Mathematics BS/MS

Overview
The +1 Bachelor of Science in Mathematics and Master of Science in Mathematics program is an accelerated program within the College of Science and Technology. To participate in this +1 program, a mathematics major should be enrolled in the BS degree program. Application to continue in the MS program must be made to the graduate chair of the department no later than the first semester of the senior year. In addition to completing the BS requirements, the student must complete four additional graduate-level mathematics courses numbered 5000 and above by the end of her/his senior year. If the General Education and college requirements have also been met, the student will be awarded the BS degree at the conclusion of this portion of the program. All courses must be passed with a grade of C- or better, and no more than two graduate courses can carry a grade less than B- for the student to continue with the MS portion of the program.

+1 Year Course Requirements
The student will take a total of six graduate-level courses, selected to conform to the MS requirements. At the end of the +1 year, the student must either write a master's thesis or pass one of the following examinations:

- Master's Comprehensive Examination in Pure Mathematics
- Master's Comprehensive Examination in Applied Mathematics
- PhD Combined Comprehensive Examination (MS level pass)
