Fibers and Materials Studies, M.F.A.

TYLER SCHOOL OF ART AND ARCHITECTURE (https://tyler.temple.edu/#/prospective)

About the Program

The Fibers and Materials Studies program at the Tyler School of Art and Architecture is a two-year, 60-credit program leading to the Master of Fine Arts (M.F.A.) degree that pushes students to refine their aesthetic and embrace a broad definition of material exploration in relation to relevant global issues. Under the mentorship of an influential and diverse faculty and visiting artists on the cutting-edge of creative practice and critical inquiry, students find a compassionate, inclusive environment primed for experimentation, interdisciplinary collaboration, and independent study.

Students have unlimited access to Tyler’s state-of-the-art equipment and the abundant resources of Temple, a large public research university, to drive their research-based concepts. Fibers and Materials Studies M.F.A. students also collaborate across the school through projects like Tyler’s Natural Dye Garden, as well as leverage Philadelphia’s landscape and vibrant DIY art scene to conduct community-based projects; study social and political issues; and examine the relationship between materials, processes, and concepts.

Time Limit for Degree Completion: 4 years

Campus Location: Main

Full-Time/Part-Time Status: Full-time status is required.

Interdisciplinary Study: The Fibers and Materials Studies curriculum embraces material exploration—from community-based projects to experimental performance, sound, and video—in relation to issues surrounding identity, power, sustainability, and more. Through Art History classes, electives, and seminars, students are engaged in emerging topics in the field and the broader art world. Influential visiting artists and programs are matched to each cohort to accelerate their growth.

Study Abroad: Many Tyler M.F.A. students choose to pursue summer study abroad opportunities at Temple University Rome, a home base for immersive artistic, academic, and cultural exploration for Tyler students since 1966. Historically, students who have immersed themselves in interdisciplinary thought and practice abroad have returned with their focused work strengthened.

Accreditation: This degree program is accredited by the National Association of Schools of Art and Design (NASAD).

Areas of Specialization: In the Fibers program, equipment is available for traditional and contemporary techniques, including new technologies that allow the development of surface imagery with photographic stencils, as well as the creation of weave structures on a Jacquard Loom TC2. Students are encouraged to experiment with the materials, techniques, and concepts previously developed in their work.

Job Prospects: A Tyler Fibers and Materials Studies M.F.A. degree prepares graduates for a rigorous studio practice and develops their aptitude to teach at leading institutions. Graduates are prepared for careers as professional artists, craftspersons, designers, and educators.

Non-Matriculated Student Policy: M.F.A. courses are restricted to matriculated students.

Financing Opportunities: In addition to federal student aid, teaching assistantships and fellowships are available on a competitive basis to support Tyler M.F.A. students.
