This minor serves students in other majors who would benefit from a deeper understanding of journalism's role in society. Coursework explores the social, political, and economic issues that underlie journalism's role in public life. This minor has a natural affinity with the liberal arts and education. It offers students headed toward a range of careers — for instance, community advocacy work, teaching, media research, law, policymaking, public history, global development, and many other fields — a valuable perspective on how contemporary issues in journalism will impact their roles as citizens and professionals.

## Requirements

To earn this minor, students must complete a minimum of 18 credits.
