalaureate degree at Temple University.

Statement of Goals: Approximately 500 to 1,000 words include your specific interest in Temple’s program; your research goals; your future career goals; and your academic and research achievements.

Standardized Test Scores:

GMAT/GRE: Required. GMAT scores are preferred; in some cases, GRE scores may be substituted. In general, scores above the 90th percentile are expected on each portion of the exam.

TOEFL: 105 iBT or 620 PBT minimum

Resume: Current resume required.

Total Credit Hours 42

1 The select topic for this course is an introduction to research in judgment and decision making and their applications.

2 PSY 8310 Topical Seminar in Cognitive Psychology is taken twice for credit. One course topic provides an introduction to the biological bases of higher brain function, including attention, consciousness, emotion, executive functions, language, memory, and perception. The other provides an overview of the use of functional magnetic resonance imaging (FMRI) in the investigation of human sensory, motor, and cognitive function.

Additional Requirements:

Research Rotations:

In addition to undertaking specially designed interdisciplinary coursework, students complete research rotations during the first year of study that prepare them for independent research in the field of decision neuroscience. Students are required to complete two laboratory rotations in their first year (Fall and Spring) that would ideally be in different subfields with different mentors. Students also have the option to complete a third rotation during the Summer if they require additional exposure.

Research rotations are designed to give students a wide range of knowledge in the area of decision neuroscience by being engaged in the research of an assigned lab. When rotating through a lab (or with a research mentor), students are often paired with a senior lab member (e.g., a postdoctoral fellow or senior graduate student) to work on an ongoing research project. In some cases, they may be given a new project based on their knowledge and skill levels. Students are not, however, expected to complete a full project within an academic term.
Research Meetings:
Students are expected to attend research meetings and to be fully engaged in the research culture.

Publications:
It is expected that students will write, submit, and publish articles.

Grant Proposals:
Students are expected to prepare a grant proposal for submission to a government funding agency. Eligible students are also required to write and submit a National Research Service Award (NRSA) proposal at the end of their third year. International students who are not eligible for federal grants are encouraged to work on submissions with faculty members.

Culminating Events:
Comprehensive Examination:
The comprehensive examination is taken at the end of the second year of study. Each student must propose and defend a major area paper in her/his proposed field of research. Upon passing the exam, students choose a faculty member from either Fox School or the College of Liberal Arts as their primary mentor.

Dissertation:
The doctoral dissertation is an original empirical study that makes a significant contribution to the field. It should expand the existing knowledge and demonstrate the student's knowledge of both research methods and a mastery of her/his primary area of interest. Dissertations should be rigorously investigated; uphold the ethics and standard of the field; demonstrate an understanding of the relationship between the primary area of interest and the broader field of business; and be prepared for publication in an academic journal.

The Doctoral Advisory Committee is formed to oversee the student's doctoral research and is comprised of at least three Graduate Faculty members. Two members, including the Chair, must be from the student's department. The Chair is responsible for overseeing and guiding the student's progress, coordinating the responses of the committee members, and informing the student of her/his academic progress.

The Dissertation Examining Committee evaluates the student's dissertation and oral defense, including the student's ability to express verbally her/his research question, methodological approach, primary findings, and implications. The Dissertation Examining Committee votes to pass or fail the dissertation and the defense at the conclusion of the public presentation. This committee is comprised of the Doctoral Advisory Committee and at least one additional faculty member from outside the department.

If any member decides to withdraw from the committee, the student shall notify the Chair of the Dissertation Examining Committee and the Ph.D. Program Director. The student is responsible for finding a replacement, in consultation with the Chair. Inability to find a replacement shall constitute evidence that the student is unable to complete the dissertation. In such a case, the student may petition the Ph.D. Program Director for a review. Once review of the facts and circumstances is completed, the Director will rule on the student's progress. If the Director rules that the student is not capable of completing the dissertation, s/he will be dismissed from the program. This decision may be appealed to the Senior Associate Dean. If dismissed, the student may appeal to the Graduate School.

Students who are preparing to defend their dissertation should confirm a time and date with their Dissertation Examining Committee and register with the Graduate Secretary at least 15 days before the defense is to be scheduled. The Graduate Secretary arranges the time, date, and room within two working days, and forwards to the student the appropriate forms. After the Graduate Secretary has arranged the time, date, and room for the defense, the student must send to the Graduate School a completed “Announcement of Dissertation Defense” form, found in TUportal under the Tools tab within “University Forms,” at least 10 days before the defense. The department posts flyers announcing the defense, and the Graduate School announces the defense on its website.

Digital Innovation in Marketing, M.S.

FOX SCHOOL OF BUSINESS AND MANAGEMENT

About the Program
The M.S. in Digital Innovation in Marketing degree program is intended to provide graduates with the skills and understanding both of the technologies involved and their application in today's complex marketing environment. Students learn the fundamentals of marketing, information systems, brand management, data, user design, and social and content marketing, and how the underlying technology supports the digital marketing function in an organization. Graduates are equipped to integrate marketing strategy with the corporate digital infrastructure and maximize the impact on the business strategy. The program provides the skills needed to:

- Become a leader in driving technology-enabled transformation of the marketing function;
- Develop a digital marketing plan;
- Apply the latest digital innovations such as mobile, location-based services, and big data to marketing campaigns;
Schools, Colleges, and Divisions

Integrate marketing, advertising, sales, and logistics across physical and digital channels; and
Collect, analyze, and interpret digital marketing data to inform decision making.

Time Limit for Degree Completion: 5 years

Campus Location: Online

Full-Time/Part-Time Status: The degree program is completed on a part-time basis.

Affiliation(s): Research is supported by Fox School of Business and Management's Advanta Center for Research in Financial Institutions, Center for Healthcare Research and Management, Innovation and Entrepreneurship Institute, and Institute of Global Management Studies. Research interests of the Fox School faculty are also supported by numerous centers and institutes throughout Temple University.

Accreditation: All Fox School of Business and Management graduate programs are accredited by the Association to Advance Collegiate Schools of Business (AACSB International).

Job Prospects: Graduates of the M.S. in Digital Innovation in Marketing program are prepared for a wide range of careers involving marketing in the digital era.

Non-Matriculated Student Policy: All courses require the student to be matriculated in a program.

Financing Opportunities: Citizens and permanent residents of the United States are considered domestic students and are typically eligible for federal student loans as well as alternative loans through private lenders. The Fox School grants 5% tuition scholarships to alumni who are admitted to the program. Students are encouraged to pursue scholarship funds from organizations to which they belong, such as athletic organizations, clubs, employers, ethnic groups, fraternal organizations, religious organizations, rotary clubs, unions, veteran groups, and the like.

Admission Requirements and Deadlines

Application Deadline:

Fall:
- December 15 – Early Decision Deadline
- March 1 – Scholarship Deadline and International Deadline
- June 30 – Final Deadline

Spring:
- June 30 – Scholarship Deadline and International Deadline
- November 1 – Final Deadline

Applications are reviewed as they are received and can sometimes be considered after the final deadline.

APPLY ONLINE (http://fox.force.com/SiteLogin) to this Fox graduate program at http://fox.force.com/SiteLogin.

Letters of Reference:
Number Required: 1

From Whom: A professional reference from an immediate supervisor, current or past, is preferred. An academic reference is acceptable.

Bachelor's Degree in Discipline/Related Discipline: A baccalaureate degree is required.

Statement of Goals: Describe your future goals in specific terms and how the M.S. will assist you in achieving those goals.

Standardized Test Scores:
GRE/GMAT: Required. Scores for the GRE typically fall within the following percentile ranges: 50 to 99 Verbal; 80 to 99 Quantitative.

For applicants whose native language is not English, the TOEFL, IELTS, or PTE Academic exam is required:
TOEFL: 100 iBT or 600 PBT minimum
IELTS: 7.5
PTE Academic: 72 minimum

Resume: Current resume required.

Transfer Credit: Upper-level graduate credits from an AACSB-accredited graduate business program, but not previously applied to a conferred degree, may be transferred into the M.S. program. The credits must be part of the required degree program at Temple University. To be transferred, the grade must be a "B" or better. The Admissions Committee makes recommendations for transferring credits to the department chair. The maximum number of credits a student may transfer is 6.

Finance, M.S.
FOX SCHOOL OF BUSINESS AND MANAGEMENT (http://www.fox.temple.edu)

About the Program
Currently open only to students from China, in collaboration with a partner institution in China.

Financial Analysis, M.S.
FOX SCHOOL OF BUSINESS AND MANAGEMENT (http://www.fox.temple.edu)

About the Program
Students in the Fox School of Business and Management's master's degree program in Financial Analysis (MSFA) build cutting-edge financial skills so they stand out in today's competitive global economy. The program’s curriculum raises the benchmark for programs supporting the Chartered Financial Analyst® designation. MSFA students may complete CFA® Level I and II exams during the program’s 10- to 22-month time frame.

Time Limit for Degree Completion: 2 years

Campus Location: Center City, Main

Full-Time/Part-Time Status: Students are required to complete the degree program through classes offered during the day or in the evening after 4:30 p.m. Required courses offered each year during the August Finance Academy must also be completed. Full-time students are able to complete the degree program in 10 or 22 months, while part-time students taking 8 or fewer credits per term are able to complete the program in 2 years.

Affiliation(s): Research is supported by Fox School of Business and Management's Advanta Center for Research in Financial Institutions, Center for Healthcare Research and Management, Innovation and Entrepreneurship Institute, and Institute of Global Management Studies. Research interests of the Fox School faculty are also supported by numerous centers and institutes throughout Temple University. Faculty in the Finance Department conduct research in acquisitions dividend policy, asset-based back securities, corporate governance, corporate restructuring, portfolio theory, and real estate analysis.

Accreditation: All Fox School of Business and Management graduate programs are accredited by the Association to Advance Collegiate Schools of Business (AACSB International).

Admission Requirements and Deadlines

Application Deadline:

Fall:
• December 15 – Early Decision Deadline
• March 1 – Scholarship Deadline and International Deadline
• June 30 – Final Deadline

Applications are reviewed as they are received and can sometimes be considered after the deadline.

APPLY ONLINE (http://fox.force.com/SiteLogin) to this Fox graduate program at http://fox.force.com/SiteLogin.

Letters of Reference:

Number Required: 2

From Whom: Professional references from an immediate supervisor, current or past, are preferred. Academic references are acceptable.

Coursework Required for Admission Consideration: Applicants are expected to have earned grades of at least a "B" in each of their college-level calculus courses.

Bachelor's Degree in Discipline/Related Discipline: A baccalaureate degree is required.

Statement of Goals: Describes your future goals in specific terms and how the M.S. will assist you in achieving those goals.

Standardized Test Scores:
GRE/GMAT: Required. Scores for the GRE typically fall within the following percentile ranges: 50 to 99 Verbal; 80 to 99 Quantitative.

For applicants whose native language is not English, the TOEFL, IELTS, or PTE Academic exam is required:

TOEFL: 100 IBT or 600 PBT minimum
IELTS: 7.5
PTE Academic: 72 minimum
Resume: Current resume required.
Transfer Credit: Upper-level graduate credits from an AACSB-accredited graduate business program, but not previously applied to a conferred degree, may be transferred into the M.S. program. The credits must be part of the required degree program at Temple University. To be transferred, the grade must be a "B" or better. The Admissions Committee makes recommendations for transferring credits to the department chair. The maximum number of credits a student may transfer is 6.

Financial Analysis and Quantitative Risk Management, M.S.

FOX SCHOOL OF BUSINESS AND MANAGEMENT (http://www.fox.temple.edu)

About the Program

The financial analysis of evolving global market opportunities draws on the principles of economics, financial reporting, corporate finance, investments, and quantitative methods. Effective enterprise risk management requires added expertise in complex derivative products and structured capital market transactions. This range of financial expertise drives the sales and trading, investment banking, equity research, credit analysis, quantitative research, asset management, valuation advisory services, and corporate audit and risk management operations of today’s financial services industry. In the same way, the Fox School of Business and Management's master's degree program in Financial Analysis and Quantitative Risk Management (MSFA-QRM) develops a pinnacle breadth and depth of financial expertise. To fuel their career ambitions, MSFA-QRM students may complete the CFA® Level I, II, and III and FRM Part I and II exams over the program’s 22-month time frame.

Time Limit for Degree Completion: 5 years

Campus Location: Main
Full-Time/Part-Time Status: Full-time students are able to complete the MSFA-QRM degree program in 22 months, while part-time students can complete the program in 3 years.

Affiliation(s): Research is supported by Fox School of Business and Management’s Advanta Center for Research in Financial Institutions, Center for Healthcare Research and Management, Innovation and Entrepreneurship Institute, and Institute of Global Management Studies. Research interests of the Fox School faculty are also supported by numerous centers and institutes throughout Temple University.

Accreditation: All Fox School of Business and Management graduate programs are accredited by the Association to Advance Collegiate Schools of Business (AACSB International).

Job Prospects: Graduates have developed specialized skills in the field of finance that distinguish them for employment with accounting firms, commercial banks, consulting companies, financial technology firms, government and regulatory agencies, hedge funds, insurance companies, investment banks, and investment companies.

Non-Matriculated Student Policy: Students are not allowed to take classes under non-matriculated status.

Financing Opportunities: Citizens and permanent residents of the United States are considered domestic students and are typically eligible for federal student loans as well as alternative loans through private lenders. The Fox School grants 5% tuition scholarships to alumni who are admitted to the program. Students are encouraged to pursue scholarship funds from organizations to which they belong, such as athletic organizations, clubs, employers, ethnic groups, fraternal organizations, religious organizations, rotary clubs, unions, veteran groups, and the like.

Global Finance, D.S.

FOX SCHOOL OF BUSINESS AND MANAGEMENT (http://www.fox.temple.edu)

About the Program
Currently open only to students in China, in collaboration with Tsinghua University.

Health Administration, M.H.A.

FOX SCHOOL OF BUSINESS AND MANAGEMENT (http://www.fox.temple.edu)

About the Program
The M.H.A. in Health Administration is designed for part-time study by healthcare professionals with substantive work experience in healthcare and healthcare-related fields. The program is ideal for:

- Mid-level health sector managers who are highly experienced in their functional roles and require a graduate education in order to advance;
- Physicians and nurse managers who possess the potential to become clinical leaders, but lack formal management training;
- Consultants who need healthcare-specific industry knowledge; and
- Healthcare professionals identified by their senior managers as up-and-comers having the potential to develop into leadership roles.

Time Limit for Degree Completion: 5 years

Campus Location: Main, Center City, Online

Full-Time/Part-Time Status: The degree program is designed to be completed on a part-time basis.

Affiliation(s): Research is supported by Fox School of Business and Management’s Advanta Center for Research in Financial Institutions, Innovation and Entrepreneurship Institute, and Institute of Global Management Studies. Research interests of the Fox School faculty are also supported by numerous centers and institutes throughout Temple University.

Accreditation: All Fox School of Business and Management graduate programs are accredited by the Association to Advance Collegiate Schools of Business (AACSB International).

Job Prospects: M.H.A. students are typically full-time working professionals seeking to enhance and expand their management skills to improve performance in their existing jobs. Some seek to move from clinical to more administrative responsibilities.

Non-Matriculated Student Policy: Students with an undergraduate GPA of 3.0 or higher may be allowed to take classes under non-matriculated status. Non-matriculated students may take a maximum of 9 credits. Any additional courses require the student to be matriculated in a program.

Financing Opportunities: Citizens and permanent residents of the United States are considered domestic students and are typically eligible for federal student loans as well as alternative loans through...
private lenders. The Fox School grants 5% tuition scholarships to alumni who are admitted to the program. Students are encouraged to pursue scholarship funds from organizations to which they belong, such as athletic organizations, clubs, employers, ethnic groups, fraternal organizations, religious organizations, rotary clubs, unions, veteran groups, and the like.

Healthcare Financial Management, M.S.

FOX SCHOOL OF BUSINESS AND MANAGEMENT (http://www.fox.temple.edu)

About the Program
This program is not accepting applications for the 2018-2019 academic year.

Human Resource Management, M.S.

FOX SCHOOL OF BUSINESS AND MANAGEMENT (http://www.fox.temple.edu)

About the Program
The Fox School of Business and Management offers the M.S. in Human Resource Management (MSHRM) degree program for the individual who wants to pursue a career in Human Resource Management (HRM). The curriculum equips rising professionals with knowledge of advanced practices in critical HRM areas and an understanding of how those practices affect organizational success. It is certified to industry standards set by the Society for Human Resource Management (SHRM). The Fox MSHRM program is offered completely online and is intended to accommodate our students’ busy schedules. With the accelerated completion pathway, students can earn their degrees in as few as 13 months.

Time Limit for Degree Completion: 6 years

Campus Location: Online. Each course is delivered online over a five-week term. Each week, students participate in a live and collaborative web-conferencing session with faculty and classmates. Additional coursework and activities are required throughout the period.

Full-Time/Part-Time Status: The MSHRM is flexible and can accommodate both full-time and part-time students.

Affiliation(s): Research is supported by Fox School of Business and Management’s Advanta Center for Research in Financial Institutions, Center for Healthcare Research and Management, Innovation and Entrepreneurship Institute, and Institute of Global Management Studies. Research interests of the Fox School faculty are also supported by numerous centers and institutes throughout Temple University.

Accreditation: All Fox School of Business and Management graduate programs are accredited by the Association to Advance Collegiate Schools of Business (AACSB International).

Job Prospects: Graduates can expect to be qualified for such positions as:
• HR Business Partner
• HRM Strategic Leader
• Professional Development/E-Learning Manager/Director
• Program Director
• Senior Analyst
• Senior Talent Management or Organization Development Consultant
• Talent Acquisition Manager/Director
• Total Rewards Manager/Director

Non-Matriculated Student Policy: Students with an undergraduate GPA of 3.0 or higher and a minimum of three years of relevant work experience may be allowed to take classes under non-matriculated status. Non-matriculated students may take a maximum of 9 credits. Any additional courses require the student to be matriculated in a program.

Financing Opportunities: Citizens and permanent residents of the United States are considered domestic students and are typically eligible for federal student loans as well as alternative loans through private lenders. The Fox School grants 5% tuition scholarships to alumni who are admitted to the program. Employers may provide tuition reimbursement as part of their benefit packages. Students are further encouraged to pursue scholarship funds from organizations to which they belong, such as athletic organizations, clubs, employers, ethnic groups, fraternal organizations, religious organizations, rotary clubs, unions, veteran groups, and the like.

Admission Requirements and Deadlines

Application Deadline:

Fall:
• December 15 – Early Decision Deadline
• March 1 – Scholarship Deadline and International Deadline
• June 30 – Final Deadline

Spring:
• June 30 – Scholarship Deadline and International Deadline
• November 1 – Final Deadline

Applications are reviewed as they are received and can sometimes be considered after the deadline.

APPLY ONLINE (http://fox.force.com/SiteLogin) to this Fox graduate program at http://fox.force.com/SiteLogin.

Letters of Reference:
Number Required: 2

From Whom: At least one letter should be provided by a professional reference, preferably a current or former manager. If a second professional reference is not available, a recommendation from a college/university faculty member familiar with the applicant’s academic competence is acceptable.

Professional Work Experience: A minimum of three years of professional leadership or Human Resource Management experience is required to apply.

Bachelor’s Degree in Discipline/Related Discipline: A baccalaureate degree, not necessarily in a business discipline, is required with a minimum GPA of 3.0 on a 4.0 scale.

Statement of Goals: The MSHRM application requires one essay that discusses the applicant’s professional plans and goals. The following questions must be addressed:

• What past experiences prepared or motivated you to pursue the MSHRM degree?
• What personal and professional values and skills do you hope to acquire through the academic content?
• How will obtaining the MSHRM help you achieve your career goals?

Standardized Test Scores:
GRE/GMAT: Required.

For applicants whose native language is not English, the TOEFL, IELTS, or PTE Academic exam is required:

TOEFL: 100 iBT or 600 PBT minimum
IELTS: 7.5
PTE Academic: 72 minimum

Resume: Current resume required.

Interview: A personal interview, which is conducted either virtually or in person, is required.

Transfer Credit: Upper-level graduate credits from an AACSB-accredited graduate business program, but not previously applied to a conferred degree, may be transferred into the MSHRM program. The credits must be part of the required degree program at Temple University. To be transferred, the grade must be a “B” or better. The Admissions Committee makes recommendations for transferring credits to the department chair. The maximum number of credits a student may transfer is 6.

Information Technology Auditing and Cyber Security, M.S.

FOX SCHOOL OF BUSINESS AND MANAGEMENT (http://www.fox.temple.edu)

About the Program

The M.S. in Information Technology Auditing and Cyber Security (MS ITACS) program prepares students for cyber security, information security, information systems auditing, and IT risk management positions in business and critical infrastructure sectors (https://www.dhs.gov/critical-infrastructure-sectors) of the economy identified by the U.S. Department of Homeland Security. The MS ITACS is a science, technology, engineering, and math (STEM) program aligned with the ISACA® Model Curriculum (https://www.isaca.org/knowledge-center/academia/pages/programs-aligned-with-model-curriculum-for-is-audit-and-control.aspx) for Information System Audit and Control, which enables our graduates to earn one year of work experience applicable toward the Certified Information Systems Auditor (CISA (http://www.isaca.org/Certification/CISA-Certified-Information-Systems-Auditor/Pages/default.aspx)) designation.

MS ITACS students take four common core courses and specialized courses in one of two concentrations: Information Technology Auditing or Cyber Security. The IT Auditing concentration culminates in a capstone course leading to CISA (http://www.isaca.org/Certification/CISA-Certified-Information-Systems-Auditor/Pages/default.aspx) certification, while the capstone course for the Cyber Security concentration leads to Certified Information Systems Security Professional (CISSP®) (https://www.isc2.org/Certifications/CISSP) certification, depending on the student’s work experience. Qualified students with necessary prerequisites are able to take courses from both concentrations.

Time Limit for Degree Completion: 5 years

Campus Location: Main and/or Online

Full-Time/Part-Time Status: The MS ITACS program can be completed on a full- or part-time basis.

Affiliation(s): Research is supported by Fox School of Business and Management's Advanta Center for Research in Financial Institutions, Center for Healthcare Research and Management, Innovation and Entrepreneurship Institute, and Institute of Global Management Studies. Research interests of the Fox School faculty are also supported by numerous centers and institutes throughout Temple University.

Accreditation: All Fox School of Business and Management graduate programs are accredited by the Association to Advance Collegiate Schools of Business (AACSB International).

Areas of Specialization: Two areas of concentration are offered:

- Cyber Security
- Information Technology Auditing

Job Prospects: The MS ITACS degree prepares graduates for employment in cyber security, information security, information systems auditing, and IT risk management positions at accounting and consulting firms, banks and financial companies, businesses producing goods and providing services, computer software and hardware companies, information and data service providers, and governmental agencies and non-governmental organizations. The U.S. Bureau of Labor Statistics reports 28% job growth through 2026.

Non-Matriculated Student Policy: Students with an undergraduate GPA of 3.0 or higher may be allowed to take classes under non-matriculated status in the ITACS graduate certificate program. Non-matriculated students may take a maximum of 9 credits. Any additional courses require the student to be matriculated in a program.

Financing Opportunities: Citizens and permanent residents of the United States are considered domestic students and are typically eligible for federal student loans as well as alternative loans through private lenders. The Fox School grants 5% tuition scholarships to alumni who are admitted to the program. Students are encouraged to pursue scholarship funds from organizations to which they belong, such as athletic organizations, clubs, employers, ethnic groups, fraternal organizations, religious organizations, rotary clubs, unions, veteran groups, and the like.

- MIS 5182 Independent Study
- MIS 5212 Penetration Testing
- MIS 5216 Organizational Forensics

Cyber Security Capstone Course

MIS 5903 Cyber Security Capstone 3

Total Credit Hours 30

1. Students in the Cyber Security concentration may select an elective course in the Information Technology Auditing concentration, Computer Science, or Engineering Security. This is done in consultation with the ITACS Program Director.

Culminating Events:
The MS ITACS program culminates in a capstone that prepares students to take the appropriate professional certification examination:

- Certified Information Systems Auditor (CISA)
Innovation and entrepreneurship are ubiquitous in today’s modern competitive landscape. Firms that sit still are left behind as new leaders or indeed the entire industry surges ahead. For firms to survive, they must invent groundbreaking new products; think outside the box in order to deliver services with unparalleled value; fundamentally rework their internal activities and processes to create competitive advantage; and reinvent the game by diving into so-called “Blue Oceans” and “White Spaces” with novel business models. As open innovation perspectives come to be fully embraced by organizations, entire business ecosystems are fundamentally shifting and competition becomes value-chain against value-chain, not company against company.

In this rapidly changing landscape, it is critical that employees and managers alike understand how to overcome both the strategic and tactical challenges of organizational innovation. The Master of Science in Innovation Management and Entrepreneurship (IME MS) program teaches how to overcome these challenges to take advantage of new opportunities relevant to a company or industry. It is designed to help students shift their perspectives so they develop a deep understanding of strategy, innovation, creativity, and entrepreneurship, as well as develop relevant management skills necessary to more effectively manage innovation in existing companies and/or to more successfully found new entrepreneurial ventures.

The IME MS is designed for:

- Entrepreneurs aiming to create high-growth, innovative, or technology-focused companies or social-impact organizations.
- Working professionals (junior, mid-level, and top leadership) in companies that have prioritized innovation or recognized the need for fundamentally different management paradigms to deal with the modern competitive landscape.
- Working professionals (junior, mid-level, and top leadership) in research and development, technology, innovation, or change management roles.
- M.B.A. dual-degree students who have recognized the important ways that innovative perspectives complement more traditional management approaches.
- Recent graduates from engineering, science and technology, medical, dental, and pharmacy schools, particularly those who want to work in technology or R&D-focused companies.
- Design, architecture, and art students interested in the business side of creativity as creatives in the enterprise or as entrepreneurs/freelancers and/or interested in applying design thinking to innovation in firms.

**Time Limit for Degree Completion:** 3 years

**Campus Location:** Center City, Online

**Full-Time/Part-Time Status:** The degree program can be completed on a full- or part-time basis. Scheduling is flexible as most courses are offered online, over weekends, and/or in the evening. Full-time study is typically completed in one year, while part-time study can be spread over two years. The program can be completed fully online within one year.

**Interdisciplinary Study:** This uniquely collaborative program includes business professionals, scientists, engineers, artists, designers, lawyers, and such. Courses are taken by Fox Professional/Global/Online M.B.A., Engineering Management M.S., and Bioinnovation M.S. students and are offered as electives for graduate students across Temple.

**Areas of Specialization:** Three concentrations, designed for maximum flexibility with 9 to 12 credits of electives so students can emphasize areas of interest, are offered jointly by Fox School of Business and Management and the College of Engineering:

- Entrepreneurship
- Innovation Strategy
- Technology and Innovation Management

**Job Prospects:** Graduates are prepared for employment in a variety of areas, including:

- Consulting
- Corporate New Venture Divisions
• Entrepreneurial Ecosystem
• Innovation Strategy Groups
• Leadership/Management
• New Product Development
• Open Innovation
• Technical Sales/Marketing
• Technology Commercialization

They also have the skills needed for these positions:
• Evangelist/Change Leader
• Founder/Entrepreneur
• Idea Management Specialist
• Innovation Project Manager
• Knowledge Management Professional
• R&D Manager/Team Leader
• Technology Portfolio Manager
• Any position in entrepreneurial startups

**Licensure:** Coursework prepares students to take the New Product Development Professional (NPDP) certification exam offered by the Product Development Management Association (PDMA). In addition, students have the option to take courses to receive a certification as a Lean Six Sigma Green Belt by the International Association for Six Sigma Certification (IASSC).

**Non-Matriculated Student Policy:** Students with an undergraduate GPA of 3.0 or higher are able to take individual strategic management, innovation, and entrepreneurship courses as non-matriculated students. Non-matriculated students may take a maximum of 9 credits before applying for a degree program. We generally recommend that students interested in taking our graduate courses consider one of our graduate certificate programs since they are given priority in selecting courses over non-matriculated students.

**Financing Opportunities:** Scholarships are available and are automatically awarded based on application strength.

## Admission Requirements and Deadlines

**Application Deadline:**

**Fall:**
- December 15 – Early Decision Deadline
- March 1 – Scholarship Deadline and International Deadline
- June 30 – Final Deadline

**Spring:**
- June 30 – Scholarship Deadline and International Deadline
- November 1 – Final Deadline

Applicants who have not assembled their complete application for the IME MS program in time for an upcoming application deadline are encouraged to apply to one of our certificate programs. Credits taken in our Entrepreneurship and Technology Commercialization graduate certificate (https://www.fox.temple.edu/graduate-certificates/certificates/graduate-certificate-in-entrepreneurship-technology-commercialization) and Innovation Strategy graduate certificate (http://www.fox.temple.edu/cms_academics/graduate-certificates/certificates/graduate-certificate-in-innovation-strategy) programs can be transferred to the IME MS.

Applications are reviewed as they are received and can sometimes be considered after the deadline.

APPLY ONLINE (http://fox.force.com/SiteLogin) to this Fox graduate program at http://fox.force.com/SiteLogin.

**Letters of Reference:**

**Number Required:** 2

**From Whom:** Letters of recommendation should be obtained from college/university faculty members familiar with academic competence and/or professional references (employers) who know the applicant well and can attest to her/his leadership ability.

**Bachelor's Degree in Discipline/Related Discipline:** A baccalaureate degree is required.

**Statement of Goals:** Two essays are required, including a statement of goals and an essay on leadership. An additional statement is optional.

**Standardized Test Scores:**

**GMAT/GRE:** Required.

**TOEFL:** 100 iBT or 600 PBT minimum. Applicants may substitute the IELTS for the TOEFL with a comparable minimum score of 7.5.

**Test Waivers:** GMAT scores are typically waived for professionals with more than 10 years of work experience, as well as for faculty members or students from STEM undergraduate programs with a 3.0 or higher GPA. Requests for a GMAT waiver must be sent via email.

**Resume:** Current resume required.

**Interview:** A personal interview is conducted by invitation only, after an application has been submitted and reviewed.

## Program Requirements

FOX SCHOOL OF BUSINESS AND MANAGEMENT (http://www.fox.temple.edu)

About the Program
This program is not accepting applications for the 2018-2019 academic year.

Marketing, M.S.
FOX SCHOOL OF BUSINESS AND MANAGEMENT (http://www.fox.temple.edu)

About the Program
The M.S. in Marketing prepares graduates to produce actionable insights and analyses using quantitative, qualitative, and strategic information about customers, the company, and competitors. Graduates are prepared to assume responsibility for a market, brand, or product line; to enter marketing management; or to conduct marketing research and analytics. The M.S. in Marketing is designed to allow students to acquire advanced skills and techniques that can be applied to solve complex strategic and tactical problems relating to customers and competition.

Time Limit for Degree Completion: 6 years
Campus Location: Center City, Online
Full-Time/Part-Time Status: The Marketing M.S. degree program can be completed on a full- or part-time basis.

Affiliation(s): Research is supported by Fox School of Business and Management’s Center for Data Analytics, Center for Data Science, Center for Statistical Analysis, and numerous grants from government and industry.

Accreditation: All Fox School of Business and Management graduate programs are accredited by the Association to Advance Collegiate Schools of Business (AACSB International).

Areas of Specialization: The M.S. in Marketing offers three concentrations for specialized study:
- Enterprise Marketing Management
- Marketing Research and Insight
- Strategic Advertising and Marketing

Job Prospects: Students in the M.S. in Marketing program receive career counseling and placement services provided by the Fox Center for Student Professional Development. Graduates are prepared for employment in computer/information technology, consulting, consumer products and services, energy/utilities, financial services/banking, government, healthcare, industrial products and services, manufacturing, pharmaceuticals, telecommunications, and tourism/transportation.

Non-Matriculated Student Policy: Students with an undergraduate GPA of 3.25 or higher may be allowed to take classes under non-matriculated status. Non-matriculated students may take a maximum of 9 credits. Any additional courses require the student to be matriculated in a program, to pursue the certificate, or to enroll in the 4+1 program.

Financing Opportunities: Citizens and permanent residents of the United States are considered domestic students and are typically eligible for federal student loans as well as alternative loans through private lenders. The Fox School grants 5% tuition scholarships to alumni who are admitted to the program. Scholarship funds are limited and available based on merit.

Employment opportunities on campus are limited. Many students find opportunities for work off campus. Note that international students must follow visa requirements.

Admission Requirements and Deadlines
Application Deadline:
Fall:
- December 15 – Early Decision Deadline
- March 1 – Scholarship Deadline and International Deadline
- June 30 – Final Deadline

Spring:
- June 30 – Scholarship Deadline and International Deadline
- November 1 – Final Deadline

Applications are reviewed as they are received and can sometimes be considered after the deadline.

APPLY ONLINE (http://fox.force.com/SiteLogin) to this Fox graduate program at http://fox.force.com/SiteLogin.

Letters of Reference:
Number Required: 2
From Whom: Professional references from an immediate supervisor, current or past, are preferred. Academic references are acceptable.

Bachelor’s Degree in Discipline/Related Discipline: A baccalaureate degree is required.

Statement of Goals: Describe your future goals in specific terms and how the M.S. will assist you in achieving those goals.

Standardized Test Scores:
GRE/GMAT: Required. Scores for the GRE typically fall within the following percentile ranges: 50 to 99 Verbal; 80 to 99 Quantitative.

For applicants whose native language is not English, the TOEFL, IELTS, or PTE Academic exam is required:
- TOEFL: 100 iBT or 600 PBT minimum
- IELTS: 7.5
- PTE Academic: 72 minimum

Resume: Current resume required.

Transfer Credit: Upper-level graduate credits from an AACSB-accredited graduate business program, but not previously applied to a conferred degree, may be transferred into the M.S. program. The credits must be part of the required degree program at Temple University. To be transferred, the grade must be a "B" or better. The Admissions Committee makes recommendations for transferring credits to the

Concentration Courses: 15

Enterprise Marketing Management
- MKTG 5107 Product Management
- MKTG 5109 Mobile Marketing and Communications
- MKTG 5115 International Marketing
- MKTG 5156 Mktg Mgt-Digital Mktplac

Marketing Research and Insight
- MKTG 5111 Customer Data Analytics
- STAT 5001 Quantitative Methods for Business
- STAT 5607 Advanced Business Analytics
  - Two additional STAT courses at the 5000 level and higher

Strategic Advertising and Marketing 3
- ADV 5502 Media Planning and Analysis
- ADV 5503 Persuasion and the Marketplace
- ADV 5504 Visual Communication and Branding
- ADV 5505 User Experience Design and Strategy
- STAT 5602 Visualization: The Art of Numbers and the Psychology of Persuasion

Capstone Course
- MKTG 5118 EMM Capstone 4
  - or MKTG 5108 Data and Financial Driven Marketing

Total Credit Hours: 30

1 Students in the Enterprise Marketing Management and in the Marketing Research and Insight concentrations enroll in MKTG 5103. Students in the Strategic Advertising and Marketing concentration take ADV 5501.

2 Electives may be selected from the breadth of courses offered by Fox School of Business and Management with approval.

3 The concentration is offered jointly with the Klein College of Media and Communication at Temple University.

4 MKTG 5108 may be taken as the capstone course only by students in the Enterprise Marketing Management concentration.

Culminating Events:

Capstone Experience:
MKTG 5118 EMM Capstone constitutes the culminating event for the Marketing M.S. program. In this immersive capstone experience, students typically work with a real-world client to solve a strategic or analytic problem. With supervision and mentorship from a faculty member, students may conduct field research, analyze data, assess the market opportunity for the organization, and apply their learning to develop a strategic marketing communications plan for the client. Students present their plan at the end of the program.

Quantitative Finance and Risk Management, M.S.

FOX SCHOOL OF BUSINESS AND MANAGEMENT (http://www.fox.temple.edu)

About the Program

The M.S. in Quantitative Finance and Risk Management is an interdisciplinary program in the Fox School of Business and Management. The curriculum combines studies in financial theory, mathematical modeling, computational methods, and global markets.

Time Limit for Degree Completion: 2 years

Campus Location: Center City, Main
Full-Time/Part-Time Status: Students are required to complete the degree program through classes offered during the day or in the evening after 4:30 p.m. Required courses offered each year during the August Finance Academy must also be completed. Full-time students are able to complete the degree program in 10 or 22 months, while part-time students taking 8 or fewer credits per term are able to complete the program in 2 years.

Affiliation(s): Research is supported by Fox School of Business and Management's Advanta Center for Research in Financial Institutions, Center for Healthcare Research and Management, Innovation and Entrepreneurship Institute, and Institute of Global Management Studies. Research interests of the Fox School faculty are also supported by numerous centers and institutes throughout Temple University. Faculty in the Finance Department conduct research in acquisitions dividend policy, asset-based back securities, corporate governance, corporate restructuring, portfolio theory, and real estate analysis.

Accreditation: All Fox School of Business and Management graduate programs are accredited by the Association to Advance Collegiate Schools of Business (AACSB International).

Job Prospects: Professionals with a Quantitative Finance and Risk Management focus are distinctively qualified to contribute in financial modeling, information technology, institutional risk management, portfolio management, securities trading and sales, and more.

Non-Matriculated Student Policy: Students with an undergraduate GPA of 3.0 or higher may be allowed to take classes under non-matriculated status. Non-matriculated students may take a maximum of 9 credits. Any additional courses require the student to be matriculated in a program.

Financing Opportunities: Assistantships, when available, require 20 hours of service per week engaging in teaching and/or supervised research. An assistantship provides a stipend and tuition scholarship.

Admission Requirements and Deadlines

Application Deadline:

Fall:

• December 15 – Early Decision Deadline
• March 1 – Scholarship Deadline and International Deadline
• June 30 – Final Deadline

Applications are reviewed as they are received and can sometimes be considered after the deadline.

APPLY ONLINE (http://fox.force.com/SiteLogin) to this Fox graduate program at http://fox.force.com/SiteLogin.

Letters of Reference:

Number Required: 2

From Whom: Recommendations should be professional references from supervisors and co-workers or academic references. References should be obtained from those who know the applicant well and who can attest to the applicant's ability to excel in the M.S. in Quantitative Finance and Risk Management program.

Coursework Required for Admission Consideration: A strong record of achievement in quantitative coursework, including Multivariate Calculus, Linear Algebra, and Advanced Statistics and Probability, is required. Prior or anticipated exposure to Finance and Computer Programming is also required.

Bachelor's Degree in Discipline/Related Discipline: A baccalaureate degree is required.

Statement of Goals: An essay on your professional plans and goals is required. This statement should be 1 to 3 pages in length and reflect your influences, values, and aspirations and interest in the M.S. in Quantitative Finance and Risk Management program. The following questions may be addressed:

• What particular past experiences or previous exposure (academic, professional, etc.) prepared or motivated you to pursue an M.S. in Quantitative Finance and Risk Management degree?
• How would you expect to change over the course of the program?
• What personal and professional values and skills do you hope to acquire through the academic content?
• How will obtaining the M.S. in Quantitative Finance and Risk Management degree support your career objectives or potential career path(s)?
• Given the importance of teamwork and collaboration in business, what are the most significant strengths or contributions you bring to a team?

Standardized Test Scores:

GMAT/GRE: Required. The average GMAT score is approaching 650.

For applicants whose native language is not English, the TOEFL, IELTS, or PTE Academic exam is required:

TOEFL: 100 iBT or 600 PBT minimum

IELTS: 7.5 minimum

PTE Academic: 72 minimum

Resume: Current resume required.

Transfer Credit: Transfer credit is not accepted for the M.S. in Quantitative Finance and Risk Management program.

**Risk Management and Insurance, M.S.**

FOX SCHOOL OF BUSINESS AND MANAGEMENT (http://www.fox.temple.edu)

**About the Program**

This program is not accepting applications for the 2018-2019 academic year.

**Statistics, M.S.**

FOX SCHOOL OF BUSINESS AND MANAGEMENT (http://www.fox.temple.edu)

**About the Program**

The Department of Statistical Science offers an M.S. program through which students acquire in-depth knowledge of statistics. Graduates are trained to serve as professional statisticians in industry, research organizations, or government.

**Time Limit for Degree Completion:** 3 years

**Campus Location:** Main, with business foundation classes offered throughout the year. Upper-level courses are not offered at all campuses, but courses may be offered online.

**Full-Time/Part-Time Status:** Students complete the degree program through classes offered after 4:30 p.m. The degree program can be completed on a full- or part-time basis.

**Areas of Specialization:** Faculty members offer master’s students substantial coursework in statistical theory and applications.

**Job Prospects:** Graduates of the master’s program may find employment as statisticians in the pharmaceutical industry, in medical research organizations, or in other areas of business and government.

**Non-Matriculated Student Policy:** Students with an undergraduate GPA of 3.0 or above may take classes on a non-matriculated status. Non-matriculated students can take a maximum of 9 credits.

**Financing Opportunities:** Assistantships are typically reserved for those engaged in doctoral study.

**Admission Requirements and Deadlines**

**Application Deadline:**

- Fall:
  - December 15 – Early Decision Deadline and International Deadline
  - March 1 – Scholarship Deadline
  - June 30 – Final Deadline

Applications are reviewed as they are received and can sometimes be considered after the deadline.

International students who miss the December 15 deadline are required to submit to Temple University an evaluation of their transcript(s) by an approved educational evaluation firm.
APPLY ONLINE (http://fox.force.com/SiteLogin) to this Fox graduate program at http://fox.force.com/SiteLogin.

Letters of Reference:
Number Required: 2

From Whom: Professional references from an immediate supervisor, current or past, are preferred. Academic references are acceptable.

Coursework Required for Admission Consideration: Students must have taken two semesters of university-level Calculus or its equivalent. A course in Linear Algebra is also desirable.

Bachelor's Degree in Discipline/Related Discipline: A baccalaureate degree is required, although it need not be in a business discipline.

Statement of Goals: A statement of goals is required.

Standardized Test Scores:
GRE/GMAT: Required. Quantitative and verbal scores on the GRE should be in the 50th percentile or above. Scores under 500 on the GMAT are not considered for the M.S. program.

TOEFL: 88 iBT or 575 PBT minimum. Any student admitted with a TOEFL score below 100 iBT or 600 PBT must pass an English skills course during the first term of enrollment at Temple University. Those having taken the PBT have the additional option of testing out of the English course by taking and passing the SPEAK test at Temple.

Resume: Current resume required.

Transfer Credit: Upper-level graduate credits from an accredited graduate program, but not previously applied to a conferred degree, may be transferred into the M.S. program. The credits must be part of the required degree program at Temple University. To be transferred, the grade must be a "B" or better. The Admissions Committee makes recommendations with regard to transfer credits to the Director of the Graduate Program in Statistical Science. The maximum number of credits a student may transfer is 6.

Total Credit Hours 30

Students select graduate business elective courses in consultation with the Director of the Graduate Program in Statistical Science.

Culminating Event: Satisfactory completion of coursework is all that is required to earn the degree.
• Bayesian inference
• Clinical trials
• Design of experiments
• Inequalities in statistics
• Linear and generalized linear models
• Methods in AIDS research and teratology
• Multiple comparisons
• Multivariate analysis
• Parametric and nonparametric inference
• Pharmaceutical statistics
• Quality control
• Ranking and selection
• Resampling methods
• Robust inference
• Statistical computing and graphics
• Survey sampling
• Survival analysis
• Time series

Job Prospects: The program is dedicated to producing well-trained statisticians who work as researchers in academia, industry, and government. In recent years, more than half of our Ph.D. recipients found employment as statisticians in the pharmaceutical industry or in medical research organizations.

Non-Matriculated Student Policy: Qualified non-matriculated students are permitted to take doctoral courses.

Financing Opportunities: The principal duties of a Teaching Assistant include teaching, assisting faculty members in the classroom, and grading. An assistantship provides a stipend and tuition remission.

Admission Requirements and Deadlines

Application Deadline:

Fall: January 15; December 15 international

Applications for the Ph.D. program are all processed together after the deadline. International students who miss the December 15 deadline are required to submit to Temple University an evaluation of their transcript(s) by an approved educational evaluation firm.

APPLY ONLINE (http://fox.force.com/SiteLogin) to this Fox graduate program at http://fox.force.com/SiteLogin.

Letters of Reference:

Number Required: 2

From Whom: Letters of recommendation should be obtained from college/university faculty members familiar with the applicant's academic competence.

Coursework Required for Admission Consideration: Applicants must have completed coursework in Differential and Integral Calculus, including Multivariable Calculus, as well as a course in Linear Algebra.

Master's Degree in Discipline/Related Discipline: A master's degree is not required.

Bachelor's Degree in Discipline/Related Discipline: All applicants must present credentials that are the equivalent of the appropriate baccalaureate degree at Temple University.

Statement of Goals: A statement of goals is required.

Standardized Test Scores:

GRE: Required. Successful applicants typically possess elite level scores on the quantitative section of the GRE.

TOEFL: 100 iBT or 600 PBT minimum

Resume: Current resume required.

</tbody>
</table>

Total Credit Hours 48

Additional Requirements: An additional requirement is completion of a Summer research paper.

Culminating Events:

Statistics Competency Examination:
An assessment of the students' proficiency in statistical theory and methodology is made at the end of their first year in the program with an exam offered in June. Students who fail the statistics competency examination on the first attempt must sit for reexamination prior to the Fall term of their second year. A second failure results in dismissal from the University. No third attempt is allowed.

Preliminary Examination:
The purpose of the preliminary examination is to demonstrate critical and interpretive knowledge of current research. The subject areas are determined, in advance, by the faculty of the department. The preliminary exam should be completed no more than one term after the student completes the coursework component of the program. Students who are preparing to write their preliminary examinations should confirm a time and date with their departmental advisor.

The members of the student's department write the questions for the preliminary exam. The student must answer every question on the examination in order to be evaluated by the Department Committee. The evaluators look for a breadth and depth of understanding of specific research areas; a critical application of that knowledge to specific phenomena; and an ability to write technical prose. Each member votes
to pass or fail the student. In order to pass, a majority of the committee members must agree that the exam has been satisfactorily completed.

Proposal:
The dissertation proposal demonstrates the student's knowledge of and ability to conduct the proposed research. The proposal should consist of the following:

1. the context and background surrounding a particular research problem;
2. an exhaustive survey and review of literature related to the problem; and
3. a detailed methodological plan for investigating the problem.

The proposal should be completed and approved no more than one year after completing coursework. Upon approval, a timeline for completing the investigation and writing process is established.

Dissertation:
The doctoral dissertation is an original empirical study that makes a significant contribution to the field. It should expand the existing knowledge and demonstrate the student's knowledge of both research methods and a mastery of her/his primary area of interest. Dissertations should be rigorously investigated; uphold the ethics and standard of the field; demonstrate an understanding of the relationship between the primary area of interest and the broader field of business; and be prepared for publication in an academic journal.

The Doctoral Advisory Committee is formed to oversee the student's doctoral research and is comprised of at least three Graduate Faculty members. Two members, including the Chair, must be from the student's department. The Chair is responsible for overseeing and guiding the student's progress, coordinating the responses of the committee members, and informing the student of her/his academic progress.

The Dissertation Examining Committee evaluates the student's dissertation and oral defense, including the student's ability to express verbally her/his research question, methodological approach, primary findings, and implications. The Dissertation Examining Committee votes to pass or fail the dissertation and the defense at the conclusion of the public presentation. This committee is comprised of the Doctoral Advisory Committee and at least one additional faculty member from outside the department.

If any member decides to withdraw from the committee, the student shall notify the Chair of the Dissertation Examining Committee and the Director of Graduate Programs in Statistical Science. The student is responsible for finding a replacement, in consultation with the Chair. Inability to find a replacement shall constitute evidence that the student is unable to complete the dissertation. In such a case, the student may petition the Director of Graduate Programs in Statistical Science for a review. Once review of the facts and circumstances is completed, the Director will rule on the student's progress. If the Director rules that the student is not capable of completing the dissertation, s/he will be dismissed from the program. This decision may be appealed to the Senior Associate Dean. If dismissed, the student may appeal to the Graduate School.

Students who are preparing to defend their dissertation should confirm a time and date with their Dissertation Examining Committee and register with the Graduate Secretary at least 15 days before the defense. The Graduate Secretary arranges the time, date, and room within two working days, and forwards to the student the appropriate forms. After the Graduate Secretary has arranged the time, date, and room for the defense, the student must send to the Graduate School a completed "Announcement of Dissertation Defense" form, found in TUportal under the Tools tab within "University Forms," at least 10 days before the defense. The department posts flyers announcing the defense, and the Graduate School announces the defense on its website.

Strategic Advertising and Marketing, M.S.

FOX SCHOOL OF BUSINESS AND MANAGEMENT (https://www.fox.temple.edu)

About the Program

The M.S. in Strategic Advertising and Marketing combines global leadership insights from the Fox School of Business and Management with the storytelling expertise of Temple University’s Lew Klein College of Media and Communication. Designed for professionals working in industry, the part-time curriculum balances theory with practical, hands-on application that is relevant for the rapidly evolving media environment. Students gain hands-on experience in crafting multi-platform media plans, proposing market research strategies, creating data visualizations, and analyzing performance metrics. Ultimately, they become skilled in bridging the gap between marketing and advertising. Students who complete the degree can:

• understand and apply the 4P’s of marketing;
• develop a marketing plan for an organization;
• evaluate consumer behavior and link it to marketing strategy; and
apply strategic marketing concepts, integrating data analysis, consumer behavior, and other theories to make decisions.

**Time Limit for Degree Completion**: 6 years

**Campus Location**: Center City, Main

**Full-Time/Part-Time Status**: The degree program is completed on a part-time basis through evening classes.

**Affiliation(s)**: Research is supported by Fox School of Business and Management's Center for Data Analytics, Center for Data Science, Center for Statistical Analysis, and numerous grants from government and industry.

**Accreditation**: All Fox School of Business and Management graduate programs are accredited by the Association to Advance Collegiate Schools of Business (AACSB International).

**Job Prospects**: Students in the M.S. in Strategic Advertising and Marketing program receive career counseling and placement services provided by the Fox Center for Student Professional Development. Graduates are prepared for the following roles:

- Director of Advertising and Data Analytics, Marketing Analytics, or Mobile Strategy
- Interactive Account Director, Brand Strategist, Content Producer, Marketing Manager/Strategist, or Marketing Specialist
- Lead Generation or SEO Specialist
- Manager of Integrated Marketing, Mobile Advertising Accounts, SEO Accounts, Social Media, or Strategic Planning
- Marketing Research Analyst
- New Media Planner/Buyer
- Paid Search Specialist
- Product Manager
- User Experience Strategist

**Non-Matriculated Student Policy**: Students with an undergraduate GPA of 3.25 or higher may be allowed to take classes under non-matriculated status. Non-matriculated students may take a maximum of 9 credits. Any additional courses require the student to be matriculated in a program, to pursue the certificate, or to enroll in the 4+1 program.

**Financing Opportunities**: Citizens and permanent residents of the United States are considered domestic students and are typically eligible for federal student loans as well as alternative loans through private lenders. The Fox School grants 5% tuition scholarships to alumni who are admitted to the program. Scholarship funds are limited and available based on merit.

Employment opportunities on campus are limited. Many students find opportunities for work off campus. Note that international students must follow visa requirements.

**Admission Requirements and Deadlines**

**Application Deadline**:

**Fall**:

- December 15 – Early Decision Deadline
- March 1 – Scholarship Deadline and International Deadline
- June 30 – Final Deadline

**Spring**:

- August 1 – Scholarship Deadline and International Deadline
- November 1 – Final Deadline

Applications are reviewed as they are received and can sometimes be considered after the deadline.

APPLY ONLINE (http://fox.force.com/SiteLogin) to this Fox graduate program at https://fox.force.com/SiteLogin.

**Letters of Reference**:

**Number Required**: 2

**From Whom**: Professional references from an immediate supervisor, current or past, are preferred. Academic references are acceptable.

**Bachelor's Degree in Discipline/Related Discipline**: A baccalaureate degree is required.

**Statement of Goals**: Describe your future goals in specific terms and how the M.S. will assist you in achieving those goals.

**Standardized Test Scores**:

- GRE/GMAT: Required. Scores for the GRE typically fall within the following percentile ranges: 50 to 99 Verbal; 80 to 99 Quantitative.

For applicants whose native language is not English, the TOEFL, IELTS, or PTE Academic exam is required:

- TOEFL: 100 iBT or 600 PBT minimum
- IELTS: 7.5
- PTE Academic: 72 minimum

**Resume**: Current resume required.

**Transfer Credit**: Upper-level graduate credits from an AACSB-accredited graduate business program, but not previously applied to a conferred degree, may be transferred into the M.S. program. The credits must be part of the required degree program at Temple University. To be transferred, the grade must be a "B" or better. The Admissions Committee makes recommendations for transferring credits to the department chair. The maximum number of credits a student may transfer is 6.

**Program Requirements**

**General Program Requirements**:

**Number of Credits Required Beyond the Baccalaureate**: 30

**Required Courses**:

Graduate Certificate: Business Analytics
FOX SCHOOL OF BUSINESS AND MANAGEMENT (http://www.fox.temple.edu)

About the Certificate
The graduate certificate in Business Analytics is designed to foster deep analytical skills and the know-how needed to use the analysis of big data to make effective decisions. Students are prepared to:

• understand descriptive, predictive, and prescriptive analytics, recognize when each is appropriate, and understand the fundamental methods and techniques used in each;
• understand the applications, assumptions, and limitations of business-analytic models and techniques;
• develop expertise in the use and application of analytical tools and software;
• obtain information and insight from datasets of varying complexity; and
• effectively communicate insights and results of analyses in managerially relevant terms.

Admission Requirements and Deadlines
Students are accepted into the certificate program in both the Fall and Spring terms.

APPLY ONLINE to this certificate program (http://fox.force.com/SiteLogin).

Graduate Certificate: Entrepreneurship and Technology Commercialization

FOX SCHOOL OF BUSINESS AND MANAGEMENT (http://www.fox.temple.edu)

About the Certificate

The graduate certificate in Entrepreneurship and Technology Commercialization is a concise, high-impact program that gives participants the understanding and practical skills for turning innovative ideas or new technologies into commercially viable products and services. It is part of a system of technology commercialization support programs offered by the Innovation and Entrepreneurship Institute (IEI) (http://www.fox.temple.edu/institutes-and-centers/innovation-entrepreneurship-institute/events/overview). This certificate is jointly designed and delivered by the Fox School of Business and Management and the College of Engineering.

Our graduate certificates are designed for working professionals and leverage hybrid course formats that provide the best of both online and in-person experiences. Rigorous, high-impact courses are taught by world-leading faculty. Credits earned transfer into programs offered by the Innovation and Entrepreneurship Institute or our M.B.A. (https://www.fox.temple.edu/mba) degree.

Some questions answered in this certificate program are:

- How do you transform technological features and innovations into value propositions from a customer’s perspective?
- How can you understand the adoption decision in order to formulate a “go-to-market” strategy?
- How can you consider multiple business model options to increase the likelihood of new venture success?

This certificate is for students who aspire to be entrepreneurs, inventors, and managers of growing profitable businesses and want to learn to “think out of the box.” The central focus of the first set of modules is on two key success factors:

1. the entrepreneur or innovator, and
2. the ability to create, recognize, and evaluate opportunities.

Students learn how to experiment with different go-to-market strategies and business models as they assess the feasibility of their own and others’ ideas. This certificate program is appropriate for:

- Corporate R&D personnel who want to better understand how to position their inventions for commercial success or want to move into new product development or R&D management roles
- Managers and executives who must monetize technology or innovative products and services as well as anyone involved in technology transfer or commercialization
- Faculty and Ph.D. students who have invented a technology and want help applying for translational research grants (e.g., NSF I-Teams / I-Corp, SBIR / STTR Phase I Funding) or want to commercialize the technology (either via licensing or starting a new venture)
- Entrepreneurs or graduate students with an innovative idea for a new product/service or that might like to be paired with an inventor or patented technology

Admission Requirements and Deadlines

Students are accepted into the certificate program in both the Fall and Spring terms; Summer start dates may be available in some years. Faculty and students enrolled in Ph.D., M.S., and M.B.A. programs in Temple University’s College of Science and Technology, College of Engineering, Lewis Katz School of Medicine, and Fox School of Business and Management are automatically accepted into the certificate program. Other participants with 10 years of work experience, a 3.0 undergraduate GPA, or GMAT scores in the 75 percentile and above are also typically accepted automatically. Prospective participants with 3 to 9 years of work experience must submit a resume and statement of goals to be considered for admission.

APPLY ONLINE to this certificate program (http://fox.force.com/SiteLogin).

Certificate Requirements

Number of Credits Required to Complete the Certificate: 4.5 for a non-transcripted certificate or 9 for a transcripted certificate

After completing 4.5 credits, students receive a non-transcripted certificate and have the option to stop there, continue to complete the 9-credit transcripted certificate, or apply to transfer into the Innovation Management and Entrepreneurship M.S. (http://bulletin.temple.edu/graduate/scd/fox/innovation-management-entrepreneurship-ms/#text)

**Graduate Certificate: Healthcare Innovation Management**
FOX SCHOOL OF BUSINESS AND MANAGEMENT (http://www.fox.temple.edu)

**About the Certificate**
The graduate certificate in Healthcare Innovation Management is a concise, high-impact program that gives healthcare leaders the tools to become more innovative in their thinking and more focused on non-traditional approaches to delivery. Our healthcare system is undergoing dramatic changes as a result of market forces, consumer expectations, and implementation of the Affordable Care Act (ACA). Also known as Obamacare, the ACA includes direct and indirect incentives to innovate in financing, organizational form, and delivery.

Our graduate certificates are designed for working professionals and leverage hybrid course formats that provide the best of both online and in-person experiences. Rigorous, high-impact courses are taught by world-leading faculty. Credits earned transfer into graduate degree programs, such as the Innovation Management and Entrepreneurship M.S. (http://www.fox.temple.edu/specialized-masters/innovation-management-entrepreneurship) and the M.B.A. (http://www.fox.temple.edu/mba) in Business Administration/Health Sector Management. This certificate is jointly designed by the Department of Risk, Insurance and Healthcare Management and the Department of Strategic Management in the Fox School of Business and Management.

**Admission Requirements and Deadlines**
Students are accepted into the certificate program in both the Fall and Spring terms; Summer start dates may be available in some years. Faculty and students enrolled in Ph.D., M.S., and M.B.A. programs in Temple University’s College of Science and Technology, College of Engineering, School of Medicine, and Fox School of Business and Management are automatically accepted into the certificate program. Graduate Certificate: Innovation Strategy

About the Certificate

The Innovation Strategy graduate certificate is a concise, high-impact program that prepares the next generation of innovation leaders and high-potential employees to build agile organizations, enhance innovation, and make decisions appropriate for the rapidly changing global competitive landscape.

Our graduate certificates are designed for working professionals and leverage hybrid course formats that provide the best of both online and in-person experiences. Rigorous, high-impact courses are taught by world-leading faculty. Credits earned transfer into graduate degree programs, such as the Innovation Management and Entrepreneurship M.S. (http://www.fox.temple.edu/specialized-masters/innovation-management-entrepreneurship) or our highly ranked M.B.A. (http://www.fox.temple.edu/mba) degree.

Some questions answered in this certificate program are:

- How can you create an organizational environment that rewards innovation?
- How do you design structures to reduce resistance to change?

Innovation and entrepreneurship are ubiquitous in today's modern competitive landscape. Firms that sit still are left behind as new leaders or, indeed, the entire industry surges ahead. In this rapidly changing landscape, it is critical that employees and managers alike understand how to overcome both the strategic and tactical challenges of organizational innovation. The Innovation Strategy certificate program provides students with the skills needed to remain competitive and strategically drive innovation within an organization and is appropriate for:

- Managers responsible for strategy and innovation
- High-potential employees who want to drive innovation
- Entrepreneurs who want to build organizations focused on innovation and change

Admission Requirements and Deadlines

Students are accepted into the certificate program in both the Fall and Spring terms; Summer start dates may be available in some years. Kornberg School of Dentistry

Temple University’s Maurice H. Kornberg School of Dentistry is a center of excellence in dental education, patient care, and community-based service and research. The school’s mission is to promote oral health through the education of diverse general and specialty dentists with advanced skills who provide care that is comprehensive, patient centered, and evidence based, and who engage in research, scholarly activities, and community service. Founded in 1863 as the Philadelphia Dental College, it is the second oldest continuously operating dental school in the United States.

The Kornberg School of Dentistry provides more than 300,000 patient procedures every year and is known around the nation and the world for the quality of its clinical education. The school’s patient base and outreach in its immediate community give students exceptional opportunities to develop clinical skills in the full range of oral health care. A complete renovation of the school’s preclinical lab, four general practice clinics, and eight specialty clinics completed in 2014 has created a state-of-the-art environment for clinical education and patient care. Temple dental students work in a comprehensive-care, large-practice setting equipped with the latest technologies, including computer-aided design and computer-aided manufacturing (CAD/CAM) and cone-beam imaging.

A growing faculty research enterprise explores issues with broad-scale impact on dental and overall health. Dental faculty are conducting research into remineralization of dental enamel; regeneration of dental pulp tissue; development of bacterial viruses to combat infections caused by antibiotic-resistant bacterial strains; the effect of maternal behavior in influencing dental hygiene practices in young children; and other topics.

Temple’s Kornberg School of Dentistry prepares students to serve their patients and to shape the continued development of the dental profession and oral health. Kornberg School graduates demonstrate the highest levels of skills, with outstanding manual dexterity, diagnostic and clinical skills, and a sound understanding of the science and business aspects of dental practice.

Programs

Degree Program

- Oral Biology, M.S. (p. 371)

Professional Certificates

- Advanced Education in General Dentistry
- Dental Public Health
- Endodontics
- Orthodontics
- Periodontics

Graduate Faculty

Jasim M. Albandar, Professor, Department of Periodontology and Oral Implantology, Kornberg School of Dentistry; D.M.D., Temple University.

Vinodh Bhoopathi, Assistant Professor, Department of Pediatric Dentistry and Community Oral Health Sciences, Kornberg School of Dentistry; D.Sc.D., Boston University.

Kenneth G. Boberick, Associate Professor, Department of Restorative Dentistry, Kornberg School of Dentistry; D.M.D.

Jeffrey H. Godel, Associate Professor (Clinician Scholar), Department of Orthodontics, Kornberg School of Dentistry; D.D.S.

Amid Ismail, Professor, Department of Restorative Dentistry, Kornberg School of Dentistry; Dr.P.H., University of Michigan.

Paul Jones, Assistant Professor, Department of Pediatric Dentistry and Community Oral Health Sciences, Kornberg School of Dentistry; Ph.D., Temple University.

Laurie MacPhail, Professor, Department of Oral Maxillofacial Pathology, Medicine and Surgery, Kornberg School of Dentistry; D.M.D.

Santiago Orrego, Assistant Professor, Department of Restorative Dentistry, Kornberg School of Dentistry; Ph.D., University of Maryland Baltimore County.

Thomas E. Rams, Professor, Department of Periodontology and Oral Implantology, Kornberg School of Dentistry; D.D.S., University of Maryland.

James J. Sciote, Professor, Department of Orthodontics, Kornberg School of Dentistry; Ph.D., University of Michigan.

Roy H. Stevens, Professor, Department of Endodontontology, Kornberg School of Dentistry; D.D.S., Columbia University.

Marisol Tellez-Merchán, Associate Professor, Department of Pediatric Dentistry and Community Oral Health Sciences, Kornberg School of Dentistry; Ph.D., University of Michigan.

Orhan C. Tuncay, Professor, Department of Orthodontics, Kornberg School of Dentistry; D.M.D.

Eugene J. Whitaker, Associate Professor Emeritus, Department of Restorative Dentistry, Kornberg School of Dentistry; D.M.D.

Jie Yang, Professor, Department of Oral Maxillofacial Pathology, Medicine and Surgery, Kornberg School of Dentistry; D.M.D., Temple University.

Maobin Yang, Assistant Professor, Department of Endodontontology, Kornberg School of Dentistry; Ph.D., University of Connecticut.

Oral Biology, M.S.

KORNBERG SCHOOL OF DENTISTRY (http://dentistry.temple.edu)

About the Program

The M.S. in Oral Biology program is limited to candidates who have been accepted to a postdoctoral dental specialty program at Temple University’s Kornberg School of Dentistry. Many of the application requirements for the master’s in Oral Biology program can be submitted in conjunction with the PASS application for dental specialty training. Information regarding dental specialty programs at the Kornberg School of Dentistry can be obtained at http://dentistry.temple.edu/.

The M.S. in Oral Biology provides advanced education on the structure, development, and function of oral tissues, their interrelationships, and their relation to other organ systems in both health and disease. Emphasis is placed on gaining advanced understanding of oral and craniofacial structure and function in health and disease, and application of modern biological principles and research techniques in the diagnosis,
treatment, and prevention of oral and craniofacial diseases and anomalies. The goals of the M.S. in Oral Biology program are to:

- advance knowledge and understanding in the scientific field of oral and craniofacial biology;
- develop "clinical scholars" in dentistry by allowing those in postdoctoral clinical specialty programs the opportunity to gain graduate-level education in a biological basic science field applicable to dentistry; and
- provide dentists with graduate-level training and experience in research methodology and technology to better qualify them for careers in academic dentistry and/or industry-related oral health activities.

Time Limit for Degree Completion: Variable, depending on affiliated specialty program

Campus Location: Health Sciences

Full-Time/Part-Time Status: Students complete the M.S. degree program in conjunction with their specialty certificate program. All specialty certificate programs are full-time.

Interdisciplinary Study: The curriculum of the Oral Biology M.S. program is interdisciplinary and crosses traditional department boundaries within Dentistry and basic biomedical sciences, such as Anatomy, Microbiology, Pharmacology, and Physiology.

Areas of Specialization: Areas of study in the Oral Biology M.S. program include traditional basic biomedical science disciplines, such as Anatomy, Microbiology, Pharmacology, and Physiology, with emphasis on how these areas relate to oral tissues and diseases. Study and research opportunities are offered in a variety of areas, including, but not limited to, Dental Biomaterials, Oral Implantology, Oral and Maxillofacial Radiology, Oral Microbiology and Immunology, Oral Molecular Biology, Oral Mucosal Disorders, Periodontal and Craniofacial Regeneration, Pulp Biology, and various clinical specialty fields.

Job Prospects: Graduates of the M.S. in Oral Biology degree program are engaged in academic teaching and research careers, private clinical patient care, and industry-related oral health activities.

Non-Matriculated Student Policy: Coursework may not be taken on a non-matriculated basis.

Financing Opportunities: Contact the Office of Graduate Education in the Kornberg School of Dentistry for information.

Admission Requirements and Deadlines

Application Deadline:
Applications for the M.S. in Oral Biology are processed through Kornberg School of Dentistry’s Office of Graduate Education throughout the year as they are received.

* * APPLICATIONS are NOT accepted online * *

Letters of Reference:
Number Required: 2

From Whom: Letters of recommendation should be obtained from dental school faculty members familiar with the applicant’s academic background and potential for graduate-level study.

Degree Required for Admission Consideration: Applicants to the Oral Biology graduate program must hold a D.D.S., D.M.D., or B.D.S. degree (or equivalent) from an accredited college or university in the United States or its international equivalent. In addition, they must have been accepted to a postdoctoral dental specialty program at Temple University’s Kornberg School of Dentistry.

Statement of Goals: Approximately 500 to 1,000 words in length, addressing:

- Academic and research achievements to date
- Overall career goals
- Specific interest in Temple University's Oral Biology graduate program
- Area and/or topic of proposed research interests

Standardized Test Scores:
TOEFL: 79 iBT or 550 PBT minimum

Resume: Current resume required.

Program Requirements

Number of Didactic Credits Required Beyond the D.D.S. (or equivalent): 18

Culminating Events:

Thesis:
A thesis based on original investigation must be submitted and orally defended. The thesis is intended to demonstrate the student's ability to design and carry out original research, and to analyze, present, and interpret the resulting data under the direct supervision of an approved research preceptor. The thesis must address a well-focused, scientifically meaningful question and hypothesis that is of adequate scope and significance to qualify for an M.S. degree.

The date and location of a student's oral thesis defense is arranged by mutual agreement between the student and the Thesis Advisory Committee, which includes the student's research preceptor. Announcements of the thesis defense are posted at the Kornberg School of Dentistry.

The student's Thesis Advisory Committee is responsible for evaluating the thesis and its oral defense. The Thesis Advisory Committee is selected in conjunction with the approved research preceptor, who serves as the committee chair. The research preceptor must be a member of the Oral Biology graduate faculty, and approved by the Chair of the student's home academic department at the Kornberg School of Dentistry. The Thesis Advisory Committee must include at least one member (including the research preceptor) of the student's home academic department at the School of Dentistry, plus at least one outside member. The one outside member may include Temple University faculty from other departments and/or experts from outside the University. In addition, the Associate Dean for Graduate Education may serve as ex-officio member of the Thesis Advisory Committee. The majority of the members of the Thesis Advisory Committee must be members of the Oral Biology graduate faculty.

Oral Biology Graduate Program
College of Education

The College of Education at Temple University promotes education – in schools, in the workplace, in organizations, and in the community – as a critically important way to achieve social justice. Our mission is to prepare our students to become agents of change who employ cutting-edge understandings and evidence-based practices in any setting in which they might work. Our faculty include experts not only in early childhood/elementary, middle-grades, and secondary teacher education, but also in adult and organizational development, applied behavior analysis, career and technical education, counseling psychology, higher education, leadership, school psychology, special education, teaching English to speakers of other languages, and urban education.

In our research, we work both to conduct well-designed investigations that have the potential to improve learning and teaching, especially for historically underserved populations, and to provide effective mentorship of master's and doctoral students so that they can engage in similar kinds of investigations on their own. In our teaching, we strive to infuse empirical findings into our coursework in ways that provide practitioners and prospective practitioners with deep understandings of research and theory and of effective practice. As a result of our strategic location in North Philadelphia and our long history of collaboration with the School District of Philadelphia and other community partners, the College of Education is uniquely situated to bring its research and teaching into practice in order to have a collective impact in the surrounding neighborhoods. We also endeavor to bring our work to the largest possible audience in the city of Philadelphia, the region, and the nation, as well as globally.

COLLEGE OF EDUCATION (https://education.temple.edu)

Learn more about the Master of Science in Education in Accomplished Teaching (https://www.temple.edu/academics/degree-programs/accomplished-teaching-msed-ed-atch-msed).

About the Program

The Master of Science in Education program in Accomplished Teaching enables working teachers, both relatively new practitioners and veterans, to develop new knowledge and to reflect on and analyze their own practices in order to move their teaching to a higher level. A combination of core courses and electives supports and advances those who have chosen to make classroom teaching their profession while allowing them to explore individual interests and additional certifications. Courses are designed to meet the immediate needs of students and to be directly applicable to students’ home schools and communities.

Time Limit for Degree Completion: 4 years

Campus Location: Main, with some courses offered online.

Full-Time/Part-Time Status: Students complete the degree program through classes offered after 4:30 p.m. The degree program can be completed on a full- or part-time basis.

Job Prospects: Graduates are typically educators in current positions of teaching and leadership. This program is designed to enhance credentials and expand educators’ knowledge and expertise.

Non-Matriculated Student Policy: Students may take up to, but not more than, 9 credits of graduate study before being admitted to the program. The credits transfer into the program, if the student is admitted. Students completing non-matriculated courses before being admitted to the program are NOT guaranteed admission.

Financing Opportunities: Financial support opportunities may include scholarships, tuition remission, and other financial aid such as grants, loans, and federal work study.

Admission Requirements and Deadlines

Application Deadline:

Fall: March 1
Spring: November 1

Applicants should submit all required admissions documents by the application deadline to receive priority consideration for admission and financial support.

APPLY ONLINE to this graduate program.

Letters of Reference:

Number Required: 2, with a third submitted at the applicant’s discretion. Please submit the “Reference Report for Graduate Study,” found at http://www.temple.edu/grad/admissions/documents/Web_GRAD_REFERENCE_REPORT.pdf.

From Whom: Letters of recommendation should be obtained from school administrators or college/university faculty members who can provide insight into the applicant’s academic competence.

Coursework Required for Admission Consideration: All applicants must present credentials that are the equivalent of the appropriate baccalaureate degree at Temple University. Official undergraduate and graduate transcripts from all accredited institutions attended are required, as well as a copy of a valid PA Teaching Certification or demonstration of at least two years of successful practice in an educational setting.

Bachelor’s Degree in Discipline/Related Discipline: A bachelor’s degree is required. Applicants who do not meet the 3.0 UGPA requirement may be considered for admission if they meet one of the following exceptions:
1. **Standard exception**: 3.5 UGPA during the last two years AND a minimum of 3.25 Graduate GPA for 9 credits (typically taken as a non-matriculated student in the program prior to application for admission).

2. **Special exception**: Applicants who do not meet regular admission criteria may be considered for a special exception if a compelling case can be made for admission on the basis of some additional source of data.

**Statement of Goals:** In 500 to 1,000 words, outline your interest in seeking a degree with a specific focus on the career to which you aspire, your interests, and your academic and job-related experiences that are relevant to the program.

**Standardized Test Scores:**
TOEFL score (international applicants only): 88 iBT or 575 PBT minimum. Applicants with scores between 88 and 100 iBT or between 575 and 600 PBT must take an English refresher course.

**Resume**: Current resume required.

**Adult and Organizational Development, M.Ed.**

**COLLEGE OF EDUCATION** (https://education.temple.edu)

**About the Program**

The master's program in Adult and Organizational Development prepares students for professional positions in the fields of adult learning and organizational development. Temple's program supports professionals whose work focuses on facilitating developmental changes in individuals, teams, and organizations.

Coursework draws from social science theory and research to develop students' diagnostic and intervention skills in the areas of adult learning, conflict intervention, conflict management, group decision making, strategic communication, systems perspectives, team development, and training design. Classroom instruction and assignments draw heavily on students' professional experience and are aimed at developing applied intervention strategies that are useful in diverse workplace settings.

The program in Adult and Organizational Development encourages applications from students who work in a wide range of settings, including educational institutions, businesses, consulting agencies, healthcare institutions, governmental and community organizations, and non-profit groups.

Graduates of the program pursue careers in human resource management, training and adult development, organizational...
management, consulting, community organizing, and conflict intervention and mediation.

**Time Limit for Degree Completion:** 4 years

**Campus Location:** Center City

**Full-Time/Part-Time Status:** Students complete the degree program through classes offered after 4:30 p.m. and on weekends. One weekend class (AOD 9231 Proseminar in AOD) is required. The degree program can be completed on a full- or part-time basis.

**Interdisciplinary Study:** The program has a strong interdisciplinary focus. Students are encouraged to take courses throughout the University, especially in communication sciences, counseling psychology, educational psychology, human resource administration, and instructional technology. In addition, the program concentrates on applications in a wide variety of educational settings: formal and informal, public and private, schools and industries, and the like.

**Accreditation:** The program is listed with the Association for Talent Development (ATD) and the Organizational Development Network (OD Network).

**Areas of Specialization:** The program features coursework in three areas:

- Adult Learning and Training, which concentrates on developing and teaching instructional/training programs for adult personal and professional development;
- Organizational and Team Development, which develops assessment, planning, facilitation, and consulting skills to help teams and organizations design and implement change; and
- Conflict Management and Dispute Resolution, which involves developing models and best practices for positive conflict cultures and third-party interventions.

**Job Prospects:** Graduates typically pursue careers in large private and public organizations; firms that specialize in training/organizational development and conflict resolution; adult education centers; and independent practice.

**Non-Matriculated Student Policy:** Students may take up to, but not more than, 9 credits of graduate study in the program before being admitted to the program. The credits transfer into the program, if the student is admitted. **Students completing non-matriculated courses before being admitted to the program are NOT guaranteed admission.**
