Criminal Justice, Ph.D.

COLLEGE OF LIBERAL ARTS

Learn more about the Doctor of Philosophy in Criminal Justice.

About the Program

The Ph.D. degree program in Criminal Justice is designed to produce criminal justice scholars who will lead the field in academia, private and governmental research agencies, and policy-level positions in criminal justice and related organizations. The Ph.D. degree requires the completion of a minimum of 48 hours of coursework post-baccalaureate, although students may take additional courses to prepare themselves for subsequent stages of their post-graduate career.

**Time Limit for Degree Completion:** 7 years

**Campus Location:** Main

**Full-Time/Part-Time Status:** Doctoral students are expected to be enrolled full-time. Part-time students are accepted in exceptional circumstances. Students should note that classes are scheduled both during the day and evening as scheduling demands. Students are expected to be available for classes when they are scheduled.

**Interdisciplinary Study:** The program encourages interdisciplinary coursework, research, and interactions among faculty and students with interests in a wide range of fields. Many of the students entering the Criminal Justice Ph.D. program have backgrounds in Counseling, Economics, Geography, History, Political Science, Psychology, Social Work, Sociology, and Urban Studies.

**Ranking:** In the 2018 rankings by *U.S. News & World Report*, Temple University’s Ph.D. program in Criminal Justice is tied for 13th in Criminology. In addition, *The Chronicle of Higher Education*’s Faculty Scholarly Productivity Index identifies the faculty of the Criminal Justice department as the sixth most productive among all doctoral programs in Criminology and Criminal Justice.

**Areas of Specialization:** Faculty members specialize and offer substantial coursework in a wide array of areas, including:

- Corrections and community corrections
- Court processes
- Crime and the physical/social environment
- Criminal justice policymaking and strategic management
- Criminal law
- Criminological theory
- Discretion in criminal justice
- Issues in policing
- Juvenile justice
- Organized crime
- Qualitative/quantitative research methods
- Restorative justice
- Socialization and deviant behavior
- Statistical analysis
- White collar crime

**Job Prospects:** The Ph.D. program is primarily dedicated to producing well-trained criminologists, researchers, and criminal justice practitioners. The job market for an individual with a Ph.D. degree in the field is extremely good. Most of our graduates enter the academy as university professors while others advance their careers in research for government or private agencies.

**Non-Matriculated Student Policy:** Non-matriculated students are eligible to take some of the graduate courses offered in Criminal Justice. If accepted into the program, up to 9 credits may be applied toward the degree program. For some courses, permission of the instructor is required before registration by non-matriculated students can occur.

**Financing Opportunities:** The principal duties of a Teaching Assistant include assisting faculty members in classroom (field, observatory) instruction, conducting tutorials and discussion sections, and grading quizzes. Research Assistants are expected to devote 20 hours per week on average to research obligations. They are assigned to a faculty member or principal investigator investigating a specific research project. The appropriate subjects are determined by consultation between the student and the student's research and academic advisors. Both Teaching and Research Assistantships carry a stipend and full tuition remission for up to 9 credits per term. Applications should include:
1. a statement of previous teaching and/or research experience, areas of interest, and future goals;
2. unofficial transcripts; and
3. a curriculum vitae.

The Department makes assistantship offers in late Spring of each year.

Admission Requirements and Deadlines

Application Deadline:

Fall: December 15; November 30 international

Applications are evaluated from the end of October until the deadline. Late applications may be considered for admission.

APPLY ONLINE to this graduate program.

Letters of Reference:
Number Required: 3

From Whom: Ideally, the letters should be obtained from college/university faculty members familiar with the applicant's academic competence. Letters from employers and other non-academic assessors are accepted but generally carry far less weight.

Master's Degree in Discipline/Related Discipline: A master's degree is not required.

Bachelor's Degree in Discipline/Related Discipline: A baccalaureate degree in Criminology/Criminal Justice, Geography, History, Law, Political Science, Social Work, Sociology, or a related field is required.

Statement of Goals: In approximately 500 to 1,000 words, discuss your specific interest in Temple's program, your research goals and how they relate to Temple's program, your future career goals, and your academic and research achievements.

Standardized Test Scores:
GRE: Required. The minimum acceptable scores are 153 verbal and 144 quantitative. Applicants with scores just below are considered if other aspects of their application are especially strong.

Applicants who earned their baccalaureate degree from an institution where the language of instruction was other than English, with the exception of those who subsequently earned a master's degree at a U.S. institution, must report scores for a standardized test of English that meet these minimums:

- TOEFL iBT: 79
- IELTS Academic: 6.5
- PTE Academic: 53

Resume: Current resume required.

Writing Sample: The writing sample should demonstrate your ability to research and write a scholarly paper. The paper should not be too lengthy (up to 10 pages is preferable) and should be fully referenced according to a professional, scholarly style manual. Although it need not be related directly to Criminal Justice, it should reflect your ability to prepare a social science paper.

Advanced Standing: Graduate coursework taken as part of a master's degree program at an accredited institution prior to matriculation at Temple may be accepted for advanced standing credit, provided the coursework is relevant to the Ph.D. in Criminal Justice. To request advanced standing, the applicant must provide an official transcript from her/his prior graduate institution to the Graduate Chair that clearly states “M.A. awarded” and the date of its awarding. The Graduate Committee reviews the request.

Only grades of “B” or better are accepted. If the request is granted, the student receives advanced standing and is awarded a maximum of 15 credits. Students with transferred credits should expect that they will have to complete much of the required coursework in residence to ensure that they are adequately prepared to take their Ph.D. comprehensive exams.

Program Requirements

General Program Requirements:
Number of Credits Required to Earn the Degree: 48

Required Courses:
Criminal Justice, Ph.D.

Total Credit Hours: 48

1. Any CJ course at the 8000 or 9000 level that is not a required course may be taken as an elective. With approval from the student's advisor, s/he may take up to two graduate-level courses outside the department.

2. Of the 6 required research credits, a minimum of 2 credits of CJ 9999 must be taken. The other 4 credits may be taken in any combination of CJ 9994, CJ 9998, and CJ 9999.

Culminating Events:

**Comprehensive Examinations:**
Two comprehensive examinations must be passed. One is in “Justice,” which has the Criminal Justice system as its focus. The second is in “Crime,” which has theory as its focus. The purpose of the comprehensive exams is to demonstrate critical and interpretive knowledge in specialized areas of both the Criminal Justice system and Criminal Justice theory.

**Prospectus Defense:**
The prospectus defense evaluates the student's ability to apply specific research and/or analytic methods to the questions addressed in the prospectus. The defense occurs within several weeks of the student's advisor confirming, in writing to the Graduate Chair, that the student is ready to defend her/his prospectus.

Ideally, the prospectus defense should be completed within one academic year of the comprehensive examinations. The prospectus defense consists of a short (30-40 minute) presentation of the prospectus by the student to faculty and graduate students. Following the presentation, the Graduate Chair mediates a question-and-answer session between the student and audience. The members of the student's Doctoral Advisory Committee normally pose the initial questions at the defense. When these have been exhausted, other audience members are asked to put forth any questions they have for the student. The defense is scheduled to last no longer than two hours.

The Doctoral Advisory Committee must evaluate the quality of the presentation and of the answers provided during the question-and-answer session. Committee members look for evidence of a breadth and depth of understanding of specific substantive and methodological areas. In addition, they gauge the student's ability to utilize her/his knowledge to address the questions posed during the defense. Each member votes to pass or fail the student. Members can also vote to pass pending the completion of specified changes to the prospectus. In order to pass, a majority of the committee members must agree that the defense has been satisfactorily completed.

Students who are preparing to defend their prospectus should arrange some dates/times for the defense with the Doctoral Advisory Committee. The student should then inform the Graduate Chair of these dates/times and confirm the final date/time selected. Finally, the Graduate Chair provides confirmation of the time, date, and room.

**Dissertation:**
The dissertation is an original empirical study that makes a significant contribution to the field of Criminal Justice. It should expand the existing database and demonstrate the student's knowledge of both research methods and a mastery of her/his primary area of interest. Dissertations should be rigorously investigated; uphold the ethics and standards of the field of Criminal Justice; demonstrate an understanding of the relationship between the primary area of interest and the broader field of Criminal Justice; and be prepared for publication in a professional journal.

The Doctoral Advisory Committee is formed to oversee the student's doctoral research and is comprised of at least three Temple Graduate Faculty members. Two members, including the Chair, must be from the Department of Criminal Justice. Committee compositions must be approved by the Department's Graduate Committee. The Chair is responsible for overseeing and guiding the student's progress, coordinating the responses of the Committee members, and informing the student of her/his academic progress.
The Dissertation Examining Committee evaluates the student's dissertation and oral defense. This committee is comprised of the Doctoral Advisory Committee and at least one additional Graduate Faculty member from outside the Department of Criminal Justice. The Outside Examiner should be identified no later than the beginning of the term in which the student will defend the dissertation. The Dissertation Examining Committee evaluates the student's ability to express verbally her/his research question, methodological approach, primary findings, and implications. The Committee votes to pass or fail the dissertation and the defense at the conclusion of the public presentation.

If a student needs to change a member of a Committee, the new member must be approved by the Department's Graduate Committee and registered with the Graduate Secretary and the Graduate School.

Students who are preparing to defend their dissertation should confirm a time and date with their Doctoral Advisory Committee and register with the Graduate Secretary at least 30 days before the defense is to be scheduled. The Graduate Secretary arranges the time, date, and room and forwards to the student the appropriate paperwork. After the Graduate Secretary has arranged the time, date, and room for the defense, the student must send the Graduate School a completed "Announcement of Dissertation Defense" form, found in TUportal under the Tools tab within "University Forms," at least 10 working days before the defense. The department posts flyers announcing the defense.

Courses

CJ 5001. Evidence-Based Policing. 3 Credit Hours.
The aim of this course is to introduce police professionals to the growing body of research and knowledge about their job, and develop a desire to merge evidence-based practice into their professional life. Evidence-based practice is about making decisions through the conscientious, explicit and judicious use of the best available evidence from multiple sources by asking an answerable question, acquiring evidence, critically appraising the trustworthiness and relevance of the evidence, aggregating the evidence together, applying the evidence into the decision-making process, and assessing the outcome. The course is also designed to help practitioners understand what is necessary to develop their own evidence about work practices. On successful completion of the course, students will be able to contrast the evidence-based approach to opinion, expertise and experience; summarize influential studies in policing; and systematically gather, collate, assess and weigh evidence on a topic from various sources.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.
CJ 5011. Influencing Decision-Makers. 3 Credit Hours.
The aim of this course is to provide students with an understanding of the role of analysis in policing, crime prevention, and criminal investigation. The course provides an overview of intelligence-led policing, criminal intelligence, the intelligence cycle, the 3-i model, strategies for developing analytical capacity, tactical and strategic crime prevention planning, and techniques for intelligence and analytical product dissemination. The course will also introduce analysts to analytical techniques used by intelligence officers.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.

CJ 5012. Crime Science Tools and Techniques. 3 Credit Hours.
The aim of this course is to provide a structure and framework for the development of skills in crime science, and the evaluation of crime prevention strategies. Course components will include structuring projects for evaluation, the appreciation of crime prevention mechanisms, data preparation, process and outcome evaluation, time series analysis, and the use of spatio-temporal techniques such as the weighted displacement quotient. On successful completion, students will be able to set up crime prevention projects, monitor ongoing implementation, and assess any crime reduction outcomes.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.

CJ 5021. Ethical Governance. 3 Credit Hours.
Ethical governance refers to organizational practices designed to achieve value-driven policing across the ranks. It strives to align everyday policing operations (both internally and externally) with enduring democratic values, including policing by consent, access to justice, equality, equity and respect for human rights. In a democratic society, such values must be sustained both within police organizations as well as externally, through relationships with citizens. Police leaders, policy-makers and scholars are looking afresh at mechanisms for enhancing ethical governance, particularly in light of recent threats to police legitimacy. In order to balance evidence-based policing with core organizational values, police leaders must cultivate and develop officers that perform with the highest levels of community commitment, integrity, and innovation. This course canvasses important concepts, debates, visions and practices in ethical governance, providing students with the tools to critically examine challenges and opportunities in their own organizational environments. The aim of this course is to identify and critically examine the ethical dimensions of leadership in a democratic society, and to explore ways of aligning police operations and administration with enduring organizational values.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.

CJ 5022. Developmental Leadership. 3 Credit Hours.
This course will help graduate policing students develop an appreciation for formal and informal leadership roles and how best to influence differing groups of followers. In light of increasing public and media scrutiny of police interactions with minority group members, understanding leadership in tense or in extremis situations is invaluable. Understanding detractors from effective leadership such as bias and the potential for dehumanization are important to understanding the common reactions when in the role of police officer. Students will consider the need for flexibility across the various environments and activities encountered by police.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.

CJ 5023. Seminar in Executive Management. 3 Credit Hours.
The aim of this executive seminar program is to ask students to reflect on their core values, and those of their agency and to think more critically about how these interact with the competing core values of other branches of city government, other police departments and aspects of the judicial system, and stakeholders from outside of government, such as private industry, the media, community and protest groups. In a seminar setting alongside the course instructor as moderator and an invited guest, each week provides an opportunity to meet leaders from outside of policing, identify areas of common ground, and cultivate a deeper, more critical understanding of the student's role leading one of the major arms of government. Students will emerge with a clearer sense of their role in directing and forming the vision, culture and ethos of their organization.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.
CJ 8001. The American Criminal Justice System. 3 Credit Hours.
A broad, survey course designed for students beginning graduate studies in criminal justice who lack background in the field or who seek to investigate the latest theoretical, programmatic, and policy issues. The class familiarizes students with historical milestones and shifts in criminal justice philosophy and practice. It reviews the operations of criminal justice agencies and assesses current practices in light of evidence on outcomes and other consequences. The course explores the significance of race, class, and gender in criminal justice processing, agencies and programs. Students have the opportunity to learn and apply a range of methods and theoretical perspectives in analyzing and critiquing selected justice system practices and reform measures.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.

CJ 8101. Decision Making in Criminal Justice. 3 Credit Hours.
Core Course. Conceptualizes criminal justice as a series of interrelated decision stages. Examines organizational, legal and research issues related to each decision stage.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.

CJ 8102. Research Methods in Criminal Justice. 3 Credit Hours.
Core course. Assumes prior familiarity with basic methodology and statistics. Prepares students to conduct criminal justice research and evaluation. Covers topics of causality, reliability, validity, and quasi-experimental methods.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.

CJ 8104. Law and Social Order. 3 Credit Hours.
Core Course. Examines moral, practical, legal, and constitutional limitations of law as a means of securing social order. Classes and readings are designed to promote critical analysis of primary (constitutions, statutes, cases) and secondary (legal, philosophical, social science literature) sources of law, with special focus on the role of the Supreme Court in balancing state vs. individual interests and on rules and standards by which the Court's discretion and decision-making can be assessed.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.

CJ 8105. Statistical Issues and Analysis of Criminal Justice Data. 3 Credit Hours.
Core Course. Introduces criminal justice graduate students to simple and multiple regression analyses in criminal justice research. Extended treatment of the detection of non-normal data through the use of graphical and statistical techniques, and the statistical implications of highly non-normal data that are encountered in many areas of criminal justice. Clarifies relations between statistical assumptions, results, and use of results for decision making purposes.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.

CJ 8106. Theories of Crime and Deviance. 3 Credit Hours.
Core Course. The goal of the course is to provide an appraisal of the foundations for understanding criminal behavior. Students read major current and classic works couched at different levels of analyses about the origins of criminal behavior including not only violent and property crime but also delinquency, white collar crime and regulatory violations.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.

CJ 8201. Court Processes and Administration. 3 Credit Hours.
Focuses on historical development, structure and processes of the American criminal court system. Identifies key decision points in the criminal process (pretrial, charge, plea negotiations, sentencing etc.) and examines their impact on the work of the court. Studies the role of key figures (prosecutor, judge, defense attorney, defendant and victim) in contemporary court setting. All discussions set within broad context of the inevitable conflict between personal liberty and community safety, and the contrasting goals of the "formal" criminal justice system versus the "informal" courtroom workgroup.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.
CJ 8202. Corrections. 3 Credit Hours.
Analyzes the theory, practices and policies of the American correctional system, covering the nature and administration of both institutional and community sanctions and agencies. Students explore competing penal theories and review evidence on the effectiveness of correctional practices. The course investigates the historical development and evolution of imprisonment, trends in the use of confinement, and the effects of incarceration on offenders, families and communities. Students analyze the characteristics of correctional populations and debate the causes and implications of race, class and gender differences. The course identifies significant current issues and reviews the ethical, legal and practical dimensions of proposals for reform. Note: Prior to fall 2016, the course title was "Correctional Philosophy and Administration."

Level Registration Restrictions: Must be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.

CJ 8203. Issues in Law Enforcement. 3 Credit Hours.
This course focuses on conceptual models of policing and how they affect operational priorities and resource decisions in law enforcement. Topics include community policing, problem-oriented policing and intelligence-led policing, among others. This is a wide-ranging course that explores policing from an international perspective and through the lens of the varying contentious issues of the day.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.

CJ 8204. Policy and Practice in Juvenile Justice. 3 Credit Hours.
This course is designed to increase the student's understanding of the purposes, structure and processes of this distinctly American invention, the juvenile justice system. Together, we explore its recent development and current policy initiatives that are reshaping its role in our society. We also look at the target of this system: delinquent kids. We examine the juvenile justice system in terms of its underlying aims, its historical foundations, and its sociopolitical contexts, explanations of delinquency, theories of child development, case law, legislation, changes now occurring with respect to its goals, and recent initiatives to increase dependency on scientific evidence of effectiveness. In doing so, we seek to understand the system's limitations, contradictions and strengths. At the same time, we examine the role that research plays in shaping the policies and programs that constitute this system.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.

CJ 8205. Aggression and Violence. 3 Credit Hours.
Students will learn about different types of violence in the United States, including homicide, assault, robbery, family violence, youth violence, drug related violence, and gun-related violence. A three-part, interdisciplinary perspective guides this inquiry: (1) examination of patterns and trends, (2) examination of correlates and causes, including biological, psychological and sociological theories, and (3) investigation of different policy responses to violence. At the conclusion of the course, students should be able to do two things: (1) critically discuss major explanations that have been offered for different kinds of violent behavior, and (2) critically evaluate policies for preventing and controlling specific types of violence.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.

CJ 8221. Qualitative Approaches to Research. 3 Credit Hours.
This course will provide an introduction to different paradigms, approaches and skills that constitute part of a very broad field of qualitative research. This course is designed to be highly interactive. All members of the class will play an active role in leading discussions, sharing knowledge and experiences, and voicing concerns and questions. Students will conduct exercises for "stretching" their skills of observation, interviewing, and data analysis, as well as gain experience in reviewing and critiquing published research. Finally, we will examine some of the more complex issues surrounding the ethics of research with human subjects.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.

CJ 8222. Simulation Modeling. 3 Credit Hours.
Social organization involves complicated systems, such as organizations, institutions and families - and their component parts. The components of systems frequently interact in a complex fashion. Simulation models offer a useful approach to understanding this complexity. Simulation models allow for the creation of theoretically informed representations of complex dynamic systems. These representations can be used to conduct virtual experiments with the goal of strengthening theories and developing better designs for empirical research. The course covers different types of simulation modeling, but focuses on applications of Agent-Based Modeling. Students will gain experience developing conceptual models and programming simple simulation models.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.
CJ 8223. Risk, Prediction and Classification. 3 Credit Hours.
This course focuses on issues surrounding prediction and classification in criminal justice. We examine different perspectives on risk and danger, risk assessment models, the possibilities of accurate predictions, and the implications (practical, social, ethical) of prediction and classification in criminal justice. These include career criminal models and their repercussions in criminal justice policy, the role of risk assessment instruments in community corrections, inmate classification and release, and others. In addition to these practical applications, we will consider the implications of the increasing salience of the notion of "risk" in public and policy discourse.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.

CJ 8224. Drugs, Crime and Justice. 3 Credit Hours.
This advanced graduate course considers the problems of drug abuse, crime and the justice system's response to drug-related crime. A multidisciplinary perspective is used to analytically and critically explore these issues from social, legal, political, public health, enforcement, and criminological perspectives. Specific topics covered include theoretical explanations for drug abuse, drug legalization and decriminalization, drugs and violence, treatment alternatives to incarceration, public health effects, and mandatory sentencing laws for drug offenders. Readings, papers, and in-class discussions and formal debates are used to further students' understanding of the connections between drug abuse and crime, effective criminal justice responses to drug-related crime, and drug policies.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.

CJ 8225. Rehabilitation, Reentry and Recidivism. 3 Credit Hours.
Numerous prison- and community-based approaches have been developed in recent years to help ex-offenders successfully reintegrate into the community. Promising in-prison approaches include comprehensive risk/needs assessment, drug treatment, cognitive behavioral treatment, vocational and basic education, prison industries, and prerelease planning. Community-based approaches include a wide range of options that provide reintegration assistance and linkages to community social services. In this class, we examine theoretical models of rehabilitation (e.g., principles of effective correctional intervention) and recidivism (e.g., life course and reintegration perspectives), including related research, and we investigate current re-entry initiatives at the national, state, and local levels.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.

CJ 8226. Transnational and Global Crime. 3 Credit Hours.
Global criminology is an emerging field covering international and transnational crimes that have not traditionally been the focus of mainstream criminology or criminal justice. This course will examine the diverse dimensions of global and transnational crime. Students will examine and discuss historical and contemporary patterns, modus operandi, capabilities, and vulnerabilities of global and transnational criminals and organizations. Course content includes an introduction to global and transnational crime, a discussion of the "problem" of global and transnational crime, a review of illicit activities of criminal organizations, an examination of the link between transnational crime and harms, and a review of contemporary approaches to combating global and transnational crime. The seminar will include a review of organized crime, corporate crime, cybercrime, and terrorism and war in Europe, Russia, the Middle East, Asia, Africa and The Americas.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.

CJ 8227. Contemporary Issues in Youth Crime: Gangs. 3 Credit Hours.
This course explores the modern urban street gang by investigating the extensive history of theory and research on street gangs. The first half of the course will attempt to answer such questions as: Why do youth and young adults join gangs? Why do they leave? Are street gangs similar to other deviant groups, delinquent networks and/or pro-social groups such as fraternities? The second half of the course will focus on the community response to gangs with a heavy emphasis on comparing and contrasting a variety of "evidence-based" models of gang prevention and intervention. By the end of the semester students will have an in-depth understanding of why the problems of gangs and gang violence remain so intractable today, and will be able to identify a number of areas where theory, research and practice have failed to connect.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.
CJ 8228. Race, Crime, and Justice. 3 Credit Hours.
The strong connection between race and crime in the United States occupies the discourse of media, policy-makers, and scholars, alike. This course considers the examination of race as a central concern for scholars of criminal justice especially in an era of mass incarceration. Specifically, we engage in the following questions: How large are racial and ethnic differences in criminal involvement? How do we theoretically construct and measure race and how do these measurements impact how we understand racial categories and crime? What are the implications of these “facts” on the popular understanding of the race-crime connection? What role do criminal justice apparatuses (police, courts, jails, for instance) play in reproducing and amplifying ideas about race and crime? Using various interdisciplinary theoretical approaches, we examine the complex ways in which race-crime-criminal justice is both a product of societal forces and an “engine” reproducing racial arrangements and power relationships in society.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.

CJ 8231. Environmental Justice. 3 Credit Hours.
By land, by sea, and by air, communities across America confront environmental problems, many of these arising from the commission of environmental crimes, and in response to which citizens and communities seek environmental justice. This course addresses structural issues in environmental justice and environmental crimes, environmental victimization, and the role of compliance in resolving issues of environmental justice.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.

CJ 8232. Crime Mapping. 3 Credit Hours.
Spatial distribution of crime and criminals is examined in relation to the geographic processes that influence this distribution. This course involves half seminar and half lab work. Seminars include the structure of geographic information and spatial analysis techniques, alongside spatial theories of crime and how these theories can explain crime patterns. Lab work instructs students in the use of GIS to map and analyze crime events, from the national level down to the city level. The GIS and crime mapping component assumes no prior knowledge of GIS, uses the latest ArcGIS software, and concentrates on crime in the City of Philadelphia. Note: Prior to fall 2016, the course title was “Geographical Perspectives of Crime.”

Level Registration Restrictions: Must be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.

CJ 8233. Communities and Crime. 3 Credit Hours.
This course addresses the connections between features of community, and crime, fear and disorder, at various levels of analysis ranging from the community to the street block. It covers varying theoretical perspectives on these connections, with the aim of educating students in the relative strengths and weakness of these various perspectives. Students learn to apply these various perspectives and tools to case studies and actual locations.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.

CJ 8234. Criminal Victimization and Criminal Justice. 3 Credit Hours.
This course explores the problem of victimization [general vs. criminal], the types of victims [direct vs. indirect; individual vs. collective, etc.], and the harms involved [financial vs. physical vs. mental]. It also examines the fairness and efficacy of a wide variety of preventive, remedial, extra-legal and legal [civil, criminal] responses by society and by the criminal justice system. Emphasis is upon data sets and research studies shedding light upon the levels, correlates, dynamics, and consequences of major forms of victimization, as a basis for critical analysis of victimization theory and existing and potential laws, policies, programs, practices, and technologies for reducing its incidence and impact.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Graduate.

Repeatability: This course may not be repeated for additional credits.
CJ 8235. Criminal Justice Organization: Structure, Process and Change. 3 Credit Hours.
Criminal justice organizations are public bureaucracies; they aren’t typically worried about a financial bottom line. Their aims have to do with public safety, controlling criminals, and managing large populations of incarcerated individuals. The criminal justice system comprises a complex network of agencies and organizations that often pursue very different goals. Consequently, one reality of these organizations that we need to explore is how they work together to achieve common goals. We examine both criminal justice systems and criminal justice organizations from both structural and a behavioral perspectives. Our main purpose is to understand how they work so that we can, when it is desirable, change them, the way the relate to each other, and the way they relate to the larger society. We emphasize the manner in which criminal justice systems and their environments are changing, and the importance of capitalizing on those changes. Leadership and entrepreneurial thinking will be emphasized as well as structural approaches that foster development.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Graduate.
Repeatability: This course may not be repeated for additional credits.

CJ 8236. Organized Crime. 3 Credit Hours.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Graduate.
Repeatability: This course may not be repeated for additional credits.

CJ 8237. Program Planning and Evaluation in Criminal Justice. 3 Credit Hours.
Program evaluation is the systematic acquisition and assessment of information to provide useful feedback about a program. In other words, program evaluation facilitates improvements in program performance and outcomes. Evaluation also enables policy makers and funding agencies make decisions about continued support of a program or program replication. Students in this course will develop the capacity to develop and produce useful feedback. They will gain a thorough knowledge of the methods of program evaluation, from the point of framing the goals of the evaluation to communicating findings. Topics will include: assessing the evaluability of the program, logic models and theories of change, formative and summative evaluations, experimental and quasi-experimental designs, data sources and data collection, analyzing and interpreting data, reporting findings, the utilization of results, and synthesizing findings across evaluation studies.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Graduate.
Repeatability: This course may not be repeated for additional credits.

CJ 8302. Advanced Methods and Issues in Criminal Justice Research. 3 Credit Hours.
Course involves students in hands-on activities allowing them to learn how to conduct and evaluate different types of research approaches commonly used in criminal justice. Course assumes a solid grounding in graduate-level research methods, and strong multivariate quantitative skills. These "learning by doing" activities, ideally organized around a single topic and conducted for a specific client, are complemented by high level discussions of and readings about key ongoing philosophical, pragmatic, and policy related research issues, and how those issues apply to and play out in the fields of criminal justice and criminology.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Graduate.
Repeatability: This course may not be repeated for additional credits.

CJ 8310. Special Topics Seminar. 3 Credit Hours.
Special topics in criminal justice research are examined. Special topics courses are developed to cover emerging issues or specialized content and they do not repeat material presented by regular semester courses.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Graduate.
Repeatability: This course may be repeated for additional credit.

CJ 8320. Seminar in Criminal Justice Policy. 3 Credit Hours.
Special topics in current criminal justice policy are explored. Special topics courses are developed to cover emerging issues or specialized content and they do not repeat material presented by regular semester courses.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Graduate.
Repeatability: This course may be repeated for additional credit.
CJ 8330. Seminar - Advanced Research Topics. 3 Credit Hours.
Advanced topics in criminal justice and criminological research are explored.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Graduate.

Repeatability: This course may be repeated for additional credit.

CJ 9082. Independent Study. 1 to 3 Credit Hour.
Permits individualized study of a specific topic in consultation with a faculty member. Not intended as a substitute for any required course.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Graduate.

Repeatability: This course may be repeated for additional credit.

CJ 9083. Directed Readings. 1 to 9 Credit Hour.
Level Registration Restrictions: Must be enrolled in one of the following Levels: Graduate.

Repeatability: This course may be repeated for additional credit.

CJ 9982. Research Seminar in Criminal Justice. 3 Credit Hours.
Fulfills part of the research requirements for the student working toward completion of the Ph.D. Involves advanced reading and research in areas agreed upon by the Ph.D. student and professor. Includes group and individual meetings. Aim is an advanced research paper by the student that may focus in an area related to the proposed doctoral research.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Graduate.

Repeatability: This course may be repeated for additional credit.

CJ 9984. Preliminary Examination Preparation. 1 to 6 Credit Hour.
Level Registration Restrictions: Must be enrolled in one of the following Levels: Graduate.

Repeatability: This course may be repeated for additional credit.

CJ 9994. Thesis Research. 1 to 6 Credit Hour.
Registration required each semester after Preliminary Examinations while researching the dissertation proposal.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Graduate.

Repeatability: This course may be repeated for additional credit.

CJ 9999. Doctoral Dissertation Research. 1 to 6 Credit Hour.
Restricted to students who have passed the Preliminary exams and filed an approved proposal with the Graduate School.

Level Registration Restrictions: Must be enrolled in one of the following Levels: Graduate.
Student Attribute Restrictions: Must be enrolled in one of the following Student Attributes: Dissertation Writing Student.

Repeatability: This course may be repeated for additional credit.
