

Natural Sciences BA with Biology Concentration

Overview

The Natural Sciences program provides students more breadth than traditional science programs.

Natural Sciences students **must select one of the following concentrations:**

- Biology
- Chemistry
- Earth and Environmental Sciences
- Physics

Many exciting areas of scientific inquiry, such as the neurosciences, environmental sciences, and biophysical sciences, require general science backgrounds that encompass multiple science disciplines. The **Bachelor of Arts in Natural Sciences with a concentration in Biology** helps students to explore both domestic and international culture through the foreign language and upper-level liberal arts course requirements.

Students planning graduate study or technical careers in one of these interdisciplinary areas, as well as students preparing for careers in health sciences, legal professions, science education, science-related business, or social service might be well served by the BA in Natural Sciences. This program of study can prepare students for graduate study in a traditional science discipline, and many Natural Sciences graduates have found employment in technical fields.

Students in this program can apply to our Professional Science Master's (PSM) programs in Bioinnovation, Biotechnology and Scientific Writing. Students interested in these PSM programs can apply for admission to the +1 BA/PSM accelerated options for completion of these degrees. PSM programs provide specific curricula and training for workforce entry or re-entry.

Campus Location: Main

Program Code: ST-NATS-BA
