# Natural Sciences BS with Earth and Environmental Sciences Concentration 

## Overview

The Natural Sciences program provides students more breadth than traditional science programs.
Natural Sciences students must select one of the following concentrations:

- Biology
- Chemistry
- Earth and Environmental Sciences
- Physics

Many exciting areas of scientific inquiry, such as the neurosciences, environmental sciences, and biophysical sciences, require general science backgrounds that encompass multiple science disciplines. The Bachelor of Science in Natural Sciences with a concentration in Earth and Environmental Sciences prepares students for these trans-disciplinary programs.

With careful selection of laboratory-based courses, students are well prepared for entry-level science positions, and a variety of graduate programs both disciplinary and interdisciplinary. In particular, this is an excellent background for students wishing to enter graduate programs in education, forensic science, scientific writing or editing, or related science technology areas. Students may also select many of the courses required for a variety of prehealth and professional school programs.

In the Bachelor of Science degree, there is greater emphasis on depth of science content knowledge and application of knowledge compared with the Bachelor of Arts in Natural Sciences. The BS degree requires additional science coursework and offers more advanced study in natural sciences. This option provides more flexibility for students declaring the BS in Natural Sciences later in their undergraduate course of study as they can apply more disciplinary science courses to meet the additional science requirements of this degree.

This program of study can prepare students for graduate study in a traditional science discipline, and many Natural Sciences graduates have found employment in technical fields.

Students in this program can apply to our Professional Science Master's (PSM) programs in Bioinnovation, Biotechnology and Scientific Writing. Students interested in these PSM programs can apply for admission to the +1 BS/PSM accelerated options for completion of these degrees. PSM programs provide specific curricula and training for workforce entry or re-entry.

Program Code: ST-NATS-BS

## Distinction in Major

To graduate with distinction in this major, a student must satisfy the following criteria:

- achieve a minimum 3.33 GPA in major or
- achieve a minimum 3.0 cumulative GPA and successfully complete six credits of internship coursework (SCTC 1385, SCTC 2385, or SCTC 3185) with approval by the program director.

## Accelerated Programs

Accelerated programs provide a pathway for students to pursue both an undergraduate degree and an advanced degree in a shorter amount of time. Below is a list of available accelerated programs for students in the BS in Natural Sciences.

- BA or BS in Natural Sciences / PSM in Scientific Writing
- BA or BS in Natural Sciences / PSM in Bioinnovation
- BA or BS in Natural Sciences / PSM in Biotechnology

These requirements are for students who matriculated in academic year 2023-2024. Students who matriculated prior to fall 2023 should refer to the Archives to view the requirements for their Bulletin year.

## Bachelor of Science Requirements

## Summary of Requirements for the Degree

1. University Requirements ( 123 total s.h.)

- Students must complete all University requirements including those listed below.
- All undergraduate students must complete at least two writing-intensive courses for a total of at least six credits at Temple as part of their major. The specific writing-intensive course options for this major are:

| Code | Title | Credit <br> Hours |
| :--- | :--- | ---: |
| SCTC 2396 | Writing for Science and Technology | 3 |
| SCTC 4396 | Paradigms of Scientific Knowledge: Knowledge Discovery from Scientific Data | 3 |

- Students must complete the General Education (GenEd) requirements.
- See the General Education section of the Undergraduate Bulletin for the GenEd curriculum.
- Students who complete CST majors receive a waiver for 2 Science \& Technology (GS) and 1 Quantitative Literacy (GQ) GenEd courses.
- Students must satisfy general Temple University residency requirements.

2. College Requirements

- A minimum of 90 total credits within the College of Science \& Technology (CST), the College of Liberal Arts (CLA), and/or the College of Engineering (ENG).
- A minimum of 45 of these credits must be upper-level (courses numbered 2000 and above).
- Complete a one-credit first-year or transfer seminar.
- SCTC 1001 CST First Year Seminar for every entering first-year CST student.
- SCTC 2001 CST Transfer Seminar for every entering transfer CST student.

3. Major Requirements for Bachelor of Science (76-88 s.h.)

At least 7 courses required for the major must be completed at Temple. At least 2 courses in the chosen concentration must be completed at Temple.

Students may not take both CIS 1051 and CIS 1057 as their two CIS electives. They must choose one and then make another choice from the list
for their second elective.
$\mathbf{2}$
SCTC 3312 is a variable credit course and must be taken for 3 credits in order to meet the requirement for this program. Since the default credits are
set to 1 , students must contact CSTbce@temple.edu to have an advisor change the credits to 3.
$\mathbf{3}$
These courses are not required if MATH 1031 is completed.
$\mathbf{4}$
The four science electives must be taken from within the EES department and satisfy elective criteria within that department. In the circumstance
where a laboratory course is the complement of a lecture course, both must be completed to fulfill the requirement for ONE science elective.
