Program Objectives

This program is offered on the Main Campus. The curriculum in Engineering Technology provides a broad base of technological skills extending across the traditional fields of engineering technology with a concentration designed by the student and program coordinator to meet personal and career objectives. A plan of study can be developed with a focus in areas such as construction engineering technology, computer engineering technology, mechanical engineering technology, or general engineering technology.

The Engineering Technology Program is accredited by the Engineering Technology Accreditation Commission (ETAC) of ABET, <https://www.abet.org>.

Summary of Requirements

University Requirements

All new students are required to complete the university's General Education (GenEd) curriculum.

All Temple students must take a minimum of two writing-intensive courses for a total of at least six credits. The writing-intensive course credits are counted as part of the major; they are not General Education (GenEd) or elective credits. The writing-intensive courses must be completed at Temple University and students may not transfer in credits to satisfy this requirement. The specific writing-intensive courses required for this major are:
