

Natural Sciences with Concentration in Biology, B.S.

Learn more about the Bachelor of Science in Natural Sciences.

The Bachelor of Science (B.S.) in Natural Sciences with a concentration in Biology provides students more breadth than traditional science programs. Many exciting areas of scientific inquiry, such as the neurosciences, environmental sciences, and biophysical sciences, require general science backgrounds that encompass multiple science disciplines. This program prepares students for these trans-disciplinary programs.

With careful selection of laboratory-based courses, students are well prepared for entry level science positions, and a variety of graduate programs both disciplinary and interdisciplinary. In particular, this is an excellent background for students wishing to enter graduate programs in education, forensic science, scientific writing or editing, or related science technology areas. Students may also select many of the courses required for a variety of pre-health and professional school programs.

In the Bachelor of Science degree, there is greater emphasis on depth of science content knowledge and application of knowledge compared with the Bachelor of Arts in Natural Sciences. The B.S. degree requires additional science coursework and offers more advanced study in natural sciences. This option provides more flexibility for students declaring the B.S. in Natural Sciences later in their undergraduate course of study as they can apply more disciplinary science courses to meet the additional science requirements of this degree.

Students in this program can apply to our Professional Science Master's (PSM) programs in the following areas: Bioinnovation, Biotechnology and Scientific Writing. Students interested in these PSM programs can apply for admission to the +1 B.S./P.S.M. accelerated options for completion of these degrees. PSM programs provide specific curricula and training for workforce entry or re-entry.

This program of study can prepare students for graduate study in a traditional science discipline, and many Natural Sciences graduates have found employment in technical fields.

Bachelor of Science

Summary of Requirements for the Degree

1. University Requirements (123 total s.h.)

- Students must complete all University requirements including those listed below.
- All Temple students must take a minimum of two writing-intensive courses at Temple as part of their major. The specific writing-intensive course options for this major are:

Code	Title	Credit Hours
SCTC 2396	Writing for Science and Technology	3
SCTC 4396	Paradigms of Scientific Knowledge: Knowledge Discovery from Scientific Data	3

- Students must complete the General Education (GenEd) requirements.
 - See the General Education section of the *Undergraduate Bulletin* for the GenEd curriculum.
 - Students who complete CST majors receive a waiver for 2 Science & Technology (GS) and 1 Quantitative Literacy (GQ) GenEd courses.
- Students must satisfy general Temple University residency requirements.

2. College Requirements

- 45 Upper Level (2000+) credits within the College of Science & Technology (CST), the College of Liberal Arts (CLA), or the College of Engineering (ENG).
- 90 credits within the College of Science & Technology (CST), the College of Liberal Arts (CLA), or the College of Engineering (ENG).
- All students in the College of Science and Technology are required to take a one credit first year seminar. SCTC 1001 CST First Year Seminar is the appropriate course option for every entering first year CST major. Transfer students should use SCTC 2001 CST Transfer Seminar to fulfill this requirement. Other courses that fulfill this requirement may be found on the CST College Requirements page.

3. Major Requirements for Bachelor of Science (76-88 s.h.)

At least 7 courses required for the major must be completed at Temple. At least 2 courses in the chosen concentration must be completed at Temple.

(F) - Fall only course

(S) - Spring only course

- 1 Students may **not** take both CIS 1051 and CIS 1057 as their two CIS electives. They must choose one and then make another choice from the list for their second elective. Note: It is recommended that students take CIS 1051 as Python is the language of choice for most science programming needs.
- 2 SCTC 3312 is a variable credit course and must be taken for 3 credits in order to meet the requirement for this program. Since the default credits are set to 1, students must contact CSTbce@temple.edu to have an advisor change the credits to 3.
- 3 These courses are not required if MATH 1031 is completed.
- 4 The four electives (2200+) must all be taken from within the Biology department and must satisfy elective criteria of the department. **Note the Exception:** Natural Science majors in the Biology concentration are permitted to take BIOL 2001 Clinical Microbiology as an elective. In the circumstance where a laboratory course is the complement of a lecture course, both must be completed to fulfill the requirement for ONE science elective.
